

An Air Conqueror—And Just Turning 30

At 30 Col. Charles A. Lindbergh already has assured himself a place in world aviation history. From an obscure boyhood he lifted himself to international fame—first with a non-stop hop from New York to Paris, and then with other daring flights. Born in Detroit February 4, 1902, Lindbergh studied at commercial and army flying schools. Work as an air mail pilot preceded his world-renowned flights.

Here is a brief summary of his outstanding feats: Non-stop New York-to-Paris flight, started May 20, 1927; Good will flight to Latin-America, South America and the West Indies, started December 13, 1927; airmail route inaugural flight to South America, 1929; Los Angeles-to-New York flight in 14 hours, 45 minutes and 32 seconds, April 20, 1930; flight to Japan and China, fall of 1931.

2 SCOUT AREAS THIS TERRITORY TO BE MERGED

Executive committee members and counselors of the Pecan Valley and Oil Belt areas, Boy Scouts of America, decided to carry on scout work in this section by merging and pooling their interests, looking forward to a greater and better Boy Scout movement, in a joint meeting here Tuesday night. The merger is for 1932.

James P. Fitch of Dallas, regional executive, met with the two areas and assisted in the working out of plans for the merger. There were good representations from both areas.

Although it was decided definitely to merge the areas, other plans will be worked out at later joint meetings. Before other steps are taken each council will work out its own independence separately. About March 1, the regional office will furnish a finance chairman to assist in financial duties.

Committee Meeting Cisco
Another joint meeting, to be attended by committees from each area, was called for Friday evening at 7:30 o'clock, February 12, at the Chamber of Commerce at Cisco.

Pecan Valley Area's committee includes R. K. McCall of San Saba, Hugh Stewart of Brownwood, Homer Wilson of Brownwood and Earl Fairman of Goldthwaite.

Oil Belt Committee: Russel Jones of Breckenridge, E. P. Crawford of Cisco, Frank Lovett of Eastland and M. S. Sellers of Rising Star.

Daugherty Committee Chairman
Dr. Jewell Daugherty was elected chairman of the joint committee for 1932.

Mr. Fitch explained to the group that the councils could either merge or go on a mail order basis, doing without a local executive and carrying on scouting by mail through the regional office at Dallas. With the councils merged two offices probably could be maintained with one executive for the area, he said. All present unanimously voted to carry on local scouting.

C. L. Pouncey is executive of the Pecan Valley Area and G. N. Quill is executive of the Oil Belt Area. The two executives will remain active and in charge of the respective areas until the financial problems are worked out. After plans are a little further advanced and the councils are out of debt, one of these two executives or some other man will be selected as executive for the combined area.

In the meantime, while problems are being worked out scouting activities will continue as usual.

Present at Meeting
Visitors from the Oil Belt were: Russel Jones, Breckenridge; E. P. Crawford, Eastland; Frank Lovett, Eastland; M. S. Sellers, Rising Star; Grady Pipkin, Eastland, and G. N. Quill, Eastland.

Oil Belt members present were: Floyd Asher, Lampasas; Warren Taliaferro, Lampasas; W. W. Fox, Lampasas; R. K. McCall, San Saba; Elvis Brown, San Saba; H. H. Sampson, San Saba; Ed Henley, Jr., J. R. Commons, Henry Wilson, Hugh Stewart, O. E. Winebrenner, J. W. Wilkes, Cub Ragsdale, Dr. Jewell Daugherty and C. L. Pouncey, Brownwood.

CANDIDATE LIST INCREASES AS CAMPAIGN GETS IN FULL SWAY

Twenty-three names are listed today in the political announcement column of The Bulletin of persons who are seeking offices in this county, district or city. As each day passes interest in politics increases and prospects now are that this year will see the largest number of candidates in the field and some of the warmest races in several years. Democratic primary will be held July 23rd and the city election April 5th.

District Judge Race
The latest announcement received is that of the candidacy of Gib Calloway, Brownwood attorney, for the office of district judge.

The district judge's office is now held by E. J. Miller of Brownwood. At the present judge Miller has not officially announced his plans, but The Heart of Texas News at Brady where Judge Miller was then holding court, recently quoted his as follows:

"Barring unexpected developments I will, in due time, announce my candidacy for a second term as district judge of this district. At the present time I am busy in the discharge of the duties and responsibilities of the office, and do not deem it necessary to give thought or time to a campaign for re-election.

"The good people of the district have been very charitable and kind in passing judgment upon me and my administration of the important work of the office; so much so that I have heard no criticism of any of my official acts. For this I am indeed grateful, and so far as I now know will be glad to continue to render the best service of which I am capable."

There are three candidates each in the sheriff's race and in the chief of police race. Sheriff M. H. Denman has announced for re-election

and W. E. (Jack) Hallmark and M. L. Langford have announced for the office. Chief of Police Bert Hise is in the race for re-election as city police chief and Arthur P. Ennis and G. A. Guilliams are also seeking the office.

The county commissioners' races are also causing interest with all the present commissioners out for re-election and several other candidates announced. Commissioners E. S. Thompson, precinct No. 1 and James W. Phillips, precinct No. 2, yet have no opponents. In precinct 3 Commissioner L. F. Bird has announced for re-election and J. A. (Chux) Bettis is also in the race. There are three men in the race for commissioner's office in precinct No. 4. Commissioner W. M. Medcalf is running for re-election and in the race with him are John Schulze and Chas. B. Palmer.

Candidate for Commissioner
J. W. (Wade) Golson of Coleman has announced his candidacy for representative of 125th judicial district, Brown and Coleman counties. Judge E. M. Davis of Brownwood is present representative and has not announced yet whether or not he will be in the race again.

W. A. Shields is already in the race for constable of precinct No. 1. O. E. Kitchen is present constable and as yet has not made official announcement as to whether or not he will be in the race.

Following are announcements by present office holders for re-election and as yet they have no announced opponents:
Tax assessor, Mrs. J. L. Karr; county clerk, W. E. (Bill) Burleson; district clerk, Allen D. Forsythe; tax collector, Lee Meek; county judge, Courtney Gray; public weigher, precinct No. 1, L. Q. (Bud) Reese, and county treasurer, Ike C. Mullins.

Dr. Joe McFarlane Associated With Dr. A. L. Taylor

Dr. Joe R. McFarlane, formerly of Abilene, has become associated with Dr. A. L. Taylor, veteran physician of this city, and is now actively engaged in practice here. Dr. McFarlane is both a physician and surgeon.

He took his pre-medical work in the University of Texas, later graduated from the University's school of medicine at Galveston. After graduation he served one year as interne in St. Mary's Infirmary at Galveston. Later he worked a year in Buffalo General Hospital at Buffalo, N. Y.

Dr. McFarlane's family home is in Beard. Since returning from Buffalo last summer he has been practicing in Abilene and Beard. He is a young man and unmarried.

