If the American Farm Bureau has its way, federal bureaucracy is due to have less rather than more control over the nation's agriculture program. As pointed out relative to the approaching wheat referendum, the real issue for farmers to decide is this: "Is government supply management going to be the future way of life of the American farmer? Who will manage your farm — you or the federal government?"

As the FB explains, wheat farmers are being told that their vote amounts to a choice of \$2 or \$1 wheat, which actually is a myth designed to scare farmers into supporting the scheme. And then the FB proceeds to show that the big price under the plan applies only to certificate wheat but not the remainder of one's crop, also that deliberate manipulation, not the present law, is the only way price could be dropped to \$1.00. And FB doubts that vindictive bureaucrats could go far in that direction while leaders of the agricultural freedom movement keep Congress alerted to the real situation.

The big objection to the program is that it is the beginning of a "supply management" philosophy under which all of agriculture would eventually come under control of the federal government. USDA would manipulate the prices, but in doing so it would specify how much of each commodity could be produced, and local USDA offices would have the assignment of dividing allotments among the farmers. Imagine awaiting orders from Washington every year, then growing what and how much one is told to regardless of his preference.

Supporters of the program claim the supply management feature applies only to wheat, but they have been refuted long ago by the man who master minded the scheme, Dr. Willard Cochrane, Director of Agricultural Economics, USDA. In the Wall Street Journal of March 6, 1961, he admitted that the goal is to extend control, commodity by commodity, year after year, to yield prices in the market that have already been determined fair by some responsible agency.

Putting it plainly, the nation's farmers year after year would be dependent on calculations and manipulations of USDA brain trusters — for income as well as assignments. When control becomes that complete can anyone still say that farmers are free?

A sad feature about the whole situation is the fact that it involves a complete reversal of the proper function of government. Farm Bureau is calling upon wheat farmers of the country to rise in revolt against the arbitrary rule of men who supposedly are their servants. USDA personnel are the hired hands of the Secretary of Agriculture, who is appointed by the President and approved by the Senate. Even though appointed, those men depend on the process of elective procedure. They depend on us, the voters. They are our employees. But they have already gone far in being bosses, and are trying to go much farther.

Absurd as it seems, the real significance of Farm Bureau's present campaign is to warn American farmers that they are in danger of being enslaved by their own hired hands — that the men whose original job was to assist farmers with control of drought, disease, erosion, etc., are primarily concerned now with the control of farmers. We hope FB will be able to convince enough people what happens to them when government gets more control and more power. Experience should convince wheat farmers that they already have had more than enough headaches, and even more headaches will come when they submit to more controls.

At the same time they are urged to remember that beef producers on an average have done very well during the past few decades. Cattlemen proved that financial success in farming is not necessarily hindered by freedom. The security of price support is not so precious that men must compromise independence and integrity to attain it. Common sense gets along quite well by just going along with the law of supply and demand.

Closely related to this subject is a news item reported a few days ago by Paul Harvey — an item that's disturbing in more ways than one. (Continued on page 8)

Cler. Galloway Elected Trustees In Quiet Election

The trustee election for the Muenster School District last Saturday turned out as expected. Neither of the two unopposed candidates had any trouble getting in, and the election got very little attention.

Only 33 ballots were cast out of the possibility of several hundred. Those few who voted went unanimously for Ed Cler but Joe Galloway received only 31 votes. Apparently two voters thought they were to choose between the two, therefore scratched a name. No one was written in.

Two unopposed candidates on the county school board likewise sailed into office. A. T. Strader was reelected Precinct 3 representative on the county board. Joe B. Hundt was re-elected Precinct 4 representative.

Other members serving with Cler and Galloway on the Muenster school board are Charley Hellman, Jerome Pagle, Urban Endres, Ray Wilde and David Trachta. A hot election, 88-80, at Lindsay favored Julius Hermes Jr. over the incumbent Ed Schad for the board's only position. At Myra Johnny Barthold unseated Roy Townsley 35-13 on the board and Jake Huddleston was re-elected with 35 votes.

Special Services At Sacred Heart For Holy Week

Three days of special church services will mark the observance of Holy Week in Muenster's Sacred Heart Church.

A mass and ceremonies Thursday night will commemorate the Last Supper and institution of the Blessed Eucharist. To avoid crowding, the pastors obtained diocesan permission to hold the service twice: at 10:30 for school children and in the evening for adults at 7:30.

