

# MUENSTER ENTERPRISE

VOLUME XIII

MUENSTER, COOKE COUNTY, TEXAS, NOVEMBER 4, 1949

NUMBER 50

Last week this column mentioned a few reasons why, in its opinion, the voters of Texas in the election of November 8 should reject the amendment "relative to sessions of the legislature and to the compensation of its members."

But that is only one of the amendments appearing on the ballot. This week our purpose is to present all of the issues with a reminder that amendments approved next Tuesday will become permanent laws of the state. If they're good we want to have them but if they're bad we're equally interested in avoiding them. Hence it is important to give them serious thought and vote accordingly on election day.

Here are the proposed amendments in the order they will appear on the ballot.

**HJR No. 19 "FOR . . . and AGAINST the constitutional amendment authorizing the legislature to provide for Civil Service in counties upon a vote of the people therein."**

Since this amendment applies only to counties of 75,000 population or more it does not concern Cooke County, at least not yet. Notice also that it will become effective in those counties only after it has been adopted by the voters. That makes it a local option proposition and, on the principle that small units of government should have the right to run their own affairs this column believes the opportunity of choice should be made available to them.

However, considering the merits of the amendment itself, the negative vote seems better. Why set up a separate board or commission . . . to be supported by taxes . . . to exercise jurisdiction over all appointed employees? It looks like unnecessary expense and red tape. Elected officials are already handling their own employment. Of course there are things to be said in favor of the civil service system. Applicants must have a certain rating, so it's assumed that only capable people will be employed. Also they stay on when the administration changes. That eliminates some inefficiency.

On the other hand the administrator who cannot hire and fire has less control over his helpers. Undesirables will be hard to get rid of and desired helpers may be hard to get on the payroll. It seems only fair that the man who is responsible for the successful operation of an office should have the necessary control over his employees. By the same token it seems somewhat foolish to provide a convenient excuse for an official who lousies up his job.

There are pros and cons on the issue so the better course apparently is to retain the one which costs the taxpayers less. But remember the local option angle. If you think the residents of a county should have the right to decide for themselves, vote for it.

**HJR No. 5 "FOR . . . and AGAINST the constitutional amendments relative to sessions of the legislature and to the compensation of its members."**

This is the measure to authorize two sessions in a term and an annual salary of \$3,600. In the 2-year term it increases a legislator's salary from \$1,200 to \$7,200.

Few if any will deny that legislators now are shamefully underpaid. But is this the way we want to correct the situation? Do we want to double the time for legislators to think up ways of spending money? Sad experience has shown us that the more they legislate the higher our taxes go. As regards salary, are we in favor of this 500 per cent increase? No, let's not go from one extreme to another. Even though we don't approve of the present pay scale let's reject this proposition and wait for a better one.

**HJR No. 36 "FOR . . . and AGAINST the amendment to the Constitution of the State of Texas authorizing the Legislature to provide for the es-**

## Hornets Mark Up 4-Touchdown Win Over Pilot Point Hi

In their game with the Pilot Point Bearcats here last Friday night the Hornets hit their stride again to rack up the sixth win of their season.

The score was 25 to 0 as George Mollenkopf looked like a million in snaring every one of Muenster's 5 completed passes for a total yardage of 131 yards. Others who shared the limelight with him were Roger Wolf, Bernard Luke and Glen Hellman, in the line and all the backs. Offensively and defensively the boys were alert and aggressive and thoroughly outclassed the visiting Pointers.

Ironically one of the main Bearcat assets turned out to be more of a handicap. The short bullet passes of O'Dell frequently hit their mark but were too hot to handle. A few times they were too hot for Hornet interceptors who horned in but failed to hang on.

Muenster's first tally came on its second offensive play of the game. The Bearcats received the opening kick on the 15 and returned to the 24 then lost on downs as it gained only 9 in 4 tries. From the 33 Yosten gained 4 and Damian Hellman broke through tackle and shook one secondary defender for a 29 yard romp to the line.

The second score came a few minutes later. James Knabe recovered a Pointer fumble on their 49, Yosten and Walterscheid sparked a drive to the 8 and Herr carried over for the 6 pointer about midway in the first quarter.

For the remainder of the first half the ball changed sides several

(Continued on Page 2)

## Little Hornets Win 9-0 and 12-6 in 2 With Era Juniors

The Hornet Juniors made it two in a row Wednesday night when they outplayed the Era Juniors by a score of 12 to 6. In the first encounter of the two teams last Thursday night at Era, Muenster won 9 to 0.

Both games were nip and tuck affairs with Muenster having a slight advantage but far from a cinch. Both times they led in statistics, but had plenty of trouble getting the necessary points.

In the game here Wednesday night Muenster started strong taking the kickoff on their 22 and advancing all the way for a 6 pointer within the first 3 minutes of play. Three first downs reached the visitors' 31 and there the attack seemed to stop dead until on fourth down Wylie flipped about 15 yards to Aytes who dashed the rest of the way.

The rest of the first half until a minute or so before the end was a deadlock, the ball changing sides 13 times on 6 kicks, 4 fumbles, 1 interception and 2 failures to make necessary yardage. During that time Era marked up 2 first downs and Muenster 4.

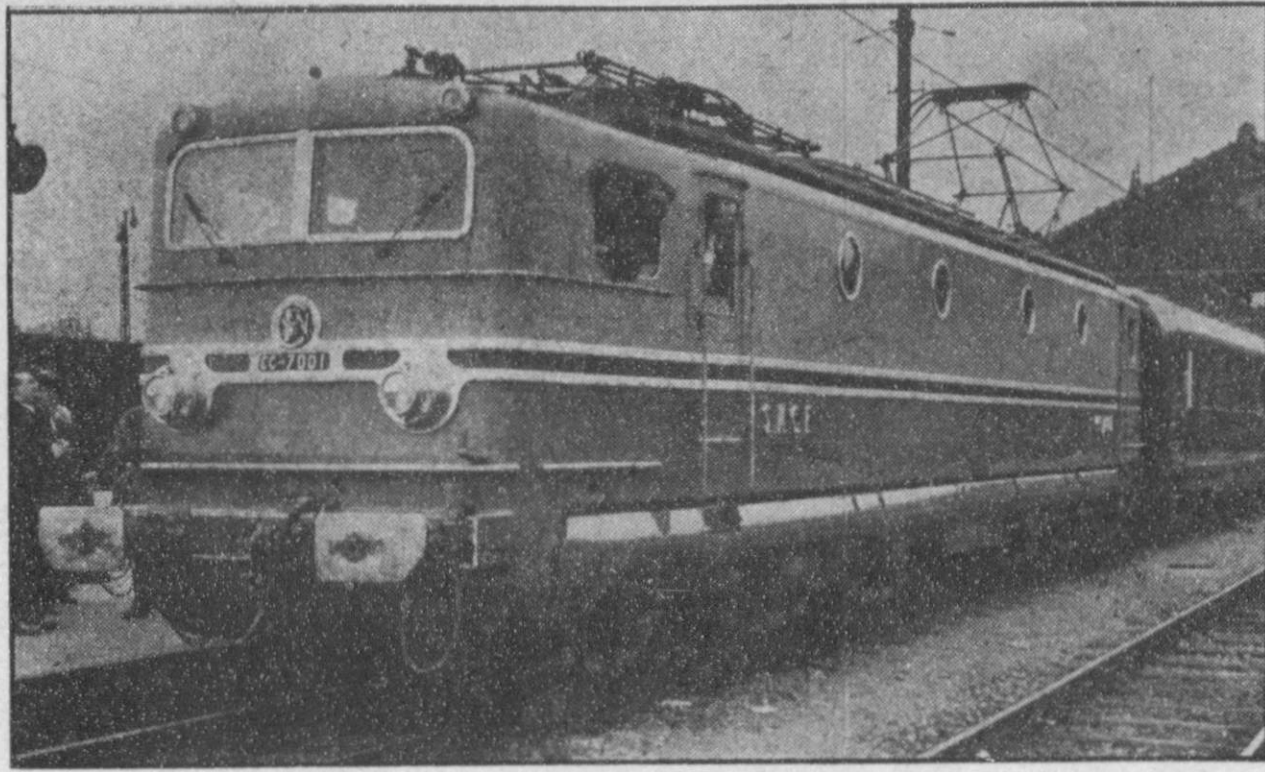

The scoring drive started when Muenster got the ball on a kick on Era's 30. Two passes Wylie to Aytes added 17 and another Wylie to Knabe was good for the score.

The visitors came back strong and after an exchange on a fumble and an interception made 2 first downs, including a 25 yard pass, then lost on a fumble on Muenster's 34. Failing to gain Muenster kicked back to the 30 where Easton got loose on a 70 yard sprint for Era's only touchdown.

From then on it was a deadlock played almost entirely between the two 30 yard stripes. As the ball was changing hands 9 times, mostly on fumbles, interceptions and failures to make yardage, Muenster got 3 first downs to Era's 1. Total first downs for the game were Muenster, 10 and Era 5.

The first game, last week Thursday was very similar in several respects. Out of frequent fumbles, interceptions, losses on downs Muenster held a slight edge and showed up best in statistics as well as scoring. Likewise the touchdown was made on a pass, the first scoring pass of the year for Muenster Hi. The little fellows also scored another first, the first points of the year on a safety.

Through both contests Johnny Aytes was a standout. His pass snaring added lots of yards and two touchdowns. Endres was the steady ground gainer and Roger Wolf was the stalwart of the line.

