Entered at the Postoffice at Brownwood, Texas, as second-class mail matter.

A. D. MURPHY, Business Manager
ANY erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of The Banner-Bulletin will be promptly corrected when brought to the attention of the publisher.

Europe's Debts

PRESIDENT HOOVER is prepared to suggest steps for averting the financial crisis in Europe, following a series of conferences with congressional leaders of both parties, and is believed to have been giving his attention particularly to the situation in Germany which is regarded as the center of the economic disturbance.

Mr. Hoover is believed to favor a moratorium on war debts, and possibly a loan to Germany. He has stated emphatically that debt cancellation is not being considered, and it is said that no discussion of that proposition has been had with the debtor nations.

Nations, we learn, must adopt the same methods that have been used by individuals during the period of depression. Everybody, it seems, owes everybody else, and while no general moratorium has been declared and credits are being extended with the utmost caution, high-pressure collection methods have been temporarily laid aside because they would be ineffective under existing conditions.

Jewish Fundamentalism
PROTESTANT Christians are not the only ones who are worried by theological modernism. There are Jewish fundamentalists who deplore with all earnestness the tendency toward "humanism," which is their term for modernism and probably expresses the thought even better.

Reprimanding Amelia
SOMEWHAT surprising was the announcement from Washington the other day that an official reprimand had been forwarded to Mrs. Amelia Earhart Putnam because of the crash of her autogyro at the Abilene airport.

Reforming the Border
IT MAY NOT be very long until those who want to gamble in a big way will be required to seek some secluded spot in the good old U. S. A. like Reno, Nevada, instead of journeying down into Mexico for entertainment. The border is being reformed.

A Tremendous Project
THOSE who have been somewhat impatient because of the apparently slow progress being made at the big dam which when completed will impound a veritable sea of water should rejoice, instead, because of the immense volume of work that has been accomplished there since the

contract was let on the project last November. The casual visitor, who steps on the hilltop and looks down into the big basin where men and machinery seem to be moving very, very slowly and to no apparent purpose, can see but little change in the general appearance of the project as he comes from week to week to see what is being done.

It is going to be a tremendous project when it is completed. We are persuaded that very few citizens of Brownwood realize its magnitude, and fewer still have any conception of the myriad details involved in its construction. The dam itself is monumental in size, and yet it is only one of the many big things connected with the project. It will impound a lake covering more than 7,000 acres of land, or nearly eleven square miles, and when the reservoir is filled with its 125,000 acre feet of water the average depth will be over seventeen feet.

It is the purpose of the Texas Press to use its utmost influence to counteract this state of mind that has grown about us and by a strenuous campaign to "Build Texas," to stop talk of depression by talking Texas, past, present and future.

Looking Ahead
It seems appropriate that during the closing five year period of the first century of Texas history Texans should review in every possible way the glorious history and achievements of the past one hundred years, should note the progress that has been made and should make broad plans for an even greater development. To all this the Texas Press Association pledged itself anew.

Co-operative Movements
It is fortunate that just at this time the manufacturing industries of the State are at work on a five years plan to stimulate patronage of Texas-made products, to build up more and greater industries, to quicken Texas trade. The Centennial movement will go hand in hand with this worthy effort.

All Can Help
Every newspaper in Texas, every individual in the State, can help in the great forward-looking movements looking to the State's greatest development. Sometimes we get the idea that because we can not accomplish great things, we need not try anything—that our small efforts are hardly worth while. I may not be able to do much individually. I could not build a city alone or even a small village industry. What I can do is make a contribution to the good of the six million people of Texas, as but the six million people of Texas working together toward the same ends can accomplish what even the dream of the people themselves. All that is needed to "Build Texas" is the spirit of working together which the Texas Press has determined to try to build up.

Production and Prices
Retail prices of products need to be brought to conform more closely to prices obtained at places of production. Woolen and cotton manufactures are admitted to be high at the prices now being paid for wool and cotton to the producers. Manufacturers and dealers agree to this, but say that costs of production and distribution are such that they can not sell at less prices and continue in business. Many farm products are now so low at the farms that they are allowed to rot in the fields, while multiplied thousands throughout the world are suffering for food, and retail store prices remain high. Again the reason for this anomalous condition is given as high cost of distribution, brought about by transportation charges, expense of advertising, middle-men, sales wages, rent, delivery and many other items. Something needs to be done to eliminate the immense waste between producers and consumers, and it is an

TEXAS AND TEXANS

By WILL H. MAYES, Austin, Texas. "All Texans for All Texans"

Build Texas Spirit
If every Texan could catch the spirit of the recent meeting of the Texas Press Association there would be no more "what-ifs" heard in the State. It was announced as a "Build Texas" aspirational meeting, and practically every talk was around that theme. Speakers represented most of the industries and enterprises of the State, leaders in which spoke from personal study and observation of present conditions and immediate prospects of every phase of business life in Texas. All admitted that conditions have not been all that could have been desired, all agreed that such conditions have existed in worse degree time and again, all showed how they have been met heretofore and overcome by a courageous people, and all predicted that the country will fast return to the highest peaks of prosperity.

Irrigation Development
The highly a section of Texas in which the irrigation development project under way or contemplated. Some of these are on immense scales and will bring into regular and large production vast areas of country. Others are small enterprises of individuals and communities. In every case they will result in more regular and larger and consequently more profitable returns per acre, where there is proper diversification, cultivation and marketing. All of the reservoirs are to be stocked with fish and in the years to come fish are to become a staple table commodity of Texas people rather than an occasional luxury. Irrigation and farm storage will do much for better living in Texas, but there is likely to be much change in farming methods to which the people will have to adapt themselves.

