Possibilities of Soil Conservation Aid

Donley County Agent, Charles Reed, states that Donley County is known as a progressive diversified county. Farmers and ranchers use the best seed, livestock and equipment available.

We realize that to continue our progressive production that we must take care of the farms and ranches to conserve the soil and moisture and build up the land to maintain production.

Soil and water conservation farming and ranch operations not only protects the land, but increases the yields and income from the land. Greater income from farms aids the farmer, rancher, town and nation. In Texas the State Board of Soil Conservation has completed figures from 1400 Texas landlords and operators who have soil conservation plans 70 to 100% completed on 883,000 acres. These reports show that farm and ranch production increased 39%, over neighboring farms without conservation measures.

This means that 100 acres of land with proper soil and water conservation and land use management is equal to 139 acres of untreated land. From a money standpoint of increased yields, a farmer or rancher is increasing size of farm or ranch without buying additional land. Many of these operators reported that they are obtaining these results without additional labor or equipment costs.

Nearly each farm or ranch in Donley County is in need of terraces, diversion terraces, gully control, pasture reseeding, or pasture improvement, etc. With the present AAA program making substantial cash payments to landlord or operator carrying out conservation practice it is to our benefit to carry out a large number of these beneficial practices.

The Soil Conservation Service is operating under the Department of Agriculture and the Federal Government pays their salary and operating expenses. The Soil Conservation Service is composed of trained and qualified soil conservation experts.

We need the services and good work of the Soil Conservation Service in Donley County.

The Soil Conservation Service is ready and anxious to assign Soil Conservation experts to any county or district in Texas that requests aid, but it must be requested in following manner:

1. Fifty or more landowners in county must petition State Conservation Board for hearing.

2. Upon receipt of petition State Board sends their agent to county to hold public hearings from representative group of farmers and ranchers to determine desires or needs.

3. Hearings will be held at: Clarendon, June 30 at 3 o'clock. Hedley, June 30 at 8:30 o'clock. Please plan to attend one of these meetings and bring neighbors with you.

General Rain Falls Over County

A hard falling, general rain Monday afternoon, brought brighter hopes to Donley County farmers although most of them think it is a little too late to replant cotton but plan to put most of their crop in late feed.

In some places where showers have fallen on previous dates, the rain will greatly benefit growing cotton and feed but in others the rain packed and washed out considerable acreage of newly planted and young stuff that has barely broken the ground.

The only hail in sizeable amount reported was around McKnight.

It was reported that Jericho had three inches of rain in 30 minutes and all other parts of the county reported around an inch. The official measurement at the airport was .75 of an inch but it was believed to be more than that here in town.

One of the most important features about the rain was the fact that it broke the prospective drought. We can still stand more of it so don't stop wishing now.

CHEERFUL AT NINETY THOUGH BLIND

The name of Mrs. F. H. Hardie and the Cottage Hotel in Clarendon are synonymous terms in the language of the old-timers, and more especially the cowboys who always choose to spend their sleeping hours in town at the famous Cottage Hotel on Sully street.

Mrs. F. H. Hardie, accompanied by her daughter Myrtle, was an early visitor to the Clinic-Adair hospital Monday where she consulted a well known eye specialist. The doctor advised against an operation and could give Mrs. Hardie no hope at ninety years of age.

This information will be read with extreme regret by the numerous friends of this estimable lady, knowing that she will have to continue the remainder of her years in utter darkness. Despite this fact, she continues a cheerful and hopeful attitude, and so do her many friends, that some way will be found to bring daylight into her life again.

DON TOMLINSON WILL SEE OLD DONLEY

A call from a landing port in New Jersey early Wednesday morning enabled Mrs. Tomlinson to hear again the voice of her son Don who had just arrived back in the states. The phone call is said to have been made about seven o'clock Wednesday morning.

Don Tomlinson, it will be recalled, was a German POW from March 31, 1943 until liberated by the invading American forces recently. His relatives and friends likely feel sure that Don will lose no time at arriving back in old Donley county, and his coming will bring happiness to hundreds.

