VOLUME XXIX

MUENSTER, COOKE COUNTY, TEXAS 76252 AUGUST 27, 1965

NUMBER 40

Americans are preparing to observe another Labor Day and its approach brings two important facts to mind.

First it is one of our officially proclaimed national holidays, an event to be generally observed throughout the nation with a long weekend of fun and relaxation. As usual people will be on the go, and highway traffic will be more crowded than usual, inevitably including more people who are in a hurry and willing to take their chances with violations of traffic laws and common sense.

The Texas Department of Public Safety estimates that 35 persons in the state will be killed during the 72 hour period beginning at 12:01 a.m. Sept. 4. That is cold statistics based on the usual conditions of holiday driving. As always, the statement is accompanied by a reminder telling us that the holidays need not be so tragic, and they will not be so tragic if people will drive with more alertness and care and courtesy. Accidents are caused by human factors and they can be reduced by the simple means of better driving.

By way of emphasizing the point the Texas Safety Association this week issues a special bulletin with a different kind of message. It's entitled "How to Do-It-Yourself in Holiday Traffic". Reversing the customary stern warnings to drive cautiously, it tells the best methods for getting killed.

Topping the list is failure to yield the right of way. "This is a sure fire killer" the safety director comments. "All a driver has to do is throw caution and courtesy out of the window."

The other four methods are more fatal driving errors listed in the order of their importance:

1. Driving at a speed excessive for existing conditions.
2. Driving faster than posted speed limits.
3. Driving while intoxicated.
4. Driving on the wrong side of the road.
5. Driving on the wrong side of the road.

Well, there they are, practices that will vastly increase your chances of joining your ancestors, but practices to be avoided if you want to live. They're good to keep in mind as warnings especially in heavy holiday traffic — and for any other time of the year.

In the observance of Labor Day most Americans are simply taking a holiday, and very few of them bother to think of the day's significance. Labor Day was established to commemorate the great contributions working people have made to the progress, strength and development of this nation — with special recognition of their status as free people in the American system of free enterprise, with an opportunity to improve themselves while increasing the country's over-all abundance. We can rightfully say that the achievement is great and the credit is deserved only because our laboring people have been free. Comparison with totalitarian states makes that point abundantly evident.

It should be added also that labor unions have had a great part in national and individual progress. By sticking together and demanding their rights, working people have acquired good conditions and a fair share of the fruits of industry. Without their effective organization many laborers would have been unable to cope with the demands of unscrupulous employers.

In the light of such ideals it is depressing to observe that a cloud hangs over the glory of this Labor Day. Workers who protected their freedom for years against encroachment by industrial bosses seem destined soon to become victims of encroachment by union bosses. National legislation which has already passed the House of Representatives and seems very likely to pass in the Senate deprives people of their right to hold a job without membership in a union. The traditional element of freedom in American Labor, and an essential of its greatness, will be wiped out when workers are forced to accept the dictatorship of union bosses. After decades of fighting off economic slavery under industrial bosses they will be come the slaves of men who have taken over their own organization.

The procedure of railroad legislation for repeal of Taft-Hartley 14-B is one of the most shameful in our nation's history. (Continued on page 8)

Schools Gain 35, Combined Count Of Both Is 758

The biggest enrollment increase of recent years at the Muenster schools was recorded last Friday when combined registrations were 758, a gain of 35 over last year. It is this community's highest scholastic enrollment and represents a five year increase of 91 students.

Most of the growth has been at the public school, which added 23 in bringing its present count to 170. That also represents a gain in each department. High school grew from 78 to 87 and the elementary department from 69 to 83. Total enrollment is 170.

Parochial school has a net gain of 12 as the high school gained 14 and the grades lost 2. The total enrollment there is 588.

Combining figures of the two schools reveals that the community this year has 217 students in high school and 541 in the grades. Last year there were 194 in high school and 529 in elementary.

Weinzapfel Gets National Award In Conservation

J. M. Weinzapfel has been named an honorary member of the Soil Conservation Society of America. Presentation of his title and accompanying award was made Wednesday night at the awards banquet concluding a 3-day meeting of the organization in Philadelphia, Pa.

Mr. and Mrs. Weinzapfel spent the first three days of this week attending the twentieth annual meeting of the conservation society. Authorities in all areas of conservation participated in discussion of technical and professional papers relating to their subject.

