MUENSTER, COOKE COUNTY, TEXAS, FRIDAY, JULY 11, 1941

NUMBER 33

Della Bernauer Funeral Held Here Saturday

A few weeks ago while most of the community was complaining about too much rain one of the old timers said that it won't be long until somebody will begin worrying about dry weather. Sure enough, about the time the sky had cleared off nicely a man was heard to remark that a little shower would certainly come in handy. That was Thursday of last week. He figured that corn could thrive on a nice rain, and besides those harvest hands could do all right with a holiday for the fourth.

But that isn't what the threshermen said. No, sires, they wanted nothing but threshing weather until all grain is in the bin.

All of which goes to show that in spite of all the dissatisfaction, it's really better that farmers can't have any control over rain and shine. It's too seldom they all want the same thing at the same time. In the long run our present system of depending on the Master weather man is best. We don't always understand what's going on but we can be sure He has it figured out so it does the most good for the most people. Somehow we always seem to get along no matter how gloomy the prospect is. And that's what counts.

There is an old saying that corn will not be worth a whoop unless it gets a good soaking in July. That's assuming, of course, that it did all right until July—which apparently is the case now. Ask the man who's tasted this year's corn on the cob. Plenty of kernels are there. All they need is a chance to develop properly. There's another nice angle about the corn crop. Weeds and Johnson grass are so rank along the fences that "borrowing" without detection is almost a cinch. City folks who don't get their fill this season are either honest or lazy.

Here's a sample of the good neighbor policy in action. A man finished cultivating his cane and then did his neighbor's field. Nothing pre-arranged. He simply saw that the job ought to be done and the other fellow couldn't get it at for several days until he'd finished harvesting. When nations get along like that we can get back to pleasant living and quit trying to develop those super-efficient tools of destruction. This isn't storybook stuff. It happened here last week.

One of the more amusing sights nowadays is people reading post cards from their globe-trotting friend, Father Frowin. Every card is a new problem in deciphering. Every person who manages to read it all feels that he's achieved something. It would be interesting to estimate how much time has been spent around here the past few weeks studying those cards. There are lots of 'em. When the padre wanders he broadcasts.

Yours truly got good news from him. Mayo experts decreed that he can carry on a long time if he will watch his diet. On the same card he observes that if people worried as much about their souls as they do about their bodies, hell would be less crowded. He doesn't miss many chances to plug in a little sermon.

In these days when we are besieged by propaganda on all sides, it is refreshing to see a picture like "Meet John Doe." It has been said that most of the films coming out of Hollywood now are propaganda. If that is the classification, we might regard this one as propaganda for friendliness. It has a thought well worth absorbing. The spirit of the "John Doe clubs" would be a blessing to our communities, our nation and the whole world. Con gives it a place on his list of truly constructive pictures, side by side with such classics as "Mr. Deeds Goes to Town," "Lost Horizon," and "You Can't Take It With You." It leaves an inspiration. It is worth anybody's time to see it.

The current copy of the Texas Game Bulletin quotes a sign that has been in its Austin office for years. Copied from a sign posted by an irate farmer, it has drawn so much comment and so many requests for copies that the staff saw fit to publish it again—

NOTICE!
Trespassers will be persecuted to the full extent of 2 mungrel dogs which neve was over scotch to strangers & 1 double brl shot gun which aint loaded with soft pillers. Dam if I aint gitten tired of this hell raint on my place.

Eagles and hawks are noted for their remarkable sense of sight. But they certainly have no monopoly on that gift, the lowly buzzard being on a par with them and perhaps even better. The following observation by

(Continued on page 6)

Mrs. E. C. Harmon underwent a major operation in Dallas Monday morning. Upon returning to Muenster in the evening, Mr. Harmon, who had spent the day at his wife's bedside, reported that she was doing as well as could be expected.

A WOMAN GATHERS HER POSSESSIONS

This photo radioed from Berlin to America shows a Lithuanian woman gathering away what was left of her home and possessions after the recent hostilities in this section. Stalin in his first radio address in many years to his subjects called upon them to carry on a total war. Photo passed by German censor.

LOCAL PLANT MAKES CHEESE FOR BRITAIN

The Muenster Cheese Plant this week threw its full force behind the aid for Britain program. Henceforth until further notice, all cheese shipped from here will go to England.

As explained by Rudy Helman, government authorities instructed Kraft to furnish a specified volume of cheese for Britain, and that company, having an option on Muenster's production, instructed the local plant to deliver all cheese to the Denison warehouse where it will be packed for shipment.

MUENSTER KNIGHTS INSTALL OFFICERS

Newly elected officers of the Muenster K of C council officially took their positions last Wednesday night at installation ceremonies conducted by District Deputy Herbert Meurer in connection with the council's regular business session.

Current officers are J. W. Fisher, grand knight; John Wieler, deputy grand knight; Charles Helman, chancellor; Frank Herr, financial secretary; F. A. Kathman, recorder; R. N. Fette, treasurer; M. J. Endres, advocate; J. S. Horn, warden; J. M. Weinzapfel, trustee; Ed Rohmer and J. P. Flusche, guards.

The eighteen-month-old son of Mr. and Mrs. Joe Hesse was reported recovering normally Wednesday evening after having swallowed an amount of kerosene oil in the afternoon.

RESCUED U. S. NURSES READ MAIL

REFINERY FIRES UP FOR FOUR-DAY HEAT; RUNS 2,000 BARRELS

For the first time since its shut down on June 15 the local refinery was back in operation last week, running 2,000 barrels of crude during a four-day period. After another rest of about the same duration, stills will again be fired up to take care of the accumulated oil.

The next run will be considerably heavier in the opinion of John Ezell, local manager. He is expecting extra supplies from leases that did not release any oil during the last period.

Though definitely handicapped, the plant is said to be holding its own through this period of curtailed activity. Its sales department is open daily. Business goes on as usual—except in volume—and the plant is ready to return at a moment's notice to its former schedule if and when the oil should become available. The payroll now includes only six men.