Dr. McFarlane comes with the highest recommendations from the Abilene doctors and others with whom he has associated, according to Dr. Taylor.

Drs. Taylor and McFarlane plan soon to expand their office space, taking additional space on the third floor of First National Bank building, where they have their present office.

CHAIRMAN OF LOCOMOTIVE ENGINEERS SUCCEEDS
FORT WORTH, Tex., Feb. 4.—(AP)—C. S. Jones, 47, chairman of the Fort Worth division of the Brotherhood of Locomotive Engineers, died at his home here today. Jones had been an employe of the railroad 28 years. He made his last run west of Fort Worth yesterday.

BODY OF YOUNG MAN IS FOUND IN WRECKED CAR
DEL RIO, Texas, Feb. 4.—(AP)—The body of a young man, 23, of Comstock, was found under an overturned automobile in Seminole Canyon, 40 miles west of Del Rio, early today. Dillon had left Comstock late last night for Shumla where he is employed.

8 INDICTMENTS BY GRAND JURY

Eight indictments were returned by 35th district court grand jury late Wednesday afternoon when the body recessed until February 29. The grand jury was impaneled Monday morning, February 1 and worked on several cases during the first three days of the term.

Luther Rioridan was indicted for theft of turkeys and was in jail when the indictment was returned. No arrests in the other seven cases were reported today.

Abney & Bohannon Workshop Moved

The Abney & Bohannon Motor Company repair and workshop which has been conducted in connection with their filling station at the corner of Main Avenue and West Lee Street, has been moved to the space above the display rooms of the company. The Safety Tire Company is now located in the building which has been occupied by the service station and garage.

The repair department was formerly located on the second floor of the building and has been moved back to the location since the tire company has leased.

WOMEN'S CLUB TO BOOST TRAYLOR IS ORGANIZED
HILLSBORO, Tex., Feb. 4.—(UP)—The first women's club organized to support the presidential candidacy of Melvin A. Traylor, Chicago banker, was functioning here today. Traylor formerly lived here. Mrs. S. L. Robertson was elected president, Mrs. J. C. Butts vice president, and Mrs. W. R. Brewington secretary-treasurer.

HIGHWAY SEVEN WORK ORDER IS RECEIVED HERE

A work order on paving of Highway No. 7 from Brownwood to the Coleman county line was received by the resident engineer's office Wednesday afternoon. Work on the road is expected to start some time next week.

Contract on the highway was let to H. K. McCollum of Fort Worth December 1, 1931, for \$115,612. Joe Hardiker will be superintendent on the job and is expected to be in Brownwood within the next few days.

Highway 10 Contract Scheduled
The state highway commission made announcement today that bids are to be advertised for paving Highway 10 from Brownwood to the McCulloch county line. The stretch of highway to be paved is 19 1/2 miles long with culvert and water bound broken stone base and triple asphalt surface. The contract will be let at the next meeting of the commission, February 29 and March 1.

With the letting of the contract on Highway 10 there will be only one more major project in Brown county's \$1,650,000 road building program on which contract has not been let. That will be Highway 7 to the Mills county line. Drainage structures and grading on this stretch of highway was completed sometime ago and the paving contract is expected to be let in a short time after the contract on highway 10.

Five Major Projects
When work starts on highway 10 there will be five major road building projects in progress or just completed in this county. Two contractors are at work on paving highway 120 to the Eastland county line. The county is building a highway from Brownwood to Cross Cut and contractors are at work constructing two large bridges on this road. The bridges will span Pecan bayou and Jim Ned creek. The big bridge across the Colorado river on highway 10 is about completed. Work will soon be started on highway 7. And when work is started on highway 10 the total projects will be brought up to five.

Resident Engineer Leo Ehlinger stated sometime ago that the road building program would be completed in 1932—this year.

Gets More Than Market for Grain By Feeding Calves

C. A. Cavel, Brownwood route 3, shows record of 30 cents a bushel for oats, 65 cents for corn, and other crops proportionately high as compared with the current market, through the feeding of nineteen calves. His statement is as follows:

Balance Sheet	
19 calves at \$15 each	\$285.00
225 bushels oats, 7.200	1.620.00
30 cents bu.	67.50
150 bushels barley, 7.200 lbs.	1.080.00
45 cents bu.	67.50
112 1-2 bushels corn, 8.100 lbs.	731.20
65 cents bu.	731.20
3,750 pounds hay, at \$12 per ton	20.00
1,500 pounds cottonseed meal, at \$18 per ton	13.50
150 pounds salt	1.50
Grinding feed	22.93
Marketing expense	54.00
Total	\$611.05
Sold 18 calves, 11,110 lbs.	\$611.05
at 5 1-2 cents lb.	
(One calf died in feed lots.)	

This feeding was begun by Mr. Cavel October 5, 1931, and ended January 28, 1932. He fed 19 Hereford calves, about 3 months of age at beginning, using a self feeder. One calf died soon after the feeding was begun. The value of the calves at the beginning was determined by ten that he sold at that time. The calves and all the feed were produced on the farm, except the cottonseed meal and salt.

Mr. Cavel thinks the self feeder is a big improvement over hand feeding. He says it was very fine on rainy days when the mud was bad, to know that the calves were already fed for several days to come, states County Agent O. P. Griffin, through whom the report of this feeding demonstration was received by The Bulletin.

Three Thefts Here Include Automobile And Accessories

Three cases of theft in the city Sunday night are being investigated by police. One case is theft of an automobile and the other two are theft of automobile accessories.

A Ford car owned by Ted Harris was stolen from its parking place near First Methodist Church early Sunday night. Police have been searching for the car since, but have located no trace of it, according to reports.

Automobile accessories were taken from the garage of O. B. Bowman, 2601 Cleburne street. A truck tire, tube and rim was stolen from Bob Bradley, 2606 Hillsboro street.

BANKER IS SUED FOR \$50,000 BY MISS PHILEN

A \$50,000 damage suit has been filed in 35th district court here by Miss Philen, 25 year old school teacher, daughter of Mrs. J. P. Phlips of this city, against R. B. Boettcher, president of Union State Bank of East Bernard, Texas, president of East Bernard school board of trustees and an influential citizen of that city. East Bernard is in Warren county.

The suit is for \$25,000 actual damages and \$25,000 exemplary damages. Miss Philen charges that acts of Boettcher caused her to be discharged from her position as teacher in East Bernard school, April 3, 1931, the effect of this being to slander and humiliate her. She also charges that her dismissal as teacher and accusations by Boettcher have so injured her that she can not secure as lucrative a position as formerly.

Hearing Was Held by Marrs
The suit is an outgrowth of trouble in East Bernard school last year. After Miss Philen's dismissal a hearing was held before Hon. B. W. Marrs, state superintendent. Marrs ruled in favor of Miss Philen, deeming that she should receive a pay contract \$130 a month for the full nine months term.