The honorary membership in the nation-wide conservation society was given in recognition of Mr. Weinzapfel's long service and notable achievements in soil conservation. He was prominent in organizing the Upper Elm Red Soil Conservation district and the annual awards program honoring outstanding conservation farmers of the district. He took the lead in forming the Clear Creek Watershed Association and in promoting legislation to permit formation of the Clear Creek Watershed Authority, which he still serves as president. He also had a prominent part in promoting a flood control program and an establishing extensive conservation practices in the area.

Local Jaycees to Set up Rest Stop For Labor Day

Muenster Jaycees during the coming Labor Day long weekend will join in the nationwide effort of their organization to encourage highway safety through rest stops.

They intend to have a rest station near the east city limit where motorists can take a break and enjoy free refreshments. There will be coffee, donuts and soft drinks, probably also milk, cheese and a few other items along with safety literature and brochures.

The rest stop will be open for 48 hours from Saturday noon until Monday noon, and will be conducted by 25 to 30 Jaycees with Don Bayer and Wylie Lewis as co-chairmen.

Purpose of the rest stop is to induce motorists to get off the road and relax a few minutes. Studies over several years indicate a decrease in accidents in areas where rest stops are open.

Refreshments will be served by members of the host organization.

30 Boys Listed On Hornet Roster; Polk is Confident

With a hefty increase on his squad membership since last week, Coach James Polk speaks with pride and optimism about his Muenster High Hornets. Seven more boys have reported boosting the squad roster to 30.

Boys who joined the outfit since the original report are Virgil Swirczynski, Ray Rumley, Mike Shasteen, Kenneth Yosten, Jerry Otto, Glenn Owen and Gary Gieb.

According to Polk the Hornets are looking extra good. They have a cheerful, hard working attitude, the backfield is fast and works smoothly, the line, which will average 155 to 160 pounds, is hustling. Glenn Fleitman and Wayne Klement have been doing fine at blocking, Jimmy Robison has been hot at pass catching, Ken Stormer and Dale Klement have been going strong in the backfield.

First test for the boys is scheduled Thursday night in a practice scrimmage at Lindsay, and a week later they'll be in another practice event with Gainesville B. After that they have two weeks to work out the rough spots before their first game with the Valley View Warriors of Kamay.

Mrs. Darrell Adams and children Aggie Lou, John and Ann of Midland arrived Monday for a few days' visit with their mother and grandmother, Mrs. Ben Seyler. They also visited Mrs. Adams' sister, Sister Mary John, and grandmother, Mrs. John Fette, and other relatives.

L. F. Bruns, 74, Muenster Native, Dies in Gainesville

L. F. Bruns, 74, a native of Muenster and a resident of Gainesville almost all of his life, died at his home in Gainesville at 3:35 Thursday morning after a long illness. He was the father of Superintendent L. B. Bruns.

Funeral service is set for 9 o'clock Saturday morning at St. Mary's Church, Gainesville. Rosary service at the chapel of Geo. J. Carroll & Son Funeral Home will be held at 7:30 p.m. Friday.

Mr. Bruns was born in Muenster on August 9, 1891. He was married to Lindsay to Miss Elizabeth Sturm on Nov. 22, 1920. He spent most of his life as wholesale distributor of petroleum products.

Improved Tigers Start Next Week On Tough Schedule

The Tigers of Sacred Heart and their coach, Walter Wolf, are working overtime this week in an effort to get into shape for their opening game next week with Whitesboro. It's not only a first game but a tough opponent. Whitesboro rates as Class A, was AA only two seasons ago.

Very first action for the Tigers will be a practice scrimmage with Valley View here Thursday night at 7:30. The procedure will be to take turns at running a series of 10 plays starting from the 30. Not regular football but near enough the real thing to show how the team is getting along.

Wolf likes the looks of his Tigers, says they are the heaviest yet in his 5 years at Sacred Heart. Size shows up particularly in the line and helps to offset the lack of experience that is left from last year's squad. In the backfield the Tigers have experience and speed along with size. Three boys, Leon Endres, Larry Hess and Robert Klement are lettermen. The other, Steve Kralick, was a regular at the end of the season last year but did not log enough time to get a letter. Reserve strength is fair, too. Half a dozen huskies will be on the bench along with rookie lightweights.

