

## HOW THE LIVE-STOCK BUSINESS IS STACKING UP

WITH AN INCREASE OF GRASS LANDS OVER 1920, WILL SHOW AN INCREASE IN FAT CATTLE IN THE MARKETS THIS FALL

At present there is a heavy movement of Texas and Southwest cattle to Kansas and Oklahoma pastures. It is estimated that 7,000 to 7,500 cars, or about 220,000 cattle. Most of these cattle carry accumulated loans from last year, plus an additional loan of freight, pasture charges and marketing expense. Six weeks to two months ago it was believed that neither Kansas nor Oklahoma grass lands would receive within 50 per cent of normal supplies. Now the estimate is 15 per cent larger than last year.

In the mountain sections of Colorado, Wyoming, Utah and Idaho, the usual number of cattle will be turned on the forest reserve. Northern California, Oregon and Washington are beginning to move range cattle to market and this movement will continue until July. Southwest Texas is marketing some grass fat cattle, but because of a dry spring this movement will be lighter from below the quarantine line than last year. In the breeding sections of Texas the calf crop of the last two years has been large and this condition promises large offerings of calves and yearlings for the stock and feeder buyer this fall.

It is quite evident, therefore, that by early November, the general cattle industry will be in a more liquid position than at any time for the last four years.

How sheepmen will liquidate their obligations and retain the means for continuing production will have to be worked out. At present their assets are frozen. There is little market for the 2-season wool clip. The demand for stock and feeding grades is small. Prospects for grass-fat lamb prices this fall are not alluring. Undoubtedly sheepmen should have financial assistance until they can market their wool. However, the apparent promise of lower freight rates and prospects for another big corn and rough feed crop this year add a lot to the whole livestock outlook.

Hog growers, also taking lower prices, have come out relatively well, as the price of fat grades did not slump until after feeding costs had been reduced.

At the high point 18 months ago, fat steers sold up to \$25, hogs \$23.40 and lambs \$21.75, a hundred pounds, the highest prices ever recorded. Now steers are selling up to \$8.50 hogs at \$3.25 and lambs at \$9.75, or the lowest in the last five years. It took 3-1/2 years to reach the peak of prices, and less than half that time to wipe out the gain. In the slump all interests that enter into the production of livestock and meats got some of the financial jolt, but the main blow landed on the grower and feeder.

Actual liquidation began more than a year ago, but its full course was interrupted by renewed loans, buying in again, or by the ability to hold in anticipation of a rebound in prices. Take off 50 per cent in prices, add 35 per cent increase in freight rates and the expense of holding and one begins to arrive at approximately what the falling market has meant to growers.

Inter-mountain, Texas and Southwest sheepmen by the middle of June will have two years wool clip on hand, with prospects for thin lambs selling this fall under \$6 a hundred pounds. There are 8 million hies in the United States when there should be only 650,000 in reserve, and a dead animal is not worth skinning. Loan companies and banks, to protect farmer loans on cattle, have been forced to advance sufficient money to move fully normal supplies of Southwest cattle into Oklahoma and Kansas pastures for summer feeding. When the fall movement of range lambs begins, banks and loan companies will have to repeat assistance similar to that extended to cattle men. Colorado sheep feeders handled close to 1-1/2 million lambs thru feed lots the last season and lost \$4 to \$6 a head.

J. D. Leake of Novosota has been a guest in the home of Mrs. and Mrs. W. E. Leake the last few days.

## WHEAT EASIER TO MARKET THAN FRUIT CROPS

SAPIRO TELLS WHEAT MEN THAT THEIR GRAIN CROPS ARE EASIER TO HANDLE THAN THE FRUITS OF CALIFORNIA

"Californians envy Texas in the matter of agriculture although boasting the finest climate in the world," declared Aaron Sapiro, counsel for the National Wheat Growers Association and co-operative marketing expert, in addressing members of the Texas Wheat Growers' Association at the City Hall Saturday afternoon at 2 o'clock. This envy is created because Texas produces one of the best crops for co-operative marketing and the Californians are behind co-operative marketing heart and soul. On sign-up days the business population of cities far larger than Amarillo have a holiday and go out to encourage the farmers to sign up, as they realize that the success of their state agriculturally depends on them hanging together instead of fighting each other."

"The California growers who are organized realize that Texas and other big wheat growing states have a superior product for marketing in wheat. Wheat is non-perishable, is of universal current value and has a far better use as collateral than any California products. The main reason the California people envy Texas is because they realize how well their system would work in Texas and what an opportunity the Texans have."

**Market Glutted**  
"Wheat does not have to be seasonal marketing crop, as it is at present. Now statistics show that practically three-fourths of the wheat grown is placed on the market in the first 70 days of harvest. In other words, the market for wheat is glutted and this causes the price to decline as it would in any other market by such dumping. The wheat growers plan to sell wheat as it is needed and not to hold it off the market until the price goes up and then dump it. There is a continual demand for wheat the year round and the logical plan is to sell it that way, getting the best price possible for it. This is how the California Fruit Growers started out. But there they have more of a seasonal crop than wheat. With the difficulties not to be found in marketing wheat, they made it a success."

"The experience of California growers covers a period ranging from three to twenty-five years, depending on the association. Their associations handle perishable products such as strawberries, pears, grapes, apples, oranges, lemons, milk and eggs and non-perishable products such as raisins, dried peaches and apricots, walnuts, almonds, beans, canned fruits and grains."

"Under the N. W. G. A. plan the price of wheat will soar to unheard of values and that it is not what the grower wants. Instead the growers will be a big factor in making the price and as the association grows he will have a still bigger voice in this matter as has been demonstrated in California. There is nothing new in this plan, as every phase has been successfully demonstrated in California."

"Texas bankers will soon be actively engaged in the N. W. G. A. campaign as soon as they learn its merits as in the same way California bankers are working for their co-operative associations which work in the same way as does the N. W. G. A. Before the growers never went to the banks with any project whereby they could be aided. It has always been the dealer who had the practical plan. Now it is the grower organized as the N. W. G. A. and the bankers can not help but be for them for they will prosper only with the agricultural development of Texas."

The attendance at the Wheat Growers' meeting was not as large as had been expected, on account of the recent rains which put the highways in bad condition, rendering travel by automobile very difficult. A number of the members of the Association came in by rail, however.—Amarillo Tribune.

The Melody Maids show at the Pastime Theatre was welcomed by a large crowd Monday and Tuesday night. They will play in Memphis the rest of this week.

## CHAMBER OF COMMERCE IS AFTER MORE MEMBERS

McCARDELL SAYS THERE WILL BE AT LEAST FIFTY NEW MEMBERS IN COURSE OF TWO WEEKS. WILL YOU BE ON LIST NEXT WEEK?

Some years back on a visit to one of our counties south of here, I met people who were fine folks in every way. In conversation with them I found that in nearly twenty-five years they had not been out of the county or ridden on a train. Good folks in every way, but friends, would the U. S. A. be in existence, would this grand western country be known, would we be anywhere if we all stay in one place? After this country was discovered, did the people remain in the east? They came west and kept going until they came to the other ocean. In this county, one of the best, one that a crop failure has been unknown for over thirty years. Should we stop until we make it the best? Yet, citizens of Donley county as sure as you are here, if we sit down, fold our hands and say we are contented with ourselves, we will never get anywhere. If you were going to build a new house, church, or make any improvements worth while, you know what you would do, first ask questions, then look around and see those that have built and profit by their experience and correct their errors. Very few if any, start large improvements without looking about, so with our city and our county, let us talk with the other fellow, get out and away from our county, and see how other people are doing things, if we can see they are getting ahead of us, let us come back and get on the job; at least keep up with them, if not forge to the front. We have progressive people, as fine as you will meet anywhere, people that I believe are going ahead, so come in and let us talk it over and reason with other. See what we can do, now is the good and accepted time. We can rebuild our dams that are washed out after the rains are overturned and thousands of lives destroyed, but we cannot put life in the dead, so let us not wait until too late and say, if I had only done so. Do it now.

We are endeavoring this month to add new members to our Chamber of Commerce, some have come forward and shown that they are with us, others I believe are coming in. Ask yourself the question, "If I am a citizen of Donley county and in everything that is being done to help Donley county, I am receiving the benefit, why shouldn't I be doing what I can with my purse and self?" We are trying to keep Donley county where it is and at the same time endeavoring to put it in the lead. If you are with us, we are from Missouri and would like you to show us by being a member with whatever sum you feel like contributing.

Tulia, Texas with 1600 people has an annual budget of \$7,000. Are we less able to do as much, if not more than Tulia? If so let us start, do it now.

Next week we expect to publish the list of all the members of the Chamber of Commerce, and we hope after it is published everyone will feel they are doing their part to put Donley county where it belongs. Do it now, we want you with us.

We would like fifty new members for this month.

**CLARENDON SHRINE CLUB HELD REGULAR MEETING**

The Clarendon Shrine Club held their regular monthly feed and meeting last night at the Masonic dining hall, with a good crowd in attendance. The committee on feed consisted of Nobles Charles Trent, John Delashaw, H. B. Kerbow, J. J. Taylor, C. W. Bennett, Harry Warren, W. P. Cagle, had eats in abundance, topped off with trimmings that tickled the palates of the Red Caps.

During the evening the Nobles repaired to the photograph studio and had a picture of the club made, then back to the hall for discussion of business, the business consisting mostly of side degrees. The barbecue will be held on June 22nd, it was decided at Noble John Blockers ranch. This barbecue was postponed from last month on account of rainy weather.

## SCHOOL ELECTION WILL BE HELD ON SAT. JUNE 11TH.

A FEW FACTS CONCERNING GROWTH AND PROGRESS OF THE CLARENDON PUBLIC SCHOOLS. BUSINESS MEN EXPRESS THEIR THOUGHTS

In view of the fact that on next Saturday, June 11th, the people of the Clarendon Independent school district will hold an election to determine whether they shall vote bonds and an increase in the school tax rate to relieve the crowded conditions in our schools, a few facts concerning the growth and progress of the public schools and the effect the result of this election will surely have on the future of our schools would seem to be not out of place at this time. Those who have kept in touch with school activities already have at hand much of this information, but those who have not had the time from their business to so keep informed on school conditions will welcome this information, the possession of which will enable them to cast an intelligent vote on the issues to be decided in Saturday's election.

On April 5, 1919, there were actually enrolled in Clarendon Public schools only 493 pupils, distributed as follows: 113 in the high school, 120 in the grammar grades of the high school building, and 260 at Central Ward. During the school year just ended there has been an enrollment of 206 students in the high school and a total enrollment in the grades of 550, making a grand total of 750, an increase over the number in school on April 5, 1919 of 250, and an increase over the total enrollment of that year of between 150 and 200 pupils. During the past two years the actual total enrollment in all grades has exceeded the number of scholars in the district, and next year this excess bids fair to be even larger.

Two years ago teachers though the first five grades were receiving the pitiful sum of \$65 per month, those in the intermediate grades \$70 per month, and high school teachers, graduates of universities were receiving \$90 per month. One result was that only teachers who lived in Clarendon could afford to teach in our grades, and even they, without having to pay board, could hardly make expenses. Now our teachers are paid a salary equal to the average salary paid by our neighboring Panhandle towns of about our own population and this enables us to make a bid for the services of an efficient teacher wherever she may be found.

During the past year the crowded conditions in the high school has been relieved by adding two extra teachers. This has resulted in greatly decreasing the number of failures in the high school because of the increased individual attention given pupils by teachers and it has also enabled us to enrich the course of study by putting in a four year course in Spanish and by adding the department of home economics, which department ranks among the best in this part of the state. Sixty high school girls have been enrolled in this department this year, and most of these have taken the full year's work.

Last year we increased our affiliation with the State Department of Education and with every university in the state by securing affiliation in biology, general science, and the fourth unit in English. The next bulletin sent out by the State Department of Education will give us still further additional units as follows: 1 unit in home economics, 2 units in Spanish, a total of 21 units of affiliation and an increase of six during the last two years. In fact we do not hesitate to say that we have just about succeeded in putting our high school on the map, but it will be difficult to keep it on the map if we allow the crowded conditions in the lower grades to make it impossible to properly prepare our children for high school work.

We are handicapped in the grades because we have eleven teachers teaching an enrollment of 550 pupils or an average of 50 pupils per teacher. One room has enrolled 79 the past year, making it necessary to resort to half day sessions, and unless we are given means of providing more room for next year it is practically certain that still other rooms will have to be used.

