Saint's Roost celebration July 3, 4 and 5

Carrying on the tradition for a gala July 4th, Clarendon, under the able direction of the Outdoor Entertainment Association will have the 1980 Saint's Roost Celebration on July 3, 4 and 5 this year.

There will be three performances of the rodeo with the time at 7:30 p.m. on Thursday, July 3rd; 8:30 Friday, July 4th and Saturday, July 5th.

Rodeo events for the kids will be Thursday, July 3rd, at 7:30 p.m. There will be a wild calf race and calf scramble each night. Also there will be a FREE BEEF drawing at each of the rodeo performances.

An added attraction this year for the parade and at the rodeo each night is the Owens Country Sausage eight-horse Belgian Hitch team. The Western parade will take place on July 4th at 2 p.m. with a variety of entries, such as antique cars, riding clubs, business and organizational floats and miscellaneous categories. This parade has proved to be one of the most popular events of the Saint's Roost Celebration in the past.

Gospel Singers to entertain

Several groups of Gospel Singers will entertain on the courthouse square the 4th of July beginning at 10:30 a.m. These groups are sponsored by local churches and the Clarendon Ministerial Alliance.

Other events for the celebration are the Old Settlers Reunion, which will be held in the Court House from 10:30-12 noon July 4th; the Fiddlers Contest, on the court house square, at 3 p.m. on July 4th with a cash purse going to the winner. For some fine fiddle music be sure to keep the time in mind.

Beginning at 9 a.m. Country Craft Fair '80 will be set up on the court house square with home arts, crafts and snacks and other items for viewing, buying and eating. At 11 a.m. July 4th the big bar-b-que, sponsored by the Al Morrah Shrine Club will begin serving. Tickets may be purchased from any Shriner, the Farmers State Bank or Hensons for \$3 per plate. Proceeds will go to benefit the Crippled Children and Burns Hospital.

In addition to these events three nights of dancing on the open air dance floor are scheduled. Thursday, July 3rd music will be by Fiddling Frenchy Burke. On Friday, July 4th David Nall and Ramblin' Fever will furnish dance music and Saturday July 5th, the honors will go to

Tiny Lynn and the Western Band.

Board members of the Clarendon Outdoor Entertainment Association, Inc., who put together the three days of excellent entertainment after months of work and planning are: Mark Allen, Donald Bland, Skeet Brown, Bobby Boston, Walt Campbell, Willie Craft, Jerry Gage, Ronald Gooch and John Grady.

Also David Guill, Donnie Hall, Jerry Hawkins, Johnny Hermesmeier, Johnny Hill, Burl Hollar, Blackie Johnson, Harold Lindley, Mitchell Martin, and Jack Moreman. In addition T.W. McAnear, Ike O'Neal, James Owens, Jim Robinson, Charles Rushing, John Sarich, Stan Shelton, Jim Simmons, Punch Skelton and Sandy Thornberry.

Cow Chip Contest is new

For a bit of variety and a chance to show off a throwing arm, a Cow Chip Throwing Contest is to be held Friday, July 4th at 10 a.m. east of the General Telephone Co. building on the 400 block of South Sully Street.

Registration for the contest will begin at 9 a.m. Cost is three throws for \$1.00 and the proceeds will go to the Learning Center.

The several divisions will be divided as follows: 8-12 years; 13-15 yrs.; 16-18 yrs. Winners in these divisions will receive a \$25 savings bond. For the 18 and over age group there will be trophies for 1st, 2nd and 3rd places.

At 1 p.m. homemade ice cream will be served at 50c a cup and only one size. All proceeds will go to benefit the Donley County Learning Center.

Local firm is robbed

Clarendon city police investigated the break in and robbery of the coin laundry at Phil's Cleaners. The investigation was made Monday, June 30.

About \$60 in coins was taken after entry was made into the coin machines. The investigation is continuing at this time.

Calendar of events

Thurs., July 3, 7:30 p.m. Rodeo at Rodeo ground east of Clarendon

Tues., July 8, 8-10 p.m. game night at Senior Citizens Center

Wed., July 11, 6:30 p.m. Salad Supper at Senior Citizens Center

HAPPINESS IS A big straw hat, a cowboy shirt, boots, the parade and rodeo at Clarendon on the Fourth of July—at least Jeremy Grady thinks so. He is the son of Mr. and Mrs. Mickey Grady.

Boy Scouts to have concession stand

This year the Boy Scouts will have their concession stand open both during the rodeo and during the dances after the rodeo. They will sell the usual hamburger and hot dogs, soft drinks and scones, but they are adding baked goods, corn dogs and burritos this year. The mothers will run the stand at night, but all of the proceeds will go to the Boy Scout Camping fund.

Episcopal Church has new vicar

Reverend Scott Turner, who was ordained as a deacon at Saint Christopher Church in Lubbock, June 21, 1980 has arrived in Clarendon as vicar of the Episcopal Church here.

He is a native of Brownfield, graduated high school there in 1972; from Texas Tech at Lubbock in 1976 with a B.A. in Anthropology and spent the next year working on the railroad in construction and as a service technician for a center pivot irrigation company.

Turner attended seminary at University of the South, the School of Theology, Sewanee, Tenn. He received notification of his appointment to the Clarendon Episcopal Church earlier this spring.

Scott is married and his wife, Jill is an excellent cook, by his judgement and enjoys

New minister comes to Church of Christ

Tom Harguess formerly of Odessa, Texas will begin as minister for the Church of Christ in Clarendon on Sunday, July 6th.

Tom Harguess attended Eastern New Mexico University in Portales. Among other places during his 16 years of ministry he has preached for congregations in Portales, Kermit, Odessa and the Gardner Street Church of Christ in Borger.

He has coordinated the High School material for the Skyridge Youth Camp for 13 years. Skyridge Camp is located in the Sacramento mountains of New Mexico near Cloudcroft.

Tom and his wife, Carol, have two children, a daughter

will go to the Boy Scout Camping fund.

Proceeds are used to buy tents and other camping supplies. It is also used to help send the boys to their summer camp outs. Stop by the concession and consider your purchase as going toward a more worthy cause than to quench your hunger or thirst.

Mental Health Association raised \$447.33 in the May drive benefiting the Mental Health Association in Texas.

Bellringer workers collected house-to-house during May, Mental Health Month. Bellringer workers in Clarendon were Chairman-Alice Davis, others, Mary Kay Mills, Connie Bolin, June Topper and Jerri Ann Shields.

All proceeds from the drive support the programs of the Association.

The Mental Health Association is a not-for-profit voluntary citizens organization. For free information about dealing with your tensions, or other mental health topics, contact: Mental Health Association in Texas, 103 Lantern Lane, Austin, Texas 78731, 512-459-6584.

REV. SCOTT TURNER

cooking. The Turners enjoy music, he plays the guitar, reading and fishing.

Jill, calls Texas home, and is an Army brat moving about the US but with a fondness for Texas.

June 24, was the first service Rev. Scott Turner officiated in Clarendon.

Gary Harbert arrived with the van full of dogs and kids. Dawn May brought her MISSY. Glenn Harbert's dog is a Soft-Coated Wheaten, Muffkins. Brett Harbert is shown with his Catahoula Leopard Mr. "C".

Bob is certainly proud of the progress these students have attained. Last week at the park, under simulated ring conditions score cards were showing amazing results.

Each week classes are being held to prepare these along with Lynn Alderson and Schnauzer Sissy to compete in this coming TENTH ANNUAL STATE 4-H DOG SHOW.

ter Pamela, who is eleven years old, and a son, Brad, who is 9 years old.

Jackie Wayne Lee rites held

Funeral services for Jackie Wayne Lee, age 30, a resident of Hedley, were held at 10:00 a.m. on Friday, June 27, 1980, in the First Baptist Church in Hedley with Rev. Wayne Naylor, pastor, officiating. Interment was in Rowe Cemetery with the arrangements under the direction of Robertson Funeral Directors.