INFANT DAUGHTER OF MR. AND MRS. RALPH DECKER BURIED SATURDAY

Graveside services were held last Saturday afternoon at 5 p. m. for the infant daughter of Mr. and Mrs. Ralph Decker with Rev. Hal Upchurch officiating.

Surviving besides the parents is one sister, Betty Jean Decker. Funeral arrangements were under the direction of Blackburn-Shaw-Buntin Funeral Home.

B-6 AND C-6 GAS COUPONS INVALID AFTER JUNE 30

"B-6" and "C-6" gasoline coupons, which local War Price and Rationing Boards stopped issuing in March, will not be good for consumer use after June 30, 1945, Wm. G. Williams, District Rationing Executive announced today.

Consumers who have any of these coupons that represent an unexpired ration may exchange them for valid coupons at their local boards.

RATIONING AT A GLANCE

The home canning sugar situation is serious. Sugar supplies have become increasingly tight. World developments in sugar have forced the War Food Administration to further cut the allocation of sugar for U. S. civilians, on May 1, by about 400,000 tons. Severe drought in Cuba, labor troubles in Puerto Rico, increased needs for relief feeding of liberated Europe and increased military demands have reduced sugar supplies to less than had been anticipated at the start of this year. The total civilian allocation for the year is down to about 5,000,000 tons.

With the reduced allocation it was necessary along with other cuts to reduce the amount of sugar available for home canning from 700,000 tons to 600,000 tons, even though the need for home canning is more vital this year than last.

The 600,000 tons allocated for home canning is enough to do the necessary home canning if every pound of it is used only for home canning. In order that we may stay within the season's quota the local Board will issue 5 pounds per person at the present time and if sugar is available at a later date a second issuance will be made. We must see that issuance is spread over the season so that we do not reach the later fruit crop season with no more sugar to give the people with real needs.

All applicants will be required to report the quantity that they have canned, the items, with sugar that they have received. This is to be done as soon as canning is done, or at the end of the season.

There will be a National Survey on Consumer Durable Goods from June 15-30th. Price Panel assistants will call on each store handling these commodities.

Donley County seems to be in a rut as far as the Seventh War loan drive is concerned. According to a tabulation received by J. R. Porter as of June 8, there have been very few bonds bought since last week and the total now stands at only \$169,455.00 overall total, and \$60,615 in Series E Bonds.

According to percentage all over the state, Donley County has 41.7% and rates 192nd in the state. This looks bad for our county, for in the past we have always come through with a much higher percentage before any of the previous drives were half over and now we have only two weeks left to bring our total to \$320,000 which is the overall quota for the county. All adjoining counties are above 70% over on their quotas and some of them have already raised over 90% of their quota.

"The drive ends the 30th of this month and it will be necessary for bond buyers in Donley county to really pour it on and not wait for their neighbor to come around and remind them to do so," stated Mr. Porter.

"Everyone seems to have the thought in mind that Donley County has always gone over the top pretty easy and that their purchase will not be needed," added Mr. Porter, but he pointed out that more individual buyers than ever before will have to pitch in their bit to even attempt the raising of our E Bond quota.

Remember the boys that are fighting against the Japs and think how much easier your job is here at home buying bonds, rather than facing miserable living conditions and death brought on by our present No. 1 enemy—the Japs. Buy that Bond tomorrow—you will feel much better inside after you have done so.

RED CROSS NEEDS USED CLOTHING

The local Red Cross is asking that the public donate used clothing that is still usable. This request is urgent because all of the old clothing that was on hand was shipped out for war relief recently.

The need for this clothing is constantly arising and the public is urged to respond as quickly as possible. If you have some used clothing that you wish to donate, you are asked to bring it to the Red Cross room.

