Strike Quickly Renewed.

CHICAGO, July 22.—The packing house strike was today ordered renewed in Chicago and all other cities. Violation of the agreement by the packing house proprietors is assigned as the reason.

The following telegram was sent by President Donnelly to all employes of the various packing houses in the different cities affected by the previous strike:

"Order out all departments again. Companies violated the agreement.

"MICHAEL DONNELLY, President International Meat Cutter and Butchers Workmen."

Today 3,000 cattle butchers reported at the stock yards here for work. Only half of them were given places. Thereupon all refused to work. They reported in a body at union headquarters. The general order for the renewal of the strike was soon forth coming.

While the immediate provocation for the renewal of the strike is apparently the failure of the packers to take back the larger proportion of the strikers who reported for work today, the real cause of the rupture is inferred to be a circular issued yesterday by the packers. The circular purported to explain to the public the agreement entered into with the labor leaders. Seemingly the circular could be taken as implying that the agreement did not bind the packers to re-employ all the men who walked out. The construction of the labor leaders placed upon the agreement was that all should be re-employed within forty-five days.

The breaking of the agreement is alleged by President Donnelly on the part of the packers, and the ending of the peace plans on the part of the unions came as a violent surprise to the public, despite the widespread knowledge that they are far from satisfied with the conditions consequent upon signing the terms of peace.

Monday the threatened strike of the miscellaneous trades at the stock yards to assist the butcher workmen begun about 10 o'clock, with a walk-out of nearly all machinists, can workers and a 150 millwrights and helpers employed by the seven big packing houses.

All the big plants in the yards were reported as killing cattle, sheep and hogs. Without waiting for the strike order, about fifty carpenters employed in the various plants struck. The men of the Live Stock Handlers' Union joined the strike.

The sympathetic general strike is considered by the leaders to be the greatest and most extensive this country has ever known. Thousands of teamsters, cattle handlers, members of mechanical trades quit work at 10 o'clock. The first big defection came when 700 men, including scalers and pen cleaners employed by the Union Stock Yards and Transit Company, refused to work further. The next to go were the handlers. This eliminated the usefulness of the teamsters and they followed. As they passed out of

the big gates they were greeted with cheers by the thousands of strikers gathered in the vicinity. Prior to this spectacular exodus came small strikes in the various plants, including carpenters, firemen, elevator men, mechanists, etc.

George Clark Scores Bryan.

The following from George Clark is a sample of the restored democratic harmony:

"The fulmination from Mr. Bryan this morning does not surprise me. For months past I realized that his purpose was to prevent the election of any Democrat as President save himself, and his recent antics simply confirm my estimate. His course is diabolical. Who ever heard before of a Democrat raising strange and startling issues, unknown to and unsanctioned by his party, at the inception of a presidential campaign, and such issues as have been persistently repudiated already by his party as destructive? The mistake at St. Louis was in not taking him by the nape of the collar and the seat of his pants and throwing him out of the second-story window. Such a creature has no place in the Democratic household and ought never to have been tolerated in the party. He is not of or with us, and never has been. He is an alien, and everything except a Democrat.

"If he had been honest he never would have attended the convention, entertaining his views of public questions as expressed in the Associated Press of today, and I hope to see Judge Parker and the national committee not only sit down on him next week with a dull thud, but do what the convention should have done and would have done had the issue been forced—drive him out of the party with a keen whip. It is the only salvation now, for if further party countenance is extended him we had as well withdraw our ticket and abandon the field."

Four Millions of Red Cross Funds Stolen.

BERLIN, July 23.—Fresh scandals of enormous proportions have arisen in connection with the management of the Russian National Red Cross funds. Eight million roubles (\$4,120,000) is missing from the central treasury, practically sweeping away all the cash available for the needs of Kuropatkin's army. The loss came to light in consequence of the demand of the province of Cherson for an acknowledgement of its contribution of 100,000 roubles (\$51,500). An investigation of the books in St. Petersburg and Moscow revealed the discrepancy, which seems to be a part of a system of thievery practiced since the beginning of the war.

There are fewer cattle in Childress county at this time than for many years. All who could shipped their cattle out of the county to grass early in the spring.—Childress Index.

RUSSO-JAPAN WAR NEWS.

The Malacca Case.

WASHINGTON, July 22.—Spencer Eddy, American charge d'affairs at St. Petersburg, today cabled the state department at the British embassy has been officially notified the steamer Malacca has been released and in consequence the existing tension has been relieved.

