Clarendon Is Hub For 3 Highways

Each year as the number of tourists continue to increase, competition for this tourist traffic becomes keener among the cities and the various highway associations. There is probably no other industry that brings as much out-of-town money into Clarendon as our system of highways.

During 1953, over a million cars came into Clarendon on Highway 287. Even assuming that we get only one dollar from a fourth of those cars, it means an income of \$250,000.00. U. S. 287 is the highway that stretches from Fort Arthur, Texas to Yellowstone National Park and crosses every major east-west highway. During 1948 this road brought 2,800 cars into Clarendon every twenty four hours. During 1953, due to additional advertising, this daily traffic count had increased 31% to 3,110 cars. Billboards located at strategic points and strip maps distributed along the route have accounted for much of this increase and the advertising program is only just beginning. It takes time and money, but of which must be furnished to the towns receiving benefit from the increased traffic.

After several years of planning, another U. S. highway through Clarendon has been designated. U. S. 366, from Oklahoma to Hedley, Texas where it joins U. S. 287 and runs north to Amarillo. It is estimated that this designation will increase traffic through Clarendon at least another 2000 cars every day.

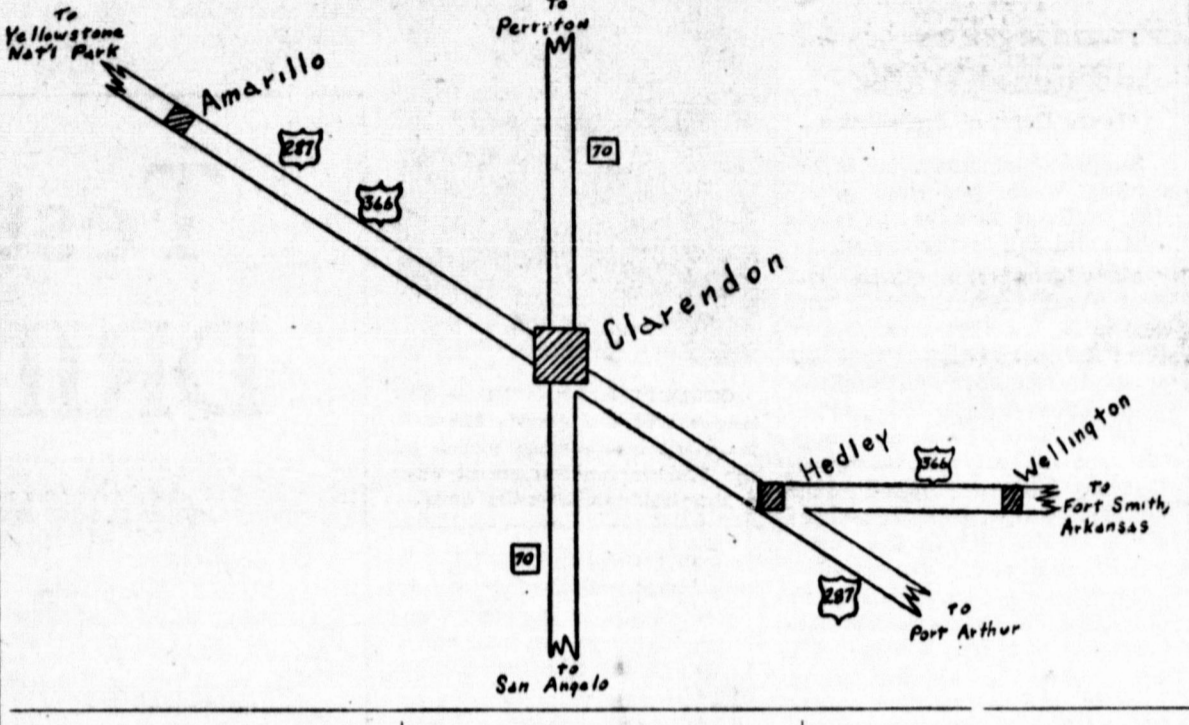

State Highway 70 is one of the longest in Texas, beginning at San Angelo, and going north through Clarendon to Pampa, across the Canadian River, and joining U. S. 83 at Perryton. All remaining gaps in this road are now under construction and will be open all the way by early 1955. This means a brand new trade territory for Clarendon and a direct route from lower Texas to the oil fields of Texas and on north to Canada. With proper advertising, this highway should add another 2000 cars through Clarendon, thus giving us a total annual traffic count of over 2 1/2 million cars.

Dist. Ten Brotherhood Rally To Be Held Aug. 16th at Borger

"The Needs of the World In Evangelism"—Dr. P. D. O'Brien.

More Good Rain Falls Over Most of County

More good moisture was received over most of Donley County late Saturday afternoon with one area receiving some damaging hail. The area receiving the most damage was a strip west of Martin that extended northwest of Ashtola. This same area received the heaviest rainfall which was reported between 2 and 3 inches. The same area received another good shower Tuesday afternoon while we were receiving a light shower here in town.