**FRANCE'S FASTEST**—At Tours, France, ready to make the run back to Paris, is the "CC-7001," France's newest electric locomotive. Inaugurating the new Paris-Tours service, it hit 100 miles per hour and recently made a 71.3 mph average for the 362-mile run.

## Building and Improvement Notes

At the Dixie Drug partitions now under construction will divide the place into three sections. One will be the drug store, another the prescription room and the third Dr. Myrick's office. The office will not be occupied for some time but is figured in the remodeling plan to fit with future changes in the clinic upstairs. Eventually Myrick will convert his present office and reception room into additional rooms for patients.

Repairs at Steve's Cafe consist of a new ceiling and inside paint.

Residential building and renovating now in progress around the community include a new home for Leonard Yosten; a 2 room annex and an all around stucco job at the Cecil Sims home; a new roof and interior decorating throughout for J. B. Schmitz and new outside paint on the Joe Lehnertz house.

## Local Group Sees Louis Bromfield's Texas Model Farm

About 1000 people, including 11 from Muenster, turned out last Friday to see Malabar Farm No. 2 near Wichita Falls. It is Author Louis Bromfield's Texas version of a farm that has made history in Ohio.

The 480 acre tract is being developed into a model dairy farm. Buildings are under construction and land is being prepared for alfalfa and vetch seeding. Bromfield expects to have a hundred first rate cows on the place.

Several unusual features have been incorporated in the buildings. A feed barn includes a feeder fence which is also a movable partition. Separating the cattle from the main supply of hay it is moved forward as the stock eats. Feed isn't moved but by a simple operation the cattle are permitted to get to it.

In the "dairy parlor" cattle are on a ramp and milking machine operators can do their work without stooping. Bromfield estimates that milking can be done there at a rate of 50 cows per hour.

Most of the feed will be kept in a pit silo and will consist of alfalfa, grasses and grain, the grain being mixed with the silage as it is put in. That will constitute the full ration if grain except the small amount fed while cows are being milked.

Grazing likewise will follow a different plan. The farm has no regular pasture but alfalfa and vetch patches will be alternated, after cuttings, to serve as temporary pastures. Bromfield plans to graze on one half acre per animal.

Local people who saw the place are J. W. Hess, Ed Helton, John Fisher, Earl Fisher, Al Hess, Arthur Hellman, Ralph Maglaughlin, Mr. and Mrs. J. M. Weinzapfel and Mr. and Mrs. Herbert Meurer.

## Comparative Dope Favors Both Teams In Whitesboro Tilt

Figuring statistics there are at least two ways of predicting the outcome of the game here Friday night between Muenster and Whitesboro. One team should beat the tar out of the other and there are figures in your favor which ever way you are hoping.

On one side the Bearcats beat Saint Jo 14 to 13 and Saint Jo trampled Boyd a lot worse than the Hornets did. That should make the Bearcats a lot better.

On the other side the Bearcats bowed to Whitewright 32 to 0, apparently making them about the equals of Pilot Point which lost here 25 to 0, that should make the Hornets a lot better.

But those who have seen both teams in action do not advise reliance on comparison of past scores. They believe the teams are about evenly stacked up and the game will be a dandy.

It will be played on the Hornet field, starting at 8, Friday night.

## YEAR'S SCHOLASTIC CALENDAR HAS TOTAL OF 175 CLASS DAYS

There will be 175 class days at the public school this year. Superintendent Weldon Cowan announced this week after the faculty had finished drawing up its official scholastic calendar.

The 175-day schedule is the minimum requirement for affiliated schools as prescribed by the state department of education and if any days should be missed they will have to be made up at the end of the year.

According to the calendar May 26 is the last school day. But if another ice storm, or anything else causes a loss of days the closing date will be postponed accordingly, Superintendent Cowan explained.

Holidays allowed through the year are 1 day each for Nov. 1 and Dec. 8, 8 days for Christmas and 2 days for Easter.

On Christmas the children will be out from Dec. 22 to Jan. 2 inclusive. For Easter they will be out the Friday before and the Monday after.

## LAST LAP BEGINS IN QUEEN CONTEST FOR HOMECOMING GAME

The Homecoming Football Queen Contest at Muenster Hi entered its last lap Wednesday when class preliminaries ended to decide elementary school duchesses and high school contestants in the run-off.

Winners in the high school classes are Lue Edythe Cherry, Eva Muller, Jeanette Fisher and Anna Grace Fette. They will continue the contest until November 15, or perhaps a few days earlier. The closing date will be definitely set when the faculty decides how many days will be needed to prepare the queen's costume.

Runners-up in the race, like the elementary school winners, will be duchesses in the queen's court.

The Homecoming queen's coronation will be held in connection with the Muenster-Gunter game here on Friday Nov. 18.

Elementary school duchesses are Cherry McGowan, Connie Long, Mary Mitchell, Millie Cravens, Patsy Cain, Joyce Chorro, Rita Joyce Cain and Anna Grier.

## News Of Sick And Injured

Miss Mary Rohmer, who entered Gainesville sanitarium last week for observation and treatment, underwent major surgery Monday.

Peggy, one year old daughter of Mr. and Mrs. Clarence Hellman, escaped serious injury Friday when she fell from the family car while it was moving. The front wheel passed over her right leg just above the knee but did not break any bones. In addition to the bruised leg the only other injury is a cut on the child's forehead.

This community's two polio patients are well on the road to recovery according to their mother, Mrs. Harry Otto, who advised Tuesday that Charlene, 5, is back at home since last Friday, and that Harriette, 10, will be permitted to leave the hospital in about three weeks. Harriette has been in the Gainesville sanitarium since Oct. 7, and her sister entered on Oct. 13.

Miss Alvina Derichsweiler broke her right leg at the ankle last week Wednesday during basketball practice. She has it in a cast and is getting around on crutches since Saturday. She's a junior at Muenster High School.

Carl Walterscheid, son of Mr. and Mrs. Al Walterscheid, returned to classes Wednesday after being confined to his home for two weeks suffering from a bone infection in his left leg. He is a seventh grade student at Sacred Heart school.

Larry Wayne Gobble was confined to bed with illness this week.

Miss Elizabeth Fleitman entered M&S hospital last week Wednesday for medical treatment.

Cecil Wolf, young son of Mr. and Mrs. Henry Wolf Jr. broke his left arm at the elbow Thursday after noon while playing football. Cecil is a third grade pupil at Sacred Heart school.

Mrs. Henry Dunn of Temple, Okla., was a patient at the local clinic for a week for treatment and had her tonsils removed Wednesday afternoon. She formerly resided here.

Miss Virginia Walterscheid who is employed in Dallas sprained her left ankle Sunday and is here with her parents, the Al Waltersheids, until the injury heals.

Charles Meurer of Windthorst is a patient in Jacksboro hospital since the weekend suffering from a strep throat, relatives here learned this week.

Mrs. Lee Morris, mother of Charlie Morris, is a patient at Gainesville sanitarium for treatment. She became ill suddenly last Friday.

## BOWIE MAN JOINS WILDE GARAGE STAFF

Tom Peterson is the new mechanic at the J. B. Wilde Motor company. He joined the personnel last week after attending a Chevrolet service school in Sherman.

Peterson formerly of Bowie, has been affiliated with Chevrolet dealerships for the past 10 years.

He will move his family to Muenster as soon as he can make arrangements for living quarters.

Reuben Sturm came in from Nebraska this week for a visit with his parents, the Joe Sturms.

## Contract Due Soon On Black-Top Road South of Muenster

It won't be long until work begins on the South Muenster farm to market road, according to a statement released last week by John Simpson, resident engineer of the State Highway Department at Gainesville.

The most advanced pre-construction road project now pending in the county, the road is scheduled to be under contract about Nov. 15. It specifies black top construction on 5.3 miles beginning at Highway 82.

Next in line for improvement are the other farm roads for which surveys have been completed and plans are being drawn. One of these is a 7½-mile road from Valley View to Era. The other is a 1.7-mile stretch from Myra to U. S. highway 82. Plans, when complete, will be submitted to the Austin office for approval, after which contracts will be let.

A survey will be started soon for re-construction of a 1.2-mile loop from U.S. 82. The loop passes through Lindsay, which is located some distance south of the east-west highway. Also to begin soon is a survey for improvement of a farm road from Valley View to a point 3.4 miles east.

Difficulty in obtaining materials has delayed work on the Missouri-Kansas-Texas railroad overpass over U. S. highway 77 just north of Gainesville, said Mr. Simpson. The overpass, originally scheduled to be finished at the end of October, will require about a month longer for completion, estimated Mr. Simpson. Adjacent grading will continue until late in December.

## Fancy Clock Frame Made of 388 Pieces of Jigsaw Artwork

An item getting lots of attention nowadays is Father Anthony Schroeder's fancy clock on display at the Wiese Jewelry. It consists of an 8 day chime clock set in an elaborate miniature replica of a cathedral front.

It is an actual model of a church in Belgium and the 388 cedar pieces out of which it is made were sawed with a jigsaw by Brother Edward of Subiaco Abbey, Ark. He spent more than 400 hours doing the work, completing it in 1934.

Lumber that went into the clock cost Father Anthony \$8.75, and he has been offered \$500 for it. For 4 consecutive years it won first prize in woodwork at the Logan County Fair in Arkansas.

## VALUE OF DETENTION DAM DEMONSTRATED AT JACKSBORO MEET

Ed Helton, J. W. Hess and J. M. Weinzapfel were among the hundreds of persons who attended a field day and demonstration at a new detention dam near Jacksboro last week Thursday. The dam is of special interest to people of this area because it is similar to some proposed for the Elm creeks.

