

On the surface there seems to be a slight tinge of dictatorship in the recently proposed legislation to set up a system of compulsory arbitration to handle strikes in vital industries. The word compulsory doesn't quite fit in a free and democratic country. But once we overcome our objection to the word itself we can't help agreeing that there is a great deal of practical common sense behind the proposal.

The principal function of our government is to protect the interests of its people. If the welfare of the people requires the continuation of a service or a product the government is within its rights in demanding that the service or product be continued.

The situation becomes somewhat like compulsory military service in time of war. Both are emergencies and justify emergency measures. Something has to be done and if the job voluntarily they must be drafted for it.

While admitting this much we can proudly bear in mind, however, that this extreme measure is proposed only as a last resort when the men concerned fail to exercise reasonable and democratic methods. If workers and management can't settle their grievance an impartial group will hand down a decision which both must accept. Democracy prevails as long as people will be democratic. Authority steps in only after people get too pig headed and impractical to settle things according to the standards of free men.

Perhaps it isn't too far-fetched to predict that the mere presence of such a final authority will tend to reduce the need for it. People make more effort to get along when they know in advance that they must get along. The element of human pride also works in favor of this arrangement. Rather than lose face later, both quarreling factions are likely to be more reasonable in their negotiations. Instead of being too proud to give in they'll be too proud to be proved wrong. There's a world of difference between those two attitudes, and the latter looks more attractive by far.

The more we think about the subject the more we must agree that, in spite of the flavor imparted by the word "compulsory", a final tribunal to settle labor disputes is both democratic and reasonable. Like a court, its function is to see that justice prevails, and every person in the country, including management and organized labor, should be heartily in favor of its establishment. In fact, it's hard to imagine what kind of wholesale motives, if any, could be opposed to it.

In theory the idea seems fair and justified but its really attractive merit is in the good it could do for the country: a steady flow of goods and services for the consuming public, a steady business for management, and a steady job with just compensation for the worker.

An estimate on the effects of the recent coal strike will give a hint of what can be avoided. Many relief commitments to Europe could not be met. Steel production lagged and everything depending on it fell behind schedule. Thousands of workers all over America were temporarily laid off and coal miners themselves lost \$100 million in wages, about \$250 for each man.

It's the same old story. Figures after every strike have shown that laboring people, who were supposed to gain, were actually the biggest losers. After missing hundreds of dollars in pay they got an increase which theoretically should make up for lost time in a year or two. But before they could get even, the rising cycle of living costs caught up with them and wiped out the benefit of their gains. Meanwhile the value of all their negotiable savings depreciated... if they were not used to live through the emergency. It is a known fact that many a saving account intended for better living was spent on necessities through a strike.

Production is what it takes to make this country tick. The public needs goods and service, the company needs his pay. Any just and democratic arrangement by which that production can be maintained will be of utmost value to all of us. Obviously there can be no better arrangement (Continued on Page 12)

Local Pavement Job To be Under Contract July 1, Says Engineer

This community's farm to market road, to be designated as Highway No. 373, will be under contract by July 1, according to a statement Monday by County Judge Carroll F. Sullivan, who mentioned District Highway Engineer J. M. Isbell of Wichita Falls as the source of his information.

Judge Sullivan had requested the information in order to stifle rumors that the road had been abandoned.

Mr. Isbell also disclosed that the survey for the road is now complete.

Stockholders Okay Capital Expansion At Mower Factory

To meet the requirements of their expanding business, stockholders of the Muenster Manufacturing Company decided last Thursday night, May 6, to raise their capitalization from \$30,000 to \$60,000. Their principal purpose is to provide a larger cash reserve enabling them to take advantage of opportunities in larger volume purchases.

Heretofore, Manager L.H. Baumhardt pointed out, the company has been spreading its buying out in small quantities because it did not have the reserve to handle larger orders. Had all the castings, tires, steel and other materials used this year been secured on single orders, he said, the company could have saved a very substantial sum.

Impressed by a favorable report on the company's progress to date, the stockholders voted unanimously in favor of the expansion.

A brief review of the infant industry's activity includes the delivery of 1500 push type mowers and 275 power driven mowers to date. In addition it has orders for 100 tractor attachment mowers and 500 push type mowers awaiting delivery date. Power mowers move as soon as they come off the assembly line. The present inventory of available units is about 700 push mowers.

"In spite of the late start, material shortages, small volume buying and time lost in working out an efficient work system", Baumhardt reported "present indications are that the company will do a little better than break even this season. With those problems behind us we expect to do considerably better next year."

Since production started in August the plant has employed an average of 12 workers.

MUENSTER BOYS CINCH VALLEY VIEW GAME IN STRONG FIRST INNING

Recovering from the thorough rouncing given them by Hood a week before Muenster's softballers hit their stride Friday night and trimmed Valley View 11 to 4. They started with a barrage of heavy hits, including homers by Cecil Cain, Norbert Hoedebeck, Gilbert Yosten and Alvin Hartman, for a total of 9 runs in the first inning.

After that the game settled down to a better brand of ball, with a possible exception of the third inning when Muenster grouped its errors to allow two unearned runs.

A scheduled game at Nocona Monday night was called off because of rain.

4-YEAR OLD SON OF GEORGE HARTMAN DIES

Mr. and Mrs. Mike Fuhrmann received word last week that their grandson, Michael Hartman, four year old son of Mr. and Mrs. George Hartman of Elmhurst, Ill., died on May 5 while having his tonsils removed. Funeral services were held Friday.

Michael's mother is the former Miss Anna Fuhrmann of Lindsay. In addition to the parents and grandparents the little boy is survived by two sisters and two brothers. Other survivors include uncles, aunts and cousins in Lindsay and Muenster.

Mr. Dick Cain and Mrs. Darrell McCool spent Thursday in Fort Worth.

Fatima Image, on Nation-wide Pilgrimage Tour, Will Be in Muenster June 12 and 13

America's "Pilgrim Virgin", an image of Our Lady of Fatima, which is now touring the United States, will be in Muenster on Sunday, June 13, Father Herman Laux announced at church services here last Sunday.

In connection with the event he stated that this city is likely to become a one-day pilgrimage center for hundreds of Catholics from the many parishes of North Texas. Only five cities of the Diocese of Dallas are favored with visits on the tour of this famous statue. They are Texarkana, Tyler, Dallas, Fort Worth and Muenster in the order named. Letters inviting the members of other North Texas parishes to participate in the special services and devotions are now being mailed to their respective pastors, Father Herman said.

The famed statue is expected to arrive here about noon, Saturday, June 12, and will be kept in the rectory until carried into the church in solemn procession for the opening of the pilgrimage services that evening and will remain there all day Sunday. It is possible, though not yet definitely decided, that the statue will still be here through the Monday morning mass.

The nature of the special services and devotions will be revealed by Rt. Rev. Msgr. William C. McGrath, who accompanies the statue and speaks on "The Message of Fatima."

America's "Pilgrim Virgin" is one of two images of Our Lady of Fatima blessed for similar pilgrimages by the Bishop of Fatima in 1947 at the Portuguese Shrine in the Cova da Iria. Both are about 40 inches tall and are hand-carved from cedarwood by Thedim, the famous Portuguese sculptor, who designed the original image of Our Lady of Fatima, which is at the Shrine.

The first of the replicas was blessed on May 13, 1947, and is now touring Europe, having already visited Portugal, Spain, France, and Belgium.

America's "Pilgrim Virgin" was blessed before 200,000 pilgrims on October 13, 1947, the 30th anniversary of Our Lady's final apparition at Fatima, during which occurred the great Miracle of the Sun, witnessed by more than 70,000 people. Immediately afterwards, the statue was flown to the United States and taken by automobile to Ottawa, Canada. There it was blessed and crowned by Most Rev. Alexandre Vachon.

Notes On Soil Conservation

Recent rains will encourage a good stand of young grass seedlings. Remember too, the rains make Johnson grass grow better in waterways and will furnish lots of grazing if fenced. Where a permanent fence is not practical at the time, an electric fence will serve the purpose. Best stands of bermuda and buffalo grass seeded in 1947 were found where the waterways were fenced and grazed. Soil conservation service technicians caution at the same time that young seedlings of love grass, bluestem and other native grasses should not be grazed the first year. Mowing often and an occasional cultivation will control weeds in these seedlings. May is the month for your first mowing so begin as soon as possible, they advise.

In the Muenster work area recent observations show good stands of bermuda grass sod in waterways on the Tony Hesse, Tony Klement and Alfred Bayer farms. At the same time Tony Walterscheid and W.F. Davidson were constructing fences around their waterways. H.J. Fuhrman, group leader in an east Muenster group reports he has his buffalo sodded waterway fenced and is able to control the weeds by grazing.

Gary Hess and A.E. Thompson recently mowed their pastures and waterways.

Roy Endres and Meinrad Hesse report good results with recent sprayings of 2-4-D. Their new sprayer operated in fields and pastures on Rudolph Zipper, Arthur Hellman, Tony Hesse and Meinrad Hesse farms this past week.

Mr. and Mrs. Ben Seyler drove to Dallas Tuesday to meet her sister, Mrs. Tom Gallery, who flew from New York to Dallas and accompanied the Seylers back to Muenster for a week's visit with her parents, Mr. and Mrs. John Fette and other relatives. Mrs. Gallery is the former Miss Lillian Fette.

Mr. and Mrs. Alois Wimmer of Phoenix, Ariz., spent Monday and Tuesday night here with his cousin, C.J. Wimmer and family, and his sister-in-law, Mrs. John Wimmer and family. They were enroute to their home after a visit with her parents in Windthorst.

Miss Clara Richter of Dallas and Mrs. Amber Estes of Wichita Falls were weekend guests of their parents, Mr. and Mrs. W.T. Richter.

MAIN PAVEMENT WILL BE FULL WIDTH IF CURB IS FULL LENGTH

Muenster's Main street pavement, which will be included with the farm-to-market road project leading north out of town, will be a curb to curb job... if the curbs are there.

While in Muenster last week J.M. Isbell, district highway engineer of Wichita Falls, advised Mayor Weinzapfel that the highway department's policy allows the full width pavement only when the city has already done its share toward providing a first class street. If the curb line is not complete the city will have to settle for a narrow strip of pavement down the center of the street.

Referring to Mr. Isbell's statement Mayor Weinzapfel said that the city will make every effort to qualify for the full width pavement. Most property owners already have their curbs and the remaining few are urged to arrange for them as soon as possible.

Horse Show Group Completes Plan for Big Program Sunday

With all competitive events designated and an interesting program arranged, the Muenster Horse Show Association is looking forward to one of its best and most colorful shows to date. The show will be held at the Muenster ball park next Sunday afternoon, beginning at 2 o'clock.

In addition to a long list of entries to compete for money, ribbons and merchandise in about 16 classes there will be between-events entertainment and music by the Muenster Band.

Professors F.I. Dahlberg and J. C. Miller of A & M College will judge the events. R.L. McNeley will preside at the microphone and Herbert Meurer will give the welcome address.