LONDON, July 22.—Another dispatch to the Central News from Tokio says a telegram from the front announces an engagement north of Motien Pass precipitated by the Russians, who attacked the Japanese positions at Shiohiayen, westward of Kai Tou. After severe fighting the Russians were repulsed. The Japanese casualties were over 200. The Russians losses were heavy.

Russia has informally notified Great Britain that orders have been issued to the Russian cruisers in the Red Sea not to arrest any more merchantmen, and it has been agreed between the two powers that if pending the receipts of these orders by captains of the St. Petersburg and Smoldnsky any other ships be stopped and held as prizes these acts be regarded as not having taken place and the ships concerned at once released.

The Russian Government has given formal assurances to Germany that there will be no repetition of the Prinz Heinrich incident.

TOKIO, July 23.—The Vladivostok squadron was seen at noon yesterday eighty miles off Hilachi Province. The squadron was going north.

As a rule the Southwest is not directly interested in strikes emanating from the North and East. This is due to the fact that an agricultural section is rarely affected by differences between capital and labor. In the present packing house situation, however, it is different. These establishments secure much of their meat from the rural communities of the Southwest and in turn the world is supplied with beef, pork, mutton, etc. In other words there is a bond of sympathy joining meat producers and meat eaters, and they one and all decry a cessation of labor on the part of thousands of men. It is sincerely hoped that differences may be adjusted to the satisfaction of all. This does not appear probable, however, as the strikers, through their president, have agreed to resume labor and submit their claims to arbitration—but the packers will not agree to this. It is a known fact that the larger packing houses have controlled prices for many months and that the stock raiser has not secured a fair price for live stock, while recent developments indicate that the laborers who prepare beef, pork and by-products for market are not properly paid. What is to be done? It is time for the proposed independent packing house to get busy.—Farm and Ranch.

We see some of the editors of local papers start off on lectures to Mr. Bryan with "Our advice to Mr. Bryan," etc. Wonder if they ever read the story of the gnat on the ox's horn?

NOTICE has been given that the democratic notification committee is not to refer to issues when they formally notify Mr Parker, but that gentleman will himself make whatever issues he chooses, not now in the platform, in his letter of acceptance.

WHEN the factions knocked the financial plank from the democratic platform it left a hole that would have caused some voters from both factions to shy from the platform. But since Parker loaded it with his knotty gold slab after the convention was through with it, it will prove a stumbling block that will cause a number of the six and a half millions who voted the ticket in 96 and 1900 to plunge off, not to return.

E. G. SENTER, who is a sharp, pithy writer, has launched a 16-page monthly at Dallas, the first number of which is chock full of political articles and current political news. He was editor of the Ft. Worth Gazette in its palmy days, and has been practicing law at Dallas since 1896. The paper represents the Bryan view of Democracy, and touches up in pungent style the St. Louis convention. The Lantern announces that its mission will be to print the truth and the whole truth about matters of public interest to Texas, without fear, favor or partisanship, and it starts off as if it meant it. The puzzling part of the paper, entertaining the views it does, is its announcement that it will support Parker and Davis. We opine that Mr. Senter, as well Mr. Bryan, if they keep up their populist agitation, will be read out of the democratic party. Miscellaneous contributions by Texas writer form an interesting feature. The Lantern will be sold by newsdealers at five cents a copy, and sent by mail at fifty cents a year. A special campaign offer is made to send it four months by mail for five cent stamps.

The strike question at Trinidad, Col., not furnishing excitement enough, two guards of the Victor Fuel Co. got into a quarrel and after emptying their six-shooters at each other went at it with their knives and slashed each other until both dropped dead.

Some fellow over in Hale county has made the observation that whenever they pay up the preacher's salary in full it rains.

The fact that Joseph W. Folk, democratic nominee for governor of poor old Missouri, is compelled to travel around with a body guard to prevent the possibility of assassination, proves the desperation to which the boodling element in the state has been reduced.—Ft. Worth Telegram.

The Baptist Association.

The Paloduro Canyon Baptist Association held a most harmonious meeting at Hereford and all the old officers were reelected: Rev. W. L. Skinner, moderator; Rev. A. H. Thornton, recording clerk; Rev. A. E. Baten, corresponding clerk, and the following as the executive board: W. L. Skinner, Bennett Hatcher, J. W. Whatley, J. B. Roberson, E. A. Wesson, Seb J. Thomas, A. H. Thornton, W. H. Fuqua, W. B. Slaughter, A. E. Baten, Louis Lester, C. E. Oakes.

