## Donley County Dairy Tour And Show Set For April 27th and 28th

A full two-day program emphasizing dairying in Donley County will be held here Friday and Saturday, April 27th and 28th. The program will open Friday with a full day educational tour of six of the dairies now producing grade "A" milk and will close with the largest dairy show ever held in Donley County on Saturday, April 28th.

Every person in Donley County who is interested in dairying is invited to attend the tour, and any person in Donley County is entitled to enter cattle in the dairy show. The tour will open at 10:30 a. m. on the 27th at Ross Darby's and will continue through the herds and plants of F. G. Crofford, Dick Cannon, and J. D. Wood's until 1 p. m. when a free lunch will be served at the Martin School for all parties participating in the tour. The lunch will be provided by the Clarendon Lions Club, Borden's Creameries, and the Clarendon Chamber of Commerce. The tour will continue to the herds of J. W. Sullivan and Herman Patterson in the afternoon. A special dairy products demonstration will be staged at Patterson's dairy. The tour will cover all features of equipment, cost, care, and handling, grade "A" barns, their cost, type of and the production and handling of milk. Material will be available at each of the dairies as to production, cost of production, feeding, profits, etc.

A dairy products demonstration will be staged at the Herman Patterson Dairy by extension service specialists and the use of the milking and cooling equipment will also be demonstrated. Men who operate the dairies and dairy specialists will present practical information of interest at each dairy on the route of the tour.

The dairy cattle show will start promptly at 10:30 a. m. on Saturday, April 28th. There will be classes in both Holstein and Jersey cows (purebred animals only may be exhibited, but animals are not required to be registered) for calves under one year of age, one year to two years, two years to three years, three years to four years, and cows over four years of age, a total of five classes for females. There will be classes of six months of age and under, six months to one year of age, one year to two years of age, and over two years of age for Holstein and Jersey males. Ribbons will be awarded the first five places in each division, and cash awards will be paid on the first three awards in each division. Ribbons will be presented the grand champion Holstein females and males, and special ribbons will be awarded the men exhibiting the best four cows in both the Holstein and Jersey divisions.

A special event in which every one will be eligible to participate will be a judging contest on the morning of the 28th. Cash awards will be presented to the three men, women, or children making the highest grade in judging two to four groups of dairy cattle. More detailed information concerning the dairy tour and show will be given in a later issue of this paper. The entire event is being sponsored by the Agricultural Committee of the Clarendon Chamber of Commerce in cooperation with the Clarendon Lions Club and Borden's Creameries.

## Important School Meeting To Be Held April 19th

On Thursday night, April 19th at 8:30 p. m., there will be a meeting at the Junior College Auditorium that is of vital importance to every man, woman and child in Texas. The purpose of the meeting is to hear explained the Federal bill now before Congress to aid schools throughout the nation. If this bill passes, every classroom will have more materials with which to work—all teachers will receive some aid on salaries—districts will receive help for materials needed for the school. The Federal Government aids industry by tariff, ship owners by subsidies, farmers by parity prices, soldiers by pensions, etc. Why should our schools not receive aid as well as others?

## OLD CLOTHING DRIVE GETS UNDER WAY

The old clothing drive sponsored by the local Lions club got underway this week, but the response so far is far below expectations. The clothing, shoes and bedding are desperately needed by destitute and homeless people in the countries which are our Allies.

Anyone wishing to donate any kind of serviceable clothes are asked to leave them at the Red Cross room at the City Hall. Most everyone has clothes that are out of style, too small or too big. Bring them down. They will mean a lot to those people over there.

## Nationwide Safety Program Due April 15 to 21st

A safety program sponsored by the International Police association will be observed here between April 15 and April 21st.

This program is being featured at this time to cull out as many cars as possible with faulty brakes, for that is one of the foremost items that cause accidents.

Patrolmen point out that this program will not include a brake machinery set up or that no stickers will be used like brake lanes in previous years.

## RATIONING AT A GLANCE

Phebe Ann Buntin

The application blanks for canning sugar have now been received and will be distributed to the grocery stores Wednesday, April 11th. After these applications are received by the Board, you may expect to receive your canning sugar within 30 days.