The value of the dam was demonstrated only a few days before when it held a 5½ inch rain and prevented flooding on lowlands downstream. Much lighter rains had flooded in the past. The dam's function is to store water during rains and release it slowly afterward.

Speakers for the occasion were Congressman Ed Gossett, John W. Carpenter, president of the Trinity Improvement Association, and J. C. Dykes, Assistant Chief engineer of the Soil Conservation service.

## Schedule of Coming Events

SUNDAY, NOV. 6, Meeting of St. Anne Society, in the church basement following afternoon church services.

MONDAY, NOV. 7, City council meeting, city hall, 8 p. m.

TUESDAY, NOV. 8, VFW meeting, VFW club room, 8 p. m.

WEDNESDAY, NOV. 9, meeting of the adult agriculture class, at the school ag building, 8 p. m.

# LOCAL NEWS BRIEFS

Ray Wilde and Curley Bolen visited friends in Sunset Sunday.

Mr. and Mrs. Louis Steinberger spent the weekend in Windthorst visiting relatives and friends.

Mr. and Mrs. Loyd Barnhart have gone to West Texas for an indefinite stay.

John Chandler of Dallas visited here with relatives and friends Monday and Monday night.

Mrs. Robert Bell and children, Lynn and Ken, left Saturday for a two weeks' visit with her parents in Anson.

Miss Marilyn Gremminger of Wichita Falls was here for a weekend visit with her parents, the Ted Gremmingers.

Miss Ruth Fisher, a student at OLV College in Fort Worth, spent Friday through Monday here with her parents, the John Fishers.

Mrs. L.H. Baumhardt and children spent Monday night and Tuesday in Wichita Falls visiting her parents.

Guests this week of Mrs. Lena Bernauer and Mary Faith are Mr. and Mrs. Claude Rutledge of Nogales, Arizona. The couple spent the past two weeks in Memphis, Tenn., where the two families were close friends for many years.

Change now to winter weight transmission and differential grease

MARFAK means

"CUSHIONY" DRIVING!

Want easy, smooth handling — not for just a couple of hundred miles — but right from one lube job to the next? We've got your answer in Marfak, the tough, longer-lasting chassis lubricant that sticks right to the job fighting wear and friction. Applied by chart, never by chance. Let us give your car that "Marfak feeling." Stop in today!

Texaco Service Station

The L.H. Baumhardts have a new red Mercury sedan.

Dr. E. H. Steffens, a frequent visitor here while he was stationed at Camp Howze during the war, was a guest of Mr. and Mrs. Joe Lehnertz from Sunday to Tuesday. He stopped over on his return to Detroit after attending a medical convention in Dallas. Dr. Steff is assistant chief surgeon in the eye-ear-nose-throat division of Henry Ford Hospital, Detroit.

## Scientists Prove You Can Grow Old On Milk-only Diet

ITHACA, N. Y. — What would happen if you never had any food but milk? And if you never learned to chew?

Cornell's animal husbandry laboratory has some of the answers, and you are going to be surprised. It has some others still unpublished, and when they appear they are going to be more surprising. So far all indicate milk is enough. The nothing-but-milk for a lifetime experiment was tried on white rats. They were compared with an equal group of white rats fed the best ordinary diet. Milk lacks iron, copper, manganese, and iodine. These minerals were added to the diet of the milk-fed rats.

The rats on milk have lived as long as those on other food. The survivors' ages now are equivalent to the 80s and 90s in humans. Dr. Olive H. McCay, who conducted the experiment, says:

These studies permit two conclusions. First, that mineralized milk can serve as the sole article of diet from weaning to death. Second, the milk of the cow is not injurious when fed throughout life to a strange species, such as the rat.

Man, who drinks cow's milk, is also a "strange species." It is notable in the milk-fed rats that they had no more cancer, no more hardening of arteries, no other diseases, than rats on ordinary food. This ordinary food was the diet that man eats.

The first practical result of these experiments is milk bread, baked at Cornell and sold in Ithaca. This bread is also made by a few commercial bakers and by mental hospitals for their patients. Milk bread is not in any way a treatment for insanity. It is more nutritious than the bread that most mental hospitals have been able to afford. It is made with low-cost, dried skimmed milk. The advantage in the mental hospitals is that their aged patients eat lots of bread.

"One question that has been debated for centuries," says Dr. McCay, "concerns milk as suitable food for grown people. Many feel that milk is not a good food for the adult.

"I suppose this feeling starts from our knowledge that every animal stops nursing and eats the food of its parents. Have you ever asked yourself if this change is due to the unsatisfactory nature of the milk as a food for the adult, or as a means of protecting the health of the mother?"

"Most adult animals will consume large amounts of milk if they can get it. Cats drink milk throughout life. Great Dane dogs drink milk when they weigh 120 pounds. Large pigs learn to steal milk from cows. We even feed it to chickens and to trout. Certainly milk must be a complete food, or chickens and fish that never taste it naturally would not thrive upon it when they can get it."

## Pilot Point Game

at times but the Hornets continued to hold their advantage and pushed over their third marker a minute or so before the intermission.

The visitors took the kickoff, failed to gain and punted. With the ball on their 45 the Hornets fumbled on their first try and the Bearcats recovered on the 46. Three plays netted a first down but on the second play of the next series Herr intercepted for the Hornets. Yosten picked up 10 for a first down on the 42 as the quarter ended. A 10 yard loss and a 5 yard penalty on that series was too much of a handicap and the Hornets booted to Pointers on their 41. Again the visitors advanced for a first down and kicked when the next series failed. A fifteen yard penalty then stopped the Hornets again. With 25 to go they got 24 and lost the ball on downs on the visitors' 45. Three plays later Herr snared another Bearcat pass, a long one, and the Hornets took the offense on their 21. Two first downs reached mid field where the Hornets were forced to kick. Bolton's 20 yard run back set the Bearcats upon their 40 but a fumble on the next series again gave Muenster the ball on the visitors 39. A heave, Herr to Mollenkopf netted 18, Walterscheid added 17 and Herr went for the rest of the distance.

The half ended 19 to 0 one play after Pilot Point received the next kickoff.

Muenster used nearly all the third quarter to get its next touchdown. They continued to show more strength but a few muffed plays at critical times nullified their other gains. A bad pass from center set them back from the 40 to the 25 and a partially blocked kick two plays later was returned to their 23. The visitors lost their best scoring opportunity then and lost on downs on the 25. Yosten's 15 reached the 40 but was lost on the next play by another bad smear. Two plays recovered the lost ground but with 10 to go on fourth down the Hornets booted and the Bearcats ran it back to their 38. Then the Hornets cashed in on a break. Holding for 3 downs they blocked a punt and took over on the visitors 22. A first down reached the 10 then the ball changed hands twice on fumbles and the Hornets had it again on the visitors' 13. Illegal use of hands on offense set them back to the 28 but Yosten's pass to Mollenkopf was good for the final count.

The fourth period was almost a repetition of the third with the ball swapping sides frequently. The visitors got two breaks, on a fumble and an interception and Muenster shared the luck with a blocked kick and an interception. Five kicks also figured in the exchanges. The big thrill of the night came a minute or so before the final whistle as Yosten, on his 30, flipped about 40 yards to Mollenkopf who got as far as the 10 before being hauled down from behind. The next play got to the 7 as the final whistle sounded.

### Game at a Glance

## SCHOOL CARNIVAL IS FUN IN SPITE OF BAD WEATHER

The Halloween carnival sponsored by the Sacred Heart grade school P-TA Sunday was a successful affair in spite of the very inclement weather. Headquarters for the event, originally designated as the Hornet football field, were moved to the church basement.

The Halloween theme prevailed in decorations, games and contests, and Mrs. Gus Hellman, as Madam Zola, "told fortunes". An ample supply of homemade candy, fancy cookies, sandwiches and cold drinks was available.

In the children's costume contest in the evening nine youngsters received prizes.

Pre-school age winners were Janet Lutkenhaus, individual, and Kay and Linda Fette, best couple; in the 1st, 2nd and 3rd grade division Kenny Fette was best individual and Jerry and Charlotte Trubenchach the best couple; in the 4th 5th 6th grade group Virgil Henscheid was the best individual and David Flusche and Carrie Ann Gehrig the best couple. Proceeds from the event went into a fund to purchase needed classroom equipment.

## PUBLIC SCHOOL CARNIVAL IS SUCCESSFUL EVENT

Favored by a gratifying attendance, the faculty and students of the Muenster Public School had a highly successful Halloween carnival. Superintendent Weldon Cowan said the total net earning for school clubs and classes amounted to about \$360.

Those who put on the party were the 12 classes, FFA, FHA, PTA and Mothers Athletic club. Each unit had its own concessions and earned money for its own fund.

Commercially manufactured ice originated in Texas.

## WILDE-BEZNER WEDDING SET FOR NOVEMBER 9TH

Mr. and Mrs. J.B. Wilde this week announced the engagement and approaching marriage of their daughter, Miss Gladys Wilde, to Rufus Bezner, son of Mr. and Mrs. John Bezner of Lindsay.

The couple has set next Wednesday, Nov. 9, as the date for the wedding. It will be solemnized here in Sacred Heart church at 9 o'clock.

MRS. EUGENE SCHMITZ is the former Miss Lorene Derichsweiler, daughter of Mr. and Mrs. Bill Derichsweiler. Her marriage to Mr. Schmitz took place on Oct. 19. The couple is at home here since returning from a wedding trip. He is the son of Mr. and Mrs. H.M. Schmitz.

