

# MUENSTER ENTERPRISE

VOLUME XI

MUENSTER, COOKE COUNTY, TEXAS, FRIDAY, FEBRUARY 7, 1947

NUMBER 11

## Arrests At Wichita Lead To Solution Of 3 Burglaries Here

Three burglaries here on Dec. 26 apparently were solved last week in connection with three arrests at Wichita Falls and two at Groesbeck. Wichita Falls officers stated last Saturday that the arrests resulted in confessions to a series of burglaries in North Texas and Oklahoma and recovery of some of the loot.

Articles taken from the Muenster cheese factory and the Waples Painter and Shamburger lumber yards were said to be included in the recovered merchandise.

Names submitted by Wichita Falls officers and Texas Rangers are Robert Tuck, Jack Brunson and Billy Wayne Powers, arrested at Wichita; and Lacy Wingfield and Hubert Tuck, arrested at Groesbeck and brought to Wichita under custody.

According to the men's statements they committed burglaries at Muenster, Nocona, Henrietta, Wichita Falls, Chillicothe, Borger, Amarillo, and Clinton and Duncan, Okla.

## W. J. Walterscheid Gets Commendation Medal For Heroism

Former Sergeant Wilfred J. Walterscheid, son of Mr. and Mrs. August Walterscheid, was awarded the army commendation medal Thursday afternoon by 1st Lieut. Melvin C. Robinson, FA, of the Denison recruiting office.

The award was made at the direction of the secretary of war and the decoration was presented in the Walterscheid home with immediate members of the family in attendance. Lt. Robinson was accompanied by Sgt. Herman Helton of the Gainesville recruiting office.

The citation from the war department is as follows:

Sergeant Wilfred J. Walterscheid, a driver of a fire truck in the Ie Shima Guard Detachment, on 29 of March, 1946, performed meritorious service at the scene of a crashed aircraft on Ie Shima, Ryukyu Islands. He was the first man to reach the scene of the crash, and despite the intense heat of the burning plane, he laid down a protecting screen of water which enabled rescuers to reach the victims. At one time, during the rescue operations, he courageously assisted in extricating one of the crash victims from the flaming wreckage, and contributed in an outstanding degree to the saving of several lives.

Walterscheid entered the service in Sept., 1944, and took basic training at Camp Hood. In February, 1945, he was transferred to Fort Ord, Calif., and left for overseas duty the latter part of the month. After spending several weeks in Hawaii he went into action in the Mariana Islands. He received his discharge last September.

## Mayor and 3 Aldermen Will Be Elected April 1

Voters — and possible candidates — were reminded Monday night that a mayor and three aldermen will be elected at a regular city election on Tuesday April 1. The deadline for a candidate to get his name on the ballot is Saturday, March 27.

Present officials whose term will expire in May are Mayor J. M. Weinzapfel and Aldermen J. A. Fisher, Andy Hofbauer and H. G. Stelzer. All have expressed willingness to serve another term.

## Young Men's Group Will Give Community Pre- Lent Party Next Tuesday Night

Members of the Holy Name Society have announced that they are sponsoring a community social in the parish hall on next Tuesday, Feb. 11, for which everybody is invited to attend. It will be the last pre-lent bazaar and dance for the parish.

The event will start at 7:30 with games and refreshments in the basement, and a dance on the main floor.

Mr. and Mrs. Eugene Hoedebeck of Denison spent the week-end with his parents, Mr. and Mrs. Fred Hoedebeck and other relatives. Norbert Hoedebeck and Ray and Joe Tempel took them home by car Sunday evening.

## DINNER DANCE HONORS MEMBERS OF HORNET 1946 FOOTBALL TEAM

The Muenster Hornets' dinner dance at the parish hall Wednesday night, Jan. 29, was such a success it will become an annual event, according to members of the squad. Assembled for the evening in addition to the Hornets were the Pep Squad, members of the Muenster school board and their wives and the assistant coaches.

For the banquet the guests were seated at long tables adorned to depict the chosen theme of the occasion. They were decorated to represent a football field, the school's colors of red and white being used as line markers, with miniature goal posts, designed from candles and crepe paper, at each end.

Rev. John Walbe, coach, led the invocation and served as toastmaster. Herbert Meurer, secretary of the school board, was the principal speaker, and brief addresses were given by Teddy Gremminger, retiring captain of the team; Julian Walterscheid, new captain; Bernard Hellman, new co-captain; Bernard Swirczynski and Norbert Mages, representing the team; L. Burchfiel and Frank Hennigan, assistant coaches, and Albert Henscheid, Meinrad Hesse, F.J. Yosten and John Klement, trustees of the Muenster school.

Father John announced that the following boys had lettered and will receive jackets: Leonard Walterscheid, Gerald Bayer, Rufus Henscheid, A.J. Felderhoff, Reynold Reiter, Julian Walterscheid, Arthur Bayer, Wilbert Vogel, Teddy Gremminger, Ernest Sicking, Bernard Swirczynski, Norbert Mages and Monte Hellman.

The dance followed the banquet. Members of the P-TA mothers prepared and served the meal. Eighty five persons were in attendance.

## Group Communion And Breakfast Will Observe National Boy Scout Week

Preparations are complete for the local Boy Scouts' observance of National Scout Week by group attendance at the 8 o'clock mass on Sunday in Sacred Heart church, the reception of the Eucharist, and a communion breakfast in the parish hall dining room.

Both local groups, Troop No. 164 and Air Squadron No. 164, will participate in the ceremonies and parents of members will be special guests at the breakfast.

The boys will be in uniform and after each of the three masses on Sunday will accept contributions, at the church door, for the 1947 Boy Scout finance campaign, now being conducted. Scoutmaster Nick Miller asks the boys to assemble at the school at 7:45 to march to church.

T.J. Hoffman of Wichita Falls spent several days of this week with his parents, Mr. and Mrs. J. Hoffman. He is recovering from a serious dental infection and dental surgery.

## CITY COUNCIL RENEWS EFFORTS TO SECURE ANOTHER FIRE TRUCK

Efforts were renewed at the city council meeting Monday night to secure an improved, late model fire truck to supplement the old model now on hand. Original attempts to secure the unit were made early last year but interest lagged after several unsuccessful attempts to get one at an army surplus sale. The city is reluctant to pay the high price of a new truck.

Two principal reasons have been advanced for getting the new model. One is that it could reach fires faster and go into action the moment of arrival besides fighting a fire more effectively. Another reason is that it could serve in emergencies at rural fires. With a storage tank and pump it can operate anywhere whereas the old model requires a fire hydrant connection.

Another difficulty now is an ordinance requiring one truck to remain within the city limits. With two trucks one would be free to answer distress calls.

The council has indicated its interest in having another truck but has not yet agreed to buy one. They are willing to pay the price asked at army surplus sales but are still reluctant to pay a new price.

