**"If a man cheats me, shame on him. If he cheats me again, shame on me."** That bit of homespun philosophy, which may have originated with someone like Confucius or Ben Franklin, apparently goes unheeded in the policy making circles of our country's diplomatic set.

At least that much can be assumed from the remarks of Dr. Anthony Kubec, chairman of the history and political science department of the University of Dallas, in his account of The Cuban Story here Sunday night.

The same set of American blunders can be held accountable for establishing communism in Red China and in Cuba. In both cases the reds and their leaders were hailed as agrarian reformers and as such received our official approval in their efforts to overthrow existing regimes. In both cases our country imposed an arms embargo on those who were fighting the reds while permitting the commies to receive abundant supplies of war materials. Another factor also applied in both cases, and very likely resulted from the official attitude. Most of the American press was sympathetic to the reds, helping to create a popular opinion which approved our official policy.

By our boners we put the Chinese reds in power. For which we can say shame on the traitors and eggheads who pulled the wool over our government's eyes. By similar boners we set up Castro. For which we can say shame on our government for being a sucker the second time.

We have an idea that Dr. Kubec could, if called upon carry his comparison a lot farther. Both China and Cuba owe much to official Washington for continuation of their red rule. During the Korean police action red Chinese were allowed to raid our installations from across the Yalu River but MacArthur was not allowed to make retaliatory strikes across the river. At the same time Chinese Nationalists, eager to strike their blow for liberation, were kept bottled up on Formosa. We were taking our advice from the red-infested United Nations.

Again, at the shameful fiasco of the Cuban invasion, our promise of air support to the Cuban patriots was cancelled after the attack was launched... on the advice of Stevenson, who did not wish to be accused of interference by his red associates of the UN. Because of us the mission was a dismal failure. The spirit of liberation was crushed, thousands of Cuban patriots were executed, and our nation was further humiliated by the absurd tractors-for-prisoners scheme.