(Continued on page 8)

## CLARENDON COLLEGE ANNOUNCE FACULTY

DR. SLOVER WILL CONTINUE HIS GOOD WORK. DEAN CONDRON WILL HAVE CHARGE OF THE SUMMER SCHOOL.

It may be of interest to the public at large to know just who will teach in the college for the next term. Contracts for all positions have been closed and Clarendon can rest assured that we have as strong a faculty as has ever taught here.

Dr. Slover, who has so ably and wisely managed the affairs of Clarendon College will continue to direct its policies. Dr. Slover is recovering from his illness during the winter and recent operation. He feels confident that he will be at himself in the near future. He has splendid plans on foot to make this next year the best in our history—also he is maturing plans for the enlargement of the plant on the hill. With such tried management friends of Clarendon College can rest assured that "all's well."

Dean S. H. Condron will return to his post. He knows so thoroughly the situation that it is needless to say that everything will move along smoothly and harmoniously. At present he is directing the summer school in which there is a larger enrollment than ever before. He also plans for a summer school next year larger than anything in the past.

Miss Mamie McLean will direct the English Department. No more thorough English teacher can be found in Texas than Miss McLean. Her school experience covers large number of years and she brings the best of all of them into her classroom.

Miss Mary Howren, Dean of women and head of the mathematics will return. Up to this year Miss Howren has been at the head of the Latin Department, but she has been desirous for some time to take up mathematics as this was her major study in the University. Thoroughness is the work when applied to the school work of Miss Howren.

Mr. H. T. Burton is spending the summer at Austin completing work necessary for his Masters Degree. Mr. Burton will again have charge of the Science department. Everyone who has been under his tuition knows the high class work done by Mr. Burton.

Mr. R. E. White will take up the new duties as manager of the boys' hall next fall. He has worked out a splendid system whereby this work will be carried. Mr. White is completing the work necessary for his master degree at Emory University. His work in the Foreign Language department has been splendid. We welcome him back with pleasure.

Mr. Justin Anderson will devote the entire summer to canvassing the panhandle for C. C. students. He will again head the department of Education and Bible. He has had splendid success in this line the past year and of course will make the work mean more than ever since he has been here a year and knows the situation. Mr. Anderson believes in Clarendon College. This is attested by the fact that he has bought a house here and plans to make it his regular home. When all of the faculty do this Clarendon will indeed have an institution of which she can well be proud.

Miss Moena Lane will again hold the position of registrar and secretary of the faculty. Miss Lane has done a splendid work. She comes into direct contact with the students and helps many over the seas of despondency, who might otherwise give up in despair. The students feel that in her they have a friend in whom they can depend. Miss Wattie Vaughn the efficient primary teacher will return while Miss Pansy Lane will assume charge of the Intermediate work. Miss Lane has had a successful teaching experience and we welcome her to this new field.

Miss Ruby Fincher will continue to preside over the Home Economics Department. She has rounded out a most successful year and we know that the department will be full another term.

Miss Ineva Headrick, who takes her degree from the University of Texas this summer will be in charge of Latin and High School English. Miss Headrick is a former graduate of Clarendon Col-

## CLARENDON WILL BE THE CENTER OF ATTRACTION THE FOURTH OF JULY

LARGE CROWDS ARE EXPECTED TO BE HERE ON THIS OCCASION. BIG RODEO TO BE FEATURED. FREE BARBECUE AND GOOD RACES. LOCAL POST OF THE AMERICAN LEGION WILL HAVE CHARGE OF THE EVENTS

here, taught in the High School here and with her two years in the University comes as a splendid teacher. We extend to her a welcome to her home town and school.

Too much cannot be said in regard to the Fine Arts Faculty for another year. The following is a complete list in this department. Director of Fine Arts Department, Miss Nina Jeanne Riddell; Instructor in Dunning System, Miss Mabel Betts; Piano, Miss Mattie Eva Lane; Mrs. S. Schulze, Voice; Violin, Miss Patricia Story; Expression and Physical Culture, Miss Ruth Pirtle. Miss Higgall, who holds the degree of Doctor of Music has had a most wonderful teaching experience and success as director of a large conservatory in Mississippi. Under her direction the Music Department of Clarendon College will indeed be the Mecca of music lovers. In the past this has been the case. We have had some wonderful directors and their work will stand as a monument to their ability and efficiency. But with it all we look forward to ever greater things.

To insure this, Miss Riddell will have the most able assistants. Miss Betts has shown her ability by years of successful work. Miss Mattie Eva Lane was without doubt one of the best graduates of Clarendon College. Her playing was recently declared by a musician of high rank, mechanically perfect. Miss Story has been studying for months in Washington and other places under the best of instructors. Her great desire is for a live orchestra. We know that we will have a full violin department and an orchestra of which any school can well be proud.

Miss Ruth Pirtle, a former graduate has won recognition in her expression in the larger schools of the country and will infuse a new life into that department—also it has always been crowded. Mrs. Schulze will return to her department. She has accomplished wonderful things with her pupils this past year and we look forward with pleasure to her return next fall.

To the boarding students, it will be good news to know that Mrs. Mamie Stegman will be stewardess of the dining hall. Mrs. Stegman is an expert in her line.

**Summer School**  
The summer school is moving along in full swing. Over fifty high school and college students have enrolled for regular work. Dean Condron is director, assisted by Miss Mamie McLean, Miss Moena Lane and Miss Ruie McLean. New students are entering daily and it will be the most successful summer school ever held in the College.

In all the prospect for the College is bright. Students and parents are turning this way as never before.

**CHRISTIAN CHURCH**

Last Sunday night at the Christian church was one of interest. The rain hindered the audience to a great extent but a good number was present after all. The pastor led the meeting and spoke from the subject of "Lord is 1?" His lesson was taken from Matt. 26:22. Rev. Paul Merrell did not get here on account of the great rains on Friday and Saturday. This is the second time that he has been hindered from coming and the pastor here from going to Pampa. On next Lord's Day the pastor will lead both services. He speaks at 10:50 at the morning hour and at 8:15 in the evening. Every service begins on time and also closes on time. At the morning hour the congregation is always dismissed by twelve o'clock and the evening hour is the same length. Everybody is always welcome at every service and made to feel at home. If you are missing these services you are missing something that would be a great blessing to you if you would hear it.

**RED CROSS ANNOUNCEMENT**

The Red Cross Child Health Center will open from three to five p. m., Saturday, June 18th at the Y. M. C. A. Building. The purpose of a Child Health Center is to make available to every mother of a community knowledge of the best means to prevent needless sickness among children. This can be accomplished in the following ways:

A free barbecue, Rodeo and race meet will be held July 4th and 5th under the auspices of Aubyn E. Clark Post of the American Legion, is the announcement of Joe Holman, post commander, who has in charge the arrangements for the two days celebration.

The barbecue is to be given on the second day, July 5th and a splendid program of events is being arranged for the two days, the merchants of Clarendon helping the Legion boys finance the proposition. Clarendon was famous in Northwest Texas for July picnics, but during the past two years the celebrations were not held on account of conditions growing out of the war, only small local celebrations being held. During years past Clarendon gave every year a free barbecue, and entertained very great crowds on the occasions, sometimes as many as 15,000 or more visitors being present for the celebrations.

The program as announced by Commander Joe Holland of the Legion is as follows subject to change however:

- FIRST DAY—MORNING**  
9:15—Cigar Race  
9:30—Ladies Race  
10:00—Baseball game
- AFTERNOON**  
Bronc Riding  
Steer Riding  
Roping and Tying Down  
Wild Mule Race  
Goat Roping  
Pony Race
- SECOND DAY—MORNING**  
9:15—Cigar Race  
9:30—Ladies Relay Race  
10:00—Baseball Game
- AFTERNOON—SECOND DAY**  
Bronc Busting  
Steer Riding  
Roping and Breaking Loose  
Slow Mule Race  
Flag Race

Prizes are to be offered for the winners of these races, and it is already indicated that there will be many entries. It is not announced as yet who will be the baseball team to play but it is expected that the Fat Man's Team of Clarendon, made up of good players of a former day will play some other team composed of fats on one of the days, and that the local regular team will play the other day.

Further announcements will be made as to the events to be held. This is the first thing of the kind the Legion has attempted on so large a scale, but it is expected to be a great success as their other affairs, and the citizens are entering into the arrangements and helping the soldier boys.

**THE PRESBYTERIAN CHURCH**

Did you get a good start last Sunday on your church attendance record for June? You've got three more Sundays. If you missed last Sunday, you'll just make 75 percent for this month.

Course, it was a hard proposition like going to school, or working, or solving geometry or puttin' a cattle deal over on the other fellow, it might be different, but 75 percent isn't much of a grade when you think of it. An we ain't goin' to say anything about anything less than that. Seventy-five's barely a pass.

"Ye are the salt of the earth, but if ye fad, oh, well. A hundred's better."

**RED CROSS ANNOUNCEMENT**

The Red Cross Child Health Center will open from three to five p. m., Saturday, June 18th at the Y. M. C. A. Building. The purpose of a Child Health Center is to make available to every mother of a community knowledge of the best means to prevent needless sickness among children. This can be accomplished in the following ways:

1. By instruction to mothers on care of infants.
2. By supervision of the health of the child of pre-school age.

Church Clerk.

## THE CASE OF WHEAT AND THE TARIFF

Concerning wheat, there are some facts and figures to be found sequestered in the market pages of the Chicago Tribune which seem to give a pretty effectual answer to the legend which the protectionist Tories have used to beguile the American farmer into the notion that he is in danger of being buried beneath an avalanche of Canadian wheat unless a barrier of tariff duties is reared.

For example, we find in the issue of that most orthodox journal of Republicanism for May 21 a dispatch from Winnipeg, which reports that on the preceding day the prevailing price of wheat in that Canadian city was \$1.92 a bushel. In close proximity to this dispatch there is to be found another from Minneapolis which reports that on the same day the price of wheat in that city was \$1.43 a bushel.

The two seem to present a problem, the problem of finding the real interest of the American grower, to say which makes it necessary, in the levy a tariff duty against the importation of Canadian wheat. It is apt to occur to one who attempts the solution of that problem that American money is at a premium in Canada. We have heard much of the exchange rate as a war-made reason for erecting high tariff walls. And it is true that American money is at a premium in Canada. The same authority, the Chicago Tribune, reports that on May 20 it was at a premium of 10-12 per cent. Hence, bought with American money in Winnipeg on that day, wheat cost \$1.72 a bushel, instead of \$1.92, the quoted price in Canadian money.

Still, with that deduction made, there remains a difference of 29c in favor of Canadian wheat; that is, it was on that day selling in Winnipeg that much above the quoted price of American wheat in Minneapolis.

One must look for other obscure facts if one is to find a reason for protection on wheat.

There are other obscure facts.

There is, for example, the cost of transportation. And there are other charges, such as those for insurance, commissions and war taxes. The cost of transportation is 14c a bushel, and the other charges mentioned are said to approximate 2c a bushel, making a total of 16c. But these charges, it ought not to be necessary to say even for the enlightenment of the protectionist sophistry, do not work to the advantage of the man who would import Canadian wheat. They work against him. And so, figuring it all up, it will be seen, after making allowance for the premium on American money, that, as matters stand now, the man who bought a bushel of Canadian wheat in Minneapolis and brought it to Minneapolis would find that it had cost him 45c more than he would have had to pay in Minneapolis for a bushel of American wheat.

Hence one who starts to find out, under the prompting of facts alone, rather than under the guidance of a protectionist, the reason for a protective tariff duty, or any kind of duty on wheat, must come to the conclusion that no such reason exists.

And that is the exact truth. Even when there is no tariff duty to pay, Canadian wheat will cost more delivered at a point so near the source of supply as Minneapolis than American wheat costs at the same place, except only when the American crop is abnormally small and the Canadian crop is abnormally big. Then only can free trade in wheat have any material effect on the price of American wheat, and that, it is hardly necessary to say, is a beneficial effect for those who have bread to buy, and not a maleficent one for those who have wheat to sell. If ordinarily Canadian wheat costs more at Minneapolis than American wheat, obviously the excess of its cost must increase as the distance toward the country's interior markets increases, because of the higher transportation charge.

Of all the hoaxes that have been invented to gull the farmers into becoming a protectionist, the argument that is made for the levy of a duty on wheat is the one which probably pays highest tribute to the ingenuity of its authors and least tribute to the intelligence of those who accept it—Dallas News.