## City Will Pay Half Of Salary If Sheriff Places Deputy Here

Still considering ways and means to have a full time peace officer permanently located here, the city council proposed Monday night to request the transfer of one deputy sheriff from Gainesville to Muenster.

According to the council the plan is to arrange for joint support of the man by the county and the city. A proposal to that effect will be submitted to the County Commissioners' court in the near future, Mayor Weinzapfel said.

If the plan is approved the man will be permanently located here as a member of the county sheriff's department. Half of his salary is to be paid by Muenster, the other half by the county.

## Retail Grocers Sponsor Dinner and Get-together In Hall Thursday, Feb. 13

All business people of Muenster are invited to attend the retail grocers' dinner and get-together next Thursday night, Feb. 13, in the parish hall. The principal entertainment feature on the program is a concert by the Muenster band.

Members of the Sacred Heart P-TA will prepare and serve the meal and proceeds realized will go to the school lunch fund. Tickets are available now at the Fisher and FMA stores.

Retail grocers from Muenster, Myra, Lindsay, Gainesville, Whitesboro and Saint Jo are expected to attend.

## Cheese Factory To Sponsor Dairy Conference Featuring A and M College Speakers

Will Be Held Wednesday, Feb. 12, at 10 o'clock in Muenster Parish Hall

Dairy interests over a wide area will be centered on Muenster next Wednesday, Feb. 12, when the cheese factory will sponsor a dairymen's meeting featuring addresses by dairy experts from A and M College.

Announcing the event this week, Plant Manager Rudy Hellman disclosed that the program is arranged primarily for the benefit of the cheese factory's patrons but invitations have been extended also, through county agents, to dairymen of Montague, Wise, Denton and Grayson counties.

About 250 persons are expected to hear three experts of the A and M dairy husbandry department discuss the principal phases of profitable dairy management, including such subjects as herd improvement, balanced rations, care of livestock, sanitation, milk storage and cooling, barn facilities and accurate accounting.

Among visitors expected with visiting county agents are several students of GI agricultural courses.

Arrangements have been made with the Sacred Heart P-TA to have lunches available for the group in the hall basement. Proceeds from the meal will go into the school lunch fund.

## FMA BOWLERS TAKE 3 POINT LEAD OVER REA

By the narrow margin of three points the FMA bowlers succeeded in taking the tournament lead from REA last Friday night in their 1576 to 1559 victory over the Veterans. Their average for the two games played is 1548 as compared with 1545 for the REA men.

At the same time the VFW team, though still in third place, boosted its average from 1436 to 1477 and served notice that it is still in the running for tournament honors. The Phone Company, Gun Club and Girls teams continue in the lower bracket in the order mentioned.

## Boy Scouts Reorganize Into Three Patrols, Elect Leaders and Assign Duties

The re-organization of Boy Scout Troop No. 164 for the new year and the election of patrol leaders was the principal business at the regular meeting Monday evening.

Members are now divided into three patrols with Roger Wolf leader of Patrol 1, Floyd Lehertz of Patrol 2, and Larry Joe Walterscheid of Patrol 3. John Myrick was elected Acting Senior Patrol leader and Henry Weinzapfel, scribe, Randy Bayer is in charge of the scrapbook. The assistants to the three patrol leaders are Damian Hellman, Mitchell Wolf and Larry Hofbauer, respectively.

Scoutmaster Nick Miller announced that the meeting next Monday will be conducted by the senior patrol leader and Patrol 1 leader, Damian Hellman will give a short talk on "Being Mentally Alert".

The meeting was marked by a good attendance of members and Scoutmaster Miller was joined by Assistants Ed Endres and Otto Walterscheid in planning a program of activity for the coming year.

Tentative plans were made for a hike to Red River on Sunday, Jan. 16, and will be completed at next week's meeting in the K of C hall.

## Deadline Finds 5 Per Cent Of City Taxes Delinquent

With only slightly more than five per cent delinquent, tax collections prior to the Feb. 1 deadline were very satisfactory this year, according to Mrs. Nick Miller, assessor-collector. Of the total assessment amounting to \$6592.99 only \$369.76 remains uncollected. Some of the delinquencies, Mrs. Miller added, were oversights and have been paid since.

Mrs. Miller also stated that the total of delinquent taxes since 1935 as of Feb. 1 was \$1056.21.

## GRASS FIRE NORTHEAST OF GAINESVILLE WIPES OUT OVER 400 ACRES

Between 400 and 500 acres of pasture land on the farms of T. D. Blanton, Ralph Long, Miss Alma Robb, Chester J. Robb and others, five to six miles northeast of Gainesville, were burned over Monday night by fire, whipped into a frenzy by a north wind of near gale proportions, which brought a new cold wave to this section.

The wind sent the flames rushing southward at a rapid pace, jumping across country roads until it reached U.S. highway 82. Several farm homes in the path of the blaze, including the Ralph Long and Miss Alma Robb residences, were saved by the arrival of four fire trucks from Camp Howze, in charge of Fire Chief Portis M. Sims. Chemical tanks provided firefighting fluid that quickly wiped out the flames advancing toward the homes.

Residents of the area first noticed the burning pasture land shortly after 7 o'clock, about the time the cold wave struck, and the fire raged until midnight.

Scores of persons living in the area, and others attracted to the scene by the rosy glow in the sky to the northeast of town, fought the blaze with feed sacks soaked in water from nearby tanks, but their work was confined to the side-lines, as the flames spread southward too fast for the firefighters to remain in its path.

— Gainesville Register

## Notes On Soil Conservation

Ed Hess, of the North East Muenster Conservation Group, recently completed a tank on his farm, through the aid of Soil Conservation Service Technicians, as part of his soil and water conservation program. He intends using it to control flood waters as well as for a reserve supply of water for his stock.

In the South West Muenster Conservation Group, an eleven hundred foot diversion terrace was built last week by Alphonse Hoenig. It is being used to divert hillside water around his cultivated bottom land.

Technicians of the Muenster Work Unit conducted various application meetings during the past week and are pleased with the favorable response received from all of the farmers attending. Meetings were held with the Bruno Fleitman, Al Hess, J.A. Klement, Norbert Klement, Albert Reiter, and Joe Hoenig Groups, of which these men are the leaders. Other Group leaders are being contacted so that these application meetings can be held for each individual conservation group within the next few weeks.

## Only A Few More Months To Wait For Traffic Light

The signal light ordered a year ago for the Main Street and Highway intersection should arrive in another month or two, Mayor Weinzapfel informed the city council Monday night. The latest communication on it, he said, was last September and it stated that shipment would be made in four to six months.