Industrial Texas
THE TEXAS WEEKLY calls attention to one rapidly developing Texas industry to which most of us have given little thought. There are 35 dress factories of appreciable size operating in Texas and a number of smaller ones. They have a combined total of 3,600 machines, an investment of around a half million dollars, exclusive of buildings, capacity of 936,000 dozen dresses annually, or 11,232,000 dresses that sell at from \$1.00 to \$10.75 each. These are mostly in the cities, but there is no reason why a dress factory may not be operated just as advantageously in any small town where there are living conditions and good. The process of making dresses from the fabrics increases values about 120 per cent, which goes to Texas labor and Texas capital.

Worker at Grain Combine Injured
L. B. Burnham, Jr., of Mills county, suffered a severely lacerated right arm when he was caught in the drive chain of a grain combine at 5:15 o'clock Tuesday afternoon. He is resting nicely in the Central Texas Hospital, where he was taken about 8 o'clock last night. He and another man were cutting grain 17 miles south of Goldthwaite when the accident occurred. Mr. Burnham's shirt sleeve on his left arm caught in the chain and when he tried to push himself away with his right hand it was also caught in the chain and his fingers and flesh were badly torn. He was taken to a doctor at Goldthwaite where emergency treatment was given and then brought to the local hospital, where several stitches were taken to close the wounds in his arm.

Jury Tamperer Is Convicted, Sent To Jail And Is Fined
TEXARKANA, Ark., June 24—(AP)—Lee Stone, charged with contempt of court in connection with alleged jury tampering during the trial of Carl Bell, who was acquitted last night, was sentenced to the dynamite guard in the city jail over the Red river, today was convicted, sentenced to ten days in jail and fined \$50 by Circuit Judge Dexter Bush. Meanwhile, Prosecuting Attorney Millard Alford declared today that the search for "higher-ups" in the dynamite case, the \$500,000 bridge span last September would be continued as long as he was in office.

Ruth Nichols May Leave Hospital In Few Days, Is Hoped
SAINT JOHN, N. B., June 24—(AP)—Ruth Nichols of New York, who was injured when she smashed her plane in landing here Monday, probably will be permitted to leave the hospital in a few days, physicians said today. Miss Nichols' condition remained unchanged today. She was still suffering considerable pain from two injured vertebrae. She slept at intervals.

DAVIS STATES POSITION AS TO OIL MEASURES

A news story from Coleman in last Friday's Bulletin stated that a petition had been circulated there to be presented to Hon. E. M. Davis of Brownwood, representative of Brown and Coleman counties in the Legislature, asking his aid in "an effort to save the oil industry" and stating: "We earnestly solicit your influence and energies in securing needed corrective remedies at the earliest date possible."

The petition, the Coleman statement said, had been signed by independent oil operators, royalty owners and business men of Coleman and Brown counties. Judge Davis said Tuesday that he had not received the petition referred to, nor any communication regarding it, and that the only knowledge he had of it was from what he had seen in the newspaper.

Not Against Proration
He is not against proration, Judge Davis said, and is listed as one of the legislators who would have voted for the Housley bill if that bill had come to a vote at the last session. But he does not believe an extra session would accomplish anything in behalf of the oil industry unless there was agreement beforehand on measures to be adopted.

Writing Judge Davis under date of June 13, Mr. Cheney, well known petroleum geologist, said: "As an independent oil producer I am very much interested in your position about more effective proration laws. Stocks above ground are so huge (660,000,000 barrels) and known reserves so great in fields already discovered that there seems to be no chance of bringing good times back to the oil business without curtailing production to meet current demand. Apparently this can not be left to voluntary curtailment, for there are always some who wish to play the hog. Flowing of one well above proration allowance requires the similar treatment on neighboring properties and a single well on 5 acres can thus prevent proration of an entire pool."

Says Present Law Inadequate
Continuing, Mr. Cheney said: "It is well understood by now that present laws forbidding only physical waste are not adequate to meet the situation and that any one may circumvent proration orders by the junction route." Further in his letter he states: "The restoration of reasonable prices under the sound economic plan of taking ratably only the amount of oil needed for current consumption to be the easiest way back to the oil business without curtailment which it is now facing. The state tax of two per cent on 300,000,000 barrels at 25 cents per barrel is \$1,500,000 and at one dollar per barrel is \$6,000,000. The counties and schools also lose through vanishing values for oil properties on their ad valorem taxes. Undoubtedly

GOOD SHOWING OIL AND GAS IN BONWELL WELL

The C. E. Bonwell well on the Parker farm six miles east of Brownwood has a flow of gas and a showing of oil that is extremely interesting at a depth of 2,603 feet. Just how much there is either of gas or oil—and by the same token just what the ultimate result of the well is to be—can not be determined at this time, for the hole is full of water and all the oil and gas that reaches the surface must make its way against the heavy pressure of the more than 2,600 feet of water.

Heavy Gas Flow Certain
That there is a heavy gas flow is certain, for it is forcing out of the well a constant bubbling stream of water from the well. The well is over 700 feet in the Ellenberger line from the top of the lime and sulphur water at 2,500 feet, but the water had not flowed from the well until the gas was encountered at the lower depth. Flows of gas of five million cubic feet or more have been known to be completely "killed" in wells of less than 1,500 feet in this section, drillers say, when the holes were filled with water.

Occasional bubbles of a very high grade oil come up through the water and form a light rainbow on the stream that runs off around the slushpit.

Below Contract Depth
This well is another illustration of the importance of always "going one foot deeper," as many drillers and oil opera-

hundreds of independent operators and small companies will succumb unless effective proration is soon secured and a reasonable price for oil retained thereby.

