NCCW Hears Book Review at Deanery Meet in Sherman

An entertaining review of the book "Our Lady of Fatima" highlighted the quarterly meeting of the National Council of Catholic Women, Sherman Deanery, in Sherman Thursday. Giving the review was Mrs. Lawrence Brown of Sherman.

KEEP CHRISTIANITY CHRISTIAN

Reports from France, where 94 per cent of the people are church members, indicate deep concern that only 20 per cent practice their faith. It doesn't have to be France, or any one Church. Church members have always outnumbered good Christians. The problem arises when, as in France, the churches see they

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation that may appear in the columns of the Enterprise will be gladly and fully corrected upon being brought to the attention of the Publisher.

are not reaching the working people. And so, "to regain the confidence of the working classes," religious leaders often show their concern with "liberal" views resembling socialism!

Certainly the concern for the poor and all who labor is commendably Christian, but the too-frequent expression of it raises questions:

Are not churches deserting their purpose when they invoke politics and coercion to solve social problems? To substitute law for love, force for faith, government for God, is to say, in effect, that religion is bankrupt.

Or if religious leaders want to make economics Christian, what makes them think such economics would be socialist? Socialism is not of Christian origin; its foremost champion was the atheist, Marx!

How prove the church's concern for workers? Give them a faith to live by, and proclaim the freedom to improve their circumstances through worth and work! Calling socialism Christian is like making love with a shotgun!

CONFUSING CHARITY AND SOCIALISM

A correspondent vigorously defending the welfare-state quotes the scripture as follows:

"If any man has this world's goods and sees his brother in need, yet closes his heart against him, how does God's love abide in him?"

We are in perfect accord with this statement of St. John. When A sees B in need, if he is a Christian, he will help him. That is Christian charity, a very important part of the message of Jesus.

But when A sees B in need and robs C and D, either in person or by means of the power of government, in order to help B, that is welfare-statism. The two are as far apart as the poles.

Christian charity builds good will between giver and receiver and stimulates both to increase efforts. Welfare-statism causes ill-will among the parties concerned. Those on the receiving end never get as much as they think they should have and those forced to pay feel that they are the victims of injustice.

Welfare-statism or socialism is not Christian, was not taught by Jesus, destroys good will, decreases production, puts an end to freedom, and in the end brings hard times and slavery upon us all.

This matter is so plain and so clear that we see no reason why intelligent Christians should confuse Christian charity, the re-

sponsibility of the individual to aid suffering, with welfare-statism which is the use of coercive power to rob some and, after taking care of the bureaucrats, to give what is left to those whom the bureaucrats think are most deserving, or have the most votes. Christian Economics

PRICING OURSELVES OUT OF JOBS

What happens when wage increases outrun productivity increases—and taxes eat away more and more of industry's dollars?

One of the results is described by the manager of the purchasing department of a leading oil company.

He says: "Walk into nearly any store with the idea of buying something.

"You'll see products from abroad right alongside our American-made ones. Nails, woolen and cotton fabrics, dinnerware, sewing machines, cameras, bicycles, cars and watches are some of them. And practically in every case, the imports cost less.

"Foreign manufacturers compete sharply now with our own industries. And they do so without two handicaps every American business faces today.

"One: Wage hikes not based on increased productivity. These result in continually rising prices for U. S. consumers and ever-mounting production costs for our manufacturers.

"Two: Growing taxes. Each year taxes take more of industry's dollars. This, too, is reflected in higher prices to the consumer."

He puts the inevitable moral in these words: "It makes you wonder. If we price ourselves out of world markets, what next? If we don't stay competitive, isn't that the same as pricing you and

me and all of us right out of our jobs?"

Foreign trade is all to the good. The world needs more of it. But what isn't good is a situation where American producers, through circumstances beyond their control, find it harder and harder to compete, to the impingement of American jobs and opportunities.

Fingerprint File at DPS Now 1,000,000

AUSTIN—A milestone in modern-day Texas criminology was reached Aug. 16 as the Texas Department of Public Safety filed its one-millionth criminal fingerprint record.

Fingerprint card number 1,000,000 was that of a 15-day old Dawson County negro boy who was arrested for theft and later released.

Veteran fingerprint expert J. H. Singleterry of the DPS Division of Identification and Criminal Records performed the chore of stamping the historic, round number on the card.

