Buckner Orphans' Home.

The following is taken from the twenty-eighth annual report on Buckner Orphans' Home, at Dallas, Tex., made by Robert C. Buckner, the founder:

The work of the fiscal year embraced in this report was entered upon with unusual anxiety, and earnest prayer, stimulated by faith, hope and love, that it might be greater than any years work in my past life. It could not have been otherwise than successful, notwithstanding the presence of a large and increasing family and a pressing and growing indebtedness of \$5,689.54 to start with. The debts ran up the first month to \$6,000, but soon thereafter were paid in full. Improvements that were needed and had been inaugurated had of necessity to be prosecuted. The Mothers Building for motherless babies (the new home for Providence Nursery) was constructed and completed at a cash outlay of \$11,709.98, of which amount \$10,751.26, was raised and paid as the work progressed. A steam heating plant for this house has just been installed, for which I have given my written personal obligation to pay \$1,500. This amount is now about due.

An electric lighting system for this building was installed by our own force. It consists of forty lights, and is giving delightful satisfaction, but this work is not estimated in the foregoing figures. There are in the entire "Home" at its main headquarters 265 incandescent lights of 16 candle power, and eleven arc lights from its own dynamo.

An artesian well, eight-inch and six-inch casing, has been contracted for at \$10,500, secured by my personal written obligation, without security or any sort of collateral, so that neither the property, board nor anybody else can suffer. The United States geologist and other scientific and practical well men say a flow of good water can be obtained at about 2,000 feet. This contract calls for 2,100 feet. The drill is now down 1,962, and I have paid thus far \$4,750; but only \$1,812.25 has been given to the well fund. Drilling has been progressing nearly nine months, with the best of machinery and skilled men.

Four cottages for the aged have been completed and a balance of \$1,479.79 paid, leaving no debt. Added to this, much work has been done on and about the cottages by our own force, not estimated in this report.

Our own force has also done much fencing and other improvements; has planted a young orchard of several hundred trees, and put out about 100 shade trees and 1,000 blackberry plants.

Repairs and improvements have been made on the boys' and girls' brick building and on the power house at a cost of \$373, all of which has been paid, and much other work on these done by our own force, and not here estimated.

Garden vegetables and other products grown on the place aided considerably in feeding the family, otherwise the contributions from the outside would have been far less adequate to the necessities.

During the year an orphans' home boarding house has been opened by the institution on separate premises, for children that

have a living parent or friend able to pay their way, but not so situated as to keep them with them.

During the year the sale of stock and produce brought in \$1,199.52, and we have hay and grain left over sufficient for the farm next year, except that we shall have to buy considerable corn on account of additional stock to be fed.

A stock farm has just been opened with inviting prospects of success in bringing some revenue to aid in the support of the beloved large family of little folks.

During the year I have received from all sources \$64,552.54, paid out for all purposes \$60,846.54; leaving a balance of \$3,706. This balance includes \$1,385 donated for additional cottages and \$1,521 belonging to the school and chapel fund and \$800 bank stock, donated.

Most of the children are in the great brick buildings, but ten are in the new department, the boarding house; forty-three babies are in the mothers' building. We have forty-five babies from five years old down to one week; several children are distributed among the cottages for the aged, to love and wait on them; some in little Bethshan, where the convalescent are cared for, and thirty in the city annex and children's hospital. The institution owns nineteen buildings occupied by its wards, employees and tenants.

The annex department has had temporary care this year of 56, afterward sent to the main home in the country, and 22 that have been transferred to private families.

The children's hospital has had charge this year of 68 patients, all charity patients—but three. It has treated two cases for rupture, seven for deformed limbs; 25 other surgical patients.

The work of the children's hospital has not been properly understood and appreciated, though it has been in operation several years; was the first hospital in Texas under Baptist ownership, and the only children's hospital in America owned and controlled by Baptists. Be it known, however that it is open to all afflicted children, to all reputable physicians, and that in its work it, like the orphans' home proper, discriminates against no sect or section.

At the rally for the Buckner Orphans' Home Thursday night at the Baptist state convention a great collection of \$42,000 was taken.

The Baptist Convention.

The Baptist convention at Waco is over and San Antonio was selected as the meeting place next year, and the date has not been definitely decided on, the convention will be held during the second week of November.

One of the attendants said of it: "The annual conference of 1906 will be remembered in history for its marked enthusiasm and for the practical plans for future work promulgated by the delegates. What I consider one of the most remarkable achievements by any religious assembly was the completion of the campaign for \$10,000 to use as a state mission fund. At the beginning of the fiscal year plans were started for raising this fund and every state church has accomplished remarkable work on its share toward the total sum. At the convention it was reported that \$94

had been raised in excess of the original planned sum.