Two new events this year are the Shetland pony class, single harness, and the Shetland pony class, mares and colts. Other classes arranged are Colts 6 months old and under; Colts 6 to 18 months; Paints; Palominos; Walking, Racking and Pleasure horses; Quarter Horses and a Western Pair contest.

Each event has its own sponsor who has provided prizes for the winners.

News Of Sick And Injured

Henry Fleitman entered M & S Hospital in Gainesville Tuesday for medical treatment.

Since Sunday A.T. Hoehn is a patient in a Dallas hospital for observation and treatment.

John Fleitman, 3-year-old son of Mr. and Mrs. Bruno Fleitman, has recovered from a tonsillotomy performed at M & S hospital in Gainesville Friday.

Leo Lawson was moved to his home Saturday from Gainesville Sanitarium where he had been a patient for a week undergoing treatment for a kidney infection, and is recovering normally.

Mrs. Joe Horn was permitted to return home Monday from Gainesville Sanitarium where she had been a patient for treatment for about ten days. She is still confined to bed.

Mrs. Charley Hellman is recovering from an infection resulting from a tooth extraction about two weeks ago.

Emma Jo Eaves and Patsy Moore both sustained sprained fingers last week in a soft ball game at school. It's Emma Jo's right thumb and Patsy's left ring finger.

Charlie Welch of Gainesville, formerly of this city, had his tonsils removed at the local clinic Saturday.

Mr. and Mrs. Herbert Meurer left Sunday to spend this week in Waco where he is attending the annual state convention of the Knights of Columbus. He is state treasurer. J.M. Weinzapfel attended the conclave Monday. He is a trustee on the state's student home fund committee. Tuesday and Wednesday Mr. and Mrs. J.W. Fisher, Rufus Henscheid and A.J. Felderhoff were at the convention.

Miss Clara Richter of Dallas and Mrs. Amber Estes of Wichita Falls were weekend guests of their parents, Mr. and Mrs. W.T. Richter.

Community Agrees 2.33 Inch Rain Was Perfect For Crops

"Just what we needed" is the general comment of the community this week concerning the 2.33 inch rain that fell here Monday and Tuesday.

Unlike the heavy rains which raised streams to flood levels in several areas of North Texas, the showers here were slow and well scattered and soaked in as they fell.

For grain crops, especially wheat, the rain was perfect. It came just as the plants were beginning to suffer and in the right quantity to carry it through to maturity. If assisted by other favorable weather until harvest it will compensate in great measure for the late freeze and dry spell.

Row crops, pastures and hay crops likewise got a wonderful lift. All brightened over night and added considerably to the community's general optimistic outlook. Corn and silage crops have a good start. Lush grazing indicates welcome dairy and beef increases. Alfalfa is on its way toward a heavy yield on the next cut.

Balmy, bright weather since Wednesday is helping the good work begun by the rain.

Mrs. I. O. Gentry, 87, Linn Pioneer, Passes Saturday at Wichita

Mrs. I.O. Gentry, 87, pioneer resident of the Linn community, passed away Saturday in a Wichita Falls hospital following a stroke.

Funeral services were held Sunday afternoon at the Hood Baptist church with Rev. E.G. Pennington of Gainesville officiating. Burial was in Fairview cemetery. Pallbearers were Joe Linn, Russell Linn, Henry Grewing, Bob Trew, D.R. Rosson and Burney Rosson.

Mrs. Gentry, the former Belle Zora Cox, was a member of a Cooke county pioneer family. She was born near Gainesville on Dec. 18, 1861, and married Mr. Gentry on Dec. 19, 1882. They made their home on a farm, south of Muenster, in the Linn community until 1933, when they retired from active work and moved to Wichita Falls. Mr. Gentry died in 1940, and since that time Mrs. Gentry divided her time between her daughters in Wichita Falls.

Survivors are four daughters, Mrs. W.H. Carner, Austin; Mrs. O.V. Louthian, Las Cruces, N.M.; Mrs. Jeff D. Kennedy and Mrs. Leslie A. Evans, Wichita Falls; one son, B.O. Gentry, Las Animas, Colo.; 16 grandchildren and 11 great-grandchildren; one brother, W.E. Cox, Norman, Okla., and one sister, Mrs. C.W. Briles of Stillwater. One son, J.L. Gentry passed away in 1942, and a grandson, Lt. Leslie A. Evans, Jr., was killed during world war II.

ELECTRIC CO-OP SETS UP SEPARATE SERVICE DISTRICT AT NOCONA

Faster and more economical service to one of the more distant areas of its system was assured this week when the Cooke County Electric Cooperative set up a separate service headquarters in Nocona.

Charles E. Wimmer, one of the regular line crew, moved there Thursday and will keep a small stock of meters, transformers and other equipment and supplies at his residence. He will take care of the connects, disconnects and service calls for that area.

Letters now being prepared for the members concerned will advise them of his address and suggest that service requests be made directly to him.

The biggest improvement yet in the service department is a system of two way communication by which service trucks and the main office can maintain constant communication. Equipment for it is expected in about two months.

Mr. and Mrs. Carl Luke and daughter, Miss Marcella, of Hereford were here to attend the wedding of their niece, Miss Anna Marie Klement, and Alfred Bayer Tuesday, and to visit other relatives and friends.

LOCAL NEWS BRIEFS

Mrs. Dick Cain and children visited her sister, Mrs. T.C. Rhone and family in Bowie Sunday.

Mr. and Mrs. Dick Cain had as weekend guests Mr. and Mrs. John C. Hogan and family of Amarillo.

Sidney Huchtons of Cedarvale, Okla., spent Saturday with his mother, Mrs. O.J. Huchtons and family.

Frank X. Hacker has returned from a two weeks' visit in Riverside, California, with his cousin, Joe Stoider.

S.Sgt. and Mrs. Bill Eberhart and son of Camp Hood are here for a two weeks' visit with his parents, Mr. and Mrs. Ed Eberhart and family, while he is on furlough.

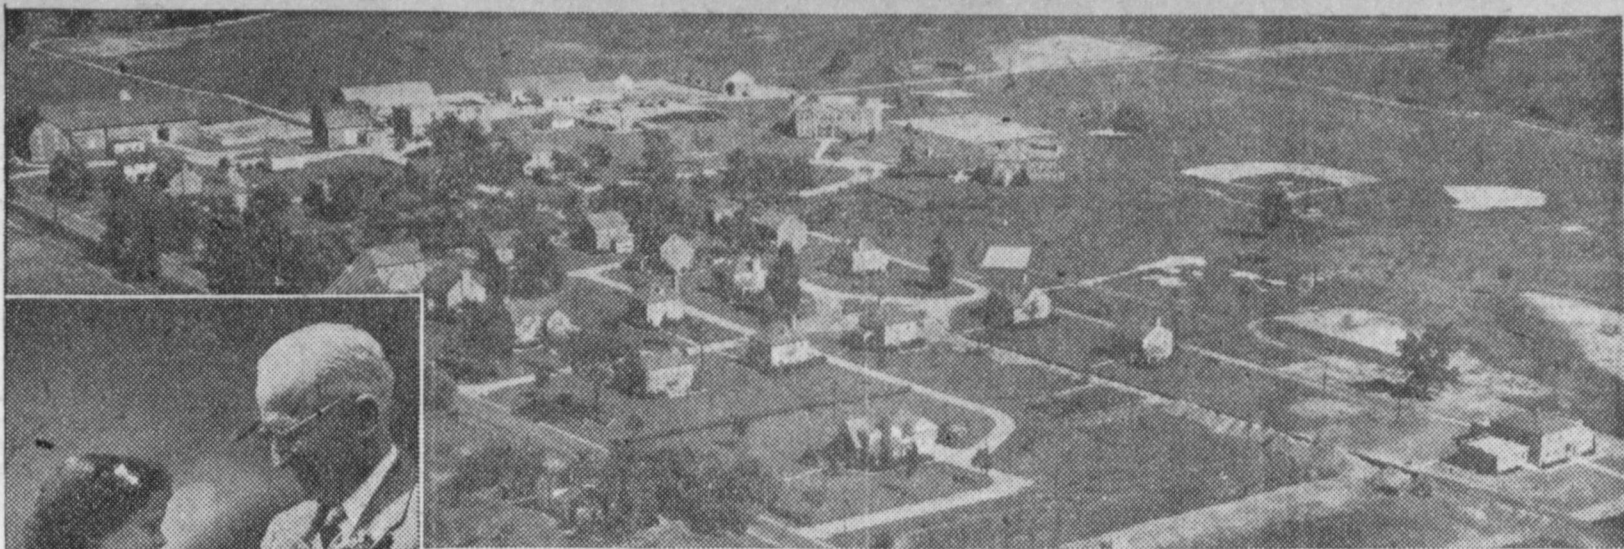

J.C. Trachta, Elmer Fette and Paul Tempel represented the Muenster Fire Department at a fire fighting equipment display and meeting in Burkburnett Wednesday night.

Catholic Daughters of America are reminded of a regular monthly business session, featuring the election of officers, this Friday night in the K of C hall after May devotions. A full attendance is urged.

Mr. and Mrs. Charlie Morris announce the birth of a son at Gainesville Sanitarium Wednesday morning, May 12. Mrs. Morris is the former Miss Bernice Kathman.

Miss Rita Dingman of Alton, Ill., her sister, Miss Jean Dingman and a classmate from Kansas City, are arriving Saturday for a week's visit with Mr. and Mrs. G.H. Hellman and other relatives. They will be honored Sunday evening with a get-together of relatives and friends at the G.H. Hellman home.

M.Sgt. and Mrs. Walter Huchtons visited here with his mother, Mrs. O.J. Huchtons and other

relatives while he was on a furlough and left Tuesday for Perrin Field, where he has been transferred after being on duty in Louisiana and more recently for a short time in San Angelo.

Mr. and Mrs. Joe Tobin left Monday to return to their home in Grand Rapids, Mich., after a two weeks' visit here with Joe Fisher and other relatives and friends. Sunday they were honored with a farewell dinner and reunion of the Fisher families in the Joe Fisher home.

ST. MARY'S ANNUAL CARNIVAL NEXT MONDAY AND TUESDAY

The annual carnival sponsored by St. Mary's Church of Gainesville will be held next Monday and Tuesday, beginning at 6 each evening. Announcing it this week Father Peter Molloy extended an invitation to all members of the Muenster and Lindsay parishes.

Fatima . . .

D.D., Archbishop of Ottawa, preparatory to starting its long journey through Canada and the United States.

After traveling 49 days through Canada, the "Pilgrim Virgin" entered the United States at Niagara Falls, New York on December 8th. There it was welcomed by Most Rev. John F. O'Hara, Bishop of Buffalo, who is the director of the American pilgrimage. Since then it has visited many cities in the East, Midwest, and South. It is estimated that more than one million people have seen and venerated the famed image since the pilgrimage began last October.

Accompanying the statue, which travels by automobile, is the Rt. Rev. Msgr. William C. McGrath, P.A. of the Scarborough Foreign Mission Society, who has been with the pilgrimage from its beginning.