A movement was put on foot to have a camp meeting, and the following resolutions were passed:

Resolved that this association interest itself in a camp meeting to be held at some point near Canyon City at an early date this year;

That a committee of five be appointed as a "Ways and Means committee," to arrange all matters pertaining to said meeting; this is to secure suitable grounds, tent, or tabernacle or arbor, preachers and singers, etc.;

That we, as members of this association, pledge to said committee our hearty co-operation in their work under this appointment;

That the following named brethren be the committee: W. L. Skinner, W. B. Slaughter, J. W. Whatley, J. D. Ballard, A. E. Baten.

Respectfully Submitted,

J. N. MARSHALL.

The college question was discussed quite at length, and to remove the settlement of the matter from contending local parties seeking it for their respective towns, the business was referred to the state educational commission by adopting the following committee report:

We, your committee to whom the school situation was referred, beg leave to report as follows:

First, we believe that no good at all would result from the discussion of mistakes or alleged misfakes of the past, and therefore recommend that the past be buried.

Second, That we have implicit confidence in the wisdom and impartiality of the Texas Baptist Education Commission and recommend that the entire school situation be referred to them, that we request them to exercise their judgment as to what is best for the Christian Educational interest of the Panhandle, and we not only pledge ourselves to unately abide by their decision, whatever it may be, but will heartily co-operate in the same.

Third, In referring the whole question to said commission, we mean to include all questions as to grade, number and location of schools, and we request our Panhandle brethren to make their propositions direct to the aforesaid commission.

Fourth, We also request the Texas Baptist Education Commission to consider the interests thus committed to them at the earliest practicable time.

Respectfully submitted,

J. N. MARSHALL, CHRM.

Not Pluck Nor Numbers, But Money Wins, Say Financiers.

Through the paying teller at the Bank of England I was introduced to one of the Bank's managers. "This is a war of money," he said. It is not a case of physical might or of pluck, but of dollars. Russia's might, without cash, would avail nothing. Japan's pluck, without gold would go for naught. In the days when men fought with sword or battle-axe, war was a cheap business. Now, however, science has introduced marvelous and costly life-destroying machines of steel; it costs thousands of dollars to fire a single shot from a big gun; war grows every day more expensive; and hence victory depends as much on the financial resources of a country as on its capacity for fighting. These men who best understand the financial situation in Europe declare that the financial position of Russia is far away better than that of Japan. It is the financial condition of the two combatants that has caused such a change of public opinion during the last month. I mean, in sporting parlance, that the betting of the financiers is now all on Russia, and the odds against Japan. Russia has \$525,000,000 in cash in gold, in stock and instantly available. Japan has less than \$50,000,000. From every viewpoint Russia's superior financial position is admitted through the world of finance. Unfortunately, perhaps, Japan can not convert public sympathy into cash."—London Letter in Leslie's Weekly.

No man is mighty enough in his own energy of will to feel secure, if he is exposed to a constantly repeated influence for evil. The constant beating of a rain-drop has often worn a hole in a stone; and the constant hearing of low views of honesty, of virtue, of spirituality, though at first offensive and opposed, has in the end taken away many a man's vigor and sapped the strength of many a Christian.—Selected.

Gold has been discovered on the Canadian river twenty miles north of Amarillo, and a company has been organized in that town to develop the find. Samples of the ore have been assayed and it is believed that they exist in paying quantities.—Canadian Record.

The school census of Childress county, both city and county districts, show a falling off this year over last. The enrollment of the county districts this year is 335; last year 366. The Childress independent district this year is 369; last year 431. The city schools last year were crowded last year and with the falling off in numbers the teachers will do better work. This shows a loss from the state apportionment of \$310 for the city and \$155 for the county districts.—Childress Index.

The big revival opened Sunday and closed Monday,—short session—no attendance. * * * The good people of Panhandle have become considerably worked up over too much "bronco busting" on the streets.—Panhandle Herald.

THE UNIVERSAL EXPOSITION

The Achievements of Individuals and Nations Faithfully Recorded by This Encyclopedia of Society.

By FREDERICK J. V. SKIFF, Director of Exhibits, World's Fair.

"The wisdom of all ages is none too great for the world's work." In this single salient sentence, uttered in his famous address at Buffalo in September, 1901, President McKinley described the object and the result of expositions.

A modern universal exposition is a collection of the wisdom and achievements of the world, for the inspection of the world, for the study of its experts, by which they may make comparisons and deduction and develop plans for future improvements and progress. Such a universal exposition might well be called an encyclopedia of society. It constitutes a classified, compact, indexed compendium of the achievements and ideas of society in all phases of its activity, extending to the most material as well as the most refined. It offers illustrations covering the full field of social performance, from the production of the shoes on our feet and the pavement beneath them to a presentation of the rarest and most delicate creations of the brains and hands of men in what are called the fine arts of civilization.

