GOLDTHWAITE, July 16-(Sp)-Eight members of the Texas Legis-

lature were guests of Goldthwaite and the representative from this district, Homer C. DeWolfe, at the Mills County Fair today. They arrived here this morning and after a morning of speeches at the auditorium were the guests of the Lions Club at luncheon. This afternoon the representatives

were to be entertained by the fair association as honor guests at races and baseball game, to be followed by an iced watermelon feast at the Country Club at 5 o'clock. After viewing the exhibits this morning on their tour of inspection several of the legislators told

newspaper men that they were astonished at the exhibits. They pronounced them to be better than anything that they had expected and said that they would do credit to any county. They commented especially on the fruit and vegetable exhibits, speaking of the corn exhibits as being perfect specimen of

The first day, Wednesday broke all attendance records for the fair as thousands poured through the gates all day to witness the various entertainments and see the exhibits. The horse races and an entertainment Wednesday night were the features of the program.

The grand stand was packed for

the races and baseball games and then last night one of the largest crowds in the history of the county gathered to see the presentation of local talent, presented in drills, songs and other forms of entertainment. This morning the crowds began to arrive early and at noon was still increasing with prospects in view of

one of the largest crowds of the entire fair. Only two minor accidents have marred the fair these being one woman struck with a baseball and to

Sinclair oils, gasoline, greases and erosene are used by motorists who really think of their motors when buying fuel, says U. O. Andrews, local agent for the Sinclair Refining Company, 805 Wilson street. Oil and Gas made by Sinclair is distinctive in quality and grade and is demanded by the careful motorist, he declares.

"Sinclair's interests in the country's finest oil fields enables us to produce a line of petroleum products which had no superior for completeoils for almost every purpose, lubri-Re-arching of springs is another has been visiting his grandmother, and for greasing machinery, are of cant in automobiles and tractors the highest grade possible to make, Mr. Andrews says. He invites dealers to call him for details as to

Capacity Differs

Radiation capacity depends largely on whether the surface of the material is bright or dull. Bodies have high capacity for radiation and are poor reflectors. A table in Mechanical Engineers' Handbook gives the absorbing or radiating capacity of polished steel as 17, as compared with 7 for hammered copper. The reflecting pow-ers are given as 83 for polished steel, 93 for hammered copper.

FLOYD WILLIFCED

D. MURPHY. Business Manager

He Will Choose to Run

VICE PRESIDENT Curtis, returndeserving Republican and seek his former post as Senator

There are several reasons for this belief, not the least of them being the possibility that as a running might meet defeat and have to retire to private life, which in his case would be extremely distasteful. Another reason is that he finds the work of the vice presidency rather irksome, and by no means as attractive as one might suppose. And still another reason is that if he can secure election to the Senate he will have a reasonable prospect of until he is retired by death.

AUTOMOBILE Edition

ACCESSORIES

All that is modern reaches a climax of expression in THE AUTOMOBILE. Speed, Power, Mechanics, Functional Beauty.

Miracles of invention and engineering have followed closely the abstract progress of science. Art itself has poured out its genius into compositions of glass and steel, and aluminum. Then have these dreams been given the breath of dynamic life by industry. The laboratory, the workshop, the studio, the precision plant.

From these has come a force of incredible magnitude; a force that determines the transportation of twenty-five million persons in America alone. On the streets of every village, town and city, on the highways of every state, the automobile is swept along by the magic of its own cylinders. Yet each year brings new wonders and values to the automotive field. The most recent developments are recorded in the pages of this section, and may be inspected at their respective places, as indicated through other pages of this paper.

Accessories and Equipment

As the automobile progresses in its developments, so is the same about accessories and equipment. New ideas calls for new inventions. The metal pot has been brewing with everything that goes for SAFETY, COMFORT AN DAPPEARANCES of the Automobile.

Everything that is new has been brought forward and put on regular display for those who desires to make their acquaintances with the up-to-date methods of motoring with SAFETY.

Springing from these specialized talents, from ceaseless laboratory experimentation, the utmost manufacturing efficiency and proud craftsmanship, is perfected in this

Motordom's Pageant of Miracles in This Edition

NOW IS PROPER TIME FOR RECONDITIONING OF THE AUTOMOBILES

Now is the proper time to have utomobiles thoroughly recondi tioned for vacation use, says B pany, 405 South Broadway. Mr. Ford has had life time experience in the business and will give expert service any phase of automobile If Mr. Ford does not have what his customers want, he can get it for them for less money than they can.

