# Diesel Shortage Worries Local Jobbers

By PAUL SIMS **Managing Editor** 

Three Hereford petroleum products jobbers say they are being affected by a Panhandle diesel fuel shortage, which they say will devastate farmers should the situation worsen.

Governor Bill Clements joined the jobbers and Panhandle and High Plains farmers in their concern over the shortage Friday.

"Right now we've got a crunch," the governor said at a news conference. "I think it's probably a question of maldistribution." Clements said he will meet next week with diesel fuel suppliers to determine if he should intervene and order

emergency allocations. Farmers in West Texas began reporting last week difficulties in obtaining diesel fuel to operate tractors and other farm

The state has the authority to transfer up to four percent of the monthly supply from one section of the state to another, the

government said. Clements said he wants to determine if the problem is poor distribution or if there actually is a short supply. He added that his energy office has been receiving up to 200 calls a day from West Texas.

Phillips Petroleum Co. jobber Lynton Allred (Allred Oil Co.) said distribution and a cold winter in the north and northeast are reasons for the shortage.

"Distribution is a major portion of it," Allred said. "In visiting with our supplier this morning (Friday), he said that they had plenty of fuel available at their refinery and were unable to transport it to distribution points because of inadequate pipeline capacity."

Allred, whose company is providing diesel to only its regular customers, said the situation may ease by the summer.

"Or as soon as the weather warms up across the United States, especially in the northeast. Home heating fuel is equivalent to diesel fuel. The more they use, the less we have,"

"Right now we're unable to take on any new business. This is a bad time for a shortage to happen because our farmers are working, and a major portion of the product we're going to need for quite a while, we need right now," he said.

Carlos Anderson of Tip Top Oil, the distributorship for Shell Oil Co. products, said he has had problems keeping an adequate supply of diesel on hand all month.

"At the present, we can go another three or four days. It looks

like that will be the last of it until at least the first of next month. Unless something turns over, there's going to be a period where there won't be any," Anderson said.

"Does it scare me? You bet it does. I can't even sleep," he

Anderson said he, like Allred, cannot take on new customers. "I'm just hoping that we'll have enough of a supply to keep our regular customers in business. We're right in the middle of

Consumers Fuel Co-Op Assn. assistant manager Jerry Collier said some Co-Op customers are beginning to express concern

"They want to know if we're going to take on any new customers. Of course, we can't," Collier said.

"We've got a little diesel left. We just got in two loads, about 16,000 gallons, and that'll last us about a week. We were out for about a week before we got those loads in," he said.

Conoco jobber Benny Womble (Womble Oil Co.), Deward Roberson of Texaco and Exxon consignee R.L. Blakely said they have not felt the shortage like some distributors but are taking no

#### The Past ... and Latest

Besides the shortage of diesel fuel in the Panhandle area, consumers are facing other energy problems, among them being the high price of gasoline. When prices hit 50 cents a gallon, as shown on the left pump, for regular more than a year ago, service station customers wondered if they would be able to pay the price of driving a car. The pump on the right paints an even grimmer picture, and Energy Secretary Michael Blumenthal said Friday that the worst is yet to come. He predicted \$2 gasoline within a decade. [Brand photos]

Hereford, Texas, Sunday, March 25, 1979

That feller on Tierra Blanca Creek says if you want to know how difficult it is to drive a hard bargain, just buy a cheap

"You must have," she replied, "All the elephants are still in the ring.'

WE'VE PREACHED a little in this column, from time to time, on shopping at home--not only for the benefit of local merchants but for the many advantages realized by the entire community. A bill has recently been introduced in the state legislature which really caught our attention and relates to shopping at

State Rep. Ray Keller of Duncanville is sponsoring a bill aimed at redistribution of the city sales tax. At present, the 1 percent sales tax is paid to the state and then allocated back to the city where it was collected. Keller's bill calls for the tax rebate to be made on the basis of population rather than where it was collected.

his home town, the tax money does not

percent of the cities in Texas would receive a net gain under his proposal. This means most of us are subsidizing those 9 percent who gain under the

Hereford show the 1978 tax rebate at \$392,304. Under the proposal on population (based on 16,200 for Hereford) the total would be \$673,434--a net gain

The rest of the towns in the area would come out ahead, too. Even Amarillo would come out a few thousand dollars tothe good, while Lubbock would only lose a few thousand. The big losers are Houston, \$33 million, and Dallas, \$13 million. None of the other 9 percent who lose are anywhere close. Austin would million.

This would seem to suport the old argument that too many local shoppers go to Amarillo, and too many Amarillo

The bill sounds good. Not only does the present system create a windfall for cities who happen to have many businesses arbitrarily located there, but many shoppers taxed in these cities have no say as to how the revenue should be used.

the past week, you probably noticed the ironic twist of fate that had two young Hereford ladies--sisters Debbie Hoover and Connie Sublett - administering emergency first aid to separate accident victims in the span of four days. Connie is the wife of Jerry Sublett, Hereford farmer, and both young ladies are the daughters of Mr. and Mrs. Charles

Hoover Besides recognizing the individual effort of the two sisters, the events serve to remind us of the great value of Red Cross first aid training. Both young ladies received their training through local Red Cross programs, which are part of the United Way of Deaf Smith County.

# Labor Attacks Inflation Program

**Production Threatened** 

Grain sorghum is taking on increasing importance to the High Plains once more with a decline in corn acreage, but USDA policy and procedures proposals that could tax the use of fertilizers, pesticides, and irrigation water are a threat to the continued production of sorghum, not only as a commercial crop, but as a seed source for the nation. Texas is the leading producer of sorghum seed in the U.S., and up to 90 percent of that sorghum seed is grown right here on the High Plains. The problems an irrigation cut could pose for the area seed industry are examined in today's farm section, along with a look at witnesses scheduled to testify against proposed irrigation cuts at a special USDA irrigation hearing in Lubbock this week. # U.S. PLO Stand Omitted

WASHINGTON (AP) - Israeli Foreign Minister Moshe Dayan was meeting with American negotiators again Saturday over a "memorandum of understanding" between the two nations.

Davan said he was hopeful for a quick agreement on the language of the memorandum, spelling out American assurances to Israel in the event its oil supply is cut off or the peace treaty with Egypt is broken.

1975 secret memo that accompanied the

Sinai disengagement agreement, this one will not explicitly restate the U.S. policy of no contacts with the Palestine Liberation Organization.

The officials hastened to add, however, that the administration plans no change in its policy toward the PLO, which President Carter restated in interviews with Israeli and Egyptian journalists released Friday.

#### Carter said the PLO must accept American officials say that, unlike the United Nations Resolution 242 and Israel's right to exist before the United

WASHINGTON (AP) - Critics of the nation's anti-inflation program are pointing to the sharp rise in consumer prices this year as evidence President Carter's voluntary wage and price controls are not working.

"We now officially have double-digit inflation in America, and the administration's program can't stop it," AFL-CIO President George Meany said Friday. "The only answer is full and complete controls on the price of everything and the income of everybody.2

Meany, a critic of the voluntary guidelines since their inception last October, spoke after the government announced that consumer prices rose 1.2 percent in February.

The figure, which translates to an annual inflation rate of about 15 percent, follows a 0.9 percent rise in consumer prices in January.

Inflation last year was 9.2 percent. The Carter administration had hoped that labor and business adherence to the voluntary wage and price guides would hold inflation this year to around 7.4

But Lyle E. Gramley, a member of the President's Council of Economic Advisers, said there was a possibility inflation could be worse than 7.4 percent, although he wasn't sure how much.

The guidelines came under attack earlier this week when the government announced that corporate profits for the fourth quarter of 1978 were up 9.6 percent over the third quarter.

The rise in consumer prices was the largest one-month increase in 41/2 years. Sharply higher food, fuel and housing costs were blamed for much of the increase.

"There is obviously nothing good that can be said about figures at this level," admitted White House press secretary Jody Powell.

But he said the administration still has faith in the voluntary guidelines, which call for wage increases of 7 percent or less and an average rise in prices of about 5.75 percent.

The economic conditions that created inflationary problems built up over several years, Powell said, "and it will take awhile to do something about

Frank Fitzsimmons, president of the Teamsters union, joined Meany in saying workers cannot be expected to accept 7 percent wage increases when prices appear to be rising at twice that rate. "It puts me in my original position." Fitzsimmons said.

That position was that the Teamsters union, which is negotiating a key contract with the trucking industry, was willing to comply with the wage standard if the administration was successful in slowing the rapid rise in prices.

Despite the negative news, Alfred Kahn, the president's chief inflation adviser, said Friday night that "we have hope - geniune hope - they they (the Teamsters) will settle within the guidelines."

Kahn said he "did not expect" the sharp February rise, but added: "I am still confident the rate will slow as the year goes on.

He repeated his pledge that the administration would not resort to mandatory controls. "You cannot control inflation simply by imposing wage and price controls," he said...

But he said the administration will intensify monitoring of price increases by business, which he accused of "widespread non-compliance."