The Universal Exposition in St. Louis in 1904 will be such a social encyclopedia in the most comprehensive and accurate sense. It will give to the world in revised and complete details "a living picture of the artistic and industrial development at which mankind has arrived" and will actually provide "a new starting point from which all men may direct future exertions." It will present for the inspection of specialists in all lines of industrial and social endeavor and for the public an assembly of the best which the world has done and has to show in industry, art and science, and what is very important, it will offer these achievements of society, these trophies of civilization, in a highly selected, accurately classified array.

The creators of the St. Louis Exposition have had the experience of all previous great expositions by which to plan and effect its high organization. The continuous and repeated burden of the message of experience handed down by all expositions has been more perfect, more effective classification and arrangement of exhibits.

The classification of the St. Louis Exposition has been prepared to present a sequential synopsis of the developments that have marked man's progress. On its bases will be assembled the most highly organized exposition the world has yet seen.

The St. Louis classification is divided into 16 departments, 144 groups and 807 classes. These grand departments in their order will record what man has accomplished at this time with his faculties, industry and skill and the natural resources at his command in the environment in which he has been placed.

At the head of the Exposition classification has been placed Education, through which man enters social life. Second comes Art, showing the condition of his culture and development. Liberal Arts and Applied Sciences are placed third, to indicate the result of his education and culture, illustrate his tastes and demonstrate his inventive genius, scientific attainment and artistic expression. These three departments equip him for the battle and prepare him for the enjoyments of life. The raw material departments, Agriculture, Horticulture, Mining and Forestry, show how man conserves the forces of nature to his uses. The Department of Manufactures will show what he has done with them; the Department of Machinery the tools he has used. The Department of Transportation will show how he overcomes distances and secures access to all parts of the world. The Department of Electricity will indicate the great forces he has discovered and utilized to convey power and intelligence. And so through the several departments to Anthropology, in which man studies man; and to Social Economy, which will illustrate the development of the human race, how it has overcome the difficulties of civilization and solved problems in which society is involved.

Last is placed physical culture, in which man, his intelligence having reached the supreme point, is able to treat himself as an animal, realizing that his intellectual and moral constitutions require a sound physical body to prompt them to the proper performance of their function.

Education is the keynote of the Universal Exposition of 1904. Each department of the world's labor and development will be represented at St. Louis, classified and installed in such manner that all engaged or interested in such branch of activity may come and see, examine, study and go away advised. Each of the separate sections of the Exposition will be an equivalent of—or, rather, will be in actuality a comprehensive and most effective object lesson in—the line of industrial and social achievement and progress which it presents.

Special Sunday Excursion To Fort Worth.

In order to accommodate its patrons with another outing before the close of the season, the Denver Road names record-breaking cheap round trip rates for a popular excursion to Fort Worth Saturday and Sunday next. Rates from all points south of Dalhart will be on a basis of something like one cent per mile, the tickets to be sold for train to arrive in Fort Worth Sunday morning July 31, and to be good for return Sunday or Monday morning. For the entertainment of those taking advantage of the opportunity thus afforded, an elaborate programme has been prepared, which includes Professional Base Ball game and varied features at Beautiful Lake Erie, such as band concerts, boating, swinging, merry-go-rounds, etc. These, in connection with the numerous other attractions always available in Fort Worth should, and doubtless will, attract many happy excursionists, especially as this will probably be the last such opportunity this season. Interested parties should make early application to agents of the Denver Road for further particulars.

Oscar W. Gillespie won the nomination for congress over Judge Poindexter in the 12th district.

Try for Health

222 South Peoria St., CHICAGO, ILL., Oct. 7, 1902.

Eight months ago I was so ill that I was compelled to lie or sit down nearly all the time. My stomach was so weak and upset that I could keep nothing on it and I vomited frequently. I could not urinate without great pain and I coughed so much that my throat and lungs were raw and sore. The doctors pronounced it Bright's disease and others said it was consumption. It mattered little to me what they called it and I had no desire to live. A sister visited me from St. Louis and asked me if I had ever tried Wine of Cardui. I told her I had not and she bought a bottle. I believe that it saved my life. I believe many women could save much suffering if they but knew of its value.

Surgar Dumber

Don't you want freedom from pain? Take Wine of Cardui and make one supreme effort to be well. You do not need to be a weak, helpless sufferer. You can have a woman's health and do a woman's work in life. Why not secure a bottle of Wine of Cardui from your druggist today?