In a weekly letter published by OPA Administrator, Chester Bowles, he gives definite information on the meat situation. During this month, and through June, civilians will average two pounds and one ounce each week. This compares fairly well with the two pounds and five ounces for each of us weekly during the five pre-war years. It is down from last year's high record, however. Because of increased production and high average incomes for so many people who could afford little meat before the war, we were able to eat nearly three pounds each.

The reasons for this year's reduction in civilian supplies are, first of all the decrease in hog production of 30 per cent, and secondly, the considerable increase in demands for the military. However beef slaughter is 11 per cent above what it was a year ago.

LIBRARY NOTES

By Mrs. C. A. Burton

Our hearty thanks are extended to the Mothers Club for \$9.00 which will buy quite a few books for our younger readers. Since school will soon be closing, they will be ready to enjoy them.

The Bible continues to be a best seller. Before the war 30,000,000 copies were sold annually. Since 1940, the American Bible Society has furnished 7,151,260 copies of Bibles, Testaments and single books of the Bible to Chaplains and the Merchant Marine alone. The complete Bible is now printed in 184 different languages and parts of it in 1,062 languages and dialects.

From Paris comes this comment on the Armed Services Editions of books furnished by the Council on Books in War Time. "There is great demand for them but in only two cases have second editions been printed. These were for 'The Robe' and 'A Tree Grows in Brooklyn.' Already about a

million books have been distributed by the Council. These are made up in kits containing 500 books, 130 of which are fiction, the remainder vocational and they are shipped direct to organizations in the field.

T. L. Yuan, Chairman of the Executive Board of the Library Association of China is now in the U. S. He expresses keen appreciation of the U. S. help in the rehabilitation of their libraries.

Archibald McLeish has announced that part of his new duties as assistant Secretary of State will be the immediate resumption of cultural relations with foreign countries, interrupted during the war and this will be largely through libraries.

A doctor in a hospital at the fighting front said, "Say, do you know who's responsible for those army books? Next to penicillin, they're the greatest improvement in army technique since the Battle of the Marne."

According to a poll taken by The Woman's Home Companion in February, women prefer useful war memorials. Ninety-two per-

cent believed their communities should have a memorial, but they objected to the use of money for statues or battle relics. Instead they urged hospitals, parks, club houses and libraries.

In 1944 a total of 6,900 new books were published compared with the usual annual production of 10,000 individual new books. But the publisher's list for spring do not show any shortage—and never were the lists more attractive. They must all be issued under war-time restrictions—they will look "lean"—but they will be complete.

ASHTOLA  
Mrs. Van S. Knox

Henry Moore conducted funeral services at his farm last Wednesday morning for Mr. and Mrs. Apricot and all the little Apricots. Henry is overcome with grief and is gripping just a little. He said he hadn't eaten any sugar on his cereal for three weeks because he was saving it for the Apricot family. Perhaps old man weather had a hand in this tragedy. Any way some of the neighbors offer their "regrets" since they too had had an eye on a bushel or two of those little apricots.

There were seventy-five people out for Sunday school Sunday morning. Perhaps with another blizzard to warm up some of us this week we could make it a hundred by next Sunday. Lets try with or without the blizzard.

you will all enjoy. It sheds a bit of light upon the joys and sorrows in the days to come when our brave boys and girls that are left come back home again. This article was printed on page one of the Chicago Sun recently.

**ATLANTIC CITY, March 22—**The girl he left behind him didn't want Private William Myers, 21, when they brought him back from the war.

For Bill Myers was blind—hopelessly blind, doctors said.

Facing a life of darkness and nursing the ache that his girl had left in his heart, Bill doggedly struggled to learn Braille and to use a white cane.

Now it happened that one of the hospital workers was a Miss Bernadette Poppelman, and she liked Bill. So, one day, Bill brought himself to ask her if she were being nice to him just because she pitied him. Bernadette answered quietly:

"No Bill. I'm sorry you lost your sight, of course—but I don't pity you. That isn't it."

And from that moment, Bill was in love, the old ache forgotten.

Then, one morning, Bill awoke on his hospital cot, and saw an angel.

