Sometimes I catch myself wishing that we would cancel out all weather predictions for the duration of the drouth... It used to be that we had hope. Nowadays, we know ahead of time that the clouds are as empty as the proverbial "Missionary Box" so we fail to perk up even for a moment... Pardon me Dan, but I just had to speak up... We do appreciate you during the rainy seasons...

Cotton John please note: The teacher told her class of third graders that if they could answer the last question she asked at exactly school turning out time on each Friday afternoon that she would give them an additional holiday...

Friday afternoon came as the bell rang she asked; "How many pebbles on the seashore"... No one answered so she said; "I'll see you on Monday..."

Another week passed and at exactly the right moment she asked "How many stars in the sky"?... No one knew so she said; "I'll see you Monday".

The next week one young fellow figured out a system... Just as the bell was to ring he let go a big sack of marbles hull-gull down the aisle.

"Whose marbles are those?," asked the teacher as the bell rung...

Martin Luther King's, I'll see you Tuesday, correctly answered the wise little fellow.

Our children had been teaching my littlest grandson to say little prayers, and he was catching on faster than they had expected... One day he had a serious round with his older brother and in the fracas both got a paddling. The little one is a bit inclined to pout, so he sat there pouting and thinking for awhile. Finally he cupped his hands skyward and was saying something. His mother asked what he was doing. He answered; "I'm talking to Jesus, I need some help." I know Jesus was proud of him, and of course his grandfather was for sure.

Mrs. Kenneth Trent and Kerry of Lawton, Okla. visited their grandmother, Mrs. Cap Lane, Sunday and Monday.

Visiting in the home of Mr. and Mrs. Lois Putman through the week end were Mr. and Mrs. Jack Usrey, Clint and Brent, Mr. and Mrs. James Shults, Danny and Linda of Panhandle.

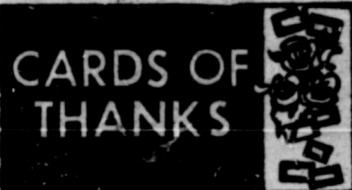

Mrs. Neva McCrary and son, Craig, of Alamogordo, N. Mex. and Mrs. Jiggs Mosley of Amarillo visited relatives and friends in Clarendon Friday afternoon.

**SHOTGUNNERS DON'T AIM**

You can improve your shotgun shooting by forgetting all about aiming.

A shotgun, except when rifle slugs are used, was never meant to be aimed. Your shooting will improve by simply pointing the gun at the target.

We would like to take this means of thanking all who were so kind to us in our hours of sorrow, for the flowers, food, and those who served it. There aren't enough words to tell each and everyone how much we appreciate all that was said and done for us. May God bless each and everyone of you.

First big public debate over the Legislature's spotlight issue—sale of liquor by the drink—was scheduled this week.

House Revenue and Taxation Committee set Tuesday afternoon hearing on the proposal to legalize mixed drink sales under five-cents-a-shot-tax, stiff retailers' fees and strict regulation.

One of this session's biggest crowds was on hand for the House Committee session. Dry forces were lined up in depth for opposition testimony. Citizens Committee for Tourism and the Regulated Sale of Mixed Drinks announced formation of a key support group—an advisory board of 37.

Liquor legislation already has been subject of these actions.

● House passed a bill setting 10 a.m.-9 p.m. hours (instead of present 9 a.m.-10 p.m.) for liquor package stores and ordering stores to close Christmas but permitting them to remain open on primary and general election days.

● Representatives killed the bill to permit private clubs in areas voted "wet" for any purpose (beer, wine or whiskey sales) to operate under the "pool" instead of the old "locker" system by which each member must replenish his own supply.

● Bill allowing beer distributors to continue supplying legal retailers although areas in which warehouses are located vote "dry" was signed into law, effective next August.

Rep. J. M. Simpson of Amarillo introduced a bill to put in all the strong enforcement measures advocated in the liquor-by-the-drink bill plus a \$5,000 annual tax on private clubs, but not to legalize "liquor by the jigger." It's being called the "jigger without the liquor" bill.

● REDISTRICTING STUDY BEGINS — All state representatives and some of their constituents will be called on for advice as to how to draw new federal court-directed state House and congressional district boundaries.

Rep. Gus Mutscher of Brenham, chairman of House District Committee, said sub-committee will conduct an intensive four-week study in an effort to produce bills acceptable to the lawmakers which also meet the court's one-man-one-vote yardstick.

Two principal congressional apportionments heard by the Committee were offered by Republicans and liberal Democrats at its first hearing. GOP-backed measure would pit only a pair of incumbent congressmen against each other—Reps. Graham Purcell of Wichita Falls and Omar Burleson of Anson.

Bill backed by Reps. Jake Johnson and R. L. Vale of San Antonio would throw Cong. Abraham Kazen of Laredo into the same Rio Grande Valley District with Cong. Eligio de la Garza of Mission; and Cong. John Dowdy of Athens into the district with Cong. Olin Teague of College Station.