Most all communities reported over an inch with the exception of Lelia Lake where Willard Knox reported only .48 inch. Here in town, Joe Goldston measured out 1.27 inch. The Hedley area was reported to have received a good rain but the extreme east side of the county received only a small amount. Around two inches was reported from the JA Ranch headquarters and Ben Lovell reported 1.15 at Ashtola.

Farmers in the areas receiving the most moisture reported crop prospects very good with an average feed and cotton crop in sight with the moisture received to date.

Providing For Additional Water

Texas Dept. of Agriculture

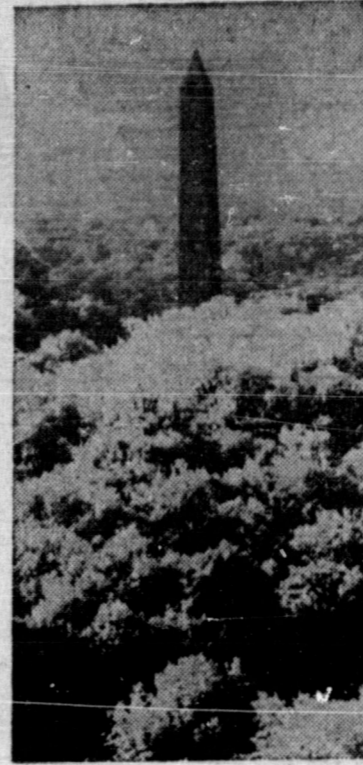

Supplemental irrigation is becoming more important every day to Texas farmers in areas where rainfall is decreasing.

Many growers in central and East Texas are considering irrigation for the first time. Out in West Texas and the Panhandle area, the number of irrigation wells have experienced a tremendous boom in post-war years. The use of supplemental irrigation has increased greatly the yields of cotton, corn, vegetables and pastures even in the more humid areas of the Southwest.

Farmers who plan such systems may hit some snags but the results will be worth the effort. It's best to get a permit for water used in irrigating. The State Board of Water Engineers, 308 West 15th Street, Austin, will send the necessary forms and instructions for making application.

If you have a permit, you'll be safe in the event a workable water code is put into effect. If you use water and deprive a man downstream of essential water, he can get a court injunction to stop you. You can do the same, if you're being deprived of water. Size of your reservoir will depend on several factors. A good rule of thumb is: Provide at least 2 acre-feet of impounded water for each acre to be irrigated, if you are planning surface storage.

Surface reservoirs and spring-fed branches probably will be more economical sources of water supply than water wells in East Texas. Cost of lifting water from source to delivery point must be considered when anticipating operating expenses. The greater the lift, the greater the cost. Initial equipment investment will vary with systems, ranging from about \$35 per acre to \$125 per acre. About \$90 is average in many sections of the state.

OBJECTIVE SIGHTED — The long eye of the Army's 100-inch infra-red lens camera picked up the Washington Monument from a Maryland site 20 miles away.

Frequency of applying water will vary according to rainfall and type of soil. Generally speaking, sandy soils require about 1.2 inches of water every 6 to 8 days. Heavier soils, 2 inches every 10 days.

Pumping rate also should be considered. To apply one inch of water to an acre of ground, a pumping rate of at least 450 gallons per minute is required.

Daisie Castel of Paso Robles, Calif. visited last week with her sister and husband, Mr. and Mrs. Clyde Putman, and her mother, Mrs. S. P. Wells at Memphis.

Mr. and Mrs. Herman Cross and Annette visited during the week end with her parents, Mr. and Mrs. E. F. Lemons of Memphis. Other visitors were Mrs. Scott Lemons of Farmington, N. Mex., Mrs. Wilson of Espanola, N. M. and Mr. and Mrs. Zeno Lemons and children of Memphis.

MYSTERY FARM NO. 51

This ranch home was identified by 79 persons last week as the Tom Murphy place located 2 miles southwest of town. Mr. Murphy came in to make positive identification and receive his free picture.

Tom Murphy is the owner of this 160 acre stock farm and has lived there the majority of his life. The "Murphy Castle" as it has been known for a long number of years, was built by Mr. Murphy's grandfather, the late D. J. Murphy, in 1900. It was the show place of that time and was a prominent landmark as it could be seen by old-timers for miles away. This stock farm is a part

of a 8,600 acre ranch that was formerly owned by Tom's father C. D. Murphy and his uncle, W. A. Murphy. At the time the Murphy Castle was built there were only around ten houses of any size in Clarendon.

Mr. Murphy married Julia Taylor, daughter of Mr. and Mrs. W. W. Taylor, in 1923. Both are natives of Clarendon. They have three children: Alma Hunsaker of Albuquerque, N. M., Tommy Murphy who is with an Amphibious Tank Unit in Japan and Pat, aged 12, who is still at home. They are members of the Methodist Church. Mr. Murphy's hobbies are fishing and golf.

THE LION'S TALE

By Carl Allmond

The monotony of our summer luncheons was broken Tuesday by having a new Boss Lion, and an unusual and varied program. Bill Lowe, First Vice-President, served as Boss Lion in McCully's place. No one knows the reason, unless it was that McCully wanted to sit out with the rest of the cattle. It could have been to get Bill in the practice of talking on his feet; most of the time he is talking on his law.