## CLARENDON THE SITE OF PROGRESSIVE DEVELOPMENT

Like other progressive cities in the southwest Clarendon has for the last several years been experiencing an acute shortage of homes for persons who desired to make their homes here and also like other cities, has been groping in the dark for a solution of the housing problem. With the final settling down of affairs, however, and building conditions taking on the aspect of normality the situation has begun to solve itself without great difficulty.

Clarendon has several blocks of pavement and more is expected in the near future. Some of the best water can be found in Donley county.

Clarendon has three banks, Donley County State Bank, First National Bank and Farmers State Bank with a combined deposit of approximately \$1,000,000 and the combined

capital and surplus of \$250,000, all of which are enjoying a thriving business under present conditions. Clarendon has a population as shown in 1920 of 2,500 persons, while Donley county has about 7,000.

Donley county has two famous and widely traveled recognized highways, Colorado-to-Gulf and Ozark Trail. Work is kept up on these highways all the time. It is announced by the Chamber of Commerce that these highways will be marked better later on for the benefit of tourists.

Aside from the fact that Donley county is famous for its high grade agricultural lands, its prospects are good to become an oil center, as a result many tests are now under way. With pride does Donley county point to its rising industry. Some of the very best registered Duroc and Poland China are raised in this county. Prizes have been won at both county and state fairs with these swine. A portion of Donley county's reputation as a hog raising section is attributed to the wonderful productivity of its soils, rendering it possible to raise every known variety of feed for stock. The principal products of which are kaffir, wheat, oats, corn, sorghum, fruit and garden vegetables. In addition to swine raising there can be found some of the best registered cattle in the country.

Clarendon is growing daily. There is a new garage now under construction, a sweet potato curing plant is now being built which will cost approximately \$40,000. Owned by a large company, something like 49 percent of the stock is actually owned by Clarendon people. There are several hundred acres of sweet potatoes raised here every year.

The Clarendon Chamber of Commerce of which R. A. Long is president and A. N. McCardell is secretary is an organization of Clarendon business men standing for the development of the city and county and offering inducements to industries and commercial enterprises to locate here.

Clarendon people and people of Donley county invites everyone here to see for themselves.

## SAN BENITO SHIPS FIRST 1921 COTTON

Houston, Texas.—The first bale of the 1921 cotton crop, which reached Houston Thursday night from San Benito, was sold on the floor of the Cotton Exchange Friday for \$1,300.

The bale, raised by E. Matz on his farm near San Benito, in the Rio Grande valley, arrived over the Gulf Coast Lines at 9:40 Thursday night, 14 days ahead of the previous record date of June 3, 1916. It was taken to the Cotton Exchange Friday morning, where it was weighed, classed and later sold at auction to the highest bidder.

The bale, weighed by an official weigher, tipped the scales at 634 pounds. The classification committee of the exchange classed the cotton as strict middling and the staple was pronounced 28 millimeters, or slightly over seven-eighths of an inch.

The sale of the cotton attracted the largest gathering of cotton men on the exchange floor in some time. E. Matz, who on several occasions during the past 10 years has had the honor of placing the first bale of the season on the Houston market, accompanied the bale to Houston. Other San Benito citizens who came to Houston with the bale were G. G. Henson, president of the Valley Gin Company, where the bale was ginned; John T. Lomax, secretary-treasurer of the gin company and president of the Farmers' Guaranty State Bank of San Benito, and H. P. Boyd, vice president of the Valley Gin Company.

The bale and party left San Benito at 6 o'clock Thursday morning, after the cotton had been hurriedly ginned Wednesday night. Mr. Matz won the distinction of marketing the first bale of 1920 crop on June 25 of that year. The San Benito boosters, who accompanied the bale, learned that a bale from Edinburg was on the same train as contender for first honors. Accordingly, when the train reached Kingsville, the boosters chartered a special train and started out to beat the regular train. They did this by three hours and the Edinburg crowd, finding they had been beaten, sent their bale on to New Orleans, where it was sold on June 26 for \$1,000. The special train cost more than \$1,000.

The Matz bale was sold on the 26th on the exchange floor at Houston for \$1,300, the highest price ever paid for a first bale on the Houston exchange. This bale weighed 680 pounds and was classed as strict middling.

## POSTED

This is to notify the public that all of the J A pastures are posted and hunting, trapping or fishing is not permitted and all trespassers will be prosecuted.  
 J. W. KENT, Supt.

Have you tried the new 10c package?  
 Dealers now carry both; 10 for 10c, 20 for 20c.  
 It's toasted.

**LUCKY STRIKE CIGARETTE**

## CORN AND ALFALFA CHEAPEST

Results in feeding five different rations, comparing alfalfa, molasses meal, silage, corn, oilmeal and alfalfa in different combinations, were announced by the Nebraska station at the close of feeding experiments this spring. Five lots of 10 cattle to the lot were fed.

It required 895.81 pounds of corn and 399.53 pounds of alfalfa to produce 100 pounds of gain at a cost of \$8.72. Where silage was added to this ration the cost for 100 pounds of gain was \$10.50 and it required 601.9 pounds of corn, 1,595.63 pounds of silage and 240.98 pounds of alfalfa. Where molasses meal and silage were added to the corn-alfalfa ratio the cost for 100 pounds of gain was \$13.40, and 580.07 pounds of corn, 181.02 pounds of molasses meal, 1,716.37 pounds of silage and 263.37 pounds of alfalfa were required. Where oilmeal and silage were added to the corn-alfalfa ratio the cost of 100 pounds of gain was \$11.75, and 425.22 pounds of corn, 155.22 pounds of oilmeal, 1,282.12 pounds of silage and 166.86 pounds of alfalfa were fed. Where corn was omitted and oilmeal, silage and alfalfa were fed, the cost of 100 pounds of gain was \$12.56, and 187.05 pounds of oilmeal, 2,173.73 pounds of silage and 277.72 pounds of silage and 277.72 pounds of alfalfa were fed.

The standard, corn-alfalfa, ration produced the cheapest gain, and steers in this lot lost only \$20.90 a head when sold. Steers in the lot fed silage, corn and alfalfa lost \$28.40 a head; the lot fed molasses meal, silage, corn and alfalfa lost \$33.40 a head; the lot fed oilmeal, silage, corn and alfalfa lost \$29.14 a head and the lot fed oilmeal, silage and alfalfa lost \$35.28 a head.

## BRUNK'S COMEDIANS HERE AGAIN THIS WEEK

On account of the heavy rains in the Panhandle cutting off traveling the Brunks Comedian show will be in Clarendon all this week. Mr. Harley Sadler, manager of the show, puts forth every effort to give the people the very best show possible. The prices are reasonable for a show of this kind.

Cold storage lard 12-1-2 cents per pound. Best fresh meat at lowest prices. New Meat Market.

**IF SKIN BREAKS OUT AND ITCHES APPLY SULPHUR**

Just the moment you apply Mentho-Sulphur to an itching, burning or broken out skin, the itching stops and healing begins, says a noted skin specialist. This sulphur preparation, made into a pleasant cold cream, gives such a quick relief, even to fiery eczema, that nothing has ever been found to take its place. Because of its germ destroying properties, it quickly subdues the itching, cools the irritation and heals the eczema right up, leaving a clear, smooth skin in place of ugly eruptions, rashes, pimples or roughness. You do not have to wait for improvement. It quickly shows. You can get a little jar of Mentho-Sulphur at any drug store.

# Good rains bring good times

We carry a good line of insurance in every respect. We have a few real estate deals to offer also.

## GIVE THE BABIES THEIR CHANCE

John Galsworthy entreats us not to "drag the hands of the World's clock backward" by our neglect of the health of mothers and babies. He says:

"How do things stand? Each year in this country about 100,000 babies die before they have come into the world; and out of 800,000 born, about 90,000 die. Many mothers become permanently damaged in health by evil birth conditions. Many children grow up mentally or physically defective. One in four of the children in our elementary schools are not in a condition to benefit properly by their schooling. What sublime waste! Ten in a hundred of them suffer from malnutrition; thirty in the hundred have defective eyes; eighty in the hundred need dental treatment; twenty odd in the hundred have enlarged tonsils or adenoids. Many, perhaps most, of these deaths and defects are due to avoidable ignorance, ill health, mitigable poverty, and other handicaps which dog poor mothers before and after a baby's birth. One doesn't know which to pity most—the mother or the babies. Fortunately, to help the one is to help the other."

## CITATION BY PUBLICATION

THE STATE OF TEXAS: TO THE SHERIFF OR ANY CONSTABLE OF DONLEY COUNTY, GREETING: YOU ARE HEREBY COMMANDED to cite all persons interested in the estate of Mollie A. Bryant, deceased, to appear at the next regular term of the County Court of Donley County, Texas, to be held at the court house thereof in the city of Clarendon, on the first Monday in July, 1921, the same being the 4th day of July, 1921, to contest, should they desire to do so, the application of W. H. Patrick, filed in said court on the 31st day of May, 1921, which will then and there be acted on, for letters of administration upon the estate of Mollie A. Bryant, deceased.

HEREIN FAIL NOT, but have you before said court on the first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

WITNESS: W. E. Bray, Clerk of the County Court of Donley County, Texas.

GIVEN UNDER MY HAND AND SEAL OF SAID COURT, at office in Clarendon, Texas, this 31st day of May, 1921.

W. E. Bray, Clerk, County Court, Donley County, Texas.  
 By S. Hightower, Deputy. (33-4)

# It's Surprising

The amount of groceries you can get at our store for a little money. The amount you get is daily increasing while the amount of money paid for same decreases. Our store is full of good, fresh groceries and you will be agreeably surprised if you will drop in and price our goods. Our stock is kept as fresh as possible, and we can recommend without fear of a comeback of the goods.

Your grocery trade will be greatly appreciated, and the quality of our groceries will be found up to the standard at all times. Phone orders or personal calls will be given prompt and painstaking attention, and if at any time you are not properly served tell us about it.

### SHOW MAN MARRIES CHILDRESS GIRL HERE

This happy event was solemnized at the home of Rev. Leon O. Lewis on last Thursday evening at 9:30 o'clock. The participants in the romance of which this was the consumation were Miss Lillian Hall of Childress, Texas and Mr. Dolphus Yager of Durant, Oklahoma.  
Mr. Yager is one of the high class musicians employed by Brunk's Comedians. During the stay of the show in this city Mr. Yager has become quite popular among a large circle of acquaintances and he is said by those closely connected with him, to be a young man of sterling character.  
Miss Hall or Mrs. Yager, is the daughter of Mr. and Mrs. J. S. Hall of Childress, Texas. She grew to womanhood in Childress and those who know her best love her most. Mr. Yager is to be congratulated on winning so fine a young lady for his life partner. She, too has made a wonderfully good impression among her new found friends, both in Clarendon and among the show company. Many blessings, a long life and much happiness is the wish of the News in behalf of these young folks.

# Which one of your neighbors gets the best mileage out of his tires?

EVERY once in a while you hear a motorist say as he kicks a rear tire with an admiring foot, "there's a lucky tire!" Give him a chance and he'll tell you all about it. And then you'll find that what he calls "luck" is simply his first experience with a quality standard tire.

It all comes to *this*—buy a U. S. Tire anywhere in this country and you get definite, predictable value for your money no matter *what* weight car you drive.

The man who has been guessing his way through "overstocks," "discontinued lines," "job lots" and the like, will find it refreshing to talk with the local U. S. Tire dealer who is *concentrating* on a full, completely sized line of U. S. Tires.

For the first time he will hear some straight *quality tire facts*—and get the difference between chance and certainty in tire buying.

The U. S. Tires he sees in stock are *fresh, live tires*. They come direct to the dealer from his neighboring Factory Branch.

There are 92 of these Branches established and maintained by the U. S. Tire makers.

Giving your dealer a continuous moving stock of new, fresh tires built on the certainty of *quality first* every time

"Fresh, live U. S. Tires come direct to the dealer from his neighboring Factory Branch."

"His first experience with U. S. quality standard Tires."

# Groceries of Quality

You are entitled to service, quality price and cleanliness. We observe the four fundamental rules of the grocery business. Cleanliness and quality are paramount. Prices reasonable, service unexcelled. Why not prove this to your own satisfaction by giving us a fair trial. We make it our chief aim to supply you with the highest quality of goods in the market.

#### LOCAL & PERSONAL

Harwood Beville spent Wednesday in Electra on business.

Mrs. R. A. Long left Thursday night for Bluffdale, Texas.

Miss Olive Martin is visiting in Cincinnati and points in Kentucky.

J. B. McCarley and family have moved to Clarendon from Colorado.

Mrs. C. E. Mitchell of Wichita Falls is spending some time with her daughter Mrs. A. N. McCardell.