## Show Patrons Contribute \$82.29 to March of Dimes

The management of the Relax Theatre announced this week that collections at the theatre to aid the March of Dimes resulted in a contribution of \$82.29. The amount has been forwarded to Ted Herrmann, Cooke county chairman.

Collections were taken each evening during the campaign which was concluded Thursday, Jan. 31. The donations finance a nationwide fight against infantile paralysis.

E.E. Kovachek visited here Tuesday to Thursday of last week at the Joe Luke home. Norman Luke and Kovachek were buddies in Pensacola. He was enroute from his home in Milwaukee to California.

## BOY SCOUT WEEK

Nearly 2,000,000 Cub Scouts, Boy Scouts and Senior Scouts will observe the 37th anniversary of the Boy Scouts of America during Boy Scout Week, Feb. 7th to 13th. Through their World Friendship Fund of voluntary gifts the Boy Scouts of America have given \$110,464.36 to help Boy Scouts overseas rebuild their organizations. During the first year of their "Shirts-Off-Our-Backs" project more than 400 cases—or twenty tons—of Scout uniforms and equipment collected from Scouts were contributed to Scouts in 13 nations. Scouting has always been an active force in promoting better understanding and mutual goodwill among the nations. Above is the official poster marking the event.

A little item run across a few days ago brings back fond memories of some editorial horse play in this column about six or seven years ago. It's about a cricket's instinctive ability to serve as a thermometer.

On first discovering that little gem of scientific knowledge this column drifted into a discussion on the merits of having a pet cricket around the place to tell the temperature. Otto Bordenkircher, then a member of the Ft. Worth Star Telegram staff, picked up the article and suggested that the Enterprise work out some sort of Rube Goldberg contraption whereby a cricket could be used to control the heat in this plant. For a month or more every comment in either column brought a response until practically all wild ideas on the subject were thoroughly exhausted. Probably the exchange of foolishness would have continued longer if both of us had not suspected that readers were getting tired of it.

For the second time yours truly is gratified for the publication of that bit of scientific data. The fact is that not so long ago Con heard a cricket chirping and wanted to figure the temperature but could not recall the formula for working it out and did not feel inclined to thumb through years of back copies of this column.

This time maybe the figures will stick. And for the benefit of anyone else who has forgotten, the column will divulge the knowledge again. Simply add 40 to the number of chirps in 14 seconds and you have the prevailing temperature. If the little fellow sounds off 40 times in the specified period you know the thermometer should read 80. For 60 chirps the reading is 100.

The only trouble is that Mr. Cricket is obviously only a warm weather thermometer. As weather gets cooler the frequency of his chirps rapidly approaches the vanishing point. According to the formula, he gets down to complete silence at 40, which renders him quite useless for weather like this.

Within his field, however, science claims that the cricket is dependable enough to satisfy every day curiosity about the temperature. After a series of tests experimenters said that he is correct within one degree 75 per cent of the time and within two degrees 90 per cent of the time. Lots of our thermometers don't do any better than that.

President Truman boosted his popularity substantially Tuesday when he bluntly told the new Polish ambassador just how his government rates in this country. He as much as told the guy that he had no use for him or the communist racketeers of his crowd but accepted him only for the sake of the Polish people.

We especially like the President's remarks because they give the official status to an opinion most of us have had all along. We have said plenty as individuals about Reds imposing their tyranny on Poland, and we are pleased to know our government openly proclaims that viewpoint to the rest of the world. Likewise pleasing is the statement that our only desire is to help the Polish people, not the communist crowd that is kicking the Polish people around.

A glance at some of the blessings of planned economy in England gives us a good reason to rejoice that our country repudiated the Pinks in our last election. Typical comments from over there nowadays run like this, "When we are parked with relatives and the kids are hungry, it helps a bit to know that we own the Bank of England," and "We voted left and got left."

For an idea of even more completely planned economy we submit a comparison of conditions in this country and Russia:

"Under a free and democratic system of enterprise, the average American worker puts in three hours of labor to buy the daily food for five people — whereas under Russian Communism the average worker puts in nine hours of labor to buy the same amount of food.

"The average American worker will put in 15 minutes of labor to buy a toothbrush — the Russian must put in four hours.

"The average American worker will put in three hours of his labor to buy a pair of galoshes — the Russian puts in 160 hours.

"The average American worker can buy a fine wristwatch with his wages for 30 hours of work, while the average Russian worker would have to put in 1,600 hours of labor to buy such a wristwatch — if he could find one for sale any place over there.

"If he wants a bottle of beer, the average American worker

Norman Luke began classes  
Tuesday at NTSTC in Denton.

J.C. Trachta made a business  
trip to Wichita Falls Thursday.

Matt Yosten of Wisner, Neb.,  
arrived Wednesday for a visit with  
relatives here.

Mrs. Gerald Stelzer and daugh-  
ter have returned from a visit  
with the Matt Stelzers in Post.

Mr. and Mrs. Ed Swirczynski  
of Fort Worth visited his par-  
ents here Monday.

Miss Marie Lutkenhaus has  
gone to Amarillo for a few  
months' stay with her sister,  
Mrs. Oscar Detten and family.

John Wieler and Ervin Ham-  
ric made a business trip to Tioiga  
and Fort Worth Wednesday.

M.H. King has a new Ford pick-  
up delivered by Urban Endres  
this week.

Mr. and Mrs. Aubrey Jones an-  
nounce the birth of a daughter  
Saturday. Jones is employed at  
Muenster Motor Company.

Mr. and Mrs. Frank Evans and  
children of Pilot Point spent  
Sunday with her parents, Mr. and  
Mrs. F.J. Hess and family.

Mrs. J. M. Weinzapfel spent  
this week in Texarkana visiting  
her son, Rev. Thomas Weinzapfel  
and friends.

Mr. and Mrs. Roman Trachta  
of Fort Worth visited relatives  
here Saturday while in the city  
on business.

Albert Sohrempf, special re-  
presentative for the Catholic Life  
Insurance Union, arrived Friday  
for a visit in the area.

Tony Lehnertz of Mitchell,  
South Dakota, arrived last Thurs-  
day for a visit with the Joe Leh-  
nertz family and other relatives.

Saint Anne's Society will have  
a social for members Monday af-  
ternoon in the parish hall. It  
will be the last pre-lenten social  
for the society.

Little David Haverkamp, son  
of Mr. and Mrs. Bill Haverkamp,  
is a patient in a Sherman hospi-  
tal for treatment for rheuma-  
tic fever.

Mr. and Mrs. J.W. Fletcher  
had as guests Monday night, his  
brother-in-law and sister, Mr.  
and Mrs. Joe Cochran of Fort  
Worth.

Mr. and Mrs. J.W. Fletcher and  
her mother, Mrs. Shiflet, spent  
Sunday in Pilot Point with the  
latter's son, E.M. Shiflet and  
wife.