**Your
Congressman
Says - - -**

EDITORS NOTE - This is the first of a series of brief but informative factual reports being made by Congressman Eugene Worley from this District who has just recently completed a tour of Europe and the Middle East. Your Donley County Leader requested these facts from Cong. Worley, and he has very obligingly agreed to give them to his people. In writing to the Leader Mr. Worley said: "I'm more than glad to comply with this request because I am convinced that the more Congress and the people of this nation can know about the rest of the world the better prepared we will be to grapple with some of the post-war worldwide problems."

Germany is a nation destroyed. Thousands of tons of bombs, millions of rounds of heavy artillery, and the steady pounding of tanks, machine guns and other small arms have literally crushed a nation of eighty-five million people.

Visualize in your own mind how Dallas, for example, would look after a thousand plane raid with bombs ranging in weight from 2000 to 6000 pounds. Nothing remains of Germany's principal cities but shambles and rubble. I was in or flew at low level over the following cities which were formerly key German points: Coblenz, Aachen, Frankfurt-on-the-Main (now General Eisenhower's headquarters), Ludwigshafen, Mannheim, Cologne, Weimer, Jena (home of the Zeiss Optical Works,) and other towns both big and small. There is no way on earth you can conceive of the absolute destruction of these places without actually seeing it.

Authoritative German sources have conceded that Allied air power was the deciding factor in knocking out their war production. The Nazis were still producing an ample number of planes, both propeller and jet, but it was impossible for the Luftwaffe to get them aloft without gasoline

and oil. The German refineries were of course the principal targets originally and all of them were completely knocked out.

It is my understanding that a great deal of publicity has been given to the notorious German Concentration Camps. I hope every man, woman, and child in this nation has had an opportunity to see pictures and secure the fullest possible information. Better still, I wish it were possible for every American to view these things in person.

I have never seen any sight so horrible and so repulsive as I saw at the concentration camp at Buchenwald. Try to imagine the entire population of a city the size of Amarillo being starved to death. This is approximately the number who were killed or starved at Buchenwald. The filth, stench, and disease were unbelievable and death was undoubtedly welcomed by many of the political prisoners rather than a continuance of the living hell in which they were confined.

There were no sanitary facilities whatever. Each inmate received a crust of black bread and a bowl of potato peeling soup once a day. This was the complete ration day in and day out. Typhus and dysentery ran riot. Every conceivable kind of body parasites and skin diseases were present. I was in one barracks which measured about 20 feet by 200 feet in which 2300 prisoners were kept.

When we were there the Army had not had time to move many of its inmates. They still lay on ragged blankets. Dozens to a room too weak to move. A Texan, Colonel W. E. Williams of Austin, had been placed in charge of the camp and was exerting every effort to clean it up as quickly as possible and to prevent the spread of fatal diseases. He showed me some human skin which had been taken from the prisoners by the wife of the Nazi Commandant of the camp. Some of the skin had been made into lamp shades and other morbid and fantastic items which gives you some idea of how absolutely devoid of feeling were the Nazis running the camp.

General Eisenhower was allowing as many of our own troops to go through as it was possible to provide transportation for. In addition he was compelling German civilians from the surrounding communities to also go through the place and see exactly how barbaric the Nazi Government really was—if they didn't already know.

A distinction should be made between the concentration camps and the Prisoner of War Camps. So far as I was able to ascertain there were no Americans at Buchenwald but most of the eighty thousand concentrated there were Russians, Jews, Poles, French and a number of Anti-Nazi Germans.

(Next week: How did the Nazis treat our own Prisoners of War?)

We are making good headway on painting the parsonage. We thank all those who have contributed to this worthy and needed job. If any of you have not contributed to the paint job we would appreciate it very much if you would send in something on this. This is a job that has been needing attention for sometime. Now that it is actually being done let everyone help on it.

During these summer months each of us will have to put forth a little greater effort or else our attendants will fall off. Then again let me urge each of you to speak to some one about their soul's salvation. I think you will agree with me, that the statement which says the only way to save the world on time, is to save one

at a time, is genuinely true. Some one on their journey to heaven should start, help somebody today. Our church is just as strong as the membership cares to make it. Your neighbor, your friend is depending upon you to help that neighbor or friend to a better life. Do not fail.