Reply By Davis
Judge Davis stated his position on oil legislation in his reply to Mr. Cheney's letter as follows: June 16, 1931. Dear Sir:

I am in receipt of your letter of June 13th, wherein you urge me to give careful thought and consideration to the idea of adequate proration laws. In reply, I beg to advise that it has been my idea all along that we should strengthen our proration laws on oil, and I had that idea during the regular session of the 42nd legislature, when I expressed myself as favorable to the Housley bill. Strange to say, though, I find the independent oil men in Brown county almost united in opposition to any kind of proration laws. I helped to put over the bill which protects pumping wells in this vicinity against unreasonable proration, and it was a complete surprise to me that the independent operators in this section have united to oppose legislation which would force proration on flush production in East Texas and elsewhere. It is my conviction that we should create a commission for conservation of all natural resources, and that this commission should be appointed by the Governor or some other appointive body, and hold office for three years, appointing one of the six commissioners each two years; and then pass laws giving them rather summary powers to control and conserve oil, gas and the other natural resources. These commissioners would then be picked for their special aptitude along these lines, and not because they understood transportation problems, or are just good fellows with a big political following.

Until the independent oil men are led to see the necessity of curtailment of production, and particularly those who are my constituents, I am rather reluctant to join in asking for a special session of the legislature.

I may be all wrong, but it is my judgment that the effective way to prorate and curtail oil production is to give a commission authority to stop the drilling of any and all additional wells, except such offset wells as are required to protect adjoining property owners. It is absurd to me to put the oil wells in Brown and Coleman counties that have been drilled from four to ten years, under the proration law, and the same time permit East Texas to go on drilling new wells, where the flush production is immense. I repeat, in my judgment, the effective way to curtail production is to give someone authority to forbid the drilling of more wells in all fields until the surplus of oil is materially reduced. Certainly it is more economical to store oil in the ground than it is to store oil above the ground.

I appreciate your letter, and sentiments therein contained. I have faith in your judgment, and will welcome suggestions from you at any time.

Trio of American Leaders to Judge Radio Program Contest

Recognizing the widespread interest in the coast-to-coast contest to determine the American public's preference in radio entertainment, three of the nation's outstanding men have agreed to act as judges of the contest...

"This contest affords the first nation-wide opportunity for the public to express itself on the types of radio entertainment desired," said F. W. Jameson, director of Ward & Co.'s department of public relations...

"The type of program winning the biggest vote of approval will form the basis of Ward's radio offering the rest of the year. Judging by the widespread interest, the poll will be enormous and should afford an accurate gauge of the public's preference in radio entertainment."

Each program will be broadcast daily, except Sunday, for one week, beginning July 1st, and the contest will end August 7th. Requirements for entering the contest will be announced during the opening program on July 1st...

The radio-program research will be conducted over the following network of 35 NBC stations:

At 8:30 a. m., central daylight time—

- WJR—Detroit; WLW—Cincinnati; KWK—St. Louis; KFAB—Lincoln; WREN—Kansas City; KSTP—St. Paul; WJZ—New York; WBZ—Boston; WBZA—Springfield; WBAL—Baltimore; WHAM—Rochester; WGAR—Cleveland; KBKA—Pittsburgh; WEBC—Duluth; WDAY—Fargo; KFYR—Bismark; WRVA—Richmond; WPTF—Raleigh; WJAX—Jacksonville; WHAS—Louisville; WSM—Nashville; WABI—Birmingham; WJBX—Jackson; WSMB—New Orleans; WKY—Oklahoma City; KTHS—Hot Springs; KPRC—Houston; WFAA—Dallas (except Monday).

# Wild Bull

**KANSAS CITY, June 22.—(AP)**—Leaping Louis, 1,500 pound white Brahman bull, chewed a reminiscent cud today in a pasture within seeing distance of his greatest public triumph.

Louis furnished the thrills of a rodeo at the amusement resort, yesterday, injuring two persons and giving Babe, an elephant, the worst case of nervous hysteria she has had since she got stuck in the mud several weeks ago.

The rampage started when the bull unsent John Pacey, Rawlins, Wyo., cowboy. Spectators scurried for trees, the lake and the open spaces as the animal crushed down a 6-foot wire fence, T. N. Chipley, a farm hand, was mauled by the bull. Miss Helen Corbett of Kansas City suffered abrasions of her right leg.

Cowboys pursued Louis ripped a tall light from a motor car and tore the spare tire from another.

Louis led the horsemen in a 440-yard dash down the highway. Louis won and several hundred employees of a life insurance company precipitately conceded him a reward in the shade and grass of a picnic grove.

The bull was calm when the cowboys arrived. He evinced no interest in an announcement of Frank Winn, owner of the resort, that his contract was to be cancelled.

# Gets Rulings On New Pistol Law

County Tax Collector Lee Meek said this morning that he had been receiving several inquiries concerning the passing of a bill in the legislature relative to the sale of pistols. He has gotten a ruling from Austin on the law, which went into effect on May 28 of this year.

The occupation tax on dealers in pistols includes any person who is in the business for a profit and who sells, barter, trades or by any other means deals in pistols, revolvers or any gun coming under that definition. Mr. Meek said that the law did not relate to private individuals selling guns which they had purchased.

According to the law any person dealing in pistols must get his occupation tax and then when any transaction involving a pistol is made a record of the make, kind, number and person to whom it is sold must be made. It also specifies that any pistol shall be sold to a minor, a person in the heat of passion or anyone not competent to properly use such a firearm.