Mr. and Mrs. John E. Keyser  
returned to their home in Mount  
Vernon, Ill., Monday after visit-  
ing relatives of the Wieler fami-  
lies since the previous Wednes-  
day. Mr. Keyser is a nephew of  
Mrs. Wm. Wieler, and this was  
his first visit in Muenster in 35  
years.

Martin Friske was a patient at  
Gainesville sanitarium two days  
last week taking treatment for  
blood poisoning resulting from a  
carbuncle on his arm.

Joe Fisher is in Dallas since  
Friday as a patient in a hospital  
for a checkup and treatment.  
His son, J.W. Fisher and wife ac-  
companied him to that city.

Mr. and Mrs. Clarence Albers  
have moved from Gainesville to  
Muenster and are occupying the  
house recently vacated by Jerome  
Pagel.

Mrs. N.J. Mayer and daughters  
of Chicago, Ill., will arrive next  
week for a visit with her parents.

Mr. and Mrs. F.J. Yosten and  
family. Mrs. Mayer is the former  
Miss Josephine Yosten.

Mr. and Mrs. Tom Hennigan  
and family of Wilson, Okla., and  
their daughter-in-law, Mrs. Wil-  
liam Hennigan, and little daugh-  
ter, were Sunday guests at the  
H.P. and Fred Hennigan homes.

Mr. and Mrs. Louis Nieball and  
little daughter, Patsy Lou, and  
Mr. and Mrs. Richard Wett and  
daughter, Sharon Jean, all of  
Dallas, were weekend guests in  
the home of Mr. and Mrs. Paul  
Nieball.

J.M. Weinzapfel was last week  
appointed as a member of the  
executive committee of the Red  
River Valley council of the Boy  
Scouts of America. The appoint-  
ment was made during a visit of  
Cub Byrnes, district official, when  
he was in the city Saturday.

Mr. and Mrs. Reagan McElreath  
announce the birth of a 9-pound  
son, Winfred Morris, at the local  
clinic on Jan. 31. They have one  
other child, a daughter. The  
grandparents are Messrs. and  
Mmes. S.O. McElreath and R.D.  
Morris of Rt. 3, Muenster.

Mrs. Joe Luke returned Tues-  
day from a week's visit in San  
Antonio and Corpus Christi. In  
the former city she attended an  
executive meeting of the Catholic  
State League and visited her  
niece, Mrs. Charles Denny, and  
then went to Corpus to visit re-  
latives and friends.

Mr. and Mrs. A.L. Grewing and  
son, Robert, of Vesta, Minn.,  
visited relatives here during the  
week. They spent Saturday with  
Mr. and Mrs. P.J. Rollman and  
daughters. Mr. Rollman and Mr.  
Grewing are former school mates  
and he is Mrs. Rollman's cousin.

Everybody is willing to give a  
man a boost when he gets to the  
top.

## Washington News Letter

Washington, D.C., Feb. 1 — "Should We Further Restrict Immigration" will be the subject of a radio debate on the American Forum of the Air program on Tuesday, February 11, 1947. It will be broadcast over the Mutual Network from Washington 9:30 to 10:15 p.m., Eastern Standard Time — 8:30 to 9:15 Central Standard Time. On the affirmative will be myself and Omar B. Ketchum, National Legislative Representative, Veterans of Foreign Wars. On the negative will be Congressman Emanuel Celler of New York, and Earl Harrison, former Commissioner of Immigration, now dean of the Law School, University of Pennsylvania.

This has been somewhat of a "Sam Rayburn week" in Washington. As Speaker of the House of Representatives Mr. Rayburn was furnished an automobile and chauffeur. When demoted to Minority Leader in this Congress, Mr. Rayburn lost the use of said automobile. Congressman Frank Boykin of Alabama thereupon raised money among the Democratic congressmen to present Mr. Rayburn with a new car. This car was given to him on Thursday in front of the Capitol.

On Friday night the State Soc-

### Citation by Publication THE STATE OF TEXAS

TO: Winifred Vance Defendant, Greeting:

You are hereby commanded to appear before the Honorable District Court of Cooke County at the Court House thereof, in Gainesville, Texas, at or before 10 o'clock A.M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 24th day of February A.D. 1947, then and there to answer Plaintiff's Petition filed in said Court, on the 8th day of January A.D. 1947, in this cause, numbered 14868 on the docket of said court and styled Jean Vance Plaintiff vs. Winifred Vance Defendant.

A brief statement of the nature of this suit is as follows, to wit:

A suit for divorce from the bonds of matrimony for the reason of harsh and cruel treatment and for the care and custody of the minor child, Sandra Lea Vance, and for general and special relief, as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Gainesville, Texas this 8th day of January A.D. 1947.

Attest: Martin G. Davis, Clerk, District Court, Cooke Co., Texas (8-9-10-11)

ety had a dinner at the Statler Hotel honoring Sam Rayburn. Among others, this dinner was attended by 6 Cabinet members and 2 members of the Supreme Court Chief Justice Fred Vinson of Kentucky delivered the main address honoring Mr. Rayburn.

The House of Representatives this week passed a bill continuing war time excise taxes, which include 20% tax on railroad tickets, theater tickets, cosmetics, long distance telephone calls, jewelry, and furs, and \$9.00 per gallon tax on whisky. Incidentally, recent figures show that in 1945 the United States spent \$7,800,000,000 for alcoholic drinks, and \$3,000,000,000 for tobacco, while giving only \$1,035,000,000 for religious purposes. This is a sad commentary on our individual and collective morality.

The United States government is getting ready to do something about the foot and mouth disease which is now threatening us from below the Rio Grande. This is the most dreaded disease known to livestock. It is highly infectious, spreads rapidly, and is extremely difficult to combat and eradicate. Today it is prevalent only 200 miles from our border in old Mexico. The threat of its spread into Texas and other border states is so serious that the subject was discussed at the President's Cabinet meeting last week, and I understand the pressing need for cooperation with Mexico in combating it is one of the compelling reasons why President Truman is taking a good-will flight to Mexico City in early March.

The disease was positively diagnosed by our experts on last December 26. Since then several officials from our Animal Industry Bureau have been in Mexico surveying the situation in order to help the Mexican Government eradicate or check the spread of the disease.

In Washington, Committees on Agriculture in the House and Senate are making studies and awaiting recommended legislation from the Bureau of Animal Industry. Last week, Congressman Fisher of San Angelo introduced a bill to expedite the construction of a drift fence along our side of the Rio Grande to help block the trickle of livestock and wild animals from across the border.

It would be absolutely disastrous for the disease to break out in this country. We had a taste of it before. On eight occasions since the turn of this century we have had mild outbreaks. The cost to the livestock industry

and to the State and Federal governments cooperating in stamping out the disease in these eight outbreaks exceeds \$200,000,000. In the 1914 outbreak it was necessary to kill 172,222 head of cattle, hogs and sheep in 22 states.

