

Considering the many alarming conditions and viewpoints that have resulted from modern materialistic trends, it was pleasing to observe last week that the twelve Fort Worth men interviewed in connection with the New Hampshire "mercy killing" are still basing their decisions on a solid set of Christian principles.

Doctors, chiropractors, hospital administrators and clergymen were almost unanimous in stating that the so called mercy killing is wrong. Some based their opinion on the old saying that while there is life there is hope and the patient is entitled to every chance at recovery no matter how feeble that chance may be.

Others hit the core of Christian ethics when they quoted that "the Lord giveth and the Lord taketh away." That's the definite and final precept upon which the right or wrong of mercy killings must be judged. God reserves for Himself the right to decide over a person's life or death. Any man who presumes a right to make that decision clearly usurps Divine authority . . . even when he is mercifully trying to relieve a patient of suffering.

Even from the practical viewpoint, which was expressed by some of the men questioned, no doctor has a right to kill his patient. Unexpected recoveries have happened so often that no one can state definitely when a case is hopeless. There's always a chance to survive and the patient is entitled to it.

In the case of the New Hampshire doctor it does seem that a lenient sentence would be in order. The charge is murder, but circumstances as well as the man's own forthright testimony seem to indicate that he was not maliciously killing a person. Instead of taking a life he only shortened the anguish of a life which he considered as lost. There's a vast difference and it should be considered in his favor.

At the same time let's bear in mind that, whether maliciously or not, he violated a law of God and of the country. He's guilty of doing a wrong and he deserves to be punished.

He deserves to be punished for the sake of precedent if nothing else. Imagine what could happen if the courts decided to overlook this most serious transgression of Divine and civil law. In effect it would mean that doctors are granted the authority to decide whether or not their patients will live. It would provide a convenient legal loop hole for unscrupulous doctors who might decide to dispose of patients. Acquittal in this case would have serious implications besides posing the absurdity that a civil court can grant powers which are denied by God Himself.

Besides being a regrettable violation of law, mercy killing by its very nature is a presumptuous thing for any man to do. The New Hampshire doctor said he was relieving the patient of her suffering. But who was he to decide that the patient should not suffer? If he shares the generally accepted Christian view that God is All-kind, All-wise and All-knowing, it should have occurred to him that God was aware of the suffering and had a good reason for permitting it. One way or another, we can be certain, every thing that happens has a definite significance in the Divine plan. In our limited wisdom we do not often understand why, but logic forces us to admit that a Perfect God possessed of all good attributes to an infinite degree has a good reason for doing things and permitting things whether or not we can see how they serve a good purpose. So the fact that a person suffers, no matter how much it arouses our pity, does not give us a right to question Divine motives and most assuredly does not give us a right to violate Divine law.

Christ Himself gave an example when He cured the sick and relieved suffering. But in doing so He helped the patient. (Continued on Page 10)

## Three Groups Will Hear Conservation Talks January 12

Three groups will hear a message on soil conservation and soil improvement next Thursday, Jan. 12 when O.F. Armstrong, southwest representative of the nationwide Friends of the Land society will spend a day here while on a ten day tour over most of the area covered by the Upper Elm Red soil conservation district.

J.W. Hess, supervisor of the district advised this week that original plans have been changed and Armstrong will make the series of visits instead of A.C. Spencer. Both men are representatives of the Friends of the Land and speak at public gatherings throughout the Southwest.

All three of Armstrong's meetings here will be held in the school lunch room. For an hour beginning at 9:45 he will speak to a joint assembly of students from the two local high schools. After noon he will be the featured speaker for the Farmers Marketing Association annual meeting, which begins at 1 o'clock. At 7:30 Thursday night he will address an open community meeting sponsored by the community council. Every person who wishes to hear the message, is invited and urged to attend.

In his statement Wednesday J.W. Hess also mentioned a change in the original schedule concerning Armstrong's appearance at Gainesville. Instead of Friday the 13th he will be there Tuesday the 10th to address a Kiwanis luncheon at noon and a meeting of the Gainesville K of C council at night.

Like Mr. Spencer, who is remembered here as one of the featured speakers on Rural Electrification Day last spring, Armstrong talks on the urgent need of conserving and improving soil as a vital program in this nation's continued prosperity. He presents the Friends of the Land view point that conservation is everybody's job, not just the farmer's. To that end he encourages business and professional men to join the movement and do what they can to assist farmers in preserving and increasing soil productivity. In his speech he presents in graphic detail the alarming story of annual soil loss and depletion at a time of increasing demands by a rising population.

## HEART ATTACK IS FATAL TO FATHER OF W. P. BRATCHER

W. P. Bratcher was in Grand Saline this week to attend funeral services for his father, 69, who passed away Monday as the result of a heart attack. The last rites were conducted at Grand Saline Wednesday afternoon.

Mr. Bratcher had spent New Year's day and Monday with his father and left shortly after they had had dinner at noon. The elder Mr. Bratcher was in good spirits and did not mention feeling ill. By the time his son returned to this city around 5 p.m. he received a message advising of his father's death around 4 o'clock. He returned to Grand Saline immediately.

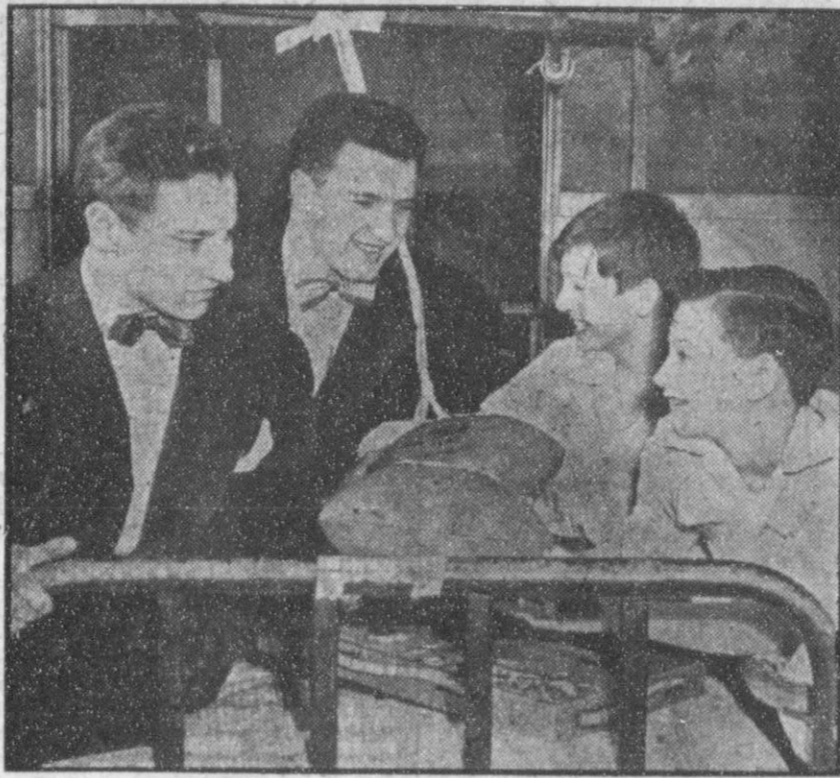

## Muenster Hi Teams Resumes Cage Race Friday at Saint Jo

After two weeks of rest the Muenster High basketball teams will continue their conference schedule Friday night in a twin bill with the Saint Jo boys and girls. It will be the first game in the second half of the double round robin schedule, in which each conference team meets each other team twice.