The person violating any of the provisions shall be guilty of a misdemeanor. Mr. Meek said and shall be liable to a fine. He said further that any person dealing in pistols should consult him concerning the new law regulating the sale of such weapons.

The law does not apply to any long firearms such as rifles and shotguns.

# Should Use All Cuts Of Lambs, Declares Snyder

The advantages of using all cuts of lamb rather than a selected few will be pointed out by Roy W. Snyder from the Extension Service of A. & M. College at the meeting arranged for homemakers of Brownwood at the Memorial hall at 3 o'clock Thursday afternoon. This cutting which will prove helpful to them in their task of preparing those everlasting three meals a day, 365 days a year, says Mr. Snyder.

In the case of lamb, many of the possibilities of this meat have been overlooked, he says. Consumers have been in the habit of thinking of lamb in terms of only chops and legs; whereas, there are many other cuts which afford palatable dishes if properly prepared. Neither is lamb limited strictly to the spring months as it used to be, he stated. Advanced methods of production have made it possible to provide the market with quality lamb the year around.

In a demonstration of lamb cutting at the meeting on Thursday afternoon, Mr. Snyder will explain the different cuts and how to identify them. He promises a number of revelations in his demonstration in the way of modern lamb cuts. The modern cuts are occasioned by the present demand for small, attractive cuts of meat, Snyder says. The housewife will not use the large "chunks" of meat as sold in years past. She wants small portions of attractive appearance. Local housewives should find it to their advantage to become acquainted with the modern cuts which will be made at the meeting.

# WANTED

To trade garage, well established, in San Angelo, Texas, 50x190 feet, fire proof. Established 12 years. Will invoice about \$12,000. Free of debt. Also brick apartment house on pavement in San Angelo and San Antonio, Texas. Will trade any or all for ranch or farm land if not too bad in debt.

Must quickly slay these conditions! Improves rest, full sleep and energy, or money back. Only 50c at Kenro's Retail Drug Stores.

# GIRL IS BEAT WITH BUTT OF GUN AND SHOT

**AMARILLO, Texas, June 23.—(AP)**—After attacking his step-daughter, Josephine Loden, 14, with the butt of a rifle and then shooting her with a revolver. Ray Loden, 30, shot himself to death here today. The girl is in a hospital, little hope being held for her recovery.

Loden and the girl were the only members of the family in the house at the time of the attack. Mrs. Loden had gone to a home laundry to work, taking two younger children, one an infant of only a few months, with her, Lillian, 16, an older daughter of Mrs. Loden, was operating a soda water stand in front of the residence. The two small children were Loden's.

The attack victim has a bullet wound through the back of her head, near the base of the brain, and had scalp wounds inflicted by the butt of a rifle.

When the older sister heard the shots in the house she ran to the home of a neighbor saying: "I know something was going to happen." She said she did not know the cause of the attack, but said her step-father was not kind to the children or her mother. She told neighbors she was afraid to return to the house where the shooting occurred.

Loden, a former telephone cable man, had been out of work about four months. He was arrested May 3 for violation of the liquor laws, and was fined \$500 in federal court. He served 30 days in the Potter county jail, then filed a pauper's cash and was released late Wednesday.

# Atlanta Mayor Back At Desk, Still Says Pro Law Is Failure

**ATLANTA, June 24.—(AP)**—Back at his office in the city hall today after a tour of France with a group of American mayors who were guests of the French government, Mayor James L. Key faced a recall movement and reiterated that prohibition is a "failure."

The criticism he voiced in Paris of prohibition in his homeland started circulation of petitions for his recall and aroused protests from the preachers and others, but he was welcomed home last night with a parade that his friends said included 75,000 persons.

George Finch, attorney, said 3,000

# Have Promise of Highway Paving to Main Street

City Manager H. V. Hennen, Alderman T. Carlson, Hilton Burks, and resident engineer Leo Ehlinger returned late yesterday from Austin where they went to ask aid from the state highway commission for paving a portion of the highway in Brownwood.

Mr. Hennen presented to members of the body, which showed the expenditure of the city in getting the right-of-way for the highway in Brownwood. He pointed out to W. R. Ely, chairman of the commission, and the other member interviewed that the city had a paved street along West Broadway to use for a part of the highway, but that in an effort to shorten the route and add traffic the city had purchased right-of-way for the highway from Bell Plaine Avenue to Main Street.

By getting a right-of-way here the distance was shortened, the road straightened and some of the traffic taken from the business section. After getting these figures, Mr. Ely told Mr. Hennen and the dele-

# Girl Flier Loses Life While Doing Stunts Last Night

**AKRON, O., June 24.—(AP)**—An ambition to qualify for a license as a transport pilot ended fatally last night for Miss Mildred Stinaff, 19, of Akron, former holder of the women's record for loop flying.

Her transport training plane which she was flying over the Akron Municipal airport fell to the ground within sight of spectators, including her parents, Mr. and Mrs. Charles Stinaff. She died at the city hospital.

Her father said she had taken off only a few minutes before the accident and had made a loop or two at a safe height to test the plane. The plane straightened out and was flying at an even keel when something happened that sent it into a spin.

She apparently had realized her plane was about to crack up an instant before the fall. She had shut off the gasoline feed and ignition to prevent fire, but had no time left, apparently, to take her parachute.

# MR. PRALL, Manager of Tire Dept. and DR. HARVEY, Laboratory Chief, examining (in Ward's technical laboratory) Riverside Tire sent in by MR. RALSTON.

MR. PRALL, Manager of Tire Dept. and DR. HARVEY, Laboratory Chief, examining (in Ward's technical laboratory) Riverside Tire sent in by MR. RALSTON.