Good Friday service, commemorating the passion and death of Christ, will begin at 3 o'clock. Another observance of the crucifixion is a two hour shut-down, between 2 and 4 of all business activity. Following a custom of many years, all firms are expected to comply with the mayor's proclamation. Members of the parish were reminded in last Sunday's bulletin that Good Friday is a day of strict fast and abstinence.

Holy Saturday services will usher in the Easter season. Beginning at 7:30, it includes blessing of Easter fire, Easter candle, and holy water followed by the mass of the Resurrection.

Services on Easter will follow the usual Sunday schedule.

Jinx Hangs on as Tigers Drop 13-3 Contest to Era

That jinx is still hanging over the Sacred Heart Tigers baseball team. Monday they were clobbered 13-3 by Era in a five inning game.

For the first three innings the Tigers finally seemed to be breaking their losing streak. They were ahead 3-0. Then Era went wild and brought in 10 runs in the fourth. Next inning the visitors brought in 3 more, making a 10 run lead at the end of the fifth.

Francis Fuhrmann and David Bayer divided the Tiger pitching duties, allowing 10 hits between them while SH fielders made 5 errors. The Tigers got their runs on 5 hits and 4 errors.

Dennis Hess led Tiger hitting with a single and a triple.

Bond Issue for Hospital Funds Being Prepared

While solicitations continue for the hospital fund, directors of the Muenster Hospital Authority now are looking toward the additional money that will be needed to finish the building job.

In a special meeting Monday night they started the paper work necessary for a bond issue to raise the funds. They will meet again next week Thursday to work out details with representatives of a bonding company.

The intention of the directors is to print the bonds promptly. Another intention is to get in all possible donations so that some of the bonds will not need to be sold.

Since the current drive started the fund has been increased by about \$6,000, and only a small fraction of the area potential has been contacted. Directors are confident that remaining possibilities will bring in many more donations, some of them substantial.

Workers have been meeting every Thursday to turn in donations and get assignments for their next contacts.

Parish Will Have Annual Picnic on Easter Monday

This community's traditional Easter Monday get together will be held next Monday at the Parish Hall under sponsorship of the Muenster K of C council. Former residents as well as friends and relatives of Muenster folks and knight of the Gainesville council are all included in a general invitation to come and join in the fun.

It will be a benefit affair, with the Council and Sacred Heart Parish splitting the benefit. The parish share will go into the building campaign fund and the council's share will be used on a fix-up and paint-up project.

Festivities begin about 2 o'clock with a picnic featuring eats and drinks and the usual concessions. Dinner will not be served, however barbecue sandwiches will be available all the time and barbecue plates will be served at supper time.

A special event will be a white elephant auction at 6. The picnic committee is giving it special attention, particularly looking for antique items. It also invites friends to check through attics and bring in things that are no longer in use but can be useful to others. All donations will be gratefully accepted. A good crowd at the auction is eagerly encouraged.

The dance in the parish hall will have Sid King and All the King's Men as music-makers.

WE DON'T LIKE FORCED LABOR

Jonathan B. Morgan of Balboa, comes up with an idea that should find favor with every merchant in town: Charge a fee for our services as tax-collecting agents for the government. We are now unpaid agents of the govern-

ment, collecting personal income taxes, sales taxes, excise taxes and other levies — and at considerable expense, because it requires detailed reports, records, and more reports. I don't believe even the most wild-eyed liberal can make a good constitutional case for forced labor without pay.

This should be a good project for chambers of commerce throughout the nation — with the cooperation and leadership of the National Chamber — to put an end to what can justifiably be called involuntary servitude.

Adoption of the Liberty Amendment would help. Corona del Mar, Calif., Ensign

Two score and ten years ago our fathers brought forth upon this nation a new tax. . . . Now we are engaged in a great mass of calculations, testing whether that taxpayer or any taxpayer so confused and so impoverished can long endure.

HOW TO SOLVE A MURDER

By Harry Browne

Every few days, we hear that an American soldier or two has been killed in the war in South Vietnam.

As you know, our soldiers are there to help defend South Vietnam against the Communist guerrilla attacks from North Vietnam. The fact that the Communists are the aggressors is obvious — and so the death of Americans can be correctly labeled as murders.