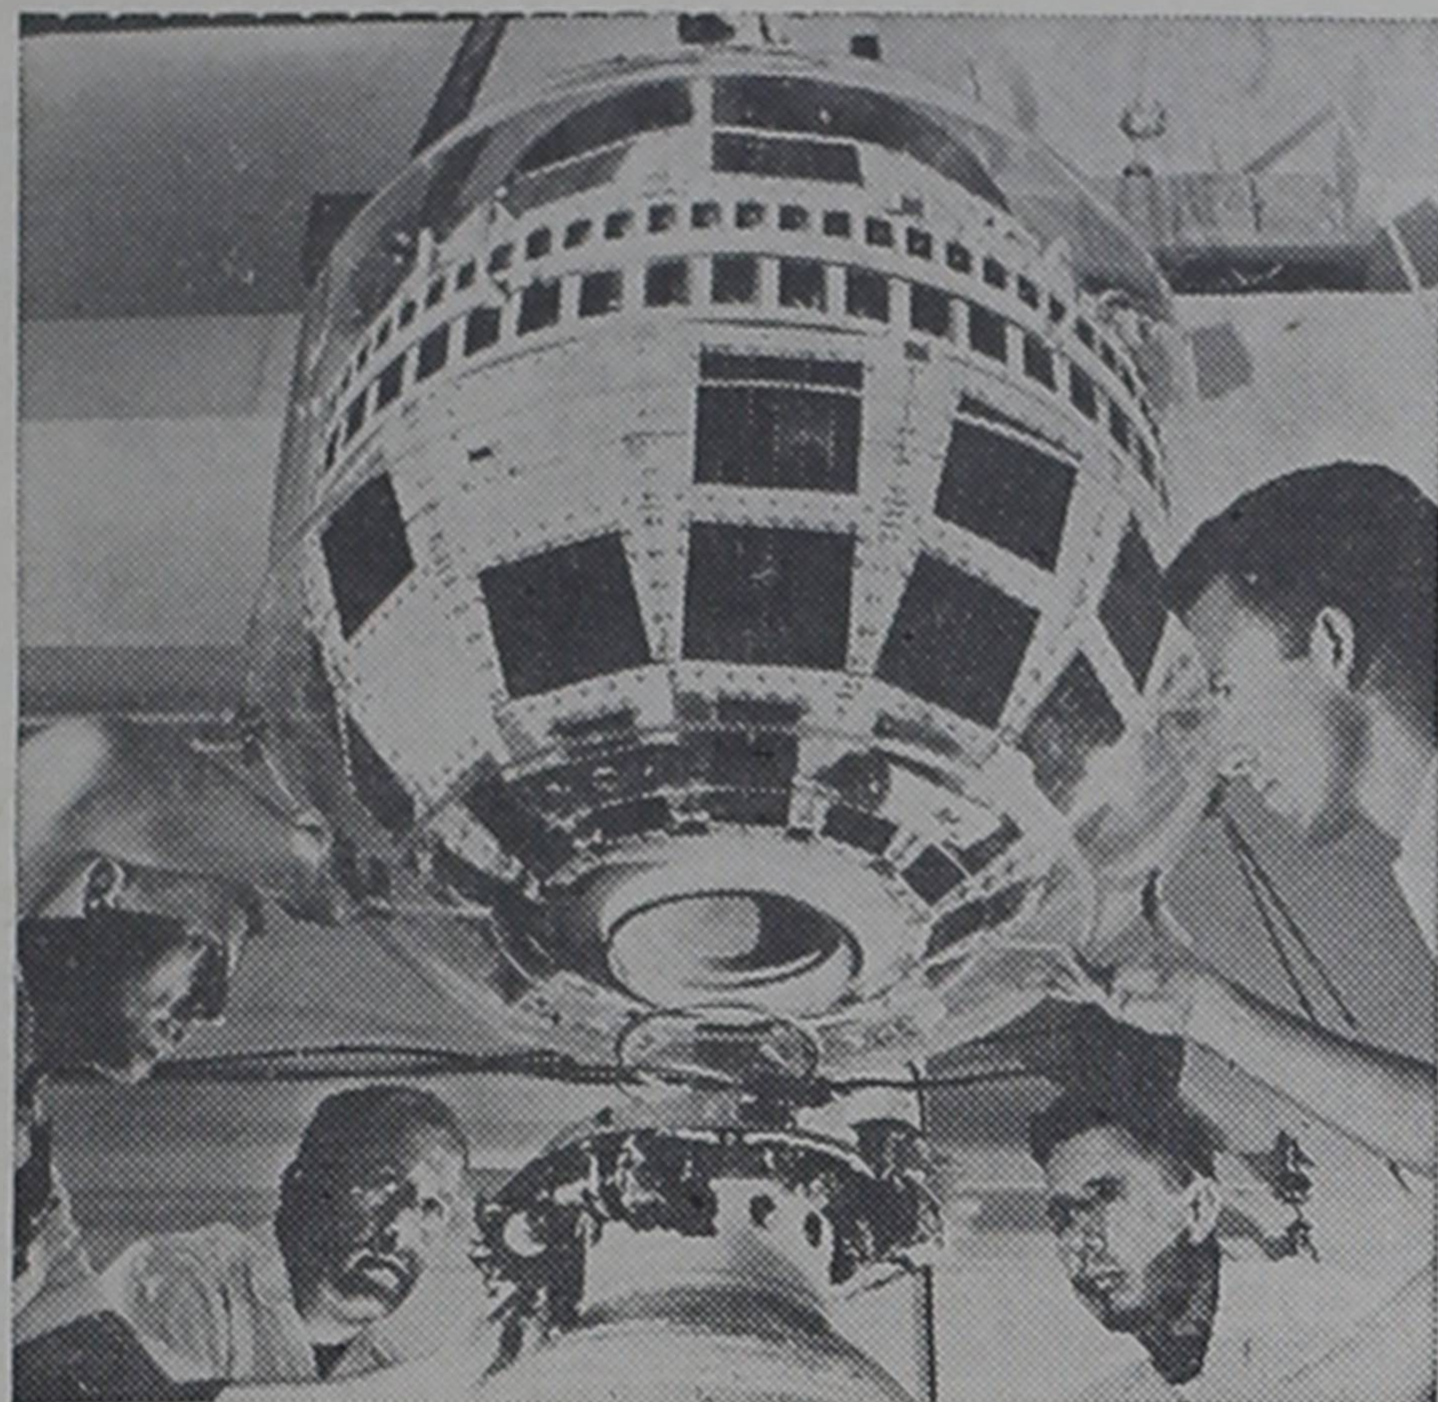

And there are plenty more tragic consequences. One is the resultant build-up of Communist arms in Cuba, which not only will make the liberation job much harder if and when we ever work up the gumption to do it, but is also serving as a nucleus for red activity in Latin America.

Another result is the nose dive of American prestige in Latin America. When economic sanctions against Castro were proposed at the OAS pow-wow, it's easy to understand why few supporting hands were raised. They were reluctant to support the nation which made such a sorry mess of dealing with the loud mouthed upstart. Since then it's easy to understand red gains in Latin America.

Reports from Asia in recent weeks are that the red regime of China is in serious trouble. Conditions are becoming so miserable that the country has little chance of recovering. The emptiness of communist promises is showing up and the red machine seems headed for eventual break-down. It's to be noted, however, that the red troubles result only from their own wickedness. We're not due any credit for the possible defeat of mankind's enemy in China.

Will the comparison continue to apply in the case of Cuba? Will our country permit the human curse to run its course there, inflicting years more of misery and tyranny and murder before it eventually decays of its own wickedness? Or will we instead adopt a policy based on integrity and proceed with determination to deal effectively with communism wherever we encounter it on this hemisphere?

Looking at China now, there may be some who think that our weak, hands off policy has a chance of winning in the end.

A full size model of the Telstar satellite which was launched into orbit early in July will be a feature of the new Telephone Exhibit at the 1962 State Fair of Texas, Oct. 6-21, in Dallas. The Telstar, shown here undergoing tests, is 64 inches in diameter and has 72 flat faces or facets. The Telephone Exhibit, to be completely redesigned for the 1962 Fair, will occupy a prime exhibit area in the World Exhibits Building.

## Parish Hosts 400 At Convention of Catholic League

The motto of St. Benedict, "Pray and Work" was the keynote of the 64th annual convention of the Catholic State League of Texas, held here during the past weekend.

It was the topic of the sermon delivered by Abbot Alfred Hoenig, O.S.B., of Corpus Christi Abbey, at the pontifical high mass celebrated Sunday morning by Abbot Michael Lensing, O.S.B., of Subiaco Abbey.

Abbot Alfred recommended that each person work for a more general application of the convention's principles and resolutions in order to bring modern living more in harmony with the will of God, and he recommended prayer as the means of keeping in closer touch with God.

Prayer is communicating with God, he said, and it is needed to sustain friendship with God just as other communicating is essential to human friendship. He also assured that no prayer is wasted. Sometimes the answer is not recognized, but one way or another, and according to God's own judgment, it will be answered.

The mass and sermon was the ceremonial highlight in the convention which was attended by about 400 delegates from parishes in all parts of the state. About 15 visiting priests were also here.

Another big event of the convention was the Catholic Day program Sunday night at 8 in the school auditorium.

Principal speaker there was Anthony Kubec, Ph.D., chairman of the history and political science department of the University of Dallas. He said that American policy was greatly responsible for Castro's success and that our country had helped him in the same way it helped Red China. Also that our weakness in dealing with communism in Cuba has caused de-

## NEWS OF THE SICK

John Kleiss was dismissed from Gainesville Hospital, Lindsay Street Division, Tuesday after being a patient since Saturday when he entered with a broken leg. It's his right leg with two broken bones about six inches above the ankle. The breaks are the result of being kicked by a cow. John has a cast covering the injury from toes to hip, but is getting around on crutches.

Fleitman, was dismissed Monday from Archer County Hospital where he was a patient since last Thursday night after being hooked by an unfriendly Brahma bull while participating in the Archer City Rodeo. The Brahma's horn hooked Robert in the right cheek and 28 stitches had to be taken. Robert has made the rodeo circuit all season and has been a winner several times.

Mrs. H. M. Schmitz is seriously ill at Gainesville Hospital, Richey Street Division, since suffering a stroke Monday about 11 a.m. and is not being permitted to have company. Mrs. William Sandmann of Lindsay is recovering normally following gallstone surgery Thursday, July 26, at Gainesville's Lindsay Street Hospital. She will probably be dismissed this weekend.

Mrs. F. E. Schmitz of Gainesville is back in Dallas at Baylor Hospital where she had her second eye surgery last Thursday. She's making satisfactory recovery... will be hospitalized about ten days.

From Post, Texas, comes word that former Muensterite Matt Stelzer is doing fine after suffering a heart attack recently.

Stevie and his parents want everyone to know how grateful they are for the prayers, cards and every other thoughtful deed since he became ill.

Bobby Scoggins, 7, was dismissed from Gainesville Hospital Saturday afternoon, doing fine, up and around, after a hernia operation.

## Donkeys Fail to Appear for Game; Game Date Re-set

The donkeys and the players failed to get together for Monday night's donkey baseball game. The players came on schedule, the donkeys came Tuesday.

It was a misunderstanding, says Arthur Hess, VFW commander. The donkey owner marked the wrong day on his calendar and simply followed his schedule.

Nevertheless, there will be a donkey ball game. The game which was considered as a return match is definitely set now for Friday, August 10. St. Joseph's club will be the sponsor and will take on the VFW Club. Charges will be the same as announced before: adults 75 cents, children 35 cents.

Those who bought tickets for the first game need not be losers, Hess said. They can get a refund at the VFW Club or they can use their tickets for the next game.

## Hartman Attends Firemen's School

Alvin Hartman represented the Muenster Volunteer Fire Department at the thirty-third annual session of the Texas Firemen's Training School at A & M College July 22-27.

He was one of 1133 students - all men - representing 404 Texas towns. Also there were representatives from 22 other states and two foreign countries, Old Mexico and South America.

Basic and advance fire fighting methods, chemical fire fighting, rescue work, including drownings, first aid, artificial respiration and home safety were topics discussed and demonstrated by top instructors in the various fields.

There was class room work, actual participation in fire fighting, lectures, demonstrations and films to give those attending a wealth of information and knowledge to take to their home towns and fire departments.

## "Al and Wando" Raise Funds at Livestock Auction

Al and Wando, the man and sheep crusading team working to keep Warm Spring Foundation in operation, are spending this Thursday at Muenster Livestock Auction. Al auctions Wando to the highest bidder as often as he can get a bidder with the understanding that he keeps the sheep and Warm Springs gets the sale price.

To date Wando has been sold about 3700 times for a total of about \$24,000. This has been happening at livestock auctions all over the state. His average per day is \$300 to \$400, and his best yet is \$870.

Al Berry is a business man of Gonzales, where Warm Springs Foundation is located, who is determined not to let the place close down. When the last legislature failed to make an appropriation the crippled children's institution was faced with a shutdown. Al decided to do what he could to keep it open. His crusade caught on. He is keeping the place open.