LONDON, ENGLAND—Three of a group of American Red Cross nurses who survived the torpedoing of the Dutch Steamer Maasdam read their mail in London, England. The nurses (left to right), Shirley Ralph of Jamaica, N. Y., Lavenia Martha Fulton of Amherst, Mass., and Lillian Evans of Arlington, Mass., were picked up by another vessel in the convoy. Of the seventeen nurses aboard the Maasdam, nine have already arrived in England, six are known to be on another ship and the remaining two are believed to have been picked up by a third ship.

URBAN ENDRES WINS TOP HONORS SUNDAY AT MOTORCYCLE RACES

More than 400 persons sweltering under a torrid July sun saw their favorite roar in for top honors at the Muenster Motorcycle Club's annual field and racing event last Sunday. Urban Endres, only local entry in the competition, earned 10 points by winning two first and two second places. Crowding him for honors were Roy Haskett of Wichita Falls and Leslie Jones of Electra with 8 and 7 points respectively.

Endres gave local fans their best thrill in the 10 lap grand finale by reaching the first curve out front and constantly holding his lead. His other first place was in the "digout," a short dash. His second places were in the Australian pursuit and the mystery races, the latter event beginning with a sprint on foot to dead motors.

The featured event of the day was Mickey Sullivan's crash through a flaming board wall. After the races the motorcycle club entertained visiting motorcycle jockeys with the customary party at the race track. Cash awards to place winners and several trophies given by Les Myers, Wichita Falls Harley dealer, were distributed at that time.

J. P. Fish Improved After Critical Illness

Sudden changes in the health of J. P. Fish had caused considerable alarm during the past week. One day he may be at the brink of death and with a fever of 104 and the next he is back to normal, enjoying the evening air on his front porch.

During the past weekend his condition was considered critical, and though he seems to have recovered, the strain of frequent and sudden attacks is showing some effect on his aged system. He is 85 years old.

Exceptionally Poor Harvest Closes Here

Threshing in this area is practically finished. By the end of this week it is believed every rig in the community will be back in the shed.

The beginning of the end came Monday when a few of the machines finished their circuits. On Tuesday and Wednesday most of the others pulled in.

Once threshing got started, after being delayed some three weeks by continuous showers and then interrupted by more rain after the first day, the work went forward at a rapid pace. Farmers put in long hours every day, including the Fourth of July, and carried through without further interruption.

This immediate area had a lucky break on Wednesday, July 2, when rain to the south and east stopped just short of them. At Hood, Era, and Valley View that rain caused more delay. Here it caught only one machine, which continued work the following day by moving to another crop on its circuit.

The final tally on yields definitely indicates that this year is one of the poorest in the community's history. Wheat averaged 5 or 6 bushels, and a few exceptional fields got above 10. Oats averaged under 20. The quality of all grain is poor, wheat testing 53 and 54 as an average and oats testing about 26 to 28.

Grain dealers have been practically idle. The total volume of wheat handled here was less than 12,000, less than one-fourth the usual volume.

Magnolia Service Station Will Open Within Three Days

This city's newest business, the Magnolia Service Station, is due to open Friday, Saturday or Monday, according to information given Wednesday by "Bud" Bernauer, manager. It will be open, he said, as soon as final preparations are made at the station, and final arrangements are made with Magnolia officials.

Located on the highway a block east of Main, the building stands out as the finest service station and one of the outstanding business houses of this city. It is constructed of brick painted white and trimmed in red in keeping with Magnolia's usual color combination. Clarence Wilson, local builder, supervised the construction for John Wieler, who has leased it to the oil company, which in turn leased it to Bernauer.

"We have made every effort to make this building and its equipment conform with the latest developments in service stations," Wieler said. "Though not as large as some stations in North Texas, it will match the best of them in facilities for giving good service."

A spacious canopy across the front covers three electric computing pumps and water and air hoses. The building proper consists of three main divisions. Behind the office are the compressor room and two rest rooms. The next division serves for lubrication and the last for washing.

Some of the outstanding units of equipment are the hydraulic lift, the greasing machine with its several attachments for handling special greases, and the pressure washer fitted for soap or kerosene mixtures in case of difficult wash jobs.

It will be a regulation Magnolia station, following that company's specifications in every respect.

EXPECT TO RESUME SEWER INSTALLATION EARLY IN SEPTEMBER

Present indications are that work on Muenster's sewer can be resumed early in September. Appearing before Gus Thomason, district administrator of the WPA at Dallas on Monday, Mayor Ben Seyler, Resident Engineer E. K. Whitaker, County Judge Carroll Sullivan and Alderman John Fisher, learned that WPA workmen for the project should be available some time between September 1 and 10.

A new appropriation for the project, granted by WPA almost two months ago, provides \$11,303, which is expected to cover the entire cost without incurring any additional expense to the city.

In the first project WPA failed to provide its full crew, with the result that the appropriation fell short and the city had to absorb many extra expenses. A compensating amount was figured into the new grant.

Work to be completed consists of slightly more than a mile of sewer line serving about 10 per cent of the city's possible connections. When it begins the northwest section of town will probably be favored in response to a petition submitted several weeks ago to the city council.

How and Where They Spent the Fourth

The Fourth of July and the weekend was the occasion of much visiting in Muenster. Likewise, a number of local people, taking advantage of the holiday weekend, visited relatives and friends in other cities.

Privates Gus Pleitman, Roman Trachta and Adolph Knabe, all of Camp Bowie, were here from Thursday to Monday with members of their families.

Mr. and Mrs. Fred Hoedebeck and son, Alfred, of Denison, spent Thursday and the Fourth here with relatives and were accompanied home by Reynold and Bobby Dean Reiter who will spend several weeks with their grandparents.