But how is it that the Communists are able to continually probe into free world defenses? How do they finance their many aggressions — in Laos, Berlin, Korea, etc.? Are there accessories to these murders that we don't know about?

Accessories in Fact

Yes, there are. The North Vietnamese aggressors are receiving help in the form of foreign aid from Communist Poland. This aid has been going on for some time now and provides the Communist guerrillas with all the equipment and facilities necessary to carry on their war against South Vietnam and our American soldiers.

But how can Poland finance such a war? They are a Communist country, too. And all Communist countries have their hands full just feeding their own people. Where do they get the money with which to help North Vietnam slaughter our soldiers?

And here's where the rub comes in. They get it from us!

For several years, we have been giving foreign aid outright to Communist Poland. Now the Poles are using that aid to finance a war against us in South Vietnam.

We Finance Murder

And so we are the accessories to the murders of our own soldiers in South Vietnam. We are financing a war against our own country. We are paying for the assassination of our own sons and brothers. Does this make sense?

If it doesn't make sense to you, then perhaps you should look deeper. Consider the fact that we have virtually armed the Yugoslavian Army and Air Force. Consider too that we have sold the Soviets critically-needed machine tools — without even receiving cash for our trouble.

We have allowed the Communists to steal our nuclear secrets. We have sold them wheat at cutrate prices — shared our agricultural know-how — and fought their enemy for them in Katanga.

Our Power to Stop it

There's a simple, powerful way to stop all of this. To force the Communists to live off their own impractical system — and not off the fruits of our abundance — we must stop helping them.

The way to do this is to break off all diplomatic re-

THAT WRENCH IS HERE AGAIN

FRIENDLY ADVICE IGNORED

In their mad pursuit of the 35-hour-work-week leaders of the AFL-CIO are not only riding roughshod over the public interest but are completely ignoring the advice of some of their best friends.

President Kennedy, Secretary of Labor Wirtz and Supreme Court Justice Goldberg (to name but a few) have all attempted to disabuse the union bosses of their fallacious belief that a shortened work week was a panacea for the unemployment problem.

These public officials, in the main, seconded the arguments of industrial management that the pressure-packed drive for the cut in hours could prove extremely detrimental to the country's economic well-being, and actually increase unemployment.

That's because what the unions are after is not so much a lessening in work hours as it is a sharp increase in pay. They want the statutory work-week reduced from 40 hours to 35, with double-time (instead of time and one-half) for all hours worked over 35. This would mean an increase of 28.5 per cent in the effective wage rate for a 40-hour week. Even a straight 35-hour week at 40-hour pay would boost wages by 14.3 per cent.

With the current high labor costs already exerting a terrific squeeze on profits it could be disastrous to saddle industry with such an onerous burden. Not only industry but every American — through sharp rises in living costs — would be the victim of the union's power-play.

If the union's formula for curing unemployment is so infallible why stop at a 35-hour week? Why not drop to 20 hours or even 15? Ridiculous? Of course, but no more so than the "logic" advanced by the AFL-CIO leaders.

lations, trade and aid with all Communist countries — including the Soviet Union. This will put an end to the folly of financing our own destruction.

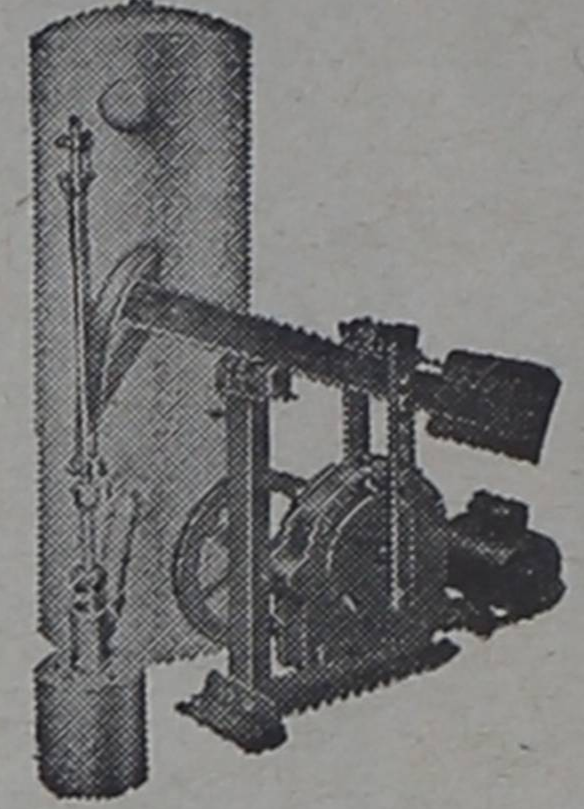

In fact, it's obvious that the Communists couldn't last six months if we were to stop doing business with them. For in no time at all, a combination of weakening Communist governments and inspired captive peoples would destroy the Communist empire from within.