Getting down to the good part of the meeting—the program; (the food is always good). Lion Drennan presented Mrs. Dick Shelton, who introduced the program as well as taking parts herself, the first being her interpretation of "Friendship Casserole" taken from "Butterfly Dust" by Jenny Harrell Rogers of Donley County. Mrs. J. L. McMurtry accompanied Mrs. Shelton when she sang "It is No Secret," written by Stuart Hamblin, former Donley County resident, and "Deep

Purple". David Francis and Wayne Tiner assisted C. R. Orr, pantomime artist, who gave these numbers: "What it was, was Football", "A Dear John and Marsha Letter", and "The Basketball Game." Mr. Orr also entertained us with a Blues medley, at the piano. (Good too). Thanks Program Chairman Drennan—bring this group back again!

Tuesday's guests were: Wesley Knorpp, Allen Homer Estlack, and David Willis of Southwestern Life, Amarillo.

RETURNS HOME
L. E. Thompson returned home Thursday after a months visit with his sons, Mr. and Mrs. Neal Thompson and family at Stockton and Mr. and Mrs. Ernest Thompson at San Francisco. He reported nice cool weather all the time he was gone. One of the highlights of his trip was salmon fishing about 20 miles out from Frisco on the ocean where each of the party caught nice size salmon. Neal caught one that weighed 25 pounds and it sure made nice steaks, Mr. Thompson added.

Albuquerque, New Mexico—We are writing this from the home of our brother-in-law out in the Land of Enchantment, or so it is called. This being the same relative who usually brings in the beans. When he failed to deliver the produce on time we decided to come by and get even with him for the steaks we had fed him lately.

To tell the truth this was a bread and butter stop on the way back home from our trip to the cool colorful mountains of Colorado. These bread and butter stops with your folks is where you drive 100 miles out of your way to save buying a meal or two. You always feel like you are ahead until as in my case the brother-in-law comes by to get even.

Anyway, this was one of our first trips to the mountains and we want to say first and last and in between that we liked it; we loved every minute. One thing we can't explain about these trips to the far back in the hills country is why we work and slave our lives away to get all the modern touch a button conveniences and then save our money for a year so as to take a trip to some far back place where we have none of these things, but as we say we loved every precious minute of the trip. But enjoy it as we did, last night when we took our first tub bath in over a week we decided instantly to not have our modern plumbing taken out for the time being.

Speaking of Cool Colorful Colorado we won't argue with them about the statement. High up in the mountains west of Creede it is sure enough colorful and cool is hardly the word for it. When it takes four blankets at night in August we could very near call it cold.

Anyhow, several have asked that we tell about our trip, and trips are sort of like a recent operation we just can't help but talk about them. In the first place we can't get very lonesome out that way because just about half of all the cars are from Texas. It is the truth whether you drive down the highways of New Mexico or Colorado just about every second car bears a Texas license. As we notice how many there are traveling in these parts to enjoy a cooling off we can't help but wonder if this has anything to do

with the coolness of many of the natives along the route toward us. Perhaps they may have their justifications as we may not all behave as we should. Many of the folks are wonderful toward us and of course we Texans enjoy meeting up with each other.

Speaking of getting a far piece back in the country one is pretty well away when he gets to Creede and vicinity, but when you go some thirty to fifty miles somewhat west things are really back to nature. Two miles above sea level this country justifies the name Cool, and there are enough mountains to stock the whole nation with them.

On one of our side trips we visited Lake City. This beautiful old mining town located in a mountain valley just down the mountain from Slumgullion Pass has a lot of history. One story tells about five prospectors who came there in the early days before the town was and became stranded and snowbound for the winter. Only one fellow named Packer survived. He did so by eating his four companions. In the spring he came out sleek and fat, according to the story. They have a monument to the victims and have sold millions of cards telling the story.

Whether the story of Packer is true or not; whether he picked his companions clean to the bone, there has been many a tourist cleaned of several dollars lured by the story to visit this town; not that it isn't worth it, for it is a nice trip.

This story takes on a lot of variations. One yarn going the round is that these five first settlers were Democrats and that when one of them ate up the other four and the remaining one was sent to prison for life that this accounts for the scarcity of Democrats in the state. Some of the Republicans claim that in this way they eradicated them early to stop the infestation. Anyway, the state seems to be run by the Republicans, or at least the ones we talked to seemed to lean that way. Just wonder if the reason they sometimes treat us a little cool is because of the fear that some Texas Democrats might decide to settle there.

Speaking of the roads being filled with Texans, we met dozens that we either knew or almost did. There was the nephew of the Longbine's a fellow whose name was Phillips, I believe. Some of them like a fellow Johnson from Sayre we almost drummed up kin-folks with. Then from right around home we had the Forrest Doshiers, the James Gunco's, Jones Christians, and our neighbors the Lloyd Nelson family. Lloyd and his family, including Karen Stephenson lived just about next door. This helped because from them we could borrow

everything from a toothpick to a square meal. Also, it gave me an opportunity to prove the results of old fashioned worm fishing such as I knew with all the modern devices. I lost. But I did catch fish and on a worm. For now we better stop but if we can still remember the details we will tell more later.