At the time of the hearing Miss Philen charged, and now charges in her suit, that advances, which she prepared, were made to her by X. E. Crump, principal of East Bernard school, and a married man. These facts were made known to Boettcher, as president of the school board, she alleges. The subsequent investigation, she further charges, was made to humiliate and embarrass her, instead of ascertaining the real facts.

Miss Philen is a graduate of the College of Industrial Arts at Denton and was paid \$130 per month as teacher at East Bernard. This year, since her dismissal and the reflection on her reputation as a teacher, she was unable to secure a position except as teacher in a country school in Harris county at a salary of \$75 per month, where she is now teaching, she states in her suit.

Charges False Accusations
Miss Philen also charges that Boettcher falsely accused her in connection with her friendship with Victor Holchak, a student of East Bernard school, who was expelled. Her friendship with Holchak was one of the reasons given by the board for her dismissal, as brought out in the hearing before Marrs.

In her charges Miss Philen also names a number of East Bernard citizens to whom she alleges Boettcher maliciously talked against her, injuring her reputation in that community.

SEVERAL MISSIONARIES IN WAR STRICKEN CHINA ARE WELL KNOWN HERE

Several missionaries in China are known in Brownwood and friends here have expressed anxiety as to their welfare.

One of the best locally known missionaries who is working in China is Wilson Fielder, former Comanche county resident and graduate of Howard Payne College. He was stationed at Chenchow, China, with his family the last time word was received from him. It is not known whether or not he is in Shanghai at present, but it is thought that Wilson is as there was trouble in his section when word was received from him about two weeks ago. Dr. A. E. Prince, pastor First Baptist church, says Mr. Fielder was sent to China by the First Baptist church of Brownwood and people here are particularly interested in his welfare.

Another missionary who is in China is Miss Sue Stanford of Waco, cousin of Rev. P. T. Stanford, pastor Central Methodist church. She is stationed in Shanghai at the Western Methodist Mission.

Negro Minstrel Woodland Heights Thursday Night

Announcements of a negro minstrel entertainment to be given at Woodland Heights Thursday night indicate that an evening of fun, good music and a general good time may be expected.

The entertainment will be staged by citizens of Woodland Heights and the teachers of Woodland Heights school, and some of the star parts in the minstrel will be taken by such well known citizens as Ernest Clardy, Bill Bruce, Claude Shannon, Milton Colie and others. Several ladies will also have part on the program. The small admission charge to be made will go to the P. T. A. fund.

Orchestra music will begin at 7:30 o'clock. It is stated, and the program will follow soon after. In addition to the minstrel numbers there will be special songs by a quartette and also a negro play.

INCREASE HONEY YIELD
By cutting windows in the bottom of his bee hives, a California apiarist has found he can increase the yield of honey. He explains that the windows reflect the sunlight through the brood combs.

A "Real Soldier" Heads U. S. Forces in Shanghai

COL. RICHARD STEWART HOOKER

By NEA Service
SHANGHAI—In times of either peace or danger, they will tell you here in Shanghai that Col. Richard Stewart Hooker is, by any measure, a real soldier.

The commander of the United States' armed forces in this battle-ridden region is large physically, indefatigable in energy, and has an imposing record behind him as a fighting Marine. A native of California, grandson of a former U. S. Senator, he is nearing his 55th birthday. Thirty-two of those years has been spent as an officer in the Marine Corps.

Work of tearing down the old band stand at Coggin Park was started this morning as ordered by city council Tuesday night.

A new building for which the council has appropriated \$1,000 will be started at the park as soon as possible after the old building is torn down.

The new park building will be 20 by 30 feet, a replica of park buildings at San Jacinto battle ground near Houston. It will be constructed of native stone with a composition roof. At each end of the building will be a 20 by 20 foot dressing room and rest room. The 10 feet space in the center will be open on both sides and can be used by a band or speaker as a platform. There will be a column on each side of the steps that lead up to the open platform. There will be steps on either side of the building.

People who have seen park buildings like the one planned for Coggin Park say they are beautiful and add a great deal to any park. The park committee has not decided on the location of the new building, but it is thought it will be built near the site of the old building.

Indications For Large Attendance Sheriff Meeting

Indications now are that there will be a large attendance at the West Texas Sheriffs' Convention to be held here February 11 and 12, according to local peace officers. A number of hotel reserves have been sent in already and others are being received every day, they state.

The convention here will open at 10 o'clock Thursday morning, February 11, with a business session in the district court room.

The program not only calls for two interesting business sessions, but for a banquet and dance Thursday night and a trip to Brownwood dam and a shooting match Friday.

Every peace officer who attends the meeting will receive a convention badge from local officers. The button of the badge shows the picture of an old pioneer sheriff with two smoking six-shooters in his hands. Attached to the button is a ribbon on which is printed the name of the convention, dates and place and attached to the end of the ribbon is a blank card on which the wearer will write his name and his address.

Both automobiles and trucks must have two white lights in front and one red light at the rear. If operated upon the roads between one-half hour after sunrise and one-half hour before sunset.

It is my understanding of the law that farmers may, without violating any law, continue to bring their produce to town as they have always done.

A. E. NABORS

PEARL DOCTORS
LONDON—Two girls, Constance and Ethel Austin, have the unusual job of "doctoring" pearls which are "sick." Pearls often suffer skin diseases, and must have layers of skin peeled off them much in the manner of an onion. If they develop spots, this ailment is corrected by dipping them in various solutions. The girls treat pearls valued at thousands of dollars every year.

DEATH RESULTS INJURIES FROM DYNAMITE CAPS

After living 19 days after he and two more youths were injured by an explosion of dynamite caps, Doyle Herschel Reid, 20, died at a local hospital at 5 o'clock Thursday afternoon as a result of the injuries.

He and Earl Paris and William Riley suffered numerous cuts about their bodies and faces when two boxes of dynamite caps, which they were examining, exploded. The boys were on Round Mountain west of Brownwood and claimed they found the caps while hunting rabbits January 10. Paris and Riley are said to be well on the road to recovery from their injuries, both having been discharged from the hospital several days ago. Reid had been receiving treatment since the accident and his condition had been considered critical on several different occasions.

Although he had been in a serious condition, he was thought to be improving and had been sitting up in bed at times Thursday. He became suddenly worse during the afternoon and lived only a short time.

Doyle Herschel Reid was born September 25, 1911, in Comanche county. He had been living in Brownwood for the last 12 years. His parents are dead. He is survived by one sister and two brothers: Mrs. Gladys Drinkard, May; Dale M. Reid, Brownwood; and Aubrey Lee Reid, Brownwood.

The funeral services were held at the Austin-Morris Funeral Home chapel with Rev. W. H. Egan, pastor First Presbyterian church officiating. Interment was made in Greenleaf Cemetery.