Lee Pope spent Sunday in Quanah visiting his mother and father. Lee reports a good rain at Quanah.

Miss Ola Grogan has returned home from Denton where she has been attending the C. I. A., college for the past several months.

Mrs. J. C. Marshall of Quanah was in town Tuesday placing her son Hugh in Clarendon College summer school.

W. E. Leake and son, who have been interested in the oil business for sometime have been at home for several days.

Mrs. S. J. Jokell, returned to her home at Waxahachie the latter part of the week after a visit of several days with her mother, Mrs. Robert Turner, of this place.

A number of young people were on the Denver Monday enroute to Canyon to attend summer school. A large number will attend school here this summer.

Francis Grogan is visiting friends in Paducah this week and will visit MEDICINE PARK perhaps before returning home the weather and roads permitting.

Mr. and Mrs. W. J. Lewis and children, Mrs. Lewis' mother, Mrs. Lee Newberry and son Edward of Dallas are spending the summer in Clarendon. Mr. Lewis is owner of the R. O. ranch near this city.

Jake Mittenhall was a visitor to Clarendon Tuesday. Mr. Mittenhall will be remembered by all the old timers of Clarendon, he left here some twenty-five years ago, moving to New York.

Bain Leake who has spent a very successful year in the medical university at Galveston left this morning for Wichita Falls after spending several days in the home of his parents, Mr. and Mrs. W. E. Leake.

#### WAGE CUT MAY CAUSE STRIKE SAYS UNION LEADERS

Chicago, June 8.—Giving warning that acceptance of wage reductions was in the hands of the rank and file of employes, railroad brotherhood chiefs today disclaimed responsibility if the men refused to accept a cut and "a stoppage of traffic" resulted. The strike suggestion was made by L. E. Lee, president of the trainmen, in opening the big four testimony before the railroad labor board's wage hearing today.

They were followed by W. S. Carter, president of the firemen and engine men, who developed a new field of evidence in behalf of the engine service men. Almost disregarding the cost of living and outside wage arguments used heretofore, Mr. Carter presented voluminous data on the hazards of the men's employment and on what he calls their losing fight to maintain a adequate wage standard.

The attitude of the railroads in attempting to cut wages and the labor board's reduction order of June 1 were declared to be the responsible cause if the train and engine men vote to strike on July 1, when they meet here in conference. Mr. Sheppard said.

"If the time comes when the men stoppage of traffic results," Mr. Lee must assert their only weapon and Sheppard told the board, "the responsibility lies on the railroads and on this board.

Mr. Lee declared he would no longer "be the goat" and that acceptance or rejection of a wage cut rested with the men of his organization.

While most of the other labor organizations rested their defense on the testimony offered at the wage hearing in April, Mr. Mr. Carter brought out a new line of argument when he declared that the board should give attention to "the losing struggle" of firemen to secure an adequate wage. He made a long comparison with wages in the metal and building industries since 1907, which was challenged by John G. Walker, representing the eastern railroads, who parried with the witness for half an hour over the value of his statistics. The comparison, however, Mr. Carter said, was not intended so much to show actual wage relations as to show that the trades had received much greater increases in pay in the last fifteen years.

A mortality investigation in 1915 was cited by Mr. Carter to show that the death rate of firemen and engineers was 60 to 90 per cent above the average of all occupations. A United States census estimate in 1908 showed that 52.5 per cent of all railway employes died from accident, Mr. Carter said, and the average age at death of a fireman was shown to be 37.4 years.

Mr. Carter expected to complete his testimony tomorrow, and it was hoped to conclude the hearing this week.

#### FIFTY-FIVE DEAD IN FLOODED DISTRICT AT PUEBLO, COLO.

Pueblo, June 9.—A committee of real estate men today estimated the property damage in Pueblo from the flood at between \$15,000,000 and \$20,000,000. The damage is estimated on the appraisals of buildings and contents.

The known dead totaled 55, according to Red Cross officials.

With plans laid for a complete census of destitute families in the flood district for the establishment of a refugee camp and the installation of a complete field hospital equipment, which is expected to arrive at any early hour, systematization and centralization of the relief work in the district began in earnest today.

The various projects were definitely mapped out at a night meeting of the Red Cross. According to Dr. J. F. Pierce, local director of the Red Cross, the field hospital will accommodate about 250 patients. The tent colony will handle the homeless flood sufferers in a scientific and sanitary manner, Dr. Pierce said.

#### BARBECUE AND ENCAMPMENT NORTH OF TOWN

Mrs. Ida Chitwood assisted by R. W. Hendrix will have an encampment on the river north of the city the 16th and 17th of June, and expect to have 200 girls and boys of Donley county present.

Miss Helen Higgins and Mr. Edmonds of A. & M. College will speak, also W. B. Estes, J. R. Jamison, and J. L. Pope of the Amarillo News and T. E. Johnson of the Tribune are invited and expected to be here. Barbecue on the 16th. Mr. J. W. Kent of our city has kindly donated a beef and Mrs. Chitwood wishes to thank him for his kindness.

Geo. Ryan, Odos Caraway and Secy. A. N. McCardell are acting as classification committee with the aid of the business men and the Chamber of Commerce will see the people have a way to get to the grounds on this occasion.

# Getting Back To Normal

We are beginning, these days, to consider other things besides prices. For a time we had money but prices were so abnormally high that we could scarcely afford to buy. Then deflation came and we had no cash with which to buy, though prices of merchandise declined.

Now we are coming to adjust ourselves to the new levels; we are commencing again to consider QUALITY as well as first cost.

During the war period we were forced not only to accept but to seek substitutes for many of the articles we desired. To a very considerable extent, necessarily, we lost sight of quality. We did not call for a particular brand of flour but took our allotment of any brand and were thankful for that. So with hats and shoes, with women's wear and automobiles.

Now the makers of standardized lines of goods—goods of known quality, advertised and sold under the brand or trademark of the manufacturers—are coming into their own again. It is not sufficient these days for a dealer to say that he has suits at reduced prices—he must specify the quality, give the names of the makers, if he attracts the attention of the buying public. The buyer is not satisfied now to look at the price tag on an auto tire; he wants to know whose tire he is going to get.

Live dealers who carry standard lines of merchandise, goods of established quality, tell the public through their advertising.

It is to your advantage to read the advertisements.

READ THEM EACH WEEK.

#### MEMPHIS-CLARENDON CONTEST GETTING CLOSER

The contest between the Methodist Sunday schools of Memphis and Clarendon, covering April, May and June, has only three more Sundays to run, and the tale will be told.

It is TRUE that Memphis was very much in the lead three Sundays ago? It surely is, but for the last three Sundays we have been "going some," and have lowered their lead to only 1,930 points. But that's too much for comfort.

You see, it's like this: In each Sunday school, each officer, teacher and pupil present counts 5 points; each new pupil counts 5 points; and the school having the best offering gets 50 points while the second best gets 25 points.

Don't you see how vitally IMPORTANT it is that YOU be present each Sunday for at least the next three Sundays? How a new pill you might secure would help beat Memphis? How your offering might mean 25 points lead?

Of course the prime object of the contest was to build up interest in the Sunday School. It has done it wonderfully well, and we do not feel that it is anything but a healthy interest. During the contest we have witnessed the largest attendance on record, there being 630 in attendance the last Sunday in May.

A new men's Bible class, under Rev. C. N. N. Ferguson has been started and meets at 9:30 o'clock, each Sunday morning at the Y building. The enrollment is increasing each Sunday, and the goal is 100 men in actual attendance. Any man who is not already attending Sunday school is invited to come to this class. They are going to do things worth while. Help us fill the Y Building to overflowing.

#### MEMPHIS, CLARENDON HAVE BIG SUNDAY SCHOOL CONTEST

Clarendon, Texas, June 8.—Much interest has been centered in the attendance contest conducted between the Methodist Sunday school of Clarendon and Memphis. This is to be a three months contest, and during the first weeks of the campaign Memphis gained considerably advantage by defeating Clarendon, but during the last three Sundays the Clarendon church has forged ahead. Some interesting facts appear in the figures of the contest as to attendance, collection and new pupils. Most Sundays the school having the smaller attendance has the largest collection. An average attendance of nearly 500 had been for each town.—Amarillo News.

The Clarendon News \$2 the year.

#### CLARENDON WILL HAVE MANY NEW BUILDINGS

Clarendon, Texas June 8.—Dick Allen is having constructed a splendid two story building in the place of the one story building in the place of the one story structure which was destroyed by the cyclone on April 5th. Mr. Allen's automobile business, a garage and filling and supply station are on the lower copy the upper story. This building and rooms for rent will be located on the south end of the business section of Kearney Street, across the street from the public school. This section of the business district has built up very rapidly during the past year, a number of new business houses being erected there, and sidewalks laid across the blocks.

Much sidewalk building is being done throughout the town, and the agitation for more building has begun and will be continued until everyone able to construct sidewalks will have them down.—Amarillo News.

W. D. RUMPLE, Prop.

**BIG CHANGE IN STATE AFFAIRS REST IN FIVE AMENDMENTS**

- Prison Board to Go If Amendment Passes
- What the amendments will do if adopted:
- Abolish Penitentiary Commission, opening the way for a change in the Texas penitentiary system.
- Permit the legislature to raise the salaries of the Governor, Attorney General, Treasurer, Comptroller, Land Commissioner and Secretary of State.
- Increase pensions for Confederate soldiers and their widows, raising the tax from 5 to 7 cents on the \$100 valuation.
- Reduce traveling expenses allowed legislators, but increase their salary.
- Permit only naturalized foreign-born persons to vote; permit absentee voting in a general election, the same as now applies to primaries.

Texas voters will determine July 23 the fate of five constitutional amendments which the last legislature agreed to submit, one of which will abolish the State Penitentiary Commission of three members if it is adopted.

Adoption of this amendment might cause a reduction in state taxes, according to Representative Wallace Malone of Tarrant county. Should the amendment be approved it would be up to the next legislature to decide on some form of management for the penitentiary system. Malone believes that the best way to bring about an improvement in the penitentiary is to work up a new system.

This penitentiary system amendment will read on the official ballot: "For the amendment of Article 17, Section 58, of the Constitution abolishing the Board of Prison Commissioners."

Adoption of the five amendments would permit an increase in the salaries paid the Governor, Attorney General, Treasurer, Comptroller and Land Commissioner. Salaries for these officers were fixed fifty-five years ago. Persons advocating adoption of this amendment point out that living expenses in that day and the responsibility of the amendment would not automatically bring the increase in salaries. It would permit the legislature to raise the salaries as follows:

**What Pay Might Be**  
Governor, from \$4,000 to any figure not to exceed \$8,000; Attorney General from \$4,000 to any figure not to exceed \$7,500; Treasurer, Comptroller and Land Commissioner, from \$2,500 to any amount not to exceed \$5,000 and Secretary of State from \$2,000 to any amount not to exceed \$5,000.

"The proposed increase in salaries of these officers is not large enough materially to increase taxes," Representative Malone said. "The pro rata of a person who pays \$1,000 worth of property would be only one-half of one cent, or 5 cents on every \$10,000 worth of property."

Here is the way the amendment pertaining to these salary increases will read on the ballot: "For amendment to Sections 5 and 21 and 22 and 23 of Article 4 of the Constitution of the State of Texas,

**providing for compensation of executive officers."**

With the adoption of another amendment, the pensions being paid to Confederate soldiers and their widows would be increased. This amendment would require an increase of 2 cents from five cents now being paid to 7 cents on the \$100 valuation.

**May Soon Be Stopped**  
Advocates of the increased pension plan says that within a few years the Confederate soldiers and their widows, now aged, will have died and that this pension tax then will not be collected.

On the ballot the pension amendment will read: "For the amendment of Section 51, Article 3 of the Constitution authorizing the Legislature to grant aid to Confederate soldiers, sailors and their widows who have been residents of this State since Jan. 1, 1910."

One of the other amendments follows: "For amendment to Section 24 of Article 3 of the Constitution relating to mileage and per diem of members of the Legislature of the State of Texas."

This amendment proposes to reduce the mileage of traveling expenses of Legislators to one-half of what it now is. It also proposes to pay legislators not to exceed \$10 per day for a session of 120 days and \$5 a day thereafter. If the amendment was adopted the legislature could pay less than this amount. The present pay is \$5 a day for sixty days and \$2 a day thereafter.