"It Isn't The Town, It's You"

If you want to live in the kind of a town, The kind of a town you'd like, You needn't slip your clothes in a grip

Or start on a long, long hike; You'll find elsewhere what you left behind,

For there is nothing that's really new.

It's a knock at yourself when you knock your town; It isn't your town - - It's you.

Real towns are not made by men who crab

Lest someone else gets ahead; When everyone works and nobody shirks

You can raise a town from the dead.

And if you will only pray for your town

Your neighbor will say a prayer, too.

Your town will be what you want to see.

The trouble isn't the town, it's you. Signed I.M.P.

GABIE BETTS BURTON
LIBRARY NOTES
 By May L. Prewitt

We have "The Arts of Living" dedicated to the memory of Mrs. G. F. Leathers by Nettie Sims. This book is compiled by Vogue. It deals with The Arts of the Mind—arts of Living With Oneself—Arts of Living With Others. There are sub topics under each of these groups.

A copy of Robert Hicken's "The Power To Kill" was given us this week. While it is not recent—yet it is good reading. Jane Lowe gave us "The Mercer Boys' Cruise in the Lassie" for the Boy's shelf. We have several of these books by Capwell Wyckoff. The boys enjoy them.

Our magazines for August are rather punctual this month. We use an exchange plan that aids in replenishing without spending very much cash from the Library funds.

The children are very nice to bring us their books as gifts when there are not younger children in the family to use them. A Bobsey Twin copy was given this week. Children enjoy being generous, it seems.

CARD OF THANKS
 Thanks for the lovely cards, letters, visits, gifts, flowers, prayers and work. All helped so much during my recent illness. Mrs. W. C. Ragan.

Jerry Allen visited the week end with Larry Paulk in Amarillo.

Hedley Defeats Dusters 15-10

It looked for awhile Sunday that the game between the Dusters and Hedley would have to be called off but by three o'clock the field had dried enough for the game to get underway, although it was a little slippery in spots.

The game rocked along on a fairly even basis until the sixth when several Duster errors let the Hedley boys go ahead with a good margin that the Dusters were unable to overcome. Gene Putman helped the Dusters' score in the fourth when he banged out a homer with two on and Don Loyd whammed one out in the 6th with one on.

Hedley scored two in the 1st and the Dusters tied it up and went ahead three runs in the second; Hedley came back with two in the 3rd and three in the 4th, and the Dusters made three in the 4th which tied up the game. Hedley pushed one over in the 5th and four in the 6th and another three runs in the 9th; the Dusters came back with two more runs in the 6th on Loyd's homer but that was all they could muster before the game was finished. Neeley was the winning pitcher and B. F. Dorman went all the way on the mound for Clarendon.

Farmers Urged To Keep Close Watch For Insects

After the showers this week county agent H. M. Breedlove is urging all farmers to keep a close watch of their cotton fields for insects. Breedlove says to be sure to look under the leaves and watch for small white eggs about as big as a mustard seed; this is the boll worm egg. Check around the shuck on the small boll and look for small worms; if any of these are found, it is time to spray.

Be sure to check your fields every other day and keep a close watch because one day can make a big difference in cotton insects. The county agent urges that any one who needs help to call by his office.

Time For Planting Austrian Winter Peas Also Vetch and Rye

The showers this week make things look better for the fall legumes and rye planting says county agent H. M. Breedlove. The later part of August with sufficient moisture is the time for planting Austrian Winter Peas, vetch and rye. Breedlove urges that Donley County farmers plant winter legumes for soil building and rye for cover crops. There is a payment to assist you in these practices at the ASC office and if the moisture is favorable the later part of this month, it will be the best time in several years for winter legumes and rye.

Mr. and Mrs. Melvin Vick and Robert of Panhandle had lunch with her parents, Mr. and Mrs. Carl Naylor Monday.

Don't Gamble With Fire

In an effort to help prevent more damaging fires in Clarendon, City Fire Marshal Geo. L. Green, is making other suggestions this week pertaining to the home as well as business places.

He pointed out that electrical wiring was one of the foremost causes of fires and stated that the wiring in so many homes was out dated and overlooked and should be checked by a licensed electrician. When a small wire is overloaded it can start a fire very easily. Wiring that was placed in homes built 25 to 40 years ago are inadequate in most instances to carry the load of modern electrical appliances.

He pointed out too that all closets and other storage spaces should be kept clean and all fire hazards removed, and those using inflammable cleaning fluids should get out in the open to use such as fires caused in this manner cause much damage and loss of life.

Your insurance rates are based on the amount of damages paid out by insurance companies for fire losses. Don't gamble with fire as you may be the loser, Green concluded.

Pete Land Appointed New Member FHA Committee

Alton (Pete) Land of Rt. 1, Clarendon, is the newly appointed member of the Donley County Farmers Home Administration committee, James D. Gouldy the agency's county supervisor announced this week. The appointment became effective July 1, 1954.

Mr. Land operates a general farm in the Martin Community.