PROVISIONS HIGHWAY LAWS ARE EXPLAINED BY COUNTY ATTORNEY

Misunderstanding of the laws relating to the operation of automobiles and trucks on the highways has prompted much discussion and some criticism of the law enforcement agencies, according to County Attorney A. E. Nabors, who made this statement about the situation:

There seems to be considerable misunderstanding among the people about certain features of the laws governing the operation of automobiles and trucks about the highways. It seems that the county has been flooded with rumors that persons have been required to pay fines for hauling a bale of hay on their front bumper, and for hauling cream cans in their car, and for hauling a sack of flour on their running board. All these rumors are false, as no such cases have occurred, and I do not construe the law to prohibit such things, except that loads hauled on the outside of car are limited to certain lengths and widths. That is, the load in front must not extend more than three feet in front of the car, and on the left hand side the load should not extend more than three inches beyond the line of the fenders and on the right side, not more than six inches, and at the rear, not more than four feet, unless a red flag is carried at the end of the load.

In reference to chauffeur's license, the law requires that anyone operating a commercial motor vehicle of over one ton carrying capacity must have a chauffeur's license, and it makes no distinction between one operating his own truck from those operating trucks for others. Every truck has a certain carrying capacity of one ton, a ton and a half, etc., and to determine whether or not a chauffeur's license is required, it is only necessary to ascertain what the carrying capacity of the vehicle is, and if it is over one ton, the license is required by law.

Farm trailers under 4,000 pounds are not required to be registered or to carry number plates. All others must be registered and carry proper number plates on them. That is, proper number plates must be attached to all vehicles that are required to be registered.

All vehicles having a body more than 70 inches wide, must have either a light or an approved reflector on the left side, both in front and at the rear.

Both automobiles and trucks must have two white lights in front and one red light at the rear. If operated upon the roads between one-half hour after sunrise and one-half hour before sunset.

It is my understanding of the law that farmers may, without violating any law, continue to bring their produce to town as they have always done.

Pearls often suffer skin diseases, and must have layers of skin peeled off them much in the manner of an onion. If they develop spots, this ailment is corrected by dipping them in various solutions. The girls treat pearls valued at thousands of dollars every year.

Carter Spokesman For Railroad Men At Luncheon Here

A plea for a more sympathetic understanding of railroad problems, and a more liberal patronage of their transportation facilities was made today by J. C. Carter of Houston before a representative gathering of Brownwood business men from the Kiwanis, Lions and Rotary clubs in a joint luncheon at the Hotel Southern. The Kiwanis club was host for the day, with D. W. Russ of its public relations committee as chairman.

Mr. Carter is a personal representative of the executive vice president of the Southern Pacific lines, and in his address gave the viewpoint of the railroad industry regarding the widespread economic conditions now existing.

Notable Assembly Railroad Men A notable gathering of Texas railroad men, including the official representatives of several roads, attended the luncheon today. Among the visitors was E. J. Stephenson, new vice president and general superintendent of the Frisco; R. Wright Armstrong, freight agent for the Burlington, at Houston; J. D. Neely, of the Cotton Belt; H. L. Hayes Jr., traveling passenger agent for the Rock Island; T. P. Denton, secretary of the Frisco; W. T. Minor, of the Frisco organization; Oscar Nelson, traveling passenger agent for the Santa Fe; John F. Steele, general agent; J. O. Cross, traveling freight and passenger agent for the Katy.

In a brief address expressing his appreciation of the gathering accorded him, Mr. Stephenson said that railroads appreciate the sympathy of Brownwood, but need something more than that. "We must have your patronage," he declared. "We can't get along without you, and you can't get along without us."

Mr. Carter spoke of the relationships between the railroads and the public, and urged that each man present regard the railroad problem as his own problem, because the interests of the roads and of the general business and industrial structure of the country are identical.

Discussion of Railroads. After introductory comments Mr. Carter took up more particularly a discussion of the railroads. His address, in part, follows: "In supplying your nation with a dependable transportation plant the railroads of the United States have built up an investment of more than \$20,000,000,000. To successfully conduct this institution, which today ranks second only to agriculture as the largest of our basic industries, he has raised a family of more than 1,500,000 sons and daughters, to whom he pays every year \$2,360,000,000. These are the men who call railroad employees and the money represents their annual salary and wage. To keep this immense plant going the railroads spent in a normal year \$952,000,000 for materials and supplies, everything from a toothpick to a locomotive; they buy \$280,000,000 worth of coal and fuel, and they spend a billion dollars in maintaining their properties.

"To make their position as a customer clear, let us consider that the railroads buy 25 per cent of all coal produced in the United States, 18 per cent of fuel oil produced, 16 per cent of our forest products, and 10 per cent of all iron and steel produced. In the past six years they have spent almost nine billions of dollars for these commodities. They are customers of almost every industry and business in the country, and the greatest and most powerful customers you have.

"If you were to take the cross-ties bought last year and place them on one train, it would reach from Chicago to New York and back again. To carry the steel rail last year would require a train stretching from Chicago to Philadelphia, and if the coal and oil produced was shipped in the same manner at one time, it would represent a complete line of Poultry Supplies, Brownwood Feed Company.

"Do you know that you can buy 50 year guarantee Silver Plate at far below wholesale cost at this Bankrupt Jewelry Sale, 315 Center?"

ANNOUNCING . . .

A Personal Service BY **BELVIN and RICE** GARAGE
801 Carnegie Street
Across from McDonald & Moore Gin. Next door to Six West Bank Company.
Specializing in Automobile Repairing of all kinds, at VERY ATTRACTIVE PRICES.
We are well equipped to handle any job, having had 9 years of experience with the Ford agency in repairing.
You are given a special invitation to visit us here, or CALL 285. We will be glad to give an estimate on any repair job.
IRVIN RICE . . . R. D. BELVIN

cannot lower their rates or meet other conditions that impose hardship upon them because of the endless red tape required by the commission to receive consideration of their problems.

"Again, and more serious, let us consider another view of their predicament. Railroads, under their present regulation, both by state and federal bodies, cannot compete with the charges made by other forms of transportation because these other forms are not held under such strict legislative restrictions. They are not hindered with the responsibilities of the rail carriers, may establish their own practices, their own rules, and largely determine their own rates. They may go out of business, or they may continue, and it is only their business. True initiative has been taken from the railroads. They must provide their own capital, their own right-of-way, and then be responsible to the public and the government.

Waterways Appropriations "Our congress has now appropriated more than \$850,000,000 of your money and nine to develop inland waterways, and plan on spending more over these channels flow commerce unrestricted, unregulated. Tax money from the coffers at Washington give life's blood to the industry. No taxes are charged against them, because they are federal properties. No civic responsibility is imposed upon them, because they are free from having any interest in the American community. If at the close of a fiscal year they show a deficit in operation, your tax money pays the difference.