We may have to bear a major portion of the expense in the eradication work in Mexico, but an ounce of prevention is worth a pound of cure. We must act promptly.

### Phlew

A flea and a fly in a flue Were imprisoned, so what could they do Said the fly, "Let us flee!" "Let us fly!" said the flea. So they flew through a flaw in the flue.

Another Angle  
"She thinks no man is good enough for her."  
"She may be right."  
"Yes, and she may be left."

### Grass Silage Can Play Big Part in Dairy Program

I know you don't put up grass silage in mid-February, but if you're looking ahead to more milk and more profits you think about it now.

And I've just run across some dandy information. The Extension Services at the University of Illinois, Urbana, Ill., and at Mississippi State College, State College, Miss., have bulletins on making grass

and legume silage. The Illinois bulletin is Circular 605, and the one from Mississippi is Bulletin 425.

An important angle to grass silage, as Illinois points out, is that if you have a surplus of pasture in spring you can make it into silage; use it for feed in mid-summer hot months, then refill the same silo later in the year with other silage for winter feed. Either permanent or temporary silos will hold grass silage.

If you shivered on the way to the barn this morning you'll appreciate the timeliness of a bulletin from the University of Missouri. It is Circular 523, discussing an all weather stock tank.

An insulated concrete tank has been in use near the College for a year and not a trace of ice showed on it even though the temperature dropped to 5 below zero.

It's quite a problem on many farms to provide running water for stock in the winter time, and this insulated tank may be the answer. The tank is equipped with an automatic float valve and trickle overflow pipe, water coming from a pond.

The Missouri circular gives complete details on how to build the tank, materials necessary, etc. It's well worth sending to the Extension Service, University of Missouri, Columbia, Mo., and getting a copy.

"Quality" and "efficiency" are two little words which in 1947 can mean more to dairy farmers than most any other two words you can pick out, in your old Uncle Bob's opinion. Producing quality milk is the first step in the whole program of building to still higher levels the consumption of every dairy product. Efficient operation on your farm—more milk per acre—is the way to assure yourself a good year from a dollar gain standpoint. And greater efficiency means a solid foundation for the future.

One of our men in the South says a farmer once told him, "Mister, you can't anymore tell me nothing about something you don't know nothing about anymore than you can come back from where you ain't been."

I can't sit back on Groundhog Day and tell you what kind of weather you'll get next summer. But I recall that a long dry spell in this part of the country last summer knocked milk production and cut dairy farmers' income. There are things you can do to prevent any such sharp decline in production this year.

If you look over your farm layout, I'm sure you'll be able to find a small acreage that you can use for Sudan grass. All you need plant is a half acre per cow and you'll do a swell job of taking out insurance against drought.

Pasture renovation is another important "insurance" in your program to prevent summer milk slump. A good seed mixture that includes legumes, plus soil building through application of the right amount and the right kind of fertilizer, will do a great deal to give you more and better forage over a longer period of time.

The extension service in your state has tested and proved up a grass and legume pasture mixture suitable for your farm, no matter what kind of land you have.

I suggest you get in touch with your county agent at once, have a soil test made, find out what fertilizer to use and get it on as soon as possible. Also, get your county agent's recommendation as to a pasture seed mix that will provide the best possible grazing for your cows.

\*NOTE:—There is usually a 5c charge for pamphlets mailed to non-residents of a state; but possibly your own state has a free pamphlet on the same subject. Ask your county agent.

### A SALUTE TO THE BOY SCOUTS

The observance of National Boy Scout Week, Feb. 7-13 by almost two million youngsters all over the country is a fitting occasion for the rest of us to express sincere gratitude and wish the Boy Scout movement continued success in its fine work.

To be the least bit familiar with scouting is to appreciate that it is one of our nation's principal contributors to sound citizenship. For 37 years the Boy Scout movement has been busy at the job of developing character by diverting leisure energies and interests into

### THE VALENTINE WE ALL WANT

By COLLIER

constructive channels. It supplements the efforts of parents, teachers and pastors, applying and emphasizing the basic principles of proper living. In addition to that it provides another essential ingredient to a boy's healthy development. Scouting is fun.

In fact, that one ingredient is the real reason for the phenomenal success of the movement. All activities fit together as parts of one big intriguing game combining the elements of development, promotion, sportsmanship and enjoyment. A boy has a big time and at the same time he has the satisfaction of using his time well.

Scouting is a good deal from lots of angles. It provides some of the good times to which every boy is entitled. It develops integrity, diligence, ambition, fair play, consideration and lots of other qualities that blend into good citizenship.

### AL FLEITMANS HONORED ON 19TH ANNIVERSARY

Mr. and Mrs. Al Fleitman, who observed their 19th wedding anniversary on Thursday, Jan. 30, were honored with two surprise parties.

The first, given on the 30th, was a courtesy extended by their children and began with an old fashioned charivari including kettles, tin horns and cow bells. The guests then presented the honoree with a shower of gifts and settled down to progressive 42 series. High score award was won by Mrs. Joe Sicking, the galloping prize went to Mrs. Frank Klement and Alphonse Hoenig received the consolation favor. Delicious refreshments were served.

Personnel included Messrs. and Mmes. Felix Becker, Frank Klement, Eugene Klement, Vincent Becker, Joe Sicking, Alphonse Hoenig, Victor Hartman and Arthur Endres and daughters, Misses Rose Marie Becker and Anna Marie Klement and Leo Becker.

On Friday evening a group of friends arrived in a body at the Fleitman home and after presenting gifts, spent the evening enjoying informal diversion and refreshments. Personnel included Mr. and Mrs. J.J. Haverkamp and family, Bill, Werner and Arnold Henscheid, Mr. and Mrs. Walter Klement and Mr. and Mrs. Bernard Wolf and family.

Mr. and Mrs. Fleitman were married here on Jan. 30, 1918.

and are the parents of five children, Edmund, Betty Jean, Allene, Herbert and Lorine. Mrs. Fleitman was Miss Millie Wiesman before her marriage.

### PAUL NIEBALL GREETED WITH SURPRISE PARTY

Friends gathered at the home of Mr. and Mrs. Paul Nieball Monday evening for a surprise party honoring Mr. Nieball on his 51st birthday. The courtesy was arranged by Mrs. Nieball.

Progressive 42 series furnished diversion for the guests with the high score award going to Mrs. Joe Kathman and the consolation favor to Joe Swirczynski. The honoree won the galloping award.