Mr. and Mrs. Hugh Jackson of Fort Worth spent the Fourth with her parents, Mr. and Mrs. J. M. Weinzapfel, and Mr. and Mrs. Elwyn Hope, also of that city, were guests of her mother, Mrs. Frank Seyler.

Miss Charlae Bradshaw and her room-mate, Miss Margaret Onda, of NTSTC, Denton, spent from Thursday to Monday evening with the former's sister, Mrs. T. S. Myrick, and family. Misses Lorena Fisher and Mary Wiedeman, also of Teachers College, spent the holidays here with relatives and friends, and Miss Elfreda Luke, of the same college, was the guest of her parents, Mr. and Mrs. Ben Luke.

Miss Agnes Fette of Wichita Falls was here during the weekend to visit her parents, Mr. and Mrs. C. J. Fette, and Mr. and Mrs. Leonard Endres and children spent the Fourth with Mr. and Mrs. M. J. Endres.

Mr. and Mrs. John Herr and Mrs. Henry Schmitzer had as guests at their home on the Fourth, Mr. and Mrs. Joe Schmitzer and family of Pottsboro, Mr. and Mrs. John Corcoran and family of Gainesville, Mr. and Mrs. Joe Herr and sons of Arlington, Mr. and Mrs. Paul Herr and her brother, Charles Gilpin, of Gladewater and Mr. and Mrs. Leo Herr and family of Harmon, Okla. The Oklahoma visitors spent from Wednesday to Saturday in Muenster.

Mr. and Mrs. Lee Jennings and children spent the holiday and the weekend in Sherman with relatives and were accompanied home Sunday by her sister, Mrs. Howard Cecil and family, who spent the afternoon here.

Mr. and Mrs. E. P. McDaniels and son spent the Fourth at Lake Dallas on an outing, and Mr. and Mrs. Tom Carter spent the day with relatives at Trenton and Bonham.

Mr. and Mrs. Henry Stelzer had as guests Sunday, Mr. and Mrs. Frank Faecke and daughter, Miss

Frances, of Sherman, Miss Edna Marie Thompson of Denison, Julius Stelzer of Henrietta and Mr. and Mrs. Henry Zimmerman and daughter, Virginia, of Lindsay.

Mr. and Mrs. R. L. McNelly had as their guest Friday and Saturday, Joe Strothers of Dallas, Mr. and Mrs. Alvin Cler of Valley View were here for the Fourth to visit relatives and remained for the parish picnic in the evening. Al Flusche of Decatur visited during the weekend with his little sons and with members of his family.

Mr. and Mrs. J. P. Fisch had as guests from the Fourth to Tuesday his brother and wife, Mr. and Mrs. Dominic Fisch of Dubuque, Iowa, who are now enroute to Los Angeles to visit relatives. Bert Fisch of Fort Worth, also visited his parents Thursday, Friday and Saturday. He was accompanied to this city by Sergeant Leroy Treinen of Alexandria, La., who was spending his furlough in Fort Worth and who visited his grandmother, Mrs. Mary Lehnertz, and other relatives while in Muenster.

Ed Swirczynski of Wichita Falls spent the Fourth with his parents, Mr. and Mrs. L. J. Pipes spent the holiday weekend in Cleburne with relatives.

LOCAL NEWS BRIEFS

Mr. and Mrs. Chris Fette of Fort Sill, Okla., spent Sunday with Mr. and Mrs. Henry Trachta. Chris has recently been promoted to the rank of Technical Sergeant.

Messrs. and Mesdames Eton and Orien Edelen had as guests this week their cousins, Mr. and Mrs. Olden Brown of Oklahoma City. Monday the group was at Lake Murray for an outing.

Mrs. Amber Esau of Houston arrived last week for a month's visit with her parents, Mr. and Mrs. W. T. Richter. The three were supper guests of Mr. and Mrs. Hugo Lutkenhaus at Linn Friday evening.

Members of the Civic League and Garden Club are reminded of a regular meeting this afternoon (Friday) at the home of Mrs. T. S. Myrick at 3 o'clock. The annual election of officers will take place.

Sunday dinner guests of Mr. and Mrs. Bill Stelzer were Mr. and Mrs. Henry Luebert and daughter and Mrs. Anna Havis of Fort Worth, Julius Stelzer of Harpota and Mrs. Goldie Shackelford of Wichita Falls.

Mrs. Charles Bernauer and two sons, and her niece, little Wanda Jo Fuson of Seagraves, and Miss Mary Alice Bernauer left Thursday morning on a 10-day trip to Memphis, Tenn., and the Ozark Mountains.

Muenster's Melody Six played at Gainesville Tuesday evening at a meeting and luncheon of the Young Men's Civic League at the Country Club. Frank Yosten, Miss Josephine Yosten and Mrs. C. M. Walterscheid accompanied the players to Gainesville.

Mr. and Mrs. Meinrad Hesse, her mother, Mrs. William Walterscheid, and his sister, Miss Theresa Hesse, left Saturday morning for a vacation visit at Hereford, Carlsbad, and points in Colorado. Miss Hesse will remain in Colorado to spend the summer. The rest of the party is expected home in about ten days.

Otto and Miss Isabel Walterscheid of Tishomingo, Okla., visited relatives here from Sunday to Tuesday and were accompanied home by their sister, Mrs. John Wieler and children who remained in Tishomingo until Wednesday evening when Mr. Wieler drove there to accompany them home.

Linemen of the Muenster Telephone Company are busy this week converting about six miles of their line from the old grounded circuit to a metallic circuit. The change was made necessary by the present construction of a REA line through that area. By far the greater part of the phone company's line is now the metallic circuit type.

ALPHONSE VOGEL AND MISS JUDY HYOSKY MARRIED IN HOUSTON

The marriage of Alphonse Vogel to Miss Judy Hyosky was solemnized on the morning of July Fourth at Saint Phillips Catholic church in Houston, with the pastor officiating at the rites and at the nuptial mass.