He could see!  
"Who are you?" he asked the angel.

"Why, I'm Bernie, Bill."  
"You're blonde—and you're beautiful!"

Then Bernadette realized, too, that a miracle had happened, and if there were tears, they were of joy forever after.

The doctors, revealing the story today, said there had been a mistaken diagnosis and that Bill's blindness was only "hysterical blindness" caused by shock after he was wounded.

**VOLUNTEER SERVICE**

**HOME SERVICE**

By Mrs. C. A. Burton

Those of our people having boys in German Prisoner-of-War camps have been greatly disturbed over the constant removal of these prisoners to camps in the heart of Germany. The transportation difficulties in regard to Red Cross supplies have been very serious. Every effort has been made to see that these supplies are delivered. In February there were \$40,000,000 worth of supplies in Switzerland—but hundreds of thousands of our men have been and are being in serious need of this food, although there are 7,000,000 food packages in store as reported by the POW Bulletin.

From POW camps all over Europe and the Far East are quotations from letters of the men, and constant reference to Red Cross aid. Fifteen seriously wounded were flown from Marseille to the U. S. the last of January, and 463 sent by the Gripsholm. These reported that the main camps for American prisoners were greatly over crowded. At Stalag III B., for example, there were 6,500 prisoners, and other camps reported the same conditions. Large stores of Red Cross supplies had to be left behind when removals were made—supplies greatly needed.

From this POW Bulletin again I quote, "American Red Cross War Relief officials on Luzon delivered 4,400 messages from home to 2,708 Americans at Santo Tomas, 1,800 at Bilibid, and undisclosed number to other places." This cable tells its own story;

"One week ago the first Americans released by our forces were given messages from home by the Red Cross. Never before have I seen such scenes of joy. Tears of happiness ran down the cheeks of the freed prisoners as they received first words from home in a year or two years."

From the German prison camps the allowance of outgoing mail is three letters and four cards a month. Letters from home average about 100 days reaching camps. One took 367 days and one 14 days. Books mean much in these POW camps. Books wear out rapidly and at one camp more than 600 books have been salvaged and restored to circulation by the men who have set up a book-binding shop. They use wax paper from cigarette cartons and binding tape from old Red Cross boxes. Westerns and detective stories and historical novels come in most frequently.

The average American family gets about twice as much electricity for its money today as it did 15 years ago

Yes, the first is a trick, but the second is a fact—a fortunate fact for you.

By using more and more electricity over the years, you've helped us reduce the price to a point where the average family now gets about twice as much electricity as it did 15 years ago for the same money.

Keeping the price of electricity pinned down to the floor in wartime is a much tougher job than keeping a pin-up girl floating in mid-air!

It takes much more than magic. It takes careful planning, hard work and good business management.

## SPECIAL ELECTION NOTICE

Because of the fact that a tie vote resulted in the Mayors race April 3rd, when the Regular City Election was held, it has become necessary for the City Commission to order a Special Election in order that the two candidates who are tied for the place may have what is commonly referred to as a run-off campaign.

This Special Election has been ordered by the City Commission for, SATURDAY APRIL 14th, 1945.

Due to the limitation of time it will be impossible for me to contact each voter personally and solicit your vote and influence. Therefore I am using this method of presenting my candidacy to you for the office of Mayor in this special election.

I have no extravagant campaign promises with which to try and influence your vote in this election.

I do however, earnestly ask for your support in my effort to win this race, and promise, if elected to diligently and faithfully discharge the duties of the office, and to work in a spirit of co-operation with the Commissioners and City Employees to the end that we may enjoy a Progressive and Constructive administration for the next two years.

I will Sincerely Appreciate your vote.

## VARIOUS SPORTS FOR BOYS AND GIRLS

By Donald Beard

In the high schools of today there are many sports whose participants are both boys and girls. The sports in the schools of today help build a better generation for the future. Boys, as well as girls, are taught the meaning of sportsmanship and honesty. Bigger and sounder bodies are being developed.