Mr. Lee was killed at 2:49 p.m. on Tuesday, June 24, 1980, about 15 miles North-east of Clarendon, when he was crushed beneath a gin pole while moving a water well rig. He was born on February 8, 1950 at Caster, Louisiana and married Sue Reynolds on December 11, 1971 at Hedley. He was working as a machinery operator for Farley Well Service in Memphis at the time of his death. He was a Baptist.

Survivors include his wife, Sue Lee of the home; two daughters, Susan Lee and Cynthia Lee both of the home; his mother, Mrs. Ozie Lee of Coushatta, La.; his father, James Roy Lee of Shreveport, La.; three sisters, Mrs. Dorris Ann Johnson of Shreveport, Mrs. Carolyn Woodard of Coushatta, Mrs. Mary Kay Perkins of Lafayette, La.; five brothers, Bennon Lee, Billy Roy Lee, and Donnie Bruce Lee, all of Alexandria, La.; James Harry Lee of Memphis, Tenn. and Bobby Glyn Lee of Longview, Texas.

Casket bearers were M.O. Weatherly, Joe Lemley, Kenneth Swinney, James Evans, Randy Johnson, and Vergil McPherson.

WTSU graduates 930

More than 900 West Texas State University students received degrees during spring graduation exercises for the class of 1980.

The 930 students included bachelor's degree recipients and 114 who received Master's degrees. Seven students received the Master of Science in Nursing degree which was awarded for the first time. The program began in the School of Nursing in 1978.

Clarendon College announces summer schedule

Clarendon College has announced that registration for the second summer session will be held July 9-15. Students may register for classes from 9:00 a.m. to 5:00 p.m. each day and from 5:00 p.m. to 7:00 p.m. on July 10th, 14th, 15th and 16th. The last day to register is Thursday July 17th.

Texas Shorthorn Assoc. has annual meet

Texas Shorthorn Association annual Field Day and Junior Preview Show was held June 28, 1980 at the J. W. Holmes farm at Tolar.

Jamie McAnear was crowned Texas Shorthorn Lassie Queen and will travel to Denver in January to compete for the national title.

Thirty-one heifers were shown in the Junior Preview Show. From Clarendon Rodney McAnear placed 1st with his Jr. heifer calf and 1st with his late Spring yearling heifer.

Jamie McAnear took 3rd place with her Winter heifer calf and also 3rd place with her Summer yearling calf.

Christie placed 3rd with her senior heifer calf. Of the 24 steers shown Rodney placed 4th with a middleweight steer.

Two Showmanship awards were brought home from the show. Christie was Champion Jr. Showmanship winner and Rodney was Champion Sr. Showmanship winner.

Clarendon was further honored when Bonnie Gooch was elected secretary-treasurer for the next term of officers for the Texas Shorthorn Association.

Roy C. Jewell services held June 28

Roy C. Jewell died June 27, 1980. Services were held on Saturday, June 28, 1980 at 3:30 p.m. at Rose Chapel Gilliland-Watson Funeral Home in Hereford with Rev. Doug Manning, pastor of First Baptist Church officiating. Burial was in West Park Cemetery.

Mr. Jewell, born in Whitesboro, moved to Hereford in 1972 from Hedley where he was a long time resident. He was a farmer and rancher, and a member of the First Baptist Church. He married Lola Dishman in 1952 in Tucumcari, N.M.

Survivors include his wife, Lola; a son, Paul Dishman of Dallas; a daughter Mrs. Dorothy Hopson of Dimmitt; a nephew Robert Jewell of Buena Vista, Calif.; and a niece Mary K. Hill of White Deer.

Band Calendars!

Band calendars are arrived and Henrietta Richardson has announced that they will be available on July 4th on the courthouse square.

Elizabeth A. Bromley, a theatre major, received the Bachelor of Arts & Sciences degree; Eddie L. Carmichael, an elementary education major, received the Bachelor of Science degree.

Clarendon College announces summer schedule

Donley County Commissioners Court minutes

Donley County Commissioners Court met in called session on May 21, 1980 with all members present except Gene White, precinct 1 commissioner.

The following business was transacted:

*Motion by Claude Moore

CLARENDON PRESS and the Donley County Leader. Published every Thursday at Clarendon, Texas, 79226, Box 1110, at Hwy 287 and Jefferson Street and entered as Second Class Mail at the post office at Clarendon, Texas. Helen Woody, Publisher and Jeanice Weatherly, Editor.

Subscription rates: \$10.00 a year outside Donley County, \$8.00 a year in Donley County.

Any erroneous reflection upon the character of any person or firm appearing in these columns will be gladly and promptly corrected upon being brought to the attention of the management.

and seconded by Wm. Chamberlain was made to advertise the surplus material salvaged from the old jail for bids. Bids to be received in the county judges office and opened for consideration on June 23, 1980 with the stipulation that any or all bids may be rejected. Motion carried.

*There was a discussion of the local Appraisal Board system. After lengthy discussion with no action taken the court recessed with business taken care of.

June 9, 1980

Donley County Commissioners Court met in regular session on June 9, 1980 with commissioners Gene White, precinct 1, Claude Moore, precinct 2, Buford Holland, precinct 3 and William Chamberlain, precinct 4, present. Also present, presiding judge W.R. Christal, and county clerk P.C. Messer.

Business was transacted as follows:

*Motion by Chamberlain seconded by White to approve minutes of the previous meeting. Carried.

*Motion by Holland 2nd by Moore to pay the bills on the claims docket. Carried.

*Motion by Moore 2nd by White for the county to make a charge of court cost for each commitment transacted by the county. Carried.

*Motion by Moore 2nd by Chamberlain to adopt a resolution to conform with VACS 4477-6A and SB 1323 regarding rabies. The court appointed the County Health Officer and the Sheriff to serve as enforcement officers. Carried.

*Motion by White 2nd by Moore to approve the plat presented by Pat Slavin regarding division of City of Clarendon lots. Carried.

*Motion by White 2nd b Moore to allow the Senior Citizens use of the District Court room on July 4th. Carried.

*Motion by Chamberlain

DONLEY COUNTY JUDGE, W.R. Christal administers the oath of office to Freida Gray, who won the Democratic Primary election for the position of Donley County

Treasurer. Ms. Gray will serve in an appointed capacity until the general election. The brief ceremony was held Tuesday, July 1, 1980.

2nd by Holland to approve reports of county officials. Carried.

*Motion by Moore 2nd by Holland to amend the 1980 budget as described on p. 138. Carried.

*Motion by White 2nd by Holland to appoint Freida Gray to serve as Donley County Treasurer. This appointment effective July 1, 1980 until the next general election. Carried.

Business completed—there was adjournment.

June 23, 1980

Donley County Commissioners court met in called session June 23, 1980 with all members present.

Business was transacted as follows:

*Motion by Chamberlain, 2nd by Holland to meet July 21, 1980 for the second hearing of the Equalization Board. Meeting set for 10 a.m. in the Clarendon Courthouse Annex. Carried.

*The court proceeded to sit as an equalization board. Each member signed the oath as is required to serve on the board.

you and the LAW

PRESENTED BY THE STATE BAR OF TEXAS

Q: I got a divorce in May and remarried. My ex-husband sends the child support payments only when he wants to. My new husband supports my children and I feel he should be their father instead of my ex-husband. Is there a way he could adopt them? If I die, would my ex-husband gain custody of them?

A: A child cannot be adopted by a stepfather unless the natural father consents or loses his parental rights by order of a court. Persistent non-payment of child support is one ground for seeking termination of parental rights. A natural father who retains parental rights cannot be denied possession and control of his children if his former wife dies unless the

court finds that he is an unfit parent and that the children's best interest would be served by having them become wards of the state.

Q: My husband has willed his business, a rent house, and several bank accounts to his children by a previous marriage. We've been married one year and the will was made before we met. If he should die, would I be entitled to any of his property?

