

A subject that would have been more appropriate last week but still merits comment is the background of events which preceded this country's original Thanksgiving celebration. Practically everyone knows that the feast was originated by devout Pilgrims as an expression of gratitude to God for a bountiful harvest. But few are aware that the abundance for which they were grateful actually resulted from adopting what we proudly refer to as the American way of living.

In their humility they gave God all the credit for their blessings. History tells us, however, that their success can be explained at least in part by the well-known motto "God helps those who help themselves."

Records of the colony reveal that the settlers had little to be grateful for during their first two years. They started by building a common house, a sort of community warehouse, to which all were to bring the fruits of their labors and from which all were to receive their necessities. They had adopted the nearest application in history to the socialistic theory "from each according to his ability and to each according to his needs."

Idealistically the system was appealing at that time just as it is today. The combined labors of all should be ample to assure the welfare of all.

But it did not work. It failed to recognize the typically human trait that loafers, under those conditions, will shirk their duties, and diligent people will resent seeing the blessings they have earned shared with the undeserving. The inevitable happened. Everyone put as little as possible into the community warehouse and took out as much as possible. Supply failed to keep pace with demand. The Pilgrims endured two horrible years of starvation and misery.

Then leaders of the colony got together to work out a solution. Partly out of desperation, they adopted what seemed like a heartless policy, letting each family shift for itself. Thereafter no one would be forced to share his production with others. Every one received a patch of land along with the privilege of doing as he pleased with his crop. Private property and private enterprise were introduced to the colony.

Results were amazing. The colony became a bee-hive of activity as individuals forgot excuses and imaginary ailments and went to work. Wives and children joined in the effort, eager to bring the greatest possible success to the family projects. People did as much as possible instead of as little as possible. They had a new incentive. They were working for their own advancement.

The history of that time tells that more seed was planted than before and the crop was more diligently cultivated and harvested. The yield was most gratifying. A happy and appreciative colony decided to give public thanks to God.

It isn't likely, however, that gratitude was the only motive for their celebration. There must have been also a deep feeling of pride in their own achievements, the satisfaction of having cooperated with the Divine Plan and having earned the blessings they received. The Pilgrims must have realized that God's blessing had been available to them before but was not attained until they did their part.

An important lesson is inherent in this account of our first Thanksgiving. The Supreme Being has not changed. Nor has human nature. Socialism just does not fit in the Divine Plan, whether it's the simpler variety originally followed by the Pilgrims or the more complex variety found in our modern welfare-state.

Human weakness still applies. When segments of our population are privileged to receive something for nothing they are inclined to pull less than their share of society's load, and the over-all fruit of a nation's effort shrinks accordingly.

To this the egg heads will reply that we are making progress nowadays, so our modified system of socialism must have its merit. They fail to see that we get along in spite of socialism, not because of it. Our progress is the product of people who work at the free enterprise system, whose efforts still keep the economy rolling in spite of the something-for-nothing people.

The time can come, however, when we approach more closely the condition of the

TOPPER—Trees usually fall on top of cars, but not in Portland, Ore. This car was parked next to the tree; when winds blew it down, up went the unsuspecting auto.

Change-over to Dial Telephones Expected May 1

The date for change over to automatic telephone service here has been postponed again. Alvin Fuhrman, manager and co-owner, said Tuesday that delays on the exchange building and more delays expected because of bad weather are changing the date to about May 1. Originally the change-over was planned for March 1.

At least 45 working days are still needed on the building and as many more are needed to install equipment, which has been received. Construction and installation at Myra and Forestburg will take more time. Meanwhile line work continues, building and rebuilding lines and reassigning patrons. Where old lines were overloaded some patrons are being changed to other lines.

That work is proceeding according to schedule and should be finished by the time automatic equipment is ready.

Float Entries in Christmas Parade Invited by Jaycees

Entries from all over the county are invited in the Christmas parade sponsored by the Gainesville Jaycees on December 15, 4:45 p.m.

During the parade Santa will throw candy to children and immediately afterward he will be at the community Christmas tree to distribute more candy to the kiddies.