"Today we have more than \$25,000,000,000 invested in hard surfaced highways, of which there are now some 250,000 miles. Next year the next \$100 million will increase tax money from Brown county, Texas and the United States, all of which is yours, has gone into the construction of this roadway which today is being used largely for commerce. And those who use it do not pay an equitable tax for the roadbed. They are doing business on your property without paying for it.

"More than 111,000 miles of pipeline has been laid across your land to carry crude oil to tidewater. It is not taxed proportionately with railroads, although this line of pipe represents an industry, and is the revenue from a basic industry.

"Your government has seen fit to give air mail contracts to air lines, subsidizing them in their operations. We now have more than 2,000 landing fields built not by private money but by the federal government, the counties and municipal governments. These too have to be absorbed by other lines of industry. With their dependents they represent almost six million American citizens who live throughout the width and breadth of our land. A million dollars a day will be lost in tax money, and this must be made up by some one else. It is necessary to our progress, to the conduct of our governmental and civic affairs. It would be distributed among those industries and those businesses that survive.

Employment in Various Fields "The steel men, where thousands of men are employed; the coal mines and the oil fields, where other thousands work steadily because they have the railroad as a customer, would either close down their plants or curtail their forces and operations. The lumber mills, cotton mills and other American industries would be dealt a death blow from which recovery would be difficult.

"Now you may ask how you can prevent such a catastrophe to American business and industry. How can you save that old goose that laid the golden egg? What can be done? "The solution of the immensely increasing problem lies within the power of the American business man. He and he alone, more than any other man, can help prevent disaster at this time and he can accomplish it by thinking seriously and acting honestly with himself and his customers, his friends and his associates. Let us return to the Golden Rule in business, and again adopt the high principles that characterized the conduct of our affairs a few years ago. Let us get down to profitable merchandising.

Says Legislation Archaic "American railroads today are held in the clutches of archaic legislation imposed by the will of the American public when railroads of this company represented a monopoly. Through the Interstate Commerce Commission, you gentlemen today operate your rail systems. There is not one function of these rail carriers but what comes under the direct authority of that strong federal body at Washington. Lack of understanding, more than any other feature, is the thing that today militates against our rail system. Held down by legislative effort the railroads of your nation are suffering materially. They cannot change their way of doing business, they

Cox Is Candidate For Commissioner Precinct No. Two

The name of Marion M. Cox appears in the announcement column of The Bulletin as a candidate for commissioner in precinct 2. Mr. Cox is too well known in Brown county to need any word of introduction, being a native of this county. He was county assessor from 1904 to 1908. He taught school for about fifteen years. Mr. Cox solicits the support of the voters in his precinct in his race for commissioner and promises if elected to devote his best efforts to administering the duties of the office in a manner that will be to the best interests of the people of that precinct and to the county generally. Mr. Cox has been engaged for a good many years in farming. He was born near Byrds Store. He now lives near where the big dam is being built, in that section of the county.

COUNCIL HAS ACTIVE SESSION; DAIRYMEN DISCUSS MILK LAWS; LUTHER GUTHRIE FIRE MARSHAL

Discussion of the standard milk ordinance, election of Luther Guthrie as fire marshal, appropriating \$25 monthly to defray expenses of treating city employees who get injured, agreement to assist the Garden Club and City Federation in beautifying highway 10 and decision to tear down present band stand at Coggin park and appropriate \$1,000 for erection of a new building at the park was the chief work of city council in meeting Tuesday night. All aldermen were present except Wm. Hood who was absent on account of illness.

Executive Session Held An executive session was called by Mayor O. W. McDonald for the council to consider applications for the position of fire marshal, vacant by the resignation of Ivan Ellis. Following the session it was announced that Luther Guthrie had been elected by a two to one vote. A number of applications were received. Guthrie, it was said is to take up his duties immediately. The salary was placed at \$75 a month.

Monthly Reports Following are the monthly reports for January of city departments: City Manager Hennen: All departments of the city have been operating as good as conditions allow, he reported. The street department dragged the streets three times during the month. Paved streets in the business section were swept four times. Work of the water department included lowering of six inch main for the overpass and replacing of 722 feet of two-inch pipe on Waco street. Sanitary department had a bad month on account of rainy weather and bad roads to the dump ground. On January 1 the department inaugurated the use of record sheets showing each day's work, exactly the houses served and number of load of trash hauled. The records are to be filed with City Secretary Scott the first of each month.

"I think the city is in very good operating condition, but we have a great number of delinquent water and sewer customers and lots of men wanting to pay water bills by working," Mr. Hennen concluded his report. City Secretary Scott's report: Receipts, Water works earnings, \$3,689.72; sewer earnings, \$1,939.83; general fund, \$152.50; sanitary department, \$953.28; street department, \$71.41; police department, \$203.05; total, \$7,091.96. Expenditures, General fund, \$723.59; fire department, \$893.58; street department, \$3,247.36; sanitary department, \$2,752.09; police department, \$1,294.19; water works earnings, \$3,488.96; sewer earnings, \$1,709.08; special sewer fund, \$85.10; total, \$14,284.43.

Months Fire Record Reports of Fire Chief Rance Pettitt and Fire Marshal Ivan Ellis: Eight fire alarms during month and one call to the police. Amount of loss, \$10,572, covered by insurance in the amount of \$18,100. Property involved was valued at about \$25,100. Cause: One incendiary, three from gas stoves, three unknown, one match thrown in waste basket. Fire Marshal reported number of inspections in business district, 15 and residence inspection, 18. Chief of Police Bert Hise's report: Forty-two arrests. Two were turned over to Federal officers on whiskey charges and eight to county officers on three charges of burglary, one forgery and four theft.

City Court Fines In city court two were fined for traffic violations, two for affray, one for disturbing the peace, 10 for drunkenness and 14 were held for investigation. During the month 7 raids were made, 13 1/2 gallons of liquor, 20 barrels of mash, two 50 gallon barrels, one 125 gallon capacity still were taken or destroyed. Eleven funerals were piloted. Three dogs were killed. Two automobiles and other goods valued at \$706 were recovered and returned to owners. Two automobile thefts were prevented by officers quick response to calls. Two burglaries were prevented by officers patrolling the city. Two burglars were traced and arrested in other cities on information given by local police. Fines collected, \$203.05. Seventy-four meals were given city prisoners at a cost of \$22.50.

Highway Beautification Plans Mrs. H. H. Negus, representing Brownwood Garden Club and Mrs. E. M. Boon, representing the City Federation of Women's Clubs, appeared before the council and asked assistance in beautification of highways plan. Mrs. Negus said the clubs are to plant trees on each side of highway 10 from the slough bridge to the highway's intersection with Main avenue. The trees are to be planted soon and dedicated in 1936 to Brown county pioneers as part of the Texas Centennial celebration. There are beautification plans also for other highways leading into Brownwood, but Mrs. Negus requested the council's help only on the highway 10 work at present.