A: A will made prior to marriage is not revoked by a subsequent marriage. A surviving spouse's rights in the estate of the deceased spouse may include the homestead, the family allowance, or other property exempt from forced sale for payments of debts or allowances in lieu of

such property. Any property acquired after marriage except by gift or inheritance is community property in which the surviving spouse has a one-half interest.

Q: Can the executor of a will be held personally responsible for any debts that may exceed the assets of a small estate? How are such debts disposed of? For instance, the expense of a long, terminal hospital stay?

A: As a general rule, an executor will not be personally liable for the payment of the deceased person's debts. However, if an executor violates a duty placed upon him by law, it is possible that he could incur personal liability for a loss sustained by a creditor of the estate. Where the debts exceed the assets of a small estate the law provides an order for payment; the first debts to be paid when allowed and approved are those for funeral expenses and expenses of last sickness not to exceed \$1,000. Any excess expenses are treated as an unsecured claim against the estate.

Cockerham-Sheer nuptials read

Wedding vows were exchanged between Colleen Cockerham and James Dee Sheer Jr. May 31, 1980 in the Anna Moores Chapel of the First Baptist Church of Clarendon. Officiating at the double ring ceremony was Rev. Paul Heil, minister of the First Baptist Church.

Parents of the bride and groom are Mr. and Mrs. Jim Cockerham, of Clarendon and Mr. and Mrs. James D. Sheer, of Wellington.

The Chapel was decorated with greenery and potted ferns on either side of the altar. Seventeen branched candelabrum flanked a larger candelabrum to compete the decoration.

Vocal music was provided by Dan Hall who sang LONGER and ALWAYS AND FOREVER, accompanied by Jennifer Scoggins.

The bride was given in marriage by her father, J.D. Cockerham and was lovely in a gown of bridal satin with organza overlay. The styling was with a blouson top and Bishop sleeves of reemboisiered lace. The high neck and sleeves were detailed with satin bows. The full skirt swept into a long train and was lace edged. Her veil was of shoulder length illusion attached to a Juliet cap.

For her bouquet, the bride chose a combination of blue

carneations, blue and white roses and daisies interspersed with baby's breath.

Medina McAnear, serving as maid of honor was the brides attendant. She wore a floor length gown of pale blue dotted swiss fashioned with a satin collar, fitted bodice and narrow shoulder straps. A wide white brimmed bodice complemented her dress. For flowers she carried a solitary white rose.

Attending the groom as best man was Jay Cox, of Lubbock. Ushers were Kevin Cox, of Tulsa, Oklahoma and Buddy Weems, of Clarendon.

Following the wedding ceremony a reception was

held in the Fellowship Hall of the First Baptist Church. The brides table was covered with a white lace cloth over blue and the centerpiece was the brides bouquet. The beautiful wedding cake had three tiers, with a fountain and was decorated with white daisies. Crystal and silver appointments completed the table decor. Myrtal Stages presided at the guest register.

For her traveling costume the new Mrs. Sheer selected a three piece suit with pin striped blue and white pants and vest complemented with a white eyelet blouse. The couple will make their home at 227 Indiana, Lubbock Texas.

The bride is a 1980 graduate of Clarendon High

School and the bridegroom is a 1975 graduate of Crosbyton, High School.

Out of town guests included Mr. and Mrs. Roy Sheer, Cooper; Mr. and Mrs. J.W. Wood, Crosbyton; Mrs. John Stages, Mrs. John Stages III, Jona Stages and Judy Barber, Samnorwood; Terri Cox, Lubbock; Mrs. Wes

Sevedge, Altus, Okla.; Vernon Sevedge, Geri Wheatley, Coalgate, Okla.; Mr. and Mrs. Wallace Cox and Kevin, Mrs. Terri Roy and Catie, Mrs. Sherry Styles and

Jeremy all of Tulsa, Okla.; Gary Cockerham, Lubbock; Mr. and Mrs. Van Kelley, Rachel and Emily of Brookings, S. Dak. and Mr. and Mrs. Price Webb, of Amarillo.

MR. AND MRS. JAMES DEE SHEER JR.

4-Hers learn dog care

"I've learned not only how to train and care for dogs, but also how to teach others to do so. There is a sense of satisfaction in helping others, and I'm glad to have been able to experience it. I've not only learned how to work with dogs, but how to work well with 4-H'ers, Extension agents and other adults."

That's how an 18-year-old 4-H'er described her experiences in the 4-H dog care and training program.

The 4-H dog care and training program stresses responsibility and encourages youth to learn about the more than 125 different breeds of dogs in America, points out Lesli Garnett county 4-H program coordinator with the Texas Agricultural Extension Service, Texas A&M University System. The program teaches youth to demonstrate sound dog care and management practices such as feeding, care, handling and grooming as well as how to train a dog to obey and heed simple commands.

One of the main objectives of the 4-H program is to encourage youth to develop leadership talents and work toward achieving good character and effective citizenry. *Con't frm p. 2*

Q: If a husband files for a divorce, can he legally force his wife to move out of his house? I understand that a wife filing for a divorce can force her husband out. If a husband can't force a wife out, wouldn't that be considered sex discrimination?

A: Either a husband or wife who files for a divorce in Texas can request temporary use of the party's residence until the divorce is final. In other words, either party can ask the Court to force their spouse to move out of the house. Unless the parties agree on who will move, the Judge will decide. Both husband and wife have an equal chance of getting temporary possession of the house. In practice, however, most judges give temporary possession of the house to the party who gets temporary custody of the children.

Q: What's the law on U-turns? Can I make one in the middle of the block?

A: According to state law, U-turns are allowed if they're done safely. But, there are some exceptions: U-turns can't be made on curves or on the crest of a hill unless the turning vehicle can be

seen by approaching drivers 500 feet away.

Also, U-turns are not allowed where signs prohibit them. There is one catch: beyond state law, many cities and towns have ordinances regulating U-turns. Each driver had better be up on these local laws.

Q: My son lived with a girl and took care of her and her son for around three years. When she became pregnant he helped her get a divorce from her previous husband and then married her. He purchased a house several months before they married. Now she's left my son and it looks like they're heading for a divorce. My question is this: how much claim has she on the house?

A: If your son purchased the house prior to his marriage, it is his separate property. However, his wife may have a claim to one-half of any community funds which have been used in payments or improvements on the house.

Q: My husband's ex-wife has custody of their little girl, but the mother lives with another man without the benefit of marriage. The little girl wants to live with her father and me. Is there any way we can obtain custody?

A: If the little girl is 14 years old or older, she will be allowed to testify to her preferences. If the child is younger than 14, then your husband could bring an action to modify conservatorship and would have to show the following:

1. that his ex-wife is harming the child either mentally, physically, or emotionally;
2. that circumstances have changed since the time of divorce; and
3. that your husband could provide a better situation for the child.

Donley County youths, Dawn May, Lynn Alderson, Brett Harbert and Glenn Harbert have just completed six weeks of professional training with Bob and Vera Lee Andis. In another six weeks they will be ready to compete against 4-H clubmembers from all over Texas at the State 4-H Dog Show August 16 in Conroe, Texas.

Boys and girls can find out more about the dog care and training program from their county Extension office, adds Lesli Garnett.

Q: We recently bought a new home. After we noticed cracks in the corners and loose bricks in the fireplace, we discovered the foundation isn't level. Do we have any legal right to sue the builder or the previous owner?

A: The Consumer Protection Act applies to real estate just as it does to purchases of products or services. If you were led to believe there was no structural defect in your home at the time you bought it, the law allows you to sue the person who misled you

at the time of the sale. You may sue to recover three times the actual damages you prove you have suffered as a result of the structural defects.

Q: After I signed a contract to buy a house and put up earnest money for the sale, the seller decided he wanted to keep the house. What about my earnest money?

A: The law allows you to obtain the refund of your earnest money in a case in which the seller breaches the contract of sale. Another alternative generally allowed is suit for specific performance which is an action to compel the seller to convey the property to you. Remember, the real estate contract can set forth the remedies available to both parties if a breach of contract takes place.