### Local NEWS Briefs

Mr. and Mrs. Jim Cook have returned from a visit in Guthrie, Okla., where they were guests of his sister while he was on vacation. The previous week Mr. Cook visited in Willow Springs, Mo., his birth place and old home town. A brother still lives there.

Frederick Huff spent Tuesday in Denton visiting his parents.

Norman Luke of Dallas was here for a weekend visit with his parents, the Joe Lukes.

Mmes. Ray Evans, Ervin Hamric and Anthony Tagliavia spent Thursday in Fort Worth.

Mr. and Mrs. Arnold Henschel of Umbarger visited here and at Lindsay with relatives during the weekend and Monday.

Mrs. Helen Wyatt has returned to her home in Grand Prairie after a visit with her nephews Mitchell and Bill Moon.

Mr. and Mrs. C.F. Gobble had as guests Sunday Mr. and Mrs. J. C. McDaniel and family and Mr. and Mrs. Leroy Bagwell and family all of Fort Worth. Mr. Bagwell is Mrs. Gobble's brother.

Miss Frances Bernauer and Rt. Rev. Msgr. Louis J. Kemphues, of Memphis Tenn., and Mrs. L.W. Flusche of Decatur spent last Thursday here visiting members of the Bernauer families.

Members of the Ted Gremminger family gathered at the home of Mr. and Mrs. Tommy Gremminger Sunday for a dinner complimenting Mrs. Ted Gremminger on her birthday.

Mrs. Mathilda Wimmer is back in Muenster, making her home in Mrs. Ben Hellman's cottage, after spending the summer visiting her children in Fort Worth, Tyler and Gainesville.

Herbert Cunningham, Virgil Streng, Walter Haverkamp and T. P. Frost left last Wednesday for Hobbs, N.M., where they are employed in oil well drilling work.

**HARD MEN TO STOP**—Bert Schmidt fullback, left, and left halfback Ronnie Clark, right, are two big reasons why sportscasters have their eye on the Illinois football team this fall. Specializing in running over the opposition on their Lafayette, Indiana gridiron both boys are trying to help Illinois into the Rose Bowl!

Mr. and Mrs. J.W. Fletcher spent Sunday in Pilot Point with relatives and were accompanied home by her mother, Mrs. F.M. Shiflet who will spend the winter here with her son-in-law and daughter.

Mrs. J.B. Schmitz brought a bouquet of beautiful large dahlias to the Enterprise office Saturday. The flowers were in colors of white, orchid and bronze. Mrs. Schmitz said her dahlias have been blooming since May.

Mr. and Mrs. Joe Tempel, Mrs. Henry Huchton and Mrs. John Huchton and David spent Sunday

at Nocona visiting the Ladies' parents, Mr. and Mrs. C.L. Williams, who had other relatives visiting them that members of the family hadn't seen in 16 years.

Mrs. E. P. Buckley drove to Grapevine Sunday to be joined by her brother, L. G. Chasteen, on a trip to Fort Worth to visit at the bedside of their brother, H. A. Chasteen who is a patient in St. Joseph's hospital and who underwent major surgery Monday morning on his 59th birthday.

Mr. and Mrs. Alphonse Paulter were honored with a dinner in observance of their eighth wedding anniversary on Wednesday, Oct. 26, when Mr. and Mrs. Vincent Becker entertained in their home. After the meal the group enjoyed card games.

## The American Way

### TWO PULLMAN PORTERS

By George Peck

Dickens wrote his "Tale of Two Cities" but this is a short story of two Pullman porters whom we encountered some time ago on a hurried trip from New York to a distant city and return.

Porter number one, was lord and master of the car which carried us from New York. He was friendly, cooperative and most solicitous of our comfort. He made our journey a pleasant one—an extra pillow on the bed in case we wished to prop ourselves up while reading ourselves to sleep—as the upper bed was not being used, he hauled down the mattress and put it on the lower bed for our greater sleeping comfort—he put our hat in a paper bag for its protection—in the morning we found our shoes resplendently shined instead of the customary daub and smear. All these things and a dozen others he did beyond what was required of him by his boss—the Pullman Company. Net result—he got a generous tip.

By strange coincidence we drew

the same car and the very same room for the return journey to New York but not the same porter. Here we met porter, number two. This fellow didn't even perform the duties assigned to him by the Pullman Company. Desiring to turn in, we rang several times for him to come to make up our bed. Getting no response, finally we called on the conductor for help who found the porter asleep in one of the vacant rooms. Apparently he resented being disturbed for he made up our bed in a slovenly manner—no thought of double mattresses or an extra pillow and in the morning our shoes were a mess. Net result—he got a very small tip.

Now here were two men, working for the same company, in the same identical location, with the same tools and equipment. One cheerfully performed the duties required of him, plus—the other shirked his responsibilities with no thought of extras. Both had equal opportunities.

We will wager a new ten-gallon Stetson against your last summer's straw hat that porter, number one, owns a nice little home somewhere; has a fine wife and family; that his children are well fed and clothed and are getting a good education; that he has a nest-egg laid by in a savings bank and has an equity in life insurance; and that he is an asset to the community in which he lives.

We would also like to bet a hundred dollar bill against a plugged nickel that porter, number two, if married, has his wife and family domiciled in wretched quarters; that they are poorly fed and clothed; and that he has nothing put aside for a rainy day or old age. No doubt, he is envious of his fellows; complains bitterly of his lot and harangues against the inequalities and unfairness of the American system.

Two men on the same job, enjoying equal opportunity — one prospering, the other a failure. Yet, there are those who suggest that this thrifty fellow be penalized by giving a part of his well-deserved gains to the underserving malingeringer. Our opinion is that this is wrong. What do you think about it?

Skiers who like to keep the runners of their skis "slick as glass" find it is literally possible now with a new patented invention that bonds a layer of fiber glass to the sliding surface of the ski.

A comfort-loving Connecticut inventor has patented an electrically heated ottoman. The heating unit and circulator are hidden below the footrest bars. Hot dogs—modern style!

### Who Eats The Most Meat?

The U. S. Department of Agriculture has issued some interesting figures on meat consumption throughout the world. They show that the United States leads most of the other nations, but that it is still a long way from the top.

In 1948, the average American ate 146 pounds of meat. By comparison, Canadian consumption averaged 129 pounds, British came to 84 pounds, and France worked out to 75 pounds. The Department's report did not give statistics for the Soviet Union, and

they are probably not available. Indications are that the average Russian sees very little meat in the course of a year, due to a rigidly controlled economy which keeps his living standards at the subsistence level.

On the other hand, average meat consumption in Australia was 204 pounds, and in New Zealand it was 222—both these countries have great sheep industries. And in Argentina, whose economy is largely based on beef cattle, the peak was reached with an average of 224 pounds.

Texas' Capital has been moved 13 times.

### THE DIFFERENCE

A candidate for the Communist party was undergoing an oral examination.

"Comrade," he was asked, "what would you do if you were left two million rubles?"

"I would give one million to the party and keep the other million for myself," he answered.

"Very good, and if you had two houses?"

"I'd give one to the party and keep the other myself."

"Excellent. Now tell me what you would do if you had two pairs of trousers?"

There was a long pause, and then the candidate said, "Comrade, I don't know."

"Why not?"

"Well, you see, I have two pairs of trousers."

A news article, date lined from Paris, in the New York Herald Tribune, tells of the finding of two Norwegian trade union delegations which recently made a first-hand study of American and Soviet living standards.

To buy a kilogram (2.2 pounds) of rye bread, wheat flour, or sugar, the survey found, the American working man needs only nine to 12 minutes of production time. The Soviet worker in the state steel and food factories must work from half a day to two days to earn the money. To buy a kilo of beef, the American worker puts in about 70 minutes at his job—and the Russian, five days!

Mr. and Mrs. Roy Endres Jr. are the parents of a son, Ted Joseph born at the local clinic on Oct. 31. The baby was baptized the following day, Father John officiating, and Mr. and Mrs. Paul Neu of Gainesville serving as sponsors. The grandparents are Mr. and Mrs. R.R. Endres of Muenster and Mr. and Mrs. Matt Neu of Lindsay.

A son, Gilbert Gary, was born to Mr. and Mrs. Albert Hess on Oct. 30 at the local clinic. Sponsors at baptism the following day were Mr. and Mrs. Gary Hess, Father Anthony officiating. The baby is the grandson of Messrs. and Mrs. F.J. Hess and Gus Knabe.

Mr. and Mrs. Vincent Zimmerer announce the birth of an 8 pound 10 ounce son at Gainesville sanitarium on Tuesday. He is their first child and the grandson of Messrs. and Mrs. I.A. Zimmerer and Paul Arendt, all of Lindsay. The young man's arrival on November 1 enables him to celebrate birthdays with his uncle, Rev. Francis Zimmerer, whose birth date is Nov. 1.

Mildred Ione is the name of the daughter of Mr. and Mrs. Dan Richardson of Rosston. She was born at the local clinic on Nov. 1.

"If you refuse me," vowed the ardent swain on bended knee, "I shall die." She refused him, and fifty-two years later he died.

Texas Governor rules over more territory than any European king, president or premier in the continental limits of his country, except Russia.

**LADIES' DAY AT UNITED NATIONS**—Women from 16 countries have come as advisers, interpreters and top-level secretaries to the delegations at the UN General Assembly at Lake Success, N. Y. Here, in the Russian booth, French interpreter Nedine Polousky, left, and Belgian interpreter Nadia Chlepnar work simultaneously. They're seeing world politics first hand.

**MIRROR AT LANDING ON FACTORY STAIRS REDUCES ACCIDENTS**

NEW YORK.—Full length mirrors can make life safer for a woman.