People who don't have the opportunity to own Wando temporarily can still help the cause along. Donations will go into the same fund if sent to Al and Wando Crusade, Gonzales, Texas.

## 13,500 Report for Countywide Polio Immunization

About sixty per cent of the people of Cooke County responded to the mass polio immunization program last Saturday afternoon in the Community Center building in Gainesville.

The Gainesville Junior Chamber of Commerce and Cooke County Medical Association, co-sponsors of the program, estimate that 13,500 persons were there.

For the benefit of any who did not come, another mass immunization is scheduled this week Saturday, August 4, at the same place. Hours again will be 1 to 5 p.m. The sponsors expect at least another 2,000 then.

The immunization at Gainesville was one of many being conducted throughout North Texas during the past weekend. Nineteen other counties of the area, including Dallas and Tarrant, had them. At the same time the doses were given in several other areas of the state. Total count in Texas for the weekend is estimated at near 1.4 million. Previously about 1.7 million doses had been given in the state and the over all aim is 4.5 million.

Its purpose is to stop the alarming spread of polio which has been noted recently. So far the state has 150 cases this year, almost five times as many as the same period last year.

Success of the program is due largely to the fast and painless method of administering it. The time per person is only as long as needed to hand out a lump of sugar with two drops of Sabin oral vaccine on it. In most cases no time is lost in filling out records. Each family prepares its own and just hands it over.

At Gainesville the line was long most of the afternoon but it moved fast. At one check persons entered the line three blocks away and had their doses in less than 20 minutes.

Two more doses are needed to complete the Sabin vaccination series. They are scheduled for September 8 and October 20.

## County Tax Rate Unchanged in '62

Cooke County Commissioners Court Monday set the 1962 county tax rate at 74 and 84 cents, the same as for 1961.

The 74 cent per \$100 valuation rate applies to homesteads only. The 84 cent per \$100 valuation rate applies to all other property. Homesteads are exempt from the 10 cent levy assessed for purchase of right-of-ways for widening West Hwy. 82.

The Court voted not to budget funds for Civil Defense for 1962, but instead divert this money for operation of the library and other anticipated expenses.

The county will have a \$8,400 drop in tax receipts due to lower oil property valuations. A close check on all expenditures was ordered to offset this loss and remain within the budget.

## Car Wreck Fatal

### FRIENDS OF THE FOE

By Tom Anderson  
The almost incredible Communist victories since the so-called end of World War II were won mostly by subversion. By relentless incitement to revolt, by perfectly planned internal subversion against foes unwilling or unable to meet subversion, the Communists en-

slaved 750 million people. While we spent \$40 billion a year for armaments and \$60 billion on total foreign aid since 1945 trying to buy peace piecemeal, the Communists spent peanuts.

In 1945 the Communists had enslaved 7 percent of the world's people. They have now enslaved 40 percent of the world's people and 25 percent of the land mass. The big Red Army didn't have to fire a shot. All the Communists have to do is to keep on doing what they've been doing and all we have to do is keep on doing what we've been doing, and the Communist timetable calls for taking us over, from within, by 1973.

Yet our peerless leaders tell us the menace is entirely from without, not from within. It is, of course, both — as any school-child should know, but doesn't. There are reportedly less than 15,000 Communists in this country. Given the word, J. Edgar

Hoover could jail them faster than the Supreme Court could turn them loose.

Fifteen thousand Commies won't take us. If we're taken from within, it'll be by the hundreds of thousands of do-gooders, fatheads, pacifists, socialists and fools in high places who are running the Communists' errands for them. We won't have Communism until we've had Socialism. Socialism is the halfway house to Communism, Communism without the firing squad. Yet some New Frontiersmen tell us the best way to oppose Communism is to adopt Socialism.

A "yellow traveler" is a person who preaches the Communist line but claims he is not a Communist. A yellow traveler is a Communist who lacks brains, integrity or guts. Pinks are gutless Reds.

Your neighbor who buys the seed, plows the ground, weeds, irrigates, lays by, harvests and sells his crops, votes on controls and allotments and gets ASC payments — if he is not a farmer, what is he? If he is a fellow traveler with Communists, following and preaching the Communist line, then it makes little difference whether he carries a Communist card. In fact, he is a more deadly enemy of freedom than if he did carry a Communist card.

Communism, whether Khrushchev's or Tito's or Castro's, is a criminal conspiracy. Under our laws anyone who aids and abets a criminal is also guilty of crime. Under our laws anyone who gives aid and comfort to the enemy is guilty of treason. Treason is punishable by imprisonment or, in wartime, by death. We are at war, a war for survival as a free people, under God.

Fellow conservatives are busy fighting among themselves over whether we have been brought to the brink of surrender by fools or traitors. Actually, that's not the main issue. The issue is that we must change a losing game, if we are to avoid being swallowed up in a one-world socialist "brotherhood", and eventually enslaved. We face possible surrender to a one-world Socialist State — with or without firing squads — and the people who brought us here are guilty. They "planned it that way" as Roosevelt liked to brag. America's greatest menace is not fallout; it's sellout.

Someone once said, "What you are speaks so loudly I can't hear what you say." People should be judged not by what they say, but by what they do. Real Christians live the Christian life. Rather than indulge in name-calling, let us judge anti-Communists, anti-Socialists, anti-collectivists by what they do. If it walks like a skunk, looks like a skunk, acts like a skunk, and smells like a skunk, let's assume it is a skunk until somebody proves it's not.

The "menace within" and the "menace without" are inseparable. No one, including the President of the United States, can accurately say which we should now fear the most. To pooh-pooh the Communist menace from within because there are not many Communists here is like a ship captain pooh-poohing an iceberg because there's not much ice visible. It's not what's up front that counts. It's what's

hidden beneath the surface. While the Hidden Persuaders continue selling us out to a One-World Socialist Dictatorship, J. Edgar Hoover's boss, Little Bobby, spends his time looking under the beds for patriots.

### WE, THE PEOPLE

This newspaper has long been a severe critic of the increase of power in the central government, wasteful spending, usurpation of state's rights, and all the attendant evils of the socialist state. We have been critical of those in power, without realizing that we the people gave them that power.

We have decided we have been going at this question from the wrong end. We have been criticizing efforts, but ignoring the causes.

"We the People" are the government of the United States of America. If we have let ourselves be led into support by free elections of the evils that now beset us, we are to blame for we the people are the government. We cannot escape that fact.

If we are always wanting something for nothing, if we depend upon the government for everything we want, if we are so blinded by greed that we can be bought by the politicians, if our vote can be bought for a "mess of pottage", then we the people are to blame.

And if all this is true, we are a different breed from the founders of this Republic. All they wanted was a place to stand, their place in the sun was rough-hewn from the raw frontier.

What meaningful words are those used in the beginning of the Preamble to the Constitution: "We the People of the United States."

We the people, the sons of liberty; the repository of justice; the inhabitants of the "land of the free and the home of the brave," we are the hope of the world.

"We the People of the United States." You can belong to no greater aggregation of citizens, no greater or more prosperous country. Remember this when

some half-baked professor of econometrics tells you what is wrong with our country. Remember it when some politician tries to buy your ballot with promises of doles you must pay for yourself.

A regional daily newspaper has been conducting a poll on how well the President is doing his job. The poll is going ten to one against him. We the people put him in office. We knew what he would do when elected for he told us. He is only following the platform we the people adopted by our representatives in convention. Why take it out on him? We the people are to blame for we are the government — good or bad, we are the government.