Mr. Vogel is a son of Mr. and Mrs. Emil Vogel of this city and has been employed in Houston for the past three years. The bride is of El Campo and has also been employed in Houston for the past several years.

They are making their home in that city.

JAKE HORN JR., HOME IS PARTY SCENE SUNDAY

Mr. and Mrs. Jake Horn Jr., entertained with a dinner party at their home Sunday. Guests were Mr. and Mrs. Al Schad and children, Theo Schmitz, Miss Isabel Schmitz, Miss Theresa Loerwald, all of Lindsay, Pat Schmitz of Thackerville, Okla., Miss Mary Ruth Nichols of Valley View and Mr. and Mrs. J. S. Horn and son, Alois.

GET-TOGETHER CLUB MEETS AT BECKER HOME

NOTES FROM the COUNTY AGENT

By ALBERT BRIENT
County Agent

GROUND WHEAT GOOD DAIRY COW FEED

Farmers should get a larger return by feeding to livestock wheat which will not qualify for government loan than selling it on the market.

According to E. R. Eudaly, dairyman for the A. and M. College Extension Service, ground wheat is equal to corn, pound for pound, for feeding dairy cows and is a satisfactory feed even over a long period provided it is fed in a suitable concentrate mixture and in a properly balanced ration.

Wheat should not be ground too finely on account of its tendency to cake. It is best to mix it with a bulky concentrated feed, such as ground ear corn or ground maize heads. Ground wheat can be balanced with cottonseed meal, Eudaly says, and then mixed with some cottonseed hulls or ground bundle feed to make a bulk feed. Since wheat and cottonseed meal are both high in phosphorus and low in calcium, two pounds of oyster shell flour or limestone flour should be included in each 100 pounds of this mixture.

If the low grade wheat is fed properly it should bring as much as a bushel as number one wheat on the market.

Present indications are that oats may be out of line in price as compared to corn, at least for a while. When corn is worth 50 cents a bushel and cottonseed meal \$1.50 a hundred, oats are worth 28 cents a bushel. When corn is worth 75 cents a bushel and cottonseed meal \$2.00 a hundred, oats are worth 39 cents a bushel.

It is Eudaly's opinion that it would pay to feed more oats in the ration to dairy cows when that grain sells for less than those comparative prices. Ground oats are very palatable, but should be ground to a medium fineness for dairy cows. They need not be ground when fed to calves up to six months of age.

Your Health

BY GEO. W. COX, M. D.
Texas State Health Officer

AUSTIN. — Dr. George W. Cox, State Health Officer, issued a warning to Texas housewives to guard against food spoilage and resultant human food poisoning during the summer months.

Summer heat and food spoilage were coupled together in Victorian days as a sure sign of summer, and the association continues today, unless scrupulous care is taken to avoid food spoilage.

Surprise! Private Car Driver Gets the Blame

Those who would believe that drivers of taxis, buses and trucks were to blame for 1940's disastrous highway accident record will be surprised to learn that passenger cars were involved in almost 80 per cent of the fatal accidents last year. An even greater percentage of vehicles in non-fatal crashes were of the pleasure-car type.

These facts are revealed in a new booklet entitled "Here Today—" just released by The Travelers Insurance Company in the interest of street and highway safety.

Only six-tenths of one per cent of the fatal accidents last year involved taxicabs, and buses were involved in but 1.2 per cent. Motorcycles were involved in 2.1 per cent. Commercial vehicles of

all types were involved in 17.7 per cent of the fatal crashes and in 12.2 per cent of those causing non-fatal injuries. The new safety booklet shows that of the 36,870 vehicles in all of 1940's fatal accidents, 28,760 were passenger cars, 6,530 were trucks and 1,580 were taxis, buses, motorcycles and other miscellaneous vehicles.

ust necessitate keeping food clean, covered, and refrigerated, plus additional hot weather safeguards," Dr. Cox stated.

It should be kept in mind that food poisoning is more common in summer than in winter. The summer menu usually includes smaller helpings of cooked food and increased amounts of raw and cold food which may be more subject to

spoilage or contamination. Vegetables and fruits which are eaten without peeling should be washed carefully to avoid possible contamination with mineral poisons from chemical sprays.

Harmful germs which may be harbored in raw dairy products or imperfectly cooked food cause typhoid fever, dysentery, summer diarrhea, scarlet fever, diphtheria and other diseases. Perishable foods should be handled carefully and kept under constant refrigeration until time to serve.

Special care should be taken with milk and milk products, since milk is an excellent medium for bacterial growth.

TEXAS OUT-O'-DOORS

UNUSUAL NEST SITE
A pair of ruby-throated hummingbirds picked an unusual place in which to nest, according to The Dallas Morning News. The nest is suspended upon a loop of wire three floors above a concrete patio be-

You Can't Look YOUR BEST—Unless Your Clothes Look Their Best.

Lone Star Cleaners
J. P. GOSLIN, Prop.
Phone 332 Gainesville

tween The News office and an adjoining building. Workers in the surrounding offices are gravely concerned over the birds.

Apparently oblivious to their surroundings, the birds are going about their business of hatching babies in a nest the size of a golf ball. No mistakes must be made by the tiny birds when they try their first flights. Under them is a drop of three stories to hard concrete.

Hummingbirds, especially brave during the nesting season, will rob spider webs and will attack birds much larger than themselves, including hawks and crows and are practically always victorious, due to their speed.

MOUNTAIN SHEEP GET BREAK

Saving the dwindling bighorn mountain sheep of west Texas is one of the problems of the Game Department. Those surefooted residents of the mountain peaks got a break recently when the Yates Ranch, within which are located the Beach Mountains, one of the best ranges of the bighorns, was leased by an El Paso development company which does not intend to run domestic sheep or goats on the ranch. Domestic sheep and goats are constantly encroaching upon more of the bighorn's range high in the mountains.

As a result of the development company's policy of not running sheep and goats on the ranch, bighorn sheep will have two and possibly three years in which they will be free of competition for food by domestic sheep and goats and of their diseases.