The other two members of the 3-member committee are Dennis Lindley of the Chamberlain Community and Robert H. Couch of Hedley.

Each member is named for a 3-year term, and one appointment expires each year. No member completing a 3-year term can succeed himself.

Each agricultural county in the country has such a committee

to help the Farmers Home Administration county supervisor adapt the agency's loan policies to local conditions including farm credit needs.

During the past year the county committee for Donley County has approved approximately 175 loans.

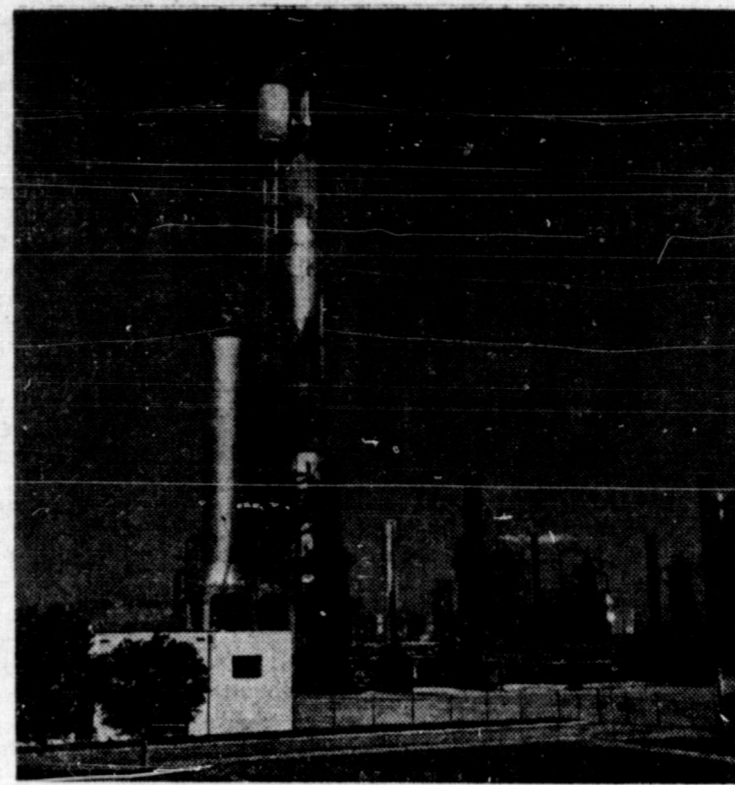

The Farmers Home Administration makes loans to family-type farm operators to buy, improve, or operate efficient farms, or to construct or repair farm water facilities needed for profitable operation. Special livestock loans are made where temporary credit is needed to enable the operator to remain in operation. The agency also makes emergency loans in counties or States that have been designated by the Secretary of Agriculture as areas where emergency credit is needed. However, the agency does not make loans of any type to any applicant whose needs can be handled by other credit sources.

Before any money can be borrowed through the agency, an applicant must have the approval of the county committee. In the case of a farm ownership loan, the farm to be purchased, enlarged, or improved must also be approved by the committee, the county supervisor explained.

Shamrock Oil Co. Observes 25th Anniversary

A success story typical of free enterprise working in a competitive environment was celebrated August 9 when The Shamrock Oil and Gas Corporation observed its 25th anniversary.

Born in 1929 in the early boom-and-bust days of the Texas Panhandle Field, Shamrock struggled to survive through the economic depression until its reorganization in 1935. From its meager beginning as the holder of a few

"Nothing to Sneeze At"

This year our town decided to do something about its hay-fever sufferers. Hap Thomas is our health officer, so he was made rag-weed "inspector."