### CONFESSIONS OF A HUMBLE MAN

Not many months ago, we had occasion to discuss a number of things with an eminent surgeon as he sat on the edge of our bed shortly after he had successfully removed a goodly portion of our insides. Among other things, we expressed our awe at the amazing feats of skill the modern surgeon is able to perform. He was not greatly impressed, and his answer was something like this:

"Yes, science and medicine have made some great strides, but nobody knows better than we do how clumsy we are and what little we actually know."

If an organ ceases to function or becomes diseased, if the patient can possibly live without it, but we cannot replace it. What would you think of the auto mechanic who, if a sparkplug in your car failed, only knew how to remove it?

"We know that blood is manufactured in the marrow of the long bones, but we don't know how. We can't even duplicate the process of digestion, let alone produce life in its simplest form, the single cell. About all we can do is patch up what a Power greater than we can even imagine has created."

It was then that we realized that we were talking to a very humble man who is deeply religious and believes in God. His years of study of the human body and its millions of intricate working parts, instead of creating a contemptuous familiarity complex, has made him realize how little man has learned about himself during the millions of years that he has been on earth, and how impossible the construction of the human body could be anything but the handiwork of a Supreme Force. And it was good to talk to a humble man, whose humility proves his greatness.

### KEEPING UP WITH THE JONES

"We are now at the end of the third decade of the national insanity known as 'progressive education.' With what results?"

"We have watched juvenile delinquency climb steadily. We have produced tens of thousands of high school graduates who move their lips as they read and cannot write a coherent paragraph."

"While our Russian contemporaries, who were supposed to be dedicated to the mass man, have been busy constructing an elite, we have been engaged in the wholesale production of mediocrity. What a switch!" — Jenkin Lloyd Jones, Tulsa (Okla.) Tribune, speaking before the Inland Daily Press Association.

### FLIGHT OF THE DOLLAR

While you're concentrating on the flight of the astronaut, take 60 seconds to read this and follow the flight of the dollar. In 1961, an income of \$12,510 was needed for a married couple with two children to have the same purchasing power — after Federal income and Social Security taxes — that a \$5,000 income provided in 1939. The taxes on \$5,000 in 1939 were \$59, leaving \$4,941. Out of a \$12,510 income last year, taxes took \$1,912. And because of today's higher prices, another \$5,657 must be taken out of the remaining \$10,598 to adjust it to the buying power of the 1939 dollars. Need any more ammunition to fight for tax rate reform?

A tough army 1st Sergeant was talking to one of his Privates First Class, who was about to be discharged:

"I suppose when you get out of the army you'll be waiting

**Tour Ten States On Ten Day Trip**

A ten day vacation with sight-seeing through ten states and visits with relatives leaves many happy memories for Mr. and Mrs. George Koelzer and Mr. and Mrs. Earl Koelzer and children Beverly, Earl Jr., Louis and James.

In Richmond Hill, Ga., they visited with Mrs. Earl Koelzer's sister and family, the Donald Bucks who took them fishing, boating and swimming in Jerico River.

At Norfolk, Va., they were with the George Koelzer's son, Sailor Ivan Koelzer, and toured his ship, the U.S.S. Enterprise, the world's largest, during an open house program.

Scenic tours included travel through the Tennessee Mountains with stops at Lookout Mountain and Ruby Falls.

**Four Days Crowded With Vacation Fun**

Get Mr. and Mrs. Earl Robison and son Jimmy in a conversation and they'll tell you about seeing the major league ballgames on their recent trip to Houston. They saw the Saint Louis Cardinals, the Houston Colts and San Francisco Giants. With them on the trip were their other son and his wife, Mr. and Mrs. Douglas Robison of Spur. They crowded a lot of activity in four days.

They visited the San Jacinto Battle grounds, then drove to Galveston for swimming, boating and sight-seeing. Returning by way of Kilgore they visited Earl's brother and family, the Leslie Robisons, and Mrs. Douglas Robison visited her aunt, Mrs. Clyde Couch and family in Overton.

Mark and Jan Robison visited during the time with their grandparents, the George Hammers at Vernon. When the Douglas Robisons returned to Spur they took Jimmy Robison with them for a visit.

**Trio Vacation in Colo., New Mexico**

Colorado and New Mexico were vacation sites the past week for Mr. and Mrs. Hugo Lutkenhaus and Harold Lutkenhaus.

Monument Lake at Trinidad, Colo., the Indian villages at Taos and the historic sights at Santa Fe including the Governor's Mansion, the oldest church, the miraculous stairway and Kit Carson Park, and visit in Cimarron and Eagle Nest, N. M., were among stand-out attractions.

Going and returning they stopped with Mrs. Oscar Detten and the Fred Dillard at Amarillo. They took Marilyn Detten back home on the way out. She had spent two weeks here with relatives.

Hugo and Gladys returned Thursday after an overnight visit in Wichita Falls with her sister and husband the Roy Plumlee and a visit with another sister and her family, the Chris Jensens. Harold stayed in Amarillo until Sunday and accompanied his sister, Mrs. Detten and children Billy and Marilyn and a friend of Billy's to Muenster. They are planning to spend a week with Mrs. Detten's father, Joe Lutkenhaus and other relatives.

Mrs. Aloys (Billy) Fuhrmann is the former Miss Margie Vogel. The couple's wedding was solemnized in Sacred Heart Church July 25. After their Colorado honeymoon they will be at home at Lindsay. She is the daughter of Mr. and Mrs. Ray Vogel, Muenster, and he is the son of Mr. and Mrs. Willie Fuhrmann, Lindsay.

**U. S. Food Cost Has Not Increased In Past 10 Years**

Attention, disbelieving housewives: Today's cost of food is just about the same as it was 10 years ago!

The Grocery Manufacturers of America, Inc. reports this eye-opening news:

"As measured by the government's standard market basket, the prices of food bought for home consumption this summer average very nearly the same as in the summer of 1952 — despite a 17 per cent rise in the cost of the combined total of all other items in the government's Price Index."

But why do most homemakers insist their food bill is higher today than ever?

Says Paul S. Willis, GMA president:

"First of all, the number of non-food items in grocery stores and super markets has become much bigger. Grocery bills today include many items previously bought elsewhere — for example: cigarettes, magazines, kitchen utensils, garden supplies, hosiery and other articles of clothing. When the husband complains about the bill, he probably doesn't realize that a light bulb might be included in that bill.

"Second, the average family is larger today. There are more mouths to feed; and growing children have a great eating capacity.

"Third, housewives today are more nutrition-minded and quality-conscious than ever. They are buying foods in wider varieties.

"All these things help to make the total grocery bill bigger. But don't blame food pricing. You can feed your family well — with tasty, nutritious and varied meals — at prices that have averaged just about the same for the past ten years."

In other words, says Willis, food is the most consistently stable item in the Consumer Price Index — often popularly referred to as the over-all cost of living index. In fact, when one relates earning power to purchasing power, the factory employee ten years ago worked 51 hours to earn enough money with which to buy the monthly "grocery basket." Today he earns enough in 38 hours.

Nothing, absolutely nothing, cures a hangover. If you feed black coffee to a drunken husband, you will have a wide-awake drunk on your hands instead of a sleepy one.

**Classmates Party Fetes Jo Ann Hess**

Miss Jo Ann Hess, bride-elect of Le Roy Berend of Hereford, was honored Sunday afternoon with a classmates party when Miss Ruth Endres entertained in the home of her parents, Mr. and Mrs. Arthur Endres.

The all-girl gathering featured reminiscence of school days looking at photographs and seeing slides of class day activities. The hostess served punch and cake.