Meanwhile, an AP-NBC News poll showed 72 percent of Americans expect inflation to worsen over the next year. The poll of 1,600 persons was conducted prior to the release of the February price

In another development, Howard Hjort, the Agriculture Department's senior economist, said Friday that retail food price increases are slowing. He said retail food prices in the second quarter of this year will show "some further increase" but will not rise "anywhere close to what we've observed this

quarter." The Labor Department's consumer

price report Friday also said: -Fuel oil costs increased 3.2 percent in February. Gasoline prices rose 2 · percent, and have increased at an annual rate of 18 percent since June. -Food prices were up 12.7 percent in ...

the 12-month period ending in February. and housing costs rose 10.6 percent in the same period. Among foods, the 4.9 percent increase

in meat prices brought the total increase for 12 months to 26.4 percent. There also were sharply higher prices during the month for poultry, fresh fruits, bakery g ods, dairy products and fats and oils. -The Consumer Price Index in

February stood at 207.1 percent of the 1967 average of 100, meaning that goods priced at \$100 then had risen to \$207.10 last month.

-The purchasing power of the average worker's paycheck declined .08 percent during the month and was down 1.2 percent for the 12-month period ending in February, with inflation chiefly to blame.

# Williams Retrial Set

CANYON - Jury selection in the second Richard Williams murder trial will begin Monday morning in 251st District Court here.

The trial was moved to Canyon from Hereford on a change of venue. 222nd District Judge D. Wesley Gulley of Hereford, who declared a mistrial in last November's two-week-long trial, will be in Canyon for next week's proceedings.

Williams is on trial for the Oct. 12, 1977 beating death of Milo Center farmer Larry Glover. A mistrial was declared last Nov. 9 because two members of the jury were separated from the panel after one of the juror's became ill.

Gulley also ruled in favor of the mistrial because the ill juror was taken to the emergency room of Deaf Smith General Hospital. The emergency room was brought up in testimony several times during the trial, and Gulley had advised jurors not to visit locations mentioned during the proceedings. Williams is bing defended by Lubbock

attorney Travis Shelton.

#### GOP Congressman Happy With Probe

WASHINGTON (AP) - Attorney General Griffin B. Bell's action broadening the powers of the special counsel examining President Carter's family peanut business has quieted the outcry from Republican congressional critics of the investigation.

Bell, under mounting pressure from Republicans, announced Friday that the , special counsel, Paul J. Curran, will now have the same free hand that was granted to the special prosecutor's office that investigated the Watergate scandal during the Nixon administration.

The move means the New York lawyer will have the power to seek indictments without getting permission from the Justice Department.

"I can't imagine anyone having more power than Mr. Curran has," Bell told a news conference. The attorney general insisted, however, that he did not change his mind to accommodate critics in Congress or in the media.

"I'm not given to knuckling under," he

Bell also made public for the first time the charter governing Curran's duties in probing nearly \$7 million in loans made by the National Bank of Georgia to the Carter peanut warehouse in 1976 and

#### Davis Divorce Trial Set For Next Week

FORT WORTH, Texas (AP) - The divorce trial between Cullen and Priscilla Davis will resume Monday morning with District Judge John Barron presiding as usual, despite threats of a mistrial, authorities say.

Barron, who, was incensed when prosecutors burst into his civil courtroom earlier in the week and subpoenaed trial records, and District Attorney Tim Curry reached an informal truce Friday for the

Mideast

remainder of the divorce trial, according to Judge Charles Murray.

Mrs. Davis is arguing that most of Davis' multimillion dollar financial empire should be considered community property, but Davis says their community estate is less than \$1 million and does not include any of his business interests. The divorce suit was filed

trial has been going on for five weeks. Murray said he got Barron and Curry to agree jointly then would exchange no further barred comments. Curry promised he would not attempt to get any more divorce trial records until the end of

nearly five years ago, and the current

Murray, who as administrative judge played a major role in the appointment of Barron as the divorce judge, said Curry promised "that he would certainly do nothing until the case is over."

#### Price Decontrol

#### To Be In Plan

WASHINGTON (AP) - Decontrolling crude oil price in stages will be the central element of President Carter's new energy plan, predicts a Kentucky senator active on energy issues.

Sen. Wendell Ford, D-Ky., also forecasts that the president will couple deregulation with a call for an excess profits tax on oil companies - but leaving the specifics to Congress.

Ford and six other senators met with top administration energy and economic officials in a two-hour energy brainstorming session Friday.

Participants said afterward that no hard decisions had yet been made on what will go into Carter's expected March 29 energy speech.

But Ford said he feels phased oil decontrol definitely will be included. How does he know? "It's a gut

feeling." the lawmaker said. To the best of his knowledge, Ford said, the plan now under White House consideration would lift prices gradually and in different increments for different types of oil until mid-1981, when all lids

would be removed. Carter already has the authority to start doing this June 1. Present law provides for all price controls, including the president's, to end in September 1981.

#### Washington Basin

#### Won't Have Beets

MOSES LAKE, Wash. (AP) - Migrant

workers who haven't learned about loss of the sugar beet crop in Washington may run into trouble, officials say.

Genero Yzaguirre of Northwest Rural Opportunities said his office is trying to relay information to workers in south-western states that beets won't be planted in the Columbia Basin this year.

"A problem is that they're always on the move. Some don't read or write. Some can't speak English. So there's a tough communications problem to deal with," Yzaguirre said.

"For some of them, it's been a way of life. From here, they go to cultivate beets at Minnesota and South Dakota," he

"Some of them will hear about it. But others who don't learn about the beet situation until they arrive may have a serious problem," he said.

A move to form a growers cooperative to buy two sugar beet processing plants in Washington from U&I Inc. failed for lack of grower commitments, spokesmen said last week. U&I has said it would not operate the plants another year, and beet farmers reportedly are turning to other

Yzaguirre said the Washington Employment Security Department has been advised to tell callers from Arizona, California, Texas and other, states that beets will not provide work this year.

#### Correction

In the obituary for Mary E. McBride, appearing in Friday's issue, it was incorrectly stated that she was a member of First Baptist Church. It should have said she was a member of First Bible Baptist Church.

#### Police Report

Larry Baker, Route 2, reported to police Friday that someone smashed a window in his car while it was parked at 300 E. Park.

Police are investigating the vandalism.

#### Weather

West Texas - Partly cloudy north, otherwise generally fair through Sunday. Warmer afternoons. Lows 30s north and 40s south. High Sunday in the 70s except 80s extreme southwest.

# **Bombing Slows Peace**

WASHINGTON (AP) - Last December, administration spokesmen were touting the American peace effort in Namibia as the most successful U.S. undertaking in Africa

during 1978. Since then, a steady stream of bombings, executions, abudctions and other terrorist activities in Namibia have left administration officials wondering whether peace is a realistic objective in that often-ignored area of Africa.

South Africa is being pulled in two directions as it weighs the merits of allowing the territory. also known as South-West Africa, to become an independent country through U.N.supervised elections.

For one thing, South Africa's military presence in the dry. underpopulated, Texas - sized

South Africans also realize that an accommodating attitude toward Namibia could boost their sagging international respectability.

On the other hand, Namibia provides a 1,000-mile buffer zone for South Africa between it and Marxist-ruled Angola, where more than 20,000 Cubans have been stationed for the last three years. The intallation of a hostile regime in the Namibian capital of Windhoek could pose new security problems for South Africa along its northwestern

The dilemma is not restricted to South Africa. Namibia's main guerrilla group, the South West Africa People's Organization, or SWAPO, has been waging a 12-year war against the South African presence. Its forces territory is expensive. The have shed much blood in the

group in the country has as much right to take power in an independent Namibia.

But could SWAPO win a new trial election? South Africa does not believe it can. The United Nations has designated SWAPO to be the sole legitimate representative of the Namibian people, but, as the South Africans see it, this simply demonstrates that SWAPO is much more popular outside Namibia than inside.

Despite the intense mutual suspicion between South Africa and SWAPO, there were clear signs last year that the two sides were ready to let U.N. -supervised elections decide who would govern Namibia after independence.

The United States, with the help of West Germany, Great Britain, France and Canada,

process and it feels no other seemed on the verge of a diplomatic coup that could serve as a model for Rhodesia.

But since January, tensions between SWAPO and South Africa have increased, raising doubts about whether the U.N.

plan will ever be implemented. With the U.N. plan facing possible collapse, the five Western powers invited South Africa and SWAPO for urgent talks at the U.S. mission to the United Nations this week.

But now American officials are worried about possible new complications. They are wondering whether an influence buying scandal which is engulfing South Africa will lead to a government paralysis. precluding a definitive decision on what the country should do about its most sensitive foreign

# Small Investments Allow Slow But Sure Accumulating of Shares in Business

NEW YORK (AP) - Some times investing only a few dollars at a time, many people are slowly but effortlessly and inexpensively - accumulating shares in some of America's soundest companies.

The money they make according to Ken Kline, an authority on the subject, otherwise "might go for Cokes and hot dogs." Amounts often are that small.