In general, Wolf thinks the team is the best in recent years and it has a good chance to improve on last year's 5-5 record — in spite of a schedule that seems to be tougher than usual.

Squad membership now is 32. Actually 33 names are on the roster but Melvin Bayer sustained a knee injury Friday night. With six weeks in a cast he's practically out for the season.

the levy of a tax not to exceed seventy five cents (75c) on the one hundred dollars (\$100) valuation."

The purpose of the tax is to provide revenue for paying the hospital's bonded indebtedness and for the care of indigents.

To be eligible as a voter in this election a person must be qualified under the usual voting regulations of the state and must also be listed on the county tax roll as an owner of property in the proposed district.

The coming election is the final step necessary for creation of the Muenster Hospital District, and is permitted by a special law passed in May by the Texas Legislature. If it is approved by voters of the area concerned it will become the new organization, replacing Muenster Hospital Authority, responsible for administration of Muenster Memorial Hospital.

In taking over the hospital the district would assume all obligations including the bonded debt and outstanding debts resulting from the hospital's operation. It would also issue tax bonds to replace the present revenue bonds.

The bonded debt of the hospital is \$300,000. To take over that debt, plus administrative debts, plus the legal costs of a new bond issue and transfer of administration, the district is expected to need a bond issue of near \$315,000.

Nevertheless the community could save money because the additional \$15,000 would be more than offset by the lower interest rate required for tax bonds.

If the schedule of interest and principal payments on the new bonds is set up similar to that of the current bonds yearly payments will average from \$20,000 to \$24,000. With a valuation of just over \$6 million the district would need a tax rate of about 40 cents.

Temporary directors are Al Trubenchach, pres. J. H. Bayer, vice-president, Joe Galloway, secretary, and E. T. Stormer, Norbert Felderhoff, Alphonse Felderhoff, Ray Voth, Robert Bayer and Albert Dangelmayr. If the election passes they will become directors of the district.

.55 Inch of Rain

The community's moisture condition continued to hold on nicely this week as rain on Sunday and Tuesday measured .42 and .13 inch respectively. That is the reading in the city's gauge. Reports from other areas of the community were as high as two inches. Present total for the month is 4.25 inches and for the year is 23.65 inches.

WHILE NASSER PARADES ARMED MIGHT

Doubtless other Americans witnessed, as we did, the armed might of Egypt as Director Nasser paraded his military array before television cameras of the world on the Union of the Arab Republic's 13th anniversary.

The celebration was conducted with all the pomp and pride at the command of Nasser. Among the weapons of war were hundreds of Russian-built tanks, armed personnel carriers and MIG jet aircraft.

Nasser proudly paraded the items of war that had been provided by his communist buddies. But not once was shown any of the tons and tons of food he had received from the United States at the expense of millions of dollars to the American taxpayers. The staff of life was ignored as the dictator sought to impress the people of his area of the world of the military might at his command.

The other day we noticed a report where a Soviet

freighter landed at Alexandria to unload a cargo of some eight thousand tons of wheat, which drew crowds of cheering Egyptians to praise the deeds of their Russian benefactors. Yet on another occasion when an American ship docked in the same port to unload 24,000 tons of wheat from the United States, its presence went unnoticed and ignored.

Now, under orders of the President, wheat shipments from the United States are being resumed to Egypt, all because the President induced the Congress to rescind an earlier ban on shipments to Mr. Nasser.

The President defends his generosity to Nasser on the grounds that it is in the national interest to "gift feed" the dictator's hungry nation. It would be helpful if the President would explain just how it is in national interest to help a ruthless dictator stay in power through feeding his hungry masses.

Many Americans are getting fed up with "filling the bellies" of a hungry populace in order to benefit and pacify an insulting dictator.

Payroll expense is the most important item in the operation of hospitals, accounting for 67 per cent of the total budget of all hospitals.

STERN MEASURES NEEDED

David Lawrence led off one of his recent columns with these striking words: "Everybody naturally laments the loss of 503 Americans in Viet Nam during the last four years, but it may come as a surprise to learn that in a single year in the United States itself nearly 16 times as many persons — or approximately 8,000 — were murdered."

Tragically, there is every evidence that our Viet Nam casualties will materially increase. But it would take a staggering increase indeed to bring their numbers up to the dreadful murder toll. And all other major crimes, as the FBI and other authoritative sources tell us, have been skyrocketing.