In the first round the Muenster teams had a full list of losses. Playing their first year of basketball and handicapped by the lack of a gymnasium, they were outclassed by every team of the district. Nevertheless Coach Hood is pleased with their progress to date and has faint hopes that they will rack up a victory or two before the season ends.

The teams will have a non conference double header Tuesday night, the 10th, at Callisburg.

Johnny, Margaret and Dorothy Rohmer visited during the past week with their sister, Mrs. Joe Spaeth and family in Greggton, Texas. Returning they stopped at Fort Worth to be joined by another sister, Ida Rohmer, who accompanied them home for a New Year's day visit with her parents, the John Rohmers.

GRIDDERS GIVE POINTERS—Frank Spaniel, left, and Leon Hart, Notre Dame football stars, present gift footballs and some tips on their use to two youngsters at the Shrine Children's Hospital in Chicago. The boys look as though they can hardly wait to put the pigskins to use.

## News Of Sick And Injured

Lawrence Roberg is improved since Wednesday and is up and around after being stricken with a sudden illness Monday morning. He was a patient at Gainesville sanitarium until noon and was then taken to Dallas for examination by a specialist. He was permitted to return home Tuesday evening.

Frank Needham is recovering from illness that afflicted him Tuesday night.

Mrs. J.J. Haverkamp underwent surgery Tuesday morning at Gainesville sanitarium.

LaVerna Starke, nurses aid at Gainesville sanitarium, was admitted to the sanitarium Monday as a medical patient.

Robert Kettner, 13, who was seriously wounded on Christmas day when he was accidentally shot with an air gun, has been dismissed from Gainesville sanitarium.

E.E. Ballinger, route 3, is convalescing at his home following surgery at Gainesville sanitarium last week.

Clyde Fisher underwent dental surgery in Wichita Falls Tuesday. He had two embedded wisdom teeth extracted. His parents went to Wichita with him and he was permitted to accompany them back home.

Ray Luke cut his elbow on broken glass Monday night. Four stitches were necessary to close the wound.

Word reached Muenster this week that Rev. Herman Laux is back at Altus, Ark., after a week's siege of near pneumonia that confined him to a hospital in Clarksville. He entered the hospital just before Christmas.

GOOD AS NEW—Even canine friends take interest when Struppi, 3-year-old dachshund living in Berlin, clip-clops along the street. Struppi's owner, Mrs. Helene Kugel, straps on the artificial limb worn by the dog in place of the right foreleg he lost when hit by a car two years ago.

## Census Indicates 68,000 Catholics in Diocese of Dallas

Virtually complete returns of the census concluded recently indicate a Catholic population of more than 68,000 in the Diocese of Dallas. This includes men, women and children in the 63 counties which constitute an area of 49,000 square miles over which the Most Reverend Joseph Patrick Lynch, D. D., has jurisdiction as Bishop.

Of the announced total 46,030 are adults and 22,175 are children. 19,459 families were listed by the census enumerators.

The census operation engaged an army of 2,283 volunteer workers during the week of November 20. Each parish group worked under the direction of the pastor and a lay chairman. Nightly reports were received in the various parish halls.

For the purpose of regional control, five districts were established in the Diocese each under the direction of a district director. Most Reverend A. Dangelmayr, Dallas, Auxiliary Bishop of the Diocese, was Clerical Chairman of the movement and Very Rev. Msgr. John T. Gulczynski, Dallas, Diocesan Director.

Bishop Dangelmayr expressed his gratitude to the census workers in the following statement:

"It is with greatest pride and gratitude that I express my satisfaction with the results of this census. I take pride in the Catholics who have done such a fine piece of work and am grateful for the time and labor they have contributed to this phase of the work of the Church. I can hardly over-emphasize the importance and significance of what they have done. It is important that the Church should know where her members are, so as to keep in close and constant touch with them.

"The significance of this census work which was done entirely by (Continued on Page 2)

## Henry Hartman, 82, Dies in Michigan

Henry Hartman, 82, uncle of John and Victor Hartman, Mrs. Felix Becker, Mrs. Frank Klement and Mrs. Joe Vogel of this city, passed away on Jan. 1 at his home in Milam, Michigan.

Funeral services were held there Wednesday morning, Jan. 4.

Walter Becker and Alphonse Hoening attended the funeral.

## Klement, Helm and Taylor Toss Hats In Political Ring

Yielding to the pressure of local friends John B. Klement this week announced that he will be a candidate for Commissioner of Precinct 4 in this year's county election. His formal statement to voters will appear at a later date.

The present commissioner, Earl Robison, has not yet expressed his intentions to date.

Two others who have authorized the Enterprise to announce their candidacies are J.E. (Earl) Taylor seeking reelection as Commissioner of Precinct 3 and M.L. (Luther) Helm seeking reelection as county tax assessor-collector. Both will publish their formal statements later in the campaign.

## Basketball Teams Lose Three More

The jinx that has haunted Muenster basketball teams since the beginning of the season continued to hang around last week and saw the boys go down in three defeats.

At Thackerville Monday night the Sacred Heart Hi quint crowded the home towners all the way but were never quite able to get in front. The final count was 29 to 25.

In floorwork the teams were evenly matched and Thackerville's advantage in shooting accuracy about accounted for the difference in score.

Following that game the Muenster Independents took on the Thackerville Independents and lost by a point in the extra period. The count was 27 to 26.

Little by little Muenster increased its lead through three quarters and fizzled in the fourth. They led by a point at the third quarter, by 3 at the second and by 5 at the third. Then Thackerville rallied for 8 while Muenster made 3 and tied the game at 26 to 26. A free throw in the closing seconds of the extra period was the margin of Thackerville's victory. Endres and Hartman led the Muenster scoring with 12 and 7 respectively.

At Era the preceding Thursday Hood trimmed the Independents 54 to 40. For the first three quarters Muenster just failed to click . . . or Hood clicked too well. Score at the half was 13 to 22 and at the third quarter was 22 to 43. But the last frame saw them hit their stride and almost match their count of the previous 3 periods while holding Hood to 11 points. Endres sparked the attack with 15 and Hartman scored 10.