For the companies, however, the small sums add up, maybe even to a new factory. In 1977, American Telephone & Telegraph Co. raised \$566 million through the still relatively rare but spreading technique.

That technique is the

dividend reinvestment plan, in which existing stockholders, some owning no more than one or two shares, purchase additional shares or fractions of them with dividend payments.

For cooperating, the shareholders receive price discounts in some plans; all provide minimum brokerage fees, lower than could be obtained in the open market. And in some, the fees are paid in full.

About 10 years old, the concept is attracting more attention from blue chip companies, in part as an antidote to the widespread notion that Americans have become disenchanted with the stock market.

AT&T's experience often is cited, especially by utilities with Systems, urged by its agent, large capital needs. Through First National City Bank now dividend reinvestment and Citibank, began what seems to employee purchases, it supplied be the first plan. In 1969, all equity needs in 1977. It AT&T's 3 million shareholders needed no outside financing.

Among well known companies offering plans are Allied pay high dividends and have things. high capital needs.

Ken Kline, who wrote "A Practical Guide to Dividend Reinvestment," commissioned by Corpcom Consultants and published at \$195 a copy (it's for companies, not individuals) traces the origins to 1968.

In that year Allegheny Power were offered the option.

Despite Ma Bell's success, Kline could find fewer than 100 Chemical, Dow Chemical, IBM, new plans adopted over the next Texaco, Union Carbide, and three years. Then in 1972, two many utilities, which generally innovations helped change

> Kline finds close to 1,000 plans now operating, 100 of them offering new stock, with roughly 5 million or 6 million shareholders enrolled. "Clearly, dividend reinvestment has come into its own," he says.

taxing their earnings.

we need more savings if we are

The reason, according to savings institutions, is that these countries encourage savings through financial incentives. In West Germany, for example, a bonus is given after 4 to 6 years of saving for a

house. The American saver receives a penalty. He and she must pay taxes on the alleged income from savings. Consider that the 5.25 percent; consider that inflation eliminates it. The small saver, therefore,

has been in the position of paying taxes on an illusion, the illusion being that the savings produced income, when in fact the savings shrank, even before the taxes. So when and from where is

help liable to come? From Congress, perhaps, or maybe from regulatory agencies. Sentiment to exclude from taxes the first \$500 of interest income may be growing. The pressure surely

Savings and loan officials point out, for example, that an exclusion of \$500 per person or \$1,000 per couple, might draw \$24 billion in added deposits,

leading to 750,000 mortgages and 500,000 new jobs. Now the dilemma: Do we known to be considering such

too much money might be available to that market, thus encouraging speculation, higher prices and maybe overbuilding.

concern at the moment is that

Those concerns, in fact, were among reasons why federal regulators require, as of today, that savings institutions cease daily compouding of 6-month savings certificates, thus reducing the effective return.

The reduction shouldn't hurt small-savers much. To begin with, those savings certificates are issued in \$10,000 denominations. Secondly, the reduction of yield amounts to only \$45 or so

over a 6-month period. What might very well benefit smaller savers is the lowering of the denomination to perhaps \$2,000. Nobody has said this will be done, but regulators are

#### highest passbook savings rate is Lewis' Segment of Chronicles To Be Shown On CBS TV

NEW YORK (AP) - As the late British writer C.S. Lewis once put it, his classic, seven-volume tales of fantasy, "The Chronicle of Narnia," had their origin as "pictures in my head."

Now the keynote, beginning story, "The Lion, the Witch and the Wardrobe," is going to be presented in "pictures" on prime-time network television (CBS) April 1 and 2.

"It's great entertainment, but with substance," says Caroline Rakestraw, executive director of the Episcopal Radio-TV Foundation in Atlanta and the catalyst to the entire project.

For the first time, she says, all three segments of the industry, commercial, educational and religious, have joined forced for a prime-time

The famous fantasy adventure, which for two decades has sold at the rate of a million volumes a year in this country. is regarded a Christian allegory of the death and resurrection of

It deals with four children in a magical land of Narnia. ruled by a wicked White Witch who gets them under her spell through betrayal by one of them, Edmund. A great lion, Aslan, submits to execution to atone for the betrayal and save them, then leaps back to life and equips them in a vast struggle to defeat the devil witch.

"There are powerful points in it if you meet it on that level." says Miss Rakestraw. "But it's also a tremendously rousing adventure story if you don't see anything else in it."

She originally got the idea for filming it 20 years ago on a trip to London to record some readings by Lewis, author of such noted works as "Mere Christianity," "The Problem of Pain," and "The Screwtape Letters."

At that time, she says he told her, "I suspect that long after I am dead, when my scholarly works are gathering dust, I'll be remembered only for the Chronicles of Narnia.'

After Lewis died in 1963, the Episcopal Radio-TV Foundation acquired world-wide film rights to the tales. Then, in partnership with the Children's Television Workshop which produced such successes as 'Sesame Street," sparked arrangements with Kraft, Inc., to underwrite and sponsor the lion-witch production.

Kraft, headed by William O. Beers, an Episcopalian and member of the Church of the Holy Comforter in Kenilworth.

Ill., committed \$3.2 million to

the project. The animation for it was done by Bill Melendez, known for his work for the Charlie Brown "Peanuts" TV specials. Of the new Narnia show, he says it "has a lot of message" but also is lively "rough and tumble"

The presentation runs two full hours, one each on April 1 and 2

# Lady Judge Experienced

SAVANNAH, Ga. (AP) -Phyllis Kravitch brings 35 years of legal experience to the 5th U.S. Circuit Court of Appeals.

But the 58-year-old jurist, the second woman to be confirmed by the U.S. Senate to serve as a federal appeals court judge. said she takes no special goals with her except "to be a good judge, a fair judge and to see that justice prevails.

"That's the purpose of course.'

Ms. Kravitch said she also hopes to be courageous, an adjective Sen. Edward Kennedy used to describe her at last month's confirmation hearing before the Senate Judiciary Committee.

"That's a very important attribute for any human being. but it is indispensable for a judge," she said in a telephone interview Thursday.

Ms. Kravitch will move into an Atlanta office of the 5th Circuit court, replacing another Georgian, Judge Lewis R. Morgan, who retired.

She will join 14 men on the court that handles appeals from Georgia, Alabama, Florida. Mississippi, Louisiana, Texas and the Canal Zone.

Ms. Kravitch was the first woman in Georgia to serve as a judge of Superior Court and the first female president of the

Savannah Bar Association. In the initial stages of her law

one of the first female trial lawyers in the South.

On Thursday; the day after the Senate approved her presidential appointment to the federal bench, she was reluctant to comment on her new responsibilities.

"Just say I'm very honored. It will be a privilege to serve on this court," she said.

Ms. Kravitch began a law practice in 1944 with her late father, Aaron Kravitch, Her experience as a trial lawyer. included capital felonies and early civil rights cases involving

# Crude Under Watch

HOUSTON (AP) - The Iranian situation has oil companies keeping close watch on crude oil

L.A. Ramsey, executive vice president of Gulf Oil Exploration and Production Co., is among those expressing concern.

"Although Iran has started to export small amounts of oil, we cannot be certain exports will continue or in what volumes, much less at what cost.' Ramsey said.

In the normal cycle of crude oil demand, he added, the first and fourth quarters of each year are generally periods of peak demand.

"A drawdown of crude stocks usually begins to occur during the fourth quarter and continues until the beginning of the second quarter the following year," Ramsey said.

"Stocks are usually rebuilt during the second and third quarters. However, refiners have been forced to draw down more heavily on crude stocks

Christian Faith

depending on the availability of crude, may or may not be able to build up inventories during the summer months."

Ramsey said the temporary loss of Iranian crude, to date, has not created an absolute shortage of oil in the world but an approach to crisis conditions could begin as early as October if substantial Iranian supplies are not available.

Ramsey said that prior to the shutdown of Iranian production Gulf and others had assumed the OPEC nations had spare producing capacity approximating 5 million barrels a day.

"However, having lost nearly million barrels per day of Iranian production, we find we are 2 million short on a current world-wide basis," he said.

Conservation alone, Ramsey added; could cover such a shortfall in that 2 million barrels a day world wide out of normal demand of a little over 50 million barrels a day equtes to a 4 percent shortage.

"If we assume Iran will produce about 700,000 barrels per day for its own internal consumption, the shortage is closer to 1 million barrels per day or 2 percent of demand," he

> "The International Energy Agency has called for a voluntary 5 percent reduction in demand in all countries, but it has left the administration of oil supply logistics in the hands of the oil companies for the time being."

The United States should have learned by now, Ramsey said, that serious conservation does not occur without the persuasive factor of higher prices.

Ramsey said the higher OPEC prices of recent months are beginning to show up at gasoline stations across the nation.

"But, due to domestic crude oil and gasoline price controls, the new prices do not reflect the real world. They still fail to telegraph the conservation

he said.

"Demand for gasoline, of all the major petroleum products, should be reduced through the pricing mechanism, because demand for products from the lighter end of the barrel is far outstripping demand for heavier products.

Ramsey said higherprices which occurred following the four-fold OPEC increases of 1973 and 1974 did result in conservation.