The council voted to help as requested by Mrs. Negus by furnishing the water for the trees for two or three years after they are planted. The city will use some old pipe it has on hand to lay a water line along the side of the highway to get water to the young trees. Medical Service City Employees Dr. D. R. Scott, city health officer, asked the body about how future bills of city employees were to be taken care of since a recent ruling of the council that the city will not be responsible for physicians' bills for treatment of city employees. The city offered Dr. Scott \$25 per month, beginning January 1, last month, to take care of all injuries to city employees received while they are doing work for the city. Dr. Scott accepted the offer.

New Building Coggin Park Council voted to tear down the present band stand at Coggin park and to appropriate \$1,000 toward building a structure at the park that will be a combined rest room, band stand, stage, etc. The building is to be a replica of buildings on the San Jacinto battle grounds. Report of plans for removing the present building and construction of the new building was made by Sam Outbrith, Sr., chairman of the city park committee. Plans for the new building were presented by City Manager H. V. Hennen. City Manager Hennen was authorized to buy a car of asphalt to patch streets and a carload of six inch pipe for water mains. The proposition of laying a base by the city on a route through the

western part of the city to connect with highway 7 to Coleman and the paving of the route by the city was discussed. Alderman Carlson made a motion that the city lay the base, but later withdrew the motion as all aldermen were not present. Alderman Roberts opposed the proposition.

FOURTEEN PLAYERS SIGN WITH WHITE SOX FOR 1932 CHICAGO, Feb. 4.—(UP)—The Chicago White Sox today had 14 of the players on their roster signed to the contracts for the 1932 season. The latest to sign were Fitcher, Irving Hadley, obtained in a trade from Washington in December, and Smead Jolley, outfielder, who may be converted into a catcher next season by Manager Lew Fonseca.

Entered at the Postoffice at Brownwood, Texas, as second-class mail matter.

A. D. MURPHY, Business Manager: Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Banner-Bulletin will be promptly corrected when brought to the attention of the publisher.

Where Communism Grows

NEWS that the Spanish government had suppressed a Communist outbreak in a dozen cities and towns is not surprising. The Reds have done their best to find some advantage for themselves in the muddled waters of the Spanish revolution, but there is little reason to suppose that they will be able, now or later on, to take possession of the government.

When Ministers Oppose War

ONE thing can be said, quite definitely, about the members of the Ohio Pastors' Convention who voted flatly never again to sanction or participate in any war; they will at least draw down upon themselves from their fellow-citizens all kinds of comment, favorable and hostile.

Unpaid Pensions

THE DISTRESSING information is given by State Treasurer Charlie Lockhart that he is unable to pay Confederate pensions for January, and can see little hope of resuming payments before April 1st. The pension fund deficit is already more than two and a half millions, he said, and payments have been made only by borrowing one and a half million dollars from the Highway Department fund, under authority granted by the last Legislature. The state's general fund is carrying a tremendous deficit, and it is impossible to transfer any money from that source to the pension fund.

Unlearned burdens upon the aged Confederate pensioners, because the Legislature appropriated more money for various causes than was wise. This condition is but a repetition of conditions that have existed from year to year in the state government, and that have provoked the constant hue and cry for new taxation of new revenue sources, to maintain constantly increasing budgets for every conceivable purpose.

Plenty of Voters

REPORTS by tax collectors all over Texas indicate that poll tax payments for the current year were almost equal to the normal figures, and considerably in excess of those for last year. In most counties the increase over last year was about fifteen per cent, reflecting the general interest in the year's elections and pointing, also, to the payment of property taxes on a more liberal scale than that of 1930.

The Railway Wage Cut

THE DECISION of the railroad brotherhoods to accept a ten per cent wage reduction for one year beginning February 1st was without a precedent, as was the manner in which negotiations proceeded between the railway presidents and union chiefs. There was no threat of strikes, no evidence of animosity, no pointed disagreement as to the fundamental issues involved in the situation. The labor delegation and the railway executives simply sat around a conference table and in terms of friendliness and understanding discussed the problems that affected all of them.

Want Law Repealed

The people who clamored so strongly for farm regulation by law are now—at least some of them—trying just as hard to get the law repealed, or declared unconstitutional, that restricts cotton planting. Other states have failed to pass similar measures, and Texas is left holding the bag. The only people who have profited have been the legislators—to the extent of their \$10,000 a day salaries—and a few politicians who secured much-desired publicity. The cotton planting law is dead. Either the courts will declare it void, it will be repealed or it will not be enforced through indifference.

TEXAS AND TEXANS

By WILL H. MAYES, Austin, Texas. "All Texans for all Texas"

Waiting For Something

There are entirely too many people sitting around, Micawber-like, just waiting for something to turn up. When told that "prosperity is just around the corner," they lack the energy even to take a peep at it. If prosperity wants to find them, she will have to hunt them up. There may have been a time when opportunity knocked at least once at every person's door, but in these days one has to knock repeatedly at opportunity's door, to get any response. The dame is still as ready to greet visitors as ever, but is letting them do the calling. She has too many admirers to be forced to go out into the highways and byways and compel people to come in and sup with her. The people who wait for prosperity to return to their doors and knock at their doors and try to overtake it. There never was a better time for constructive activities than right now; there never was a worse time for loafing around. Get busy, stop croaking, be happy.

Reconstruction Program

I am not astute enough to tell just how the National ten billion dollar reconstruction program is going to help anybody but the banks, the railroads, the creditors, people with money in banks, and to some extent those who owe debts they can't pay. The man without a business or a job is going to have to hustle to get any of the billions. To expect the Government to throw money into one's lap is unreasonable; to expect it to create business in some miraculous way is nonsensical. Better business comes as the result of better individual judgment and effort. Of course, the Government can relieve some of the burdens of business as a whole, but individual business has to depend on individual energy. The best reconstruction program for most of us is to reconstruct our own affairs to meet the changed conditions.

Farm Life Changes

Farmers are learning that farming and farm life can't succeed along the old lines. Cooperation is essential as raising crops. A few years ago it was difficult to get farmers to gather to study farm problems, and seldom did they get together to agree to any fixed policy of cooperation. Now, they readily unite to outline policies, receive instructions from farm demonstrators, subscribe to acreage agreements, adopt marketing plans, and attend to all the details of crop management and marketing. The exchange experiences in reducing expenses of living and study seriously how to effect savings. Good roads and automobiles make it easier for them to get together and increase the spirit of friendliness so essential to cooperation. The isolation of farm life has heretofore done much to retard farm improvement. Farmers no longer can live to themselves and succeed.