Those who are for the adoption of this amendment declare that it really would be a saving to taxpayers. They point out that the usual ninety-day session is not long enough to complete the business of the legislature, and that, if the session is prolonged the legislators cannot pay their expenses with \$2 a day; that one longer session with sufficient pay, would prevent the duplication of work required at short sessions and would not be so expensive.

**Three Voting Changes**  
Three changes in voting laws would result with the adoption of the amendment that will appear on the ballot as follows: "For the amendment to Section 2 of Article 6 of the Constitution of the State of Texas providing that only naturalized citizens of the United States shall be qualified voters in this State and providing that either the husband or wife may pay the poll tax of the other and receive the receipt therefor, and permitting the legislature to authorize absentee voting."

Under the present Constitution, foreigners are authorized to vote as soon as they declare their intention to become citizens. If this proposed amendment should be adopted; they must complete naturalization before they would be authorized to vote.

The second section of the same amendment applies to towns of more than 10,000 people. With present laws in effect, persons in such towns must get their poll tax receipt in person. If the amendment is adopted either husband or wife could pay the poll tax of the two and get the receipts for both payments.

Adoption of the amendment would permit the legislature to pass legislation whereby the absentee voting, as now in effect, would apply to general elections as well as primaries.

**RESTORING GOOD HUMOR**

**"Re-education in good-humor"**

puts in fewest words the expression of one of the worlds needs of the day. The enlightening phrase originated with a Parisian journalist, Louis Forest, some weeks ago. He received what must crop out here and there, despite the well-proved temperamental self-balance of his admirable countrymen's weakness for dwelling mentally among the darker things—the sorrows, the embitterments, the disillusion, the misgivings. It may easily happen that those who give in to this tendency will grow less apt to perceive and improve the brighter side of life. The cavern too long frequented, its enizen loses his power to perceive light itself.

All this holds true here with us as well as among the French, save for a possible difference of degree. The "re-education in good humor" might, with profit, take some pupils among the disappointed business, service and union labor men for whom in their estimation the sun shines no more. The so-called America sense of humor consists largely of this very good-humor which all must keep or, having lost, regain. It forms a ational resource that we cannot allow a few years of hard usage to dissipate.

In national matters lies a field for restored good-humor quite as important as the personal field. A more cheerful disposition to see the brighter possibilities would have rendered the German nation willing to reach the present terms of ployment months ago. Everyone would have been that much farther ahead on the way to economic recovery. The Polish insurgents now rampant in Upper Silesia might, with a little greater amenability to the more favorable side of things, have seen that they would quite probably obtain a considerable share of the Silesian mine area under the plebiscite in any case, and that obting justified the pessimism which prompted a violent, ruthless mood.

Without going into the details of national conduct, one may safely say that nations in general as well as individuals must seek in their policies the guidance of a new serenity of the kind achieved by the force of internal resolve to dominate the complex of dread and bitterness. This is not a counsel of perfection, for nations that have acquitted themselves so brilliantly as have the great democracies during the last seven years. Those who follow it cannot but gain. The world approaches a time when confidence and belief in better things will become the order of the day.—Baltimore News (Ind.)

**WILLING TO WORK**

This was the subject discussed at the Christian church Sunday morning by the pastor, Sam J. White. He led his congregation to see that it was necessary to work and for all to work at once, in order to be well pleasing to God. There was a good audience present to hear the discourse. Here is an extract from his sermon:

"Nehemiah was in Shushan and he heard of the depleted condition of his beloved city and wanted to go back and repair it. He was grant-

ed the privilege to do so and he went and started work at once on the walls. In our lesson text we are told that "the people had a mind to work." This will enable any individual to accomplish any task he goes at, it will enable any set of men to go forward in any calling or task, it will build a railroad, it will tunnel mountains, whiten the ocean with commerce, and pave the mighty continents with iron rails. When the people have a mind to work they break down every barrier and overcome every difficulty. "When the people have a mind to work." Then there is no delay, no whining about luck, or hap, or fortune; the face glows with courage and the bosom heaves with pent up enthusiasm. There is the dawn of a brighter day.

Every invention serves the purpose for which it was created; the spinning wheel, the loom, the tractor, the engine, and all inventions serve their purpose. Do we serve the purpose for which we were created in this world? Have we the mind to do what God has called upon us to do? The Master said, "all things are possible to him that believeth." It was true then and it is true now. We must believe in ourselves before we can do anything. "EW must make our minds work and when we do then the task is almost finished. We should preach sermons with our lives as well as with our tongues. The world can never be converted until we preach by example as well as by lip or tongue.

It is hypocrisy to pray for a thing and the not work for it. If you pray for daily bread then go to work to get it. God never helps a man at any task that he can do by himself, but when God sees we are willing to work, though the task is greater than we can do, He will help us to do it. The world is not taken for Christ because it does not serve Him. We are fighting in a cause that demands human labor as much as the farm demands human labor. We have our part to perform as well as God has a part. He is sure to do His part when we do our part.

The people had a mind to work and not to criticize what others did. It is bad enough not to work, but it is worse to stand around and criticize the other fellow. Correct your fellow men by creation and not criticism, set the example before him and ask that he follow it. Christ is the great leader of all, but some are going to follow you instead of Christ, therefore every man should be careful as to his steps in life.

When the question is asked, "Are you a Christian?" Many reply, "I hope I am." If I should ask, "Are you alive" and you should say, "I hope I am" the world would call you a fool, but that is no more foolish than to say, "I hope I am a Christian." If you follow Christ you know you are a Christian without guessing about it. The story is told of a preacher who was trying to preach the funeral of one of his members, and he wanted to say something about him and yet could not find much to say for the man had never done anything to push the church forward and finally the preacher said, "This corpse has been a member of this church for forty years." This perhaps, would be a good funeral oration for many members, were they to die.

Everything we see came from work. That monument that rears its head toward the sky came from work. The mighty ships that tread the deep came from work, the coal that makes our fires came from work, the mighty buildings in our great cities came from work, the brown hands of toil did it. Our daily bread comes from work. The fields grow rich with golden harvests because there was some one willing to toil through the burden and heat of the day. There is not one blessing you have that did not come from work. It may not be that it came from physical labor all together but it came from mental or spiritual on. If we have to work in the physical world to live and in the mental to live why should we not be willing to work in the spiritual kingdom that we may live and at last live in a land where sorrow never comes? Those who are watching are those who are working. We are commanded to "watch and pray." If your mind is idle then your hands are idle and if you are idle then the devil can use them all he desires.

Over in Georgia down below Savannah there lives a woman who is growing feeble with age. In early life she had a sweetheart who went to sea and never returned to her and she never heard from him. From that time until now no ship ever passes her cottage without her waiving or signaling to it. She is ever watchful day or night and the boats have learned that she wants them signal her and not one passes there without giving notice that it is passing. She has never missed one boat since the day her lover left and that was when she was a young woman and now she is old and feeble. Who knows the anguish in her heart as she waits

for his return, her mind drifts out on the mighty waste of waters in search for her lover of the long ago. Her mind wanders after him in whom she confided. Her love has never died and never will. Are we watching, longing looking for our lover to return from yonder shore? He said He would come as He went away. I believe Him and I am looking for His coming. He will come with His saints clad in garments of white. At His coming earth scenes will fade; stars tremble; the sun refuse to shine and will veil his dazzling face from the scene of desolation. The moon will roll up in the heavens red as blood, the earth real and roll along her circling track while billows of woe will drift and lodge upon its bosom. Meteors will drag along

the jarring heavens and refuse to shine. An angle whose face outshines the sun will reveal himself to old earth. He will tread upon land and sea. His wings of gold may fan the earth into a raging fire and his mantle of spotless white trail earth and sea, lashing the waves into sea billows and tumbling the mountains into anarchy. He may unchain the fires in the bosom of earth and let them rend its feeble crust and vomit fire on sea and land. He may kiss mountain glaciers into boiling floods and continents dissolve into molten lava. In that day the question will be: "Have I worked and served the master" and if you have then you can rise with Him to that time where rainbows and spring mornings and sunshine mingle.

TO STIMULATE INTEREST IN DAIRYING AND OTHER LIVE STOCK INDUSTRIES

Dallas, June 7.—For the purpose of stimulating interest in the dairy, hog and other live stock industries in Texas, a Farmer-Banker Live-stock Special train will be operated throughout the middle western states during August under the joint direction of the Texas Chamber of Commerce and the A. & M. College. The special train will leave College Station following the Farmers' Short Course which closes July 31 and will run north through Texas, Oklahoma, Kansas, Nebraska, Iowa and Minnesota. From Minneapolis the train will run west through North Dakota, Montana and Wyoming, after which a trip will be made through Yellowstone Park. The train will then run south through the dry farming and irrigation sections of Idaho and Utah to Salt Lake City where a day will be spent sight-seeing. The next stops will be in Denver, Colorado Springs and the farming country of East Colorado, and the return trip will be made in the Panhandle Plains section of Texas where one or more stops will be made for the benefit of South and East Texas farmers who wish to see the great wheat, grain sorghum and live stock sections of their own state.

### A REAL TIN SHOP For Clarendon

—Will open for business at the old Auto Top stand east side square, Clarendon, Tex., Wednesday, June 15th.

Let us figure with you on sheet metal roofing, ceiling, guttering, flues, well casing, supply tanks, stock tubs, etc., in fact anything in the sheet metal line.

General repair work including auto and tractor radiators neatly and promptly done.

Home of the "BOLANDER Milk Cooler"

Special attention to out of town orders.

### BOLANLER TIN SHOP

GEO. W. BOLANDER, Proprietor

methods will offer much for the study of farmers from the strictly cotton-growing sections of the state. "Nothing broadens and inspires a man more than getting away from home and seeing how the other fellow works," says James Z. George vice president and general manager of the Texas Chamber of Commerce, in commenting upon the trip, "we are trying to make this a part of the general movement to abandon the one-crop farming which makes the majority of Texas farmers dependent upon cotton alone. With the enthusiasm back by those who make the trip we hope to make the journey a project of great benefit to the entire state."

An illustrated booklet descriptive of the trip will be printed by the Texas Chamber of Commerce and distributed free to farmers of the state who request it.

### WILL DO SOME TRAVELING

Editor Koch and wife leave today for Dallas to join the members of the Texas Press Association who are to leave there on the Katy Special for McAllen, the next morning. The members will be served dinner at the Raleigh hotel at Waco, a Mexican supper by the Chamber of Commerce at San Antonio, breakfast at Kingsville, and arrive at McAllen about seven o'clock. In the Rio Grande Valley are half a dozen towns ready to entertain the editors during their "bit's days" visit, and among other things promised is a barbecue in Old Mexico. Returning from McAllen next week the editor will start for St. Louis to meet his brother, Dr. J. A. Koch, from the island of Java in the East Indies. Java is on the other side of the globe, and the distance too far for the two brothers to see each other often, hence they expect this to be their last meeting. The physician happens to be in the United States for only a couple of weeks, having carried a patient to this country, and the two expect to be together for a couple of days in St. Louis, and talk over old times when they were boys together.

### CHILDRESS BABY CONFERENCE IS GREAT SUCCESS

Childress, June 3.—The Better Baby Health Conference held by the Red Cross at the Presbyterian Church was a great success. A large number of babies were examined by leading physicians of this town assisted by Miss Ella Yeager, Public Health Nurse, of Donley County. Those winning gold medals were: First boy, William King, son of Mr. and Mrs. Herman King; first boy between one and one-half years and three years, Charles W. Mock, son of Mr. and Mrs. Roy Mock. First girl, Marguerite Walling, daughter of Mr. and Mrs. Travis Walling; first girl over one and one-half and under three years, Emma Louise Fox, daughter of Mr. and Mrs. Arthur Fox of Tell. The doctors making the examinations were Doctors Bryan, Wolford, McFerran, Michie, Jernigan and Johnson.

### WHEAT AND OAT PROSPECTS GOOD; DUE TO RAINS

Prospects for a good yield of wheat and oats have been improved by recent rains. Wheat in the Panhandle is looking especially good. Corn is making fair progress, and is up to a good stand in most sections. Some damage to both corn and cotton from cut-worms is reported. Potatoes in south Texas are now being harvested. The acreage in rice has been cut 50 percent it is estimated, and the progress of the crop has been delayed by unfavorable weather conditions. The truck crop in south Texas is reported good, and moving freely; some shipments have been made to New York by water via Galveston. The east Texas tomato crop, though retarded by unfavorable weather, promises a good yield. There will be a greatly increased production of watermelons.

With the exception of apples, of which there will be a 50 percent yield, fruit in west Texas has been killed by cold weather; in north Texas the fruit crop has sustained some damage, while in east Texas it is reported safe.