Let's quit being accessories to the assassination of America. Let's tell our government to break off all relations with the Communist countries — so that we may soon begin to live in an era of true peace and brotherly love.

Program on Flower Arrangement Given For Garden Club

A program on flower arrangement was presented to members of the Muenster Civic League and Garden Club at their April meeting Monday night when Mrs. Ted Gremminger and Mrs. Earl Fisher were co-hostesses in the Gremminger home.

Miss Doris Vavra gave the flower arranging demonstration fashioning a triangle design in two shades using lavender and purple lilacs and iris. She explained as she worked and handed out mimeographed pamphlets on the subject. She also showed a number of permanent flower arrangements.

Eighteen members, including Mrs. Kenneth Dobbs, a new member, were present.

Mrs. L. B. Bruns presided for the business session and committee chairmen gave reports. Mrs. Tony Gremminger told about cemetery maintenance and said that 30 cedars and 11 Santolinas have been replaced and that water pipes have been repaired.

Mrs. Earl Fisher, chairman of the Sanitation Committee, read a petition to be presented to the city council concerning unsanitary conditions within the city and ever-present fire hazards especially the burning of trash. The petition asks the mayor and city council to study methods to improve these conditions; also to consider the feasibility of a trash and

garbage pick-up service.

Mrs. Joe Luke discussed ways to control weeds in established lawns. She also showed a number of fancy Easter eggs she had decorated as story book characters.

Mrs. Bruns reminded members of the Flowercade in Fort Worth April 24-27.

The hostesses carried out the Easter theme in refreshments and used spring flowers in decorating the meeting rooms.

In May, Mrs. Tony Gremminger and Mrs. Victor Hartman will be co-hostesses. Mrs. Earl Fisher will present a program on wild flowers and new officers will be installed.

Tips From Your Hatchery

With "Easter Feast" time coming real soon, better remind you that we sure have some young hens and bakers available for you. You know you can feed more people cheaper and better with chicken than with any other meat.

Young Cornish Rock pullets that dress out over 4 pounds are 28 cents a pound in lots of six or more, bagged and ready for your freezer or locker. Then, of course, we have those good young bakers. They are the same price. Or if you like lots of fat to make the "extras", we have year old hens that are really good. If you don't have room for six, you can get one from Maurice or Fisher's.

If you really care for your roses you will give them a once-a-week dusting with Ortho rose dust. We have the refills for your plastic squeezer. If you don't have one try borrowing your neighbor's. Or call us. We might sell you one. Happy Easter! — Clive

Farm Facts

While there is controversy concerning the use of agricultural chemicals and general agreement among scientists that more research is needed on their toxicology, there doesn't seem to be any justifiable reason for eliminating their use.

This is the opinion of Dr. V. H. Freed of the Department of Agricultural Chemistry, Oregon State University.

He notes that less than 5% of our land is receiving an appreciable amount of treatment with these materials, that the safety record has been remarkably good, and that there is no acceptable substitute for them.

"The choice that seems to be facing us," says Dr. Freed, "is whether we will continue to accept an insignificant risk in the use of these chemicals or face a disastrous loss in food production—resulting in high prices and the prospect of starvation and the threat

of virulent outbreaks of insect-borne disease.

"The intelligent use of chemicals can avoid this and at the same time offer no substantial hazard to wild-life or man."

Sunshine Club at Myra Entertained

Mrs. Ray Hudson used a touch of Easter in home decorations when she entertained the Myra Sunshine Club for the monthly meeting. Three new members were added: Mrs. Alois Trubebach, Mrs. Max Love and Mrs. Johnny Barthold.

Mrs. Joe Bezner Jr. Heads Craft Club Group at Lindsay

Officers for a new year were elected and three new leaders were welcomed at the April meeting of Lindsay Craft Club leaders group. The Monday afternoon session was held in the home of Mrs. Al Bengfort.