Frederick S. Kent, sanitary engineer of the Public Health Service, Washington, told how Monday at the annual meeting of the American Public Health Association.

A war plant had many accidents each day when women workers made a mad dash for the stairs at quitting time, he said.

The company posted "be careful" signs at each landing. But they didn't slow up the rush or do any good.

Then the company installed full length mirrors at each landing, "shrewdly applying the knowledge that no woman could pass a full length mirror without pausing for at least one look."

"Accidents were reduced very materially," Kent reported.

**MUESTER KNIGHTS ATTEND 4TH DEGREE MEETING AT WICHITA**

Wichita Falls members were hosts last Sunday for a regular meeting of the Bishop Dangelmayer assembly of the Fourth Degree Knights of Columbus.

The event opened with an address by Judge Filmore, assistant district attorney of Wichita Falls, on the constitution of the United States. Two other speakers were Father Devers of Decatur and Father Daley of Wichita Falls. The meeting ended with group attendance at benediction and was followed by a group luncheon.

Most of the Muenster 4th degree members were present for the meeting.

**THE TIM STORMER FAMILY SPENDING VACATION HERE**

The Tim Stormers and two children, Karen and Kenneth, of Sacramento, Calif., are spending a two-week vacation here with her parents, Mr. and Mrs. C.J. Fette and other relatives. Mrs. Stormer is the former Agnes Fette.

Mrs. Tony Trubenbach Jr. entertained with a party in her home Thursday night honoring her sister. Guests were the honoree's girl friends, former classmates, and their children.

Joining the Fette family for a reunion Sunday were Sister Antoinette and Sister Gertrude, who came up from Fort Worth. The Stormers drove Sister Antoinette back to Fort Worth Tuesday and the C.J. Fettes took Sister Gertrude to Denison where she is teaching this term. She had spent the weekend in Fort Worth attending a diocesan teachers' institute.

The Stormers will return home next Monday. While they are here they are being honored with a series of dinner parties by relatives.

A two-faced darning egg is a saver. Paint half the egg black and use when mending light colored hose, paint the other half white and use this side when mending dark colored hose.

The Comal River rises in New Braunfels, Texas, and before it leaves town, empties 250,000,000 gallons of water daily into the Guadalupe River.

**Hadacol Now Nation's Best Selling Tonic**

Sale of Hadacol, which is made with five of nature's B vitamins and four important minerals, has spread from a small section of Louisiana to more than 20 states and is now the nation's largest selling tonic.

Dudley J. LeBlanc, President and founder of the LeBlanc Corp., Lafayette, La., makers of Hadacol, has announced plans to expand the sales of Hadacol to the entire nation within the next year.

Dudley J. LeBlanc

Mr. LeBlanc is directing the south's largest advertising campaign for Hadacol and newspapers, especially weekly newspapers, are playing an important part in this effort.

The LeBlanc Corp. is using every weekly and daily newspaper in Louisiana, Arkansas, Mississippi, Texas, Oklahoma, Tennessee and Alabama this week to tell the story of how Hadacol put the Chief of Detectives of Hot Springs, Ark., back on the job after all else failed. He had suffered from a deficiency of B vitamins and certain minerals, which Hadacol contains.

"You must use the newspapers daily and weekly, if you want to bring your message to the grass roots of America, the towns and wonderful rural areas," said Mr. LeBlanc.

Besides being founder and President of LeBlanc Corp., Mr. LeBlanc has many other business interests, and is President Pro-tem of the Louisiana state senate. He is well known for his work for pensions for old folks and other social advances.

**CAR PRODUCTION SINCE 1900 IS 82 MILLION**

DETROIT.—In 49 years of automobile production 82,000,000 passenger cars have been produced with a total valuation of \$58,000,000,000 according to a report by the Automobile Manufacturers Association here.

The figures represented begin in 1900 when only 4,192 passenger cars were produced, and from this modest start there was a steady yearly climb with few major dislocations.

The first occurred in 1918, and was short-lived. Production rose the following year to a normal level. The depression occasioned a four-year slump in car production, but the most serious production curtailment took place during World War II. In 1943 and 1944, despite the total sale of 749 "left-overs," no civilian passenger cars rolled down the assembly lines.

Automobile manufacture rose sharply in 1946 to top the 2,000,000 mark, and in 1948 passenger car production approached 4,000,000—just 500,000 short of the 1929 record year.

Dalhart, Texas is nearer the State Capitals of New Mexico, Colorado, Nebraska, Wyoming, and Oklahoma, than it is to the Texas Capital at Austin.

**PINEYWOODSMEN FIND RATTTLERS PLENTIFUL**

A ten year old boy and his father were taking a short-cut home through the piny woods of East Texas. Suddenly, the boy stopped in his tracks and called excitedly, "Daddy, come here quick! I've never seen so many rattlers in my life!"

"Stand still, son, I'm comin'." But before the father could reach his son, the boy raised his single barrel, 16-gauge shot gun and killed a 5 1/2 foot rattler that got too close for the boy's comfort!

The father and son proceeded to kill 14 young rattlers in addition to the big one shot by the boy. They heard another big rattler near by and several small ones escaped. But they decided to call it a day and took another way home.

**MELINDA MITCHELL HAS BIRTHDAY PARTY TUESDAY**

Melinda Gene Mitchell was honored with a party on Nov. 1 when her mother, Mrs. Jess Mitchell, entertained at their home in observance of her birthday. She was three years old.

Youngsters spent the afternoon playing games and having their pictures taken. Balloons and rubber balls were favors. After the honoree opened an array of gifts she cut the birthday cake which her mother served with punch to the guests.

Those present were Kenny Cain, Sandra Yoder, Jimmy Ray Cain, Kenneth Yoder, Connie Sue and Nickie Rosson and Sandra Kay Cain. Adult guests were Mmes. C. F. Mask of Gainesville, John Steele, R. P. Cain, Guy Rosson, Emmett Yoder and John Paul.

**SISTERS SHARE HONORS AT BIRTHDAY PARTY**

Relatives from this city drove to Windthorst last Wednesday to have a surprise party for Mrs. Charles Meurer who observed her birthday on Thursday.

Sharing party honors with Mrs. Meurer was her sister, Mrs. John Klement, whose birthday was on Tuesday.

The guests took covered dishes with them for a dinner and presented the honorees with gifts.

Those present were Mr. and Mrs. John Klement and Mmes. John Eberhart, Al Eberhart, Bill Becker, Joe Swingler, Steve Fette and children, J.B. Wilde and James Bezner and Miss Evelyn Swingler.

To counter a serious epidemic of poliomyelitis (infantile paralysis), the United Nations World Health Organization (WHO) has been speeding iron lungs to India. Here the Director of WHO's regional office for Southeast Asia shows a group of nurses and officials how an portable iron lung, just delivered, operates. Altogether, WHO plans to send 20 of the big machines to India.

**Hobo Day Will Be A Tough Day For Local FHA Girls**

Next Monday, November 7, is Hobo Day for Home Economics students at Muenster High School.

In a way it's a holiday. In another way it's anything but a holiday. The girls will report to school as usual, but in their working clothes. Then they'll be dismissed to go job hunting. The money they earn will go into the chapter fund of the Future Homemakers of America to be used on chapter and school projects.

In announcing "Hobo Day" Miss Ruby Kelly, home economics instructor and FHA adviser, suggested that people of the community plan constructive jobs which will not only enable the girls to earn some money but add to the welfare or appearance of the community.

**In 1845 He Thought There Was Nothing Left to be Invented**

"With doubt and dismay you are smitten, You think there's no chance for you, son? Why, the best books haven't been written. The best race hasn't been run."

Thus wrote the poet Berton Bralley, and he might well have added that the best invention has not yet been invented. As a matter of fact, the opportunity for useful and profitable invention was never greater than it is now, according to National Patent Council.

In 1843 a gentleman named Ellsworth, who was then United States Commissioner of Patents, told Congress in his annual report, "The advancement of the arts from year to year taxes our credulity and seems to presage the arrival of that period when human improvement must end." The same man later evidenced his sincerity when he resigned the office in 1845. He stated then that there was little left to invent so the Patent Office might as well prepare to close. The pessimistic Mr. Ellsworth proved to be wrong. The United States was just entering into its century of greatest progress!

It was 1845 when Charles Good-year patented the vulcanization of rubber, a process which gave rise to great industries that provide millions of jobs today. The following year Elias Howe perfected and patented the sewing machine, another stimulus to industry. Many important inventions continued to be patented and produced, climaxing in the last two decades of the 19th century when the trolley car, the incandescent light, the automobile, the cash register, the dynamo, the pneumatic tire, smokeless power, transparent film, electrical welding, the cyanide process, the steam turbine, the electric furnace, the linotype, submarine improvements, wireless tel-

egraphy, Diesel engines and navigable balloons all were invented or introduced. Such inventions have kept many millions of men and women out of manual drudgery and have given them more enduring and profitable jobs in American industry.

**Homestead Exemption Law Says They Can't Take These From You**

Do you know which property you own is exempted from forced sale for the payment of debts? H.M. Harris has given an interesting and instructive statement that The Examiner believes its readers would like to read as follows:

- The homestead of the family consists of:
  - All household and kitchen furniture.
  - Any lot or lots in a cemetery held for the purpose of a sepulchre.
  - All implements of husbandry.
  - All tools, apparatus and books belonging to any trade or profession.
  - The family library and all family portraits and pictures.
  - Five milk cows and their calves.
  - Two mules.
  - Two horses and one wagon.
  - One carriage or buggy.
  - One gun.
  - Twenty head of sheep.
  - All saddles, bridles and necessary harness for use of the family.
  - All provisions and forage on hand for home consumption.
  - All current wages for personal services.
  - All wearing apparel.
  - Twenty head of goats.
  - Fifty head of chickens.
  - Thirty head of turkeys.
  - Thirty head of ducks.
  - Thirty head of geese.
  - Thirty head of guineas.
  - One dog.