TAX ISSUE NEAR SHOW-DOWN — Optional one-percent city sales tax measure was tentatively passed by the Senate last week after weathering filibuster attack. It is expected to pass after one more filibuster this week.

Proposed tax package picked up more opposition in House Committee on Revenue and Taxation hearing. Opponents of the penny boost in gasoline tax, which would channel more funds into the farm-to-market project, said the raise should be accompanied by a ceiling on FM road building and a proportional raise in diesel fuel used by trucks.

Committee sent to sub-committee the section of the tax bill by Rep. Ben Atwell of Dallas to stop the automatic \$15,000,000-per-year appropriation to farm-to-market roads.

Good Roads Association insists that FM outlays should be held to about \$70,000,000 a year.

Meanwhile, a bill to transfer all the funds now being given for new FM roads into projects to improve city streets was introduced.

In other action on the tax front, House overwhelmingly

passed a resolution calling on Congress to begin steps toward constitutional change to rebate five per cent of federal income taxes collected to states. Minimum of two-thirds of states will have to join in the request and four-fifths must ratify any constitutional change.

TAX CUT? — Sen. Wayne Connally of Floresville and Reps. James Nugent of Kerrville and Ralph Wayne of Plainview are backing a proposed constitutional amendment to do away with the state property tax, thus leaving it for use by the cities, counties and school districts.

Since bonds have been issued by the colleges for buildings, to be retired out of a part of the property tax, they propose to make it gradually effective, with the final lifting of the state property tax coming in 1978, when present college bonds are paid out.

VETS LAND REVIVAL FAVORED — Chances of a state constitutional amendment to revive the veterans' land program appear favorable. House passed the resolution and sent it to the Senate.

Only four representatives voted against re-submission of an additional \$200,000,000 in bonds, with eligibility for long-term, low-interest land purchase loans broadened to include Vietnam veterans.

WATER RIGHTS — A bill by Sen. George Parkhouse for adjudication of water rights has passed the Senate and is being considered by the House Conservation and Reclamation Committee.

As things stand now, rights to use more river water than actually exists are claimed by Texans. Some have used them. Some have not.

Parkhouse's bill would set up a procedure for those who claim water rights to file their claims. Hearings will be held in each river basin. Then the Texas Water Rights Commission will decide who really is entitled to the water.

Those who don't like the decision will have their day in court automatically, for trial under regular procedures.

SULPHUR — West Texas' sulphur mining claim mixup has been cleared by the Legislature. Gov. John Connally signed into law a bill putting sulphur, lignite, coal and potash under the regular leasing laws like oil and gas, which will give the state school fund 80 per cent of the bonus and royalty received from leasing, and 40 per cent to the landowners.

Fast action came after the courts held that sulphur comes under an old mining claim law, that mining rights can be obtained for as little as \$10 an acre.

DRAFT QUOTA FIXED — Texas' draft quota for May will be 855 men, according to Col. Morris S. Schwartz, Selective Service Director.

No quotas will be set for physical and mental pre-induction examination in April, continuing the examination halt started early this year due to limit on travel funds.

Schwartz said Texas has enough men already examined and acceptable to fill current quotas. Army quotas ranged as high as 2,700 a month last fall.

Sponsors of small watershed projects secure land, easements and rights-of-way for SCS flood prevention dams. They also operate and maintain completed dams.

**A CRACKED RECORD**

News stories of late have carried accounts of a near breakdown in the U. S. postal service. Several months ago in an attempt to help alleviate the problem of chronic postal deficits, Congress authorized an increase by progressive stages in the size and weight of packages carried by parcel post. The theory is that permitting parcel post to take over some of the business of the investor-owned express companies will help trim chronic postal deficits. In the past, the same theory has been applied with dis-

mal results. Recent announcements that the change in parcel post weight and size limitations is the opening of a new era of improved service may sound like a cracked record to those with long memories. Back in 1931, size and weight limits were boosted to eliminate a \$15 million annual parcel deficit. Then, as now, it was forecast that the move would greatly expand the usefulness of parcel post. By 1951, the deficit was \$131 million.

More government competition with the express companies

which are a vital part of the overall transportation system is not the way to improve postal service. On the contrary, shippers may be thankful that the express companies are still around. At a time when the country seems to be facing a crisis in general postal service, the common carriers of express are working harder than ever to provide the best in service. During recent years, they have simplified rate procedures, introduced containerization and at least one of them, REA Express, provides a worldwide service that has brought un-

precedented benefits and conveniences to international shippers. It is time to look with new appreciation on the taxpaying, regulated private carriers of express whose existence depend upon service and efficiency at competitive prices.

SCS technicians gave consultative advise on conservation problems to 2,600 non-farm organizations and landowners last year.

There are about 160,000,000 acres of land in Texas farms and ranches.

### FEARFUL REPORTS

Finally Fearful recovered from the blow of the first Chemistry class last week and made it back to the second and a "helpful Henery" told Fearful his suspect was Charlene Buchanan.