"Annual demand growth for petroleum in the more developed consuming countries decreased from age of 4 to 5 percent per year to a more modest growth of 2 to 3 percent annually," he said.

"There is no question that prices can be used as an effective conservation incentive. Neither should there be any doubt but that higher returns to the oil industry will stimulate energy production here at home where we know it will be available when we need it."

#### Circuit in 1976. career, she built a reputation as Women To Be Drafted?

Congress begins considering recommending revival of regiswhether to require draft registration - or even to actually draft soldiers - the politically tricky question of the role of women is pushing to the . front of the debate and could . Rogers said women should be scuttle the whole idea.

men are forced to register as potential draftees, should women? If men are drafted, should

The United States has more than 134,000 women in uniform, tens of thousands more than any other country. All were volunteers because Selective Service statutes do not allow the registration or drafting of

The question of what to do has touched off disagreements within the administration and Congress and could threaten what some see as a momentum toward a renewal of regis-

The nation's military leaders who say registration is needed because the current system could not produce enough soldiers to meet a crisis - are not eager to include women and flatly oppose sending them into combat.

They and other opponents argue there is no shortage of draft-age men and that registration of women eventually could lead to sending them into combat. Civil rights groups and others say exclusion of women would be sex discrimination that would be struck down by the courts.

Rep. Richard White, D Texas, head of the House Armed Services manpower subcommittee, predicts the House will approve a bill providing funds for registering men between the ages of 18 and

"If you include women you might have trouble getting it through," he said. "There's still a lot of chivalry running around this country."

A Senate source rates the chances of passing a registration bill at 50-50, but says the odds are against it if women are included.

Rep. Majorie Holt, R-Md., the ranking Republican on the manpower panel, is adamantly opposed to registering women. "This would be a complete departure from our natural policy," she said.

If courts demand that women be registered along with men "we ought to wait and let the courts make us do it. I think we ought to resist ...," Mrs. Holt

The nation's top military leaders - the joint chiefs of

WASHINGTON (AP) - As staff - are unanimously tration, and the Army's chief of staff, Gen. Bernard Rogers, is calling for a draft of up to 100,000 men for the Individual Ready Reserve.

registered, but "I'm not The questions are basic: If prepared to say women should be drafted" - even for clerical jobs. Men are better qualified physically to handle combat jobs such as the infantry, tanks and field artillery, he said.

> Adm. Thomas B. Hayward. chief of naval operations, said that from a military viewpoint, there is no need to draft women. "From an equity standpoint," he said, "that really is a political decision rather than a military

> Hayward said he could not support registration of women as strongly as he could for men. Gen. Lew Allen Jr., Air Force Chief of staff, said it is not essential to register women or to

Registration and the draft

have been put on Congress' agenda because of deep shortages in the military reserve pools to be called up in a crisis. Selective Service System officials acknowledge it is not capable of producing enough

manpower fast enough in the

event of war. President Carter and Defense Secretary Harold Brown say any registration program should include women as well as men, although they have not yet endorsed registering anyone.

"If we register persons for future use in some form in our country, it would probably be inevitable we would register both, but that doesn't mean men will be drafted or that men will be drafted to go into the armed forces," Carter said

Robert E. Shuck, acting

director of the Selective Service System, has a different opinion.

Perhaps we should not require women to register and be subject to induction until all other factors are equal, for example, until men develop the capability to have babies," he said.

register or draft women. Shuck said a full mobilization would require up to 10 million men-and there are 16 million to 20 million draft eligible men of ages 18 to 26.

A registration bill sponsored by Sens. Sam Nunn, D-Ga., chairman of the Senate Armed Services manpower subcommittee, and Harry F. Byrd, a Virginia independent, makes no provision for registering women. Nor does one submitted by · Sen. Robert Morgan, D-N.C.

Spreads in Russia MOSCOW (AP) - Russia's

most charismatic religious figure has come under renewed pressure from authorities in a move against what some Christians say is a revival of faith among the young.

Supporters of the Rev. Dmitri Dudko say uniformed and plainclothes policemen have intimidated worshippers at his small Russian Orthodox church outside Mocsow, standing about inside during the services and roughing up two people outside.

Dudko, who has said "it won't do any good to threaten me. I'm ready for anything," is an officially ordained priest who has become a popular underground figure among young Christians who pass his unofficial writings from hand to

He argued there's no need to . The priest, 57, small and blading, with a fringe of long, white hair, has been interrogated and harassed, and in recent years was moved to a small parish after holding a series of unusual question-and answer sessions for believers in the normally sedate Russial Orthodox Church.

His attempts to connect religion with everyday life has been seen as a challenge to Soviet authorities, who allow the

LOST-VEGAS

I am not one to look for hidden meanings in every event. I do not feel as if all things happen to teach me some lesson. I am sure I missed my plane yesterday because it was raining and foggy. I must admit the whole thing looked fishy.

In the first place, I was supposed to go to Las Vegas, Nevada. Sin City itself! Had I been going anywhere else I would never have noticed the coincidences, but going there is in itself sort of

There should have been very little concern on anyone's part about my going...

I am too tight to gamble.

Raquel Welch left the night before-typical of my

I was only going to be there one night. And, I was going to speak to a Morticians

All of this put together seemed so safe my wife

was letting me go by myself. So, I drove to the airport in high spirits and yet relaxed since I was not anticipating any big deal.

When I parked my car all was clear. Just as I got to the ticket counter, fog rolled in. Had my plane been five minutes earlier, it could have landed with ease. It tried to land in the fog, could not do so. It went on to Albuquerque.

I rushed to the ticket counter to book an alternate route. I got in the shortest line. Guess which line was the slowest? When the roll is called up yonder, I will be in the wrong line.

All alternate flights booked up while I stood in the wrong line. I even tried to go to Los Angeles and back to Vegas. Nothing would work.

Ten minutes after my plane flew on by the fog cleared and the sun was shining. One of my weird friends caught a plane to Phoenix with no hitch at all. I came home.

In spite of myself, I began to ask, why? Maybe the plane was going to crash and I was saved. What was I to do-hope the plane crashed so I could have a great story to tell?

Maybe I was just not supposed to go ... Maybe there is a lesson there. Probably is, but

so far, I can't find it .... I guess I should play the religious game of one-up-manship and build a big illustration out of

the event. I SHOULD do so .... But I am so tired .... And I still want to go to Lost-Vegas. All I was

going to do was speak to some morticians..honest! Warm Frustrated Fuzzles, Doug Manning

So Ross Perot organized his own elite corps of commandos and orchestrated the greatest jailbreak in history.

Secretly, 14 carefully selected employees of EDS - led by a retired Army colonel underwent commando training.

They went to Iran with enough money concealed in their shoes to hire Iranian revolutionaries to storm the largest prison in Iran. This they did on Feb. 11.

Among the 11,000 prisoners who escaped were the two Perot was determined to rescue.

The two EDS employees were then smuggled across the border into Turkey where Perot had a jetliner waiting to fly them

Texas is not what it used to be. That, of course, could be said of any place.

But Texas, in the braggadocio days before its vast size was eclipsed by Alaska's, before the oil giants were depleted and before anything more than equality became suspect ...

Texans tended to do things their own way. One still does.

Richard Lesher

# A Better Way for Blacks

WASHINGTON -- For years, the liberal message to the black community has been one blaring and unending commercial for more government as a cure to any and all black complaints. Those of us in the business community have sent a different message--free enterprise is the true philosophy of those struggling to get ahead. For while the wealthy usually have the influence to live well under any system, an ambitious poor person can only succeed in a climate of freedom which provides individual opportunity, rewards achievement and places a premium on dynamic

economic growth. It has become customary to believe blacks are, and will always remain in the liberal camp. Even if that perception was correct, it isn't anymore. Several factors have recently combined to increase the receptivity of blacks to business: The undeniable failure of so many supposedly compassionate federal programs; the willingness of liberals to take black support for granted and to oppose the repeal of laws which actually keep blacks pinned to the bottom of the economic ladder; the recognition by business of the special economic and social needs of the black community, and the growing commitment by business to marshall the resources of private enterprise and promote genuine economic change-these are all reasons why more blacks are increasingly looking to business for new leadership and a possible new partnership.

Americans are by nature a compassionate people. During the past decade they have voluntarily given billions of dollars in taxes to the federal government, thinking the money would be used to help those who cannot help themselves. But much of that money never reached the poor, because championing the disadvantaged has now become more than an Thomas Sowell, a black economist, describes this cruel hoax with these words: "To be blunt, the poor are a gold mine. By the time they are studied, advised, experimented with and administered to, the poor have helped many a middle-class liberal to achieve affluence with government money."