# 86,000 MILES

Here's an endurance record that speaks for RIVERSIDE Quality. The tire shown above was sent us by Mr. J. H. Ralston of Delano, California, as an expression of his satisfaction with RIVERSIDE service. Over all kinds of roads, and in all kinds of weather, this sturdy RIVERSIDE clicked off mileage. Twenty thousand, fifty thousand, seventy-five thousand miles—and still going strong! And at last, after his RIVERSIDE Cord had covered better than 86,000 miles, Mr. Ralston sent it back to Ward's as an example of RIVERSIDE endurance.

# WARD'S RIVERSIDES are Turning in Amazing Mileage Records All Over America! . . . 42,000, 68,000, 86,000 MILES!

AFTER all, you buy a tire for just one thing—and that's MILEAGE. And you do get MILEAGE when you buy a Riverside. Note the tire above that covered 86,000 miles. And Mr. C. A. Puariea of Portland, Ore., writes us about four Riversides that have covered 42,000 miles and are still in use. Mr. R. H. Easter of Elma, Washington, reports a Riverside in use every day on a school bus covered 68,000 miles. These three examples are but typical of the scores of letters and reports we are constantly receiving on Riverside performance. These three testimonials came to us unsolicited—they were not bought at a price!

No wonder jealous tire makers and dealers are becoming alarmed over the tremendous swing of tire buyers to Riversides. The most unfair and bitter tactics ever known in the tire industry are being used today to fight Ward's Riversides. Advertising has appeared all over the country in which mail order tires are referred to as "mongrels." Unfair comparison charts are being published and displayed by competitors. Second line tires are being offered under nationally known tire names at the same prices as first quality Riversides—BUT THEY CAN'T BEAT RIVERSIDE PERFORMANCE, AND THAT'S WHAT COUNTS, and that's what the customer wants.

## We'll Match Riversides . . . on the Road . . . Against ANY Tire Made and We'll Beat it in Price!

Riverside tires are one of the best known in America. They have been sold for 19 years. They are made by one of the largest tire companies in the world. They are built to the most rigid specifications known. They are the finest quality it is possible to produce. They are backed by a guarantee that is without limit as to time or mileage. AND THEY SELL FOR LESS THAN ANY FIRST QUALITY NATIONALLY ADVERTISED TIRE ON THE MARKET! These sound like sensational claims. But they're FACTS. Montgomery Ward & Co., one of the largest merchandising institutions in the world, now in its 59th year in business, stands back of every claim made in its advertisements. Note this—the nationally advertised tires offered you at the same prices as Riversides are NOT the first quality tires of the manufacturers who make them—but their second quality tires—put on the market to meet Riverside prices. So, always compare qualities as well as prices. The table at the right lists some of the best known first quality tires that DO compare with Riversides in quality—YOU COMPARE THE PRICES!

**COMPARE**

Here are some leading makes of tires that are similar in quality to our 4-ply Riversides, and the published list prices:

SIZE	WARD'S RIVERSIDES (4-ply)	Firestone Gun-Driven High Speed Goodrich All Weather Goodyear Silverstone (4-ply)
28x4.40/21	\$4.95	\$7.05
30x4.50/21	5.99	7.85
28x4.75/19	6.85	8.55
29x5.00/19	7.00	9.15
30x5.00/20	7.10	9.40
28x5.25/18	7.90	10.35
31x5.25/21	8.55	11.40
29x5.50/19	8.90	12.00
30x5.50/20	9.00	12.50

Here are some leading makes of tires that are similar in quality to our 6-ply Riversides, and the published list prices:

SIZE	WARD'S RIVERSIDES Heavy Duty (6-ply)	Firestone Gun-Driven High Speed Goodrich All Weather Heavy Duty Goodyear Silverstone (6-ply)
28x4.40/21	\$7.15	\$10.10
30x4.50/21	7.48	10.80
28x4.75/19	8.30	11.15
29x5.00/19	8.90	12.25
30x5.00/20	9.10	12.60
28x5.25/18	9.60	13.50
31x5.25/21	10.25	14.75
29x5.50/19	10.95	15.20
30x5.50/20	11.10	16.10

Not all sizes have been listed—but enough to give an idea of how prices compare. And by the way, Ward's prices are even LESS when you buy in PAIRS.

# If the Cure for this

It's time something drastic was done about this depression. From acute hysteria it has turned into chronic dyspepsia. And unnecessarily too.

Unfortunately, there is some unemployment, but millions still have good jobs. If they would put their money into circulation the depression would end. So if we and all stores sell more merchandise it means that more people go back to work to manufacture a new supply.

Believing that low prices will persuade the public to buy, we are offering our most dramatic values in ten years. These extremely low prices are made possible by lower prices on raw materials (they now average about 30% below the 1929 level) plus our redoubled efforts. On these pages you will find but a few of the unprecedented bargains that await you at the Shop of Youth.

#### A Personal Message From Mrs. J. W. Jennings

BABSON says . . . "Marketing is key to prosperity . . . Distributors must cut costs and pass along to consumers the savings already achieved in production." In a long report issued at Babson Park, Mass., on June 12th, he gave his expert resume of the present economic status in the country. Financiers and Industrial heads have long looked to BABSON as one of the leading visionaries in the country. And the very theory he has now put into words, we have put into practice for more than a year. When we first felt the trend of the times changing, we established entirely new economy-policies within the store to meet the economic conditions within the country. We launched a campaign of VALUES such as have not been heard or dreamed of before. We let down our prices, without letting down one fraction of our style or quality. It was a matter of facing the facts as they presented themselves.