The land area of Texas is 168,732,160 acres. According to the 1945 census of Agriculture, 84 percent of this land was in farms and ranches.

**Two Producers Replace Every Exhausted Well**

NEW YORK.—The American Petroleum Institute came up with figures Tuesday to prove that the United States is not running out of oil.

New producing wells replace exhausted wells at a rate of about two to one, API said.

During the last twelve years, 200,992 producers were drilled in this country. During the same period 115,442 wells reached their "economical production limits" and 118,008 ceased their natural flow and were put on pump.

This means, API explained, that every time 100 new oil wells are brought into production, 57 others are abandoned and 58 more become pumps.

The institute figured that present consumption averages 2,900 gallons per second while new producers are found every twenty-three minutes. Older wells pass out of existence every forty-one minutes, API said.

Texas ranks third in the U.S. in the number of its junior colleges.

**Had RHEUMATISM So BAD That He Had To Quit Working**

Mr. Jerry Watkins, chief of detectives of the city of Hot Springs, Arkansas, suffered with rheumatism so much and the aches and pains were so terrible that he had to quit working in an effort to regain his health after he had tried everything which his friends recommended.

Detective Watkins is well known and his countless number of friends throughout the country will rejoice to know that he is now healthy, free of rheumatic aches and pains and now working hard.

Mr. Jerry Watkins

"For several years," Mr. Watkins says, "I suffered from a rheumatic condition in the hip and leg. I was very nervous and finally developed migraine headaches. I tried all kinds of medicines but nothing seemed to do me any good. I seemed to be growing worse and worse and was finally advised to take a leave of absence from my work on the police force in an effort to recover my health."

"The pains in my head sometimes were unbearable. I suffered tortures and I was miserable. At night particularly I lay awake and could not sleep."

Mr. Watkins said that someone finally persuaded him to try HADACOL, and after taking the first bottle he said he could see an improvement in his general condition.

"On January 14th of this year," he said, "I felt so much better I decided to go back on the job. The examining doctor told me I was in perfect health. Now I am

working from 8 to 12 hours daily and I am able to sleep as any normal person. I have taken six large size bottles of HADACOL and all my friends know I owe my good health to HADACOL."

Mr. Watkins is one of the many thousands of people who suffered from a deficiency of the B vitamins and the minerals that HADACOL contains and who, therefore found relief in HADACOL.

It is a well-known scientific fact that the lack of only a small amount of the B vitamins and certain minerals in your system will cause certain bodily disorders such as nutritional neuritis, which causes the aches and pains commonly known as rheumatism, and there is no known cure for the ailment except the administration of the needed vitamins and minerals. This is why people who suffered for years and years never were able to obtain any relief until they took the vitamins and minerals the lack of which was causing the disorders.

HADACOL does not contain only one but has five of the B vitamins and four necessary minerals. It comes to you in liquid form so that it will be easily absorbed by the blood and, therefore, carried to the parts of the body which need them most.

So, it matters not where you live—no matter who you are—if you have tried all the medicines under the sun, you should be fair to yourself and give this wonderful preparation, HADACOL, a trial. And if your disease is caused by a lack of the B vitamins and minerals which HADACOL contains, then don't go on suffering—don't continue to make your life so miserable. Temporary relief for you is not enough. Take HADACOL.

Sold at all leading drugstores. Trial size only \$1.25, but save money; buy the large family economy size, only \$3.50. If your druggist does not handle HADACOL, order direct from The Le Blanc Corporation, Lafayette, La., and when the postman brings your package, just pay the amount plus the c.o.d. and postage. If you remit with the order we will pay the postage.

Then, if you don't feel perfectly satisfied after using HADACOL as directed, just return the empty carton and your money will be cheerfully refunded. Nothing could be fairer.—Adv.

**CATHOLIC DAUGHTERS HAVE 42 SOCIAL THURSDAY NIGHT**

Mmes. J.C. Trachta and Al Walterscheid were hostesses for the regular social of the Catholic Daughters of America Thursday night, entertaining in the parish hall.

Eight tables were arranged for a progressive 42 series in which Mrs. Joe Horn won the high score and galloping awards and Mrs. Steve Fette received the consolation favor.

The hostesses served refreshments of apple pie and coffee to 35 members.

**It Happened 10 Years Ago**

November 3, 1939

Gertrude Voith wins golden jubilee-queen contest by a large margin. — Annual turkey-packing begins Thursday at FMA plant. — Halloween spooks go sissy this year; lack of time ambition. — Weather misses freezing by one point. — Dorothy Trachta has an operation for appendicitis. — Herman Fleitman and Magdalene Block marry at Lindsay. — Theresa Stoffels began work Monday at the City Hotel as assistant to Mrs. Ben Hellman. — REA Co-op moves to west part of Enterprise building; A.C. Stelzer moves his cafe to the place REA vacated and a Helpy-selfy laundry is being set up in the former cafe part of the building.

**5 YEARS AGO**  
November 3, 1944

Rev. Richard Eveld is named chaplain of Refugio hospital; had been assistant pastor here since August 1940. — Rev. John Walbe comes to Muenster as assistant pastor to Father Thomas. — Cpl. Bill Eberhart writes about invasion of Holland. — John Hoffman is new director of local youth band. — WAC Louise Schmitz is furloughing here from Pueblo, Colo. — Katie Mae Walterscheid began work at Curtis Restaurant Thursday. — WAVE Agnes Fette and Lt. Tim Stormer marry in Ardmore, Okla., Saturday. — Mary Weinzapfel has a party on her 5th birthday. — Mr. and Mrs. J. J. Haverkamp are honored on their 23rd wedding anniversary. — Seventy will be confirmed here next Sunday.

L.H. Baumhardt flew to Cincinnati, Ohio, Sunday to attend a convention of National Machine Tool Distributors and to attend to business for his company, the Machinery Sales and Supply company of Dallas. He returned to the Dallas airport Wednesday. His wife met him there.

**DID YOU KNOW—**

THE FIRST COMMERCIAL OIL WELL DRILLED IN THE WORLD WAS BROUGHT IN BY COL. EDWIN L. DRAKE IN TITUSVILLE, PA., ON AUGUST 27, 1859.

SINCE THEN, OIL MEN COMPETING WITH ONE ANOTHER HAVE DRILLED 1,259,927 WELLS IN THE UNITED STATES IN THE SEARCH FOR OIL.

THAT WHILE THE AMOUNT OF ENERGY OBTAINED FROM COAL HAS INCREASED ONLY 140 PER CENT SINCE 1900, THE AMOUNT OF ENERGY OBTAINED FROM PETROLEUM AND NATURAL GAS HAS INCREASED 2700 PER CENT.

TODAY OIL POWER ALL OTHER POWER

1900 ALL OTHER POWER OIL POWER

THE UNITED STATES HAS PRODUCED TWO-THIRDS (37 BILLION BARRELS) OF ALL THE OIL PRODUCED IN THE WORLD AND STILL HAS THE GREATEST PROVED RESERVES IN HISTORY, 27 BILLION BARRELS.

TOTAL USE OF ENERGY IN THE UNITED STATES.

THE YEARS OF THE GREATEST INCREASE IN OUR AMERICAN STANDARD OF LIVING COINCIDE WITH THE 90 YEARS OF PETROLEUM'S PROGRESS.

**Beware of Pink Pork It May Have Some Trichinosis Germs**

AUSTIN, TEXAS.—"Please pass the pork" is a familiar sentence around many dinner tables these days, as cold weather approaches. A juicy roast pork or pork chops are dishes that can't be beat, according to many connoisseurs of meat. However, pork can be dangerous if it isn't cooked long

enough. So, be sure that pork passes the test of thorough cooking before you put it on the table. Otherwise, trichinosis may result, said Dr. Geo. W. Cox, State Health Officer.

Trichinosis is a big word, but the disease is easy to prevent. All you need to do is cook the meat until the pink color turns to white. When the change of color occurs, the meat is safe to eat. Farmers who raise hogs for sale as meat, and who feed them garbage, should cook the garbage first, or the meat may become contamin-

ated. If butchered pork is stored at a temperature of five degrees above zero, Fahrenheit, for 20 days, trichinosis parasites should die, if there are any.

If a person eats a pork chop, for example, that contains trichinae, they're swallowed in the form of tiny capsules. In the intestines these capsules develop and discharge minute worms which are carried by the bloodstream to various parts of the body. . . settling in muscles, where after a period of time they become calcified and die.

What are the symptoms of trichinosis? Stomach upsets and muscular pains, a feeling of chilliness, sore throat, and sometimes considerable fever, are some of the signs. An acute attack of the illness lasts about one or two weeks. The disease has a low death rate, but recovery is fairly slow.

Mr. and Mrs. Jake Pagel were Dallas visitors Thursday.

For pole vaulters who find that the falls are not bad—it's the landing that hurts—a track coach has invented a landing device. With this new invention the vaulters land in a net and counterweights let them down easy.

**Bed Rest is Best Treatment for Cold**

CHICAGO.—A statement prepared by "competent authorities" and published today in the Journal of the American Medical Association declared that rest in bed is "a most sane and effective measure" for the treatment of common colds.

The statement declared that no salve, nose drops, gargles, vaccine or other preparations is known to be reliable in curing the common malady which costs Americans an estimated \$1,000,000,000 a year.