The purpose of the pilgrimages is to invite millions of people to join in a "crusade of prayer and

Miss Walker visited South Africa at the invitation of the South African Wool Board to assist "Miss France" and "Miss Great Britain" in choosing the 1948 Beauty Queen for South Africa. Lamb, named "Mumbles" was presented to Miss Walker as a goodwill sendoff gesture in the name of the world's wool growers.

reparation for the conversion of Russia, and for peace as promised by Our Lady at Fatima in 1917. Six times, from May to October, the Blessed Virgin Mary appeared to three little shepherd children at Fatima, Portugal. She told them that "Men must cease to offend my Divine Son, already so deeply offended." They must make reparation and sacrifice to atone for sins; must say the Rosary; should consecrate themselves to Her Immaculate Heart; and should practice the devotion of the Five First Saturdays.

On July 13, 1917, Our Lady gave the three children this message: If my requests are heard, Russia will be converted, and there will be peace. "If my requests are not heard, then precisely in the next pontificate, a new and more terrible war will begin; whole nations will be destroyed; the faithful will become martyrs; the Holy Father will suffer much; and atheist Russia will spread its errors throughout the world, promoting wars and persecutions of the church." All of these dire predictions either have come, or are now coming true.

Then the vision concluded: "But in the end, my Immaculate Heart will triumph, the Holy Father will consecrate Russia to me; that country will be converted, and some time of peace will be conceded to the world."

It was to speed this promised conversion of Russia, and the era of peace, that the pilgrimages were started.

To Save Gasoline ---

Although production of gasoline is at record levels in U.S., petroleum officials warn that increased traffic may mean occasional gasoline shortages this summer in some regions.

The major pinch is expected in midwestern states — in southern areas early this summer and in northern sections later.

Automotive engineers recommend eight practices for motorists, to conserve gasoline:

1. Warm up the engine by letting it to idle a few minutes to permit oil to circulate properly. Don't race the engine.
2. Accelerate slowly, and avoid all unnecessary acceleration.
3. Don't drive in low or second gear any more than necessary.
4. Maintain uniform speed in city driving, as much as possible. Avoid unnecessary stops and engine idling.
5. In rural driving excessive speed wastes gasoline.
6. Keep tires up to recommended pressure.
7. Use engine oil of recommended viscosity, and have car

TUESDAY RITE UNITES ALFRED BAYER AND ANNA MARIE KLEMENT

Marriage vows were exchanged by Miss Anna Marie Klement, daughter of Mr. and Mrs. Frank Klement, and Alfred Bayer, son of Mrs. Joe Bayer, during a pretty ceremony performed Tuesday morning at 8:30 in Sacred Heart church. Rev. John Walbe officiated at the double ring service and at the nuptial high mass.

Anthony Luke, organist, played the wedding processional and recessional and assisted the church choir in rendering music for the mass.

The bride was lovely in a gown of ivory satin fashioned with fitted, basque bodice topped with a marquisette yoke embroidered with appliqued hearts and seed pearls. The leg-o-mutton sleeves extended into petal points over her hands and the full skirt flowed into a cathedral length train. Her finger tip length veil of illusion fell from a coronet of seed pearls and she carried a white prayer book topped with an orchid. Her only jewelry was a double strand of pearls a gift from the groom, and for a bit of sentiment she carried an ivory lace handkerchief that formerly belonged to her maternal grandmother.

Attending the bride as maid of honor was Miss Katie Mae Walterscheid, aunt of the groom, and Miss Ethel Mae Bayer, his sister, as bridesmaid. They wore identical frocks of blue designed with tight bodices of ribbed taffeta and wide skirts of georgette. They wore flower headdresses

CHICAGO, ILL.—Flanked by 45 of his paraplegic buddies, Melvin Lubarsey, 25-year-old paralyzed vet from Milwaukee, escorts his bride, former nurse Mazurewski through a shower of rice as they leave the Vaughn General Hospital chapel shortly after their marriage.

and long white gloves and carried bouquets of Michaelmas daisies.

The groom was attended by his brother, Robert Bayer, as best man and Alvin Hartman, cousin of both the bride and the groom.

The bride's mother wore a navy print dress and the groom's mother wore a teal blue ensemble. Both wore corsages of daisies.

After the service, breakfast was served to the bridal party, their parents and the officiating minister in the home of the groom's grandparents, Mr. and Mrs. Joe Walterscheid.

At 3 o'clock a reception in the parish hall honored the couple and a buffet supper was served to 75 guests. Mrs. Eugene Klement presided at the guest book and the bride and groom cut the three-tier wedding cake. The bride's table carried out the all-white wedding theme and was adorned with flowers and tapers flanking the cake.

A dance in the K of C hall at night concluded the day's festivities and Mr. and Mrs. Bayer left by car on a wedding trip, not revealing their destination. For traveling Mrs. Bayer wore a light weight woolen gray suit with a red pin stripe and black accessories. When they return they will make their home on a farm northwest of the city.

Both young people are natives of Muenster and attended Sacred Heart school. He served in the army during the past war, being stationed in the Pacific theatre.

ALTAR BOYS GUESTS AT BREAKFAST THURSDAY

Members of Saint John Berchman's Society, composed of the 43 mass servers of Sacred Heart parish, were honored with a communion breakfast Thursday in the P-TA lunch room. The courtesy was extended by Pastor Father Herman in appreciation of the boys' services during the year. He led the invocation and gave a short address.

The breakfast followed group attendance at the 8:30 mass and reception of the Eucharist. Mothers of the boys prepared and served the meal.

First Couple Married in Muenster Church Observes 50th Wedding Anniversary

Mr. and Mrs. Joe Pulte of Gainesville celebrated their 50th wedding anniversary with an anniversary Mass, Wednesday, May 5, and an open house Sunday afternoon.

They were married in Sacred Heart church here on May 5, 1898, with two other couples. This was the first wedding service performed in Sacred Heart church. Of the couples married at that time, Mr. and Mrs. Pulte are the only couple still living.

Their anniversary Mass was read by Father Peter Molloy in Saint Mary's church and the couple renewed their wedding vows before an altar decorated with yellow carnations and yellow snapdragons and fern. The reception Sunday was held at the family home and more than 200 persons attended to congratulate the couple.

Mrs. Pulte, the former Miss Emma Hundt, is a native of Iowa and is 71 years old. Mr. Pulte was born in Michigan and is 74 years old. He has been a resident of Cooke county for 70 years, coming here with his parents, Mr. and Mrs. August Pulte.

Mr. Pulte has been a farmer and grocer and recently returned to farming again. He is actively engaged in working his new farm south of Gainesville. Mrs. Pulte spends her time in keeping house and tending her well kept flowers and lawn.

Mr. and Mrs. Pulte are the parents of seven children, three of whom are living: Fred and William Pulte of Gainesville and Mrs. Theresa Schmitz of Gainesville. They have one grandchild, Jerry Schmitz, aged 11.

Meetings For Next of Kin Explain Army Program for Return of Honored Dead

The Department of the Army is very desirous of having next of kin of the honored deceased of World War II properly and adequately informed of all particulars of the Program for the Return and Reburial of World War II dead. Accordingly, the Fort Worth Quartermaster Depot, Fort Worth, Texas, which is charged with publicizing this program has arranged for meetings at which the persons concerned can receive authoritative information about this program.

Next of kin and their family are urged to attend one of these meetings for in addition to hearing of the program they will be able to get answers to any questions, general or personal, that they may have. Personal questions will be discussed and answered in privacy.

The nearest meetings for this vicinity are at the Gainesville court house, Thursday, May 20, 9:30 a.m., and the Montague court house, Thursday, May 20, at 2:30 p.m.

TWO MUESTER GIRLS FINISH NURSING COURSE

Miss Thelma Kathman and Miss Dolores Lehnertz were among the 43 young women graduating from Saint Joseph's Nursing School in Fort Worth Tuesday. They are the daughters of Messrs. and Mmes. Frank Kathman and Joe Lehnertz.

Ceremonies at 8 p.m. were held in Saint Mary's church. The principal address was given by Rev. T.J. Brophy, pastor of Our Lady of Mercy church, and diplomas were conferred by Dr. J. F. McVeigh, dean of the nursing school.

Attending the graduation exercises were Mr. and Mrs. Joe Lehnertz, David, Donald and Claude Lehnertz, Mr. and Mrs. Joe Fette, Mrs. Frank Kathman, Mrs. Paul Fisher, Mr. and Mrs. Charles Fisher and Mr. and Mrs. Earl Lehnertz.

UP IN IOWA

They say farming doesn't pay. Some kind of farming doesn't. But last year in Iowa 8,000 farmers made nearly three times as much money as did the Governor of Iowa. Income for each of these 8,000 was in excess of \$20,000, and several made more than \$50,000.

Abnormally high prices were partly but not wholly responsible. Year after year, Iowa is either on top or no lower than third place in farm income by states. Its 1947 farm income was nearly 2 1/2 billion dollars.

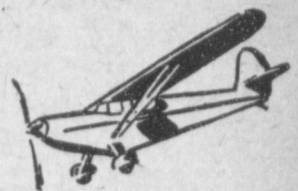

Iowa was settled by hardworking, rugged stock who thought farming was a privilege and fertile soil a heritage. They settled for keeps. In time a progressive agriculture college was established to train farmers and develop research and a high percentage of farm boys goes to this college, then return to the land for keeps.

They say an Iowa farm is planned meticulously from back door to back fence, the soil studied for what it will produce best, seed planted that will yield best. — Dallas News.

BUTTER SPEAKS

Recently there's been much in the public prints about oleomargarine. From what I'd read it looked as though the entire argument is in favor of the folks who make and sell oleo, and that the butter interests are selfishly trying to block the sale of oleo by opposing repeal of certain federal taxes on it.

Knowing that always there are two sides to every argument, and having heard only the oleo side, I conferred with an individual who represents the butter interests. "Why," I asked, "are you fighting the bill now in Congress that would remove some of the taxes on oleo?"

"I oppose the removal of the present taxes on oleomargarine in the consumers' interest," he replied. "Let me give you the facts as I know them:

"Since 1902 a federal tax of 1/4 cent per pound has been levied on oleomargarine, which amounts to only two cents per year per oleo consumer, based on average consumption of oleo in the United States today. This money goes to the U.S. Commissioner of Internal Revenue to pay for policing oleo production and sales. Processed butter pays the same tax.

"A tax of ten cents a pound is levied on oleomargarine which has been colored yellow prior to the sale. This tax has only one

purpose: To prevent oleo from being colored yellow by producers and sold as butter. People who buy white oleo do not pay this tax.

"Taxes have not prevented increases in the consumption of oleo. Since 1941 oleomargarine sales in this country have more than doubled.

"Federal Pure Food and Drug Laws keep oleomargarine up to standards of cleanliness and purity. There is no nation-wide protection to the consumer, however, against fraudulent substitution of oleomargarine for butter except the protection afforded by the existing oleomargarine laws. Careful and thorough regulation of oleomargarine is vital to the consumer. There are few food products in which there exists so great a profit incentive for fraud and deception of the consumer.