One of the most popular sports is football. Its players are mostly boys, although some schools have organized football teams for girls. Football is entirely too rough and dangerous to be played by the "weaker sex." Nothing, however, is so exciting as a rough game of football. Many men have had their names engraved in football history by their outstanding achievements on the gridiron. Of these, two of the most famous are Red Grange and Knute Rockne. Rockne was also known as a great football coach.

Basketball, also, is very popular with the sports-minded youth of today. Both sexes participate in this game. It is one of the fastest games played, but the girls' basketball game is slower. Almost every school has boys and girls

interested in this game. Basketball is observed by more people in America and is played by more students than any other game.

One of the roughest sports is high school boxing. Only boys participate in this sport. High school boxing is popular throughout the nation. It is an interesting sport because it teaches one the manual art of self defense. Also, many bodies are made more sound because of this sport. The number of boxing fans has increased through the years because of the popular participants. Among these are Jack Dempsey and Joe Louis.

The girls also have their own particular sports to take part in. One of the most popular ones is volleyball. Few boys play this game, although it is very interesting and safer than other sports. Its popularity is mostly among high school girls, and it has less spectators than other sports.

Baseball, too, has its place in the sports for youths. It is not only popular in high school, but it is the nation's favorite sport. Baseball has been made a famous and honest game by such men as "the iron-horse," and Babe Ruth, "the king of swat."

One might go on writing for hours on popular sports of today's

youth, but no one can express the happiness and faithfulness with which the American youth enters his sports.

## CHAPEL

An interesting chapel program was presented Friday the fifth period.

First, the entire student body sang several songs, which were followed by the announcement concerning the college play that night. Mr. Drennan presented the cast, and then the players gave several skits from the play. Every one looked forward to the play, after they saw the skits from it.

Next, a very interesting book review of the life in Mexico was given by Gertrude Calcote. Every one enjoyed this immensely.

After making several announcements, Mr. Drennan dismissed the students.

**Phillips has played a major part in "achieving the almost impossible"**

**THE DEADLY STING of the new Douglas A-26 Invader, already felt in Germany, will soon hit Japan. On all of the world's flying fronts, United Nations planes fight with Phillips high-octane fuels.**

**AVIATION GASOLINE**, one of the indispensable munitions of war, was an item with very small production at the beginning of World War II.

"The United States has achieved the almost impossible by stepping up its daily production (of 100-octane fuel) from 43,000 barrels in December 1941 to more than 500,000 barrels. In the meantime, a remarkable improvement has been accomplished in the quality of the 100-octane product."

Of those who have contributed to this triumph of production, Phillips is especially proud of its record in having maintained its leading position with the handful of petroleum organizations which are the nation's largest producers of high-octane aviation fuel.

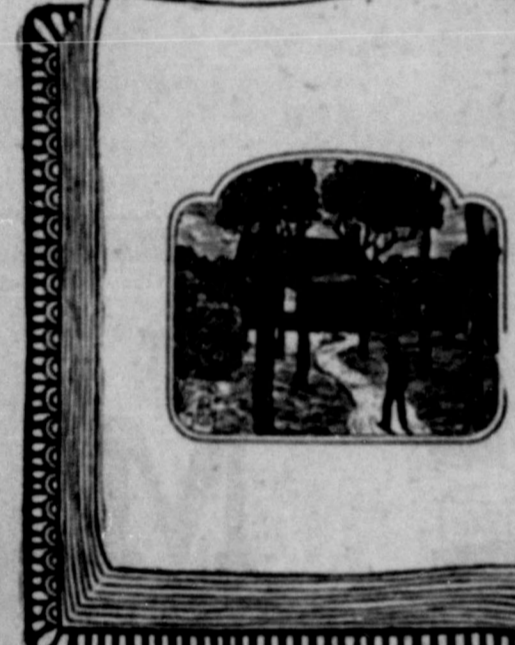

Everything that Phillips has learned, in research and experience, both before and during the war, will be lavishly poured into our wonderfully improved postwar motor fuels for car owners. With complete confidence, we say to you: Expect greater postwar gasolines from Phillips!

In the meantime, every time you see the Orange and Black Phillips 66 Shield, let it remind you that Phillips refineries... in addition to producing gasolines, lubricants, and fuel oils... are also gigantic chemical plants pouring out weapons for victory.