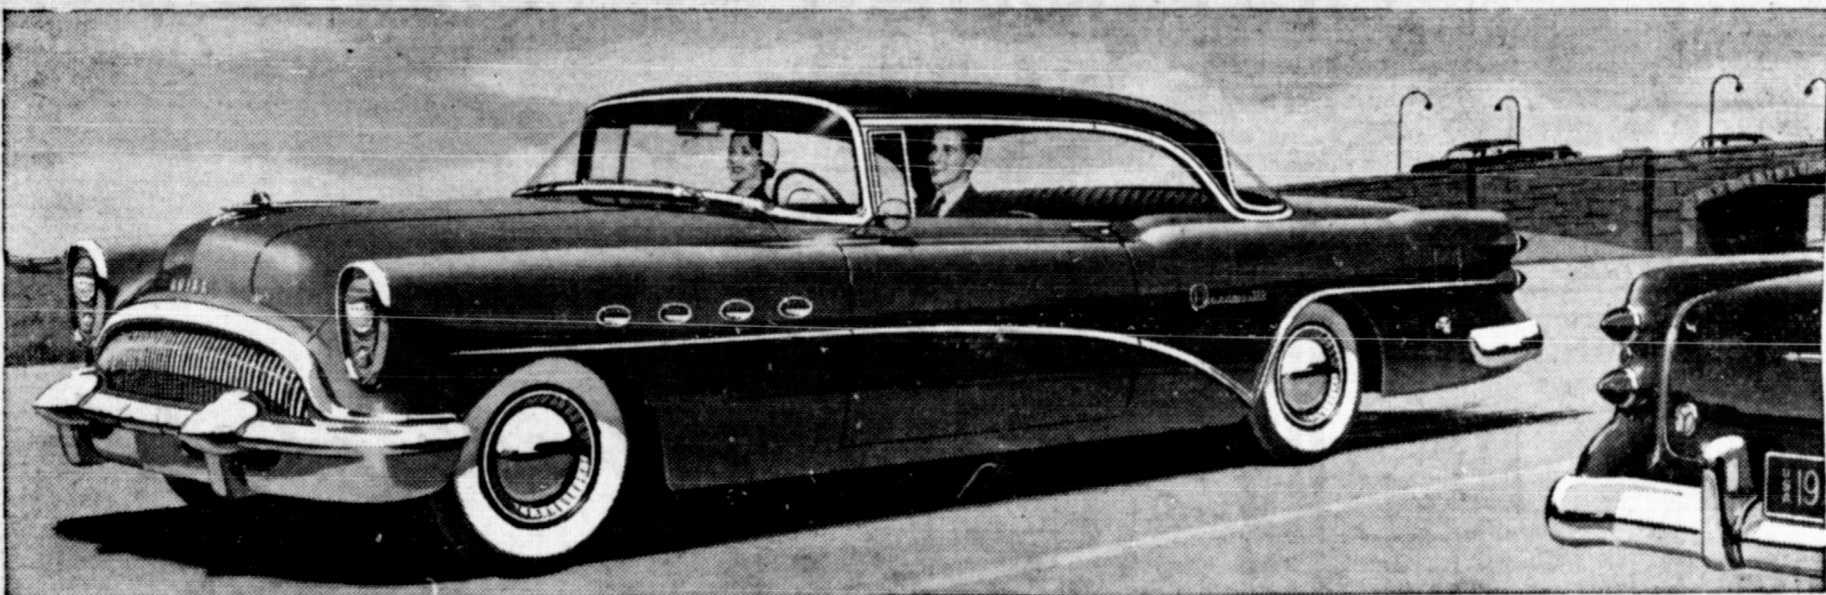

"Can't see why anybody should be bothered by a few weeds," he snorted. "I say it's all in their minds." But Hap went on out to do his job.

Then, yesterday, I met Hap—looking kind of sheepish. His eyes were red and as he took out a big handkerchief, he sneezed. "Know somebody who isn't allergic, who'd like a job?" asks Hap.

From where I sit, I can sympathize with Hap. It's no joke. But as Hap admitted later, he was dead wrong in scoffing at the idea of hay fever. Making light of other people's ideas and opinions is a familiar trouble with a lot of folks. Whether it's hay fever, football or a choice of, say, buttermilk or beer as a thirst-quencher, I'm just naturally "allergic" to anybody who "knows-it-all!"

The hit that's changing the sales standings puts you way ahead 3 ways

THIS year Buick has done what no other car has done in more than a generation.

This year Buick has moved into the lofty circle of America's three top sales leaders—a circle once dominated only by the so-called "low-price three." For today, Buick is outselling all other cars in the nation except two of these "low-price three." And each new month's sales figures strengthen Buick's new sales leadership.

You can't do better—if you want the best buy for your new-car money—than to look into the soaring success that is Buick today. You'll find this glamorous new-day beauty puts you way ahead in three important ways—that's for sure. So drop in on us—tomorrow at the latest—and see for yourself that Buick is the buy of the year, hands down.

1. More new car for your money

Buick prices start close to the lowest—just a few dollars above those of the traditional "low-price three." But those few more dollars for a Buick get you a lot more auto-

mobile—more room, more comfort, more V8 power, more ride steadiness, more solid durability—plus the advanced "tomorrow" styling that has taken the country by storm.

2. More money for your present car

With our great and growing sales volume, we can offer you a bigger trade-in allowance on your present car when you buy a new Buick. After all, the more new cars we

sell, the better deal we can make with you. So you get the benefit of our great success in the form of a higher trade-in allowance.

3. More dollars when you trade

Because Buick's broad panoramic windshield has started a whole new styling trend, you can be sure that today's Buick

will keep its modern look for years to come. So you are assured of a higher resale figure when you trade it in later on.

Come see for yourself why—

TO THE PEOPLE OF THE 18TH DISTRICT

By Congressman Walter Rogers

July 30, 1954

ELECTION DAY

The fourth Saturday in July every two years is the main reason that Texas will never tolerate Communism in any degree, or any other dictatorial government or force that denies the people the right to express their desires in a loud, clear voice at the polls. The people just wouldn't stand for interference with election day, and especially election night,

when the returns begin to pour in. I had thought that I would have to vote absentee, since Congress was still in session and several important matters were pending in the Senate that could come back to the House at any moment. However, a filibuster started over there, which created the breathing spell I was looking for, and I immediately took off for the Panhandle. The House was still in session, and I knew that I would be shown with a few absentees, but the call of the Plains was too strong. I wanted to be home on election day, and I was home. To the people of the Panhandle, I want to express my gratitude. I wish it were possible for me to come to each of you and do this personally. I shall al-

ways strive to merit the confidence and trust with which you have honored me.