Among those present were Mrs. Virgil Henscheid of Denison and Miss Jane Endres of Fort Worth. Miss Ruth Endres was at home for the weekend. She came from Denton where she is employed as a teller in Denton's new bank. Previously she worked in a Fort Worth bank.

Miss Hess and Mr. Berend will be married Saturday at 4 p.m. nuptial mass in Sacred Heart Church.

**Vacation on Coast Fun for Sixteen**

Six days of beach life with frequent dips in the ocean, and beach combing, provided a carefree vacation for the Ernest Medders and their six children and their guests, Mr. and Mrs. Dick Alsop and five children of Memphis, Tenn., and Debbie Schilling.

The children also enjoyed the carnival attractions and brought collections of sea shells back home with them. Among scenic tours was the coastal drive from Galveston to Port Arthur. The group of 16 was on the coast Monday through Saturday. The Alsop family returned home from there.

Too many automobiles approach the coroner at 80 miles an hour.

**Karl Klement Has Party on Birthday**

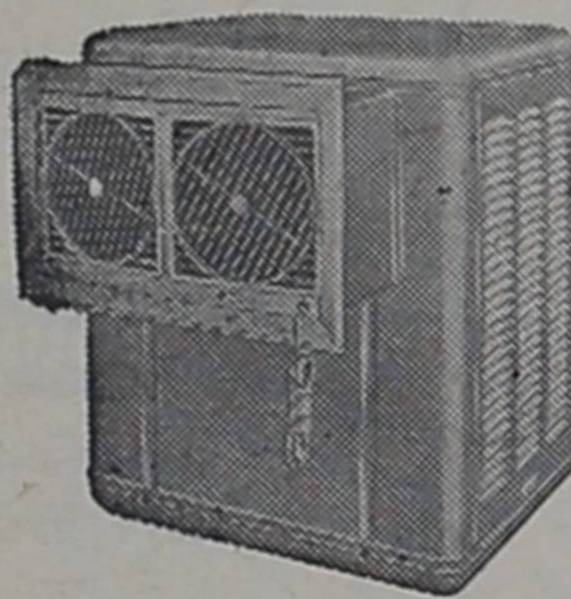

Eighth birthday of Karl Klement was celebrated with an all-boy party. The guests were classmates and cousins. They brought a shower of gifts.

Karl's mother, Mrs. Marty Klement, was hostess and served birthday cake, ice cream and soda pop after games.

So far our drive to collect outstanding debts is like all other drives for money... slow getting started.

One man said he was going to pay us, but it seems his ash trays were full and his tires were wearing smooth, so he was going to use the money he owes us to buy a new car... since we don't charge interest.

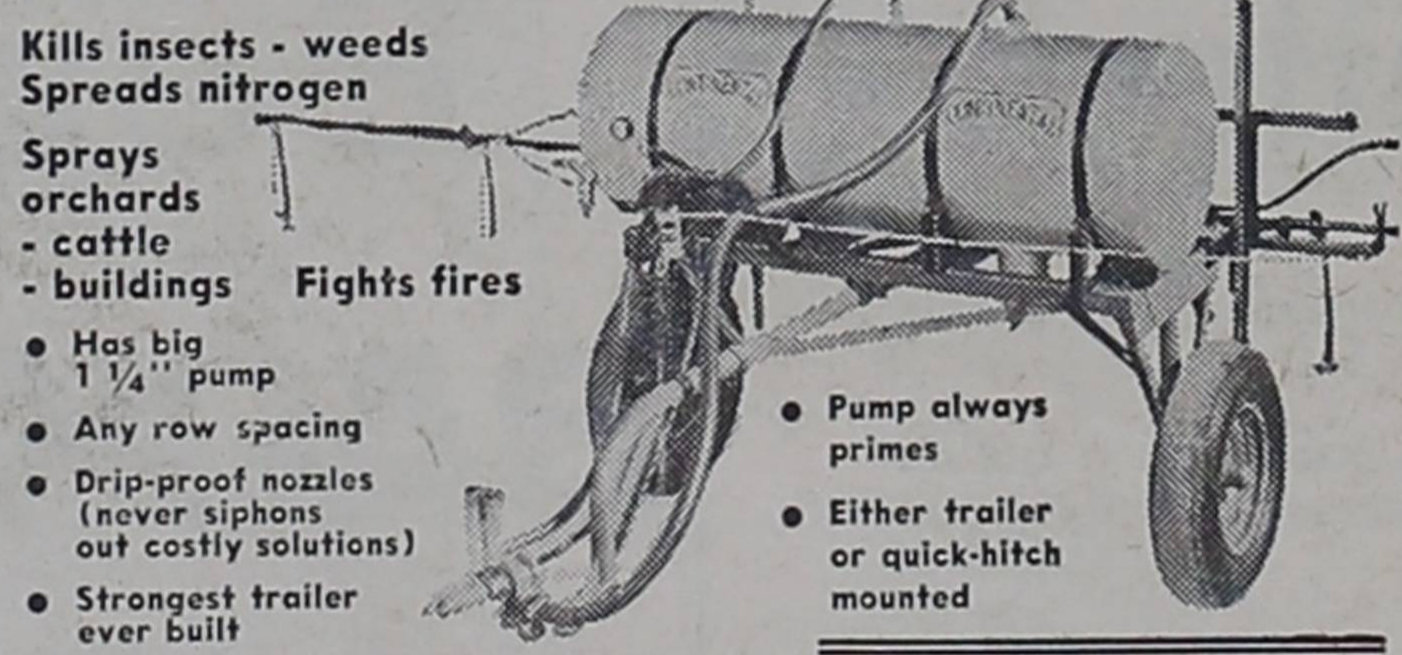

Another phoned and said as soon as he got his hay baled he would be in and pay us in full... then take only one week vacation instead of two.

So, things are looking better, except for those who seem to have borrowed considerable money on a short term loan and their payments are more than their income. If their credit was good enough for a loan surely they could have got it over a longer period of time in order to have enough to pay ALL expenses.

P. S. Today a man came in and paid his bill and wanted to paint us a sign for our front: "In God we trust. All others pay cash."

**Texas Population Passes 10 Million**

State Health Commissioner J. E. Peavy estimates that Texas' population passed the 10,000,000 mark Friday, July 27.

He based his prediction by computing births, deaths and migration since April, 1960. At that time Texas had a population of 9,579,677. Then Texans registered 570,250 births and 176,500 deaths or a natural increase of 393,750.

Assuming that the 1950-1960 rate of migration has continued, 26,500 more people have moved into the state than out, during the calculated period. That would give the state a total population of 9,999,927 on July 26.

Dr. Peavy figured Friday was "10 Million Day", since more than 400 people are added daily by the excess of births over deaths.

## Farm Facts

### New grain sorghums repel birds.

Scientists are evaluating bird-repellent grain sorghums. Growing from seed coverings of test varieties are sharp spines which seem to keep birds from feeding.

Agricultural Research, published by the U. S. Department of Agriculture, reports some of these sorghums have been grown in south Florida and tests are being conducted at Beltsville, Md., and in Mississippi and other states.

An effort will be made to cross sweet sorghums with the grain sorghum strains to learn if widely adaptable bird-repellent sweet sorghums can be produced.

Bird feeding on sorghums is a problem in the South and Southwest.

Agronomist F. T. Boyd, in charge of the Plantation Field Laboratory of the Florida Agricultural Experiment Station at Fort Lauderdale, found the bird-repellency characteristic during tests of hundreds of sorghums.