### Guy T. Sparks Dies In Panama

Guy T. Sparks, brother of William Leo Sparks and Mrs. Zorodo Conner of Amarillo, died April 3 in Margareta Hospital at Cristoval, Canal Zone, according to information received here this week. Cause of his death was heart attack.

Mr. Sparks recently had been injured in an airplane wreck. He was a member of the U.S. Secret Service.

Mr. Sparks, born Dec. 4, 1882, in Magazine, Ark. was a son of Mr. and Mrs. William Monroe Sparks, who were pioneers of Donley County. He spent his boyhood in Clarendon and attended high school here. He was one of two boys graduating from high school here in 1900. The other was W. W. Taylor who still lives in Clarendon and distinctly remembers the occasion very well. Mr. Taylor states that he as an honor student had to make a speech and he was nearly scared to death. He clearly remembers that Jim Patman was in the crowd at the time, for he was a head taller than anyone near him.

Mr. Sparks had spent the last 20 years in the Canal Zone and had traveled extensively throughout the world.

Survivors, besides the brother and sister who were mentioned above, include a son, Travis Sparks, in foreign service; a daughter, Mrs. Thelma Davis, Beverly Hills, Cal.; two sisters, Mrs. Jack Wilkinson, Pampa, and Mrs. Roberta Caldwell, Perryton; three nephews, Gordon S. Conner, Dallas; Raymond Sparks, Amarillo, and Raymond Caldwell, in the U. S. Navy, and an uncle, Chief Justice Fred M. Odom, New Orleans.

### LOCALS

Bob Head has purchased the Phillips 66 building and opened up a repair shop in the rear. Chester Talley is in charge of the shop.

Miss Marjorie Harlan is having a new fence erected around her property and otherwise making extensive improvements on her property at 201-205 E. 4th St.

Mr. and Mrs. J. T. Lamberon were here from Pampa Sunday, visiting relatives and friends.

Mr. and Mrs. C. Huffman returned home Saturday from a visit at Austin and with their son Pvt. Colie Huffman at Bryan and Mrs. Huffman's brother Bill Stone also at Bryan. Pvt. Huffman accompanied them home for a few days leave.

Mr. and Mrs. Geo. Holman who have spent the past winter with her sister and husband, Mr. and Mrs. Henry Williams, left Sunday for Chicago for an extended visit.

Woody and Bill Johnson of Amarillo came down Thursday and took their parents, Mr. and Mrs. L. L. Johnson to Dallas, where Mr. Johnson will receive medical treatment for two weeks.

Mrs. Walter Wilson and Mrs. Olen Miller were taken to the Baylor Hospital at Dallas Sunday by the Blackburn-Shaw-Buntin ambulance.

#### CONTROLLING CUTWORMS

One cutworm can bite off many young plants in one night, especially beans, peas, tomatoes and cabbage. But, says Paul Gregg, entomologist for the A&M College Extension Service, a bit of cardboard rolled around the plants in their infancy will prevent the worm from doing any damage.

The cutworm, a gray and brown caterpillar-like crawler, does great damage to garden crops if it is not controlled because it works at night. Since it passes the winter beneath the soil and becomes active in the spring, Gregg says that land used for gardens which was in grass or weeds the previous year is likely to harbor a larger number than soil which had been cultivated.

The pest announces its presence in the spring or early summer by cutting off near the ground the stems of the tender young plants it prefers to feed on. Since the cutworm is a common enemy to gardens everywhere Gregg says that gardeners should prepare at the time plants break through the soil or are set out to guard against its attack. One of the simplest means is to erect a cardboard barrier between the plant and the pest. Any lightweight material about the size of a penny postcard will do. Roll this into a collar around the plant, making the opening of the collar about four times the size of the main stem of the plant to allow for entrance of plenty of air and light.

Care should be taken to sink the collar about an inch below ground and leave two inches above the soil. It also helps to protect young plants against sun and wind. But the danger is not entirely past when the stem becomes tough since the worm sometimes will climb small plants and cut off the leaves. On that account it is well to leave the collar in place until the plants reach sufficient maturity to protect themselves.

Gregg suggests that the best