Consequently our volume of sales for 1931 exceed 1930. The sale of units for 1931 exceed and in some departments double 1930. We are running more machines in 1931 than in 1930 and have not closed one. We have made more trousseaus in 1931 than in any other year in our business. We have sold more merchandise at a greater distance than ever before. We have done our best. We thank you, dear friends for our results.

Sincerely,  
MRS. J. W. JENNINGS

#### Hats of Fine Straws and Individual Styles

These 100 Hats are spring styles, beautifully made and extremely smart. They are fresh and attractive and are exceptional in the savings which they make possible.

# FORD VISIONS FACTORY-FARM COMMUNITIES

DETROIT, June 23.—(P)—Henry Ford visions the nation of the future—the perfect industrial state—as a nation made up of factories surrounded by farms able to sustain them.

The farm communities will supply the factories with carrots, cantaloupes, corn, wheat and other agricultural products, from which automobiles, building material, clothing and the necessities of life—with food an incidental product—will be turned out.

Great industrial centers no longer will be necessary, Mr. Ford theorizes, since the factories and farms will be scattered over the nation. Work will be brought to remote sections, with modern transportation the intermediary.

Farmers in the perfect industrial state, as envisioned by Mr. Ford, will be able to produce more in less time through highly improved methods. At proper seasons, they may be shifted to the factories to aid in production there, or the factory labor may go to the farms during the reaping seasons.

Turning with renewed vigor to the theory he has maintained for years—that agriculture and industry must interlock—Henry Ford today is enlarging an experimental farm near here until at present it extends over more than 3,000 acres. On this farm, engineers, scientists, soil experts and chemists will work on a lavish scale, attempting to prove Mr. Ford's contention that agricultural products may be turned into something other than food.

Mr. Ford emphasizes that his conjectures are speculative, that his engineers and chemists as yet have found only a few industrial uses for agricultural products—but he is insistent in the theory that industry and agriculture must join hands for their future success. His scientific assistants at present are engaged in breaking down farm products into their basic elements, to determine what industrial products can be developed cheaply.

Mr. Ford specifies that his "perfect industrial state" is in no sense an inevitable reality, but at the same time he reiterates his belief that scientific experimentation will bring new and better way of producing from the soil raw material for industrial uses.

Mr. Ford specifies that his "perfect industrial state" is in no sense an inevitable reality, but at the same time he reiterates his belief that scientific experimentation will bring new and better way of producing from the soil raw material for industrial uses.

American standards of living; but the thousand million dollars annually Mr. Hoover's administration is giving in tariff subsidies to contributors of Republican campaign expenses has built around the United States an impregnable wall that has stopped trading with Europe from buying from us. Europe naturally hates us and retaliates in every way possible.

**Hoover Generosity**  
"At the proper time and in a constitutional way, Americans would gladly match the generosity of all countries to relieve distressed Germany. But under our constitution only Congress can appropriate and apply public money, or grant a moratorium concerning debts foreign countries owe us. While Congress would likely authorize this European relief, at the same time granting proper relief at home, this is but another example of Hoover generosity to foreign peoples at the expense of Americans, and of his cold-blooded, misguiding, unsympathetic treatment of his own country men. When American farmers impoverished by three successive crop failures, resulting from unprecedented droughts, could not pay their interest to federal land banks, President Hoover and the last Congress were implored to suspend foreclosures for one year. Mr. Hoover had his department prevent a sympathetic Congress from granting such moratorium, and many American farm homes were foreclosed.

"We should be charitable and generous to Europe and Germany. But we should begin by first being charitable and generous to our own suffering Americans at home."

**NEGRO CONVICT'S BODY  
BEING HELD PENDING  
WORD FROM RELATIVES**  
SUGARLAND, Tex., June 23.—(P)—The body of Henry Asbury, negro convict, shot to death by B. B. Gaines, guard at the central state prison farm near here Sunday night, was being held today awaiting word from relatives.

Asbury was shot after he allegedly slashed T. B. Gott, assistant manager of the farm, with a razor. According to reports to Captain Buck Flannagan, manager of the farm, Asbury was in a group of trustees, who reported back to the farm late. Guards told them they would have to be back on time and Asbury "talked back" to them.

Gott stepped in to see about the trouble, Flannagan was told, and the negro attempted to cut his throat with a razor. Gott landed the blow with his left arm and the negro struck at him again, this time wounding him.

Guard Gaines then threw up his gun and shot the negro to death. Asbury was serving two sentences for burglary, one for two years from Fort Bend county and one for ten years from Burleson county.

**ARRANGE FOR GRAVEL  
AND ROCK FOR SECTION  
OF HIGHWAY NO. 129**  
An agreement was arranged Monday by the commissioners court in regular session for obtaining of the gravel to be used in the base and surface of highway No. 129. It appeared to the court that rock and gravel to be used for section C of the highway, a distance of 10.33 miles, could be obtained upon the land of P. H. Anderson and Mrs. E. C. Coomer and the Coomer heirs.

After some discussion it was agreed that Mr. Anderson should be paid \$1,100 and Mrs. Coomer and the Coomer heirs should be paid \$1,000 for the rock and gravel. It was stated by the court that the required material could be obtained at the above mentioned place at a great saving to the county.

## Brown County Farmers Harvesting Large Crops of Irish Potatoes

The work of digging Irish potatoes is being carried on by many farmers in several different sections of Brown county and the crop is said to be one of the best ever raised in this section. The northern part of the county, where there is quite a large acreage of Irish potatoes, was visited by County Farm Agent O. P. Griffin Friday. Yields as high as 100 bushels per acre have been reported in several fields, he stated.

A truck load of potatoes were brought to Brownwood Friday and sold to local merchants. The quality of the potatoes is very good and the farmers are this year grading them and putting them in first class market shape, Mr. Griffin says. The market on new potatoes at present is about 1-2 cents per pound.