"There is a strong incentive to imitate butter in order to capture the huge butter market. Margarine is easy to make and its ingredients are inexpensive; when colored yellow, it is easy to pass oleomargarine off as butter. The difference in price between real butter and oleomargarine provides a strong profit motive for anybody wishing to deceive the public. Nearly 30,000 cases of illegal substitution of oleomargarine for butter were reported by the U.S. Bureau of Internal Revenue during a 15-year period.

"Much of the controversy over the oleomargarine taxes revolves around the use of yellow color. Few people know that the only mandatory federal tax on oleomargarine is the nominal 1/4 cent per pound tax, which also is levied on processed butter. No additional tax is paid when margarine is colored any other color but yellow. It may be colored green, pink, brown or any other tint except yellow, without additional taxation.

"Although yellow is the natural color of butter, it is not the natural color of oleomargarine. A laboratory investigation recently conducted by the Armour Research Foundation of the Illinois Institute of Technology showed that while oleo may be 'gray-green' or 'nearly white' in its natural state, it is never yellow like natural butter. Bleaching of oleomargarine is resorted to in order to produce a white color and also to remove certain

Same Destination

flavors and odors caused by the manufacturing process.

"Taxation to stifle competition is contrary to the American way of doing business, but taxation to control quality and prevent fraud has many precedents. Responsible manufacturers of oleomargarine, I feel sure, would not defraud the consumer, but so long as there are possibilities of fraud by dealers, a fraud prevention tax is in the consumers' interest."

"So, there's the butter side of the controversy. Line it up with the arguments you have heard advanced by the oleo interests and you will be able to decide whether the tax should be removed from margarine — colored yellow.

One Sunday Afternoon

(This is one of a series of articles in "The Fifth Commandment," a safety pamphlet recently published by the Travelers Insurance Companies.)

Two squad cars and an ambulance arrived at the scene simultaneously. The policemen and both internes could guess at one horrified glance what had happened.

The car had approached the narrow bridge at what might normally have been a reasonable pace. Through the rain, its driver had seen a car entering the bridge from the other end and, by instinct, he had jammed on the brakes. Everything up to this point had been normal — except the treacherous October weather. The slick surface of the pavement made the awful difference that Sunday afternoon. The big sedan skidded through a guard rail, off the bridge and into a marsh 35 feet below.

Yes, the accident was easy to reconstruct. The circumstances which assembled to send the limousine to destruction were obvious. But the intensity of this tragedy was obscured in the dreadful wreckage. When identification was finally established, the city learned that six of its most prominent citizens had been killed in an auto accident two miles south of the Country Club.

The Low Down From Hickory Grove

Today I will touch on forecasts and broadcasts. It is not too easy to screen out the chaff and baloney and spurious, from the truth.

A short time back all we heard was how to stop soaring prices but now amongst the Dude Economists there in all Bazoontown-by-the-river, they are soft peddling inflation and high prices and are worrying us with a fear that a collapse in prices, etc. is round the corner. And in the same kind of fumididdle talk these same Dudes expound on soil erosion, flood control, spiraling this and spiraling that. But today's paper says Tennessee is again having floods but nobody says why a 400 million buck TVA didn't stop same, so it looks like another 400 million shekels save-the-day project has gone down the crick.

What can we do about it, says Henry, it looks to me, he says, like we been a sucker long enough. There are two things, I says — first you can refrain from tunin'-in on the windy gents, but better still and in the second place, just go on down to the bookstore and pick up an Aesop. In the old days a fellow with a shell-game wore a checkered vest but today you gotta look out, the guy may be wearing striped trousers.

Yours with the low down,
 Jo Serra

"All the great 'Liberals' I ever met were liberal, all right... Liberal with other people's money!"

Quaker Psychology

A gentle Quaker, hearing a strange noise in his house one night, got up and discovered a burglar busily at work. So he went and got his gun, then came back, and stood quietly in the door way.

"Friend," he said, "I would do thee no harm for the world, but thee standest where I am about to shoot."

A tourist was introduced at Albuquerque to an Indian with a reputedly perfect memory. Skeptical, the tourist asked: "What did you have for breakfast on October 4, 1913?" The Indian answered, "Eggs." The man scoffed, "Everyone eats eggs for breakfast. He's a fraud."

Eight years later the traveler's train stopped again at Albuquerque, and he saw the same Indian lounging on the platform. The tourist went up to him and said jovially, "How!"

The Indian answered, "Scrambled."

From where I sit... by Joe Marsh

Jeb Had the Folks in Stitches!

At the Friday Night Social, Jeb Crowell had the audience in stitches — doing a take-off on the blustering character who belittles everybody and everything that isn't from his own home town.

Well, we can laugh at that sort of character because from where I sit, Americans are just the opposite. We like to boast a bit perhaps, about the paint job on the new barn, or the missus' style of cooking — but we aren't intolerant of people who don't think or act exactly the same way we do.

In our town, for instance: Some folks like band concerts, others don't — some families serve beef with dinner, others, buttermilk — and as for politics, there's plenty of healthy disagreement.

But when it comes to denying folks the right to think or act as they choose... no, we're like you — we don't believe in it, whether it goes for serving beer, or speaking one's mind on public affairs.

PRESERVING THE LAND IS LIKE FLYING OLD GLORY FULL MAST

Farming the conservation way is not unlike flying Old Glory full mast. For the man who genuinely loves the soil, there is a sense of pride and security in the land defended well against the ravages of erosion and constant harvest. As the flag is our emblem of defense against harm from beyond our borders, conservation farming is the pattern for protection against forces, also destructive, within our own land.

We have seen the land resources of our continent squandered. Working together—all of us—we can prevent further needless destruction of the soil. We can rebuild the wasted land. But we will have to work at it. We will have to join hands and oppose careless farming even more effectively than we have heretofore.

As your John Deere Dealer in this community, we shall be more than glad to assist you in adapting your farm to the soil-saving practices of the conservation program.

CARELESS ATTITUDE CAUSES SPREAD OF CHILDHOOD DISEASES

Austin, Texas — With the incidence of chickenpox one hundred per cent higher than records indicate for a seven year median, Dr. Geo. W. Cox, State Health Officer, issued a statement declaring, "It is a great mistake to treat even light

cases of childhood diseases such as chickenpox, measles, mumps, scarlet fever or whooping cough as though they did not amount to much. That sort of treatment makes it possible for these diseases to spread and cause serious outbreaks among children and their resulting impaired resistance makes them easy victims to other forms of infection. "Some of the most serious outbreaks of chickenpox have been traced to mild cases — that is, cases so light that the doctor was not called. In some instances the children have continued to go to school and to associate and play with other children. In others, after they have been kept at home a few days, they have returned to school and have scattered these germs among their schoolmates. Strict isolation of chickenpox patients is the only means by which the spread can be controlled and parents should co-operate fully in isolating a child as long as the doctor thinks it advisable."

The State Health Officer said that the doctor is the best judge of the seriousness of such childhood diseases; and suffering and anxiety will be avoided if the doctor's advice is sought and followed throughout the course of the illness.

OUR SERVICEMEN ARE POST-GRADUATE MECHANICS

When you have a crew of experienced mechanics adding to their skill by post-graduate training, you've really got something!

Every mechanic on our staff is signed up for factory-approved training in the best and latest service methods. This is top, up-to-the-minute education in scientific diagnosis—without time-wasting guesswork or experiments.

When you bring your car here for a check-up or repairs, you're calling on experts who know the "why" and "how" of its every part. Our post-graduate servicemen work to factory-approved standards... and use factory-engineered parts. We can service your Chrysler or Plymouth best because we know it best.

DOCTOR SAYS JULEPS GOOD FOR THE HEART

Atlanta — And now comes Dr. George R. Herrman with a good word for mint juleps.

They "dilate the arteries of the heart," the doctor explained. For that reason, he went on to say, it might be a good idea for people to start sipping them more — and taking things easier — to help ward off an alarming increase in heart disease.

Dr. Herrman is medical professor at Texas University. He told a meeting of Georgia physicians last night that as the hectic mental strain of the modern age has increased, so has coronary artery, heart disease — "the most common and serious type."

"We have become too hurried," he warned, "and our hearts are overtaxed."

He said that among other things that it would be a good idea to return to "good old southern traditions" — a more leisurely tempo of life, including not too infrequent sips from the julep glass.

Anyhow, He Can Still Eat

New York — John J. Caron, 36, a shad fisherman, lost his false teeth over the rail of a Hudson River ferryboat today, when he coughed. He dived in the water after them.

When he was hauled out a few minutes later by the ship's crew, he had the teeth, but had lost his glasses and overcoat.

"I've insured my life for \$10,000 so that if anything happens to me, you and the children will be provided for."

"How thoughtful of you, darling. Now you won't have to see the doctor every time you feel sick, will you?"

A NURSERY BUILDING, with a full-time trained nurse on duty, is a feature of the Veterans of Foreign Wars National Home for orphans of war veterans, at Eaton Rapids, Mich. Here tiny tots, such as in the group above, receive expert care until they are old enough to join one of the "family groups" housed in the many residential cottages at the home.

BRITISH DOCS DEFY GOVERNMENT PLAN ON SOCIALIZED MEDICINE

The attempt of Britain's Socialist government to nationalize British medicine is meeting with defiant opposition from doctors.

The government intends to put universal free medical service into effect on July 5. However, 86% of the general practitioners, specialists, and consultants voted against accepting service under the act. The vote was 40,814 to 4,735.

Next the Representative Body of the British Medical Association voted to establish an "independent fund" to support low-income physicians who cannot collect bills because of nationalization. Doctors able to afford free service will answer calls without charge rather than accept governmental fees. They defied the government to force them to man the state insured service.

"We're engaged in a life-and-death struggle for our freedom and independence," said one doctor. King George's physician, Lord Horder, charged Health

PUBLIC SCHOOL P-TA HAS MEETING AND SOCIAL

Members of the Public School Parent-Teachers Association held their final meeting of the current term last Thursday night in the school.

Mrs. Lynton Mitchell, president, presided during the business session during which routine business was discussed and it was announced that the annual election of officers will take place at the first meeting of the new term next September.

Following business, Miss Mary Jo Williams, senior, entertained members with a reading, and Margaret Milner, second grade student, presented a piano solo. Games of 42 and the serving of refreshments concluded the evening.

The Liberty Bell cracked July 8, 1835 when tolling the death of Chief Justice Marshall.

The Navy's role in the assaults of American forces on the shores and beaches of enemy territory has been indispensable throughout its history, although the invasion methods have changed radically with each conflict. Above photo of an old print depicts the landing of American forces under General Scott at Vera Cruz in 1847—amphibious operation, Mexican War style. Below is a scene from World War II, taken nearly a century later, as Marines stormed the black beach of Iwo Jima beneath scowling Mt. Suribachi in the landing craft of a scientific age. (Official Navy Photograph)

GET-TOGETHER CLUB MEETS WITH MRS. HENRY FETTE

Members of the Get-Together Club enjoyed their monthly social on Wednesday, May 5, with Mrs. Henry Fette as hostess in her home.