"Financial reports also show pledges for \$50,000 for state Baptist educational work, all of which are under one system and their support is pooled under one issue. For the support of young men studying for the ministry at Baylor University \$5,000 was also appropriated. And lastly, \$40,000 was appropriated to the Buckner Orphans' Home at Dallas.

"Building committees reported that about 150 new church buildings have been erected in the state during the past year, and other reports show that 20,000 persons have become identified with various state churches since the last convention."

STATE NEWS.

The Baptist church at Alanreed called Rev. John W. Slaten for another year.

In Archer county Judge Lewis, democratic nominee for county judge, was defeated by Sam Walker, republican.

M. E. Umphreys, of Amarillo, was accidentally shot and killed by a 6-year-old child with a target rifle at Shattuck, Ok., Saturday.

Judge Julius Real, the republican nominee in the San Antonio district, was elected state senator over Judge Robert B. Green, the democratic candidate.

The Rock Island has purchased the Mexican Central and will build its own line into El Paso and either from Amarillo or Brownwood.

The general merchandise store of Jesse Burgoon at Estelle, Texas, nine miles from Grapevine, was burned Thursday night; loss about \$1,000. Cause of fire unknown.

Twenty-five bales of cotton and \$2,000 worth of cotton seed, and property of the Belton Gin & Cotton company, were destroyed by fire at Belton Friday. Loss \$10,000; insurance \$4,200.

Pete Beville, a youth 17 years old, was fatally stabbed at Decatur Friday by Leslie Blackburn, another boy 14 years of age. Pete Beville interfered in an altercation and was stabbed with a common pocket knife. The blade entered the heart and the boy lived only about twenty minutes. The fatality is greatly deplored. Beville was generally liked and made many friends as an operator for a telephone company.

New County Officers in Adjacent Counties.

Best Recruits From the Country.

Not only is the business talent, professional talent and statesmen supplied from the country, but it is also true of the clergy. The president of Waco Baptist University was asked at the Baptist convention at Waco for information concerning the young preachers. In order to answer more intelligently he presented to each on matriculation this year certain questions. One hundred and eight young preachers out of the total answered as follows:

1. Were you converted in the country, town or city?

The Clarendon Chronicle

Published Twice-a-Week by

W. P. BLAKE, Editor and Proprietor.

Entered February 10, 1903, at Clarendon, Tex., as Second class matter, under Act of Congress March 3, 1879.

CLARENDON, TEX., NOV. 14 1906.

Hoch, the republican governor of Kansas, was re-elected by less than 2000 plurality. He was elected two years ago by 67,000 majority. His election this year was by the smallest plurality ever given a candidate for governor in that state, and Harris' friends think he was really defeated if the election had been fair.

The state superintendent of public instruction has prepared and is sending out to the 16,000 teachers of the state copies of an 84 page pamphlet entitled "Course of Duty." This publication is replete with valuable suggestions and advice to the teacher. In addition to the regular course of studies outlined, some work in agriculture is suggested and is to be introduced in the common schools of Texas. This course of study is principally for the country schools and to provide a uniform course.

Never before were there such a derth of election news in the county papers. A small vote, devoid of interest, we suppose is the reason. We picked up one county paper to see something of the vote cast and the only reference whatever, was the following: "The election passed off quietly without a fight or a close race, the closest we have heard was that of constable." Not a word as to how many votes were cast in its town or in its county. Not a word as to who a single officer in its county is to be. For an election report the above wags off with the whole bakery.

Notwithstanding the so-called dissolution of the paper trust, the manufacturers go right along raising prices under a "gentlemen's agreement." News print was advanced at the mills 25 cents per 100 last week and notice of another 25 cents to be added is given. Wrapping and fiber paper makers made 25c advance five weeks ago and last week they run it up 15c more. Manufacturers deny combining but some admit that advances are mutually uniform. Thousands of tons of material fit for paper making goes to waste every year in the south, and we don't see why some enterprising person does not take up the matter and put it to use.

Two Arrests in Kansas For Dockray Murder.

Frank Ellsworth and Joseph Burk were arrested at Wichita, Kas., Thursday charged with the murder of Dockray at Amarillo. Dockray was last seen alive in their company and \$120 he was known to have had was missing when his body was found.

Some clothing of the murdered boy was found in a valise sent there at the time of the murder and claimed by the accused men upon their arrival.

Saturday Governor Lanham wired the governor of Kansas requesting that the latter order to be held the two men. It is claimed that Black who was arrested in Ft. Worth, put the officers on track of Ellsworth and Burk.

Will He Dare Do It?

If there is any truth in the dispatches sent out as to what Gov. Elect Hughes will do in New York, there will be lively times there. We are told that the reorganization of the state banking department is to be one of the first acts of Governor Elect Hughes. It is predicted the probe in the New York City banking will cause a sensation equal to the insurance exposures. It has been charged that Wall street is illegally using bank deposits in schemes of recklessness. It is said prosperity prevented failures. Hughes thinks Wall street needs cleaning. Republican leaders believe such an act would make Hughes a presidential possibility. Wall street helped Hughes but only to defeat Hearst.