Mrs. Nieball served attractive refreshment plates of chicken sandwiches, peaches, cake and coffee to Messrs. and Mmes. Joe Swirczynski, Nick Yosten, Joe Kathman, Clarence Wilson, Joe Bergman, Al Walterscheid, Herman Swirczynski, John Kathman and daughter, Anselma, Mrs. Bob Yosten, Paul Jr. and Billy Joe Nieball and the honoree, who received a shower of gifts from the guests.

Mr. Nieball has served as rural carrier for route 1 since coming to Muenster 27 years ago.

From where I sit... by Joe Marsh

### Lem's Dogs vs Thad's Chickens

Running a newspaper, you get to know a lot about human nature.

Thad Phipps was in the other day, all burned up. Wanted me to run an item on how Lem Martin's dog had raided his chickens again, and ought to be put away by law.

I told him: "Lem was in on Saturday. Said you shouldn't be allowed to keep those chickens so close to his house—and in a residential zone, at that."

Thad shuts up right pronto then. And that very evening I see him making his peace with Lem

at Andy Botkin's Garden Tavern —over a friendly glass of beer.

From where I sit, anyone can find something in his neighbor to complain about. (Some folks may even disagree with Thad's right to enjoy that glass of beer with Lem!) But where would we be if everybody tried to have a law passed against everything they disagreed with? We wouldn't have many neighbors left!

*Joe Marsh*

stasia Tempel as cohostesses. It was a surprise affair.

A series of games and contests furnished diversion for the guests who presented the honor couple with an assortment of Postoria crystal.

The hostesses served refreshments at the close of the evening.

Personnel included Messrs. and Mmes. Charley Hellman, Al Eberhart, Leonard Yosten, Vincent Becker, Herman Fette, Dave Trachta, J.C. Trachta, Jimmy Lehnertz, Ray Swirczynski and M.H. King, Misses Geneva Gremminger and Anastasia Tempel and Elmer Fette and Maurice Pagel.

**DINNER PARTY SUNDAY IN J. A. TRAVIS HOME**

Mr. and Mrs. J. A. Travis entertained with a dinner party in their home Sunday honoring Mrs. Gus Travis and daughters, Misses Doris and Beryl Joe, of Hamlin who were their weekend guests.

Other guests for the dinner were Messrs. and Mmes. Rollon Wilson and son of Gainesville, Jess Ritchey of Bulcher, Cecil Cain and Smyerl Owens.

**Stationary Trailer Houses**

Thirty-seven "white elephants" were sold by the Dallas WAA office when that many "roadmaster" 81-foot overall heavy duty trucks including tractors and trailers were disposed of to nine successful bidders. Too long and heavy to secure peace time highway permits, they will not go back on the public roads. Instead, they are variously being converted into houses, livestock feeders, grain storage and other adaptable uses, purchasers disclosed.

**CASH PRODUCTS FROM WASTE IS RESEARCH GOAL FOR THE SOUTH**

New York. — A three-way drive to turn the South's waste materials into valuable commercial products is being pressed this year by the U.S. Department of Agriculture in cooperation with leading industries and universities.

Such familiar and hitherto worthless by-products as corn cobs, grain stalks and husks, cottonseed hulls, buckwheat blossoms and chicken feathers are already finding wide usage in important industries, and the department's Southern laboratory at New Orleans will devote 1947 to exploring the commercial applications of many others including peanut shells, sweet potatoes and cotton fibers.

Potentialities of the far-reaching research program are found, it was pointed out, in the uses now being made of corn cobs by such companies as SKF Industries, Inc., which reports use of approximately 48,000 pounds of ground cobs annually to burnish and clean ball and roller bearings.

Hardly a leaf is being left unturned by researchers.

The university of Pennsylvania Medical School is experimenting with the lowly buckwheat plant, traditional griddle cake ingredient, to extract rutin needed for high-blood pressure victims. Other experts hope to develop a strong synthetic fibre from the 175,000,000 pounds of chicken feathers thrown away annually.

In southern Florida a \$17,000,000 factory has been erected for large scale production of starch from sweet potatoes, and such construction-board manufacturers as Celotex Corp., Chicago, and Maizwood Insulating Co., Dubuque, are buying up straw, stalks and husks as raw materials. Peanuts and cottonseed hulls are providing synthetic motor fuel at the rate of 90 gallons to the ton.

To increase yield of penicillin, chemists and scientists are feeding the drug-producing mold a \$234,000 yearly diet of 8,000,000 pounds of sugar obtained from milk. Three Agriculture department research stations are producing tannic acid, essential for curing hides, from wild sumac leaves, while off-shaped lemons, once discarded, are now producing profits in the form of lemon oil, citric acid and pectin.

**Mental And Nervous Diseases Responsible For Half of Hospital Cases**

Austin, Texas. — Mental disorders today represent a real problem and it is estimated that more than fifty per cent of all hospital beds are filled by persons suffering from mental or nervous diseases, declares Dr. Geo. W. Cox, State Health Officer.

It thus appears that modern civilization is exacting a terrific toll. High speed living, with its cruel exactions upon nature, is responsible for a large part of the trouble. But improper personal conduct must also shoulder much of the blame. The fact is that nearly fifty per cent of the patients entering hospitals for mental disorders are there because of organic or toxic causes.

For example, general paralysis is the direct cause of one-fifth of the mental troubles in males

entering hospitals and one-tenth of the disorder for all groups. This condition is an organic disease of the brain due to the germ responsible for syphilis. It is a preventable disease. Early and effective treatment of acquired syphilis will block the end results of general paralysis in the insane.

The excessive use of alcohol is responsible for a number of mental disorders, at least in males. Alcohol and syphilis combined are responsible for approximately one-fifth of the hospitalized insanities. Nevertheless, improper living habits continue to impair many brains. Insufficient sleep, neglect of bodily care and an over forcing of nervous energy are the pitfalls to avoid in this connection.

Nature demands that her fundamental laws be at least reasonably observed. A constant outraging of the physiological economy takes its toll not only in bodies but in minds also. Insanities and lesser nervous disorders could be spectacularly reduced if this fact was more generally respected. Training for mental health must be started in childhood as that is the time when corrections can be made to the best advantage.

**Shot of Local Oil Well On Photo Magazine Cover**

A picture by Kent Bellah of Saint Jo of an oil well in the area has been used for the cover of The Commercial Photographer, largest and oldest magazine in circulation devoted to commercial photography. Bellah is the second Texas photographer to have a photo used on the cover. The picture is a night shot of the derrick with all working lights burning. The magazine also carried a story about the Bellah Studio.

Radio comedians claim to reach a vast audience. We might add that they are fortunate too that the audience can't reach them.