The bighorns, of which there are, according to a recent survey by the U. S. Fish and Wildlife Service, fewer than 14,000 in the entire country, are far from safe. Most of the Texas bighorns frequently move from the Beach Mountains to the Diablo Mountains. There is now only one sheep-proof fence between the two ranges and the bighorns can skirt it. However, more sheep raisers are moving into that section each year and it is feared by Game Department biologists that sheep-proof fences will stretch across the entire section. Then it will remain to be seen whether bighorn ewes and large lambs can jump it. It is very doubtful if a bighorn ram can jump a four-foot fence. A former mountain sheep inspector for the Department found a large ram dying after attempting to jump a four-foot fence. It got hung on the top wires.

Bighorn sheep are now found only in twelve western states. Encroachment of domestic stock and overhunting have depleted their ranks until few authorities are optimistic enough to believe that excellent game animal can ever be brought back in sufficient numbers to ever again allow hunting them.

BIRD KILLS 43-INCH SNAKE

Details of the efficient manner in which road runners, or chaparrals go about killing snakes, was con-

tained in a report of a game warden to the Game Department recently. The warden got in on the start of the fight and remained until the close, exactly an hour and 21 minutes later.

The roadrunner was jogging down a small path through the brush when it stopped suddenly and started circling a bunch of cord grass. The warden approached to within twenty yards of the bird and remained there while the chaparral proceeded to trim a 43-inch rattlesnake down to its size then to dispatch it. Darting in and out, the road runner dug viciously at the rattler time and again and each time managed to evade the fangs of the six-button reptile. After 81 minutes the rattler was lifeless. The chaparral took two more vicious stabs at it, cocked his eye at the warden and nonchalantly strolled off into the brush.

Upon examining the reptile, the warden found a hole completely through the center of its head, three lacerations on its belly and the rattler was missing both its eyes.

WHEN BANKERS ARE BLAMED FOR Rules WHICH ARE REALLY LAWS

No sensible motorist would grumble about "police rules" if prevented from parking too near a fire plug.

Nor should any sensible depositor complain of "bankers' rules" when, for example, a bank refuses to risk other depositors' money in his new and untried business ventures, to allow "occasional" overdrafts, or to pay interest on checking balances.

There are laws covering matters of this kind, which say that the banker "must not." Therefore, in such cases it is not the banker obstinately saying to you "I won't," but the law saying clearly to the banker, "You can't."

THE REPAIR MAN WILL GYP YOU

The repair man will gyp you if you don't watch out. So reads a statement by Readers Digest this month, and it is followed up by plenty of evidence to substantiate the charge. According to the findings of a special investigator on a survey covering the greater part of this nation, 63 per cent of the garages and service stations are dishonest.

Briefly, here is what happened. The test car was in perfect condition but before pulling up to each of 347 garages a wire was disconnected causing the car to fire on only six of its twelve cylinders. In 129 cases, attendants spotted the trouble and fixed it promptly, making either a very small charge or no charge at all. In all other cases the attendants proceeded to extract what money he could from the distressed motorist.

The trouble was in plain view, the very first thing staring a man in the face as he lifted the hood. Perhaps some incompetents overlooked it, but the investigator was aware that most repair men noticed it. Still they fumbled around with wrenches and screw drivers on imaginary trouble for the sake of a fat charge. They put on new parts that were not needed, sometimes charged for new parts not even put on. (The man very obligingly left the car each time, giving them the privilege of carrying the farce as far as their conscience would permit.)

A good lesson can be learned from that investigation. Before taking a long drive take the car to a man known to be dependable in order to minimize the chance of trouble among strangers. And in case any work is needed, stick around. That way there is less probability of fictitious charges on parts not installed or work not done.

THINK FIRST OF OUR OWN FAULTS

The fact that more than half of the car repair men are crooks should not cause us to have any special disrespect for them. We may assume that they represent a normal cross section of the American public, neither better or worse than business men in other fields. The really shocking revelation is that such a vast percentage of people will be dishonest when they have an opportunity to get away with it.

There are merchants who will palm off inferior goods for the standard grades. There are workmen who loaf on the job, builders who fail to come up to specifications, professional men who render unnecessary service. Yes, and there are farmers who dope their sour milk and put a better grade of wheat at the top of a load. This country is full of horse traders who deliberately keep the buyer away from the blind side. The majority of our public will gyp you if you don't watch out.

To thoughtful people this condition suggests a reason for the present world-wide chaos. Religious leaders who attributed our troubles to a general break-down of conscience have hit closer to the fundamental cause than any of our high-powered economists.

Consider our principal troubles today and their causes. Industrial strife resulted from the failure of Capital and Labor to play fair with one another. Excessive taxation results from a gigantic scale of wasteful spending—which means politicians are over-charging the people for the cost of government. All our regulatory red tape was introduced to prevent normal people from gyping one another. The war abroad goes back to the same reason. Nations were gyping one another.