Progressive 42 series furnished diversion during the afternoon and prizes were won by Mrs. Jud Boyles for high score and Mrs. Joe Kathman for low tally. Mrs. Frank Kaiser won the galloping prize and Mrs. Emmet Fette received the guest prize.

A delicious plate supper was served by the hostess to 13 members and three guests, Mesdames M. J. Endres, Joe Voth and Emmet Fette.

It was announced that the next meeting will be held with Mrs. Clarence Hellman as hostess in her home.

MISS RYLE RECEIVES NURSE'S CAP FRIDAY

Miss Helen Louise Ryle, daughter of Mr. and Mrs. Bob Ryle, will receive her nurse's cap this Friday night in ceremonies at

Wichita Falls, after nine months of successful training at Wichita General Hospital School of Nursing. Eight other young women will be capped.

Miss Ryle attended school here and graduated from Gainesville High school last year. Her parents and brother, Robert, will attend the ceremonies.

What a Wife

A Hollywood producer got in early one morning to find his wife awake, stamping her foot, and demanding to know where he had been. "Well," the producer explained, "we previewed my new picture and afterward I got to talking to the leading lady. A very lovely person. We went to Romanoff's, had a few drinks, and she said that she wanted me to see her apartment. Well, you know how it is—one thing led to another and here I am."

"Don't lie to me, you rat!" exploded his wife. "I know you've been out all night with the boys playing gin rummy!"

She Recovered Quick

A woman lay very ill. Having brought up a clever orphan girl, the sick woman called the orphan to her and said: "I shall soon leave my little children motherless. They know you and love you, and after I am gone I want you and my husband to marry."

The young woman, brusting into tears, said "We were just talking about that."

The wife recovered.

On a weather chart an asterisk indicates snow.

There are approximately two and one half billion people on the earth.

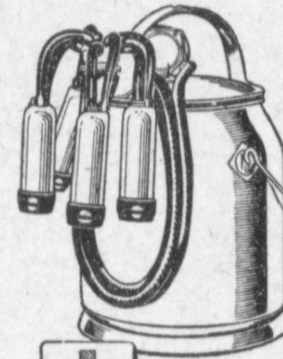

You can't help but keep a McCormick-Deering Milker pail spotlessly clean. Every part of the surface that milk touches is readily seen for quick cleaning.

Besides, the completely stainless steel construction makes rusting impossible. Just take a look at this modern machine and you'll agree that the easy-to-clean McCormick-Deering helps produce more profitable milk.

And the 9-inch pail opening... how can that mean better milk for you? Because it simplifies your cleaning job, thus keeping bacteria at a minimum, and speeds up drying.

There's a good way to prove these facts. Stop in and look over this great milker or, better yet, arrange for a demonstration. Find out for yourself just how the McCormick-Deering Milker turns out cleaner, healthier milk.

SIZING CHART for automatic storage gas water heaters

Number Bathrooms	Number Bedrooms	Storage Capacity Gallons
1	1 or 2	30
1	3 or 4	40
2	2 or 3	40
2	4 or 5	50
3	3	50
3 or 4	4 or 5	75

Be on the safe side and compare the size of the water heater with the size recommended in the Sizing Chart for automatic gas water heaters.

Automatic home laundry machines require 20 to 30 gallons hot water for 30 minutes' to one hour's operation—as compared to 12 gallons used in usual washing machine.

Automatic dishwashers use 10 gallons hot water per load—as compared to three gallons used in the average sink.

For maximum convenience in your new home, you need twice as much hot water.

As a service to home buyers, a committee of leading home economists prepared the chart presented here as a guide for selecting an automatic gas water heater for up-to-date homes.

Check water heater by the Sizing Chart

An automatic gas water heater in the size recommended for your new home is available with a rustproof tank. With Lone Star Natural Gas Service, it will give you plenty of clear hot water...making house-keeping easier...for the lowest possible cost.

See the new automatic gas water heaters now on display.

LOCAL NEWS BRIEFS

Mrs. Charles Harris of Dallas was here to spend Mother's Day with her parents, Mr. and Mrs. I.A. Schoech and other relatives.

Mrs. Paul Nieball and son, Billy, spent the weekend in Dallas visiting Mr. and Mrs. Louis Nieball and daughter.

Paul Nieball and son, Paul R. Nieball, joined the Gainesville Community Circus on its trip to Lubbock where it showed during the weekend.

Mr. and Mrs. Leonard Endres and children of Fort Worth spent the weekend with his mother and grandmother, Mmes. M.J. Endres and J.P. Fisch.

Miss Marian Gremminger is back in Muenster after spending the weekend in Austin where she took her state board tests following a recent beauty culture course in Dallas.

Messrs. and Mmes. Stan Yosten and Paul Yosten and daughter,

"The Customer Takes The Beating"

all of Fort Worth, spent the weekend with their parents, Mr. and Mrs. T. Miller and Mrs. Bob Yosten.

Mr. and Mrs. Ferd Yosten and daughter, Judy, of Fort Worth were here for a weekend visit with their parents, Messrs. and Mmes. I.A. Schoech and F.J. Yosten.

Johnny Furbach and Hugh Endres spent the weekend in Amarillo with Johnny's parents, Mr. and Mrs. John Furbach and Mrs. Furbach accompanied them back to Muenster for a week's visit.

Mr. and Mrs. Dick Graf and children of Gainesville were Sunday dinner guests at the home of her aunt and grandmother, Mmes. M.J. Endres and J.P. Fisch.

Mr. and Mrs. Lloyd Rhodes of Oklahoma City are parents of a daughter, Diana Kay, born at the local clinic Monday. The baby is the great-granddaughter of Mrs. A.C. Kidd who resides north of Muenster.

Miss Bernice Luttmer began work as a clerk at Jacob Pagel's store Monday. She will replace Miss Anastasia Temple who plans to leave soon for a visit with her brother, Norbert Tempel and wife, in California.

R.L. McNeley spent Sunday night and Monday here and has returned to Lakeside, Arizona. He will have a meeting in Phoenix the latter part of this week and will be back here for the Horse Show next Sunday.

Mother's Day guests for dinner at the home of Mr. and Mrs. Walter Richter were her parents, Mr. and Mrs. Frank Needham, and Mrs. Ruth Needham of Myra, E.E. Address and Mrs. Ida Gardner.

Mr. and Mrs. L.H. Baumhardt had as weekend guests her parents, Mr. and Mrs. H.C. James and their little niece, Virginia Gay Graves, all of Wichita Falls. A dinner at noon Sunday honored Janice Lee Baumhardt who made her Solemn Communion.

Mrs. John Furbach has as her guests this week, Mr. and Mrs. Anton Neumann of Sonoma, Calif. Mrs. Neumann is the former Miss Emma Mundkowski, cousin of Mrs. Furbach, and this is their first visit together in 22 years.

Mr. and Mrs. Frank J. Hacker were hosts in their home Sunday for a Mother's Day dinner honoring her mother, Mrs. W.M. Trubenbach. Present were Mr. and Mrs. Trubenbach, Misses Eleanor and Marie Trubenbach and Mr. and Mrs. Andy Trubenbach and family.

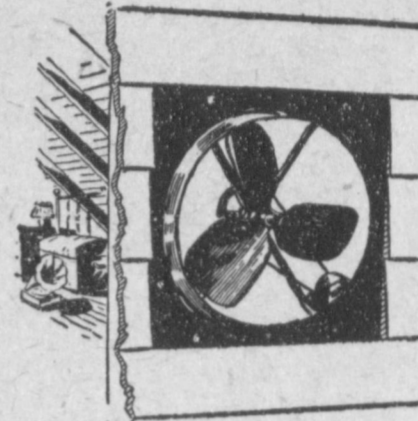

Mr. and Mrs. Jack Hoehn and daughter, and his father, A.T. Hoehn, spent the weekend in Dallas with Mr. and Mrs. Albert Hoehn. The Jack Hoehns are making their home in Muenster now since he has accepted employment with the Texas Company.

Mother Day guests at the home of Mr. and Mrs. Joe Tischler were their children, Mr. and Mrs. Justin Jezek and Mr. and Mrs. J.C. Tischler and two sons of Ceina, Mr. and Mrs. Al Yosten and children, Judy and Bobby; Mrs. Joe Schindler and son, Charles of Pilot Point.

WOMAN IN GERMANY CLAIMS HITLER IS HER NEXT DOOR NEIGHBOR

Wiesbaden, Germany — There is a woman here who says she lived next door to Adolph Hitler last year on President Roosevelt Street in Liegnitz.

The woman, Frau Dora Mai told her story to American military government officials here. They are skeptical; say it is Russia's problem because Liegnitz is in Polish-occupied Silesia.

Frau Mai's story: "He has a triangular mustache now and he grows sideburns, too. But it is he, all right. I lived next door to him for a year in Liegnitz. We both lived on President Roosevelt Strasse.

"It is my moral duty to tell you this. Hitler is too smart for the Russians. They don't know that he is living there on their doorstep. He is living with a small, dark woman. She isn't Eva Braun. Sometimes he poses as a schoolmaster, sometimes as a Polish army lieutenant.

"He has formed a new party — the TPZ. I don't know what it stands for. I never asked him if he was Hitler. I just knew it."

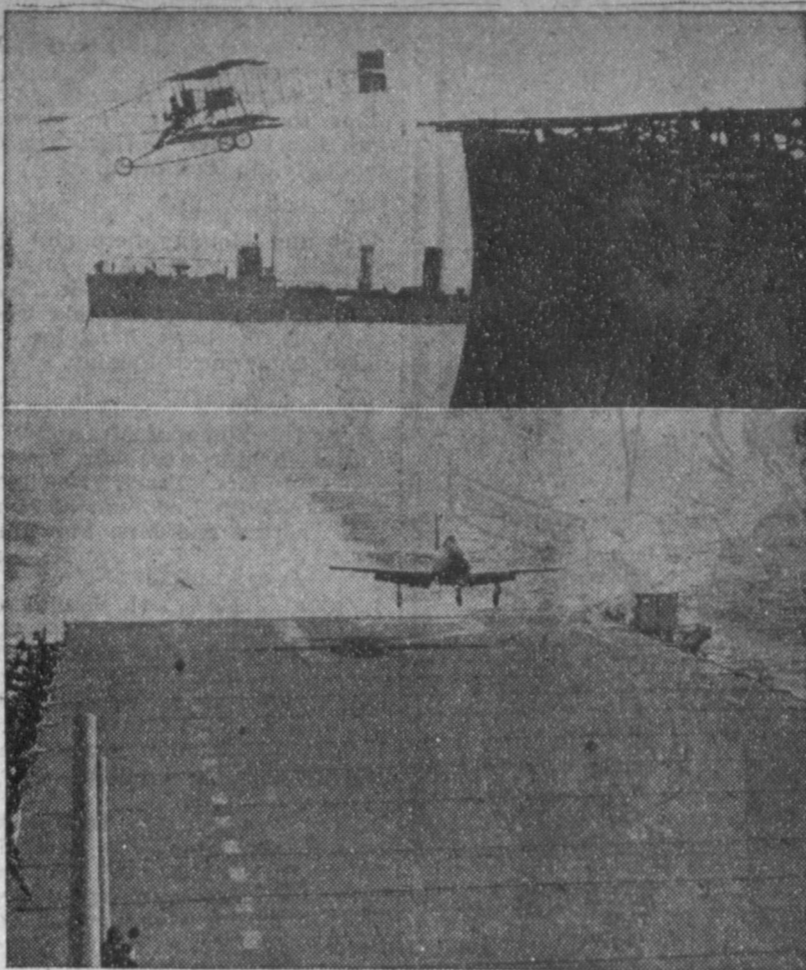

Frau Mai is one of thousands of refugees flowing in here from the east. She is the first to claim that Hitler is alive in Germany. Other persons claim to have seen him in foreign countries since he disappeared in the flames of Berlin just three years ago.