Q: I'm eight months pregnant and have been living with a man for over two years. We've often been introduced as husband and wife and I have used both his and my last name. When I go to the hospital to have my baby, will the baby have my last name or his? Will the baby be legitimate?

A: Common law marriage is recognized as a valid marriage in Texas and you have created a common law marriage in Texas if you intend to be married, you live together for a period of time, and you hold yourself out as husband and wife. Your baby will be considered the legitimate child of both of you. You should enter the hospital using the father's last name and give the child the same surname. This would assist you in registering the child's birth as legitimate.

Q: My husband's company is transferring us from Texas to Oklahoma. If my son attends a Texas college, will he be charged out-of-state tuition? I understand Texas schools participate in an agreement with some other states where the tuition is not charged if the student had prior residence in that state.

A: If your son has been attending a state university, he could enroll on a resident basis as long as he attends continuously. There are, in addition, other provisions which may provide tuition adjustments. The registrar's office at his state university will supply the tuition policy information you need.

Send your questions to "You and the Law," State Bar of Texas, P. O. Box 12487, Austin, 78711. Answers may appear in columns in hypothetical terms; personal answers not possible.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

Proposed Determinations With Regard to the 1981 Wheat Program

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Proposed Determinations.

SUMMARY: The Secretary of Agriculture proposes to make the following determinations with respect to the 1981 crop of wheat: (a) Whether there should be a set-aside requirement and, if so, the extent of such set-aside; (b) the national program acreage (NPA); (c) whether there should be a recommended percentage reduction from previous year's harvested acreage and, if so, the level thereof; (d) if a set-aside is implemented, whether a limitation should be placed on planted acreage; (e) whether there should be a land diversion program and, if so, the extent of such diversion and the level of payment; (f) whether the special wheat acreage grazing and hay program should be implemented; (g) whether to require compliance with the established farm normal crop acreage (NCA) as a condition of eligibility for program benefits; (h) the methodology to be used to adjust the established "target" price from the 1980 crop level and, if normal crop acreage (NCA) and set-aside requirements are deemed necessary, whether the established "target" price should be adjusted further to compensate producers for complying with the NCA and set-aside requirements; (i) the loan and purchase

level for the 1981-crop of wheat; and (j) other related provisions. Determinations (a) through (c) are required to be made by the Secretary on or before August 15, 1980, in accordance with applicable provisions in section 107A of the Agricultural Act of 1949, as amended. All other proposed determinations are in accordance with applicable provisions in sections 107A and 109 of the Agricultural Act of 1949, as amended, and section 1001 of the Food and Agriculture Act of 1977, as amended.

DATE: Comments must be received on or before July 21, 1980.

ADDRESSES: Mr. Jeffere A. Wells, Director, Production Adjustment Division, Room 3630 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Bruce R. Weber, Agricultural Program Specialist, Production Adjustment Division, USDA-ASCS, P.O. Box 2415, Washington, D.C. 20013 (202) 447-8688. The Draft Impact Analysis describing the options considered in developing this proposed determination and the impact of implementing each option are available from the above named individual.

SUPPLEMENTARY INFORMATION: This proposed determination has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "significant".

In compliance with Secretary's Memorandum No. 1955 and the final report issued by the Secretary with respect to Executive Order 12044 and entitled "Improving USDA Regulations"

(43 FR 50988), it is determined after review of these and related regulations contained in 7 CFR Parts 707, 709, 713, 718, 719, 792, 794-96, and 1421.485-490 for need, currency, clarity, and effectiveness, that no additional changes be proposed at this time. Any comments which are offered during the public comment period on any of these regulations, however, will be evaluated in development of the final determination.

The need for this notice is to satisfy the statutory requirements provided in sections 107A(a); 107A(b)(1)(B); 107A(d)(1); 107A(d)(3); 107A(f)(1), 107A(f)(2) and 109 of the Agricultural Act of 1949, as amended (hereinafter referred to as the "1949 Act"), and section 1001(a) and 1001(b) of the Food and Agriculture Act of 1977, as amended (hereinafter referred to as the "1977 Act").

Final actions on these proposed determinations by the Secretary for 1981-crop program purposes should be made by not later than August 1, 1980, to allow wheat producers additional time to plan their 1981 crop plantings within announced program provisions. Therefore, I have determined that it is impractical and contrary to the public interest to comply with the public remarking requirements of 5 U.S.C. 553 and Executive Order 12044. Accordingly, the public comment period is being limited to 30 days which will allow the Secretary sufficient time to properly consider the comments received before the final program determinations are made.

The following proposed program determinations with respect to the 1981-crop of wheat are to be made by the Secretary:

Proposed Determinations

a. Whether there should be a set-aside requirement and, if so, the extent of such set-aside. Section 107A(d)(1) of the 1949 Act provides that the Secretary shall implement a set-aside of cropland if it is determined that the total supply of wheat will, in the absence of a set-aside, likely be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. An adequate carryover level for the U.S. has been determined by USDA to be equal to 6.6 percent of the world consumption of wheat or an estimated 1085 million bushels for the 1981/82 marketing year.

The Secretary is required to announce whether a set-aside for the 1981 crop of wheat is to be in effect by not later than August 15, 1980. If a set-aside is in effect, then as a condition of eligibility for loans, purchases, and payments, producers must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage of the acreage of wheat planted for harvest in 1981.

Indicated 1980-crop plantings of wheat are 79.5 million acres, 11 percent greater than in 1979. The harvested acreage of wheat may be as much as 15 percent higher. Total production is projected to range from 2100 to 2450 million bushels. At this time it seems quite likely that the 1980 wheat crop will exceed the record 2142 million bushels set in 1976 even with the existing unfavorable spring wheat prospects.

It is likely that domestic use of wheat will increase slightly from 1979/80 to about 785 million bushels, but domestic usage could range from 745 million to 840 million bushels. Wheat feeding is expected to change little from 1979 as the feed grain/wheat price ration will continue to favor feed grains. Domestic food use will continue to advance as per capita flour consumption rises.

With continued strong world trade, U.S. wheat exports for the 1980/81 marketing year may not change significantly from the record 1375 million bushels expected to be exported in 1979/80. However, due to uncertain 1980-crop world wheat production prospects, U.S. exports could vary from 1200 million to 1500 million bushels. The final export figure is highly dependent on the 1980-crop output in the Soviet Union, China, and India.

Given the 1980/81 outlook, it is likely that ending carryover stocks of wheat will increase over 1979/80 by about 150 million bushels, to an amount still within what is considered a reasonable U.S. stock level. However, ending stocks could range from 850 to 1300 million bushels.

The probable outlook for wheat in the

1981/82 marketing year depends a great deal on the 1980/81 outcome. However, it appears that plantings would be little changed from 1980 if it were decided not to have a set-aside for the 1981 crop of wheat. Given this acreage outlook, along with a trend yield of about 32.0 bushels per acre, 1981 crop production could be 2.3 billion bushels. With this level of production and likely beginning stocks estimated to be approximately 1.1 billion bushels, the total supply of wheat in 1981/82 could approach 3.4 billion bushels, the highest level on record.

Domestic use of wheat in 1981/82 is not likely to vary much from 1980/81. The essential factor with regard to domestic use is wheat feeding. If the 1981/82 feed grain/wheat price ratio continues to favor feed grains—as it is expected to do—wheat feeding is estimated to remain at about 75 million bushels.

World trade is expected to remain strong as consumption requirements continue to grow. U.S. exports for 1981/82 are likely to remain near the previous two years (over 1.3 billion bushels).

Therefore, total demand for the 1981/82 marketing year could approach 2.15 billion bushels, about the same as in 1979/80. This would result in an ending stock level of over 1.2 billion bushels, exceeding the desired carryover level of about 1.085 billion bushels by almost 150 million bushels.

The above outlook would suggest that a set-aside program is possibly needed

for the 1981 crop of wheat. However, later crop developments throughout the world could materially change this outlook. Options under consideration at this time include the following: (a) No set-aside; (b) 10 percent set-aside; (c) 20 percent set-aside; and (d) 25 percent set-aside.