**Citation by Publication THE STATE OF TEXAS TO: Harry Rosenstein, Jr. Defendant, Greeting:**

You are hereby commanded to appear before the Honorable District Court of Cooke County at the Court House thereof, in Gainesville, Texas, at or before 10 o'clock A.M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 10th day of March A.D. 1947, then and there to answer Plaintiff's Petition filed in said Court, on the 20th day of January A.D. 1947, in this cause, numbered 14879 on the docket of said court and styled Harry Rosenstein et al Plaintiffs vs. Harry Rosenstein, Jr. Defendant.

A brief statement of the nature of this suit is as follows, to wit: Suit for partition of Lot 6 in Block 47 of Lindsay Addition to the City of Gainesville, Texas, as is more fully shown by Plaintiff's Petition on file in this suit.

The officer executing this process shall promptly execute the same according to law, and make due return as the law directs.

Issued and given under my hand and the Seal of said Court, at office in Gainesville, Texas this the 20th day of January A.D. 1947.

**The American Way**  
By George Peck

**FREE SPEECH**

One of our most cherished heritages is free speech. Just exactly what do we mean when we so glibly say "free speech"? Is it simply the right to "pop-off" our individual opinions or does it go a bit deeper than that?

Every right that we enjoy involves a duty. If that duty is not performed, the right finally is lost. We now enjoy the right to free speech but that involves the duty of giving free hearing to the other fellow when he exercises his prerogative of free speech. Free speech irrevocably is linked to free hearing, because free speech is nothing more nor less than the determination of free peoples to hear both sides of any question pertinent to their welfare, so that they can make an intelligent decision regarding it.

This carries us along to still

COPYRIGHT 1947 J. K. CLARKE

another freedom. Free speech and free hearing have a senior and most important partner — Free Thinking. This senior partner is the most vital of the partnership. Without free thinking, free speech and hearing are futile, because they in themselves are of no value if minds are closed; if preconceived ideas preclude open minds.

In its broader and real significance (something we are prone to overlook), free speech not only implies the right to speak one's mind but to have one's speech fall on open ears and minds willing to listen honestly and unselfishly.

Free thinking is hard work. All too often we allow our emotions to dictate our decisions. How many times do we permit ourselves to be influenced by transitory sympathy for an individual or group, to the utter disregard of what is best for the most people for the greater length of time!

The unfortunate peoples in dictator-ridden countries would give their very souls to regain the privilege of free speech. Too late they realize they have been tricked by glib orators who made promises they could not possibly keep. These unhappy people became so dazzled by the eloquence of the "spell-binders" that they neglected to think things through, and thereby relinquished their freedom. We must not let that happen to us here in America.

We listen to a speech — an oration which stirs us to the very core. Free speech gets a free hearing. But here is where free thinking must come into play. Emotion must not be permitted to banish reason. If on the next day we can remember what the speech was about; if we can recall its salient points, it was an excellent speech. If, in retrospect, we can go over the oration piece by piece, without the spell of the orator upon us, and can still see any logic in it, then it was a most excellent speech. If, on the other hand, we can remember little of it, free thinking demands that we put the speaker down as a shallow, superficial "wind bag", and entirely dismiss from our mind any effect which this speech temporarily may have

**IN THE AUTO SPOTLIGHT**

Preview of a streamline auto future was the idea spotlighted by car accessory and equipment manufacturers at their first convention in six years held at Atlantic City. Emphasis was placed on efficiency, safety and modernity of all items displayed, all of which mean driving in 1947 is headed for added pleasure.

Over three million of America's pre-war cars need either new auto cigaret lighters or have defective lights requiring immediate attention, a recent survey discloses. The study conducted by Casco Products Company of Bridgeport, Conn. also shows 5.4 per cent have missing heads or heating elements, 8.4 per cent have defective wells, while 15.6 per cent have defective or worn heads.

If you're one of those drivers who believes that speedometers are fixed, you had better change your ideas. Speedometers, as a rule, are honest; the typical one is accurate at speeds from 10 to 50 miles-per-hour. At 60 miles-per-hour there may be an inaccuracy of from one to three miles.

A recent police traffic safety check shows that 34.2 per cent of the cars on the road today are defective. Defects helping to roll up accident tolls are: Rear and stop lights, 31.4 per cent; front lights, 19.7 per cent; brakes, 14.1 per cent; windshield wipers, 9.2 per cent; horns, 8.1 per cent; tires, 5 per cent.

New adjustable fender guides, designed by Casco engineers, are a decided "aid" accessory which help in heavy traffic and parking while adding new beauty to your auto, whether 1946 or older vintage.

had upon them.

Of course while we were at war we had to be reasonable and patriotic in exercising our right to free speech. We still had the right to criticize and discuss the methods the government used in prosecuting the war, but we did not dare oppose its war objectives nor divulge information that might be helpful to our enemies.

But now that we are again at peace we must resist every attempt to infringe on our right to free speech; we must fight to the last ditch every attack on our free press, our free radio, our free church and our free motion pictures. Transcending even that, we must maintain open ears and minds; we must manifest a willingness, yes even an eagerness, to hear both sides of every question. That ever has been the American Way — pray God it will continue to be.

**JOHN B. HERR NOTES  
86TH BIRTHDAY SUNDAY**

John B. Herr, one of the few early pioneer-citizens still living, celebrated his 86th birthday Sunday with an enjoyable reunion at the home of his son-in-law and daughter, Mr. and Mrs. Matt Muller, with whom he makes his home.

Present for the afternoon, supper and an informal evening were Messrs. and Mmes. Al Schnitker, Joe Schnitker, James Schnitker, Walter Schnitker, all of Denison, T. Miller and family, George Gehrig and children, Norbert Knabe and children, and Arnie Muller and Mr. and Mrs. Matt Muller and family.

The day also marked the birth anniversary of Mrs. Al Schnitker who was 45 years old and received congratulations and shared honors with her father.

Mr. Herr came to Muenster in March 1890 and has resided here since. He married Miss Barbara Rohmer in New Haven, Neb. in August 1885, and they celebrated their golden wedding anniversary in 1935 with a reunion of all their children and grandchildren. Mrs. Herr passed away in Jan. 1944.

Mr. Herr still enjoys good

health, but since breaking his hip in a fall in 1937 is confined to a wheel chair. He is the father of 16 children, 13 of whom are living.

Mr. and Mrs. Henry Fette returned Tuesday from a three-day visit in Fort Worth where they were guests of Mr. and Mrs. A.H. Richter.

Joe Hellman of Corpus Christi has sent in a renewal subscription to the Enterprise stating, "Don't let me miss even one week's issue as I enjoy the home town news greatly."

**PEOPLE ARE ASKING  
THESE QUESTIONS ABOUT  
ARMY ENLISTMENT**

Q. *What educational benefits do I get under the GI Bill of Rights?*

A. If you serve honorably on active duty for a period of 90 days, one day of which is served between September 16, 1940, and the date of termination of the present war, or you are discharged because of an actual service-incurred injury or disability incurred within that first 90-day period of service, you are, upon discharge, entitled to one year of education in the college, trade or business school of your choice for which you can qualify. In addition, each month of active duty, including the first three, prior to the termination of the war, entitles you to another month of post-service education, up to 48 months.