This is a cause of deep concern at the highest governmental levels — as President Johnson's appointment of a 19-member commission to study crime and recommend means for arresting it demonstrates. In his words, "The time has long since arrived for the nation to discard obsolete and unworked methods of detecting and apprehending criminals." A great many experts are convinced that, as of now, there is excessive coddling of criminals at the expense of the law-abiding public.

Violence abounds not only in the streets of the great cities but in the countryside as well. Stern measures will be needed to control it.

ANTI-POVERTY

We are prepared to surrender.

The "War on Poverty" is the victor, and if simple surrender it all that's needed we urge all loyal Americans to launder the white towel and quickly throw it to Washington.

In the past we could point our finger and say "never has there been such abuse of public funds as this," but since every program initiated now seems dreadfully as abuseful, we are at a loss for proper denunciation of this raid on the public treasury.

Tracing just a bit of what has happened in the alleged war on poverty leads us to conclude that our original premise was totally correct: The war on poverty is another make-work program filled with red tape and bureaucracy which is turning into an outright fiasco.

Did you know, for instance, that before thinking of the improvised, or even finding out where they lived, the "war" office was staffed by 45 bureaucrats earning (?) more than \$1,000,000 annually between them. The director gets \$30,000; deputy director, \$28,500; three assistants, \$27,000 each; nine others, \$24,500 each; eleven others, \$22,445 each; and finally twenty more at \$18,935 each.

Mission accomplished. The 45 are now out of the poverty class.

Wait 'til next year.

"A graduating senior asked this question in a recent panel discussion: 'What's wrong with relying on government for our economic welfare?' This is a good question and one that deserves a straightforward answer . . . there is both a moral and a practical reason why we should avoid looking to and relying on government for our economic welfare. Such avoidance may at times call for a real display of courage and wisdom but it's man's only long-term assurance that his government will remain an impartial servant instead of becoming a fearful master."

Nothing makes a child worse-behaved than belonging to a neighbor.

"Really, we hate to be a bug about this and speak so often on section 14(b) of the Taft-Hartley Act in our editorial column, but it seems that not enough of this issue is getting to the grass roots . . . We at the Blue Mt. Eagle do not hold an antiunion attitude. We feel that unions have brought the American worker wages and working conditions he could not otherwise obtain. We believe there must be a check against overbearing management situations, and unions can combat this effectively. However, we believe that unions also need a check. Without some sort of safety valve, they can become as overbearing as certain industries were before unionism."

"In any analysis of juvenile delinquency, children of Oriental descent have always been conspicuous by their absence from statistics . . . Unfortunately, there are indications this may no longer be true. Police in Sacramento, Calif. for instance, report increasing involvement of Chinese and Japanese youths in such things as thievery and knifings . . . such hitherto unheard of incidents have caused much soul-searching among the second-generation Japanese, the Nisei. 'Somewhere along the way we feel we are failing,' said one elder. Offered a captain of the Sacramento Police Juvenile Bureau: 'I imagine it's because the kids are becoming Americanized. . . . What kind of society are we building where a police officer can matter-of-factly consider 'Americanized' and 'criminalized' as being virtually synonymous?'"

More Infants Dying
Infant death are rising in a number of Texas Cities. Although infant mortality rates declined in the nation as a whole in the decade of 1950-1960, they rose in 7 of 10 of the nation's largest cities — including two in Texas. Rates also have risen recently in a number of other Texas cities, says Patsy Reynolds, Extension family life education specialist at Texas A&M University. While there are many causes, a major factor is lack of good prenatal care for the expectant mother. All mothers — especially teenage girls — need to understand how necessary this care is to the health and very life of their babies, she emphasized.

Even though most rumors haven't a leg to stand on they have a way of getting around.

The trouble with opportunity is that it only knocks. Temptation kicks the door in.

A meeting was being held at the church in a small community to consider the purchase of a chandelier. Midway in the proceedings, an old fellow in the back row stood up and announced himself "agin" it.

"In the first place," he said, "we can't none of us spell it."

"And in the second place, we can't none of us play it."

"And in the third place, we need some new light fixtures a lot worse than we need a chandelier."

National Drivers' Test on TV To Be Repeated Monday

AUSTIN — Texas drivers will have an opportunity to test their driving skills before driving in the heavy labor Day holiday traffic.