I only wish that I could have brought the family home with me, but the trip was a whirlwind one that gave me only three days at home. Those of you with families know that it takes that long to round up the kids to get started on a trip.

THE CONGRESS IS NOW PROTECTED

The House passed a bill yesterday on a voice vote that I voted against. It was a bill that created a Capitol Police Force and provided that a uniformed and armed member of that force would be in each of the galleries of the House. The entire debate supporting the bill was centered around the Puerto Rican shooting of March 1, when several of the Members were hit. In other words, now that the horse is gone, we are attempting to close the barn door. Certainly the March 1 tragedy should never have occurred, but it did. It was only by the grace of God that a number of us were not killed. If, in the future, the same type of fanatic should again appear in the gallery and follow the identical procedure followed by the Puerto Rican woman and her stooges, I daresay that the results would be just as bad, if not worse. Probably the only difference would be that an armed officer would slay the assassins before they could get out of the gallery. This, of course, would not bring back to life any Member of Congress who had been slain by such a fusillade or some innocent bystander in the gallery who might be hit by the bullets of the fanatics or the armed officers. None of us want to be shot at, but I do not think the American taxpayer should be saddled with a cost for a service that will not provide the result sought. The degree of fanaticism or mental instability that would prompt an assassin to fire upon the Senate or the House of Representatives is such that he would not be deterred by the presence of some uniformed and armed guard. Our government is a civil government, and our Congress is supposed to be constituted of civilians elected by the people. I do not believe that the wearing of a uniform and the bearing of arms inside the House Chamber will be conducive to the best interests of this nation. I would much prefer to run the risk of being shot at than to see even the faintest shadow of a police state cast across the chambers of our legislative bodies, national, state, or local.

THE RUSSIAN APPROACH

The Russian approach in the battle for the minds of men was vividly portrayed in a recent discussion concerning the Trust Territory of the United States. As I pointed out in a previous Newsletter, this is a territory composed of a number of islands in the Pacific, scattered over an area larger than the United States. The land mass of this entire territory is equal to about half the state of Rhode Island. It is on some of these islands that the atom and hydrogen bomb tests have been made. When the general report on the trusteeship of the United States in handling these islands was given to the United Nations, Russia, together with two other nations, raised quite a stew. Instead of taking the facts as they were and could be proven, the Russian delegate mixed these with a lot of insinuations, innuendoes and half-truths and then strained from this mass all of the truth and the facts. What he finally came up with was the argument that the United States was destroying these islands and the peoples inhabiting them, one at a time, and was, therefore, undertaking to obliterate an entire people. The ends to which these Reds will go to warp the minds and control the thoughts of men is utterly fantastic. Needless to say, the Russian approach did not prevail, and the Reds, as usual, were in the minority when the final vote was taken.

proposing an amendment to the Constitution of the State of Texas by adding Section 16a to Article VIII to provide that in counties of less than ten thousand (10,000) inhabitants, as determined by the last preceding census of the United States, elections may be held to provide for an Assessor-Collector of Taxes; providing for submission of this Amendment to the voters of Texas; and providing the time, means and manner thereof.

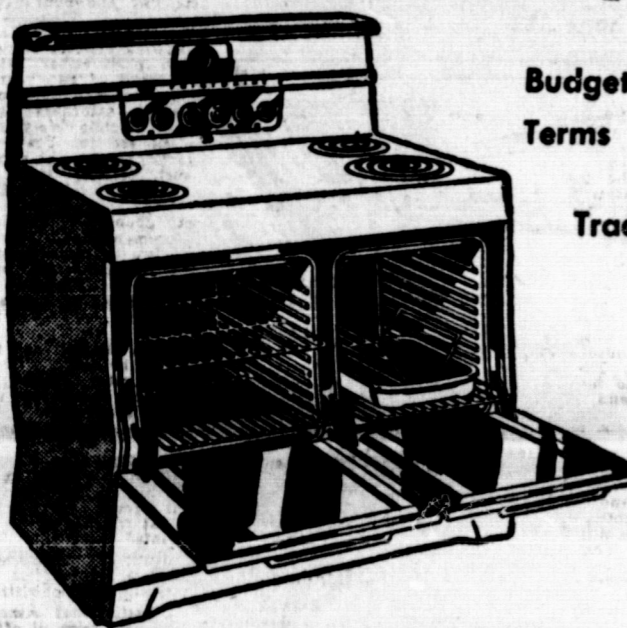

RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

"AGAINST the Constitutional Amendment permitting elections in counties of less than ten thousand (10,000) inhabitants to provide for an Assessor-Collector of Taxes."
If it appears from the returns of said election that a majority of the votes cast are in favor of said Amendment, the same shall become a part of the State Constitution.
Section 3. The Governor shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State.

Lyndon B. Johnson U.S. SENATOR

Atomic Energy Bill. As I write this, it is not clear just when adjournment of this session of Congress will come.