Fearful met, on his way out of the school last Monday, a scout

from a college. This man inquired into Fearful's identity and after being told, engaged his services.

The scout told Fearful that he had been told of a good football, basketball, and track prospect here at CHS. When Fearful asked for a description, the man surprised Fearful by saying that he was rather short, but extremely fast.

Fearful decided he must go home to rest and think for a while. At first he thought this would be an easy case to solve, but the description had him baffled.

After a long night's rest, Fearful rose early (actually about

9:30) and went to CHS and inquired around. Boy! Fearful worked hard, but this case was very mysterious. The only clue was something about some jewels and he couldn't understand very well the cause for all the noise.

Fearful is exhausted and is begging for help. Please help him.

## Washington Report

From Congressman  
**BOB PRICE** 10TH DISTRICT, TEXAS

1333 LONGWORTH OFFICE BUILDING, WASHINGTON, D. C. • 223-3706

The cost in dollars as well as loss of lives in the Viet Nam War continues to rise. Since my last report the Congress has approved an additional 12 billion dollars to carry on the war. This brings the total supplemental appropriations this session to 16.5 billion dollars.

Even with this additional burden on the American taxpayer, the President wants to continue pouring more money into domestic programs of doubtful value. If next year's budget were frozen at this year's level the taxpayer would be saved a lot of money—and a tax increase would be unnecessary.

For example, if twelve recently-started programs such as the poverty war, Peace Corps, National Teachers Corps, and Demonstration Cities were held at present levels 1.2 billion dollars

could be saved. In addition, a 10 percent cut in foreign aid, which has two year's money supply already in the pipeline, would save 253 million dollars. These cuts would not curtail these programs because both have huge amounts of unspent funds on hand.

These figures make it clear that LBJ is making no effort to trim spending to the realities of a war-time economy. They reveal a disregard for fiscal responsibility, and exploitation of the taxpayer while domestic spending goes up and up. If everyone must sacrifice, the government should, too.

Since my last report I have had the opportunity to attend a briefing by the Defense Intelligence Agency at the invitation of Chairman L. Mendel Rivers of the Committee on Armed Services. It is quite evident from

the information received at this briefing that the Viet Cong and North Vietnamese were tremendously effective in their efforts to resupply troops during the recent Lunar New Year truce. It is also quite evident that the President must be backed fully in his determination not to halt the bombing everytime someone thinks there "might be a chance" of peace talks if the bombing is stopped. The bombing has been stopped five times during the last two years, and all the communists have done is to build up their supplies.

In the continuing battle with the bureaucracy, I have asked the Post Office Department to reconsider plans to discontinue railway post office service between Denver and Amarillo. I do not see

how service can be improved, as the Post Office Department claims, by discontinuing the use of these cars which allow mail to be sorted enroute to its destination.

I have received many letters recently in regard to the President's proposals for overhauling the draft. The Committee on Armed Services expects to hold extensive hearings in the weeks to come. I will be studying the record of these hearings closely in an effort to determine the most fair and equitable means of choosing young men to serve in the armed forces.

Recent visitors to Washington include: Lea Witkowski of Hereford; George Robinson of Childress; and Miss Ronda Foran of Amarillo.

### APRIL FOOL

Playing practical jokes on the first day of April is thought to date back to Roman Legend. According to legend, Proserpina had filled her lap with daffodils in the Elysian meadows when Pluto, god of the underworld, found her and carried her scream-

ing to the lower world. Ceres, her mother, heard the echo of the screams and went in search of the voice, but her search was like a fool's errand because it was futile for her to think she could even find the echo.

So goes one story. There are many others.

Still, the April Fool Custom is celebrated in a number of countries. In India it has been observed for centuries; it is connected with the celebration of the rites of spring on March 31. On that day the people of India are sent on foolish errands.

In England, April Fool pranks began in the 18th Century. American colonists from England brought the practice with them when they settled here.

Perhaps that was the most foolish import of all...

### There's Still An Honest Man In South Dakota

Definite proof was provided this past week end that there is still one honest man for sure in South Dakota for the contents of a billfold lost near Pierre, S. D. last July were returned to the rightful owner the first of this week.

Last July, John Spivey, son of Mr. and Mrs. Claude Spivey, was with a harvesting crew near Pierre and lost his billfold while unloading harvesting equipment. John said it was raining and muddy at the time and after discovering his loss, he searched the area for two days but the billfold was apparently covered with mud.

Last Friday night Bill Flanigan made a phone call to Clarendon in an effort to reach John Spivey and after some time, word was transmitted to Spivey to call Flanigan regarding his billfold. He made the call and described the contents which included valuable papers, pictures and \$139. He told Flanigan to keep all over \$100 and send him the remainder. The billfold had deteriorated but the contents were fairly well preserved. John received the contents by air mail Monday and was most happy to get his papers back along with two fifty dollar bills which were faded some but still good for spending.

Flanigan is tops in the honesty department, Spivey concluded after relating his story.