## SEEK MEXICAN AFTER ATTACK MADE MONDAY

City and county officers were searching Tuesday for a Mexican youth, about 20 years old, who on Monday afternoon at about 4:30 o'clock entered the home of Mrs. Dillard Myrick, four miles from Brownwood near the Carnes dairy, demanding that she cook him a supper, and cutting her in the hand in a scuffle that ensued when he caught her by the arm.

Mrs. Myrick was alone with her young child when the Mexican, who she told officers, seemed to be drunk appeared at her door with a rifle and demanded food. He was walking, she told officers.

Mrs. Myrick told officers that the Mexican requested her to cook him some supper and that she told him that she did not have any wood cut. She told him that he grasped her arm, forcing her back to where the house. During a scuffle the Mexican laid down his gun and opened either a knife or a razor, Mrs. Myrick said that she didn't know which.

When the weapon was opened Mrs. Myrick attempted to grasp it and received a cut in the palm of her hand. The Mexican forced her into a bedroom, she told officers, and she fell according to reports to Captain Flannagan, manager of the farm, Asbury was in a group of trustees, who reported back to the farm late. Guards told them they would have to be back on time and Asbury "talked back" to them.

Gott stepped in to see about the trouble, Flannagan was told, and the negro attempted to cut his throat with a razor. Gott landed the blow with his left arm and the negro struck at him again, this time wounding him.

Guard Gaines then threw up his gun and shot the negro to death. Asbury was serving two sentences for burglary, one for two years from Fort Bend county and one for ten years from Burleson county.

After some discussion it was agreed that Mr. Anderson should be paid \$1,100 and Mrs. Coomer and the Coomer heirs should be paid \$1,000 for the rock and gravel. It was stated by the court that the required material could be obtained at the above mentioned place at a great saving to the county.

## BUY HOUSE TO BE MOVED TO PECAN STATION

A meeting of the industrial committee and the executive committee of the Chamber of Commerce was held last week with Dr. H. P. Traub to discuss plans for the purchase of a house to be placed upon the site of the pecan experiment station. After some discussion the deal for the purchase of the old Weakley residence on Center avenue was completed.

The house was purchased from Mrs. C. Robertson through her agent, J. J. Timmins, and will be moved to the site of the experiment station immediately. The deal called for a consideration of \$500. Bids are to be taken by the industrial committee present for the moving of the five-room dwelling.

After it has been moved it will be refinished and repainted to blend with the rest of the color scheme and motif of the station. Dr. Traub told the committee this morning that Spanish architecture would be followed throughout the landscaping and construction at the station.

Construction will start during the summer on the laboratory building which will be constructed of brick and hollow tile.

Four acres of land are to be landscaped by government engineers and this will be laid out around the dwelling and buildings of the station.

Dr. Traub said that the construction of outbuildings and laboratory was not as urgent as the moving of the dwelling as the government is now anxious to get the superintendent of the plant here and have him at work on the remainder of the station.

All stores and business houses in Brownwood will be closed on Saturday, July 4th, it was announced by E. A. Beckham of the Retail Merchants Association today. Mr. Beckham said that he had made a canvass of the majority of merchants and the directors of the Brownwood Merchants Association and that all were of the opinion that they should close Saturday.

He said that it is a custom through the entire United States for the stores to close on July 4, the only change from the actual date in the observance of the day being when the Fourth comes on Sunday, in which case Monday is observed as the holiday.

## Stores to Close Saturday, July 4

All stores and business houses in Brownwood will be closed on Saturday, July 4th, it was announced by E. A. Beckham of the Retail Merchants Association today. Mr. Beckham said that he had made a canvass of the majority of merchants and the directors of the Brownwood Merchants Association and that all were of the opinion that they should close Saturday.

He said that it is a custom through the entire United States for the stores to close on July 4, the only change from the actual date in the observance of the day being when the Fourth comes on Sunday, in which case Monday is observed as the holiday.

Construction will start during the summer on the laboratory building which will be constructed of brick and hollow tile.

Four acres of land are to be landscaped by government engineers and this will be laid out around the dwelling and buildings of the station.

Dr. Traub said that the construction of outbuildings and laboratory was not as urgent as the moving of the dwelling as the government is now anxious to get the superintendent of the plant here and have him at work on the remainder of the station.

## Santa Anna Glass Firm Reorganized

COLEMAN, Texas, June 22.—(Sp.)—A complete re-organization of the Texas Glass Company at Santa Anna has just been completed with the installation of J. L. Clark of Menard and San Antonio as manager.

Mr. Clark was chosen from among a number of applicants for the position. Mr. Clark has ordered the plant shut down for ten days so that much needed repairs can be made. The Lynch machine will be rebuilt and additional moulds and other equipment will be ordered for other equipment. Adjustments will be made so that when the plant resumes operation a full time schedule can be maintained.

W. R. Weaver of Abilene will be with the company as chief accountant. Mr. Weaver has been connected with the West Texas Utilities Company for several years. It was this company that assisted in securing the location of the factory in the Coleman county town.

Expansion and enlargement of the plant is contemplated in the near future.

**THE REAL REASON**  
FIRST TYPIST: I wonder why the boss passed you over in the last promotion?  
SECOND TYPIST (tearfully): I can't think.  
FIRST TYPIST: Yes, I suppose that's the reason.—Answers.

**AN ENDURING LOVE**  
HOUSEWIFE: If you love work, as you say, why don't you find it?  
TRAMP: Alas, madam, love is blind.—Answers.