## Mercury Plunges As Blue Norther Blasts Community

This community's first taste of real winter weather arrived Tuesday . . . and how! Within a few minutes, riding in on an old fashioned blue norther, the icy blast tumbled the mercury level at a rate of almost two points a minute from the fifties to below the freezing mark.

By Wednesday morning the temperature had settled to 13 and the entire country was covered with sleet to a depth of about one inch. School busses were kept off the road, classes were called off at the public school and were held for a limited enrollment at the parochial school.

For a while it seemed as though Muenster was about to have another siege of the rough stuff that practically paralyzed a vast area of Texas and Oklahoma a year ago. Shortly before 9 Tuesday night a slow drizzle started and froze as it fell. Men on the electric co-op maintenance crew had some anxious moments expecting reports on broken lines, but they did not receive any calls. Before long however, the rain gave way to sleet and eliminated the worry about ice damage.

## Rainfall in 1949 Was 39.49 Inches

Two light rains during the last week of December added .61 inch to bring the past year's total moisture to 39.49 inches and the month's measure to 1.86 inches, according to figures reported this week by Steve Mosler, office recorder for the U. S. weather bureau.

Since the beginning of the year the community has had .90 inch of moisture. A trace measuring .01 on Jan. 1 and .07 on the next day was followed by the .82 which accompanied Tuesday night's norther. The Wednesday morning measure consisted of rain and melted sleet.

## Schedule of Coming Events

- FRIDAY, Jan. 6, Muenster Hi basketball, boys and girls vs Saint Jo, there, 7:30 p.m.
- TUESDAY, JAN. 10, Muenster Hi basketball, boys and girls, vs Callisburg, there, 7:30 p.m.
- TUESDAY, JAN. 10, VFW meeting, the club room, 8 p.m.
- WEDNESDAY, JAN. 11, Adult Agriculture class, 7:30 p.m.
- WEDNESDAY, Jan. 11, Adult Homemaking class, 7:30 p.m.
- THURSDAY, Jan. 12, Annual FMA meeting, PTA lunch room, 1 p. m.
- THURSDAY, Jan. 12, Community Council, PTA lunch room 7:30 p.m.

FAMILY AT WORK—The Japanese family of Nobel Prize-winning physicist, Dr. Hideki Yukawa, likes to work together in their New York apartment. In the foreground is the Columbia University professor's wife, Sumi, who answers letters as sons Taka-aki and Harumi do their homework. The physicist is at his desk in the background.

ARAB REFUGEES COME HOME—Arab families are reunited in Acre following repatriation of Arabs, both Christian and Moslem, who fled Palestine during the fighting. Many of these refugees were separated from their families for 18 months or more. Armistice Commission and United Nations personnel are preparing for the homeward flow of Arabs who took refuge in neighboring countries.

Year's day in Ardmore, Okla., with the Tony Bergmans.

Norbert Wilde, brother of Albert Wilde, was married in Harlingen on Dec. 28 to Mary Walsh. The bride is the sister of Rev. Father Walsh, O.M.I.

Mrs. John Chandler and daughters, Kay, Jan and Carole, of Dallas visited her aunt, Anna Hellman and other relatives Thursday and Friday.

Hugh Endres and Rupert Hoenig left Tuesday to return to classes at Sublaco Academy after spending the recent holidays with homefolks.

Mrs. Lena Bernauer and daughter, Mary Faith, moved Saturday to make their home in Gainesville. They are residing at 213 Andrews street.

Joe Weinzafel left Thursday to return to Saint John's seminary in San Antonio after spending the recent holidays here with his parents.

Mr. and Mrs. Ben Luke and sons, Gene and Ray, spent Friday to Monday in San Antonio visiting their daughter and sister, Mrs. Charles Denny and family.

Mr. and Mrs. H.J. Strategier of Norman, Okla., spent Monday here visiting relatives and friends. They had spent the weekend in Lindsay with her relatives of the Sandmann families.

Henry Felderhoff, stationed at Camp Carson, Colo., with the army, left Thursday this week after being on leave with his parents, the John Felderhoffs, since Dec. 22.

Mrs. Joe Swirczynski entertained with a card party Sunday afternoon honoring her husband on his 68th birthday. Relatives and friends enjoyed card and domino games and refreshments.

Mr. and Mrs. Joe Sharp of Casey, Ill., visited with her relatives of the Stelzer families last week. They were enroute home after a Christmas visit in Rodessa, La., with their son, Joe Jr., and made the acquaintance of their first grandchild, Joe III, born in November.

Among local people attending the Cotton Bowl game in Dallas Monday were Clyde, Ruth, Jeanette and Johnny Fisher, Norbert Felderhoff, Alvin Hartman, Teddy Gremminger, Henry Pels Jr., Wilbert Vogel and Julian Walterscheid.

Emma Felderhoff of Portland, Oregon, who is visiting her parents, the John Felderhoffs, spent the past weekend in Albuquerque, N.M., with her sister, Philomina. After visiting here until Sunday she will return to Portland by plane from Fort Worth.

During the recent holidays Mr. and Mrs. Joe Swirczynski entertained with a supper party for their children. Present from out of town were the Ed Swirczynskis and Marie Holloway of Fort Worth, the Bob Swirczynskis of Ardmore, the Al Swirczynskis of Dallas, Sgt. George Swirczynski of San Angelo, Juanita Mosman of Dallas, and Dolores Walter.

**Census** - - -  
volunteer workers, is the practical evidence it affords of the increasing and widening share which the Catholic laity are taking in their church responsibilities. Our late beloved Pope Pius XI regarded the lay apostolate, as he fittingly called it, as so vital that he made it the subject of more than one of his world-wide utterances. Our Holy Father, Pope Pius XII, too, stresses it over and over. I sincerely thank each one who participated in the taking of the census. Bishop Lynch has expressed profound appreciation and deep satisfaction of the undertaking and success of the census.  
"1950 will mark a Dual Jubilee in our Diocese. It was in 1890, sixty years ago, that the Diocese of Dallas was established by the Holy See. Ten years later in 1900, our present Shepherd, the Most Reverend Joseph Patrick Lynch, D.D., came to Dallas as a newly ordained priest and his labor in this part of the Vineyard of the Lord has been uninterrupted through these fifty consecutive years.  
"At the present time a survey commission composed of both clerical and lay leaders is formulating a Diocesan Expansion Program to be launched in this year of Jubilee. At the proper time I expect to submit to our people a program covering the broad fields of Religion, Education, and Charity."