Heading the leaders group as new president is Mrs. Joe Bezner Jr. who joined the group at the meeting; Mrs. Al Bengfort was reelected vice president; Mrs. Bob Lutz continues as treasurer; Mrs. Norbert Rohmer was elected new secretary and continues as Gold Bond chairman; and Mrs. Gene Owen was named historian.

The other new leaders welcomed are Mrs. Harold Schmitz and Mrs. A. J. Felderhoff.

Other business at the session included discussion of plans for a benefit dance June 22. Details will be worked out at future meetings.

After adjournment, Mrs. Bengfort served iced tea and cookies.

Next leaders meeting will be held Monday, May 6, 1:30 p.m. in the home of Mrs. Joe Bezner Jr.

Sixty Report for Craft Club Meet

Lindsay Craft Club members — some 60 of them — spent a busy hour and a half Monday working on their projects during their regular April meeting. Four new members were welcomed.

Mrs. Al Bengfort's group made clothes hangers, then wood-burned names and designs on them. Mrs. Ray Laux directed her group in making wooden magazine racks or paper baskets. The group with Mrs. Gene Owen, Mrs. Bob Lutz and Mrs. Norbert Rohmer as leaders painted cup towels with ball point paints. And Mrs. Vincent Zimmerer, taking Mrs. Andy Arendt's place, supervised her group. They used ball point paints inscribing mottos on slab sticks. All groups made use of the tools and jig saws obtained through Gold Bond points.

Commenting on managed news, which he prefers to call plain lying, he recalled an official report that over-production of beef is the cause of a recent decline in cattle prices. That, he added is a lie. The cause was importing foreign beef in competition to our own. The surplus which depressed prices was shipped in, not grown here.

This column goes along with him on that. Our own stockmen deserve first consideration as suppliers of meat. If a surplus occurs the importer, not the home grower, should get the blame. Furthermore this column thinks, like Harvey, that the news manager who gave the report gave a false picture of beef production.

Next question is why did he present the false picture? Is this a government managed scheme to discredit the livestock industry, which has been very successful in getting along without federal snooping? And more questions: Who was responsible for the beef imports? Was that a scheme to cause trouble in the livestock industry?

34 Craft Clubbers Make Train Trip

Still talking about their train trip are members of the Lindsay Craft Club who recently made a round trip from Gainesville to Ardmore. Thirty-four youngsters and six leaders were on the Saturday excursion. For many it was their first train ride.

Accompanying the children were Mmes Al Bengfort, Ray Laux, Bob Lutz, Gene Owen, Norbert Rohmer and Joe Bezner Jr.

Let's hike right back to sane government practices in which we realize that we cannot go on spending more than we are making — that we cannot borrow ourselves out of the poor house, that we cannot postpone a day of reckoning forever and ever, that the only way to prepare for the future is to meet and conquer the challenges of today.

TOTAL PERFORMANCE:

FORD GALAXIE 500/XL SPORTS HARDTOP

YOU'LL KNOW WHY FORD SWEPT THE FIRST FIVE PLACES AT DAYTONA...WHEN YOUR '63 FORD IS STILL GOING STRONG YEAR AFTER YEAR

Daytona's big, banked oval puts unbelievable stresses and strains on engines, steering gears and frames. The Fords that won at Daytona took all the punishment this famous track could dish out over 500 miles of grueling competition without missing a beat.

In this toughest of all stock car events, mechanical failures claimed over fifty per cent of the starting field. But of twelve Fords entered, nine went the distance. Ford took six of the first ten places.

Five-hundred-mile events like Daytona are a public demonstration of toughness, reliability and sheer engineering excellence that are part of the new generation of Fords. A test like this can't be duplicated on anybody's testing grounds—it's run right out in the open. Any car can enter. But only the car that has the best total combination of strength, balance, precision

control and road-clinging suspension can win... that's what we mean by total performance.

Visit your Ford Dealer before you buy any other new car. Here's what you'll find: a new kind of total-car durability, a new kind of handling ability, a suspension that is startlingly smooth yet sticks to the road like tar. If you haven't driven one lately, you can't really know what a new Ford is like. Remember, if it's built by Ford, it's built for performance... total performance!