Interested persons are encouraged to comment on the need for a 1981 wheat set-aside program and the appropriate percentage of acreage to be set aside, if deemed necessary, taking into account the above figures.

b. Determination of the national program acreage (NPA). Section 107A(d)(1) of the 1949 Act requires the Secretary to proclaim an NPA for the 1981 crop of wheat not later than August 15, 1980. The NPA shall be the number of harvested acres of wheat the Secretary determines (on the basis of an estimated national weighted average farm program payment yield) will produce the quantity (less imports) that is estimated will be used domestically and for exports during the 1981-82 marketing year. The NPA may be further adjusted by an amount the Secretary determines will accomplish a desired carryover stock level. The Secretary may later revise the NPA first proclaimed if the Secretary determines it is necessary based upon the latest information.

The U.S. wheat stock objective, an amount judged to be our "fair" share of world wheat stocks, has been determined to be equal to 6.6 percent of the world consumption of wheat or approximately 1045 million bushels for the 1980/81 marketing year. The likely NPA for the 1981 crop of wheat is:

a. Estimated Domestic Use, 1981/82	783 mil. bu.
b. Plus Estimated Exports, 1981/82	1,250 mil. bu.
c. Minus Imports	- 2 mil. bu.
d. Minus Stock Adjustment ¹	- 15 mil. bu.
e. Divided by National Weighted Average Farm Program Payment Yield	33.4 bu./ac.
f. Equals 1981 Crop NPA	63.3 mil. ac.

¹ a. Estimated 1981/82 Beginning Stocks, 1,080 mil. bu.
b. Minus 6.6 percent of 1980/81 World Consumption of Wheat, 1,045 mil. bu.
c. Equals Desired Stock Adjustment, - 15 mil. bu.

This NPA compares to the 1980 crop

NPA which was first proclaimed at 70.0 million acres. Comments on the NPA and the appropriate stocks level for the 1981 crop of wheat from interested persons, along with appropriate supporting data, are requested.

c. Recommended percentage reduction from previous year's harvested acreage. Under Section 107A(d)(3) of the 1949 Act, the 1981 individual farm program acreage of wheat eligible for payments shall not be reduced by application of an allocation factor (not less than 80 percent nor more than 100 percent) if the producer reduces

the acreage of wheat planted for harvest on the farm from that planted in 1980 by at least the percentage recommended by the Secretary in the proclamation of the NPA for the 1981 crop.

The previous year's (1980) acreage will include the acreage actually harvested plus acreage considered harvested which includes prevented planted acreage.

The likely national recommended reduction percentage for the 1981-crop of wheat is:

a. 1980 Estimated National Harvested Acreage	71.5 mil. ac.
b. Plus Acreage Credited as Harvested	5 mil. ac.
c. Equals 1980 Considered Harvested	72.5 mil. ac.
d. Minus 1981 Preliminary NPA	63.3 mil. ac.
e. Equals Acreage Reduction Needed from Previous Year's Harvested Acreage	8.7 mil. ac.
f. Divided by 1980 Considered Harvested Acreage	72.0 mil. ac.
g. Equals 1981-Crop Recommended Reduction Percentage	12 percent

Comments from interested persons with respect to the reduction percentage, if any, are requested.

d. If a set-aside is implemented, whether a limitation should be placed on planted acreage. Section 107A(f)(1) of the 1949 Act authorizes the Secretary to limit acreage planted to wheat if a set-aside is in effect. Such limitation is required to be applied on a uniform basis to all farms which are participating in the announced program and are producing wheat. Interested persons are invited to comment on the pros and cons of limiting planted acreage if a set-aside program is announced.

e. Whether there should be a land diversion program and, if so, the extent of such diversion and the level of payment. Section 107A(f)(2) of the 1949 Act authorizes the Secretary to implement a land diversion program and to make land diversion payments to producers of wheat whether or not a set-aside is in effect. Land diversion payments may be made if the Secretary determines they are necessary to assist in adjusting the national acreage of wheat to desired goals. If land diversion payments are made, participating producers will be required to devote to approved conservation uses an acreage of cropland equal to the amount of such land diversion.

Land diversion payments may be established at a flat per bushel (specific rate per bushel times farm program yield) or through the submission of bids by producers.

If it is deemed necessary to make land diversion payments in 1981, such payments will likely be established at an offer rate. Diversion options being considered include the following: (a) 10 percent voluntary diversion with no set-aside; (b) 20 percent voluntary diversion with no set-aside; (c) 10 percent voluntary diversion with a 10 percent required set-aside; and (d) 20 percent voluntary diversion with a 10 percent required set-aside. Diversion payment rates being considered range from \$1.00 per bushel to \$2.50 per bushel. Interested persons are encouraged to address the

need for a land diversion program, the appropriate terms and conditions and the pros and cons of a land diversion program either in place of, or in combination with, a set-aside program for 1981.

f. Whether the special wheat acreage grazing and hay program should be implemented. Section 109 of the 1949 Act authorizes the Secretary to administer a special wheat acreage grazing and hay program for the 1981 crop of wheat. If this special program is implemented, a producer shall be permitted to designate, in accordance with regulations established by the Secretary, a portion of the acreage on the farm intended to be planted to wheat, feed grains, or upland cotton for harvest, not in excess of 40 percent of the total intended plantings or 50 acres, whichever is greater. The designated acreage shall be planted to wheat (or some other commodity other than corn or sorghum) and used by the producer for grazing purposes or for hay rather than for commercial grain production. The Secretary shall pay producers participating in the special program an amount determined by multiplying the farm program payment yield for wheat by the number of acres designated in the special program by a rate of payment determined by the Secretary to be fair and reasonable.

This program was implemented for both the 1978 and 1979 programs with participating acreages at total levels of 1.2 and 9 million acres, respectively. If this special program is implemented for the 1981 crop of wheat such announcement will not likely be made before January 1, 1981.

Interested persons are encouraged to comment on the need for this program, the appropriate rate of payment, and the timing for implementation of such program.

g. Whether to require compliance with the established farm normal crop acreage (NCA) for program benefit eligibility. Section 1001(a) of the 1977 Act, as amended by the Agricultural Adjustment Act of 1980 (Pub. L. 96-213), provides that for the 1981 crop of wheat the Secretary may require as a condition of eligibility for loans, purchases and payments, that producers not exceed the acreage on the farm normally planted to crops designated by the Secretary (the established farm NCA).

It is proposed that an NCA requirement be established for the 1981 wheat program whether or not set-aside or land diversion requirements are implemented.

Interested persons are invited to comment on the pros and cons of requiring compliance with the farm NCA with respect to the 1981 crop of wheat as a condition of eligibility to receive program benefits.

h. Determination of the 1981-crop established "target" price and, if normal crop acreage (NCA) and set-aside requirements are placed in effect, whether the established "target" price should be increased to compensate producers for complying with such requirements. Section 107A(b)(1)(B) of the 1949 Act provides that the 1981 established "target" price shall be not less than the 1980 target price (\$3.63), adjusted upward to reflect such changes in the costs of producing wheat as the Secretary finds necessary and appropriate for the purpose of establishing and maintaining a fair and equitable relationship between loan rates, established prices, and production costs for wheat and competing commodities.

Additionally, section 1001(b) of the

The team is coached by Bob Brown and is affiliated with Pop Warner. Chris played talkback on the team. He is the grandson of Mr. and Mrs. T.J. Campbell of Clarendon.

Con't from p. 6

1977 Act provides that if a normal crop acreage (NCA) requirement and a set-aside requirement are in effect for the 1981 crop of wheat, the Secretary is authorized to increase the established price for wheat by an amount he determines appropriate to compensate producers for not exceeding the NCA where required and for participation in any required set-aside for wheat.