The reports for parishes in this area are as follows:

## The American Way Facts, Not Fancies

By Maurice R. Franks

In my last article I had something to say about the failure of Communism to measure up to the high promises of its fanatical protagonists. Today, let's take a look at Socialist England, a land of bureaucrats, who play no second fiddle to those of Russia in thundering against Free Enterprise. What are the comparative facts? It's easy to find out because as yet no Iron Curtain has been erected by the Socialists in Parliament to screen from public view the mess that is currently

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation that may appear in the columns of the Enterprise will be gladly and fully corrected upon being brought to the attention of the publisher.

being made of a once proud economy.

All right, do conditions in present-day Britain add up to a modern Utopia? Has Britain become a promised land for labor? Is the so-called Labour Government delivering to the workers of Britain the social advancements once promised by their Socialist leaders at the time of the general elections? Are British workers owning more and better homes? Driving more and better cars? Eating more and better food? Putting in shorter hours for longer pay? Have their rights as workers been extended? Is collective bargaining presently more secure than formerly? Are workers in Britain happier today than they were before the Labour Party took over the British Government?

Each query calls forth a resounding "No." The promises made by Britain's Socialist leaders have long since gone by the board. All have been clearly repudiated by actual experiment. In fact, Socialism in Britain would already have collapsed beneath the weight of its own incompetence were it not for the financial assistance of American capitalism. Minus the help of our Marshall Plan, with its billions of dollars in handouts, Socialism in Britain would have fallen an easy prey to Communist revolutionaries.

Finally, against all this, let's check the facts concerning the land in which you and I live and have our being. Even after accepting the obvious fact that we, too, as a nation, have poverty in our midst, let's ask ourselves a few important questions:

Is labor better off in our free society than anywhere else on earth? Do the incentives of free enterprise yield tangible results in the form of proud possessions which the individual by dint of his own effort may acquire and enjoy?

Is the workingman's house his castle here in America?

Is the American worker free to buy into the company he works for, thereby acquiring the status of fiscal partnership?

Is it true that the American economy affords more things for more people than rival economy? And if the greatest good for the greatest number be the noblest social goal aren't the people of the United States closest to that very goal?

The answer to all these questions, with the facts to back it up, must be a positive "yes."

It is the job of an editor to help mold public opinion by digging up the truth. But no editor can hope to carry the ball alone. The reader, too, has an important obligation of citizenship—

## The High Cost of Being Governed

If anyone wonders why the cost of the Federal government is just about the most critical domestic issue we face, a tabulation recently printed by the Reader's Digest will make the reason clear. It simply shows the amounts of money spent by each of the Presidents from the beginning of the nation up to September 30, 1949.

In the early days, Federal spending amounted to peanuts compared with modern standards. Washington and Adams each spent a little more than \$34,000,000. Lincoln had a war on his hands, yet his budgets totaled only \$3,252,000,000. Thereafter, expenses went down again. McKinley, for instance spent just over \$2,000,000,000.

The first really big budget came with the first world war and the Wilson Administration—nearly \$47,000,000,000. Again expenses dropped, with Coolidge and Hoover together spending around \$34,000,000,000.

Then came depression, President Roosevelt and the New Deal. During his first eight years in office Mr. Roosevelt's administration cost some \$67,500,000,000. The grand total for all the Presidents through 1940 was \$179,620,000,000. And that total, it must be remembered, covers more than 150 years of our history.

Reader's Digest leaves out the extraordinary expenditures of the World War II years—1941-45. It then lists President Truman's spending from the 1946 fiscal year to the end of September, 1949. It adds up to over \$191,000,000,000 — nearly \$12,000,000,000 more than all his 32 predecessors

particularly if he be in a position to influence untold thousands of minds, as in the case of a school teacher, clergyman, business executive or labor leader. With burning issues at hand it is up to all of us as a team to clear away the smoke of confusion and approach the hour of decision armed with FACTS, NOT FANCIES.

spent except for the 1941-1945 period.

Here is a very revealing picture of the way the nation has gone. It is true that conditions have changed over the years. But it is also true that the government has expanded in every direction to appoint far greater than most of us realize. Mr. Truman is now a symbol of that expansion, but he is not the major cause. Pressure groups of every kind have grown infinitely more adept and powerful, and officeholders of both parties have fallen into line. The results are our huge budgets, with recurring Federal deficits in spite of these budgets.

A noteworthy development is the concern over our fiscal affairs which is being expressed by people who are not conservatives. Speaking of taxes and deficits, Dorothy Thompson says, "This appalling discrepancy between what is spent and what is raised occurs when the national income is near the highest in history! It is an absolutely reckless example of the spirit of 'after us the deluge.'" A great deal more pressure to cut the cost of government may be expected in the future than in the past.

Monotony is the awful reward of the careful.

Customs Officer—"Lady, you said this bag contained clothes, but it is full of brandy bottles."  
 Woman — "Certainly — my husbands nightcaps."

Mike: " 'Tis a fine lad you have there. Could you lend me \$5?"  
 Pat: "No. 'Tis my wife's child by her first husband."

### Winter Diseases Are Serious, Warns Health Department

AUSTIN.— Seasonal health hazards for young children are to be guarded in the winter-time just as carefully as they are in the summertime in the opinion of Dr. Geo. W. Cox, State Health Officer.

"Every mother is familiar with so-called summer complaints which affect small children but certain winter diseases can be just as harmful and are just as likely to make their appearance unless proper precautions are used," Dr. Cox said.

In the group of winter diseases Dr. Cox included influenza, tonsillitis, pneumonia, bronchitis, asthma, and even diphtheria when a child has not been immunized. Any such disease affecting a child's respiratory or breathing system is apt to be very serious and only too often fatal. Pneumonia often develops from a neglected cold or may follow a severe case of measles or whooping cough. Bronchitis condition may also prove to be an after effect of these diseases and these respiratory ailments are much more difficult to combat successfully than the digestive ailments which are prevalent in

the summertime and known as summer complaints.

"These winter diseases are especially dangerous to babies and very young children," Dr. Cox stated. "Nearly all of them are spread from the secretions of the nose and mouth. Children not in vigorous health are naturally more susceptible to these complaints and the first line of defense against them is to strengthen the child's power of resistance against disease," Dr. Cox advised. "The second is to keep them under medical supervision and the third is to make sure that they avoid contact with those who have coughs, colds, or fevers."

#### RAY WILDES RETURN FROM TRIP TO NEW ORLEANS

Mr. and Mrs. Ray Wilde returned Tuesday from a 5 day trip to New Orleans, La., where on Monday they were guests at the Sugar Bowl game. During their stay they enjoyed sight seeing tours and other entertainment.

The all-expense paid trip was Ray's award for being one of the three top winners in a Chevrolet parts selling contest conducted during September and October.

The Wildes made the trip on a special train with other contest winners of the state and their wives.

#### Card Of Thanks

The Benedictine Sisters wish to extend sincerest thanks and appreciation for the gifts and greetings during the holiday season.