Blackbirds, rice birds, Eng-

lish sparrows, and Florida grackles left two sorghums strictly alone. By crossing these with others, some 50 strains have been developed with their own built-in bayonets.

few people have an apparent immunity to chigger attacks, but the vast majority of us are oh-so-susceptible.

They — the chiggers — have a special affinity for low, damp places covered with vegetation. Bermuda grass harbors them well, but for some unexplainable reason they are not usually found in carpet grass.

Just for the record, it's the larvae which do the damage, attaching themselves with their mouthparts and sucking blood until they become engorged and fall off. The fiery itching is caused by an anti-coagulant material they inject into their host.

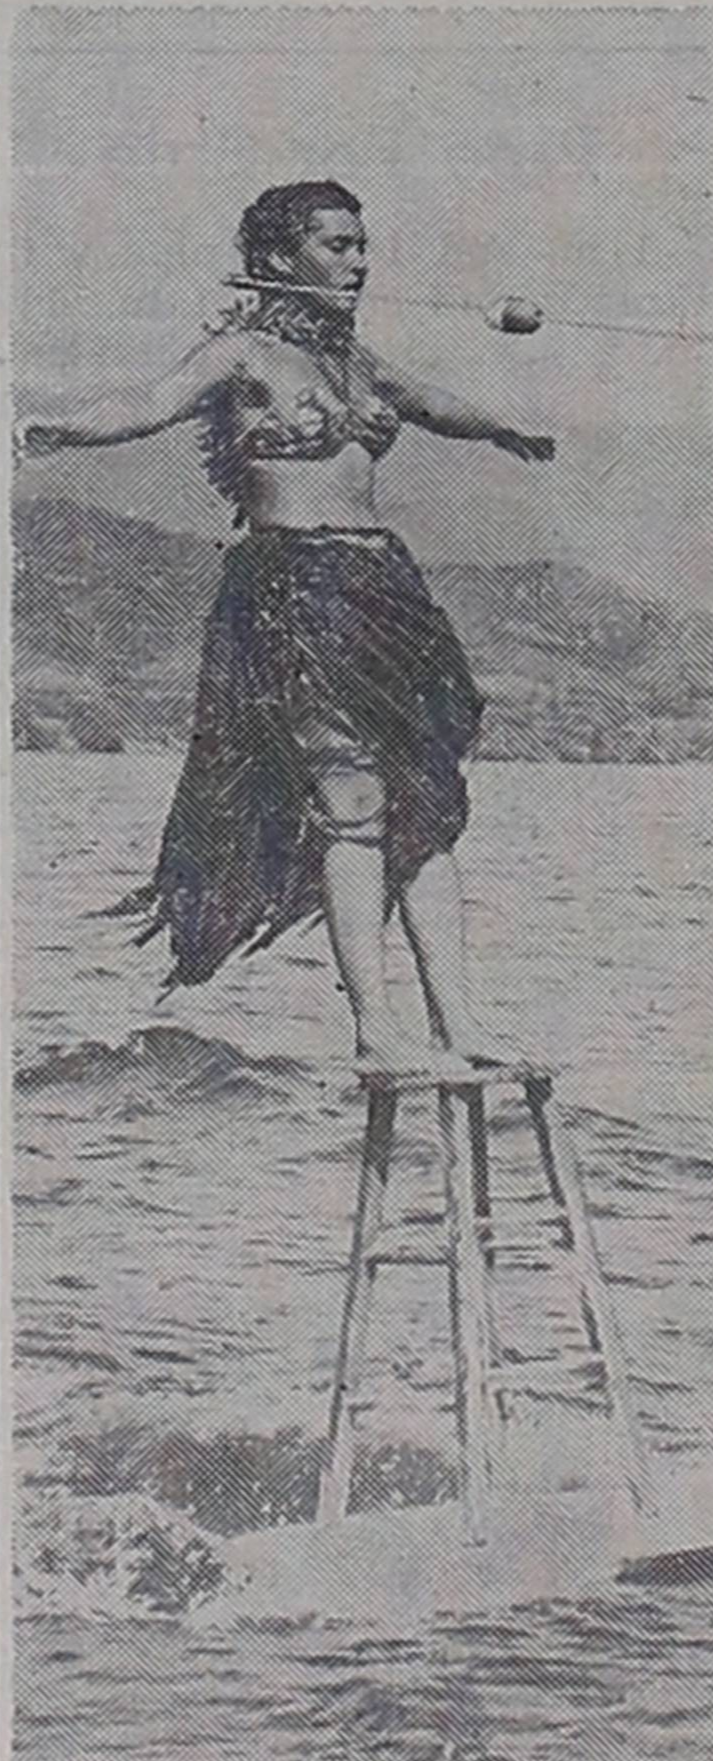

Although adult chiggers — large, red and velvety — are probably harmless to humans, their wayward offspring can be serious as well as annoying. Not that they spread any specific disease — at least not in this country — but their bites demand scratching which frequently causes secondary infections in the form of sores and boils.

To learn where chiggers are harboring, stand a piece of black cardboard on end where you suspect their presence. If after a few moments you see tiny yellowish or pinkish mites accumulating on the upper edge, you know it's time to check your supply of insecticide.

Chiggers attack lizards, snakes, birds, and rodents with the same vigor and resourcefulness they display in attacking humans. No distinction is drawn between man and lesser animal species, which is hardly complimentary to us Homo sapiens. Light applications of sulphur dust on lawns and low branches of shrubs have been used successfully for years to control chiggers. Nowadays, the new insecticides such as chlorodane and lindane give better results. Just follow the directions on the label.

A quick word of caution: Be sure to avoid unnecessary exposure to the insecticide. If you spill the concentrated material on your skin, wash it off immediately. And be sure to keep children and pets out of the yard until the spray dries.

"I did what you said . . . now I've got two skunks in my cellar."

Proposed CONSTITUTIONAL AMENDMENT NUMBER FIVE ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 6, 1962.

HOUSE JOINT RESOLUTION NO. 51 proposing an Amendment to Article IX of the Constitution of the State of Texas, to be known as Section 9 to provide that the Legislature may authorize the creation of hospital districts composed of all or part of one or more counties; the assumption by the district of any included city, town or county hospital indebtedness and the transfer of all hospital facilities thereof to the district; the issuance of bonds for hospital purposes and the levy of taxes to pay the district's bonds, assumed indebtedness, and for operating and maintaining the district; providing other terms and conditions for accomplishing the purposes of this Amendment.