BLOOD MONEY.

Back in 1937 a lot of you fellows will recall sitting in your Donley County Leader office and talking with the old Apostle. You will recall that we were sure that the scrap iron, including autos, was being shipped to Japan by war mongers so that the yellow monkeys could fight us more and harder. In fact there was an article in this column about that time which closed by saying "some young men from this community will be shot and killed with grandpappy's Chevy." That squip created a lot of comment. Yes sir, the flower of the manhood and womanhood of our nation are the victims of those who

sold the war for money and the boys and girls are buying it back with blood. As a nation, we sold the war for MONEY, and are buying it back with blood.

AFFECTED BY WAR.

Crime is up 37% in Texas as compared with 1935. The latest statistics tell us that Texas averaged 5 murders, 2 rapes, 53 burglaries, 5 high-jackings, 33 auto thefts and 150 lesser crimes each day from June of last year to June of 1945.

Experience will never be found at a bargain sale.

Speaking of magic, a lad in Amarillo last week swallowed a nickel, and a doctor made the kid's father cough up five dollars.

Back in the day of the wash bowl and pitcher type of hotel, we had no paved roads. But if the

mattresses of those hotels had been laid end to end, we would have had plenty of hard roads all over the state. And the crushed bed bugs on the mattresses would have held the dust nuisance down to a minimum.

Yesterday is an outlawed debt; tomorrow is a risky promissory note; TODAY is real money; invest in it.

The old Apostle has shelled English peas and snapped beans for canning the past week until his thumbs are two sizes to large. They will be down by winter. And if the sugar can be had, there will be a lot of fruit canned. A lot of our folks are canning. Better hurry.

CARD OF THANKS

For all good things done for Brother and Uncle, and for us; For every good thought held, and word spoken, for every prayer; For all the beautiful flowers, we are indeed thankful. Our humble prayer is that you be treated in your hour of sorrow as you have so consolingly treated us.

RAG DOLL KNEES

YOU know that sagging, sawdust feeling. It's a wartime symptom of the high cost of living. You often get it when you go to market or pay a bill.

But not when you pay your electric bill. For the price of electric service hasn't followed other prices UP. It's still at low pre-war levels—or even a little lower. In fact, if yours is an average family, you're getting just about twice as much electricity for your money today as you did 15 years ago.

We're glad we've been able to keep your electric service cheap and friendly and dependable—in spite of wartime conditions. That makes our hard work and careful business management seem worth while. And we are glad that it helps give you some relief from "rag doll knees"!

Kill Sage Brush By Mowing Now

Charles Reed, Donley County Agent, believes that many farmers and ranchers will be interested to learn that Woodward Experiment Station has conducted sufficient experiments to prove that sage brush can be killed by mowing.

90% of sagebrush has been repeatedly killed by mowing one time on June 15. The second best kill was obtained on July 1st.

Best jobs of mowing are obtained with tractor and power mowers. Mowers equipped with 5 foot cutting bars with heavy sickle sections and stud guards work good in small brush and heavy growth of sagebrush.

If pasture does not contain any brush and sagebrush is not larger than man's wrist, a 7 foot power mower equipped with heavy sections can do a good job of mowing.

The sickle should be run close to ground as possible to cut sage brush under the bottom limbs. Many times better results can be obtained by going back over in opposite direction of first mowing to get a greater per cent of bottom limbs that sickle slipped over the first time.

The 1945 AAA program will pay 50 cents per acre for mowing pastures for weeds and shrubs. Pastures must be mowed as many times as required to control weeds.

Practice 21 d. eliminating nox-

ious underbrush, bushes, and shrubs (which includes sage brush) pays:

1. Light infestation 5-20%, \$1.50 per acre.
2. Medium infestation 21 to 40%, \$3.00 per acre.
3. Heavy infestation above 40%, \$5.00 per acre.

Now is the proper time to mow sagebrush, and to kill the sagebrush, improve your pasture, and earn the AAA payment set up for this practice.