Your tuition, laboratory fees, etc., up to \$500 per ordinary school year will be paid by the government. Also, you will receive \$65 a month living allowance; \$90 a month if you have dependents.

Q. *What about family allowances?*

A. For men enlisting or reenlisting now, family allowances will continue until six months after the war is officially ended.

Q. *What are my chances of going overseas?*

A. If you enlist for 3 years, you may select to serve in any overseas theater which has openings, especially Japan or Korea.

Q. *Can I still choose the branch of service I want to serve in?*

A. Yes. You can pick any branch which has quotas to be filled, if you enlist for 3 years.

Q. *Is there any way I can reenlist in my old grade?*

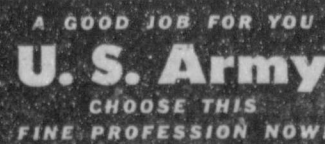

A. Yes, you can, if you reenlist for a 3-year term within 20 days after your honorable discharge.

Q. *Is there any other way I can reenlist in grade?*

A. Yes, if you held one of certain military occupational specialties, and were discharged on or after May 12, 1945, you can reenlist in a grade depending on the length of time you held the desired M. O. S.

Visit your nearest U. S. Army Recruiting Station for answers to any other questions you may have, or for further details on the above questions.

**GENIUS BEHIND  
THE LIGHT ...**

This month marks the 100th anniversary of the birth of Thomas A. Edison, genius, who, perhaps more than any other individual, advanced the standard of man's everyday living.

Edison's amazing list of accomplishments was the result of his imagination, plus initiative, toil and painstaking thoroughness. It is recorded that he made experiments testing more than 6,000 samples of bamboo fibres before he finally developed the correct carbon filament which made the incandescent electric light bulb practicable. And this is only one of more than 1,150 of his inventions that contribute to almost every phase of our modern life.

Imagination, initiative, toil and painstaking thoroughness are also the principal factors behind the dependable electric light and power service you are enjoying today. More than 2,500 Texas men and women make up the Texas Power & Light Company organization and aid in providing dependable, low-cost electricity to more than 200,000 customers in a 52-county area of North, Central and East Texas. This organization, while serving you today, is always planning and building for your increased electric service needs of tomorrow.

### Lindsay News

Miss Ann Schmitt has gone to Fort Worth to be employed.

Miss Lu Ella Arendt, of O.L.V. College, Fort Worth, spent the weekend here with her family and visited her father at M and S hospital.

Mr. and Mrs. Charles E. Wimmer of Muenster were Sunday guests of her parents, Mr. and Mrs. Matt Neu.

Mr. and Mrs. Wm. Sandmann visited in Muenster Saturday with their son-in-law and daughter, Mr. and Mrs. Pat Hennigan.

A number of persons from this community attended a miscellaneous shower Wednesday afternoon in the Muenster parish hall honoring Miss Nina Mae Owens, bride elect of Raymond Laux.

Impressive services Tuesday evening marked the close of Forty Hours Devotions at St. Peter's church. During the three-day services Father Conrad, pastor, was assisted by Fathers Herman and John of Muenster.

### Brakeless Car Breaks Paul Arendt's Left Leg

Paul Arendt is resting comfortably in M and S hospital where he is a patient since last Thursday when he received a broken left leg and bruises in an accident in a Gainesville garage.

According to his doctor the bones are knitting normally and he should be able to return home soon.

Mr. Arendt's injury resulted from defective brakes on a car that was being moved from one spot to another in the garage. By the time the driver realized he had no brakes and shouted a warning it was too late for Mr. Arendt to move out of the way. In jumping on a work bench behind him he failed to get his leg clear of the bumper.

### He Saw His Shadow

Don't be in a hurry to pack away the overcoats and long-handled — Winter is due to hold on for another six weeks, that is if groundhog shadows have any significance.

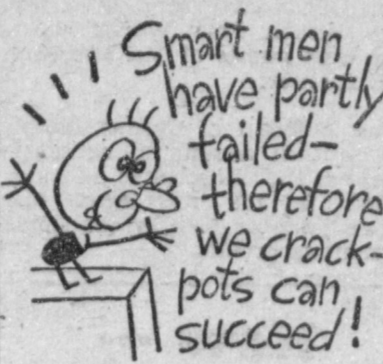

If a groundhog got out at all last Sunday he was sure to see his shadow. The sun was out all day.

### COUNTY GINNING REPORT

There were 2,613 bales of cotton ginned in Cooke county from the 1946 crop prior to Jan. 1, 1947, as compared with 2,384 bales for the crop of 1945, according to a report released on Jan. 31, by Edwin J. Huffaker, special agent for the department of commerce bureau of the census.

Never regard a man as a failure until he flops at something he likes.

### don herold says:

It's a young world, and sanity has not yet had time to produce completely satisfactory results.

So the world right now is full of people who want to try insanity.

They want to try it in art; they want to abandon beauty and try ugliness.

They want to try it in music; they want to abandon harmony and try dissonance.

They want to try insanity in politics and economics. They want to throw away democracy and normal human instincts and try screwball controls from ivory-towers full of ivory heads. Since sane methods are still in a process of evolution, the crack-pots say "Throw them out" and then they prescribe cockeyed courses—the crazier the better.

Since sanity is still only trying, shall we abandon it for lunacy?

### Wrap 'em, Feed 'em and Let 'em heal Prescribed As Best Burn Treatment

What is the best treatment for a burn? U.S. doctors, who have argued loudly about the subject for more than 20 years, have tried a vast variety of applications, including tannic acid (a component of tea), silver nitrate, hormone ointment, triple aniline dyes, sulphur water, cold water, ice, and a concoction of paraffin wax, sulfanilamide, menthol, camphor, vaseline and cod liver oil, the whole topped off by oil of eucalyptus to kill the smell.

Recently one of the leading authorities on burns poured all these down the drain and reported that burns specialists now agree on much simpler methods. His recommendation: just wrap the patient, feed him well and let him heal.

The new treatment brings together what has been learned from such disasters as Boston's 1942 Coconut Grove fire and wartime experience with men burned aboard ships and planes.

"The only thing a girl can count on nowadays is her fingers."

### How Long is a Foot?

If you ever want to read a shoe size from the numbers printed on the inside of your shoe, here's the trick: The width is indicated by the first number, the length by the following two or three num-

bers. For instance, size 485 is an 8½D. The first figure "four" stands for the fourth letter in the alphabet, which is "D"; the 85 indicates that the length is 8½. A five as the last figure always denotes a half size; an "0" as the last figure a full size.