Many of these same liberals, who believe they alone know the real needs of the poor, are themselves promoting policies which keep the poor down. For example, the quest for a new future of no growth, soft technology and lowered expectations has become very chic for many card-carrying liberals who are already members of the leisure class. But just think what that would mean for poor families struggling to break out of the ghetto? No growth would freeze them into a permanent position of poverty and

dependence. Liberals are also fighting repeal of a whole series of laws and regulations which blatantly discriminate against poor working people. Benjamin Hooks, executive director of the NAACP, was recently quoted in Time Magazine saying unnecessary regulations were killing black neighborhoods because 'nobody, but nobody is buying into a decaying black ghetto except blacks themselves. So the effect of some regulations is almost 100 percent to exclude blacks." But that's just the beginning.

Eminent black economists like Walter Williams have pointed out that the minimum wage law results in higher black unemployment because it often makes hiring unskilled workers too expensive for only marginally profitable businesses. Yet despite the pleadings of black economists, Congressional liberals refuse to support a youth-wage differential, while they continue to favor an unrealistically high minimum

But what about blacks who already have a skill--say construction-and are hoping to get work under a federal contract? Chances are they'll be disappointed, too. If, like many blacks, they're non-union, they could easily be zinged by the Davis-Bacon Act which requires all workers on federal construction projects to be paid at high prevailing levels. The Administration's economists favor repeal of Davis-Bacon, but labor doesn't, so President Carter is leaving it alone.

Or what about black persons, for example, who would like to purchase a taxi? Sorry, even they face tremendous roadblocks. Some cities have tremendously expensive licensing fees. So many blacks who could become small taxicab busineessmen, end up collecting welfare.

I believe the business community is approaching these very real problems with genuine solutions. Last year, U.S. corporations voluntarily bought \$1.8 billion in goods and services from minority-owned business firms. Business is also trying to help straighten out the scandal-ridden CETA program and redirect it into the private sector training program where blacks can learn real skills for productive jobs.

Obviously, we must all do more. But I believe, along with Benjamin Hooks and an increasing number of other black leaders, that real progress can only come from a stronger private economy and more private jobs. In the words of Hooks himself, "at the national level, and in every local Chamber of Commerce and Better Business Bureau, black leaders and business leaders should be sitting down to deal on the points on which we agree."

# Clandestinely, Perot began How To Lower Your Community's Taxes

tired of seeing your local taxes the next parade. go up each year, even though the level of services might stay the same? Did you know that there are many alternatives which could provide your community with an almost surefire way of reducing your tax burden - to cite but one, a privately-run fire department? Research published by the Local Government Center in Santa Barbara, California, indicates communities now contracting with private fire departments

have cut the cost of their fire protection roughly in half. Two communities that have proven this concept are Scottsdale, Arizona, and Elk Grove Township, Illinois. In Elk Grove, the owner of the American Emergency Services Corporation, Gary Jensen, estimates he can save \$6,000 each time he buys a fire truck

without decorative chrome. The tradition, of course, has been for fire departments to use spiffy chrome-plated trucks which must be polished by idle firefighters at additional tax-

WASHINGTON - Are you payer expense in anticipation of Witzeman deliberately cuts to approximately \$15 per capita

In Scottsdale, the owner of the Rural Metro Fire Department, Lou Witzeman, not only avoids chrome trucks, but factory-built equipment as well. Witzeman has found his company can build its own equipment for under half the regular cost. Witzeman has also developed

other ingenious ways to cut unnecessary costs without sacrificing efficiency. In a story appearing in TWA's February edition of "Ambassador" magazine, Witzeman said 80 percent of all fires are the kitchen or brush fire type and can be extinguished with less than 300 gallons of water. So he developed what he calls an "attack truck," which is basically an oversized, specially-equipped pick-up truck with a 300 gallon pumper. The truck can be operated by one person and it is the first piece of equipment Witzeman sends to a fire. If the fire is too big, he has additional equipment on the scene within minutes.

not on his equipment which features radio-controlled fire hydrants, remote-control units capable of carrying water into a fire too hot for a fireman, and even microfilm viewers which permit firemen to examine the floor plan of a building while their trucks are still speeding to the blaze.

Probably the greatest source of savings for a private fire company is the unique way it staffs a portion of its force with reservists. In Elk Grove, rather than pay for an expensive contingent of full-time firefighters who would be idle much of the time, Gary Jensen employs only nine full-timers and supplements them with 17 paid reservists at lower wages. The reservists hold regular jobs in the community and can be immediately summoned by portable paging radios. What about the bottom line?

The cost of these two operations, which have both established dependable records of firefighting skills, works out

corners on nonessentials, but in Elk Grove, and \$11 in Scottsdale. Compare those prices to the national average of approximately \$30, and you can understand why similar private operations are spreading across the country. And obviously, private enter-

prise can be used creatively in other areas to secure traditional public services for less money. According to "Ambassador," the police force in Scottsdale is only half as big and much less costly than forces in other cities of comparable size.

Given this innovative spirit, it should be no surprise that taxes in Scottsdale are low and that its citizens are pleased with their city government. The lesson here is clear. Our private enterprise system offers magnificent opportunities to solve problems, and it is waiting to be tapped for the benefit of every

man, woman and child in America. So if you're tired of seeing your resources being pumped away, maybe it's time your community gave private enterprise a try.

**Bootleg Philosopher** 

# Let Them Pay

[Editor's note: The Bootleg opher on his Deaf Smith County grass farm suggests one way to cut covernment spending with a minimum of offense.] Dear Editor:

If there's one thing everybody's agreed on, tax payers and politicians alike, it's the need to reduce government spending. But the joke is, Where?

Ask any politician and he'll tell you he's four-square in favor of cutting spending. Ask him where and he starts stuttering. If he's for reducing grants to cities he makes the cities mad. If it's whacking the farm program, he makes the farmers mad.

Ask nearly any citizen and you'll find he's in favor of cutting spending anywhere except around him and his area.

Clearly, the place to cut government spending is where it'll make the fewest number of people mad. After long and hard thought I have found it.

I don't know off-hand how many office-holders there are in this country but let's call it a illion, give or take a few hundred thousand. Whatever it

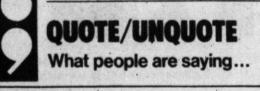

is, not a one of them pays the utility bills in his office.

The answer: install separate meters in every government office in the land and send the utility bills to its occupant, not to the government.

If the average bill for heating, cooling, lighting and telephoning in the average government office from top to bottom, from county to state to Washington, runs no more than \$100 a month, and if there are a million such offices, that's a tax saving of 100 million dollars a month. If it's \$200 a month, after you figure in what those 14-foot-ceiling offices in the new U.S. Senate building require, the figure comes to 200 million dollars a month, or nearly two and a half billion a year, which is half enough to pay for the next peace treaty, or to patch up the last one after it's broken.

Of course this is only a rough estimate and the figure no doubt would come down considerably after office-holders began paying their own utility bills.

Yours faithfully

Ralph Nader

# Teacher Invents New Method

NEW YORK (NEA) -First came the new math, then the new grammar. Now there's the new penmanship.

It's called \*"D'Nealian

Handwriting" after Donald Neal Thurber, the Michigan elementary school teacherturned-principal who developed it in the mid-1960s. Within a decade, Thurber predicts, every youngster in the nation will learn to write by his simplified method.

Thurber says the "lightening bolt" that led to his invention struck in 1960 as he was printing on the chalk-board of his first-grade classroom.

Suddenly, it did not make sense that he was teaching his students to print straight up and down when they would have to learn to write slanting cursive two years later. And why were they making discontinuous "circles and sticks" when they would later have to connect their letters with a flowing rhythm?

'There was no evidence for most of the stuff we were doing," says Thurber. Teaching of printing had changed little in the halfcentury since it was brought to the United States from England. (Before that, students simply started out writing in cursive.)

So, Thurber threw out the circles and sticks. With them went the wide-lined paper and fat pencils.

He introduced streamlined characters that could be printed without lifting (regular-sized) pencil from (standard-lined) paper. (The only exceptions are f, x, the cross in the t and the dots over the i and j.) Letters are written at a "natural" slant instead of vertically.

Thurber gave his students simple step-by-step instructions for forming each letter, his voice rising on the upstroke and lowering on the

downstroke. A lower-case g, for example, is described as "around,

MICHIGAN EDUCATOR Donald Neal Thurber claims youngsters prefer his simplified D'Nealian Handwriting. Not only does the new printing method look more like "grown-up writing," but it allows them to develop a more individualized script.

down, up, down and a fishhook under water." A small b is "high start, down, around, up into a tummy." And an m is "down, up, hump, hump and a monkey

Thurber doesn't teach letters in alphabetical order. Instead, he introduces similarly written letters as one group; the first group is a, d,

o, c, g and e. He claims a major advantage of his method is that it leads naturally into cursive with little more than the addition of connecting strokes. Only five letters f, r, s, v and z - are written differently. Many students switch on their own to 'grown-up writing" by the end of the first grade.

'They don't have to literally unlearn 21/2 years of circles and sticks," explains. "And it probably

saves 50 percent of teaching

According to Thurber, students using D'Nealian average at least half a year ahead of their peers in handwriting. Even those with learning disabilities have less trouble with the new method.