The 1980 crop established "target" price for wheat was set at \$3.63 per bushel by an amendment to Section 107A of the Agricultural Act of 1949 by the Agricultural Adjustment Act of 1980 (Pub. L. 96-213). (By section 1001 of the Food and Agriculture Act of 1977, as amended, producers not complying with the farm normal crop acreage (NCA) requirement, if in effect for the 1980 crop, would receive deficiency payments based on the lower target price (\$3.08 per bushel) determined in accordance with the statute previously in effect.) The purpose of this increase is to more adequately reflect current increases in the costs of producing wheat. Established target prices are not intended to cover the total costs of producing wheat, but should be at levels that will ensure that farmers' incomes during periods of large supplies and weak market prices will cover nonresponsible costs (short-term costs). The \$3.63 per bushel established

"target" price approximates short-term costs of production for the 1980 crop.

Short-term costs are defined as those costs that cannot be postponed by the producer. These costs include (a) variable costs less producer labor; (b) machinery ownership costs less replacement costs; (c) general farm overhead costs; (d) land costs (a composite of owner-operator land costs and renter and cash rental charges) and (e) a return for family living based on a median family income.

Accordingly, it seems appropriate to use the estimated short-term costs for 1981 in the establishment of the 1981-crop established "target" price for wheat. By following this approach, the latest cost of production figures are used in determining a subsequent year established "target" price for wheat rather than historical costs as have been used in determining established "target" prices for wheat in prior years.

The authority to increase established "target" prices to compensate producers for participation in a set-aside has been used for both the 1978 and 1979 set-aside programs. When increasing the established "target" prices, the Secretary is required to take into account changes in the cost of production resulting from participation in a set-aside program. For 1978 and 1979, the increase in established "target" prices was approximately 40 cents with a 20 percent set-aside.

Based on the estimated changes in the 1981-crop costs of production resulting from a set-aside, the following increases in established "target" prices are likely.

Set-aside percentage	Approximate increase in target
10 percent	30-35 cents.
20 percent	45-50 cents.
25 percent	55-60 cents.

Interested persons are encouraged to comment with respect to the method by which the established "target" price for the 1981 crop of wheat should be adjusted and whether the target should be further adjusted if a set-aside program is implemented for wheat.

The loan and purchase level for the 1981 crop of wheat. Section 107A(a) of the 1949 Act requires the Secretary to make available to producers loans and purchases for the 1981 crop of wheat at not less than \$2.35 per bushel nor in excess of 100 percent of parity, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets. However, if the Secretary determines that the average price of wheat received by producers in the 1980 marketing year is not more than 105 percent of the level of loans and purchases for wheat for the 1980

marketing year, the Secretary may reduce the level of loans and purchases for wheat for the 1981 marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain, except that the level of loans and purchases shall not be reduced by more than 10 percent in any year nor below \$2.00 per bushel. Loan and purchase levels being considered for the 1981 crop of wheat range from \$2.50 per bushel to \$3.00 per bushel.

Comments on the level of loan and purchase rates for the 1981 crop of wheat, along with supporting data, are requested from interested persons.

Other Related Provisions. A number

Clarendon Press, Thur., July 3, 1980

of other determinations must be made in carrying out the wheat loan and purchase program such as: (a) Commodity eligibility; (b) premiums and discounts or grades, classes, and other qualities; (c) establishment of county loan and purchase rates; and (d) such other provisions as may be necessary to carry out the program.

Consideration will be given to any data, views and recommendations that may be received relating to above items.

Signed at Washington, D.C., on June 17, 1980.

Ray Fitzgerald,
Administrator, Agricultural Stabilization and Conservation Service.

OUR ENERGY DEPENDENCE

By William H. Dempsey

The next time you see one of those long coal trains winding its way through the countryside, reflect on this fact:

Each car in that train could be carrying the equivalent of 300 barrels of oil—at a transportation price of less than \$2 per mile.

Railroads are the major haulers of coal in this country, loading some 65 percent of all the bituminous and lignite coal mined. No other transportation mode can offer the combination of efficiency, flexibility and economy for the high-volume movement of coal.

That is important—because our national energy policy calls for a switch to coal to reduce our dependence on foreign oil. Last year, the railroads moved more than 400 million tons of coal. Since one ton of coal is equal to about three barrels of oil, that is the equivalent of about 1.2 billion barrels. There is a lot more coal in the ground in this country. In fact, there is enough for hundreds of years—even at expanded levels of use.

The national energy policy dovetails neatly with the national transportation policy—which seeks to help the railroad industry achieve greater financial health.

With increased coal traffic, railroads can generate greater earnings, which will help them make needed improvements to plant and equipment which, in turn,

can improve service so that still more traffic can be won—all at no cost to the taxpayer.

The symmetry of this scenario is upset by two unwelcome facts: Coal production is not expanding as rapidly as hoped and conversion to coal by utilities and other companies is not being carried out as readily as hoped.

The reasons for this are many—environmental problems, costs of conversion, domestic prices for oil that continue below the world price, an abundance of natural gas, among others.

Utilities and some manufacturers have claimed that they have scrapped conversion plans because of high rail coal rates. Some have stated that, because of the rail rates, coal imported from other nations is cheaper than domestic coal. Already, there have been attempts to legislate an arbitrary "cap" on rail coal rates—in the name of the energy policy.

The fact is rail rates for coal are, on the average, lower than rates for other rail-carried commodities—about 1.88 cents per ton-mile versus an average for all commodities of about 2.5 cents per ton-mile. Also, while coal prices have soared, rail rates—as a percentage of the delivered price—have dropped from almost 40 percent in 1967 to less than 25 percent in 1978. In constant 1959 dollars, the average railroad coal rate has actually dropped almost 7 percent over the last 20 years—

even though coal prices have risen—still in constant dollars—almost 109 percent.

Many railroad rates in the West seem high because of the long hauls involved, but the average rate per ton-mile in this region is only 1.13 cents. (A haul of 1,000 miles at this rate would be about \$11 per ton delivered.)

As for foreign coal, I cannot really say whether it is truly cheaper than domestic coal—for whatever reason—or not. But I would suggest that protection for American coal producers, if it is needed, should not be "taken out of the hide" of the railroads.

This brings me to my final point, which is that there is no rational justification for penalizing one private company for the benefit of another. It is ludicrous to justify such an action on the grounds that it will "encourage" the use of coal by already-profitable companies.

If such "encouragement" is needed in the public interest, then the public should provide it.

It is widely recognized that the public has a vital interest in a strong railroad system. Such short-run benefits that might be gained from depressing rail coal rates would surely be out-weighed by the long-run certainty that such an action would cripple the industry—to the disadvantage of all who depend on its service.

Mr. Dempsey is President and Chief Executive Officer of the Association of American Railroads.

The Happy Cooker

A Happy Companion
"Daylight Savings Time Is Barbecue Time." The added hour of daylight kicks off the season for backyard barbecues and outdoor living. With the energy crisis in high gear, people are rediscovering the pleasure of "home sweet home." They're planning more entertaining or family activities that can be enjoyed there.

Providing enough space for seating or serving a crowd is often a problem. The makers of The Happy Cooker™ kettle grill have come to the rescue with a companion product, The Happy Snacker™, a unique portable picnic table. It can be used for serving, seating or both.

Crafted of high-strength steel tubing and redwood-stained wood slats, it is constructed in two units that latch together to form a traditional picnic table. It comfortably seats four adults (or six youngsters).

A unique aspect is that each unit can also be used separately as a bench or snack table. These lightweight units fold compactly for carrying, transporting and storing. The Happy Snacker is ideal for picnics, backyard barbecues, camping, apartments or anywhere additional seating is needed.

HELP a crippled child today. Get your Bar-B-Q ticket from Hensons.

THE PUBLIC INTEREST

By Marvin A. Goldberg

A sunny spot in our cloudy energy outlook is our growing ability to harness solar power.

Solar energy is one of our primary energy alternatives. By using it, we will be able to conserve our dwindling fossil fuel reserves, protect our environment from pollution and minimize the economic effects of importing oil and gas from other countries.