AMA's Journal quoted the authorities as saying:

"Authoritative medical opinion supports the view that there is no known substance or combination of substances which can be relied on to prevent or cure the common cold."

The statement charged that "advertisers exaggerate the effects which the medicants will have on symptoms. Nevertheless, the public will continue to spend huge sums of money unnecessarily on obsolete, illogical remedies such as rubbing remedies, salves and ointments."

"Rest in bed, especially if fever is present, diminishes the severity of the common cold, limits its spread to others and reduces the frequency of complications. It has stood the rigid test of time as a most sane and effective measure."

Kenny Wiesman, writing from the air force base near Fairbanks, Alaska, informs his parents, the Al Wiemans, that everything's okay and cold and that he has a new address, which he believes is his permanent address. His friends can address him as follows: Cpl. Kenneth Wiesman, AF 18337-436, 5010 Compote Wing, Food Service Sq. APO 937, c-o Postmaster, Seattle, Wash. He said to tell everybody hello.

**SEASON RUSHER** — Joan Findley, professional model in New York City, was the choice of the New York State Winter Sports Council for Winter Sports Queen. So she posed, against a background of lush green foliage, in the latest things in snow clothes.

**STILL YOUNGER**—Dickinson College, Carlisle, Pa., claimed its Phoebe G. Follmer, 26, is the nation's youngest dean of women. Counterclaim is entered by Howard Payne College, Brownwood, Tex., which points with pride to its 25-year-old dean, Sara Mae Freeman, above.

**JUDY CAIN ENTERTAINS WITH HALLOWEEN PARTY**

Miss Judy Ann Cain entertained with a Halloween party in the home of her parents, Mr. and Mrs. Dick Cain, Friday night for about 25 young guests. Mrs. Cain and Miss Gertrude Bindel assisted with hostess duties and served refreshments of punch and cookies.

The party was a masquerade affair and Kenny Klement received the prize for being the best dressed individual. Ruth and Jane Endres received prizes for being the best dressed couple.

Traditional Halloween games and contests entertained the children.

**Medicos Say Fat Men Can Hold Liquor Better**

CHICAGO.—Fat men can hold their liquor better than thin men and the average man can drink a fifth of whisky a day without falling on his face, medical authorities report.

At this rate, Mr. Average Man obviously would be quite intoxicated, they said.

The Journal of the American Medical Association made this statement in commenting editorially on a recent study by Dr. Henry W. Newman of the Stanford School of Medicine, San Francisco.

Newman's research, the Journal said, indicated that a man weighing 154 pounds can convert into energy about 26½ ounces of 100 proof whisky in 24 hours.

"Any definite increase in this amount would raise the alcohol content of the blood and brain to a point where coma would supervene," the Journal said. "This limit could be exceeded only for a brief period, probably a matter of hours."

The idea that habitual drinking produces increased facility to consume whisky is not supported by scientific evidence, the Journal said.

"Large and heavy persons can consume somewhat more, but merely on account of their bulk and not because of any increase in ability to metabolize (convert into energy) alcohol."

Mart, Texas, was so named because in early days it was a busy trading post, and Mart means market.

## Upper Elm-Red Soil Conservation District News

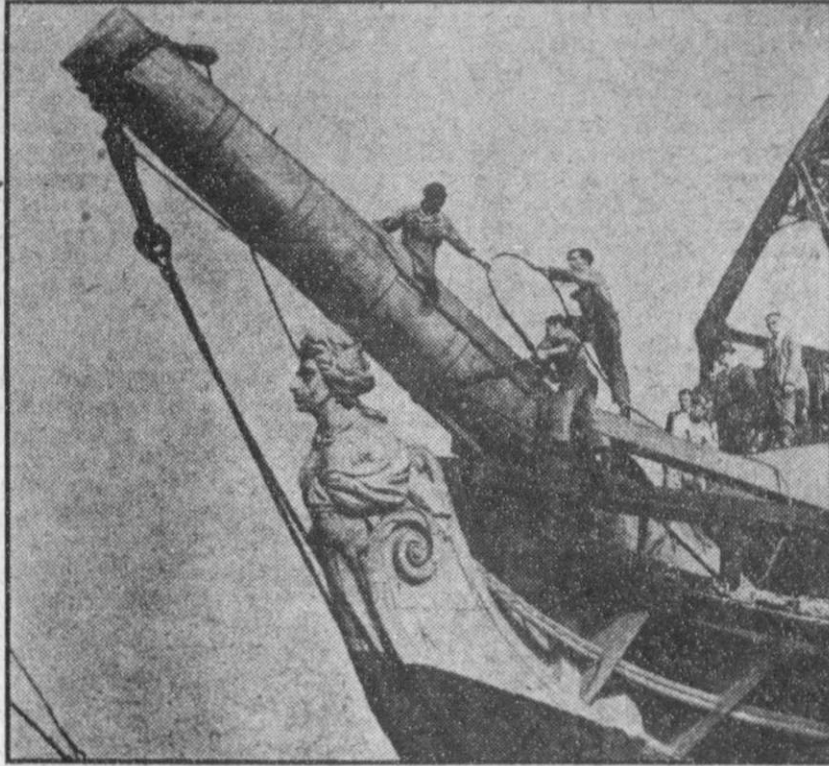

### DISTRICT SUPERVISORS

J. W. Hess, Muenster      V. W. Redman, Saint Jo  
John Rice, Collinsville      Ed Blackmon, Bowie  
Willard Kemplin, Valley View

J.M. Weinzapfel, J.W. Hess and E.M. Helton attended the dedication ceremonies at the recently constructed detention reservoir at Jacksboro, in the Upper West Fork Soil Conservation District. This reservoir was the first in Texas and the second in the United States of

a series of such structures designed for flood control. Two good rains have proven the Jacksboro reservoir on Howard creek. It was at a mild, half bank full while adjoining creeks were flooding last week. Mr. Hess, chairman of the Board of Supervisors of the Upper Elm-Red Soil Conservation District, was interested in the Jacksboro project because this district is developing plans for the construction of similar reservoirs on Elm Fork.

In addition to the detention reservoir the Howard Creek watershed was protected by an almost complete application of needed soil conservation measures. Cultivated lands were terraced where needed, and vetches and clovers occupied a good part of the crop rotations. Range pastures were in excellent condition. The bluestem grasses were good enough that it is planned to combine seed off of

**TIME CONQUERS**—Only a miracle can save the oldest British warship afloat from destruction. HMS Implacable, only surviving ship of the Battle of Trafalgar except Nelson's flagship Victory, is scheduled to be stripped and sunk in the 90-fathom Hurd Deep, off Alderney in the Channel Islands. There are no funds to preserve the historic vessel. Above, workmen remove the bowsprit in preparation for Implacable's last voyage.

the pastures this year. Buddy Reiter has completed the leveling and shaping of the waterway on his farm five miles south of Muenster. A seedbed will be prepared and KR Bluestem grass will be seeded next spring. King Ranch Bluestem is a perennial warm-season mid-grass. With favorable weather conditions it will produce two or three seed crops each year and tends to spread rapidly in pure stands, eliminating all competition. Reiter plans to seed two waterways to this grass for erosion control. These waterways will be ready to receive terrace water in a couple of years and will also serve as a hay meadow.

At Hardy, S.M. Steen and H.O. Atterberry have planted vetch and rye following their peanut crop for soil protection and improvement and to provide extra winter grazing.

In the Myra Conservation Group, Johnnie Biffle has 10 acres of alfalfa up to a good stand and also has vetch and rye for winter grazing, soil improvement and soil protection. Others in this group who have planted vetch for a winter cover crop include Jake Biffle Sr., Jake Biffle, Jr. and Ike Townsley.

### Lawrence Zimmerer Makes Conservation Plans and Constructs Terraces

Lawrence Zimmerer recently worked out a complete conservation plan on his farm and signed an agreement with the Upper Elm-Red soil conservation district. In planning the farm, terraces that will empty on pasture were run by technicians of Gainesville work unit, and were constructed by Mr. Zimmerer. Two terraces that were emptying on a country road were reversed to empty on pasture. This will prevent damage to the road and loss of soil to the farmer.

As a part of his conservation plan Mr. Zimmerer will sod outlets where needed to terrace the rest of his farm. He also plans to seed an area to King Ranch bluestem so that terraces that empty on the highway may be cut at the outlets to relieve damage to the highway and to his cropland. Joe Krahl in the Downard conservation group has also completed large ridge type terraces that empty on a sodded waterway he put in a year ago.

Mrs. Mary Match returned to her home in McAllister, Okla., Sunday after a visit with her sister, Mrs. Gus Knabe, and her brother, Bill Derichsweiler.

**HOLDS RUGS**—Safety first in a bottle, is what you might call the liquid this young lady, Jean Hogan of New York, is painting onto the back of a rug. It is Rugback, a development of one of the major rubber industries. After drying for an hour, it forms a tough, flexible, transparent rubber film that keeps the rug from slipping without sticking it to the floor. It also seals in the loops of hooked rugs and prevents rug curling. — National Patent Council.

### A & M Specialist Will Show How to Prepare Poultry for Freezers

How to kill, dress and prepare poultry for frozen lockers is the subject of a demonstration to be given next Wednesday afternoon, November 9, in the K of C hall. It will begin at 1:30 o'clock and last about 2 hours.

It will be given by F.Z. Beanblossom, poultry marketing specialist the Texas A&M College Extension service and it is open to any person interested in the subject.