## L. W. Wingfield Struck By

L. W. Wingfield was not seriously injured when struck by an automobile while walking home from First Presbyterian church, asked by Rev. W. E. Peavy. While crossing the street in front of the other side of the waiting automobile, Miss Peavy was driving the time.

Mr. Wingfield was home of his son-in-law, where he and his wife are staying. Their home is in Brownwood.

Eight Presidents of the States came from Brownwood ranks second with seven.

## TOM BLANTON HITS HOOVER DEBTS PLAN

ABILENE, Tex., June 23.—(P)—Congressman Thomas L. Blanton, returning yesterday from Washington, wrathfully denounced the Hoover plan of a one year moratorium on inter-governmental debts.

Asserting that Americans are more concerned "with our own six millions walking the streets without work," Blanton called the President's proposal "an unprepared suspension of legislative power—an authority inherent alone in Congress—never before attempted by any other executive."

The West Texan called attention to a \$900,000,000 deficit in the American treasury. He declared that "while other countries will be granting a moratorium only to Germany, Mr. Hoover is forcing us to grant a moratorium to all countries. No American opposes a sane tariff for revenue, such as will equalize the cost of production of American products in this as against all foreign countries, and such as will maintain our institutions and uphold

"Argotane is the finest medicine on the market, I think," declared Mrs. Sally A. Copping, of 517 Mt. Auburn St., Dallas, Texas, in a recent conversation with the Argotane representative.

"My case," continued Mrs. Copping, "is a different one, I guess. In 1919 I fell and broke my arm and almost broke my neck. The fall caused a fracture of the nerves and glands. Then, last January, I had influenza and that left me with sinus trouble, which afflicted my eyesight until I was almost blind in my right eye."

"I was just in a terrible condition and before taking Argotane, was always constipated and suffered terribly with indigestion. I used to go for days, sometimes, five or six without a natural bowel movement, and at times it was absolutely necessary for me to take enemata or purgatives. I suffered from constipation so badly that really it is a wonder I am here today."

"I have been married sixty years today, and I can say that Argotane is the best medicine for relief of constipation that I have known of in all those sixty years. And now I am quite old, eighty-three, and perhaps won't be here much longer, but while I am here, I am going to take care of myself the best I know how, and am going to continue taking Argotane, for I think it is the finest medicine there is and I am glad to endorse it."

Genuine Argotane may be bought in Brownwood at Renfro's, Rexall Drug Stores. (adv.)

## Chambers Family Held Reunion at Blake Community

An enjoyable family reunion was held at the home of Mrs. P. J. Chambers in the Blake community on Sunday, June 14, all of her twelve children being present with the exception of Roy Chambers of Elctra who was unable to attend. The occasion was said to have been the first time in several years that almost the entire family had been together, for in addition to the sons and daughters of Mrs. Chambers present there were also twenty-two grandchildren.

The day was spent informally and at noon a large table was laid with a bountiful meal served in old-fashioned southern style. Mrs. Chambers is one of the first settlers in this section having lived in the Blake community for the past thirty-eight years. She is now sixty-four years of age and continues to be active in all affairs of her community.

Among those who attended the reunion were Mr. and Mrs. W. H. Wheeler, Mr. and Mrs. W. E. Chambers and daughters, Velera and Elta, Mr. and Mrs. S. A. Chambers and sons, Elmo, Curtis, Albert, Delbert and Leroy; Mr. and Mrs. Monroe Chambers and children, Thelma, Iola, Nona, Jimmie, W. M. and Mattie Mae; Mr. and Mrs. O. Leatherwood and daughter, Annie; Mr. and Mrs. E. A. Allen, Mr. and Mrs. Curtis Butler and daughter, Wilma Jean, all of Blake; Mr. and Mrs. L. P. Dunn and daughter, Betty Cue of Sipe Springs; Mr. and Mrs. S. S. Chambers and children, Elbert and Marie of Brownwood; Mr. and Mrs. P. J. Chambers, Jr. and son, Billy Ray; Mrs. Roy Chambers and children, Roy, Jr., Kenneth and Mary Frances of Breckenridge.

**A LITTLE HINT**  
SMITH: What are you cutting out of the paper?  
JONES: A report of a man who got a divorce because his wife went through his pockets.  
"What are you going to do with it?"  
"Put it in my pocket."—Tit-Bits.

## County Schools Are Classified by Trustee Board

A meeting of the county board of school trustees was held Saturday afternoon at which time all county schools were classified and an order of consolidation rescinded and another consolidation made. An act consolidating the Elkins school with Indian Creek, passed May 9th, was rescinded and Elkins consolidated with Woodland Heights.

In the classification of schools it was found that there was only 17 schools in the county under the direction of the county school superintendent and two independent schools. Last year when the classification was made there were 23 schools but consolidation has lessened this number until there are only 17 rural schools.

The schools were classified as follows: Cross Cut, high school of four years; Williams, high school of four years; Grosvenor, high school of four years; Concord, high school of three years; Blanket high school of four years; McDaniel, high school of two years; Jones Chapel (Early), high school of four years; Mukewater, high school of three years; Clear Creek, high school of two years; Chapel Hill, high school of four years; Woodland Heights, high school of two years; May, high school of four years; Zephyr, high school of four years; Indian Creek, high school of four years; Clio, high school of three years; Holder, high school of three years; Brooksmith, high school of four years.

**Negro Is Fined  
After Liquor Raid**  
Members of the police department raided the home of Oscar Owens, colored, Monday afternoon and secured a quantity of beer. Owens was arrested and placed in the city jail, Tuesday morning he was charged in city court with vagrancy and fine set at \$10.70 by City Recorder James McCartney.