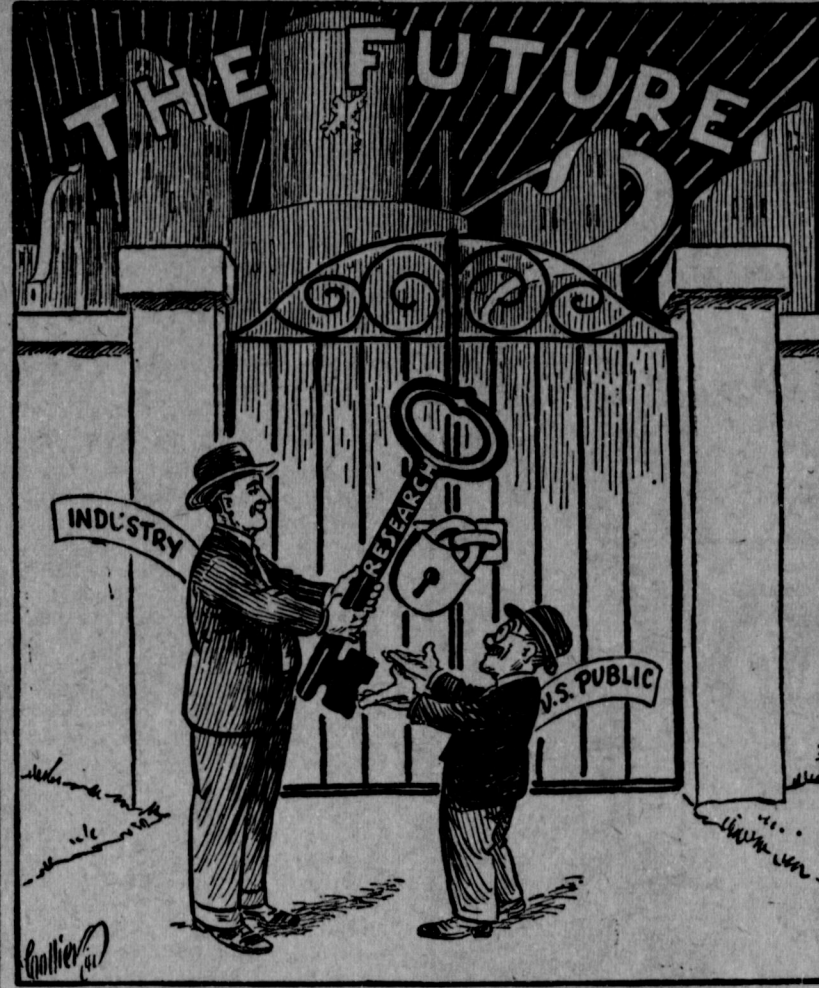

We Americans are in the habit of criticizing European nations when we ought to spend more time correcting our own faults. Any nation in which 63 per cent of a certain trade was found to be dishonest should think first of its own evils.

LEADERS MUST TAKE THE LEAD

A good way for the Government to send some of its war money would be to grant a perpetual and inviting annuity to one Mr. Gallup so that the scientific sampler of the back-home vote could retire to some Connecticut farm for the rest of his life. Once relieved of waiting for the latest release of the Princeton prognosticator, members of the House and Senate might then begin substituting judgment for listening in determining what policy this great and free country can best follow to keep it that way.

What does Farmer Jones, or Banker Brown, or Teamster Smith back in Iowa know about the strength of our island defenses or the odds in favor of a dozen ships getting across the Atlantic with or without a dozen destroyers on convoy? Or what does Salesman Sam in Sacramento

THE KEY TO THE CITY

know about the unloading facilities available in Liverpool once the ships are inside the Mersey?

Representative government, as we understand it, owes its strength to the fact that its elected leaders are better qualified to administer the affairs of state than the electorate. We're not trying to be funny or punny when we say we have galluped a long way from that ideal in the last few years.—CAPS and lower case.

Washington Snapshots

by JAMES PRESTON

Washington is beginning to worry, but isn't doing much more, about the hundreds and perhaps thousands of small and large plants which may be forced to close down because of shortages in materials caused by the defense drain.

Such shutdowns, of course, would leave many jobless even if the workers could transfer to defense production. Transitions always lag, and in many cases employees are not trained or equipped to do the kind of work required in a defense plant. The situation is pressing, and threatens to become more so. There is a present shortage in the case of many metals because defense production alone takes huge chunks of the metal available.

Scores of factory managers have anticipated such a situation. They have turned to substitutes for materials which are scarce. But the direction in which they can turn is being drastically limited.

A short while ago, many users of lighter metals like aluminum arranged to use plastics instead. But now, because there is a shortage of fabricators and molders in the plastics industry, plastics are becoming increasingly hard to get.

Many of the larger factories have research staffs, and well-trained industrial engineers, and other experts who can help in finding the way out of their "materials" difficulties. But the smaller plants have no such facilities, and they are unable to get the necessary help and suggestions from Washington.

Even the bigger factories have trouble. There is the case of the man from a Midwestern city who himself worked in a Washington defense agency where he became completely familiar with what is needed for defense and how it is bought.

After serving more than six months, he went back to his own business. He realized the product his company manufactured wasn't essential during the present emergency, so for the sake of his company and his employees he should produce something that was.

He had his three best salesmen

ART PROJECT MAKES COLOR PORTRAITS OF CHILD PICTURES FREE

This offer is one of the most remarkable ever made. We'll send you a beautifully hand-colored-in-oil-paint enlargement of any picture you want enlarged. Yes, any snapshot, any favorite picture you'd like enlarged and hand-colored. These enlargements will be also 2x7. They will be mounted on high quality, double-white mat mounting size 7x9. To duplicate such an enlargement, hand-colored-in-oil-paint, would cost you from \$1.25 to \$3.00 in any photographic store. To get this enlargement you pay only 50c for the enlargement and the hand-coloring will be done without charge. Simply send a print or negative of your favorite picture and 50c costs in coin. That's all you do, and promptly by mail you'll receive your hand-colored-in-oil enlargement. Send today to

ART EDITOR COOPERATIVE FEATURES, INC. 808 N. Michigan Ave., Chicago, Ill.

similar to that. And nobody in Washington apparently is making any serious plans about how to help them. In fact one official publicly said that as much as one-third of industry may be faced with the necessity of closing down before mid-summer.

At the same time, government agencies aren't moving very effectively to end strikes which hamper plants that are in defense production. The action of the National Defense Mediation Board in the Bethlehem case won't help either.

In that case, the NDMB recommended that Bethlehem accept a "closed shop" contract, which means that every man who wants to work in that yard building ships to defend his country must belong to a union and pay union dues.

Strong friends of labor in government hope other unions won't take this case as a pattern. They fear, however, that they will. Some of the strongest pro-labor officials go so far as to describe the Bethlehem decision as a "boner."