Recent rains in east and south Texas, and in some portions of west Texas, have greatly improved the ranges; and livestock generally is said to be in good condition. A greatly increased production of hogs, lambs and calves is noted.

The Chamber of Commerce held their regular monthly meeting Tuesday for the transaction of business and it was decided at that time to start our Tuesday luncheons. The first luncheon will be held next Tuesday. We request all members to be present and the tax of fifty cents will be imposed for that luncheon. We hope all members will feel like it is their duty, at the same time, we believe the luncheon will meet with your requirements. Mrs. Ida Chitwood and her girls will furnish the luncheon. Remember only 50 cents.

### BAPTISTS COLLECT \$25,000,000 CASH

REDEMPTION OF PLEDGES ENCOURAGING—SOUTHWIDE PROGRAM IS LAUNCHED.

### COMPLETE GREATEST YEAR

Reports to Southern Baptist Convention at Chattanooga Show Marked Progress Along Every Line of Organized Work.

DR. J. H. RUSHBROOKE Baptist Commissioner for Europe.

Collections in cash totaling \$25,103,424.64 have been made for general causes fostered by the Baptist 75 Million Campaign since the campaign was launched in 1919, according to a report to the Southern Baptist Convention, which has just adjourned its Chattanooga session, by Dr. L. R. Scarborough, general director of the campaign, and chairman of the Conservation Commission. The fact that \$12,924,943.60 of this amount was collected during the past year, under the most depressing conditions known in years, is very encouraging to the denominational leaders, they say.

Will Seek the Unsaved. Feeling the need of conserving the spiritual interests of the people as well as the financial aspects of the campaign, the convention asked the Conservation Commission to seek to enlist through the state and associational organizations, all the 27,000 local Baptist churches in the South in a larger evangelistic effort during the next twelve months, the aim being to induce as many individual members of the churches as possible to win at least one soul to Christ during the new year. Reports to the convention showed that there were 173,395 persons received into the local Baptist churches by baptism during the past year, and a much larger number will be sought during the year ahead.

Would Evangelize Europe. One of the interesting actions of the convention was the decision to back up fully the Foreign Mission Board in its program for the evangelization of the new European territory of Spain, Yugoslavia, Hungary, Roumania, the Ukraine and Southern Russia. Dr. J. H. Rushbrooke, of London, Baptist Commissioner for Europe, addressed the convention, telling how he had distributed the relief funds contributed by Baptists for the needy families of those countries and how the giving of this relief had opened wide the door of missionary opportunity.

Work on the older foreign fields during the past year was unusually successful, the board reporting receipts of \$2,494,958 for its missionary operations and \$278,000 for relief work, as well as \$100,000 worth of clothing; 6,998 baptisms on the foreign fields; 187 of the 611 churches self-supporting, with a total of 405 foreign missionaries and 978 native workers employed.

Home Mission Board Active. The Home Mission Board reported 77,672 additions to the churches through its instrumentalities, church extension operations of \$1,245,000, and 298 patients treated at the Tubercular Sanatorium at El Paso.

During the year the receipts of the Sunday School Board reached \$1,147,721.73, and the board turned back into general work of the denomination the sum of \$189,000.

Although only three years of age, the Relief and Annuity Board, which seeks to supply the needs of aged, dependent ministers and their families, has doubled the number of beneficiaries receiving aid from the denomination as well as the amount of relief given. It now has permanent resources in excess of \$900,000.

There are 119 Baptist educational institutions in the South, with a total enrollment of 40,000 pupils, the report of the Education Board showed, and 2,186 of these pupils are preparing for special Christian service, such as the ministry, missionary and other special religious work.

The Woman's Masonary Union, representing the organized women of the South, reports a total of 19,495 organized societies of women and young people, while the cash contributions by the women to the various causes fostered by the denomination during the year amounted to \$5,115,487.

Announcements were received this week of the marriage of Miss Glenn Lynch to Mr. Garst, both parties of Guymon, Okla. Mrs. Garst will be very favorably remembered here by many Clarendon people, she having been formerly employed at the First National Bank. Mr. Garst has visited in Clarendon a number of times. After a visit to Chicago and Kansas City they will return to Guymon, Okla., to make their home, where the groom has a very promising business. The best of wishes are extended the happy couple by their many Clarendon friends.

### 1921 SHOWS AN INCREASE OVER 1920 IN ATTENDANCE

The following is a complete list of the enrollment in the common and independent school districts of Donley county, given out by the county superintendent.

1921—Clarendon Ind. Dist.	717
1921—Hedley Ind. Dist.	366
1921—Lelia Lake Ind. Dist.	250
1921—Donley county common Dist.	1088
Total	2421
1920—Clarendon Ind. Dist.	723
1920—Hedley Ind. Dist.	398
1920—Lelia Lake Ind. Dist.	243
1920—Donley county common county dist.	1048
Total	2412
1919—Clarendon Ind. Dist.	668
1919—Hedley Ind. Dist.	349
1919—Lelia Lake Ind. Dist.	207
1919—Donley county common school dist.	1020
Total	2244
1918—Clarendon Ind. Dist.	661
1918—Hedley Ind. Dist.	362
1918—Lelia Lake Ind. Dist.	231
1918—Donley county common school dist.	945
Total	2199

### IN MEMORY OF MRS. DINGLER

Mrs. Dingler was born in Erath County, Jan. 1, 1871. Died at the family home near Clarendon, May 23, 1921.

She leaves a husband, five children, aged father and mother, Rev. and Mrs. A. V. Neely, two sisters, Mrs. J. A. McKillop, Mrs. L. E. Gammons, one brother, J. N. Neely and other relatives to mourn her loss.

She was married to N. Dingler October 6, 1892. To this union was born six children, four girls and two boys, Mrs. C. C. Murphee of Desdemonia, Texas, Mrs. O. J. Rackley of Pecos City, Texas, Richard, Mayme and Gertrude Dingler of Clarendon, all of whom are living and were with her during her illness and death. The oldest son, Juddie V. gave his life for his country in France, October 8, 1918.

At the age of twenty years she was converted and joined the Baptist church, in which church she lived a consistent member until the time of her death. Her last illness lasted almost four months and her suffering during this time was intense, but she bore it in a cheerful patient manner at all times saying "God doeth all things well. His will be done."

The patient manner in which she bore this last great trial will ever be a benediction to the family and friends who cared for her. During her most trying hours of suffering she thought not of herself, but of the comfort of those around her. In health and sickness she was ever a kind faithful and loving wife, and as a mother she was constant, devoted and self sacrificing to the well being of her children.

Her ideals of life were high and when an opportunity presented itself she never failed to take the stand she thought was for the right.

The world has been made better by her having lived and Heaven is nearer and sweeter to those left behind, because we know she is watching and waiting.

Thou are gone our precious darling. Never more canst thou return. Thou shall sleep a peaceful slumber. Till the resurrection morn'. Then we'll meet to part no never. In that home beyond the sky.

A Friend.

THE PLEASURE A BATH depends largely on the Bath Room. If everything there is fitted with all the necessities of a Modern bath room, it adds much to the enjoyment.

Have You Such a Bath Room? If not, it is an investment that will return the biggest kind of interest. Why not let us figure with you?

### MARTIN NEWS

Rev. Baker preached for us Sunday afternoon.

After services Sunday evening Miss Ruth Talley gave a birthday party which was largely attended. Refreshments of cream and cake were served.

Mr. and Mrs. Geo. Bullman of Ashtola visited the latter's parents, Mr. and Mrs. J. F. Cannon Saturday and Sunday.

Ruby Mosley spent Saturday night and Sunday with Kate and Ruth Talley.

Minnie and Vernis Pool spent Sunday with Kate and Ruth Talley.

An ice cream supper was enjoyed Saturday night at the I. N. Bowers home.

Martin's first ball nine visited Sunnyview Monday afternoon and came back winners. The score was 18 to 3 in Martin's favor.

Ruth Talley visited relatives in Clarendon last week.

### CLARENDON SENATE MEETS AGAIN

There was another interesting session of the Clarendon Senate Monday night; notwithstanding there were many other attractions in the city at the same time. There were some interesting speeches made. One bill on divorce was brought before the senate and discussed for an hour, but one clause defeated the bill, and that was: a written agreement of separation. The bill was defeated overwhelmingly at the close of the discussion. There was another bill introduced immediately on the same question which seems to meet with the favor of a greater number of senators. There were a number of visitors present, and a number of them took membership in the senate. The next meeting of the senate will be on June 20th, Monday night. It is to be hoped that the night will be good and everything clear for the senate. Those who attend it claim to enjoy it and to get a great deal of good from it. It is for the community at large and will help all who attend it. A bill on woman suffrage will likely be introduced at the next session. This bill will ask for the repeal of the 19 amendment to the constitution. There is sure to be some interest manifested in this bill. The community should look on this organization with favor.

**Keeps Your Stove Shining Bright**

Get a Can TODAY

as it belongs to no class or party and is for the uplift of the young and the old alike. Remember the next meeting is June 20th.

A Reporter.

**NOTICE MILK**

During June, July and August milk will be 7-1-2 cts per pt, 12-1-2 cts per qt, and 20 cts per half gal. Jersey Dairy, R. A. Summers, Prop.

**BEGIN HOT WATER DRINKING IF YOU DON'T FEEL RIGHT**

Says glass of hot water with phosphate before breakfast washes out poisons.

If you wake up with a bad taste, bad breath and tongue is coated; if your head is dull or aching; if what you eat sours and forms gas and acid in stomach, or you are bilious, constipated, nervous, and can't get feeling just right, begin inside bathing. Drink before breakfast, a glass of real hot water with a teaspoonful of Limestone phosphate in it. This will flush the poisons and toxins from stomach, liver, kidneys and bowels and cleanse, sweeten and purify the entire alimentary tract. Do your inside bathing immediately upon arising in the morning to wash out of the system all the previous day's poisonous waste, gases and sour bile before putting more food into the stomach.

To feel like young folks feel; like you felt before your blood, nerves and muscles became loaded with body impurities, get from your pharmacist a quarter pound of Limestone phosphate which is inexpensive and almost tasteless, except for a sourish twinge which is not unpleasant.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels. Men and women who are usually constipated, bilious, headache or have any stomach disorder should begin this inside bathing before breakfast. They are assured they will become real cranks on the subject shortly.

**OPEN NOSTRILS! END A COLD OR CATARRH**

How To Get Relief When Head and Nose are Stuffed Up.

Count fifty! Your cold in head or catarrh disappears. Your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more snuffing, hawking, mucous discharge, dryness or headache; no struggling for breath at night.

Get a small bottle of Ely's Cream Balm from your druggist and apply a little of this fragrant antiseptic cream in your nostrils. It penetrates through every air passage of the head, soothing and healing the swollen or inflamed mucous membrane, giving you instant relief. Head colds and catarrh yield like magic. Don't stay stuffed-up and miserable. Relief is sure.

### KNOWS HOW TO KEEP

### WOLF FROM THE DOOR

How would you like to spend your summer months keeping the wolf from the door? Well, that is exactly what one West Texas lady did in Lubbock County last year and, best of all, she found pleasure and profit in the occupation. No! She did not have to stand guard with a gun handy in order to be able to kill the wolf should he appear. This might have been the practice in the early seventies in the Panhandle, but those days have passed with the Indian and buffalo into the realm of the has-been, and the term "keeping the wolf from the door" now has an altogether different significance, in that it implies providing for future contingencies by taking advantage of present opportunities.

Since the summer will soon be here, no doubt there are many good housewives wondering how they shall spend their summer months to best advantage, and believing such to be the case, no doubt they would be interested in reading about the achievements of a progressive housewife in the Panhandle and what she did during months of 1920, as told by Miss Millie M. Halsey, former Home Demonstration Agent

products from a small garden.

How Mrs. Schroeder had longed for a steam pressure cooker, so in the fall of 1919 she sold some surplus cockerels and bought a medium-sized Denver cooker. By this time all the gardens were gone, and only available canning material was sweet potatoes and the fresh meat available when the hogs were killed. However, she took advantage of such opportunities as presented themselves, using glass jars, with such good results that the cooker had paid for itself by the spring of 1920.

Sometime in May Mrs. Schroeder was one of a club of five who ordered Burpee Sealers and sanitary cans. She not only kept busy during the summer filling both cans and jars for herself, but she also did a great deal of canning for her mother and a married sister.

Neither is this the end of the story, for while the figures are not in Lubbock County, but at present Home Demonstration Agent in Baylor County, representing the Extension Service, A. and M. College of Texas.