Mr. and Mrs. Joe Kathman entertained with a hot tamale supper in their home last Wednesday night honoring their nephew and niece, Mr. and Mrs. W.A. Showers and daughter, Jane, of San Antonio. Other guests were the Joe Bergmans and the Albert Wildes and family. Thursday the Bergmans entertained in their home for the same group with the C. A. Fisher family as added guests.

### IT'S LATER THAN YOU THINK

"Everything is farther than it used to be. It's twice as far from my house to the bus line now, and they've added a hill that I've just noticed. The buses don't stop for us long either, but I've given up running for them because they get away faster than they used to.

"Seems to me they are making staircases steeper than they used to. The rises are higher or there are more or something. Maybe this is because it's so much farther today from the first floor to the second floor, but I've noticed it's getting harder to make two steps at a time any more; it's about all I can do to make one step at a time.

"Have you noticed the small print they are using lately? Newspapers are getting farther away when I hold them, and I have to squint to make out the news. It's ridiculous to suggest that a person of my age needs glasses, but it's the only way I can find out what's going on without someone reading aloud to me, and that isn't much help because everyone seems to speak in such a low voice that I can scarcely hear them.

"Times are sure changing. The material in my clothes, I notice, shrinks in certain places; you know, like around the waist, or in the seat. Shoe laces are so short they are next to impossible to reach.

"Even the weather is changing. It's getting colder in the winter and the summers are hotter than they used to be. The rain is so much wetter and I have to wear rubbers, and I guess the way they build windows now makes drafts more severe.

"People are changing, too. For one thing, they are younger than they used to be when I was their age. On the other hand, people my age are so much older than I

am. I realize my generation is approaching middle age, but there is no reason for my friends to totter into senility.

"I ran into a friend the other night and she had changed so much that she didn't recognize me. 'You've put on a little weight,' she said. 'It's this modern food,'

Itold her, 'it seems to be more fattening.'

"I got to thinking about her this morning while I was dressing. I looked at my own reflection in the mirror. Seems they don't use the same mirrors anymore!"

# NEW FOR 1950

A classic of long, low and lovely styling

**Here it is! Now on Display!** The beautiful 1950 Chrysler... the beauty surprise of the year! From smart new front to smart new rear, every sleek, trim line was deliberately styled to give it a new long, low streamlined look! With stunning new interiors, new nylon fabrics... it's today's new style classic, inside and out! And again for 1950 Chrysler's beauty reflects the sound engineering and

the solid comfort inside. Again there's headroom, legroom and shoulder-room to spare! Chair-height seats! Surprising visibility all-around... in the easiest of all cars to get into and out of. You've got to see and drive it really to appreciate it... the wonderful things that have been done to make it the smartest, most comfortable—the safest, sweetest driving car today! (19 new body styles available.)

## Sidewalls that can't wear out or decay!

• Give your home new beauty, with rotproof, termite-proof, fireproof asbestos-cement siding. It will save you money to use this remarkable material... money saved in fewer repair bills, and in lower fuel costs. Ruberoid Asbestos-Cement siding is ideal for modernizing and inexpensive to apply. Never requires painting to prolong its life. See our samples today.

Performance of the 1950 Chevrolet Powerglide, first automatic transmission in the low-price auto field, is illustrated by the five small pictures set over the controls. When the pointer is positioned at "Park," wheels are locked and the car cannot roll. "Neutral" is an idling position or for starting the engine. When the lever moves the pointer to "Drive," forward momentum is entirely dependent on accelerator pressure. "Low" is for emergencies, as in deep mud or snow. In addition to backing, the "Reverse" position gives quick response when conditions make necessary the "rocking" of a car by shifts from low to reverse.

**Lump of Sugar in Cup Of Coffee Demonstrates 'Powerglide' Principle**

A simple example of the basic principles of Chevrolet's new Powerglide transmission may be furnished by a lump of sugar in a cup of coffee. The sugar can be spun by stirring the coffee, even though it is untouched by a spoon. The force of rotation comes from the liquid.

To overcome the initial inertia of the liquid and the sugar, the spoon must be rotated rapidly. But as the sugar begins spinning, less manual effort is required. A direct drive through the coffee is achieved when revolutions of the sugar equal those of the spoon.

With an automobile the spoon would represent the engine's crankshaft and the sugar the propeller shaft which turns the rear wheels. Unfortunately for automotive engineers, however, a lump of sugar offers far less relative resistance than a propeller shaft. Faced with a comparable problem the engineer would have to introduce agents which would exert a far greater force on the coffee than possible with a spoon.

To develop the Chevrolet Powerglide engineers contrived a compact arrangement of spinners and paddlewheels. The spinners, respectively linked to the crankshaft and propeller shaft, face each other in a bowl-shaped housing filled with oil. They supply the fundamental flow of power.

The paddlewheels are nested between the spinners to increase the force of the flow. Their primary function is to get the automobile underway. After initial resistance has been met, the paddlewheels ride free and become part of the revolving mechanism. Since they operate independently, one picking up when the other loses effectiveness, the paddlewheels accomplish the same result as gears in the conventional transmission by permitting the speed of the engine to diminish.

**Nation's Harvest In 1949 is Second Largest on Record**

WASHINGTON. — The nation's farmers harvested their second largest output in history this year, despite inroads by insect hordes, the Agriculture Department reported Monday.

For many major crops, it was the last year in which the government guaranteed price supports for all the farmers could produce. And the farmers sought to make the most of it.

In a year-end summary, the department said the harvest piled up the biggest corn supply in history. It produced surpluses of several major crops and raised a threat of surpluses in others.

The corn crop was the second largest in history. The cotton output was the largest in twelve years. Production of dried beans, rice and pears smashed all records.

As a result, widespread government production controls will go into force next year in an effort to hold down surpluses and limit the dollar drain which the price supports have imposed on the United States Treasury.

At last count, the government had \$2,600,000,000 invested in price supports.

Bill and Harold Luke left Monday to return to classes at Texas Tech in Lubbock after a holiday visit with their parents, the Ben Lukes.

Sgt. George Swirczynski left Tuesday to return to Goodfellow Field in San Angelo after spending a 15 day leave with his parents.

**Large Tank Trucks Now Keep Streams Stocked With Fish**

With vacation and recreation activities now a major industry in all parts of the nation, many states are working hard today to improve their vacation attractions.

Keeping lakes and streams well stocked with fish, for example, isn't left to chance. State governments have special hatcheries, and haul fish by tank trucks to planting streams.

One of the longest hauls of this kind is made by the Idaho Fish and Game Department. During the planting season, a custom-built tank truck is loaded with trout twice weekly for trips from Hagerman hatchery to streams as far as 500 miles away in northern areas.

Trout grow slowly in the cold waters of northern Idaho streams, but grow fast at Hagerman, in southcentral Idaho. Hatchery water bubbles out of lava rock at Hagerman, contains desirable minerals, and stays at 52 degrees the year around. Thus it's cheaper to grow them there.

