REDS IN DEFENSE PLANTS

And now our men in Vietnam know why they are there. The Chief Justice of the Supreme Court told them on Monday, December 11, in announcing a 6-2 decision of the court. Our men are in Vietnam to defend the right of Communists to work in defense plants in the United States.

In a short span of ten years, the Supreme Court has:
Invalidated Sedition Laws

passed by 42 of our States. Ruled that a citizen may not be prosecuted for advocating the overthrow of the United States Government by Force, unless that citizen advocates action to effect the overthrow.

Ruled that the department of State may not withhold passports from suspected Communists because of their "beliefs or associations."

Ordered that Communist Party members not be compelled to register with the Subversive Activities Control Board.

Handed down a decision that no American can lose his citizenship, even if he deserts from the armed forces in time of war, or even if he votes in a foreign country.

Those are just the decisions bearing on subversion in our country at a time in history when it is face to face with the most powerful and openly hostile enemy it has ever faced. Some of the decisions on the handling of criminals, religion and politics are equally revolting.

Somehow, it must be that we have failed to see the announcement of an important decision of the Supreme Court at some time in the past.

Was it decided at some point that members of the Communist Party should sit on the Supreme Court. Otherwise, how can it be that every decision seems to be in favor of the Communists?

The security ramparts of our nation are being dismantled at a furious pace by the Supreme Court. Another ten years like the last ten can be disastrous.

The legislative branch must act before the Court interprets the First Amendment as ground for voiding all subsequent amendments. That does seem to be the Court's intent.

HOW MUCH TO REAR A CHILD?
"Hey, Uncle, how much does it cost to rear a child?"
You allow us taxpaying parents only \$600 a year tax-free to feed, clothe, house and train a youngster.

TO A DISCOURAGED YOUNGSTER
Dear Kid: Today you came to me for a job. From the look of your shoulders as you walked out, I suspect you've been turned down before, and maybe you believe by now that kids out of high school can't find work.

Under Social Security, you will pay \$168 a month to maintain the elderly. What makes you think we can maintain our youngsters on \$50 a month?

How in the world do you expect parents to provide all these things plus clothing, recreation, books, medicine - for \$600 a year? With your own figures you admit it can't be done.

ALL THE WATER YOU NEED with a JENSEN
You can now have all the conveniences of modern living when you install a Jensen Automatic Water System.

By comparison you don't know the meaning of "scarce." You may not believe it, but all around you employers are looking for young men and women smart enough to go after a job in the old-fashioned way.

A NEW YEAR'S MESSAGE
At this time of the year it is customary to have a New Year's editorial, and usually it deals with events of the year past, prospects for the year ahead, or the perishability of New Year's resolutions.

The refugee, Puerto Rican-born Amerigo Puig, then explained his distaste for the sanctuary we have given Communism in the Caribbean.

TO A DISCOURAGED YOUNGSTER
Dear Kid: Today you came to me for a job. From the look of your shoulders as you walked out, I suspect you've been turned down before, and maybe you believe by now that kids out of high school can't find work.

Ever hear a "empathy"? It's the trick of seeing the other fellow's side of things. I couldn't have cared less that you're behind in your car payments.

Real middle age comes when temptation is not only hard to find, but tiring to think of. A warranty is something that covers everything except the parts that break.

Medical Folklore Usually Wrong

While much of medical folklore is now obsolete and largely forgotten, there are still many completely erroneous beliefs about their health held by sizeable numbers of people in our so-called age of enlightenment.

**SHH Biology Lab Gets Yule Gift**

One of Sister Theresina's most treasured Christmas gifts came from her biology class, the juniors, for Sacred Heart High's biology department. It's carnivorous plants.

The welcome surprise includes a set of two each Venus Flytrap, Sundew, and Pitcher Plant. Each has its own method of luring insects into its trap which the class will observe. The Venus plant folds its leaf over its victim in less than a second; Sundew glues the insect to its leaves; and the Pitcher Plant drowns the insect. In each case the plant "eats" its victim entirely except the harder portion such as legs.

Visitors are invited to the biology lab to see the new additions. "Bring a fly along" said Sister Theresina, "and see the results."

The quartermaster handed the seaman recruit a pair of trousers and the recruit put them on. They fit perfectly, as did the shirt and cap.

**Decorated Door Contest Held at Sacred Heart High**

Before classes dismissed for the holidays at Sacred Heart High, a decorated door contest was judged. Each of the four classes had decorated a home-room door with holiday decor.

Freshmen artistry won first with its stained glass look and pictures of religious figures. Seniors were a close second with a big Santa complete with cotton beard on a background of pink tissue, Charles Conroy, teacher, was judge.

Seniors also decorated Brother Thomas Moster's office, the decor highlighted by a stable and manger scene in the picture window. A brief religious ceremony was held while the Christ Child statue was placed in the crib.

**New Edition of  
Texas Almanac Has  
Many Features**

New information on recreational and historical attractions, election returns by counties, U. S. Census data on agriculture, population estimates and many other features are found in the 1968-'69 edition of the Texas Almanac, just published by The Dallas Morning News.

Published since 1857 and called "The Encyclopedia of Texas" the Texas Almanac is widely used in schools, libraries, business and professional offices and home libraries. Newspapers, county agents, chambers of commerce, trade associations and many other Texas individuals and organizations contributed information for the new edition.