Sugar Beets In West Texas.

Some months ago a proposition was made to the Twenty-Five Thousand Club of Abilene by a California sugar refinery to locate a plant there provided it could be demonstrated that the sugar beet could be raised in sufficient quantities to furnish ample supply. The matter was taken up by the club and some two bushels of beet seed secured for experiment purposes and distributed among the farmers of that immediate section. As a result of these experiments beets are shown at the West Fair ranging in weight from five to eight pounds. Taking an average of four pounds to the square foot an acre will produce 168,000 pounds, and at an average worth of \$10 per ton will produce an average of \$840 per acre. A test was made of the saccharine qualities of the beets gathered in September and proved satisfactory to the refinery people. However, they asked for another shipment of beets in November, at which time they say that the sugar-producing qualities of the beets are at its best. In the estimate of eighty-four tons to the acre, as above named, while it may seem large, yet from the actual production shown in a number of fields this estimate is very conservative indeed, and considerable enthusiasm is being manifested by the farmers, as they realize the enormous production that a farm in this country may be made to show as compared to the cost of the land. The sections so far developed as beet producing countries are those where enormous expense has been incurred in the way of providing irrigation, thus bringing land values up to \$100 per acre and even higher, while here it is realized that the soil is particularly adapted to raising beets, while the average annual rainfall is just about sufficient and not too heavy.—Dalls News.

WASHINGTON LETTER.

THE JAP FLURRY.

It is reported that the ill-feeling against the United States is subsiding in Japan, especially since it is learned that the United States Government is to use its best offices to secure the admission of Japanese children to the public schools in San Francisco.

How the United States Government is to accomplish anything in this direction is, however, not so easily understood on this side the planet. Here we know something of state rights and municipal prejudices, and we know that case is just about as well established, though with different eccentricities as in India. It is not at all improbable that we will sooner or later have to argue with the Japanese vi et armis. News comes from our Philippine possessions that a Japanese officer has been arrested while making sketches of the fortifications about Manila, Cavite and Coregidor Island. It will be remembered that some time ago all Japanese cooks and servants were discharged from the United States Naval vessels because it was suspected that some of them were educated spies and were there to supplement the naval educations that have been receiving at Greenwich, Annapolis, Kiel and in the naval schools of other governments. The story is told that an American captain, in making a formal, official visit to a Japanese warship, recognized in the captain who received him in full uniform, his former cook. The story may or may not be true, but there is more than one nation that is watching with interest not unmixed with anxiety, the energetic, insinuating activity of these irrepressible Yankees of the Orient.

PRESIDENT HUNTING.

President Roosevelt who went to the country cottage which he bought two years ago in Albemarle county, Virginia in order, it was given out, that he might finish his message to Congress before leaving for Panama is evidently not troubling himself a great deal about the message. He is taking advantage of the hunting season and the fine weather to bring down a wild turkey or tree a coon. While he has many trophies of his many hunts of big game, he has no coon skin. Some countrymen with the Hal-lowe'en spirit still unsatisfied thought to have one on the President by releasing a flock of tame turkeys in the course which they knew he would take in hunting the game ones. But the President was two wary for them and passed the tame birds by without a second glance. While living in almost nomadic style in the little cottage which is several miles from the nearest neighbor he rises early, eats a light breakfast by lamplight and spends the day in tramping or riding through the woods.

Mrs. Roosevelt, who though she is the first lady of the land has few opportunities to do just as she pleases, delights in the freedom of the country and clad in a short skirt and a loose coat now takes long walks with the President or when he is hunting, tramps about the place by herself. The weather has been ideal during this visit and the President is so enthusiastic about the life there that he will return to it at Thanksgiving and again at Christmas. It is a peculiarity of Mr. Roosevelt that his adaptability and enthusiasm make him at home everywhere and whether he is entertaining at a state dinner at the White House or eating off of ironstone china in his six room country cottage he is apparently at that moment enjoying himself to the limit.

As A Last Extreme

Once a number of legal lights in Washington were gathered in the smoking room of a lawyer's club, when the talk turned to a discussion of the veracity of lawyers. "The average man," remarked one disciple of Blackstone, "seems only too ready to assume we are all liars—a very unjust position, it seems to me. Do we not sometimes tell the truth?" he asked of his neighbor, a well known criminal lawyer.

"Certainly," promptly responded the latter. "We will do anything sometimes to win a case."—Ex.

Old newspapers cheap at this office. Only 15 cts per 100.

Talking post cards have been received in New York. The cards talk their message to the receiver instead of conveying the written words. It may be stated at once that they talk only with the aid of a phonograph, for their novelty lies in the fact that they are nothing more or less than a brief phonograph record fixed on the cord to be reproduced with the aid of one of the machines.