The big fish tanker holds 2,000 gallons of water and carries 65,000 fish at a time. Two motor-driven pumps provide aeration, to keep the fish supplied with oxygen.

Upon arrival in northern Idaho, the fish are put into holding ponds for a day's rest. Then they're loaded into smaller trucks capable of navigating torturous roads to mountain streams.

"Sandwich Spread — What some people get from eating between meals."

### CAR TRAVEL HAS CHANGED A LOT IN FORTY YEARS

So far has motoring advanced in a few decades that the emergency equipment most cars now carry is a bumper jack and wheel wrench for changing tires—and to millions of car owners today, even these items are somewhat of a mystery.

But Herbert A. Hover, 81 years old, a retired business executive of Bronxville, N.Y., has vivid memories of the equipment that was essential to motoring 40 years ago.

Hover and his wife Mata, 72, recently embarked on a leisurely 50,000-mile motor tour that will take them, during the next two years, all over U.S., Canada, Mexico, South America and the West Indies.

It's a far cry from their first long motor trip, which they made in 1908 in a two-cylinder Maxwell. They drove from Tijuana, Mexico, to New York City—the first man and wife team ever to drive across U.S.

The trip took eight months then. Often they were forced to leave the makeshift roads where boulders or fallen trees made passage impossible, and had to drive by compass over open country.

Several stops were required daily to repair the fabric tires and thin rubber tubes. Village blacksmiths were the only repair shops.

Gasoline could be had only at an occasional grocery or hardware store. The car was piled high with cans of gasoline and Hover had more gasoline shipped ahead to railroad stations he expected to reach months later.

The car's equipment included 300 feet of rope, double block and tackle, shovel, crowbar, axe, compass, 10 tires, 30 inner tubes, 20 extra spark plugs, and several huge strips of heavy canvas.

The canvas was laid across stretches of deep sand on the desert roads, or was rolled into bundles to lay beside boulders and fallen trees so the car could climb over these obstacles.

Since buying that first car, Hover has driven every day. In 42 years of motoring, he estimates he has driven over a million miles. Yet he has never had a traffic accident.

Hover took that 1908 cross-country trip because doctors warned him a chest ailment would prove fatal if he didn't quit working.

Since then, in spite of continued warnings by doctors that he hadn't long to live, he's led an active life and expects to keep going "just as long as I can keep on driving and keep looking forward to making trips to new places."

### Good Selection and Good Care Vital to Baby Chick Success

COLLEGE STATION.— Now is the time to make plans and get everything in readiness for those early chicks. Decisions must be made for how many, where will they be purchased and will they be raised for egg production or for meat purposes? C. B. Ryan of the poultry department of the Texas A & M College System, says buy the chicks close to home if you can. Get them on feed and water as soon after they hatch

**DUTCH RAISE OIL PRODUCTION** — Since the end of the German occupation, oilmen in the Schoonebeek Field on the Netherlands-German frontier have raised their production from 40,000 barrels of crude oil a year to a little more than 40,000,000 in 1949, the largest production in Western Europe. Their nodding motion has given these pumping jacks the picturesque name of "janknikkers" or yes-nodders. Most Schoonebeek wells are pumped.

as you can because the longer chicks are off feed and water after they hatch their chances of living and doing well decrease. Good vigorous chicks are a must for a successful brooding operation.

Ryan points out that only chicks from pullorum tested and selected flocks should be purchased. This item should be checked before you buy. If you are acquainted with your local hatcheryman, you'll probably know the answer to this.

Good housing is another must that goes with the successful production of chicks, adds Ryan. Brooder house troubles

can be held to a minimum if the chicks are given plenty of floor and equipment space.

Brooder houses should be repaired and thoroughly cleaned at least 30 days before the chicks arrive, he says. Sweep and clean the entire house and then use a lye water solution for washing the house.

All equipment should be cleaned and disinfected. Be sure that it is all in good working order. Set up the brooder have it regulated and going several days in advance of the chicks arrival. Good properly working equipment, says Ryan, insures a successful brooding

operation and reduces the amount of worry and the sleepless nights for the poultryman.

Ryan suggests that you visit your local county extension agent's office for the latest information on growing baby chicks. They will be glad to help you with your chick problems.

### It Happened 10 Years Ago

January 5, 1940

Charles Stelzer Sr., 84 year old pioneer, dies after extended illness. Brief illness takes life of Nick Mosman, 35. Philomina Staffels and Lawrence Vogel marry Wednesday. Boisterous welcome hails arrival of 1940 in Muenster. Dorothy Mae Luke, Mary Elizabeth Endres and Dora Weinzäpfel left Tuesday to resume classes at Jonesboro, Ark., after spending the holidays here. Robert Gruber begins work as bookkeeper for REA, replacing Mrs. John Mosman. Joe Horn is the new bookkeeper at the cheese plant replacing Mrs. C.J. Kaiser. Della Bernauer has gone to Nashville, Tenn., to make her home. Rev. Herman Laux of Subiaco spent the holidays with his parents at Lindsay. Lindsay Sodality reelects Antonia Hundt president.

5 YEARS AGO  
January 5, 1945

Muenster meets war bond goal. Mrs. J.S. Myrick breaks left hip in fall here. Mrs. McNeelley's father dies at Pilot Point. Fire department gets 600 feet of new fire hose. Pfc. Aubrey Jennings, reported missing, writes that he is back with his company. Little William Walterscheid broke his left arm at the elbow on Jan. 1. The Charles Fisher family returns to Muenster to live after residing in Valley View. Arnold Schilling is a patient at veterans hospital in McKinney since returning from overseas duty with the army. Eugene Klement, stationed in Florida with the Coast Guard is on a leave visiting his parents. Alvin Fuhrman entertained with a watch party on New Year's eve.

### Hadacol Helps Textile Worker Stay On Job

The great textile mills of the Carolinas are booming again with shifts working day and night to turn out the nation's finest materials, and HADACOL is doing its part to keep folks on the job.

Many textile workers have reported the wonderful relief which HADACOL with its five B vitamins and four important minerals. This worker, a young father employed by the great Cannon Mills at Kannapolis, N. C.

Jay W. Barnhardt, Route 3, Box 343, Kannapolis, N. C., is 30 years old and the proud father of two children. His work in the Cannon Mills calls for a great deal of standing up.

"I had been ill for several years," said Mr. Barnhardt as he explained how close he came to having to give up his work. "I suffered with a weak stomach. It became worse and worse with gastric disturbances. I just could not hold food and no food agreed with me. I could not sleep and finally I became so sick that my legs got weak as I worked in the mill each day."

Mr. Barnhardt, like so many sufferers, had tried many preparations without relief, when he heard about HADACOL.