I wholeheartedly approve of the principle of full discussion of any proposed legislation. I have been disturbed by the fact that the extended debate on the Atomic Energy Bill, accompanied by day-after-night sessions of the Senate, delayed our taking up measures of great importance—such as farm legislation, social security, foreign aid, and others.

It is to be hoped that a final rush for adjournment will not result in these serious questions being given inadequate consideration.

SMALLER DEFICIT:
The Federal Government operated at a deficit during the 1954 fiscal year, which ended June 30. Expenditures outran receipts during the 12 months by \$3,029,000,000. The deficit was smaller than it has been during recent years.

Actual expenditures were cut \$6,500,000,000 under the level of the 1953 fiscal year.

Tax cuts approved during the present session of Congress are estimated to total approximately \$7,500,000,000.

DEFENSE EXPENDITURES:
Proper economy in the conduct of the Government is greatly to be desired, of course. But some observers feel that the Administration has cut too deeply into expenditures for defense.

Outlays for national security programs mounted to \$46,200,000,000 last year. That was a reduction of two and one-half billion dollars.

According to a statement from the White House, this cut reflects greater economies in operations, re-examination of military plans, reduced stock levels, less Atomic Energy Commission spending, and delay in the delivery of materials for stockpiling.

Only history can show whether the reduced military expenditures in this period of continuous world turmoil were justified. Certainly it is of the greatest importance that we remain strong. In the military and economic strength of the United States lies the only hope of maintaining freedom in the world.

WE MUST BE READY:
A horrifying example of the perils we face in these times was given by the action of the Chinese communists in firing on American aircraft engaged in searching for possible survivors of the Cathay Pacific Airliner shot down by the communists.

We seem continually poised on the brink of disaster. When the first announcement came of the attack on our aircraft, I made a brief statement in the Senate, pointing out that this is a time above all times for Americans to unite.

"The Chinese communists are shooting at our men," I pointed out. "There can be no partisanship or divided loyalties on such an issue."

"We must await the facts to determine the next step. But meanwhile, we must also resolve to be cool, decisive and ready to act as Americans must always act in the face of danger."

I feel confident that those are the sentiments of the people of Texas.

TEXAS DROUTH:
Reports of drouth conditions in many Texas counties continue to be disturbing. We were able to get the President to declare 23 counties as a drouth disaster area, making them eligible for some assistance in the matter of feed for cattle.

But the program at present authorized is inadequate to meet the serious situation that exists. Texas' able Agriculture Commissioner, John C. White, is giving his best efforts to this whole matter. I certainly shall be of any assistance I can.

PERSONAL:
I would be ungrateful indeed if I did not say how deeply I appreciated the confidence Texans showed in me on July 24. I want all of you to know that your faith in me will make me work harder than ever to give you, the people of Texas, the kind of representation you deserve to have in the United States Senate.

Lady Bird and I thank you. Thank you from the bottom of our hearts.

SENATE JOINT RESOLUTION NO. 2
proposing an amendment to Article IX of the Constitution of the State of Texas by adding thereto a new section to be known as Section 4, by providing that the Legislature may authorize the creation of county-wide Hospital Districts in certain counties if approved by the qualified property taxing voters at an election held for that purpose within such District; prescribing the powers of such District; providing for the submission of the proposition to the qualified voters of the State of Texas at an election to be held on the first Tuesday after the first Monday in November, 1954; prescribing the form of ballot and providing for the necessary proclamation by the Governor and publication of notice.

had reasons for failing to score a victory in the first primary. Shivers said that his supporters were too confident and had not turned out at the polls in the expected numbers. He encouraged them to exercise their right to vote in the coming election.

vote against him.
Three Factors Decide
Capable of determining the August election were 400,000 Texans, eligible to vote, who stayed away from the polls July 24. A smaller factor was the 36,000 who cast their votes for Davis and Holmes.

Also to be considered were the Republicans who voted in their own party primaries in July, but who are free to cast their ballots in the Democratic second primary. Most of these votes, it was generally conceded, would go for Shivers.

Judge Re-rules
Operation of the Commercial Security Insurance Company of Houston, already once halted and continued, has been stopped again by District Judge J. Harris Gardner.

Gardner, who issued a previous order restraining the firm from business and a later one allowing it to continue, issued the latest ruling on grounds that the company had gone into business on borrowed capital, thus violating state law.

State action charging fraudulent organization against the \$250,000 fire and casualty firm was initiated July 15 by Attorney General

John Ben Shepperd. He said he had asked the temporary restraining order at the request of the State Board of Insurance Commissioners.

The order was modified a few days later to allow continuance of the firm's business. J. D. Wheeler, liquidator for the insurance board, has been named by the court as receiver to supervise all affairs of the company. Ben B. High, company president, said shareholders would receive no loss if the receivership is handled properly.

Business Perks Up
Good news to Texas businessmen that the state's recession-plagued business situation will soon perk up has been issued by the University of Texas Business Research Bureau.

An upswing in business should be noted after a few weeks of stabilization as the present recession has hit its bottom, the

bureau reported.
A survey of 2,865 retailers over the state showed June sales equaling those for May but four per cent down from last June. For the first half of 1954, sales were seven per cent below 1953 showings.