Section 1. That Article IX of the Constitution of the State of Texas be, and the same is hereby, amended by adding thereto another Section to be designated as Section 9, which shall read as follows: "Section 9. The Legislature may by law provide for the establishment, maintenance and operation of hospital districts composed of one or more counties or all or any part of one or more counties with power to issue bonds for the purchase, construction, acquisition, repair or renovation of buildings and equipment and to equip same, for hospital purposes; providing for the transfer to the hospital district of the title to any land, buildings, improvements and equipment located wholly within the district which may be jointly or separately owned by city, town or county, providing that any district so created shall assume full responsibility for providing medical and hospital care for needy inhabitants and assume the outstanding indebtedness incurred by cities, towns and counties for hospital purposes prior to the creation of the district, if same are located wholly within its boundaries, and a pro rata portion of such indebtedness based upon the then last approved tax assessment rolls of the included cities, towns and counties if less

than all the territory thereof is included within the district boundaries; providing that after its creation no other municipality or political subdivision shall have the power to levy taxes or issue bonds for hospital purposes or for providing medical care within the boundaries of the district; providing for the levy of annual taxes at a rate not to exceed seventy-five cents (\$0.75) on the one hundred dollar valuation of all taxable property within such district for the purpose of meeting the requirements of the district's bonds, the indebtedness assumed by it and its maintenance and operating expenses, providing that such tax authorized unless approved by a majority of the qualified property-taxpaying electors thereof voting at an election called for the purpose, and providing further that the support and maintenance of the district's hospital system shall never become a charge against or obligation of the State of Texas nor shall any direct appropriation be made by the Legislature for the construction, maintenance or improvement of any of the facilities of such district. "Provided, however, that no district shall be created except by act of the Legislature and then only after thirty days of public notice to the district affected, and in no event may the Legislature provide for a district to be created without the affirmative vote of a majority of the taxpaying voters in the district concerned." "Section 2. The foregoing Constitutional Amendment shall be submitted to the qualified electors of the State at the General Election to be held the first Tuesday after the first Monday in November, 1962, at which election all ballots shall have printed thereon: "FOR the Constitutional Amendment authorizing the Legislature to create hospital districts and prescribing limitations upon the powers of such districts." "AGAINST" the Constitutional Amendment authorizing the Legislature to create hospital districts and prescribing limitations upon the powers of such districts." "Section 3. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this State.

Over \$20 Million Loaned by FHA for Housing in Texas

Mr. L. J. Cappelman, State Director of Farmers Home Administration, recently stated, "The Rural Housing Loan Program was started in Texas some twelve years ago and the records show the success of the Program. Up to December 31, 1961, some 2,730 loans have been made and not one penny has been lost or written off as uncollectible."

"More than \$20,440,000 has been advanced in Texas in Rural Housing Loans and the principal and interest payments made total over \$8,845,000. Over 24 percent of these loans have been paid in full. Payments of principal and interest on the 2,064 loans outstanding total over \$4,561,000, or 104 percent of the amount that has become due," Mr. Cappelman said.

"This is a remarkable tribute to the financial integrity of rural families and their ability to manage their financial affairs," the State Director said. "Loans under this program are made only to those who cannot obtain financing from conventional sources. As a result, the 2,730 Texas families who obtain these loans have had to be extra diligent in meeting their repayment obligations."

"This repayment record of rural housing loan borrowers is also a tribute to the judgement of the 654 Texas FHA County Committeemen who assisted in evaluating the soundness of these loans," the State Director said.

"This program provides benefits throughout the entire rural based small town economy and the overall economy of these counties," he added. "Contracting contractors, and building trades workers all benefit through increased business. Their stepped-up activity in turn stimulates the entire rural economy. The approximate \$4,800,000 the Farmers Home Administration in Texas will make available this year is the equivalent of several new industries in terms of more jobs and greater purchasing power."

A survey made in an Alabama County showed that the \$281,906 loaned to 28 borrowers under the Rural Housing Program in 1961 provided 37,324 hours of work to local labor, and \$195,720 for the purchase of electric supplies, bathroom supplies, and other building materials. Of this amount, \$81,620 was spent for materials produced or manufactured in the county, such as lumber and cement blocks.

Proposed CONSTITUTIONAL AMENDMENT NUMBER FOURTEEN ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 6, 1962.

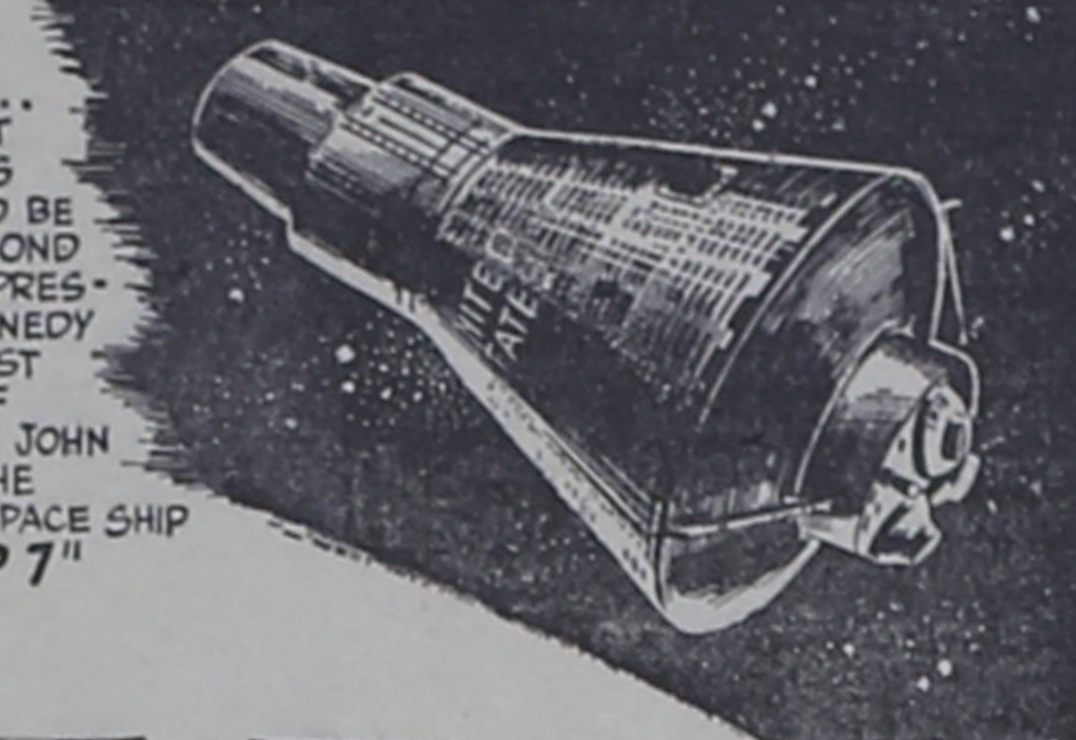

HOUSE JOINT RESOLUTION NO. 32 proposing an amendment to the Constitution of the State of Texas to authorize the Legislature to provide for trial de novo on all appeals to the courts from actions, rulings or decisions of administrative agencies and executive departments of the State of Texas or any of its political subdivisions.

Section 1. That the Constitution of Texas be, and the same is hereby amended by adding thereto another Section to be known as Section 2, which shall read as follows: "Section 2. Notwithstanding any other provision of the Constitution, the Legislature shall have the power, by general law, to provide for appeals to the courts from any and all actions, rulings or decisions of administrative agencies and executive departments of the State of Texas or any of its political subdivisions, under such provisions and limitations as the Legislature shall deem necessary and desirable; and the courts of Texas shall have no power or authority to refuse, deny, or change the manner of such appeals, if brought in the manner provided by general law, even though such appeals shall be provided de novo as that term is used in appeals from Justice of the Peace Courts to County Courts; and should the Legislature provide for such appeals, they shall be tried completely de novo and independent of any administrative or executive action, ruling or decision, and shall comply with such general law and shall hear and determine such appeals in the manner and under the conditions prescribed by the Legislature, even though such action on the part of the courts involves administrative or executive rather than judicial powers; provided, however, in the absence of legislative enactment subsequent to the adoption of this amendment, all such appeals shall continue to be prosecuted in the manner now provided by law, as interpreted and applied by the Appellate Courts of Texas on the date of the adoption of this amendment, and no change in the manner of such appeals shall be effected except by legislation enacted subsequent to the adoption of this amendment."