"After the second bottle of HADACOL I began to feel better and to regain the weight I had lost," said Mr. Barnhardt. "My digestion became normal again and today I am as well as ever. My legs no longer bother me. I eat and enjoy my food. I sleep well and have plenty of energy."

Mr. Barnhardt has taken several bottles of HADACOL and now takes the famous vitamin and mineral preparation to help stay well. He has had his wife take it with wonderful results and has recommended it to his friends in the mill.

Mr. Barnhardt suffered from a lack of B vitamins and the minerals which HADACOL contains. HADACOL comes to you in liquid form, easily assimilated in the blood stream so that it can go to work right away.

A lack of only a small amount of B vitamins and certain minerals will cause digestive disturbances. Your food will not agree with you. You will have an upset stomach. You will suffer from heartburn, gas pains and your food will sour on your stomach and you will not be able to eat the things you like for fear of being in misery afterwards. Many people also suffer from constipation. And while these symptoms may be the results of other causes, they are surely and certainly the signs of lack of B vitamins and minerals which HADACOL contains. And if you suffer from such a deficiency disorder, there is no known cure except the administration of the vitamins and mineral, which your system lacks.

It is easy to understand, therefore, why countless thousands have been benefited by this amazing tonic, HADACOL.

### Holding a Job Was Not Easy in 1880

NEW YORK.—The American Telephone & Telegraph Co.'s Long Lines Magazine has found a set of rules promulgated by a store in Amboy, Ill., for the guidance of its employees in 1880:

1. The store must be open from 6 a.m. to 6 p.m.
  2. The store must be swept, counters, shelves and showcases dusted; lamps trimmed and chimneys cleaned; pens made; doors and windows opened and a pail of water and a bucket of coal brought in before breakfast.
  3. The store must not be opened on the Sabbath unless necessary and then for only a few minutes.
  4. The employee who is in the habit of smoking Spanish cigars, being shaved at the barber's, going to dances and other places of amusement, will assuredly give his employer reason to be suspicious of his integrity and honesty.
  5. The employee must pay not less than \$5 a year to the church and must attend Sunday school regularly.
  5. Men employees are given one evening a week for courting and two if they go to prayer meeting.
  7. Leisure hours should be spent mostly in reading.
- The store is now Carson, Pirie Scott & Co. of Chicago.

**NEW CONTACT LENSES**—Dr. William Feinbloom, of New York City, is about to place a contact lens weighing little more than a postage stamp over the right eye of Adrienne Goldstone in a demonstration at Northern Illinois College of Optometry in Chicago. Plastic and unbreakable, the new lens is based on a newly discovered principle of successfully moving the control area onto the cornea, instead of the white of the eye. This, says Dr. Feinbloom, eliminates discomfort.

The groom seemed slightly confused. Hesitatingly, he said, "I was asked to buy either a casserole or a camisole. I can't remember which."

"That's easy enough," said the clerk. "Is the chicken dead or alive?"

# On display Saturday— 1950 CHEVROLET

introducing **POWERglide** automatic transmission  
*Optional on De Luxe Models at Extra Cost*

The Styleline De Luxe 4-Door Sedan

## FIRST...and Finest...at Lowest Cost!

Chevrolet for '50 brings you the best of everything at lowest cost . . . greater beauty . . . finer performance with economy . . . outstanding driving ease, comfort and safety!

Here, in Chevrolet for '50, are the finest values the leader has ever offered to the motoring public.

These thrilling new Chevrolets are available in 14 surpassingly beautiful Styleline and Fleetline body-types. They bring you a choice of two great engines and two great drives—the *Automatic Power-Team\** and the *Standard Power-Team*—described

in detail below. And they also bring you quality feature after quality feature of styling, riding comfort, safety and dependability ordinarily associated with higher-priced cars, but found only in Chevrolet at such low prices and with such low cost of operation and upkeep.

Come in. See these superb new Chevrolets for 1950—the smartest, liveliest, most powerful cars in all Chevrolet history—and we believe you'll agree they're **FIRST AND FINEST AT LOWEST COST!**

### ONLY LOW-PRICED CAR TO OFFER A CHOICE OF STANDARD OR AUTOMATIC DRIVING

#### THE AUTOMATIC POWER-TEAM\*

(Built by Chevrolet—Proved by Chevrolet—Exclusive to Chevrolet)

**NEW POWERGLIDE AUTOMATIC TRANSMISSION**—for finest Automatic Driving (with no clutch pedal—no clutch pushing—no gearshifting). It combines with Chevrolet's new Economy High-Reduction Axle to bring you an entirely new kind of driving . . . low-cost automatic driving that is almost 100% effortless . . . it's the simple, smooth and thrifty automatic transmission. **NEW 105-H.P. VALVE-IN-HEAD ENGINE** (with Power-Jet carburetor and Hydraulic valve-lifters). Here's the most powerful, as well as the most thoroughly proved engine, in the low-price field . . . giving performance extraordinary . . . together with traditional Chevrolet economy in over-all driving.

\*Optional on De Luxe Models at Extra Cost

#### THE STANDARD POWER-TEAM

(Outstanding for Standard Driving Ease . . . Performance . . . and Economy)

**HIGHLY IMPROVED, MORE POWERFUL VALVE-IN-HEAD ENGINE** (with Power-Jet carburetor and larger exhaust valves). The fine standard Chevrolet engine now made even finer . . . giving you more power, more responsive pickup, greater over-all performance . . . plus the outstanding economy for which Chevrolet has always been noted. **THE FAMOUS SILENT SYNCHRO-MESH TRANSMISSION** (with Extra-Easy Hand-E-Gearshift). Long recognized, by automotive engineers and the motoring public alike, as the pattern of smooth, quiet gear transmissions . . . assuring extremely simple and easy gearshifting . . . in fact, owners say *easiest* car operation, next to automatic driving itself.

### It Pays to Know Animal Psychology

COLLEGE STATION.—Animals, just like human beings, have their own ways of making adjustments to the problems of life. How much the farmer knows about the physiology to his animals may be reflected in his income from livestock, says Dr. W. C. Banks, extension veterinarian of Texas A & M College. Correct handling usually adds more money to his income and incorrect handling cuts income.

Generally speaking, says Banks, we know that animals are influenced perhaps more than humans by emotional changes caused by fear, jealousy, pain, suspicion, frustration and the dominance of stronger members of their species.

Dozens of examples can be cited on livestock farms. A good example, points out Banks, is the dairy cow. When she is subjected to a sudden change or something happens to upset her, she gives less milk. A number of things can cause her milk production to drop. Unusual noises, rough handling, change of caretakers or even a dislike for the milking time attendant may affect here production.