Bob Ford Motor Company specialixes in rebuilding wrecked cars, motor rebuilding, radiator repairing, brake relining and welding work of any find. The company is fully equipped with the best of modern machinery for the work and can do the work at a minimum cost and in a minimum time, Mr. Ford

NEW CHEVROLET SIX

-BEFORE YOU BU

Six

THE NEW CHEVROLET IS WINNING THE PRAISE OF ALL WHO DRIVE IT ----

Thousands of new Chevrolets in the hands of owners throughout the country are now proving that the car

merited fully the enthusiastic reception given it at the time of its intro-

duction early this year.

MATCHLESS ECONOMY With Six-Cylinder Smoothness

You will find the NEW CHEVROLET with bodies luxuriously comfortable. Its long, flexible springs and shock absorbers assure restful travel, even on rough roads. Its balanced weight and low center of gravity gives the roadability, so essential to comfortable driving at high speed.

It's Wise To Choose A Chevrolet-Six

We invite you to come by and let us give you a demonstration of this wonderful car value . . . you will appreciate its superiority ... and surprise you with its unequalled performances ...

The only Tire Fact von need to know

200 West Baker Street

When you read a tire advertisement that almost sweeps aside your judgment with its enthusiasm: SAY TO YOURSELF

"More people ride on Guadgear Tires than on any other kind!"

When you face a sales argument that sounds good but you have no means of testing: SAY TO YOURSELF

"More people ride on Goodyear Tires than on any other kind!"

When the high-pressure dealer works on you with hypnotic eye and coercive logic: SAY TO YOURSELF

"More people ride on Goodyear Tires than on any other kind!"

When you are tempted to fall for bargain claims, a long trade-in, trick size comparisons, or anything else but intrinsic tire goodness: SAY TO YOURSELF

"More people ride on Goodyear Tires than on any other kind!"

Then, just for variety, ask yourself "WHY?" Why is it true that "More people ride on Goodgear Tires than on any other kind!"

The answer lies in the fact that Goodyear has, year after year, given the public built-in quality and value which far-out-weighs trick comparisons and clamorous claims.

MANAGER MONTGOMERY WARD RECOMMENDS AN **INSPECTION OF TIRES**

C. L. Stewart of Montgomery Ward Company store here said that he could speak from experience when recommended to the average motorist that careful inspection be given the entire automobile before starting on a tour. He believes that careful attention before the start of a long tour will add much to the life of the automobile as well as the pleasure of the trip. He returned unday from a 3,300 miles vacation tour and says that he believes he speaks from experience.

He said that no motorist could lay too much stress to tires as good tire equipment added 100 per cent to the of the trip. He said that by fully equipping an automobile with tires at the start of a trip the careful motorist would save much money from tire repair. With many highways being constructed and the large number of detours throughout the state it is more than essential that good tires be placed on an automobile before the start of any trip.

anyone will enjoy a tour much more, as well as deriving much pleasure from the fact that while in any city his tires present a real appearance. Following the completion of the tour no matter how many miles are traveled there will be many months wear in the Riverside during the fall and inter and into next summer while being driven about town.

Accessories Department Stewart said that he also wished to stress the automobile achere the motorits could find every-

thing to be needed on a tour. Depleted tool kits can be filled out at a small cost by the purchase of needed wrenches and other equipment. Small accessories, needed for W. Porter. several months and almost an essential for the trip can be found in the accessory department. He said that he believed that a tour of inspection through this department would conmotorist of the many needs and that by such a tour he J. R. Deen Sunday. could find many things needed to to the comfort of the trip.

ADD TO THE BURDEN

If the Treasury Department succeeds in levying a one-cent federal gasoline tax on motorists, it will nean an added burden of \$157,614,-000 annually to the motorists of the United States.

Ancient Time Measurement Records at the Casa Grande ruins a Arizona disclose that a perfect system of time measurement was in use thousands of years ago. Once a year, at exactly the moment the has completed its orbit around the sun the rays of the sun beam through the Hohoakam, mark-ing definitely the beginning or end of a year. The Hohoakam was the calendar used by the prehistoric peoples who occupied the ruins. It is thought smaller divisions of time

ISAFETY TIRE COMPANY LEADING IN GOODYEAR **DEALERS SALES RACE**

ed in Brownwood, is one of the leading dealers for Goodyear tires in the Southwestern Division which includes Texas, Oklahoma, Louisianna, Missouri, Arkansas and Kan-sas, Every dealer to set a quota each month of the number of tires that should be sold. The Safety Tire Company every month s far above the quota in tire sales.

The local dealers, Homer Duncum and John Parker, are working this year in the third annual, Goodyear-Zeppelin Race for Goodyear dealers. The dealers in the Southwest Division who sell the most tires above the quota by August will receive a free trip to Akron. Mr. Dunany other dealer in the division. We have every reason to believe

hat we will get to go to Akron free again this year because in the first check-up in the race this year it showed that the Safety Tire Company was ahead of the other dealstates Mr. Duncum We certainly want that trip and