When Miss Halsey was in Lubbock Mrs. Ed Schroeder showed her some pictures representing a part of her summer's work. She is an active member of the Slide Woman's Home Demonstration Club, which took the first prize in a Woman's Home Demonstration Club exhibit at the State Fair in 1920, and is one of the many women in Lubbock County who bought a steam pressure cooker during the past three years. Furthermore, in 1919 although living twenty miles from Lubbock, her nearest market, she made more money from her three cows and sixty-five hens than her husband made on his cotton crop, besides thirty-five or more dollars which she won as prizes on can available. Mrs. Schroeder told Miss Halsey that her cows, chickens and eggs had again made her more money than her husband had made off of his entire crop, to say nothing of her profits from canning, etc.

Her products are marketed in Lubbock, and while her home is situated twenty miles distant she supplies the requirements of regular customers at stated intervals.

Mrs. Schroeder took first prize on butter at the Lubbock Fair; also took a prize on butter at the Dallas Fair. The ribbons show that she won several prizes on canned products, etc., at Lubbock—Extension Service Farm News, College Station.

### A FEW WAYS ON HOW TO KEEP WELL

Get as much exercise in the open air as is possible every day.

Eat regularly, that is, at regular intervals. Five hours ought to elapse between meals, in order that the stomach may have a sufficient rest after its work is done.

Besides wrong methods of eating there are some other causes of indigestion, such as excitement, worry, anger, and eyestrain. Any nervous strain acts directly upon the digestion.

Keep your weight after 35, five to ten pounds under the average.

Sixty-five per cent of the human body is water. Most people do not drink water enough. Eight or ten glasses a day are not too many.

Even if pure, ice water should be taken sparingly. It chills and sometimes injures the stomach. Do not get into the habit of drinking it.

A strong citizenship must depend chiefly upon the protection of the lives and health of the children. This is far more important than efforts to encourage immigration, or to defraud adults from harm. The hope of the future rests in the child.

Measles, whooping cough, mumps, and other children's diseases are no more necessary nor desirable than diphtheria or typhoid fever. It is

really criminal for parents to knowingly expose their children to such diseases.

It is not safe to eat in restaurants infested with flies. Proprietors must be made to realize this. Flies are not only annoyances, they are dangerous. They carry especially the germs of diarrhoea and typhoid fever.

A great many cases of mild continued fever regarded as malarial in nature prove to be cases of pulmonary tuberculosis and the true nature of the disease is often not discovered until too late. The same is true with abnormal types of typhoid fever, especially those which bronchitis is a symptom.

Soap suds and a scrubbing brush which cost little, sunchine and fresh air which cost nothing often make large expenditures for doctors and medicine wholly unnecessary. A tan skin and freckles which the flush of health produce a type of beauty that all the cosmetics in the world cannot imitate. No rouge or powder can produce complexion that nature makes by the skillful admixture of sunshine, fresh air, cleanliness, and wholesome living.

Correspondence is invited by the State Health Officer, Austin, regarding the prevention of disease, the improvement of health and acquisition of physical fitness.

### EXCESSIVE MOISTURE IN CORN CAUSES LOSS IN EXPORTING

Large quantities of corn shipped from the United States arrive in soiled condition. According to the Bureau of Markets, United States Department of Agriculture, the amount of moisture in corn, and in other grains as well, is the primary factor determining its capacity to carry safely in ocean transit without deterioration.

Corn in which the moisture content is sufficiently low will carry safely under ordinary conditions of ocean transportation for any reasonable length of time during any season of the year, no matter where it is stored in the vessel, while corn containing a high moisture content is constantly in danger of heating at any time owing to a variety of contributing causes. Thoroughly air-dried corn contains from about 12 to 13 per cent of moisture. Such corn may be shipped for export at any time under ordinary conditions with little or no danger from heating in transit. This is practically true also of corn containing up to 11 per cent moisture, provided fermentation has not started.

The fact that certain lots of corn contain higher percentages of moisture does not necessarily mean that they will not stand ocean shipment safely. The corn may be perfectly sound, the voyage may be short, the air temperature at the time of loading and during the voyage may be low, no disturbing influence, such as heat radiating from the ship's boilers, engine rooms and shaft tunnels, may be encountered, and the corn kept practically in cold storage. Under such most favorable conditions corn with a relatively high moisture content may sometimes be carried safely.

### NEW RULING MADE FOR DISABLED SERVICE MEN

All disabled former service men who have been approved for federal vocational training at government expense must begin their training within 12 months after notification of approval, according to a recent ruling received by the Southwestern Division of the American Red Cross at St. Louis.

Secretaries at the 738 chapters of the Red Cross in the Division have received instructions to pay special attention to assisting ex-service men to make satisfactory home arrangements so they may take advantage of the training before the expiration of the time limit.

### FAKE ORANGE BEVERAGE

A warning against fake orange beverages has been issued by the U. S. Public Health Service, according to notice received by Dr. M. M. Carrick, State Health Officer of Texas. "I wish to heartily second the warning," stated Dr. Carrick. "The orange has great dietary importance, particularly for children. The government chemists state that most of the 'fake' orange beverages on the market consist of sweetened carbonated water, flavored with a little oil from the peel of the orange and artificially colored to imitate orange juice. They do not run counter to the Food and Drug Act to the extent of bearing the name 'orange juice' which would be a direct violation, but depend upon a suggestive coined name, supplemented by misleading pictured labels. A word of warning by physicians when recommending orange juice will go a long way toward preventing mothers from being misled by these deceptive labels and advertisements. The best way to get orange juice for children is to buy the fruit and squeeze out the juice."

### A SPECIAL REQUEST

All visitors and draymen are requested not to drive over the cemetery grounds when the ground is soft. If you are compelled to drive into the grounds when the ground is soft please stay in the main road. We are spending considerable money on the grounds and doing some good work and if the practice of driving around over the grounds when it is wet is not stopped we will be compelled to lock the drive gates. We are sure everybody is interested in our beautiful cemetery and will cooperate with the trustees in complying with this request. (24c)

W. W. Taylor,  
H. Mulkey,  
J. B. McClelland,  
Trustees.

### "KILL THE PESTS" NOW THE SLOGAN

In Amarillo last Friday, everyone you met had a flyswatter and those who were without one was fined ten cents. Let us get busy here.

One little fly, you will say can do no harm, maybe not, let us see. One fly lays usually one hundred or more eggs the entire cycle of development from egg to adult fly is up from eight to ten days and they reach sexual maturity within three or four days. Now when you have spare time take your pencil and see how many flies you will have in your house in a few weeks from just one little fly that you think can do no harm.

A film will be shown at the Pastime Theatre soon to show the evil of letting a fly live.

A dead fly tells no tale, but a live one multiplies fast.

### LET'S GO!

Let's get no satisfaction  
By looking sour and blue,  
Let's clear the decks for action,  
Let's see what we can do;  
Instead of merely yearning  
For trade again to grow,  
Let's start the wheels turning,  
Let's go!

Things won't get "back to normal"  
Until we show some life,  
Stop making gestures formal  
And jump into the strife.  
Come, can the walls unhappy,  
Forget your tale of woe,  
Back up and make it snappy!  
Let's go.

What's all this "well known nation"?  
It's plain to one who reads!  
There's too much conversation  
And not enough of deeds!  
Prosperity's arrival  
Won't be so blooming slow  
If we start the revival;  
Let's go!  
—Berton Bralley.

### NOTICE OF SALE

The Fort Worth and Denver City Railway Company will sell at public auction beginning at 10 a. m., Thursday, July 7th, 1921 at the local freight station of said company in Clarendon, Texas.

One Climber Touring Car Motor No. 37463.  
One Climber Touring Car Motor No. 37442.  
One Climber Touring Car No. not shown, Serial No. T-205.

The above described automobiles moving in car MC-64792 shipped by the Climber Motor Corporation from Little Rock, Ark., October 1, 1920, consigned order notify Jno. A. Galt, Clarendon, Texas.

Above sale to satisfy freight and other charges assessed against this shipment.

W. B. Kellett, Freight Claim Agent, Clarendon, Texas, June 4, 1921. (23-4c.)

### POSTED

The public is hereby warned that hunting and wood hauling is forbidden in the R. O. pasture. All trespassers will be vigorously prosecuted.

W. J. Lewis. (24)

### FARM BOY SPECIAL NEXT YEAR

The Farm Boy Special tour which met with great success last year, will not be repeated until 1922. The matter was considered this year, and referendum was sent to local chambers of commerce and county agents. The majority of these indicated that they thought it best to postpone the next farm boy trip until 1922 due to tight money and the difficulty which would be met in raising the prizes. Favorable expressions came from a number of counties, however, and a place will be made aboard the train for all farm boys who can make the trip.

### HEAVY RAINS IN DON- LEY ASSURES GOOD SEASON

The excessive rains during the past two weeks are such that old timers in Donley county are remarking about the wet weather at this time of the year. So much rain has fallen that the branch thru the middle of town is flowing with high water, whereas it is usually dry. Instead of having the blues, the farmers are smiling with the pleasure of anticipating bumper crops for the country in the fall. Nearly six inches of rain fell to Monday morning has been the precipitation since the rains began, and one and a half inches of rain fell on Sunday night. On Saturday night an inches of rain fell. Some crops have been washed out and will have to be re-planted.

### COLLEGE OF INDUSTRIAL ARTS AWARDS SCHOLARSHIPS

Denton, Texas, June 7th.—The College of Industrial Arts announces that fourteen of its graduates, out of the seventy-eight members of the graduating class of 1921 who received bachelor degrees, are awarded special scholarship honors. This mark of distinction is a result of high scholarship records maintained during the entire four years of their college work. Those receiving these honors are as follows: Marian Thomas, B. S., Coleman, Texas; Bess B. Hughes, B. S., Brenham, Texas; Mary Bailey Nelson, B. S., Richmond, Virginia; Mildred Palmer, B. B. A., Denton, Texas; Louise Von Struve, B. A., Abernathy, Texas; Roberta Clay B. A., Dublin, Texas; Lillie Mae Cooper, B. S., Olton, Texas; Louise Langley B. A., Bullard, Texas; Ruth DeVall B. A., Mount Vernon, Texas; Dorothy Conner B. S., Roswell, New Mexico; Martine Morris, B. S., Bonham, Texas; Grace Nicholson B. A., Victoria, Texas; Myrtle Gaines B. A., Santa Anna, Texas; Alice Ray B. S., Ft. Worth, Texas.

### POSTED NOTICE

All persons are hereby warned against hunting, wood hauling and trapping in the C. T. Word & Son pasture in Hall and Donley counties. All violations will be prosecuted promptly.

Don't talk pessimism. It puts similar ideas into the minds of other people, and such ideas create doubt and uncertainty and hamper the ordinary progress of commercial activity and expansion.

There are about 6100 organizations of scientists in the world for studying X-rays, and a Dutch leader in the science is trying to combine them in one international body.

If you can't see anything good in the future get some other fellow to do your looking for you until you can adjust yourself to conditions and acquire a better perspective of affairs in general.

If a man goes out in the morning and tells every person he meets that he is sick, and keeps up the fiction from day to day it will grow on him until he is in reality unfit for business.

But if you want better times go out and preach them and put the joy of confidence into other hearts as well as your own. The response will be just as great.—Randall Co. News.

### OH! MY BACK!

The Expression of Many a Kidney Sufferer in Clarendon

A stubborn backache is cause to suspect kidney trouble. When the kidneys are inflamed and swollen, stooping brings a sharp twinges in the small of the back, that almost takes the breath away. Doan's Kidney Pills revive sluggish kidneys—relieve aching backs. Here's Clarendon proof:

Mrs. L. L. Moore, E. 6th St., says: "Sometimes ago my kidneys and back caused me a lot of trouble. My back was so lame and sore I could hardly stoop over. It ached all the time and mornings was so stiff and lame I could hardly get straightened up. I had such dizzy spells, I would almost be blinded. Severe headaches followed these attacks. My kidneys were weak, too. Doan's Kidney Pills gave me excellent relief." Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Moore had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

**Me-o-my,**  
how you'll take to a pipe—and P. A.!

Before you're a day older you want to let the idea slip under your hat that this is the open season to start something with a joy's jimmy pipe—and some Prince Albert!

Because, a pipe packed with Prince Albert satisfies a man as he was never satisfied before—and keeps him satisfied! And, you can prove it! Why—P. A.'s flavor and fragrance and coolness and its freedom

from bite and parch (cut out by our exclusive patented process) are a revelation to the man who never could get acquainted with a pipe! P. A. has made a pipe a thing of joy to four men where one was smoked before!