The volume of big strikes, like North American, has dropped, but

strikes still going on are proving almost as destructive to defense. The War Department says, for example, that a strike of 200 iron workers is delaying construction of a new airplane factory; that a strike of 250 more workers is delaying castings for gun carriages; that a strike of another 200 is preventing construction of a plant to make much-needed high octane gasoline for airplanes. With these delays already resulting from the activities of such a few strikers, government officials fear that the Bethlehem closed shop recommendation will stimulate other and more drastic work stoppages.

A 45,000 ton battleship requires some 20,000 tons of steel; an aircraft carrier, about 17,000 tons; a cruiser 5,500 tons. The figures are exclusive of the steel in the ships' guns and armor plating.

A Two Fisted Fly Fighter

Don't judge a livestock fly spray merely by the number of flies it kills in the barn. Fly killing, of course is important—that's why we have made Dr. Hess Livestock Fly Spray a good killer.

But you particularly want a fly spray that will go along out to the pasture with your cows and protect them from that day-long fly fighting. As a fly repellent, Dr. Hess Livestock Fly Spray is outstanding. It has been cow-pasture tested—we know definitely one spraying in the morning will keep your cows practically free from flies all day long.

WHY WE SELL

DR. HESS DIP

We handle Dr. Hess Dip and Disinfectant because we have a high regard for the quality of this product. We believe you need a quality product when you're dealing with lice and disease germs around the barn and chicken house. We believe you usually get exactly what you pay for—don't try to economize on dip—get Dr. Hess Dip.

Advertising is ROMANCE

YOU READ THE ADS. As you read, visions come, and a desire for better things.

Do you see dresses? You picture yourself of a summer evening in this drifting white chiffon, softly printed with delicate blossoms.

Hats? Your mind's eye frames your face with a pastel shaded halo.

Foods? A cool, jolly dinner, with exciting news of the family's day.

Sporting goods? A slashing tennis game. A well-hit drive from the tee. A hard-hooked fish and a screaming reel.

Some people say that all enthusiasm should be taken out of advertising. In books and speeches they crusade for bleak little ads that give nothing but thread counts, strength and chemical tests, dimensions and prices. What a pity if they had their way!

Advertising is one of the welcome voices that directs our eyes upward. It has worked wonders in raising our standard of living. Let's encourage it to continue on its inspiring way.

—Courtesy Nation's Business.

Muenster Enterprise

Lindsay News

Miss Anna Kempf of Dallas visited the Adam Beyer family during the weekend.

Leo Neusch and Walter Loerwald were in Fort Worth Monday on business.

Miss Rita Neises of Temple spent Sunday with her aunt, Mrs. Frank Popp and family.

Mr. and Mrs. Joe Koerner have moved to reside in Gainesville where he is employed.

Members of the Gun Club had their monthly get-together at the Lindsay hall Sunday evening.

Privates Joe Bezner and Leonard Luttmner of Camp Bowie were home with relatives during the holiday weekend.

Miss Isabel Schmitz spent the Fourth and the weekend in Münster with her sister, Mrs. Jake Horn Jr., and family.

Everybody is invited to attend the picnic on the school grounds next Sunday. It is being sponsored by the St. Peter's society.

Jane Frances and Alculn, young children of Mr. and Mrs. Albert Kubis, are improving rapidly after being quite ill from summer flu.

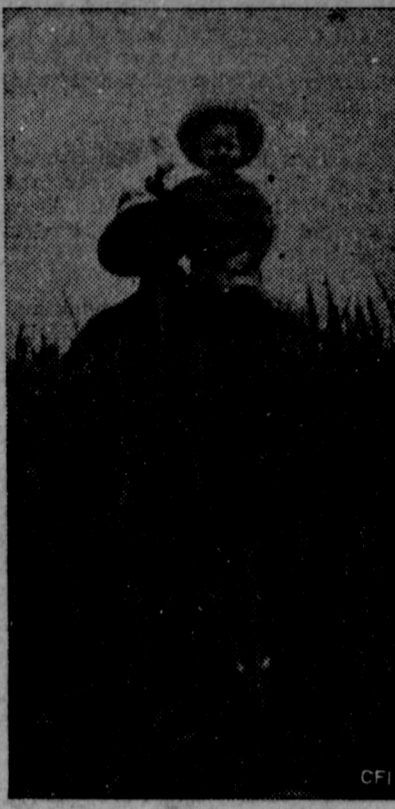

SPECIAL! While they last. Two regular twenty-five cent boxes Super Suds for only 37 cents. Hoelker Grocery. (Adv. 33)

Mrs. Robert Loerwald and son, Alvin, visited in Münster last Wednesday with Mr. and Mrs. Al Bayer and family. Mrs. Loerwald's little granddaughter, Lanette Bayer, was suffering from broken bones in her foot. The accident occurred in a fall at the family home.

Mr. and Mrs. Carl Beyer spent the weekend here with his parents, Mr. and Mrs. Adam Beyer. Mrs. Beyer has returned to Fort Worth following the completion of a two weeks' vacation spent at Camp Bowie with her husband who is an attaché of the 113th general hospital unit. He was off duty from Thursday to Monday. They also visited relatives in Fort Worth during the holidays.

Used Coolers, 100 and 125 pound sizes, at reasonable prices. F. H. Turbeville, Gainesville. (Adv. 33-4-5)

NOT A TRICK PHOTO

LIMON, Colo.—The man in the picture is Warren Larsen and the child on his shoulder is his nephew, Jackie Sandoval. Mr. Larsen is 6 ft. 1 1/2 inches tall and the picture is not an example of trick photography at all. The wheat is about 3 weeks from harvest. The crops around here are the best within the memory of the oldest resident with prospects for wheat that will make from 30 to 35 bushels to the acre, the rule rather than the exception. Acreage in this section has been somewhat reduced by the farm program but still wheat ranchers with more than a thousand acres are fairly common.