The use of solar energy is neither new nor untried. Leonardo da Vinci heated copper with the sun's rays in 1500. By the 1800s, solar energy was used to generate electricity, drive a hot-air engine and generate steam. Solar energy's modern application to hot water and space heating began at the turn of this century.

Although many people don't realize it, solar energy is generally beneficial throughout the country. Passive solar features such as window placement can be highly effective in all sections of the U.S. Active solar may be more technically efficient in the warmer, sunnier portions of the country—but that is only part of the economic equation.

In colder climates, higher energy costs and the need to use energy for longer periods of the year balance the equation and make solar beneficial to residents in the North, East, West and South.

A solar hot-water system can easily be installed in a home without any changes or disruption to its standard heating and cooling system. Solar hot-water systems are simple, involve a relatively small investment and offer consistent, year-round benefits.

Every 15 minutes enough sunlight reaches the earth to meet its needs for the entire year.

Pre-engineered, easy-to-install EXXON Solar Thermal Systems Domestic Hot Water packages, for instance, include all the components necessary for residential installation. The packages are designed to supply anywhere from 45 to 70 percent of the domestic hot-water requirements of an average single-family home depending on location.

Solar energy is also being used to heat, cool and supply hot water for large apartment buildings, offices, hospitals and schools. In New Hampshire a Concord National Bank Building has been designed to get up to 65 percent of its cooling and 50 percent of its heating through 26 solar collectors. All of the bank's tap water will be heated by the sun's energy.

In an energy-hungry world, sunlight is manna from heaven!

Mr. Goldberg Sr. is Marketing Analyst at the Solar Thermal Systems Division of Exxon Enterprises, Inc. For more information about solar energy, call 800-447-4700* or write Exxon Thermal Systems, Box 592, Florham Park, N.J. 07932.

TIPS FOR MOWERS

Mower Power To You
This time of year, a homeowner's thoughts often turn to cutting the grass. So it's get the power mower out of cold storage and get on with the job. Hold it! Not so fast!

Your mower must be ready for the job. The Outdoor Power Equipment Institute suggests:

1. Take the mower to an authorized service dealer for inspection unless you had it serviced in the fall.
 2. Make sure the spark plug is clean. If necessary, replace it while the engine's off.
 3. Make sure the carburetor and air filter are clean.
 4. Change oil and fill with gasoline.
 5. Clean and repaint scratched or rusted metal parts, first with a primer of red lead, then two coats of exterior paint.
 6. Reread the owner's manual.
- Now spring into action. Mower power to you.

Health Warning: Beware Of Sunlamps

It's the time of year when many are eager to get a head start on that summer tan — under sunlamps, at home or in those fashionable new "tanning huts" around the country.

It's a bright idea to properly protect your eyes from sunlamp rays.

Serious damage to your eyes can result from even relatively short exposure to sunlamps without adequate protection, according to the American Association of Ophthalmology (AAO) — medical eye physicians.

"Your eyes are quite vulnerable to the concentrated ultraviolet radiation from sunlamps," says Leonard Flom, M.D., an ophthalmologist. "Looking directly at a sunlamp, even for a few seconds, can result in a painful condition known as photokeratitis. Usually temporary, this causes the eye to burn and feel sandy or gritty under the lids. Medical treatment is required."

A longer direct exposure can actually scar the cornea of the eye and could permanently impair vision. Burned eyes are a serious problem that is avoidable through simple precautions. The Food and Drug Administration (FDA) recently reported more than 8,000 persons were treated in hospital emergency rooms alone in 1979 from sunlamp related injuries — most of them skin burns and eye irritations. FDA has established a new safety requirement for sunlamps — in homes or in tanning huts, health clubs and spas —

which mandates protective goggles, among other provisions.

"Only these goggles can properly shield the eyes from severe burns, even vision damage," says Dr. Flom. "Sunglasses can not handle such concentrated ultraviolet radiation and, certainly, cotton balls will not do the job."

"Be sure cosmetics are removed before the next session under the sunlamp. Some contain oil which can cause special sensitivity to the radiation."

"Some medications also can increase such sensitivity, so don't hesitate to check with your physician before using a sunlamp if you are taking medication or believe you are particularly sensitive to ultraviolet."

Most experts consider one minute in a tanning hut equal to upwards of an hour in outside sunlight. So use a sunlamp which comes with clear instructions recommending distance and exposure times.

Use sunglasses when tanning outdoors. Here they are effective, particularly to protect that sensitive skin on eyelids and around the eyes.

When a wool flannel garment is half dry after washing, press it, using cheesecloth as a press cloth, to lift the nap and avoid that flattened-out appearance.

SWIMMING POOL SAFETY TIPS

By Lloyd Bridges

You may be able to enjoy more fun, fitness and family togetherness with a pool if you know more about how to swim safely.

Safety rules and procedures should be established, then understood and remembered by all who use the pool. Swimming pool safety is everyone's business, after all.

Common-sense precautions should include never swimming alone, never running near the pool, no glass at poolside and watching children at all times.

Don't hesitate to take corrective action, even with guests. If you're a pool owner, the pool needs chemicals to keep it safe, clear, clean and bacteria-free. Be sure to read all directions and cautions on container labels, and follow these tips developed by Sun Swim Pool Products:

- Do not use quantities in excess of those recommended on the label.
 - Keep chemicals out of the reach of children.
 - Keep containers closed when not in use.
 - Do not use contents of unlabeled containers.
 - Never mix chemicals together. Add them to the pool separately.
 - Never add water to chemicals. Always add chemicals to water.
 - Store chemicals in a cool, dry, clean place.
 - Use separate, clean, metal or plastic measuring cups for each chemical.
- Here are some other safety tips:
- Keep electrical appliances away from the pool to avoid their being accidentally knocked into the water.
 - No pool is safely equipped without a life ring and a long-handled shepherd's crook at poolside at all times.
 - A first-aid kit should also be standard equipment and stored in a convenient location known to all family members.
 - Visible depth markers are a good idea to prevent swimmers from diving into too-shallow water. Proper use of the diving board and

How many don'ts of swimming pool safety can you find illustrated in this cartoon?

slide should also be stressed.

Other precautions: Don't dally while lightning or a thunderstorm builds. At the first sign, it is recommended you abandon the pool for indoor shelter.

Don't hesitate to ask first-time guests if they can swim. If nonswimmers are splashing about, a good swimmer should be present. A meeting of family members to explain (and agree on) pool rules can contribute to an accident-free, fun-filled time.

Film and TV star Lloyd Bridges is spokesman for Sun Swim Pool Products, manufactured by the FMC Corp.

Founded in 1865 by Pedro Menendes de Aviles, St. Augustine, Fla., is the oldest permanent settlement in the U.S.

GOODMAN FURNITURE

Owens family enjoys get together

Mrs. Sam Owens had the pleasure of having all of her eight children and a number of her grandchildren and great grandchildren home for the weekend.

Those having dinner in the home of T.E. and Faye Naylor Saturday and lunch in the Owens home Sunday included: Mr. and Mrs. Sam Owens Jr. of Ft. Worth; Mr. and Mrs. Merle Owens, Cody, Cheryl of Oklahoma City; Mr. and Mrs. Jimmy Owens and Cindy, Mr. and

Mrs. Frenchie Gofford and Russ, Mr. and Mrs. Berle Owens, Lisa and Stacy, Mr. and Mrs. Douglas Owens, Shaun, Tawna and Casey, Willie Hamilton and Steve, Mr. and Mrs. Gerald Frye, Tara and Jamie, Mr. and Mrs. Steve McAfee and Seth, Mr. and Mrs. Glenn

Spiller and Amanda, Mrs. Leo Koenig, Chris and James, Mrs. Jessie Beyers and Lance all of Amarillo; and Shane and Greg Bigelow of Abilene.

Sam had been in Australia on a business assignment when he suffered a heart attack the first of April so it was a very joyous occasion to have the family together again.