American officers heard Frau Mai through to the end, patiently. Then they said:

"Well, it's a Russian worry. Let them catch him."

Method In His Breakdown

At noon on a spring day in Paris 40 years ago, an old motor truck broke down in the center of the Place de l'Opera, requiring the driver to spend a half hour under it to make the repair. After apologizing for the trouble he had caused the policeman who had been directing the traffic around him, the truckman drove away — to collect several thousand dollars from friends who had bet that he could not lie on his back for 30 minutes at the busiest hour in the middle of the busiest street in Paris. He was the late Horace De Vere Cole, England's great practical joker who died in 1936.

Advances in American naval ships and equipment have been marked throughout the century and a half of the Navy Department's history by important milestones of progress. One of these was the first flight from the deck of a ship, made in 1910 by Lt. Eugene Ely, when he took off from a miniature flight deck on the foredeck of the USS Birmingham (upper). Three years later naval aviation had its actual start when Admiral George Dewey signed the report of the General Board, which recommended the establishment of a Naval air arm. Today aviation is one of the elements in the three-pronged American Navy. Flowering of "Navy Air" can be symbolized in such scenes as the lower photo in which an FJ-1 "Fury," a jet-propelled Navy fighter, makes a landing aboard the USS Boxer while the ship cruises off the California coast. (Official Navy Photograph)

The green young lieutenant was assigned to a new detachment. He was a very small and helpless looking individual, and when he first appeared before his company there were many audible comments made about his apparent ineptness.

From the rear of the ranks a voice boomed: "And a little child shall lead them." There was a roar of laughter.

Seemingly undisturbed, the lieutenant finished the business

of the day. Next day there appeared a notice on the bulletin board: "Co. A will take an 18-mile hike today with full packs. And a little child shall lead them on a great big horse!"

Tobias Hobson, an English stablekeeper, made customers take the horse nearest the door, hence the term "Hobson's choice" meaning to take what's offered or nothing at all.

How to Hunt
On the bus, two giddy young things were discussing men. "Tell me, Marjorie," said the unsophisticated one, "what do you do if a man persists in asking for a dance, — and you hate him?" "Tell him your card's full," answered the knowing one. "Is that all?" asked the first. "Oh, goodness, no," said the smart one. "Say it is — and let him see it isn't."

The rumble seat of an automobile gets its name from a similar seat in hose-drawn carriages which made a rumbling noise as they rolled over rough roads.

New Texas Special Streamliner

St. Louis, Mo. — The new streamlined Texas Special of the Katy-Frisco lines will enter daily service between St. Louis and San Antonio Sunday, May 16, it was announced jointly Monday by Donald V. Fraser, Missouri-Kansas-Texas Lines president, and Clark Hungerford, Frisco president.

One Texas Special will depart from St. Louis at 5:30 p.m., May 16 to arrive Dallas at 6:52 a.m., Fort Worth at 7:30 a.m., and San Antonio at 1:30 p.m., next day. The other Texas Special will depart from San Antonio at 3:30 p.m., May 16, to arrive Dallas at 9:53 p.m., and St. Louis at 11:30 the next morning.

Powered by 4000-horsepower diesel-electric engines, the new trains will lower the schedule of the present Texas Special from St. Louis by three hours and three minutes to Dallas, two hours and 25 minutes to Fort Worth, and four hours and five minutes to San Antonio.

They will carry no curtained berths. All space in sleeping cars will be either enclosed roomettes for one traveler or bedrooms with a lower and an upper berth. All such rooms will have lavatory and toilet, and in the bedrooms those facilities will be enclosed for privacy.

A folding partition between bedrooms enables parties traveling together to convert their quarters into one large sitting room.

Chair cars at coach fare provide "Sleepy Hollow" seats, designed by scientists at a cost of \$50,000 for research, providing maximum comfort for the passenger both in sitting and reclining position.

A startling feature of the new train, is the "unbelievably smooth" starting and the fact that a passenger with eyes closed cannot detect the moment of starting. This feature is due partly to Diesel power.

Each train consists of one mail-baggage car, two chair cars, one chair-lounge-buffet car, six sleeping cars, one dining car and one observation-lounge car. Basic construction of the cars is of low alloy high-tensile steel for strength and durability, with trim of stainless steel and aluminum. The cars are insulated with stone felt and fiberglas and all passenger-carrying cars are air conditioned.

Regular transportation fares will prevail upon the new train, officials said, with no extra charge for the luxury features.

SWIMMING'S FUN BUT DON'T OVERDO IT AND DON'T TAKE CHANCES

Austin, Texas — Seasonal advice to vacationists concerning the proper precautions to be used in water sports was released from the State Health Department today by Dr. Geo. W. Cox, State Health Officer.

Lakes and ponds of unknown depth, and streams of unfamiliar currents are often the site of picnics and excursions, and the usual lifeguard supervision associated with bathing beaches and commercial swimming pools is, of course, not available in such places.

"Swimming and water sports are beneficial to good health provided one's physical condition justifies this type of exercise," Dr. Cox asserted. "Nevertheless, they possess dangerous possibilities if the rules of safety are disregarded through carelessness or thoughtlessness."

The State Health Officer outlined the following simple rules for bathing and swimming safety: at least one hour should elapse after a meal before entering the water; upon the first indication of fatigue, come ashore,

and don't re-enter the water; if chilled, leave the water immediately; do not enter the water when overheated; learn to float — this is important; never attempt to rock a boat in a spirit of fun; and never swim in water that may be polluted.

"Outdoor excursions, picnics, and swimming parties contribute much to a healthy, happy, normal life," Dr. Cox said. "It is by no means advisable to eliminate these pleasures from our summer program, but it is important that they prove beneficial and not disastrous."

A drunk staggered into an Automat, put two nickels into a slot, and watched in astonishment as out came a piece of cherry pie. He put in two more nickels and out came another piece. He continued to feed in more nickels until he had almost a dozen pieces of cherry pie. Then one of the attendants asked him: "Don't you think you had better stop now?" "What!" cried the drunk. "Quit now — when I'm still winning?"

A professor is a man whose job it is to tell students how to solve the problems of life which he himself has tried to avoid by becoming a professor.

Humble Spends 11 Million On Gas Conservation in '48

Plans for continuing its long-range gas conservation program at a cost of \$11,837,000 during 1948 were announced in Houston today the Humble Oil & Refining Company.

New units to be constructed by Humble this year are natural gasoline plants at Conroe, Pickett, and Opelousas, La.; and gas injection plants at Seeligson and Kelsey. The Seeligson plant will ultimately be developed into a gasoline plant.

The new plants will process an additional 186 million cubic feet of gas daily, the company estimates. Humble spent approximately \$5,000,000 on gas conservation facilities in 1947, increasing the amount of gas conserved by about 80 million cubic feet daily to a total of 620 million cubic feet per day.

KILL WEEDS

in GROWING GRAIN with only 1/4 to 2 pints per acre of

Proved new spray method requires only 5 gallons of water—or less—per acre! Saves labor, costs less!

Agricultural Weed-No-More now gives you easier, cheaper, and more effective weed control than has ever before been possible . . . in small grains, corn, flax, and pastures.

Use Agricultural Weed-No-More in only 5 gallons of water—or less—to control weeds on a whole acre! Developed by Sherwin-Williams Research, this new low-gallonage method has been proved on farms like yours.

Haul 95% less water. One man can treat as many as 100 acres per day. Use a simple lightweight rig that you or any local shop can quickly assemble!

NEW, BETTER HAND SPRAYING—for roadside, barnyards, fence rows, ditches, etc. With the new Weed-No-More method you can treat 1/4-mile of fence row 10 feet wide with only 1 gallon of spray mixture.

AGRICULTURAL WEED-NO-MORE

Costs less per acre because it controls weeds more effectively!

Agricultural Weed-No-More is a proven ester formulation of 2,4-D. The ester formulation is recognized by authorities as being more effective over a wider range of weeds and conditions than other types of 2,4-D. Weed-No-More penetrates the weed almost immediately, can't wash off, mixes easily, won't clog or corrode equipment, is harmless to stock.

FREE BULLETINS

Before you buy any 2,4-D weed killer, let us give you all the facts on Weed-No-More performance on farms like yours. Ask us for new free bulletins . . . today!

PRODUCT OF SHERWIN-WILLIAMS RESEARCH

We can also furnish regular strength Weed-no-More (less concentrated than agricultural) in smaller quantities suitable for treating average sized lawns.

**IMPRESSIVE SERVICES
FEATURE MAY QUEEN
CROWNING CEREMONY**

Solemn and impressive ceremonies were held Sunday evening at 7:30 in Sacred Heart church in connection with the crowning of the May Queen in observance of World Sodality Day.

Participating in the procession were members of the Blessed Virgin Sodality, high school students and members of the Solemn Communion class. The procession formed at school and

My Neighbors

By BILL PAULSON

"It's funny how the Left Wingers want a managed economy. If they're such hot managers, why haven't they managed their own affairs better?"

filed into church as the sodalists sang hymns and Miss Theresa Mae Pels, sodality prefect, and her court proceeded to the Blessed Virgin's altar where Miss Pels crowned the statue.

Maids of honor for Miss Pels were Misses Rosalee Fuhrmann, high school sodality prefect, and Elfreda Koesler, assistant prefect. Little Barbara Boyles was crown bearer and Mary Lee Lawson, Lillian Fisher, Mary Catherine Walterscheid, Christine Fleitman, Linda Yosten, Patsy Otto and Jeanette Bayer were train bearers.

The May Day ceremonies preceded a sermon by Father John and rosary and sacramental benediction at which Father Herman officiated.

**DISTRICT GARDEN MEET
AT GREENVILLE ON MAY 27**

Garden Club members have received an invitation to attend the Spring Meeting in Greenville, Texas, on May 27, according to Mrs. T.S. Myrick, president of the Muenster club.