Live-At-Home Year

Farmers and suburban residents with sufficient land for orchards and garden have, in large numbers, returned to the farm this year. The advantages of conserving food in a way to make living much less expensive. They have also learned that the saving thus effected contributes to both health and purse. While millions of containers have been filled with food the past year, the practice of canning has not become as general as it should. The example furnished by the more thrifty canners of farm produce is certain to result in a vast increase in canning this year, and it is hoped that before long every farmer will have a canning outfit at hand. The farmer who can produce his own food, and who is able to care for his family over a period of at least a year. When that time comes, farming will be recognized as the most independent of all vocations.

Wholesale Distributors

The Safety Tire Company takes the location of the Abney & Bohannon Service Station, the building which was formerly occupied by the Chevrolet Motor Company. The wholesale department will distribute tires over this district which includes Brown, Coleman, McCulloch, San Saba, Mills, Comanche, Hamilton and Callahan counties.

Lockhart Farmers Unite

Caldwell has always been noted as a "corn and cotton county." The farmers of the county have been holding meetings and talking things over. They have seen that their neighbors in Bastrop, DeWitt and other counties have prospered by diversifying crops. They are subscribing to agreements to plant enough tomatoes to employ some one to instruct them in planting, cultivating and marketing the crop. This will result in additional diversification of crops and also in the canning of farm products. Caldwell county is going to get out of the corn and cotton rut without being compelled by law.

Blossoming Words

Words, at the touch of the poet, blossom into poetry.—Holmes. East Texas Syrup Over in Houston county case

Syrup is being grown extensively. There is no better sweet than East Texas cane syrup, and the cane can be grown easily. Heretofore there has not been much market for the syrup because of insufficient co-operation. There has also been lack of uniformity in the grade, as every farmer was his own judge as to standards. About 80 per cent of the cane growers of Houston county have formed an organization for marketing syrup on a quality basis.

Publicity For Products

Fruit growers in the Rio Grande Valley are signing agreements to leave parts of their crops on the trees as long as possible so that visitors may be impressed with the citrus possibilities of the section. A good idea that might be adopted by other crops in other parts of the State. The hotels, cafes and other eating places should also feature in their menus local products and offer them to guests at attractive prices. In a trip through the Valley last year I did not find Valley fruits featured at a single place. No special effort was made by the hotels to advertise the fine grapefruit and oranges of the section, and when they were ordered the prices were as high as on a railroad dining car.

Valley hotels should almost force the patrons to try Valley fruits, East Texas hostesses should place East Texas cane syrup before every guest; the Winter Garden and Pecos sections should display huge bunches of strawberries before their guests; the Panhandle should require its hotels to serve whole wheat breakfast foods. Why have a good thing unless it is exploited? The more publicity a good thing gets the better for it.

The Liano News

The Liano News appropriately reprints Henry W. Grady's famous prosperity recipe, and it is good enough to be read again here. If adopted generally, hard times on the farm would disappear. Here it is: "When every farmer in the South shall eat bread from his own fields and meat from his own pastures, and be disturbed by no creditors and enslaved by no debts, shall sit among his teeming gardens and orchards and vineyards and dairies and barnyards, pitching his crops in his own wisdom and growing them in independence, making cotton his clean surplus and selling it in his own time, in his own market and not at a master's bidding, getting his pay in cash and not in a receipted mortgage that discharges his debt but does not restore his freedom—then shall be breaking the fullness of our day."

SAFETY TIRE CO. IN NEW LOCATION, WITH DUNCUM AS MANAGER

The interest of John Parker in the Safety Tire Company has been purchased by R. T. Adams, sales representative for the Goodyear Tire Company in this district and the company has moved to the Abney & Bohannon Service Station at the corner of Main Avenue and West Lee Street. A wholesale department will be carried in connection with the retail business. Homer Duncum retains his interest in the company and will continue as manager. Mr. Adams, who has made Brownwood his headquarters for the past two years, continues as sales representative for the Goodyear Company. Ivan Ellis, former city fire marshal, has assumed his duties as assistant manager of the Safety Tire Company. John Parker will go into the tire business at the old location of the company on West Broadway Street. He will also handle Goodyear tires and his company will be known as Safety Tire Company No. 2. Mr. Parker will be owner and manager of the new company, it was stated today.

Chief Work Making a Living

The chief business of the Brown county farmer is making a living. His farm is a good place to make a living and raise a family, but a poor place to make money. Consequently when he plants to supply the market, his home market will receive first consideration—first of all the farm home and livestock.

County Singing at Woodland Heights Draws Big Crowd

A crowd of 600 or 700 people attended the fifth Sunday county singing convention at Woodland Heights Sunday. Singers were drawn from many communities in Brown county and also from other counties. General singing interspersed with several special numbers made up the day's program of music. The convention voted also to hold its next session at Woodland Heights, May 29.

Man Held at Coleman in Connection with Brownwood Robbery

A man giving his name as Walter Watkins and his home as Ortega, Florida, is being held by Coleman officers in connection with the robbery of a dry goods store at Santa Anna and the McQueen Second Hand Store here. He was arrested at Lometa Saturday upon information furnished by Brownwood police. Most of the goods stolen from the McQueen store Friday night were recovered and the man admitted the robbery, local police said. Goods taken from the Santa Anna store were also recovered, it is said. Watkins was brought to Brownwood by Sheriff Frank Mills and Deputy H. T. O'Bar of Coleman, and was questioned by Chief of Police Bert Hite. He was taken to Coleman by the Coleman officers. The loot from McQueen's store which was recovered included: 17 knives, 13 watches, six watch chains and charms, two flashlights, two razors and one pistol. All were identified by J. G. McQueen. Officers say Watkins admitted the robbery of McQueen's store, but denied robbery of the Santa Anna store. Goods taken from the Santa Anna store and sold to McQueen here by Watkins were identified by Santa Anna merchants, it is stated.

Local Representative of Goodyear Co. to Attend Big District Sales Conference on Tires at Dallas

W. H. Miller southwestern division manager, P. W. Litchfield, president and R. S. Wilson, vice president and sales manager of the Goodyear Tire & Rubber Co. Inc. who will conduct the tire sales meeting.

Mr. R. T. Adams, sales representative for The Goodyear Tire & Rubber Company for Brownwood and surrounding territory, is in Dallas attending one of the largest conferences of the year in the automobile tire industry.

The conference is being held at the Adolphus hotel on February 3 and 4th and is signalled by the presence of President P. W. Litchfield, who in addition to being an outstanding figure in the rubber industry, is directing the construction of the ZRS-5, sister ship of the U. S. S. Akron, recently completed for the Navy.

An interesting figure is Litchfield. Going up the ranks as factory manager, vice president, and president since 1926, he has in that period directed the construction of nearly 200,000,000 tires, the largest number credited to any individual in the world.

Within the last few years he has come also into the title of the country's leading builder of lighter-than-air craft, some 1,100 observation and training balloons and 110 airships having been built under his direction prior to the completion of the U. S. S. Akron. Mr. Litchfield's interest in aeronautics dates back to 1911 when the experiments of the Wright Brothers with airplanes and of Count Zeppelin with airships had gone far to convince a skeptical public opinion in Europe and America.