The Jaycees are offering \$175 in prizes for the three best floats in the parade . . . in amounts of \$100, \$50 and \$25. Entries will be judged on beauty and originality.

Last day to enter a float in the parade is Dec. 1. Entrants may contact D. J. Cornelsen, HO5-6667 or W. R. Smith, HO5-9797.

Area Soaked by 3.37 Inch Rain

Dreary, messy weather has been hanging over Muenster for most of a week. The combined total of rain, drizzle and soupy fog since Saturday is 3.37 inches, which far exceeds the needs of local farm land.

Scattered late planting was given a good start by the moisture. Generally, however, moisture was adequate before, and grain crops were ready for winter grazing. Temporarily that grazing must be postponed because land is so wet for the livestock.

The November rain measure now stands at 3.74 inches, second wettest of the decade. November 1957 had a record breaking total of 7.60. Another higher total for the month was 4.47 inches in 1952.

Likewise the year's total is far above average. It measures 40.43 now, topped only by the 51.80 of 1957, the wettest on record. Next highest full year reading of the decade is 33.36 in 1959.

Service Held for Everett Linn, 74

Everett E. Linn, 74, brother of Joe and Russ Linn, and a former Muenster resident, died in a Tyler hospital on Nov. 23 following a stroke.

He was born Sept. 6, 1888, a son of the late Mr. and Mrs. J. D. Linn, pioneer residents of the Linn community south of Muenster. In December 1916 he married Evvie May Henderson of Rosston. Early in the 1920s they moved to Petersburg, Texas, where he farmed until he retired and moved to Stephenville. She died in 1960.

Funeral services were held Saturday at 2:30 p.m. in Stephenville and burial was there beside his wife.

Joe and Russ Linn attended the services. Other survivors are two sons, one daughter, seven grandchildren, another brother, Lester Linn of Pasadena and three sisters Mrs. Ida Parker of Dallas, Mrs. Martha Womack of Fort Worth and Mrs. Era Mitchell of Phoenix.

Material Arrives For Improvement Of Water System

Arrival of a truck load of six and eight inch asbestos cement pipe on Wednesday marks the beginning of city improvement projects authorized in the city's recent bond election.

Installation of the pipe is due to begin in a few days. The first job will be extension of an 8 inch line for about a block on First Street to accommodate the new telephone building and five other customers now sharing a 3/4 inch line.

Next is an 8 inch line on West Third then up Maple to Seventh. It will tie into 6 inch lines at Fifth and Seventh completing two loops of water mains and providing ample water for the northwest part of town.

Work will be done by the city's work crew, which was enlarged recently by the addition of Dan Wilson and Richard Herr.

The truck load of pipe received Wednesday was from the Johns Manville plant of Denison. It was a partial delivery of 8725 feet of 8 inch and 3220 feet of 6 inch pipe contracted for the entire project. Other deliveries are to be made as requested by the city and payment for each shipment is due after delivery.

That arrangement is one of the money saving plans made possible by the bond issue's long range project. All materials were figured into the total requirement and bids requested for contracts to furnish the material as needed. Low bids on specified lists have been accepted from three firms. Johns Manville will furnish the asbestos cement pipe for \$20,391.65. Bowles and Edens of Dallas will furnish hydrants, valves, fittings and 840 feet of inch cast iron pipe for \$4,534.68. Southwest Meter and Supply Co. of Marshall will furnish brass items for \$499.30.

Saving on the asbestos pipe alone is near \$5,000 as a result of the contract. The volume price on 8 inch pipe was about 45 cents a foot under regular list price. On the 6 inch pipe it was about 30 cents a foot cheaper.

64 Remembered At KC Memorial

Sixty four deceased members of the Muenster Knights of Columbus were remembered Sunday at 3 p.m. when the council held its annual memorial service.

Six of the 64 names on the memorial roll have been added since the 1961 service, making the largest number of deaths for one year in the council since it was chartered in 1910. Two of them, John Fette and Henry Fette, were charter members. The others were Joe Yosten, Henry Luke, Walter Becker and Rudy Hellman.