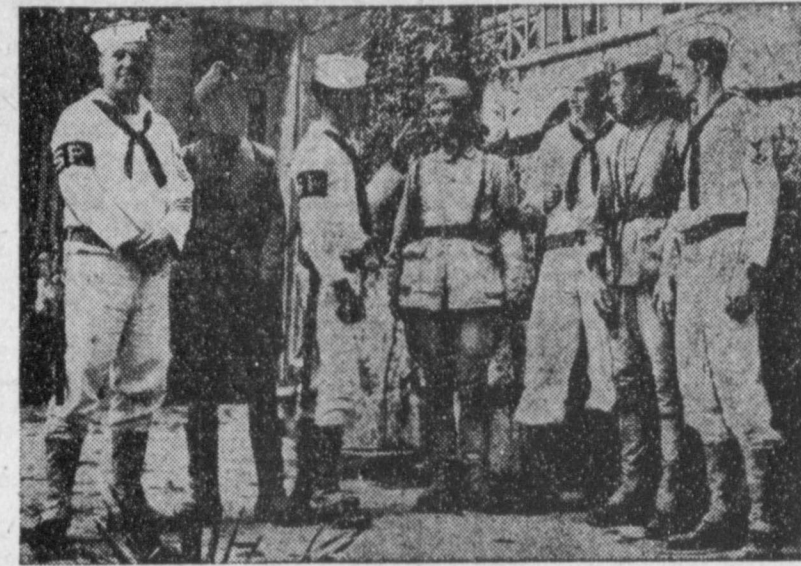

The day's program will begin at 10:30 a.m. and will feature addresses on "Value of the Nature Camp" and "Corsage Making". Luncheon will be served at noon. Registration fee is fifty cents and the luncheon \$1.25.

No Wasted Words

"I am a woman of few words," said the haughty mistress to the new maid. "If I beckon with my finger, I mean 'come'."
"I am a woman of few words, too," replied the maid. "If I shake my head, I mean 'I ain't coming'."

Efforts of the Santa Fe Railway to expedite assistance to cattlemen by voluntarily assuming responsibility in the accidental poisoning of Little Linville creek are being speeded by an emergency Board which will cut red tape in the handling of claims for cattle killed by the poison. The Board, selected by County Judge Thurman M. Gupton, comprises outstanding cattlemen of the area. Its recommendation will be binding on the Railway. The Board, meeting in the court house at Angleton, includes, left to right: L. J. McNeill, Brazoria County; Judge Gupton, chairman, Brazoria County; T. D. Matthews, Matagorda County.

Official Navy Photograph
Rendezvous in Turkey—American shore patrolmen of the aircraft carrier USS Leyte pause in their rounds ashore at Izmir to pass the time of day with Turkish soldiers. The carrier visited Izmir on the occasion of the Turkish International Fair.

**PINCHING BLOOMS OFF
SPUDS WON'T INCREASE
YIELD, EXPERT CLAIMS**

A couple of questions have come up dealing with Irish potatoes and onions in the spring garden. The questions are: Are you supposed to pinch off the flower buds of Irish potatoes? Is it a good idea to pull the dirt away from plants so they will produce good bulbs?

J. F. Rosborough, extension horticulturist of Texas A & M College says pinching off the bloom or leaving it on does not change the yield of the potato crop. Pulling the soil back from around the onion plants when they have begun to produce bulbs seems to hurry along their maturity.

Instead of worrying about pinching off the blooms, the things that will increase your yields are a good supply of fertilizer and plenty of water when the potatoes begin to make. From the time the potatoes get to be about the size of a twenty-five cent piece until they are full grown they will need lots of water to produce smooth, well-fed tubers.

During the day, if the potato plant foliage begins to wilt, this is a sign that the potatoes are suffering for moisture. In this wilted condition, the leaves cannot do their work. Therefore, in this time of year, and especially later on, it is important that the potatoes get a generous supply of water.

Even though pulling the soil back away from onion plants helps them grow faster, this practice will not increase the yield, says Rosborough. And if the grower is careless about pulling the soil back and does not harvest them at the proper stage, the upper part of the bulb will turn green from the sunlight. This will give the bulbs an un-

usual green appearance, and the farmers and consumers agree that all bulbs should be white. So, looking at it from all around, horticulturists say the practice of pulling dirt back away from the onions is not much of an advantage.

**NOW'S THE TIME TO
GO AFTER BAGWORMS**

During the month of May or borvitae, Italian cypress, and similar plants should be examined every few days for cedar bag worms. When the bag worms are young, they are so small and so well covered that they are hard to see. Camouflaging is a fine art these little worms practice right along.

They spin a cone-shaped, water-proof silk protector, which they cover with bits of bark and leaves, says Sadie Hatfield, extension landscape gardening specialist of Texas A & M College. As they grow larger, they add to their tent-like home. They never leave it, only sticking their heads outside to feed on the tender tips of the plants.

The cone-shaped cover grows with the insects, and may be as large as three or more inches by August. Don't let them get that big. If sprayed once a week with lead arsenate, they can be killed before they destroy or seriously damage a plant.

Mix three tablespoonsful of lead arsenate in one gallon of water, and spray once a week and after every rain, because a rain will wash the poison off.

If you let the trees go until the worms are full grown, says Miss Hatfield, many of them can be pulled off by hand and burned. But that's more tedious, and it's easier to kill with the spray when they are young before they do any injury to the plants.

Antonio Stradivari was the most famous violin maker of all time.

Midas was given the power by the god Bacchus to turn all that he touched into gold.

Strange Tastes

An old man had been fishing from the pier all day without uttering a word. A visitor who had been watching him for some time at last approached him.

"I see you are using fishbait for lobsters. You think it good, do you?"

The old man shook his head. "No," he said.

A long pause followed.

"But the lobsters do," he added.

At birth the kangaroo measures only one or two inches.

Siamese twins are so called from two such children brought by P.T. Barnum from Siam.

Miniature Motors Are Taking Over Automatic Living

Mighty Mites Range To 5-Millionths Hp.

By HENRY CONKLIN
Engineering Commentator

This is a story of midgets, the mighty mites of electric motor-dom that are taking over increasingly in automatic living—from operating the household clock, the office cash register, the factory production line or the farm milking machine—to activating the "brain" of the physicist's mathematical robot that can solve a 100-year problem in a trifling two hours.

By the day these motors are getting smaller in size and more powerful.

One, small enough to fit into the palm of the hand, delivers three horsepower and operates at an amazing 120,000 revolutions a minute; another, in the electric shaver, weighs but four ounces, has a thousandth of a horsepower, 103 assembly parts and spins a shaft 6,000 times a minute; still another, for meters, clocks and recording instruments, has a 1.6-watt input—and a five-millionth of a horsepower output.

Fanning X-ray's Brow

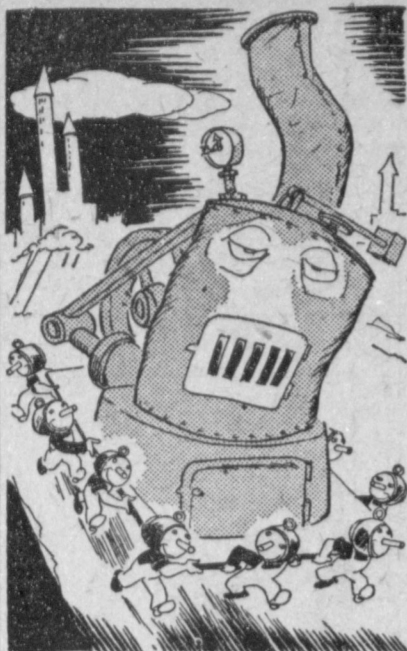

By the day new jobs are being added to the countless—and fabulous—assignments these small power units are called upon to carry out.

Take the case of the X-ray tube. In certain types there's a midget motor powering a mechanism that makes the tube cooler, thus opening the way to higher X-ray voltages and clearer pictures. . . . In special types of the pyrometer (it measures temperatures beyond the reach of the common mercury bulb thermometer), there's a 1/2000th-horsepower motor for driving charts at uniform speed—in perfect step with a 1/1500-hp unit that operates a balancing mechanism.

Open Cans, Scale Fish

This is not to mention many other novelties for the midgets. Such as starting jet engines, polishing shoes and teeth, opening cans, doors, windows and gates, picking chickens, defuzzing peaches, peeling vegetables, hulling peas and beans, raising and lowering hospital beds, operating fish scalers, invalids' chairs, scissors, pencil sharpeners, hedge clippers, peach stoners, postage stamp dispensers, barber poles, hair dryers, animated signs.

The pint-size motor's day began when the electric fan was

Electric motordom's conquest of steam and industry's crazy quilt of overhead belts and pulleys impressed the artist—so for his illustration for this story he dipped into "Gulliver's Travels" and the tiny but mighty people of legendary Lilliput.

invented in 1882, almost a half century after the birth of the electric motor itself, a ponderous infant. The fan, one of the first electric household appliances, necessitated a small power unit—and pointed the way to the age of streamlining, including today's electrified homes, which utilize an average of eleven fractional-horsepower motors.

Small Motor in Industry

The small motor began indicating its stride in industry soon after the turn of the century, in the days when electricity was being introduced to plants driven by steam engines and line shafting. At the outset of the modernization process, large integral horsepower electric motors were installed. Soon followed the use of medium-sized units, and next was initiated the trend to multi-motor-driven machines not only to supplant steam but a maze of overhead belts and pulleys, and to make possible straight line production planning. Today, for instance, some textile plants use as many as fifty motors per machine.

Aviation, demanding power units constructed for the lowest possible weight and smallest pos-

From Starting Jets To Picking Chickens

sible space occupancy, has opened up a field day for diminutive motors.

300 Motors on B-36

On the AAF's heavy bomber, the B-36, which could carry an atomic bomb to any inhabited region in the world and return home without refueling, more than 300 electric motors are in service. The B-29 also has at least 300. Many of them are midgets, built to special standards to meet strenuous service, such as excessive vibration and a temperature range of minus 50 to a plus 125 degrees F. Their jobs range from feathering the propellers, operating wing flaps, landing gear and de-icing equipment to powering automatic pilots, gun computing sights and radar.