For further information, contact County Agent or AAA office of Clarendon.

HERE'S HOW YOU CAN CHECK ON YOUR WAGE CREDITS FOR OASI

Employees desiring to check up on their social security credits can do so by securing a self-addressed post card at any office of the Social Security Board, completing the form on the opposite side and mailing it. A statement will be received within a short period of time, said James L. Farmer, manager of the Amarillo, Texas office.

In case the wage statement fails to conform to the worker's own records, he may call this discrepancy to the attention of the Board and immediate efforts will be made to adjust the matter.

The word "Texas" is derived from the Indian greeting "Teh-las", which meant "Hello, Friend". Hence the reference to Texas as meaning "friendly".

RED CROSS
VOLUNTEER SERVICE
HOME SERVICE
 By Mrs. C. A. Burton

The American Red Cross began publishing the Prisoner of War Bulletin in June, 1943, and an attempt has been made to let the families of the 100,000 men know as much as possible of the conditions of their imprisonment. The June issue is the last issue of this Bulletin, but beginning in August there will be a Bulletin devoted entirely to the Far East, where some 15,000 American prisoners of war and civilian internees are still held by Japan.

It is heart warming to read the words of appreciation of the Red Cross by these liberated men—as they tell what the Red Cross food packages meant to them through the weary months of imprisonment.

A total of \$149,000,000 of relief supplies have been shipped to Europe for American and other allied prisoners of war. This included food, clothing, medicines and other supplies. Most of this was paid for by the U. S. government, but the Red Cross supplied the captive parcels, medicines and many other necessary things.

Every effort is being made to make up to the liberated prisoners for all they have suffered. The wounded are being sent to the hospital nearest their homes. The system which has been set up to care for liberated personnel has been so efficient that the men are being returned home very rapidly. Workers are working day and night to get messages home for these men.

Tobacco parcels for prisoners of war in Germany are being returned to the tobacco companies, which sent them, and no more orders are being filled.

Military railroad and motor convoy facilities have given priority to liberated men second only to that given sick and wounded. Just before each group leaves Europe, the number is forwarded to the Adjutant General's office. For those who come by boat, a list by name is forwarded when the boat is about ten days from port. For those who come by air the list by name is sent three days before they arrive. On arrival they are sent to distribution centers, and then are furloughed home.

Everyone is interested in the "points" which mean release.

Credit is given one point for each month's service — 12 points per year.

Overseas credit is one point for each month overseas—12 points per year.

Combat credit is 5 points for each special award or decoration.

Parathood credit is 12 points for each child under 18 years up to a limit of three children. Already discharged for points are being given.

Not only among prisoners of war and overseas soldiers is appreciation expressed for Red Cross, but our soldiers in the home land never fail to give credit to Red Cross. Every time I send for an emergency furlough—and I send many such telegrams—and every time I wire for an extension—and I do this so very often—the boys say they could not get along without the Red Cross.

MOOS OF THE MOMENT
 BY UNCLE BOB
 of the Kraft Dairy Farm Service

Maybe it looks like that guy in the picture at the top of this column today is good material for a padded cell, but he really isn't. He's pretty smart.

Instead of making hay while the sun shines, he's making grass silage in the rain. You don't have to worry about the weather if you make silage out of the various crops which the scientific folks call "grasses."

Most of the things you grow for hay or pasture can be made into silage. These include alfalfa, lespedeza, the clovers, Johnson grass, bluegrass, soybeans, Sudan, Orchard grass, timothy, barley, oats and wheat.

Aside from the weather angle, making grass silage has a lot of other advantages. You need not worry about leaf shatter, sunbleach and similar things. You can store up some excellent food for winter use by this process.

Storage space is cut down, since a cubic foot of grass silage will weigh eight or nine times as much as a cubic foot of loose hay.

For helpful hints on making grass silage, I suggest you get either Circular 234, Extension Service, University of Missouri, Columbia, Mo. or Circular 299, Extension Service, University of Wisconsin, Madison, Wis. The Missouri bulletin will tell you how to check the moisture content—an important point in making grass silage.