New and expanded features listed by Walter B. Moore, editor in this edition include:

A history of the Texas Highway Department which is observing its 50th anniversary.

Descriptions of the principal birds of Texas, prepared by the Audubon Society of Dallas.

Expanded descriptions of Texas State Parks and major museums.

Individual pages devoted to historical attractions in the following counties: Anderson, Austin, Bell, Jefferson, Jeff Davis, Gillespie, Medina, Tom Green, Webb and Young.

Economic pages devoted to the 23 Standard Metropolitan Statistical Areas, the larger cities in which 80 percent of all Texans live.

Enlarged information on Texas agriculture, including a history of the state's cotton industry.

Election returns, by counties, for two Democratic primaries and general election of 1966 for the principal contested races.

Text of the Texas Constitution, including 20 amendments in 1965 and 1966. Twenty amendments on which Texans are voting in 1967 and 1968 are summarized.

New districts for Texas Senators and representatives are listed and shown on maps.

Lists include state, municipal and county officials, state boards and commissions, statewide civic and business organizations and many others.

A calendar with phases of the moon, chapters on weather, geology, plant and animal life, minerals, banking and commerce, service industries and many other topics are found in the 704 pages of the 1968-'69 edition.

Moore said that the descriptions and economic information on all 254 counties are among the most popular features of the publication and expressed appreciation to the thousands of Texans who participated in compiling of the information.

Two small boys, aged 7 and 2, who were waiting in line at an ice cream stand. The little brother was announcing loudly:

"I want vanilla. I want vanilla."

The supply of vanilla had given out. Interested parents stood by to see how the 7-year-old would handle such a crisis. Without flinching, he ordered two strawberry cones and handed one to his little brother.

"Here you are," he said briskly. "Pink vanilla."

Here's winning form of Cees Verkerk of Holland, one of the world's fastest skaters.

GRENOBLE, FRANCE — Skaters practice on what may be the world's fastest ice at this French Alpine town, site of the February Winter Olympics. A special mineral-free ice is being used, produced by new Culligan water conditioning equipment. Deionized water, normally used for industrial purposes, such as washing of electronic components, contains less than 2 parts per million of dissolved minerals. The potential importance of low solids ice was first noticed by the Russians whose skating times were faster just after a rain. The simple scientific explanation is that as hard water freezes its minerals separate, making ice uneven in texture and hardness and causing the skaters' blades to become dull.

You really can't judge a modern girl by her clothes. There isn't enough evidence.

The use to which statistics sometimes are put reminds us of a comedian's observation recently: "Ever since they put those Smokey the Bear ads in the New York subways, there hasn't been a single forest fire in Manhattan."

## A Bumper Crop Of Food Fantasies

Naturally, the interest of all of us in food gives rise to numerous food superstitions and misconceptions, says TODAY'S HEALTH GUIDE, the American Medical Association's manual of health information for the American family.

Some tabulations list more than 200 common modern-day misconceptions about food.

Here are a few of the more common fallacies. They're all erroneous—

If a few vitamins are good, more must be better. (Not correct.)

Never give milk to a patient with fever. (The milk won't affect the fever at all.)

Parsnips should be eaten often to cleanse the kidneys. (They don't.)

Beets build blood. (They don't.)

Pork is indigestible. (It is no more indigestible than other meats.)

Sour foods, such as lemon juice or sauerkraut, can cure diabetes. (They can't.)

For treatment of arthritis, grape juice, honey, dried poke berries, carrot juice and tomatoes are helpful. (They're not.)

Cooked cereals heat the blood. (They don't.)

Warm bread may cause a stroke. (It won't.)

Putting cream in coffee makes the coffee more harmful. (No.)

Ice water causes heart trouble. (It doesn't.)

Raw vegetable juice contains life-giving properties, but cooked foods are "dead." (Not so.)

Olives, oysters and raw eggs increase sexual potency. (They don't.)

White sugar is not good for the health. (Not true.)

White bread is poisonous. (It isn't.)

If the expectant mother holds her weight down, the size of the baby will be reduced. (Not a fact.)

Enriched candy is good for reducing. (It isn't.)

Calories don't count. (They do.)

Melba toast has no calories. (It has.)

Never eat rabbits because they are all disease carriers. (No.)

Yogurt and brewer's yeast are dietary requirements. (They aren't.)

to start the best year our nation and the world have seen for a long time.

Similar optimism may be in order regarding our domestic problems. A serious look at the past discloses a lot of evil that has been tolerated in this country. We have had crime, rioting, civil disobedience, disrespect for law, graft, dope, irresponsible spending, coddling of criminals and communists, inflation and what not. All have been boners of which the American public is be-

coming more and more aware. A common sense attitude toward those evils is becoming more and more evident.

We might say that national consciousness is looking back at our recent history and resolving to do something about it. That attitude will be apparent to a great extent in next year's elections — after which our government, so concerned with public opinion, can be expected to start un-doing some of its folly.

This is not saying that our country is all bad. On the contrary, it is the world's best.

Despite our faults we have the highest standards of freedom, comfort and security. But that does not mean we have to keep on tolerating the faults.

A wonderful resolution on the national scale is to appreciate the blessings we have and even improve on them, while working seriously to eliminate the evils.