He claims students prefer D'Nealian because it more closely resembles adult handwriting and because it removes the pressure of struggling to conform to a copybook model of penman-

A student is allowed to develop a personalized script as long as it is legible and consistent in the "three - size, slant and spacing. So, small or backhand writing no longer dooms one

to low marks in penmanship. 'Writing is tremendously individualistic, like a finger-

print," says Thurber. "We should get away from, 'Evervone must do it like it is on the board or you can't go out for recess.

Thurber - who says he would give his own penmanship only a C - even believes this attitude will help keep handwriting legible in later life. He theorizes that people resort to unreadable scrawls in frustration at not being able to match the

"If you have more pride in your writing, the end results should be better," he

After three years of developing his method, Thurber typed up an 18-page instructional manuscript that he copied on his school's mimeograph. In 1968, he started peddling the booklet at teachers' meetings until he finally persuaded one teacher to try it. "She liked the method and

the children liked using it, so she told a few more teachers about it," Thurber recalls. "And so it went by word of mouth for almost 10 years." Now, D'Nealian has been expanded into a series of texts for grades kindergar-

ten through eight, published by Scott, Foresman and Company. The original 18 pages have grown to more than 1,000. Thurber estimates that about 12,000 students from

4,000 schools have already

learned to write by his meth-But does this mean parents can no longer help their youngsters with handwriting as well as math? Thurber says no. At his school, parents of pre-kindergarteners are given materials explaining D'Nealian; they can eas-

printing at home. In fact, he muses, maybe instructions on D'Nealian should be given to new mothers at the hospital instead of the usual baby powder and paper diapers.

ily master its basics if they

want to start their children

# Pressure Test Created

PARIS (AP) — Three French doctors say they have devised a test that helps predict whether a person will develop high blood pressure in time for the disease to be prevented.

The test, hailed as a breakthrough in France, depends on a new theory of what keeps some people's blood pressure abnormally high.

Doctors have called high blood pressure a "silent killer"

head of the research team working at Necker Hospial, said scale.

Americans.

the new test is still too expensive to be used on a mass

because it underlies many fatal

strokes and heart attacks. Its

sufferers include 35 million

Professor Philippe Meyer.

But he said it could probably soon be used to screen persons in families where there is a

# Health Department **Checks Graduates**

AUSTIN, Texas (AP) - The state health department will check the health of Port Neches High School graduates, beginning in 1964, following initial findings that leukemia occurs more often in that Southeast Texas area than elsewhere.

The department reported Thursday "leukemia and related conditions" in Jefferson, Orange, Chambers, Hardin and Liberty counties, "indicate there may be some increased incidence of leukemia in the area."

Port Neches is in Jefferson County, which has a heavy concentration of petrochemical complexes.

Four deaths from leukemia have been reported in individuals who were graduated from Port Neches High School in 1964, 1966, 1968 and 1974, and three of these cases have been confirmed, the department said in a statement.

The study will involve students graduating from 1964 through 1978.

STORE HOURS:

"It must be emphasized," the

study is concerned with the incidence of leukemia and related conditions, not the cause. Studies of the cause of cancer are extremely complex and are undertaken only if there is clear evidence of a significant increase in incidence."

department said, "that this

Department figures show leukemia deaths in the United States in 1950-1969 were 6.77 per 100,000 population. In 1969 through 1977, the leukemia death rate in Jefferson County was 6.82 per 100,000 population, in Chambers 6.96, Hardin 6.65, Liberty 9.63, Orange 6.84 and all of Texas 6.92.

Bodie Pryor of Port Arthur and four other leukemia victims or their survivors reportedly have filed a multi-million dollar lawsuit against B.F. Goodrich Co. and Texas-U.S. Chemical Co., which have plants near Port Neches High School.

Pryor, a chemical engineer for 20 years at a plant in the area. was interviewed by the Austin America-Statesman.

history of high blood pressure. causes. Persons found to have a tendency toward the disease could take preventive measures. such as sticking to a low-salt

diet. Meyer said in an interview. "The data if true look interesting," said Dr. David Case, an American doctor briefed on the French findings last month.

But Case, clinical director of the hypertension center at Cornell Medical Center in New York, said the French theory developed recently that hypertension has several different

The French findings, published last month in the British medical journal Lancet, won an enthusiastic response among French physicians, and the Paris newspaper Le Monde hailed it as a major discovery.

NEW YORK (AP) - William. Morrow & Co., Inc., and Bantam Books, Inc., say they have established a joint imprint, Perigord Press.

They say it is for the purpose of acquiring simultaneously hardcover and paperback rights to works of fiction and non-fiction.

# Crisis Called Hoax

By LOUISE COOK Associated Press Writer

Elizabeth Sullivan of South Boston keeps her thermostat set Debbie Stern, a Los Angeles at 60 degrees. "I can't afford piano teacher. "I do it to save on the prices any more," she bills. explained.

Concern about the increasing cost of heating oil, electricity and gasoline has prompted many Americans to cut back their use of energy, according to the Associated Press interviews in a random selection of cities.

Most people say they have been moved more by economics than by President Carter's appeals for conservation, although a few indicate they also are worried about supplies. An Associated Press-NBC new house last year.

News Poll, conducted separately, from the interviews, showed that most Americans do not think there is an oil or gasoline shortage. One person in five has not made an effort to cut energy used to cost \$10 or \$11 to fill the use, the poll indicates. And one in four won't drive any less even if gasoline goes to \$1 a gallon. · Among the findings of the telephone poll of 1,600 persons questioned on Monday and Tuesday were:

-A majority of people believe reports of shortages are a hoax to drive up prices. Sixty-eight percent said the oil shortage was a hoax; 70 percent felt the same way about the gasoline shortage

-Asked whether they had trimmed energy consumption in the past month or two, 19 percent said they had lowered the thermostat, 20 percent said they did not drive as much and 16 percent said they used lights or appliances less.

-What would happen if gasoline went to \$1 a gallon. Twenty-six percent of those polled said they would continue to use their cars as they do now; 44 percent said they would drive less; and 19 percent said they would buy a smaller, fuel efficient car.

-Almost four out of 10 people blamed oil companies for recent rises in the price of gasoline and heating oil. Twenty five percent blamed oil-producing countries and 19 percent blamed the U.S. government. Four out of five said the price increases were unjustified.

The interviews, meanwhile, yielded mix responses. Most people said they were trying to be careful of their energy use even before recent presidential appeals for savings. "I take

cut down on car trips," said

Renee Quick of Boise, Idaho, said she has always practiced conservation. "I've had to," she said. "I came from a family of nine children."

Mrs. Quick said she and her husband "have t lought about conserving energy since the first oil crisis in 1973. She said she keeps driving to a minimum by going grocery shopping with a neighbor and added that energy efficiency was a key concern when the familly shopped for a

Tina Brockemeir of Omaha. Neb., said that because of rising costs, she and her family "will attempt to do everything we can to conserve gas." She said it

provide a possible answer.

"The best player in all basketball," says Johnson's coach, Jud Heathcote. "In all my career I have never seen a better basketball player," adds Al McGuire, former Marquette Indiana State rookie Bill Hodges coach and now a broadcaster, to the chagrin of those who award that accolade to Bird, the versatile 6-9 whiz from Indiana game with a 25-5 record, while

Johnson - has restored faith in what has been regarded as a dving art - the passing game. He is content to work the ball down the court and then deftly whip it off to a teammate, allowing the teammate to get the goal.

They call him "Magic" - a nickname pinned on him by a Lansing sports writer, son of Spartan sports information chief Fred Stabley.

He is conductor of "The Magic Show." It is one of the most exciting bits of theater in basketball.

Sporting a rakish cap, he will park himself in a chair in the press headquarters and talk until team officials haul him back to the hotel. He is refreshingly outgoing.

"Man, this is fun!" he exclaims unashamedly. "I love to play basketball. I love people. I love to sit around and talk. This is a great live. Living in these nice hotels and things.

"I don't see how the NBA. (National Basketball Association) can be this much fun.'

#### One On One Strategy Hopes To Stop Sycamores only an interesting matchup in good one-on-one players. managed to survive - and, in

SALT LAKE CITY (AP) -Thirty-two teams have tried to stop Larry Bird so far and 32 teams have failed.

So DePaul's Ray Meyer isn't going to try - at least not that

"We know Larry's going to get his points, and we're naturally concerned with him," said the DePaul basketball coach as the Blue Demons prepared to meet top-ranked Indiana State and the Sycamore Whiz Kid Sunday in the championship semifinals of the NCAA playoffs. "But we have to worry about the other players on Indiana State, too."

Instead of ganging up on the Sycamores' one-man gang, as many other teams have tried to do, Meyer plans to challenge Bird with a "head-up" confrontation - meaning that defensive star Curtis Watkins would play him man-to-man.

The head-on collision took place at the Special Events Center at the University of Utah after the other semifinal game between Michigan State and

'We feel that Mark Aguirre can do an excellent defensive job on Bird, too," Meyer said Friday. "But we'll start Watkins on Bird and if he can't go, we'll switch men around.'

Watkins' only problem may be the aftereffects of a wrenched knee that he hurt in the West Regional title game with UCLA.