If your cows are not getting all the water they need, you are not getting as fat a milk check each month as you might have. How to provide water on farms where water is a problem, is the subject of an interesting article in the May-June Kraftman. If you do not receive the Kraftman regularly, write Uncle Bob, 500 Peshigo Court, Chicago 90, Ill., and I'll mail a copy.

A fellow who works hard all day long, day after day, sort of enjoys a bit of night life now and then. I wouldn't recommend setting up any night clubs for cows, but being penned up in a barnyard at night with a good pasture not far away, isn't the kind of treatment a cow likes.

During hot weather, cows will do a better job of grazing in the nighttime, in many cases. And of course since pasture is the best and least expensive way to get milk produced, it seems a better idea than ever to let your cows out to pasture after the nightly milking.

It takes forage of one kind or another to produce the maximum amount of milk per cow and meet the 120 billion pound milk goal which is needed this year. If you've been holding your cows in the barn lot, turn them into the pasture at night and watch your milk volume gain.

*NOTE: There usually is a 5c charge for pamphlets mailed to non-residents of a state, but possibly your own state has a free pamphlet on the same subject. Ask your county agent.

WORTH WHILE COMMENTS

DID YOU KNOW?

1. Now is the time to kill 90% of sagebrush by mowing one time with good mower, June 15 to July 1st?
2. Vaccinating your pullets at frying size prevents sore head or fowl pox?
3. That heifer calves vaccinated 6-8 months of age seldom have Bangs disease?
4. Green flies around your evergreens are eating plant lice and honey dew, and that 325 mesh dusting sulphur and rotenone dust applied once each week will disappear?
5. That Berry vines should be pruned after bearing fruit, cut off old growth at ground line leaving 4 or 5 of this years runners to produce berries next year?
6. That strawberry plants should be mulched, fertilized, and watered now to produce good runners? About September transplant the first and second plants

from the mother plant in a new bed to produce strawberries next year.

7. That Bindweeds (Possession Vines) over 1/4 acre in size can be killed in 2-3 years by plowing only. That although you may lose 1 crop on land total number of cultivations and total increased yield over a five year period will offset the expense?

8. Scattering patches of bindweed of less than 1/4 acre or located on fence rows or right of ways can be killed by applying 4 lbs. sodium chlorate to each square rod of land. Best kills are obtained by applying sodium chlorate dry on October 1st. Next year on October 1, apply 1 1/2 lbs. dry sodium chlorate to square rod to eradicate any remaining bindweeds. Sodium chlorate will cost about 12c per pound and is very inflammable, poisonous to livestock and kills the land for about 5 years. The 1945 AAA program pays 10c for chemical treatment of bindweeds.

9. Applications for fish to stock your farm or ranch tanks may be turned in at the County Agent's office, Clarendon, Texas.

May Buy Farms Through F.S.A.

A limited number of capable farm tenants in Donley County will be given an opportunity to buy farms of their own before next spring through the Farm Security Administration, U. S. Department of Agriculture, Clifford L. Davis, FSA Supervisor, announced this week.

The opportunity of farm ownership, it was said, is provided through the tenant purchase program of Farm Security, authorized by the Bankhead-Jones Farm Tenant Act.

Under this plan, loans are made to cover cost of the land and improvements and are repayable over a 40-year period at 3 percent interest.

Ten farm families in Donley County have already obtained tenant purchase loans during the past several years and are now living on their own farms. Others who are interested should file applications now with the FSA Supervisor with offices in the Gold-

ston Building at Clarendon. A tenant purchase committee, composed of W. A. Poovey, W. E. Hodges, and W. W. Raney will review all applications in this county.

In order to get the new purchase program functioning immediately, those farmers expecting to make application for tenant purchase loans to buy farms for cropping next season are urged by the supervisor to enter applications now. Due to limited funds for this program, only a small number of those applying in the past years have been accepted. However, those who have been unsuccessful applicants in the past may apply again.
