# 9 Tokens In One Transaction

During the three-week period from February 27, when the new ration token plan begins, and March 20, when the last of the green stamps good for buying processed foods run out, one-point green stamps, along with tokens, Mary of Pampa, Dr. and Mrs. S. may be given "change" when processed foods are bought, the Office of Price Administration pro-

vided today. While one-point brown stamps (for meats-fats) have been used for change making in the past, use of one-point green stamps had not, before now, been authorized by the rationing regulations. It is desirable to permit their use during the three-week transition period since it is possible that tokens may not be well distributed in some sections, and for a time the Memorial Fund one-point green stamps, along with the one-point brown stamps, may be needed in a few localities for change making.

During the three-week transition period from the old rationing program to the simplified token the Donley County Memorial for meats-fats.

Courtesy ISN'T RATIONED

Courtesy, like many other things, often becomes needlessly a victim of war. There is no excuse for a lack of courtesy! The raw materials are simple and plentiful . . . the manpower required is negligible . . . courtesy is just a by-product of service.

Yes, we know that "there's a war going on" . . . we know what it is to be short handed . . . we miss the 224 experienced employees who are now in the armed services; but it's a tradition with the employees of your electric service company to give friendly, courteous service.

Lack of material often forces the use of substitutes. Frequently it is necessary to rework old material and supplies. Sometimes, due to shortages or government regulations, service must be delayed. But the employee team, backed by a business policy that encourages individual thinking and recognizes individual effort, is proud of the fact that courtesy, like electricity, is not rationed.

## Signs of Spring

THE days are still short; half the nation shivers under a blankct of snow—but there are signs of spring everywhere if you know where to lock for them.

They are little things—such as new seed catalogs, ads clipped from magazines, reminders, scribbled on backs of envelopes, of things to be done.

Thousands of men, all over the country, are making such notes, looking ahead—farmers, manufacturers, storekeepers, bankers. They represent what is called "management," and they know that to make the most of any season requires pretty careful figuring.

There's a skill in this management. It's a skill that men who run things have in common—that men who run things successfully have got to have. Management's problems are a good deal alike, no matter what the business—getting help, meeting payrolls and tax payments, making ends meet and having a little left over for new projects, planning for the future without letting the planning interfere with the job in hand.

And when you talk with these men, you find they have the same objectives, too. Right now they want to get the war won at the lowest possible cost in lives and suffering. After that's done, the 'll be back on their never-ending job of turning out the material things needed to make a better peacetime world. General Electric Co., Schenectady, N. Y.

We had a real good day Sunday. Iwo united with the church by Baptism and vows. One baby was baptised. Because of certain local We wish to do so next week. Beeach night from 7:45 to 8:30-Monday night, Tuesday night, Wednesday night and Thursday night. The purpose of these services of course is that as a people we may get closer to God and be prepared to do His work better. I feel the need of a deeper work of Grace in my own soul. I am sure that you do. So let each one come and help to make the services what God would have them be. Then as you know, the past three years we have made special offerings for overseas relief and for war work and for our chaplains. Last year this congregation paid seventy-five dollars to this cause. This year we want to pay one hundred dollars. Then our conference collections, the bishop's fund and the Superintendent's fund and the district fund all amount to nine hundred and fifty dollars. So we are asking that 105 of us pay an average of ten dollars on March 12th. Thus paying one hundred dollars to the special offering and paying all other benevolent askings in full. That will put ing service will be at 7:30. The us in good shape financially. Paying the conference collections now will help to keep the conference board out of debt, and save interest. So let each one bring as large opportunity to render a needed an offering as possible that we may take care of all these worthy

interests. Then on the 12th of

## GOOD CHICKS

Feed is too scarce this year to waste on chicks that die or fail to grow into big profitable layers. Chek-R-Chix are from selected, high-producing flocks, carefully bloodtested, and fed a special breeding ration to put vitality and livability into the chick even before it is hatched. Ask for Chek-R-Chix

#### **GOOD SANITATION**

Only one Chek-R-Tab in a quart of drinking water acts as disinfectant, bowel astringent and fungicide. No other poultry water tablet does all three. Before chicks come, disinfect the brooder house with Chek-R-Fect. Only one ounce makes a gallon of saponified solution, high in germ-killing power.

Rely on Chek-R-Tabs and Chek-R-Fect

#### GOOD FEED

Good chicks deserve good feed. You'll need only 2 pounds of the famous STARTENA per chick to get off to a good start. Many successful poultrymen raise as many as 95% on STARTENA. Some do better. We'll do our best to take care of your needs if you come in and see us early.

seven states of the nation in observing National 4-H Club Mobilization Week March 4-12. There are more than one hundred thousand rural boys and girls in Texas who are 4-H'ers, but there's room for plenty more.

Citizens of the state have plenty of reason to be proud of 4-H Club members. For instance, Onah Jacks, state girls' club agent of the Texas A&M College Extension Service, says 4-H Club girls last year did 17 per cent of the food preservation work reported for the nation. And they raised about six per cent of the poultry.

4-H boys and girls of Floyd County produced enough food to feed 315 men in the armed service for a year. Jefferson County 4-H girls canned more than ten thousand containers of food for home use last year. And they planted about 125,000 row feet in vegetables, Miss Jacks, says.