He set a little group of engineers to work studying this subject, and in the following year began building balloons for the army and navy. In 1913 a Goodyear balloon team, upon and Preston, won the James Gordon Bennett International balloon race, flying out of Paris.

The World War brought the building of a great hangar or airship dock at Wingfoot Lake, the construction there of hundreds of airships and the training of 600 army and navy officers for the air service.

The construction dock in which the Akron was assembled, was started in 1929, being the largest building in the world without interior supports. This huge building, 1,200 feet long by 325 feet wide and 210 feet high, streamlined to reduce air disturbances, and having four great orange-peel

Farmers Here in More Optimistic Attitude Now Says County Agent

BY O. P. GRIFFIN, County Agent, Brown County. (In the Fort Worth Star-Telegram)

Farmers of Brown county have put on a more optimistic attitude. "What's the use of grieving about it?" is the common expression. When asked what they are going to do with the big crop of feed grain that now seems almost certain they say, "Well, I'd rather have cats I can't sell than cotton I can't sell."

What about debts? This is the dark cloud on the farmers' horizon, but even this cloud has a silver lining. Part has been paid, leaving less to pay than a year ago, and it will not be necessary to make much debt in 1932. This is more than can be said of the years of great prosperity. Then the farmer sold his cotton for 25 cents a pound, paid most of his debt, then turned around and borrowed more than the year before to run him till next harvest. Each year left him farther in debt.

Times are hard now; that is the farmer is doing without many things that he once had, using his automobile less, and can't pay his obligations in full. But he has learned that many of the things he is deprived of are not absolutely essential to health and happiness, and when 1932 crops are sold the farm debt will be less than at any time in recent years.

Prospective Cash. The cash income from this farm may be about as follows: Eggs \$225, poultry \$250, cream or butter \$250, cattle \$100, cotton \$150; all other crops \$100.

The total of \$1,090 is small, but when it is recalled that this farm home has beef, pork, milk, butter, poultry, eggs, beans, peas and an abundance of fresh vegetables the year around together with plenty of grain and fodder for the farm animals, it will be seen that this small cash income can be made to go a long way.

MAN HELD AT COLEMAN IN CONNECTION WITH BROWNWOOD ROBBERY. A man giving his name as Walter Watkins and his home as Ortega, Florida, is being held by Coleman officers in connection with the robbery of a dry goods store at Santa Anna and the McQueen Second Hand Store here. He was arrested at Lometa Saturday upon information furnished by Brownwood police.

Most of the goods stolen from the McQueen store Friday night were recovered and the man admitted the robbery, local police said. Goods taken from the Santa Anna store were also recovered, it is said. Watkins was brought to Brownwood by Sheriff Frank Mills and Deputy H. T. O'Bar of Coleman, and was questioned by Chief of Police Bert Hite. He was taken to Coleman by the Coleman officers.

The loot from McQueen's store which was recovered included: 17 knives, 13 watches, six watch chains and charms, two flashlights, two razors and one pistol. All were identified by J. G. McQueen. Officers say Watkins admitted the robbery of McQueen's store, but denied robbery of the Santa Anna store. Goods taken from the Santa Anna store and sold to McQueen here by Watkins were identified by Santa Anna merchants, it is stated.

All Set. Keep a list of "emergency calls" near your telephone. Just because you may have memorized the doctor's number and others of similar importance, the rest of the family may lose valuable time in looking up those numbers in your absence.

TRIPLETS ARE BORN TO ZEPHYR COUPLE AT SANTA ANNA HOSPITAL. Mr. and Mrs. Curtis Melton of Zephyr announce the arrival of triplet daughters who were born Sunday night at the Sealy hospital at Santa Anna. Two of the children weighed four pounds each and the third daughter weighed 3 1/2 pounds. The hour of birth of the first child was recorded at 10:35 p. m. and the second children was born at 11:55, and the third arrived barely in time to share birthday celebrations with her sisters, the time of her birth being recorded at 11:59 p. m. Had her arrival been one minute later she would not only have been born on a different day from that of her sisters, but in a different month as well. Mr. and Mrs. Melton have no other children. Both the mother and daughters are reported today as doing nicely.

Houston Chosen For Convention By Optometrists. Houston was selected as the convention city for 1932 by the Texas Optometric Association and the dates were set for April 25 and 26 by the executive committee of the association in a meeting at Waco Sunday, according to Dr. Melville Armstrong of this city, member of the committee. Dr. Armstrong attended the meeting in Waco. The convention city was decided upon after members of the committee took into consideration the fact that the annual convention has not been held in the eastern part of the state in several years, he said. Following appointments were made by Dr. Nelson Greetman of San Antonio, state president: Dr. J. Howard Clark of Houston, convention chairman; Dr. R. F. Pray of Beaumont, program chairman.

The committee also made plans for observing Better Vision Week which is February 7 to 14. All optometrists in the state will stress better vision and will offer their service to Parent-Teachers Associations, civic clubs and others to discuss good vision topics. Reports were also made on research work being conducted by various groups in Texas. The aim of the district organizations is to safeguard the public and give them a complete service for the protection of their eyes, it was said.

Announcing

The Removal Of Our Mechanical Department And Work Shop

From the downstairs location corner Main and Lee Sts. to its FORMER LOCATION UP STAIRS OVER OUR SALES ROOM ON MAIN AT W. ANDERSON...

Good, dependable mechanics who know how and are especially trained in Dodge and Plymouth work.

In connection with this removal, we wish also to announce the leasing of our Super-Service Station to the Goodyear Tire people.

Beginning Monday, Feb. 1st, the Safety Tire Co., will occupy this place and continue the operation of the station as in the past together with the local headquarters for Goodyear tires.

We want to thank the public for the very liberal patronage given us during the past year, your support in taking advantage of the SUPER SERVICE we offer...

It will be our pleasure to serve you in parts, repairs service and car sales.

Re-Opening OF

Boysen's Market

Wednesday Feb. 3rd.

Yielding to the solicitation of many of our old customers and of the public in general, we have decided to re-open our market in its former location.

The building has been thoroughly renovated inside and out. New fixtures have been installed. Expense has not been a consideration in making the market modern and sanitary in every respect.

Our modern refrigerating plant will keep the meats in excellent condition, and you may expect only the highest class of meat from this market. Besides fresh meat we will handle all the leading brands of cured meats, such as ham and bacon.

Specializing In Cubed Meats

With the new "Cube Steak Machine" that we have installed we will be able to furnish the tenderest, juiciest steaks you ever ate, and at no greater cost than ordinary high class steak. Then, too, a Cube Steak can be cooked in a fraction of the time an ordinary steak would take.

We extend to the public an invitation to pay us a visit of inspection. See our sanitary and modern plant.