DINNER PARTY HONORS LAWRENCE ZIMMERER

LINDSAY.—Mrs. Lawrence Zimmerer entertained with a dinner party Sunday to compliment her husband, who observed his birthday on Saturday.

The dining room was decorated with white petunias and red carnations and the table was centered with a large decorated cake. Places were laid for the honoree, Mr. and Mrs. Raymond Zimmerer and children, Mr. and Mrs. Joe J. Neu and family, Al Flusche and sons of Decatur, and the hostess.

The afternoon was spent in informal diversion.

STATE-WIDE SCRAP ALUMINUM DRIVE TO BEGIN ON JULY 21

COLLEGE STATION.—An appeal to rural people to contribute aluminum, in a drive announced recently by the Office of Civilian Defense, has been made by Director H. H. Williamson of the Texas Extension Service. Governor W. Lee O'Daniel has called upon county judges to assume leadership of the campaign.

County Extension agents have been asked to assist with this work as it relates to rural areas. Gathering of aluminum is to begin during the week of July 21, and according to the plan, local committee of 4-H Club members, home demonstration clubs, land use planning committees and other groups will call on farm homes in the community to collect the aluminum scrap.

Anything which is made of aluminum will do. Among the items suggested for donation are pots and pans, radio parts, toys, shakers, screening, old washing machine parts, picture frames, book ends, ice trays, measuring cups, camera equipment, kettles and double boilers, bottle and jar caps, refrigerator plates and electric appliances of all sorts.

Earlier the Office of Production Management had asked the citizens to defer collecting scrap aluminum until the week of July 14 and warned against "sharpsters" posing as legitimate government purchasers buying up scrap. It is estimated that the campaign to collect secondary aluminum will result in obtaining 20 million pounds throughout the nation. This would result in the release of 20 million pounds of first-class metal for use in 2,000 fighter planes.

The metal collected will be sold to smelters at a special uniform price fixed by the government. Entire net proceeds will be available to the Of-

fice of Civilian Defense for expenditures required in the proper defense of the civilian population.

Bernaer Youth Regains Consciousness Almost Two Months After Accident

Strong belief in a complete recovery for Adolph "Sonny" Bernauer, son of Mr. and Mrs. Joe Bernauer of Panhandle, is held by local relatives and friends following encouraging reports received here during the weekend.

The young man, injured in a motorcycle accident on May 13, was unconscious and completely paralyzed until last week when he began showing faint signs of improvement and was permitted to be moved from a hospital to his parent's home.

According to reports he is now able to move his hands and feet, he seems to recognize members of his family, he smiles and tries to talk to them.

Since the youth was found unconscious beside the highway no details of the accident have been learned but physicians are of the opinion that he struck his head in the fall, causing injury to the brain, which only time can heal. They believe that in time he will recover completely.

NO ACCIDENTS!

This community and the county in general had no part in the nation's heavy accident toll over the Fourth of July weekend. Judging from the absence of reported injuries, there were no crashes whatever, unless perhaps they were minor or blows that did not cause comment.

Confetti---

(Continued from page 1)

a youngster of the community lends strong evidence to the opinion. Out in the harvest field the lad's dog killed a field rat and left it. An hour later two buzzards were there.

The boy was wondering how it is possible for the bird soaring hundreds of feet above to spot a tiny rat among weeds and stubbles. Well, he's not the only one who's amazed. You and I readily agree that it is remarkable. There's another point the boy did not notice, however. A rat's color blends very effectively with the color of the ground. So that small, partly hidden object was also well camouflaged, but it could not escape those searching eyes.

It's a shame a buzzard has to be so darn ugly and so darn repulsive about his habits. He's really a fascinating creature in more ways than one. As a glider, for instance, he is the world's best. Many a rustic lad lying behind a grain shock or between cotton rows has marveled at the bird's ability to keep on floating. In fact it isn't a bad idea to time one's rest period between flaps of a buzzard's wing. Pick out a certain one and watch. Chances are in favor of a long rest before the bird gives his signal.

Buzzards are perfect gliders because they instinctively know about the proper use of wind currents. The best aviators would like to learn as much after years of patient study. Perhaps it's a good thing that men can not acquire a buzzard's skill. They'd use it as another means to cause wreckage. Think of the possible havoc created by an air armada silently gliding through the night without any warning of the imminent fury. Or suppose the little protection now afforded by camouflage were ineffective under the piercing gaze of an enemy flyer.

Paradoxically, defective eyes have been proven the best to detect camouflaged objects. A skillful blend of colors is wasted on a person who is color blind. Details placed there to deceive him escape his notice and the objects main outlines stand out as boldly as ever. Instead of being

rejected from the air force because of color blindness a man may find himself assigned to special duty.

They say it's a good idea to write regularly but a Georgia youth would be the last to agree. He mailed his girl two letters a day during a long stay out of town and returned to find her married to the postman.

Otto Bordenkircher, master of ceremonies for "Vignettes" in the Fort Worth Star Telegram, has an ingenious suggestion as a sequel to this column's recent dissertation on cricket chirps and temperature.

"You simply can't beat science," he admits. And then: "Now if Con will just take a cricket, an alarm clock, an adding machine and a heater and rig them up just right he can no doubt keep the Enterprise office at nice, even temperature all next Winter—providing he can find a good reliable cricket that won't loaf on the job."

Yeah, the cricket is the worst problem. The rest ought to be quite simple. Somehow Con feels that Otto's comment will get around to Rube Goldberg and that a detailed plan for the instrument—or contraction—will be found in the Christmas mail.

FARMERS! ATTENTION!
Much of the wheat now being harvested is light in test weight because of heavy dockage or high moisture.
Much of this wheat can be cleaned up and dried, so as to meet Government Loan requirements, to the farmer's great advantage.
The Morrison Milling Company is prepared to do this work. Charges reasonable.
Bring your wheat to—
The Morrison Milling Co.
Denton, Texas