Ever roll up a cigarette with Prince Albert? Man, man—but you've got a party coming your way! Talk about a cigarette smoke; we tell you it's a peach!

Prince Albert is sold in floppy red bags, tidy red tins, handsome pound and half pound tin humidors and in the pound crystal glass humidors, with sponge moisture top.

MEMBER CLARENDON CHAMBER OF COMMERCE

(Continued from page 1)

**SCHOOL ELECTION WILL BE HELD SATURDAY JUNE 11TH**

half day session. We know that the people of Clarendon want and appreciate good schools and this statement concerning our schools is given with the belief that a thorough knowledge on the part of the voters of school conditions is all that is necessary to carry tomorrow's election by an overwhelming majority.

Jno. T. Sims, Pres.  
W. W. Taylor, Sec.  
H. B. Kerbow  
Fred Chamberlain  
Fred Story  
Odus Caraway  
J. T. Patman,  
Trustees.

We are proud of the school advantages that our town affords and want to see them kept up to the highest standard. We are heartily in favor of the increased tax rates and bond issues.

Clifford & Wilkerson

Mayor A. W. McLean says, "I will vote for the school bonds and tax raise Saturday because I consider the measure necessary in order to keep our schools maintained as they should be. I favor bond issue because I favor better schools."

Strickland & Story will vote for both the school bond issue and the increased tax limit, because they know that both mean still better schools than we now have; because the bond issue is the only solution of a very serious housing problem and the increased tax limit must be authorized if the present income of lower taxable valuations is to be maintained. Failure to provide for at least the present income from taxes, will very seriously cripple the schools. We cannot believe that any voter who regards these questions with open

mind can vote against them. We are for them!

Less than one half of one per cent of the boys and girls ever go beyond high school. In order to properly equip them for life we need the best high schools possible, and the tax rate of one dollar and the bonds are necessary to make such school. As county superintendent Donley county I find that the people who pay most for the support of their public schools take the greatest interest in their success.

W. T. Link.

I am heartily in favor of the bond issue and the increase in taxes for school purposes. I have no one in school to derive any benefit from this, but for the good of all the children in this city I shall gladly support and vote for the issue of these bonds and increase in taxes.

Let us give the educational advantages to the children of this age, that we older ones did not have.

F. W. Rathjen.

As a taxpayer I heartily endorse the proposed school bond issue, and commend the \$1.00 rate;

First, because I realize that the future growth, yes the stability of our nation is dependent upon the permanency of our educational system, and second, specifically, because our school is Clarendon's greatest asset, and to inhibit its growth and curtail its support (by not supplying sufficient funds for its needs) would be beyond question prove an irreparable loss to our fair city, an to its every citizen.

B. L. Jenkins.

Why I favor a school bond issue: If we keep abreast with the educational advantages of the present day we are compelled to have more money for better buildings and equipment. Our town and children have a right to the very best and this is the only way to get in

the front ranks—good schools, good churches and good roads means progress in every sense of its meaning.

Matt Bennett.

I shall vote for the school bond issue also the tax rate of \$1.00, because conditions in Clarendon at this time demand it. The buildings now on the ground are inadequate, hence we must have additional buildings, and to meet the interest and sinking fund, additional money must be raised. Finally we favor the bonds and additional tax, because our material wealth and prosperity our reputation as a city of culture and refinement, all demand better schools, and better school equipment.

Tom F. Connally.

I have been asked to write my opinion on the bond election to be held soon. I will vote for the measure, first, because I am interested in making our public school as good as there is in the country; next, because a representative of the trustees tells me that it will be absolutely necessary to carry out this plan or a similar one in order to properly care for our school. I am sure that these men have studied it first hand, are giving their time without stint and without remuneration and can have no other motive than the best interest of the school and community at heart, I am going to vote with their judgment in the matter.

G. S. Slover.

I am in favor of the school bond issue upon general principles, too many to attempt to mention.

S. W. Lowe.

H. C. KERBOW, senior member of the Kerbow & Sons, Hardware Co., another large tax payer favors the bond issue and increased tax rate "for reason that he wants good schools in his town. Has no children of his own to send anymore but wants to see his neighbor's children get a good education."

M. M. NOBLES favors the bond issue and increase in tax rate "for reason that its the cheapest way in which to educate his children."

J. W. WATTS of the Shelton, Watts & Stanford grocery firm is in favor of voting the increased tax rate and bond issue "for reason that he favors good schools. He says that he has not sent his child to the public school because of the present overcrowded condition."

R. L. BIGGER, prop. of the Allen's Garage, another big tax payer "says yes I am in favor of the bond issue and the increased tax rate for you cannot do too much for the KIDS."

R. A. LONG, Prop. of the Long Drug Store when asked why he favored the bond issue and raise of tax rate had this to say: "Our public schools affect every home in the district whether they have children or not. Those who have no children would not stay here if we did not try to educate the children of our community. We cannot educate the boys and girls without equipment and we must have the bond issue, to get the equipment. Then again Clarendon does not and cannot afford not to take the same forward step that almost every school district in Texas has take or will take in the next few months."

HOMER MULKEY, another large tax payer, favors the increased tax rate and bond issue "for the same reason that he favors all other progressive movements, especially does he favor this movement because the so essential that children be educated."

M. H. SALMON, says that "he expects a large increase in population therefore he favors the bond issue and increase in tax rate, so as to make preparations to educate our children."

and increase in tax rate, so as to make preparations to educate our children."

DAVE JOHNSON, says, "I favor the increase of the tax rate and the bond issue, because a good school must go forward or backward and I want Clarendon schools to go forward."

CHAS. BALDWIN, favors bond issue and increase of tax rate to \$1.00 "that it may give greater educational advantages to a great number of lives, that they may be of greater use and power in the world while living."

JOE M. WARREN, says, "I am for the bond issue because our public school and college are our drawing cards and the towns best asset."

P. A. BUNTIN, another big tax payer says "I have no children to send to school now but favor the bond issue and increased tax rate for I want my neighbor's children to have a good school to go to, also I have noticed that a good school makes a good town and a good town demands a good school."

E. T. POPE of the Clarendon Mercantile, another large tax payer, favors the bond issue an increased tax rate "for reason that all children should have the advantage of a good free school and that good schools are an index to a good town and he wants Clarendon to be a real good one."

Education gives man a broader vision, makes the business world more congenial, enlightens the world and makes it a better place to live. We always vote for better schools.

Hayter Bros.

I am in favor of voting to raise the amount that may be assessed for school taxes from the present maximum of 50c on the one hundred dollars to, not to exceed one one dollar on the hundred dollars of valuation.

Money spent on the education of the future citizen is a guarantee of the future strength and greatness of the nation.

W. H. Patrick.

That our children of this generation may have what they should have in modern education, I heartily favor both a bond issue to erect and equip modern school buildings an adequate taxation to maintain a school with all modern branches equal to any, anywhere.

Bonds spread the amount out over a long term of years and future generations, our own children who get the benefits, can help pay for them, as they have the benefit of the buildings and the elevated citizenship, but the expenses to maintain our schools must be met by us each year by taxation. Let us maintain the very best for our children—economically administered—and then honestly pay our bills for them, which is the best possible investment for them, or for our community or any community-state-nation.

A. M. Beville, Sr.

Third, because the plan of the board of trustees in the expenditure of the proposed seventy-five thousand dollars, is such that it will meet the demands of the future as well as the present, and the bonds being of a forty year denomination the liquidation of the debt will thus be distributed over a period of time that will not make the tax a burden, and will equalize the payment of the tax upon all who derive benefit from the expenditure in the future as well as the present. Education without the investment of individual time and money is a physical impossibility.

O. C. Watson.

H. W. TAYLOR, the largest individual school tax payer, says, "he favors the bond issue and increased tax rate, because present buildings are inadequate for present needs and if we maintain good schools, we must provide more room an equipment. He has no children of his own but has grandchildren and neighbors that he wants to see get a good education."

"I am going to vote for \$1.00 assessment school tax and the school bonds for reason that this is the greatest asset we have. We are able to finance it. No one will ever miss the money it costs for the return is more than 500 per cent.

T. M. Little, Sr.

I am in favor of the seventy-five thousand dollar school bond issue and the increased tax limit. First, tal principal upon which moral, because education is the fundamental character and good citizenship is built, and the imparting of this great principle to the present and the oncoming generation in the right way is utterly impossible without the necessary and adequate equipment and facility of our schools.

Second, because no individual will think deeper or live higher than he or she has been capacitated to do so by education and no community can progress beyond the thinking and living of its individual citizenship.

J. H. Rutherford.

RECORD COAL YEAR

A new record for production of bituminous coal was established in 1918. Official figures of the geological survey, supplemented by an estimate by the National Coal association, place the total production at 587,500,000 tons, an increase of 37,600,000 tons or nearly 7 percent over 1917, which also was a record year.

The nation's war-time demand for coal, the heaviest in the country's history, has been met in full. The raising of this banner tonnage during 1918 also virtually insures the country against a repetition of the shortage of coal last winter.

The year's record tonnage has been mined, under the spur of war-time necessity, with fewer men, generally, in the coal mines of the country than during 1917. Reports from virtually every producing coal section indicate that no fewer than 100,000 mine employees entered the military service during the year, approximately 80,000 through the operation of the draft law alone.

AT THE CHRISTIAN CHURCH WEDNESDAY EVENING

The Bible lesson and song practice was held at the Christian Church Wednesday evening. These lessons are becoming more and more interesting the further they go. The man or woman who wants to live a Christian life should not fail to hear every lesson. The sinner should hear them for it teaches them grow to Him. Each one is one how to find Jesus Christ and given time to take down the Scripture before passing it so all can have the lesson at home if wanted to look over it again. A great deal of interest is being manifested in these lessons and all seem to enjoy them. The song service was also a good feature after the lesson was given. The church has just purchased new song books and will soon be ready to give the very best of music at each service. The church is getting ready for a revival meeting which will be held at an early date. It will make the song service an interesting feature of the meeting.

**"BUNDLE DAY" FOR NEAR EAST RELIEF A SUCCESS**

A call came to the people of this city, just as it went to the cities and towns all over the country, to "get the skeleton" out of the closet, and give it an airing and rid oneself of the nuisance of it. The call was answered liberally an spontaneously. The chairman wrote letters to the various women's auxiliaries of the churches and, as of old, they did the thing right. We were requested to send two hundred pounds, and the bundles have weighed out nearly three hundred and fifty.

Your kindness will be appreciated. Your support is appreciated already. But you will receive your greatest thanks in the consciousness of there being warmth for some body that would otherwise be very cold next winter. Thank you.

**SIXTEEN BENTS OUT OF THE CANADIAN BRIDGE**

The Denver road is suffering considerably itself from the heavy rains of late. It is reported that sixteen bents in the Canadian bridge washed out Monday. Wednesday No. 7 north bound passenger, which arrives at 10:40 here, was about eight hours late on account of track being washed out down the line.

**Little Life Lines** By W. H. F.

And, too, it might be well to say that a fellow shouldn't introduce his sister to another fellow he wouldn't want his sister to marry, and a fellow shouldn't want to go with a fell, he wouldn't want to introduce to his sister. It's June, you know.

**SANTA FE ANNOUNCES CUTS IN CARRIER CHARGES ON COMMODITIES**

Freight rate reductions will be put in effect soon on numerous commodities that are shipped from California to points in the Texas Panhandle, according to an announcement of T. B. Gallagher, general freight and passenger agent of the Panhandle and Santa Fe Railway Company. The reductions are largely on rates on shipments of food products and range from about 15 cents to 84 cents per hundred pounds.

According to Mr. Gallagher the proposed rate reductions are to be put into effect as soon as the Pan handle and Santa Fe road can make the necessary arrangements with tributary lines.

**INFANT SON DIES**

The infant son of Mr. and Mrs. O. W. Latson died this morning. The little fellow has been ill for some time.

**SWAT THE FLY**

"Be a 100 per cent fly swatter!" "Swat till it hurts!" (This refers, of course to the fly.) "Never put off tomorrow the fly you can swat today!" "You will swat a fly eventually—why not now?" "America expects every fly swatter to do his duty!" "Invest in a fly swatter today!" "Swat and the world swats with you; trust the fly paper and you see alone!" "The fly knows swat's swat. Do you?" (Rather catchy, this last one, if you get what we mean.) "Say it with swatters!"—From H. T. Phillips, St. Paul Dispatch.