Bookworm

Judith Krantz first novel, "Scruples", was number one on every best seller list. She has now written a second novel, "Princess Daisy" which is bound to follow suit.

This romantic dream of a novel transports us from the palaces of St. Petersburg to the Venice of today; from the closely guarded enclaves of the Virginia Hunt Country to the elegance of the great homes of England. The utterly compelling story blends the wonder of once upon-a-time with the pulse of

the here-and-now.

Princess Marguerite Alexandrovna Valensky, called by the name of Daisy, becomes our heroine.

We may very well find ourselves with a waiting list for the book, "Princess Daisy". It is well-written, entertaining fiction.

Farmers have responsibility

Farm operators, it is your FULL responsibility to accurately and timely file acreage reports to be eligible for program benefits in 1980. Since there is no required set-aside and no early sign-up, the only requirement for participation is accurate and timely certification. Crops to be measured and reported are cotton, corn, grain sorghum, soybeans and sunflowers.

Measurements made in this office are only a guide and are not official unless we visit the farm and furnish measurements on an official notice.

We will help you all we can in the office; however, if the acreage is later found, due to a spot check, to be incorrect, it is your responsibility.

Remember, the only way we can guarantee the acreage for 1980 is to make a field visit and notify you of the acreage on an official notice--and then we only guarantee the acreage for that year.

The cost of the measurement service on spring seeded crops is \$10.00 per slide. A slide covers 1/4 section. These measurement services must be completed by August 1, 1980. Therefore we will have to have all requests for measurement service made before July 15,

1980.

Loans

Interest rates have been lowered for 1980 commodity loans to 11 1/2 percent.

Low yield wheat and barley

Producers whose farm makes less than 60 percent of the farm's established yield times the acres may be eligible for a disaster payment. This claim for disaster credit must be made within 5 days after completion of harvest of wheat or barley on that farm.

Dates to remember

July 15, 1980--Final Date to Request Measurement Service and July 31, 1980--Final Date to Report Spring Seeded Crops.

Holiday

We will be closed on Friday, July 4, 1980, in observance of Independence Day.

Hedley news

Hobart Moffett, Mrs. Ruby Beecker, Mrs. Dannie Bernardin and Mrs. Myrtle Reeves attended memorial services for Roy Jewell at Hereford Saturday.

Roy Jewell a long time retired farmer of Hedley passed away at Hereford Friday, June 27th. Sympathy is extended to all of the family.

Little Miss Lena Stone returned home to Amarillo last Thursday after spending a week here with her grandparents Mr. and Mrs. Bert Stone.

Mrs. Alice Lamberson is spending a two week vacation with her grandson and family, Mr. and Mrs. Jimmy Lamberson at Perryton.

Mrs. Elsie Shaw and her

LARRY SINCLAIR, Music Evangelist and his family will be in Hedley July 6.

Larry Sinclair and family to appear in Hedley

The Family of Larry Sinclair, Music Evangelist, will be with the First Baptist Church of Hedley for the Morning Service July 6, 1980. Larry led the music in our Spring Revival and his wife Freida came with "Willie Jo" to assist on Saturday night and Sunday morning at the close of the Revival.

Theirs will be a Christian concert, Ventriloquism and testimonies for the entire worship hour on July 6, 1980 in the Morning Service.

Their coming is not dependent upon a love offering, but we will express our appreciation to them with a Love Offering.

Fishing is excellent at Greenbelt

If you haven't had to clean any fish this year, it isn't because they aren't out there waiting to be caught! Wall-eye, black bass and sand bass are hungry and just begging to land in a frying pan. The crappies aren't biting too well, but the cat fish are ready to be caught on a rod and reel. Just this week a big 11 pound Northern Pike was hauled in. Of course, only the very best fishermen ever get to pull a pike out of the water, so not all of you will need to clean one of those.

Top water lures are catching good sized bass. If you just must fish with live bait, water dogs are hard to come by so far this summer, so

plan on using some other tasty morsel to tempt the "pieces of the plains".

The biggest fish stories reach the ears of those in the bait and tackle shops, but not

all of the big fish are recorded on film. Sometimes large numbers of fish are caught and never bragged about, either. So, just get out there and catch'em!

Howardwick partyline

By NORMA CORGILL

Hello partyliners, how is this hot weather serving you? Wouldn't a nice cool shower of rain be wonderful?

Walden and Alleen Moore have visiting them this week Alleen's mother, Mrs. Kellian of Amarillo. We are so happy to have her visiting with us again.

Eugene and Sharon Corgill of Midland, Texas visited Friday night and Saturday with his mother Norma Corgill.

Ruth and Mel Mills were in Amarillo Monday on business for the Senior Citizen Club.

Visiting Henry and Cora

amounts of food at one time. There is only a small investment in equipment, but the amount of energy used is a disadvantage because oven drying takes several hours depending on the product being dried.

A good quality dehydrator may be worth the investment if much food drying is done. Dehydrators are specially designed to provide correct temperature, humidity and ventilation for drying.

Controlling temperature and humidity are the most important aspects of drying foods, Miss Garnett said. If the temperature is too hot, the produce may form a hard crust and not allow the inside of the piece of food to dry. If the temperature is too cool, the microorganisms in the food may continue to grow and spoil the food.

Miss Garnett warned that cleanliness and sanitation are of the utmost importance in drying foods, especially when the food is dried outside.

Bland Sunday were their son and family Kelly and Cherry Bland and children of Pam-pa.

Albert and Trula Moore were in Oklahoma City part of last week. Trula's sister Eunice Erwin of Ardmore has surgery on Thursday. She went through her surgery fine and is doing okay.

They spent 2 days with their sons family the Larry Moore's of Oklahoma City and enjoyed their visit with them. But it was hot weather there also.

Thelma Corgill and Willie Moore were in Childress last Wednesday on business.

Miss Garnett also told the homemakers in attendance that the dried product is only as good as the product that was started with, so only fresh fruits and vegetables of good quality should be used for drying.

More tips and recipes for drying foods at home can be obtained by calling or going by the Donley County home demonstration office in the old Courthouse.

According to a recent poll, 25 million Americans, or about 11 percent, run or jog regularly.

Computation shows that a mature apple tree with about 100,000 leaves transpires, or evaporates, about 96 gallons of water a day.

How to dry food

Drying is one of the oldest methods of preserving food, according to Donley County Extension Agent, Lesli Garnett.

Garnett conducted a dry foods seminar last week.

Three methods of drying foods were discussed at the seminar. Sun drying is the most economical way of drying foods because it only requires the purchase of drying trays and protective netting. Drying trays can be made from wood, or even an old porch screen. Large quantities of food can be dried in the sun at one time. Texas Panhandle weather is good for sun drying because of the high summer temperatures low humidity and low air pollution level.

Solar drying is another method of preserving food. A solar dryer makes drying faster than sun drying be-

cause the dryer elevated the temperature 20 to 30 degrees higher than the unaided sun.

Oven drying is a good method for drying small Pickles, Jams and Jellies

A seminar on the latest techniques in pickling, making jams and jellies will be held July 8 from 9:30 to 2:00 in the Home Economics Building at the High School says Leslie Garnett, Donley County Extension Agent.

The meeting will be the third in a four part series on Food Preservation. Participants are asked to bring a glass for a jelly jar, sack lunch, package of frozen strawberries, and a package of Sure Gel.

Making jelly in the Microwave will also be taught.

For more information call or come by the Donley County Extension Office. Oh, and don't forget to bring an appetite for homemade ice cream and delicious fruit toppings.

Tips from Katydid

Last week, an interesting, if not smelly, article on how to get rid of gophers was printed. Mrs. Dema Justice decided that her method was better. She watches the nasty little gophers as they tunnel near her garden, scoops them up in one fell swoop with her bare hands then she begins to jump up and down on the gopher! All 130 pounds of her 83 year old frame stomps the gopher senseless and then she takes a spade to finish them off. I prefer the cat litter, myself.