Sponsors for the demonstration are County Agent B.T. Haws, Vocational Agriculture Instructor Ralph Maglaughlin and Veterans' Vocational Agriculture Instructor Hugh Barnhart.

Victoria, Texas, was the home of the first meat packery in the state.

Polo pony raising is one of the chief industries around Brownwood, Texas.

In Texas there are more than 500 types of soil.

## Dog Sized Cattle From "Lost Canyon" Are Crazy for Salt

JAMESTOWN, N. D.—The dwarf cattle that Animal Trainer Gene Holter claims to have found in a "lost canyon" are "crazy for salt" and drink so much water they become bloated, Holter said today.

Holter, 27, revealed that the canyon is in an isolated section of the Southwest "more than 1,000 miles from North Dakota." But he refused to pinpoint the location because he said there were 20 more head of the little animals roaming the range and he wants to capture them.

Holter was a little afraid that "premature publicity" may have ruined a deal to have his next expedition financed by a national magazine. He had a contract with the magazine for exclusive pictures, he said, when local newspapermen learned about the dwarfs.

"Now I don't know what is going to happen," he said. "But I can always exhibit the cattle I've already caught as freaks."

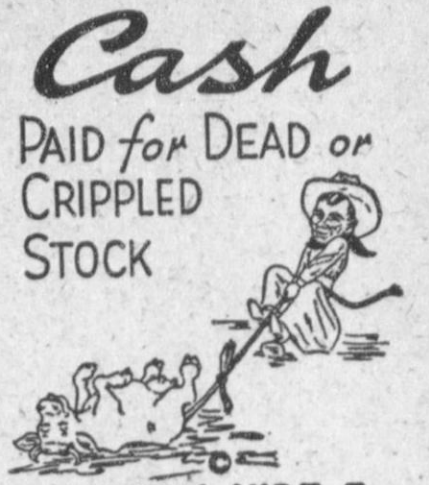

Holter said he brought out the five head—three bulls and two cows—by helicopter.

Two veterinarians who examined the animals said a soil or water deficiency in the canyon apparently prevented them from growing to full size. Holter said the canyon was several miles in area and had a stream, shrubbery and rocks. Some of the cattle still in the canyon are even smaller than those he captured, he said. Most are about the size of a large dog.

Fifty-nine of Texas' 254 counties are larger than Rhode Island.

Most of the world's helium comes from the Texas Panhandle.

### Two Outstanding Hornet Gridders Will Get Trophies

For the second consecutive year the Charm Shop will give trophies to two outstanding players on the Hornet football team.

Mrs. Ray Evans announced this week that one trophy will be given to the most valuable player and the other will be given to the most aggressive player. The identity of those men will be decided by a vote of the players, the coaches and the superintendent.

Eligibility will be based not only on performance in competition but also on scholastic standing, promptness and attitude in practice and general deportment at the school.

The trophies will be presented at the team banquet on Nov. 21.

Misses Ann and Emilia Hermes and Agnes Zimmerer have returned from a two-week vacation visiting relatives and friends in San Antonio, the Rio Grande Valley and Old Mexico.

There are about 35 million acres of forest in Texas.

Without leaving Texas you can go to Holland, India, China, Ireland, Italy, Scotland and Egypt. They are all Texas towns.

### Community's First Frost Seen Monday

This community's first frost of the season arrived Sunday night along with a mild temperature drop that barely got below the freezing point. The freeze was light and scattered, showing up mostly on cars that were left outside.

It followed a .15 inch rain Sunday afternoon then gave way to the clear warm weather that has prevailed since.

Texas has over 120 varieties of fresh water fish and over 110 salt water species.

There is enough land in Texas to supply every one in the world with a tract 4000 square feet in size.

The French Embassy in Austin, Texas, is the only building ever erected on American soil by a foreign government.

### Confetti---

Establishment and creation of hospital districts.

The words above are only those appearing on the ballot, and they omit a few very pertinent details. For one thing the conditions for establishing and regulating said districts are to be decided by the legislature. For another the hos-

pital is to be supported by an ad valorem tax on the district concerned, but the rate of tax is not specified. It looks like the legislature here is asking taxpayers to furnish a blank check. Though we like the idea of adequate hospital facilities, we can't go for a deal like this one. We ought to reject it. Let's wait to see the price tag before we agree to buy.

One provision redeems it a little, "before any such district shall be created it shall be approved by a vote of the people in the district." That's the local option angle again and it sounds fair except that we have no idea what kind of a deal is to be offered to the district. What if the law should provide for a lot of help from the state? That way we could be hooked to help support every district of the state. Until we know what we're voting for let's vote against it.

**SJR No. 1** "FOR . . . . and AGAINST the amendment to the constitution of the State of Texas eliminating the provision in said constitution making a payment of poll tax a requirement for voting, and providing for a general registration law."

Since the actual wording of the amendment also provides for a registration fee we fail to see how it improves on our present system. The old complaint of paying for one's privilege is still there. Besides there are a few features worse than the present poll tax law. Old and handicapped people are exempt now but all of them would be required to register under this amendment.

Regardless of that, why should we change the poll tax law at all? It's the only personal tax this state requires and the only payment some people make toward the support of their state. People pay a lot more to be members in good standing in other organizations. Is this too much to ask as an individual's dues to be a citizen in good standing?

In the opinion of this column the only thing wrong with poll tax is its unpopular name. It should be called a personal tax so as to imply that every citizen has a personal obligation to pay, and failure to pay should still result in forfeiture of one's right to vote. By all means let's keep our poll tax law, especially when the substitute is not as good.

**HJR No. 15** "FOR . . . . and AGAINST the Constitutional Amendment authorizing the Legislature to pass laws for the creation of city-county health units and to authorize cities and counties to vote a tax in support thereof."

The tax limit on this is 20 cents per \$100 valuation. The function of it is a big question. What will the unit consist of? Regular clinic and hospital service or a bureaucracy

of doctors, nurses, dieticians, etc.? And the need is questionable. We already have state, county and city health departments. Under new school laws schools will soon have nurses and health supervision.

Anything to protect health is good, but does it have to be achieved through a new organization? Why set up another system when we already have plenty of facilities to handle the job?

**HJR No. 38** "FOR . . . . and AGAINST the constitutional Amendment authorizing a statewide system for retirement and disability pensions for appointive county officials and employes."

The proposal does not mention how much the employe is to draw, nor what percentage of his fund will be supplied from his salary, by the county or by the state. Another measure that's too vague to merit support.

There's also a principle involved here and it cannot be expressed better than in the words of Cooke County's own Joseph W. Bailey in the U. S. Senate in 1912:

"For my part, I am opposed to this just as I am opposed to all provisions for the retirement of any man. I believe today, just as I have always believed, that every man who serves his government ought to receive a fair compensation for his services, and he ought to save it or spend it according to his own folly or his own prudence; and then he ought to suffer the consequences of his folly if he is foolish, or enjoy the reward of his prudence if he is prudent."

"I suppose the time will come when we will contrive some way to pension the taxpayer. Just exactly how a system for that can be devised is past my comprehension. But with modern legislative legerdemain I have no doubt a way will be devised to make everybody support everybody else without anybody working either for himself or for others." Pages 20, 21, Vol. 49, Congressional Record.

**HJR No. 22** "FOR . . . . and AGAINST the constitutional Amendment providing that the District Court shall conduct its proceedings at the county seat of the county in which the case is pending, except as otherwise provided by law."

Seems like a reasonable proposition to support. Where else is the logical place to have a trial?

**SJR No. 5** "FOR . . . . and AGAINST the constitutional

amendment authorizing the Legislature to provide for the creation and establishment of rural fire prevention districts."

Once again the local option angle is involved. Such districts will depend on a vote of the people in the area concerned. And the tax to support it is not to exceed 3 cents per \$100 valuation.

It seems to be worthy of approval on the grounds that the people themselves will have the final decision, and any measure to prevent fires is well worth considering.

**HJR No. 32** "FOR . . . . and AGAINST the Amendment to the constitution of the State of Texas providing that the Legislature may provide for trials without a jury in lunacy cases."

Here's one that seems to be out of line with a very fundamental principle of justice, that the right to trial by jury shall not be violated. The lunatic like the criminal is subject to loss of liberty, and the unfortunate person who is charged with lunacy is certainly entitled to as much protection of his rights as a suspected criminal. Perhaps the legislature can devise less cumbersome procedure, but principle is principle. So far as we know trial by jury is still the best safeguard of a defendant's rights, therefore every person should be entitled to it.

**SJR No. 4** "FOR . . . . and AGAINST the amendment to the State Constitution qualifying women as grand and petit jurors."

The full wording of the amendment includes these words "the qualification of no person on grand or petit juries shall be denied or abridged on account of sex and no person shall be exempt from service on grand or petit juries on account of sex."

Notice the latter provision. It's the one that counts. It refers to obligations, not to privileges. So the thing for ladies to decide is whether they want to be subject to call for a distasteful and often a very inconvenient job. Do wives want to be subject to such calls? Murder and felony trials sometimes continue for weeks. That's a long time for a wife to be called away from home.

So it isn't a matter of a woman's right or privilege but rather one of being stuck with a disagreeable job.

Of course, if you think women should share this responsibility with men you ought to vote for the amendment.

Clifton WEBB — Shirley TEMPLE

**Weather Strip your Home**  
for greater comfort and fuel economy

Stop those heat leaks. Don't leave cracks for the warm air to sift through. Install weather stripping and be more comfortable.

It's economically priced. Your heat savings will soon pay for it. . . . And easily installed. You can do the work yourself. Or, if you don't have the time, just mention it and we'll arrange to have the work done for you.