On Monday, August 30, the National Drivers' Test which was originally broadcast nationwide just before Memorial Day, will be presented again on CBS Television. On most Texas stations the broadcast is scheduled between 9 and 10 p.m.

J. O. Musick, General Manager of the Texas Safety Association, said the repeat of the Test is in response to the many demands from viewers who missed the program and those who want to take it again.

An estimated 26 million viewed the first broadcast which was presented by CBS in cooperation with the National Council and Shell Oil Company.

Purpose of the test is to alert drivers to the necessity of developing new and sharpening old driving skills to cope with today's complex system of transportation.

SOIL CONSERVATION DISTRICT NEWS

The terracing season is now in full swing and many district cooperators have already built terraces. Frank Needham constructed approximately three miles on his farm. Terraces were run by the Soil Conservation Service personnel and all terraces empty on grassed waterways prepared for that purpose. These three miles of terraces will protect approximately sixty acres of cropland.

Alois Rohmer has completed the terrace system on his farm north of Muenster by constructing about 1,300 feet of terraces. A grassed waterway was sprigged as a terrace outlet.

Eddie Schmitt and Ed Knauf both constructed 7,500 feet of terraces on their farms northeast of Muenster. These terraces will protect approximately thirty acres of cropland each farm.

Gerald Walterscheid and Henry Yosten both constructed terraces on farms which they rent. Gerald constructed about 1,900 feet on the Perkins farm north of Muenster while Henry constructed about 11,000 feet on the Kaiser farm east of Muenster. Or interest to some is that the terraces on the Kaiser farm were constructed with a bulldozer.

There is plenty of time left to apply for and construct terraces before fall planting. For those who must prepare outlets for terraces before construction, now is the time to prepare a seedbed. Let the Soil Conservation Service men locate the waterway before planting.

Joe C. McElreath recently constructed a farm pond on the Thornton place at Valley Creek. A diversion terrace was also constructed to remove water from a gullied area and to add more water to the pond. Approximately forty acres of brush was also dozed. Cleared

land will be sprigged to Bermudagrass.

Others constructing farm ponds were Frank Stoffels of Muenster, Gene Lanier of Forestburg and Judge Louis Holland of Montague.

Reeve A. Cooke constructed a diversion terrace to remove outside water from one of his cropland fields. He also constructed a farm pond for livestock water.

Ira Ward has constructed an erosion control dam on his farm in the Bulcher community. This structure will catch water and silt from approximately 1,200 acres and is designed to fill up with silt over a period of years. A four foot corrugated metal pipe runs through the dam and has a six foot riser. The structure was designed by personnel of the Soil Conservation Service and called for 13,000 yards of dirt to complete. Cooke County ACP Program will cost-share on the construction of these multi-purpose structures.

A new hat usually gives a woman enough courage to tell her husband how much it cost.

Confetti

tion's legislative history. There has been no repudiation of the ugly fact that it is a political pay-off by the administration for support in the last national campaign.

Despite strong evidence of the nation's opposition as shown by opinion polls, comment by leading publications, and letters to congressmen, the measure was pushed through the house by means that were more foul than fair. Hearings were biased and all the pressures known to Washington

were used to muster support. It remains to be seen now whether the same methods will apply in the Senate.

It's frightening to think what will happen to American Labor if the monstrous measure goes through. Labor leaders with the power to apply such pressure in the nation's capital are certainly a power to be feared by the average working man, and even by the country. They will be absolute bosses over men who want to work, and with that power they will be able to

demand whatever they wish of the national economy. Those guys in Washington aren't just paying a political debt, they're creating a Frankenstein. Certainly not a nice thought for this Labor Day.

And to think it could be avoided by conscientious consideration of just one thought. Good unions do not need compulsion, bad unions do not deserve it.

Geographic center of Texas is 15 miles northeast of Brady, in McCulloch County.

Mr. and Mrs. Fred Knabe spent their vacation in Houston, Austin, Freeport, Lewisville and Grapevine, seeing the Astrodome and a ball game, the state capitol and relatives. They took their son Terry with them and left little Jackie at Grapevine with the Richard Zimmerers. On their return to Muenster the Knabes were accompanied by her nephew Jim Schmitz who has spent three weeks with the Zimmerers and with the Irven Derichswieler at Lewisville.
