"Considering the indestrictibility feature of Savings Bonds and the absolute guarantee of principal and interest, this is

If Ben Franklin were around today, he'd be amazed at what's happened to some of the things he innovated. His fire insurance idea, for instance, has mushroomed into

thousands of companies protecting millions of Americans, His adventure with lightning has helped create myriads of electrical servants that make life easier and more fun.

And tens of millions of American families live by his

principle of thrift, and save by investing regularly in U. S. Savings Bonds. At maturity Bonds pay \$25.00 for every \$18.75 you invest. Or, as Mr. Franklin might have said it, "1,875 pennies saved is 2,500 pennies earned." And while the money is piling up for retirement, or an emergency, or your children's education, Uncle Sam is using it to strengthen the foundation of freedom Ben

Franklin helped build. Begin saving your pennies. Only 63 of them a day for one month, and you've got your starter Bond.

For your information: Series E Bonds pay back \$4 for every at maturity, are protected against loss, provide tax advan-s, can be purchased where you work or bank. For current fucome on your investment, ask about Series H Bonds.