"We practiced without Curtis all week," Meyer noted. "His timing was off, but he will be ready to play ball when they

Bird, though, may be too much for one man - or even two or three, as he has shown in the past while leading the Sycamores through a heady 32-0 season. Through a forest of double-and triple-teaming and just about every conceivable rigged defense, Bird has

AIR FORCE ACADEMY, Colo. (AP) - Maj. Hank Egan reportedly has been informed that he will remain as Air Force Academy basketball coach next season but then may be asked to resign.

The Colorado Springs Sun, in a copyright story Saturday, quoted Egan as saying he was told it was unlikely he would be kept on at the academy after the 1979-80 season.

"It hurts a little bit," Egan was quoted as saying. "Coaching at the academy has been a big part of my life."

Egan, 42, has been at the academy a total of 14 years and told the Sun he had hoped to stay on indefinitely. He will end 20 years of active military duty on June 8, 1980, but said he hoped to be kept on as civilian head coach.

In his eight years as the Falcons' head coach, Egan has compiled a 105-95 record.

ST. LOUIS (AP) - Bill Hodges, Indiana State's first-year basketball coach, has been named College Coach of the Year by The Sporting News, a weekly sports magazine.

Hodges has directed the Sycamores to NCAA Final Four with a current record of 32-0. the school's first-ever undefeated season

An Indiana native, Hodges was an assistant coach at Tennessee Tech for four years and an aide at Armstrong State of Georgia for another year before joining the Indiana-State staff as an assistant in 1975.

# and the championship game

By JOHN NELSON AP Sports Writer

Fifty-eight points in one night - not a bad evening's work even for Julius Erving. But in Catchings and Ralph Simpson two games?

those points on Nov. 8, so Catchings, Simpson and Money what's this about 58 points

anyway? Well, that's the way it'll look

in the record book. The Philadelphia 76ers and the New Jersey Nets played a rare National Basketball Association doubleheader Friday night. The first game - some 17 minutes, 50 seconds of it was to complete a game that

NBA Commissioner Larry O'Brien ruled that the two clubs would have to replay the last quarter and 5:50 of the game the point at which third echnical fouls were assessed against Nets Coach Kevin Coughery and player Bernard and drew a technical. Only King. The Nets protested the original outcome a 137-133 loss. and O'Brien upheld their contention that there was no provision in NBA rules for three technicals against one indivi-

The second time around, the Nets lost 123-117 as the Sixers' Erving scored 12 points in the final 17:50 to go along with the 20 he had scored on Nov. 8. The foers won the second game 100-98 with Erving scoring 26 points and helping a late rally.

Elsewhere in the NBA Detroit beat Washington 124 -114. Indiana outscored Houston 141-134. Atlanta defeated San Antonio 115-108. Chicago clobbered New Orleans 116-99. Denver breezed past Boston 137-113. Phoenix drubbed Kansas City 126-107, Los Angeles plastered San Diego 156-119 and Golden State edged

Milwaukee 116-113. Although there have been

doubleheaders before, there was one unique thing about Friday night's game. After Nov. 8, the Sixers and the Nets made a four-player trade - Harvey going to New Jersey for Eric Actually, he scored 20 of Money and Al Skinner. each got in the game for both

teams. Skinner, meanwhile, didn't play for either team in the suspended game.

Pistons 124, Bullets 111 Bob Lanier scored 29 points to pace Detroit past Washington. which lost both head Coach Dick Motta and his assistant, Bernie Bickerstaff, during a flurry of technical fouls in the third

The Bullets had six technicals whistled against them, five in an eight-second span. Motta and Bickerstaff each were hit with two T's after the Bullets' Bob Dandridge was called for a foul minutes later, Washington's Tom Henderson drew the

game's sixth technical. To supplement Lanier's scoring, John Long, had 27 points and Kevin Porter had 24

points and 12 assists. The Detroit victory snapped a four game Bullets winning

Pacers 141, Rockets 134 Indiana rallied from a 20-point, second-period deficit behind Billy Knight and Ricky Sobers, and the Pacers took the

by Knight at the end of the third Knight scored 20 of his 28 points in the fourth quarter, and Sobers also had 28 points. Moses Malone led Houston with

Hawks 115, Spurs 108 Terry Furlow's career-high 30 points helped boost Atlanta past San Antonio. The loss was the sixth in the past eight games for

Chicago broke a four-game losing streak with some hot fourth-quarter shooting and the 25 points of Artis Gilmore. Gilmore sank five consecutive shots at the outset of the final period as the Bulls hit 11 of their first 13 shots in that frame.

Nuggets 137, Celtics 113 Denver rolled to a 64-50

halftime lead on the shooting of reserve Tom Boswell, and Daivd Thompson salted the victory away for the Nuggets by scoring 18 points in the third quarter. Boswell wound up with a

season-high 22 points, and Thompson had 31.

Suns 126, Kings 107 Paul Westphal scored 36 points and Walter Davis had 30 to pace Phoenix to its seventh victory in 10 games. Phoenix led by as many as 23 points in the second period after leading 35-25 after one period.

Lakers 156, Clippers 119 Kareem Abdul-Jabbar and Adrian Dantley each scored 25 points, and Los Angeles rolled to its biggest point total and victory margin of the season. The Lakers led 68-41 at the half as Abdul-Jabbar scored 14 of his points and grabbed 16 of his 18

rebounds. Abdul-Jabbar also had nine assists and eight blocked shots.

Warriors 116, Bucks 113 Nate Williams scored 17 points in the fourth quarter. including a basket and two free throws with five minutes left in the game to break a 99-99 tie. Consecutive baskets by lo lo:

White and John Lucas iced the win as Golden State broke a three-game losing streak. Williams wound up with 26 points.

#### Kansas City at Souttle NFL Wrong Says Coach

AKRON, Ohio (AP) - The, National Football League should reconsider its rejection of instant replays as aids to officials on controversial plays, says Cleveland Browns Coach Sam Rutigliano.

The coach, who was an analyst of instant replays during the 1979 Super Bowl telecast and who has worked as a commentator on NFL games for NBC, said instant replays would help officials on plays that decide the outcome of games. Rutigliano said in a WHLO

Radio interview that the NFL was looking for a 100 percent remedy to the problem of controversial calls. By voting down the instant replay proposal earlier this year.

Rutigliano said he felt the NFL placed undue pressure on its officials, who he said do a 'super" job.

The Browns lost games to Pittsburgh and Houston last season on controversial calls. Instant replays in each case raised questions about the judgment of the officials.

# Foottennis New Sport For Serious Kickers

ROUSTON (AP) - Years ago when Bob Kan introduced soccer grule liteliens to the National Football League, many ons football experts laughed and said he was crazy.

But today 26 of the 28 NPL reams have soccer style lickers." Kap says rrtumphanty. "So who's crazy""

ust when Kan and his magniation had attained some credibility, he came up with another brainstorm that once again has fans wondering if he's gone whacks.

premiered here recently before a sometimes quizzical some times cheering Summit crowd.

The game is played on an under-sized tennis court with a ball similar is a volleyball using the scoring system of table tennis and the skills of succer no use of hands please.

Riouston Otter Richer Toni Fritsch, a cohort in Kan's success licker invasion of the NFL has earned with his old friend once again and was the winner in the first of a series of foottennis class.

tournaments Kan has planned Fritsch, Dallas Cowbov sicker Rafael Septien. Toni Linhart of the Baltimore Colts and Joe Danelo of the New York Giants participated in the fournament.

played prior to a soccer game. "It gives us a way to keep in

shape during the off-season," said Fritisch, who hit 14 of 18 field goals for the Oilers last season. "Most of us go out in the off season and kick a soccer ball around anyway. It helps you keep control of the ball."

It doesn't make any difference that it's not a football." Fritisch said. "You hit them all the same - with a touch of

Septien, who also plays tennis, said some tennis strategy is used in foottennis. Does he play a serve and volley same of foottennis?

"Yes, only you use your head when you get to the net." Septien said. "It's going to take

Danelo says the kicking practice is good. "It's just like linebackers lifting weights to keep strong in the off-season." he said. "We kick the ball."

Kap, who has another foottennis tournament sche. duled next month in Mexico City, foresees a future foottennis circuit similar to the protennis tour, with tournaments around the world

"We could play in Paris with the top soccer players of France," Kap said. "We can out Pele against Toni. That would certainly be an attract.

# Spurs' Kenon Considering Free Agent Market

free agent status is like a rarrie in a new car. The San Antonio Spurs know it's there, but they'd just rather drown it out with the radio so they don't have to think about it for a while.

The Spurs, bound next month for the National Basketball. Association playoffs, face the prospect after the season of either shelling out big money or losing the All-Star forward to the free agent marketplace.

Kenon, 26, a 6-9 forward averaging more than 22 points and nearly 10 rebounds per game, is going to be asking for a healthy increase to his reported \$240,000-per-year salary. And Kenon has already been quoted, as saying he "wouldn't mind" signing with the punchless Knicks and playing in the NBA's glamorous New York

Some team insiders feel the Spurs will lose Kenon because they either can't afford or are unwilling to pay the large sums of money a free agent of

"I know they (the Spurs) could pay my salary." said Kenon, who still adds that talk of his possible departure is premature. "They were one of the strongest teams financially in the ABA. The team has never been in financial trouble. We've always drawn good crowds. attendance has been increasing since we've been here."