Radio Russia says that America is a hysterical topsy-turvy country where people eat upside-down cake, doors go around in circles and everybody has an inside outhouse.

Christmas Lights Will Burn Again . . . Twice as Many

Muenster streets will have a Christmas look after all, even more so than in the past. The usual street lights will be installed and about twelve more strings of lights will be added.

This decision reverses a city council decision several weeks ago to drop the project this year. Reasons given then were that the city gets no financial help, as originally promised, and vandals break too many lights.

A group of business people came up with an answer to the first problem. They are collecting, expecting to raise \$200 for the lights . . . and they are inviting everyone in the community to help in the cause. The city agreed to cooperate and has taken first steps to get the lights up. That is, it has ordered the material.

Expected in the next few days are wire and sockets for 12 new strings of lights plus more than 700 colored bulbs to fill the new strings and make replacements on the old strings.

Installation will reach much farther than it used to. Five blocks will be lighted on Main, from the railroad to Fourth Street and six blocks will be lighted on the highway, from Main Street to the east city limit. An average of two strings of lights will cross each block.

Exact location of lights in each block is determined by power company poles. One end of the light string has its connection at the pole. That's why the spacing between light strings will not be uniform.

Local UF Drive Reaches \$1683

The latest figure on this community's United Fund drive is \$1683.74.

Henry Weinzapfel, local chairman, reported that amount Wednesday afternoon and disclosed that almost all campaign workers have turned in their collections and the grand total will probably be near \$1750, topping the local goal by about 25%. Muenster's community goal is \$1400. The county's is \$40,000.

Parochial Teams Win 3 and Lose 1

The basketball girls of Sacred Heart High have two more wins and the boys have a win and a loss since last week.

Playing the Alumni last Friday, the school teams won both games. Playing Alford Tuesday night SH girls won and boys lost.

Exes gave the Tigerettes a good game allowing them to creep ahead slowly on counts of 10-6, 19-14, 24-17 and 33-23. Joyce Haverkamp and Joanie Kaiser each made 14 points.

Hosting Alford the parochial girls led 14-11 after a tight first quarter then pulled ahead steadily. Counts at the other periods were 32-18, 48-24 and 56-35. Top scorers were Haverkamp 31, Kaiser 15, Ruth Wimmer 10.

The Tigers playing the Alumni took a 12-4 first quarter lead and managed to hold to the margin for two more periods and gain in the fourth. Final count 39-27. Johnny Wolf and Jim Otto scored 15 and 11.

Tuesday night the Alford Bulldogs gave the Tigers their first licking, by a count of 47-36. The visitors took a 12-7 first quarter lead and gradually inched forward for counts of 27-18, 36-23 and 47-36. Wolf scored 21 points and Otto 9.

Open House Sunday Will Present New Home of Muenster Dress Factory

An open house from 2 to 5 Sunday afternoon will show Muenster Dress Manufacturing Company's new home to the public. The event, originally planned for October 14, was postponed because the firm's move from its old location could not be completed in time.

The program will open with a blessing of the building by Father Alcuin Kubis. Other features are a style show, refreshments, registration for door prizes and display of the firm's spring line of dresses. Each of two door prizes will be the winner's selection of a dress style from the display of samples. The dress will be made to the

winner's size when production begins on the spring line.

The style show, put on by employees, will present modeled dresses designed and made by the employees. Prizes to the winners will be \$25, \$15 and \$10.

The dress factory's new home is a modern new building which more than triples the floor space in the former location. The firm had 50 employees then. Since moving it has added 10 and it has room for expansion to 150 employees.

Construction methods of the 80x120 foot building was new to this area. Prefabricated concrete slabs make up the walls and roof, and prefabricated concrete beams provide the roof support. A crane was used to put the pieces together.

Principal features of design are a surface of pebbles cast into the wall slabs, a four foot overhang of the roof and a screen of ornamental masonry at the front. There are no windows. Inside ventilation is handled by heating and cooling equipment and lighting is provided by fluorescent tubes.