Believe it or not, says Banks, the relationship between cows is important. In every large herd, he says there are a few outstanding characters. One cow may try to dominate all the other cows; one may enjoy hurting others. Some cows require a great deal of affection from the owner before they produce at their best while some resent being petted.

It seems that some sheep don't like to take their pills any better than some humans. When they are given a large medicated pill and then turned loose, they may wait until the owner is out of sight and then get rid of it.

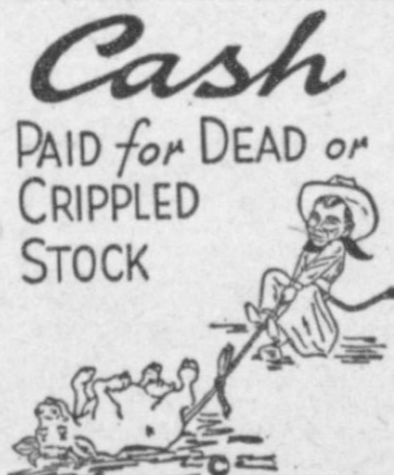

Banks says when dealing with pigs, it is well to remember that they are comfortable looking animals and only when they are comfortably housed and properly cared for, will they turn feed and water into the

maximum amount of pork. Dr. Banks believes that one of the secrets of successful livestock production comes from knowing your animals and then taking advantage of this knowledge to get from them maximum production. He adds, good care, shelter, plenty of good feed of the right kinds and good clean water will all help to make the animals on your farm comfortable, satis-

### Lindsay News

Frances Spaeth of Dallas spent the New Year weekend and Monday with her mother, Mrs. George Spaeth and family.

Work progresses on the new home of the Paul Arendts. With outside work done activity is centered on inside details.

The new home of Mr. and Mrs.

Mrs. Raymond Laux was a patient at Gainesville sanitarium last week. She returned home Wednesday.

John Bezner is nearing completion. Inside finishing is underway and it should be ready for occupancy in about three weeks.

Mr. and Mrs. H. J. Strategier of Norman, Okla., spent the weekend and Monday visiting here with relatives of the Sandmann families.

Georgia Spaeth returned to classes in Denton Tuesday after spending the holidays with her mother, Mrs. George Spaeth and other relatives.

Guests Wednesday in the Ben Lutkenhaus home were Mmes. Joe Bergman and Albert Wilde of Muenster and their guest, Mrs. W. A. Showers of San Antonio.

M.Sgt. Ernest Arendt came in from Fort Sill, Okla., for a weekend visit with his parents, the Paul Arendts and family. About the middle of this month he will leave for duty in Alaska.

FRED MACMURRAY and Maureen O'Hara play leads in Father Was a Fullback, showing at the Relax Theatre next Sunday and Monday. This is a family comedy with Fred as a football coach.

#### BIERSCHENK FAMILIES HAVE NEW YEAR DAY REUNION

New Year's day was the occasion for a delightful family reunion of members of the Bierschenk families when they gathered in the home of Mr. and Mrs. Bill Neu at Lindsay. Dinner, informal diversion and supper were enjoyed.

Present were Fred Bierschenk Sr., Messrs. and Mmes. Charles Rauscher of San Antonio, Joe Bierschenk and J. W. Wright of Weatherford, Roman Bierschenk of Temple, Alfred Bierschenk of Fort Worth, Bill Bierschenk of Valley View; Fred Bierschenk Jr. and Edgar Mages of Gainesville, and John and Bill Neu of Lindsay.

Mr. and Mrs. W. A. Showers and daughter, Jane, of San Antonio, returned to their home last Thursday after a holiday visit with her parents, the Joe Bergmans, and her sister, Mrs. Albert Wilde and family.

#### JOHN BEZNER HOME IS BIRTHDAY PARTY SCENE

Mr. and Mrs. Jake Bezner entertained with a pheasant dinner in their home Thursday, Dec. 29 in observance of the birthday of their son, Lambert. After the delicious meal, games of 42 and cards entertained the guests.

Present were Messrs. and Mmes. Lambert Bezner, Ben Seyler and Billy, James Bezner and Brian, J. B. Wilde, the hosts and their family.

Monte Hellman left Monday to return to Marquette University where he is a sophomore after being here for the holiday vacation.

### Blessed Events

The first baby for the New Year in Muenster is Donna Kay Stoffels, 7 pound 12 ounce daughter of Mr. and Mrs. Herman Stoffels, born at 9:05 a. m. on Jan. 1 at Gainesville sanitarium. Mrs. Stoffels is the former Alma Sandmann. Grandparents are Nick Stoffels of Muenster and Mr. and Mrs. William Sandmann of Lindsay.

Mr. and Mrs. Ed Cler became the parents of a daughter on Jan. 1 at 4:37 p.m. when Deborah Fay, weighing 7 pounds 10 ounces arrived at Gainesville sanitarium. Grandparents are A.T. Hoehn and Mr. and Mrs. Charles Cler.

A son, David Paul, arrived at the Muenster clinic on Jan. 3 for Mr. and Mrs. M. A. Theford of Gainesville, formerly of Muenster.

Mr. and Mrs. Emmet Fette announce the birth of an 8 pound daughter, Rita Sue, at M&S hospital in Gainesville at 3:41 a.m. on Wednesday, Jan. 4. Grandparents are Messrs. and Mmes. Henry Fette of Muenster and Paul Arendt of Lindsay.

A daughter was born Friday morning, Dec. 30, to Mr. and Mrs. Julius Sandmann of Lindsay. She weighed six pounds, two ounces.

Mr. and Mrs. Tony Hermes of Lindsay are the parents of a son born Wednesday Dec. 28 at Gainesville sanitarium. He weighed 8 pounds 12 ounces.

Mr. and Mrs. Frank Jaysa and daughters spent the weekend with their uncles and aunts of the Yosten and Swirczynski families. They were enroute to their home in St. Edwards, Neb., after spending the holidays with relatives in Albert, Texas.

Raise your chicks on Ful-O-Pep.  
the feed that produces  
World's Record-Making Layers!

At the Same Time, You May  
Save up to 30% on Rearing  
Cost the Ful-O-Pep Way

THIS year, start your chicks on Ful-O-Pep Chick Starter, the feed that's built around wholesome, nutritious oatmeal, and fortified with nature's richest vitamin combination, Concentrated Spring Range. These, along with other vitamin-rich sources, give your chicks a Vitamin Boost for growth, livability and vigor. Then follow the Ful-O-Pep Restricted Feeding Plan, the way that may save you as much as 30% or more on feed cost, at the same time raise big, husky, profitable pullets, the kind that fill out and stay strong and productive for several years. This is the feeding plan that has produced over half of the world's egg laying champions among the leading breeds. To grow chicks with big frames, even feathering and sound growth, see us now and order your requirements of Ful-O-Pep Chick Starter.

**Muenster Milling Co.**