Even Smaller Motors Seen

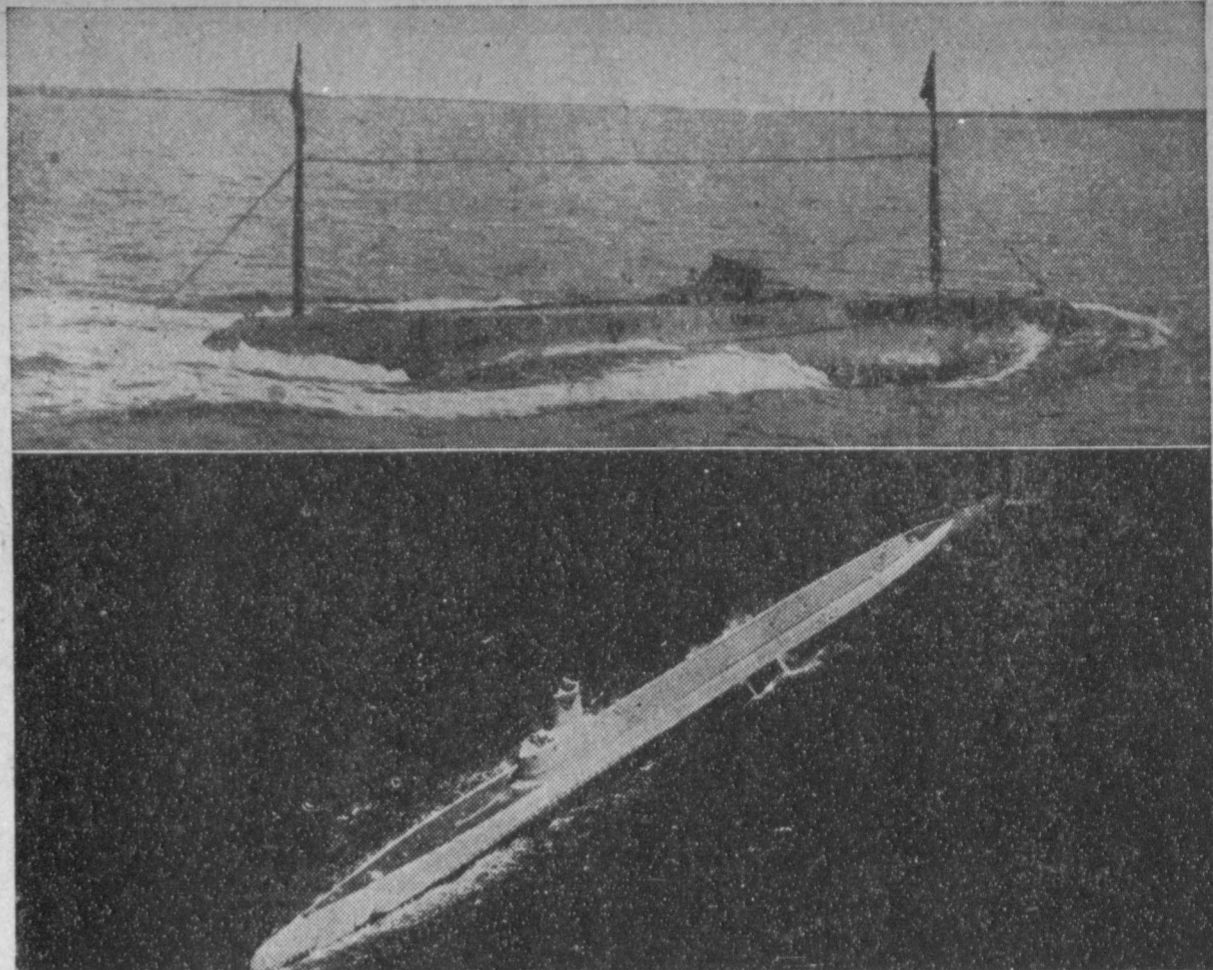

For a given fraction of horsepower, some of these war-born midgets now so active in peace are a seventh the size of pre-war motors.

Research leading to better alloys and insulation materials has been a major factor in the streamlining process. One manufacturer now is experimenting with a new magnetic alloy that gives promise of aircraft motors 10 per cent lighter for the same power than the small motors now available.

Many Farm Applications

All of which is vastly expanding motordom's service arc. On the farm alone there are more than 100 applications for electric power units. And, according to the latest estimates, farmers are now in the market for 4,000,000 more motors.

The small-motor heyday, in fact, has reached such a pass as to tax the facilities of the manufacturers—what with increasingly critical materials shortages. . . . At the close of 1946 the backlog of unfilled orders for motors totaled 45,000,000 units, 45,500,000 of which were for fractional-horsepower units. . . . To keep up with the demand, one manufacturer has to produce 40,000 different kinds of fractionals—and the average small motor comprises more than 150 parts. . . . Another manufacturer points out that if the small motor industry continued to produce only at its present rate, he doubted if the backlog would ever be filled.

The U. S. Navy's first submarine, the USS HOLLAND, was invented and designed by John P. Holland and accepted by the Navy in 1900. In the upper photograph the HOLLAND is shown buttoned up and starting to submerge. In the past 48 years of the Navy's century and a half of existence as a Department of the United States Government, development of undersea craft and warfare has culminated in such post-war submarines as that shown in lower picture. She is the USS Pomodon, SS-486, improved fleet-type U-boat following conversion under the "Guppy" program. (Official Navy Photograph)

Prisoner — "But, Your Honor, she keeps irritating me all the time."
Judge — "How does she irritate you?"

Prisoner — "Why, she keeps saying: 'Hit me! Beat me! Go on, just hit me once, and I'll have you hauled up before that bald-headed, old reprobate judge, and see what he'll do with you.'"
Judge — "Prisoner discharged."

The expression "scot free" has survived from early days when "scot" was an English fine.

"Everyone should own a comfortable bed and comfortable shoes because he is in one or the other all his life."

SEVERAL AFRICAN TRIBES FROWN ON "PUBLIC" EATING, TO THE EXTENT THAT MANY HOVER UNDER SHEETS AT MEALTIME

Bill Powers, a writer at Universal-International, went to dinner one night with a bad case of sniffles. "What's the matter, Mr. Bowers," asked a sympathetic waiter, "you fighting a cold?" "Yeah?" said Bill. The waiter shook his head. "Too bad you don't have pneumonia," he said. "They know what to do for that."

A Hollywood gossip was telling Ilka Chase of the knock-down and drag-out affairs of a newly arrived couple next door. "Everyone is talking. Some are taking her part and some his," purred the informer.

"And," replied Ilka acidly, "I suppose a few eccentric individuals are minding their own business."

Two presidents, Thomas Jefferson and John Adams, both of whom signed the Declaration of Independence, died on July 4.

Charter Oak is a tree in Hartford, Connecticut in which the colonial charter was supposed to have been hidden in 1687.

Lindsay News

Tresa Mae Spaeth had her tonsils removed Tuesday at Gainesville Sanitarium.

Frankie Sandmann had his tonsils removed at Gainesville Saturday.

Vincent Zimmerer was a patient at Gainesville Sanitarium for treatment Friday.

Little Jimmy and Rose Ann Moster, children of Mr. and Mrs. Johnny Moster of Muenster, are spending a few weeks with their grandparents, Mr. and Mrs. Ed Moster.

Miss Dorothy Beyer, who has

been employed in Fort Worth, is now employed at Gainesville in the court house in the office of the old age assistance headquarters.

M. Sgt. and Mrs. Walter Hutchons visited during the past week with her parents, Mr. and Mrs. John Bengfort, and have gone to Sherman to make their home. He has been transferred to Perrin Field.

Dutch and Leroy Metzler of Dallas were home Sunday for a visit with their parents, Mr. and Mrs. Phillip Metzler. They are now in business in Grand Prairie having purchased Carl's Bar B. Q. stand and renamed it Dutch and Lee's Bar B. Q.

SURPRISE BIRTHDAY PARTY GREETES MRS. JOHN NEU
Mrs. John Neu was pleasantly surprised Tuesday evening with a birthday party in her home.

The guests remembered her with lovely gifts and enjoyed games and refreshments of sandwiches, cold drinks and birthday cake.

Those present were Messrs. and Mmes. Bill Neu, John Kupper, Joe J. Neu, Fritz Bierschen, Edgar Mages, Johnnie Neu and John Neu and the honoree's father, Fred Bierschen.

LINDSAY BOYS' TEAM WINS TWO BASE BALL GAMES

The Lindsay school boys' base ball team played two games recently with Saint Mary's team of Gainesville.

The first game was at Lindsay with a score of 14 to 10 in favor of Lindsay and the return game was played at Gainesville where Saint Mary's scored 19 and Lindsay 26.

LINDSAY 4-H GIRLS PLAN SUMMER ACTIVITIES

Discussion of activities scheduled for 4-H Club members during the summer months was the principal business at the regular meeting of the Lindsay girls on Friday, May 7. Miss Mildred Chapman, county agent, presided at the session during which Miss Rita Block was elected president to replace Miss Florene Arendt, who is graduating from high school this year.

Summer activities discussed were the all-day outing at Trinidad in June and the style show to be held in Gainesville on June 26. The annual County Fair was discussed and suggestions were given by Miss Chapman on foods and hand work to be exhibited by the members.

CORONATION OF MAY QUEEN HELD AT LINDSAY SUNDAY

A pretty May Queen crowning ceremony was held at Lindsay Sunday evening in connection with the Sodality's annual May procession.

Junior Sodality members sang hymns during the procession and after the coronation, Rev. Conrad Herda, pastor, officiated at Sacramental Benediction.

Miss Rosalie Bayer, sodality prefect, crowned the statue. Her attendants were Misses Emilia Hermes, Lucille Fuhrmann, Anna

Mae Fuhrmann, Julianna Fuhrmann, Mildred Fleitman and Clara Stoffels. Little Misses Linda Lou Kuhn and Dorothy Mae Zimmerer were pages and Little Miss Alma Louise Haverkamp was crown bearer.

COUNTY AGENT HAWS MEETS WITH LINDSAY 4-H BOYS

County Agent B.T. Haws met with the Lindsay 4-H Club boys Friday and discussed the various projects chosen by the members and gave helpful hints and suggestions.

Walter Hermes was elected to represent the club at the summer camp at Trinidad on July 8, 9, 10.

MOTHER'S DAY REUNION HONORS MRS. PAUL ARENDT

The home of Mr. and Mrs. Paul Arendt was the scene of a delightful family reunion Sunday honoring Mrs. Arendt on Mother's Day. All children and grandchildren were present with the exception of one son, Sgt. Ernest Arendt of Fort Sill, Okla., who was unable to attend but sent greetings.

Present from out of town were Mr. and Mrs. Emmet Fette and children of Muenster, Messrs. and Mmes. John Hoberer and family, Artie Arendt and Paul Arendt Jr., all of Gainesville.

HENRY VOTHS ARE GIVEN SURPRISE PARTY SUNDAY

Relatives and friends gathered at the home of Mr. and Mrs. Henry Voth Sunday with gifts and refreshments to help them celebrate their 15th wedding anniversary. It was a surprise affair arranged by their children. Informal diversion was enjoyed by about 40 guests.

Mr. and Mrs. Voth were married in Muenster and moved to Lindsay a few years later. They are the parents of three children. Mrs. Voth is the former Miss Catherine Trubenbach.

BITTER VICTORY

(This is one of a series of articles in "The Fifth Commandment," a safety pamphlet recently published by the Travelers Insurance Companies.)

They were four tired but happy boys. The day before they had driven nearly 250 miles to the State University for the boxing matches. All four of them had reached the finals, and three had slugged their way to the state intercollegiate championship for their weight.

Now they were going back home. They had originally planned to spend the night at the University, but the flush of victory was too deep to be quenched by reason. By hurrying, they could get back to their own school in time for at least part of the Senior Hop where they would reap a harvest of adulation.

Charley, the lithe little middleweight, was driving, and the other three were asleep in the back seat. No one saw the frightful collision. Charley didn't because — for just four seconds — he had gone to sleep too. They found the car against a tree, pounded into an incredible ball of steel, wires, glass — and flesh.

Miraculously, none of the boys was killed, but not one will ever box again.

"What are ethics, Pop?" asked the eager young offspring.

"Well, I'll tell you. Suppose a customer comes into my shop and buys a necktie that costs a dollar. He gives me a two-dollar bill and walks out without the change.

"Now here's where the ethics comes in. Should I keep the extra dollar myself, or tell my partner about it?"