A special feature of beams and roof slabs is pre-stressing. Cables stretched to high tension were the reinforcement pieces for the concrete. After seasoning the tension remains in the finished slab or beam greatly increasing its strength.

The interior of the dress factory is a big open space measuring about 80x105 feet. At the north is a group of rooms serving as lobby, two offices, rest rooms, lunch room, and receiving dock. Office and lobby fronts facing the work area have plate glass doors and walls. The building's front entrance also has plate glass doors and wall paneling.

The Muenster Dress Manufacturing Co., owned by Sam Raden of Dallas and managed by Mrs. Louis Roberg, is in its fourth year in Muenster. From August 1959 until six weeks ago it occupied the front of the Muenster Equipment Co. building. It started with 15 employees. The following spring Raden discontinued an operation at Gainesville and the local work force was increased to 25. Now there are 60 employees and the management expects eventually to have about 150.

Lindsay Blasted 40-6 by Leakey in Regional Play-off

Lindsay High's remarkable success in 8-man football came to a sudden stop last Saturday night at a regional game in Uvalde as the Knight lost 40-6 to a big and talented Leakey team. The win gave Leakey the champ title of Region III.

For the first time this year Lindsay was outclassed and the South Texas team moved relentlessly to one touchdown after another. The score at half time was 26-0.

The Knights got their lone counter on a freak play early in the third quarter. As Morisak was tackled near the goal he fumbled and the ball tumbled over the line where Donny Sandmann pounced on it for a touchdown.

Lindsay holds titles as district and bi-district champ and has a record of 10-1-1 for the season and post season.

NATION IN THE DARK
 In spite of headlines proclaiming great optimism in Washington for early resolution of our differences with Russia over their takeover of Cuba and its manning and conversion as a Western Hemisphere invasion base, the hour of irrevocable showdown draws nearer.

The maunderings at the UN — whose head man, U. Thant, has already disqualified himself in his feckless jaunt to Cuba and his hasty retreat from the scorn of Castro, and whose chief US representative has twice been rejected by the American people — have only fogged up a picture that once seemed clear. More disquieting, they have revived in the public mind the nightmare of our submission in Korea to UN leadership.

Just as, a week ago, we were optimistic because Khrushchev said he was bringing home his 42 missiles — and US Naval officers viewed from ships of the "blockade" line what may have been missiles on Russian decks — today, we cherish brave hopes that, after all, Castro will permit Khrush to bring home his 30 bombers also. "optimism" is based on the contention that the Kremlin's UN stooges have stopped saying the bombers belong to Fidel and not to Mother Russia, and that even Castro's flunky, who has been singing this tune, has not repeated it in his talks with other Latin American "ambassadors" in recent days!

But supposing the optimism is fully justified and the jet bombers, or some portion of them are removed, are we then — with effective inspection more of an illusion than ever, with the "fishing port" development continuing and the thousands of Russian and Chinese Reds still occupying this threshold of the US — to be told by President Kennedy and "Ambassador" Stevenson — and U. Thant, of course — that everything is hunky dory?

At this writing, U. Thant on his throne in the Manhattan no-man's land is reported sitting on terms submitted to him by Russia and Cuba jointly for ending the crisis. "Spokesmen" for the State Department and for our UN delegation say they know from nothing, and another mysterious mouthpiece for the UN is quoted as saying that U. Thant is "not authorized" to tell us anything yet!

That for Mr. Kennedy's bold gesture — and his pledge to defend the United States and the Western Hemisphere! Having lost the agonizingly gained initiative, are we now waiting for an attack on Guantanamo? And is it likely to happen while we can still be talked out of this historic base at the UN?

From the American Medical Association News: "There are elderly people who need help. They should be helped and they are being helped. But the evidence is overwhelming that the majority of the aged are caring for themselves, that the financial situation of the elderly is getting better rather than worse, and that a federal tax to pay for the aged's health care would be an unfair burden on younger wage earners. The melancholy picture of the elderly is a fraud. It is a crude caricature and should be seen for what it is — an insult to the aged and a disservice to the nation."