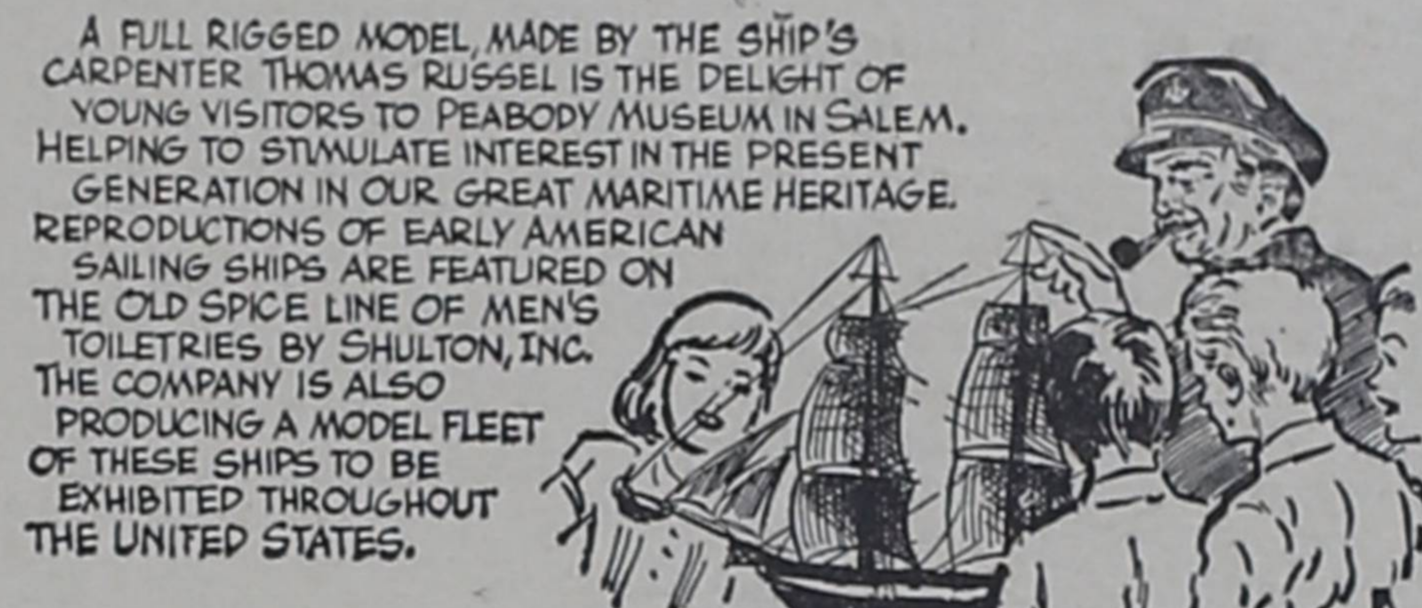

"Section 3. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this state at an election to be held throughout the State of Texas on the first Tuesday after the first Monday in November, 1962, at which election all ballots shall have printed thereon the following: "FOR the Amendment to Article VII of the Constitution of Texas, by adding thereto Section 3-b providing that taxes or bonds previously voted in any Independent School District, the major portion of which is in Dallas County, shall not be abrogated, canceled or invalidated by any change in boundaries and authorizing the continuance of the levy of taxes after such change without further election." "AGAINST" the Amendment to Article VII of the Constitution of Texas, by adding thereto Section 3-b providing that taxes or bonds previously voted in any Independent School District, the major portion of which is in Dallas County, shall not be abrogated, canceled or invalidated by any change in boundaries and authorizing the continuance of the levy of taxes after such change without further election." If it appears from the returns of said election that a majority of the votes cast were in favor of said Amendment, the same shall become a part of the Constitution and shall be effective on and after the date of its adoption. "Section 4. The Governor shall issue the necessary proclamation for said election, and shall have the same published as required by the Constitution and laws of this state.

First train trip for Monica and Bobby Hartman was a thrilling experience during the weekend. The children and their mother, Mrs. Alvin Hartman, went to Waco Friday to meet their daddy and husband there Friday after the close of the firemen's school which Mr. Hartman attended at A&M College. They were guests of Mr. and Mrs. Jerry Fette until Sunday afternoon. On the car trip back to Muenster the Hartmans stopped for pop calls with the Keith Topkins family at Arlington and the Gene Hartmans at Denton. Baby Kenny Hartman stayed with his aunt and family, the Sylvan Walterscheids, while his family was away.

The tired businessman was reading his paper one evening while his wife knitted. "Henry," she purred, "why don't you read to me while I knit?" "I have a better idea," he suggested. "You knit to me while I read."

### Confetti . . .

But notice what might have been avoided in Southeast Asia if Red China had been stopped when the time was right. Communism can wear out in Cuba, too, but look what can happen in Latin America before Cuba folds up. Look what can continue in Southeast Asia and Latin America for years after China and Cuba straighten out.

Above all, look what can happen in this country if our government fails to adopt a positive policy on God's side in this global struggle with the anti-Christ. What's to become of our ideals, our integrity, if we keep shirking our duty? The time is past for us to say shame on the reds for their treachery. Since long ago it's a case of shame on us for our weakness.

Men, more than women, are afflicted with color blindness.

### Average Size and Value of Farm in Texas Gets Bigger

The average value per farm in Texas increased from \$48,378 to \$64,950 between 1959 and 1962, according to C. H. Bates, economist of the Texas Agriculture Extension Service. In this same period, the average size of farms increased from 631 to 710 acres. This year the land on the average Texas farm is worth \$59,302. Buildings are worth an additional \$5,648. The average value for land and buildings is about \$91 per acre, he said.

The rate of sales of farm land accelerated some during the last year also. The number of farm title transfers in Texas rose from 518 per 1,000 farms in 1960-61 to 582 in 1961-62.

A study by USDA's Economic Research Service shows the average value per acre of farm real estate reached a new high of \$123 per acre in the U. S. in 1962, 5 percent higher than in the previous year. The average farm has 336 acres, and is worth \$41,400. About \$32,800 of this is accounted for by land, and the balance, \$8,600, by farm buildings, Bates said.

### Catholic League -

cline of US prestige and gains for the communists in Latin America.

Mrs. M. J. Reesby of Sherman spoke on Rural Life, urging continuation of the family size farm and halting the federal policies that encourage the trend to big industrial farms.

Mrs. Carol Sutton of Westphalia asked her audience to keep better posted on religious matters. Most Catholics know only what they can remember from their study of catechism in school. For their own information as well as to have answers ready for inquiries, Catholics should be more familiar with their religion, she said.

In its closing session Monday morning the Catholic State League selected San Antonio for next year's convention. It also adopted resolutions reminding Catholics to pray for success of the Ecumenical Council opening October 11 in Rome, and to study the much publicized social encyclical "Mater et Magistra" issued last year by Pope John. Other resolutions dealt with "Christianity or Secularism", birth control, obscenity, modesty of dress, equal rights for women and farm legislation.

Father George Weber of Des Moines, Ia., executive secretary of the National Catholic Rural Life Conference, headed the session on rural life. He said that God gave man dignity, responsibility, ingenuity and initiative . . . factors which should be included in any farm program and are essential in protecting the "family size farm" which he described as large enough to provide a decent living for the owner and his family. Father Weber also presented awards to six boys and six girls in two divisions of a state essay contest on "Why Beautify the Home and Its Surroundings", also one award in a national essay contest on "God-Home-Country."

Visitors three days the past week with homefolks were Mr. and Mrs. Charlie Morris and children Wayne and Becky of Panhandle, Texas. They were with her mother, Mrs. Frank Kathman and family and with his parents, Mr. and Mrs. Lee Morris. The visitors and the Lee Morris spent one day at Lake Texoma.