Collection on criminal fingerprints began on August 10, 1935, with the establishment of the Bureau of Identification.

In attendance for the ceremony were Lt. Col. Joe S. Fletcher, Assistant DPS Director, who was one of the first Department fingerprint experts; and Joel Tisdale, Chief of the Division of Identification and Criminal Records.

Two Chevy middleweights prove their rawhide stamina!

Top hands on high-country hauls!

Ask any trucker who's been over Wolf Creek Pass, 10,850 feet up in the San Juans: a 9-mile pull to the summit and low gear all the way down. Mr. C. H. Phillips of Alamosa, Colorado, has a 6403 and a 6503 Chevrolet truck that are up over this route the year round, taking sheep and beef to pasture, later marketing the stock in Denver. In less than a year, his Chevy middleweights have averaged about 50,000 miles of

this kind of treatment—and they're going stronger than ever!

Watch Chevy trucks at work out in range country. It's a sight to see the way they pack into high-up mountain pastures and handle through brush and rock like a cowman's favorite cutting horse. Take any truck work for that matter. Chevy middleweights probably handle a bigger variety of jobs than any trucks alive. About anything you name, includ-

ing work that used to be reserved strictly for bigger rigs. When a truck's built the way a Chevy is, lean-muscled and rawhide-tough, it takes to ugly trails the same way most trucks roll over the highway. It just keeps going, without a big to-do, but looking good every mile of the way. How they do it is your Chevrolet dealer's department. He'll be glad to supply details and specifications on the type of models you need.

No job's too tough for a Chevrolet truck!

Tough. Light. Low cost.

Modeled after famous Gyro cutters and has many of the same heavy-duty parts, but is lighter, more economical. Top and sides, 12 ga. sheet metal welded into single structure with angle members added for extra rigidity.

Guaranteed to cut 1 1/2" brush on 60" swath. Free swinging blades and A-shaped blade carrier protect against stump or rock damage. Ideal for pasture, roadside, park, and airport work. For heavier cutting see Servis Gyros which handle 4" brush.

Fan type blades lift light stalks. Suction action lifts corn, sorghum, and other light stalks off the ground and into blade path.

Recommended for tractors 15-30 H.P. Fits almost any 3-pt. lift with an adjustable top link and 2-pt. fast-hitch when specified. Kit conversion to pull model.

Complete as pictured \$295.00

**Four Herds Share
Three Top Spots
In DHIA for July**

Four DHIA herds divided honors for the three top spots for production of milk and butterfat during July according to the month's summary, just released by technicians of the Cooke County Dairy Herd Improvement Association.

Out front as leaders in both butterfat and milk are H. H. Moody's cows with 47 and 1320 pounds. Richard Frasher's herd is second in butter fat with 39 pounds and the Felderhoff & Sicking herd is third with 38. W. H. Frasher's cows were second in milk production with 1141 pounds and Richard Frasher's were third with 1103.

Nineteen county association herds were tested. Of the 491 cows in milk—173 are dry—64 produced 50 or more pounds of butter fat with the all-over average standing at 29. Average pounds of milk per cow was 793.

Other high herds for the month included those of Tommy Knabe, Paul Fisher, Paul Fetsch, Paul and Mrs. Ben Sicking, Ed Sicking, and Jerry Hoenig.

In state averages for June, Cooke County was in third place for butterfat production, tying with five others at 29 pounds. Randall County was first with 32 pounds. In milk production the county cows dropped out of competition while Wichita Valley and Randall County tied at 830 for top spot.

Mr. and Mrs. Earl Robison and Jimmie visited over the weekend in Spur with their son and daughter-in-law, the Douglas Robisons and Mark.

A lot of blade—and a low, low price!

Here's a utility blade priced within the reach of anyone who owns a light tractor. We state flatly, this will be the largest selling light blade in the country, because it is the greatest value. All welded, sturdy, 240 lb. construction. 13" mouldboard plus 6" replaceable cutting edge of 1/2" grader-blade steel. 8 adjustments for angling and reversing.

If you need a larger, more versatile blade for specialized ditching and terracing work, Servis makes big tough ones that tilt, angle, and pitch in more directions than the average man can think of. But for simple utility work, this Lone Star blade is it!