The couple went into a showroom to buy one of those new economy compact cars. After learning the price of the automobile, the husband remonstrated:

"But that's almost as much as a big car costs," he said. "Well," replied the salesman, brightly, "if you want economy, you got to pay for it."

PROFITS — WITH HONOR

There's a pleasant tinkle about the word profits. It rings a bell. The big catch is that most of us have the darndest misconceptions about it.

Example: About 10 years ago, a national survey showed that 40% of the general public thought profits were "too high."

Then the public was asked what a fair profit would be. Almost everyone said 10% on sales — or 10% on invested capital.

This "fair" profit was about twice as much profit as U.S. industry was actually making at the time — when so many of us thought profits were "too high!"

And here are two recent factual reports:

1. In 1961, the profit margin on sales of all U.S. corporations was 3% after taxes, according to the U. S. Department of Commerce data.

2. The U. S. Treasury has published figures which show that in recent years more than a third of all corporations actually have made no profit, but operated at a loss.

We could go on for days. But this, in a nutshell, is the "lowdown" on "high profits."

Party Celebrates First Birthday

The first birthday celebration of their grandson, Robert Wolf, took Mr. and Mrs. Bernard Wolf to Fort Worth Sunday to attend the party. Truman Wolf accompanied his parents.

Entertaining for the one-year-old honoree were his parents, Mr. and Mrs. James Wolf. There was a decorated one-candle cake and it was served with other refreshments. Those attending brought gifts.

Others present were the baby's maternal grandparents, Mr. and Mrs. R. P. Cain and two children of Farmers Branch, Mr. and Mrs. Pat Bowers and two children and Mr. and Mrs. Bill Martin and son Chris, all of Irving. Party pictures were taken.

It's much easier to talk to a garage mechanic about your car's brakes than it is to plead with a traffic cop.

Farm Facts

According to the U. S. Department of Agriculture, there were 14,803,000 people living on farms in the United States in 1961, or about one person out of every 12 in the total population.

14.8 million people live on U.S. farms.

This is the smallest farm population of recent record. From 1960 to 1961, the number of farm people decreased by about 830,000 as the movement away from farms more than offset the growth that would have taken place from births.

Non-white farm people number 2,346,000. They account for 1/6 of the total but because of their concentration in the South make up 3/10 of all Southern farm residents.

The farm population has a high percentage of children and teenagers; 43% of all farm people are under 20 years old. Farm people of late middle age or older outnumber young adults, however. In 1961, there were 109 farm males for every 100 females, compared with 97 males for every 100 females in the non-farm population.

Farm people are defined as those living on places with 10 or more acres of land and selling \$50 or more worth of farm products per year.

Social Security

Using an automated dragnet, the Social Security Administration has located 83 persons in the Grayson, Cooke and Fannin counties area who are eligible for benefits and did not know it, Gus Jones, District Manager of the Sherman Social Security Office said today.

Through an experimental program, Jones said, 365,000 persons across the country are being sought. Millions of dollars in benefits are due them.

Automation paved the way for the manhunt. When the Social Security Administration installed the latest electronic data processing machines in its vast Baltimore record center recently, the search became possible.

Jones stated that there is a record at Baltimore for everyone who has ever had a social security number. The records indicate those who are eligible for benefits, but are not receiving them. The only persons eligible who have not been contacted, Jones stressed, are those who have moved and changed their addresses since applying for their social security cards.

Interested persons are reminded that Noel Wall, Field Representative, is in the Basement of the Gainesville Post Office each Tuesday and Thursday morning from 9:30 until noon.

A man went to a physician complaining of prolonged headaches. The doctor told him to stop smoking.

"I have never used tobacco in any form."
 "Well, then, stop drinking."
 "I am a total abstainer."
 "Late hours, then, and fast women."

"I am always in bed by nine. I am a bachelor and live with my old maiden aunt. What else could cause my headaches?"
 "I don't know," said the baffled doctor. "I guess your halo's pinching."