If what Kenon says is true, will the Spurs shell out to keep

'That's another question altogether," said Kenon. "If they want to keep winning. I think they will. This is a new situation for them. They've never had to pay a lot.' Spurs President Angelo

Drossos has nothing to say about Kenon's impending free he said curtly. "At this time, we're more concerned and we're devoting our interest to

Why worry about it now? It's not an important story to him, me or anyone else until the season is over. We'll wait until after the year," said Spurs Coach Doug Moe.

the playoffs and the ending of

this season."

Guard George Gervin, last year's NBA scoring champion and this year's leader, renegotiated his long-term contract with the Spurs after a bitter preseason feud in which he demanded to be traded. His salary at a reported \$359,000 per-year leads the team payroll. Kenon's is second.

Kenon, a six-year pro who began his career with the New

# Baseball's Locker Rooms Open To Women

By FRED ROTHENBERG AP Sports Writer

Major league baseball locker rooms are raucous, bawdy, crowded and sweaty. They are possibly the most uncomfortable places for journalists to interview athletes.

Samantha Stevenson wants to see all this for herself because she's a writer and that's where soon see what male writers have been seeing for years - lots of card games, lots of shrugs and some downright surliness.

Stevenson and the Philadelphia Phillies recently reached an out-of-court settlement of her suit against the National League club for barring her from the locker room last year. Although the welcome mat is not out, the door is definitely open. And that's all Stevenson wants.

"Now we can get on with the reporting of baseball from the viewpoint of women." Stevenson said. 'Now women reporters in Philadelphia can finally compete equally with men - and finally show what

we can do." Most of the teams surveyed in agent status. "There isn't a random study by The Associated Press will be like the

Phillies, allowing women to tread in the previously all-male locker room. Among the contacted teams, Atlanta, Texas. San Diego, Boston and Seattle will allow all properly credentialed reporters into the club house without any time restrictions.

The St. Louis Cardinals said they would open the locker room to everybody for 30 minutes immediately after the game, then close them to all reporters.

Minnesota, Cincinnati, Kansas City, California, Los Angeles and the New York Yankees were also contacted but said they hadn't reached a policy position yet.

And Milwaukee and Cleveland said special interview areas outside the locker room would

be set up to accommodate the Yankees could bar all women reporters. Only this approach would be contrary to baseball Commissioner Bowie Kuhn's policy statement suggesting that the clubs initiate a non-discriminatory policy and provide "identical access in one. way or another to all reporters."

That position did not come easily to Kuhn, who only Yankees lost a discrimination case last September brought against them by Melissa Ludtke Lincoln, a reporter for Sports Illustrated.

District Court Judge Constance Baker Motley ruled in that suit that the locker room ban against women reporters was unconstitutional. She said

reporters or no reporters. They could open the doors or close the doors. And they could even provide swinging doors or curtains for each cubicle or direct all ballplayers to use towels or bathrobes. But they could not discriminate.

Most of the Yankee players grudgingly accepted the en-

"I'm not uncomfortable," said Jay Johnstone. "But when I take my clothes off, there won't be any ladies in the locker room. Hey, if the ladies are allowed in here, why can't men writers go into the showers to interview Chris Evert and Billie Jean King?"

# Rose Paternity Suit Filed

TAMPA, Fla. (AP) - Terry Rubio has taken her fight to a court here to force the Philadelphia Phillies' Pete Rose to pay child support.

A paternity suit filed by the 25-year-old woman in Ohio has been filed in Florida, too. She claims her daughter, Morgan Erin, 1, is the product of a 22-month romance with the former Cincinnati Reds baseball star. She said their affair ended

A civil suit seeking support was filed initially in Cincinnati because Florida law stipulates that no valid paternity claim exists if the woman was legally, married to another man at the time. Miss Rubio, at the time of conception, was married to a musician named Ted Baker. At the time she was getting

divorce, which later was

A spokesman for Miss Rubio said a 1976 Florida Supreme Court ruling has come to the clared the paternity restriction discriminatory and therefore unconstitutional.

The new case was filed in Hillsborough Circuit Court Wednesday.

Miss Rubio wants the court to find that Rose is the father of the child and order him to contribute support and maintenance payments for the little

Miss Rubio says she has no income since Rose cut off voluntary payments to her in December.

Rose said he has been instructed by his lawyers not to discuss the case.

# OU, Nebraska Tied In Gym Meet

FORT COLLINS, Colo. (AP) -Oklahoma, the defending NCAA champion, and Nebraska were tied for first place after the first round of the NCAA's Midwest Regional Gymnastics meet.

The two Big Eight Conference schools each collected 220.85 points after Friday's events, followed by Brigham Young

The two-day event is being conducted at Colorado State University.

Nebraska's Larry Gerard was the only double winner of the evening, capturing first place in the still rings with a 9.6 and the horizontal bar with a 9.65. Nebraska's Steve Elliot tied with Houston Baptist's Percy Price for the vaulting title, while Oklahoma's Les Moore won the floor exercises.

Steve Jennings of New Mexico won the pommel horse event, and Nebraska's Jim Hartung won the all-around

# St. Anthony's Carnival, Bazaar Today

## The Hereford Brand

Sunday, March 25, 1979--Page 1B

Preparing the items to be sold at the concession stand during today's Carnival and Bazaar are Vickie Schmucker and Sylvia Paetzold. Snacks such as hamburgers, French fries, barbecue sandwiches, corn dogs, Frito pies, chili and beans, homemade pies, coffee and cold drinks will be for sale.

The public is invited to attend St. Anthony's Annual Carnival and Bazaar today, announced Brendan Gallagher and Al Simnacher, chairman and co-chairman.

General theme of the carnival will be "Signs of March." Proceeds from the Carnival will benefit Christian education at St. Anthony's Parochial School.

This year's carnival will include a number of booths and activities, such as penny pitch, cake walk, wheel of fortune, bean bag throw, fish pond, bingo, bottle throw, ladder climb, balloon darts, number darts and country auction.

A country store will be offering its wares of homemade bread, cakes, canned foods and a variety of arts, crafts and other handmade items. A drawing will be held for an afghan made by Dora Berend.

Concession stands will be in operation selling hamburgers, French fries, barbecue sandwiches, corn dogs, Frito pies, chili and beans, homemade pies, coffee and cold drinks.

Carnival committees are composed of the

Booths and games; Albert Sciumbato, Larry Alley, Edwin Geiger, Loretta Urbanczyk.

Kitchen activities: Sylvia Paetzold and Vickie Schumucher.

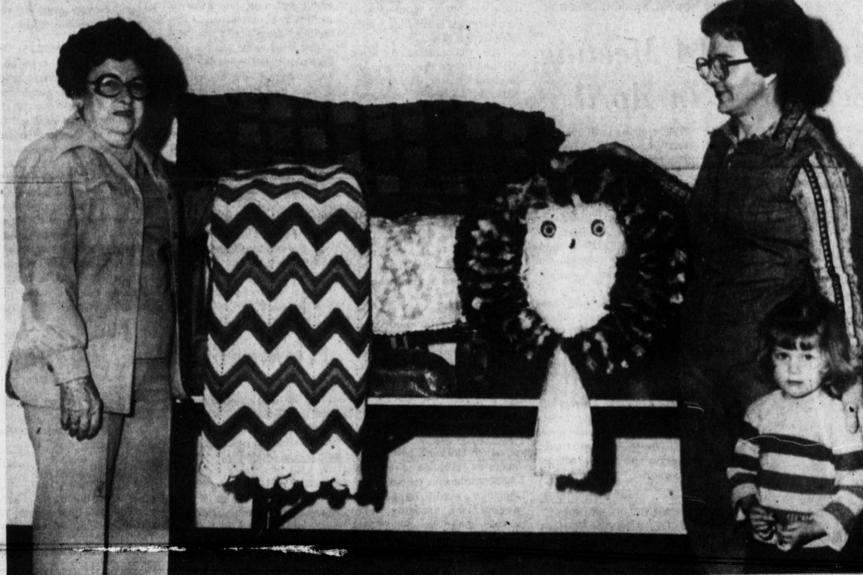

Afghan drawing; Mr. and Mrs. Boyd Foster, Mr. and Mrs. George Wilhelm and Mr. and Mrs. Sam Valdez.

Mystery gift shop: Student Council.
Country auction: Larry Walterscheid, LeRoy
Berend, Bob Baker and Fritz Backus.

Finances: Opal Walterscheid.
Clean-up: Parents of kindergarten children under direction of Becky Sanderson.

Butch Connally will be conducting the bingo game during the carnival. Chairman and co-chairman of this year's carnival are Brendan Gallagher and Al Simnacher. Proceeds raised from the benefit will go to St. Anthony's Parochial School.

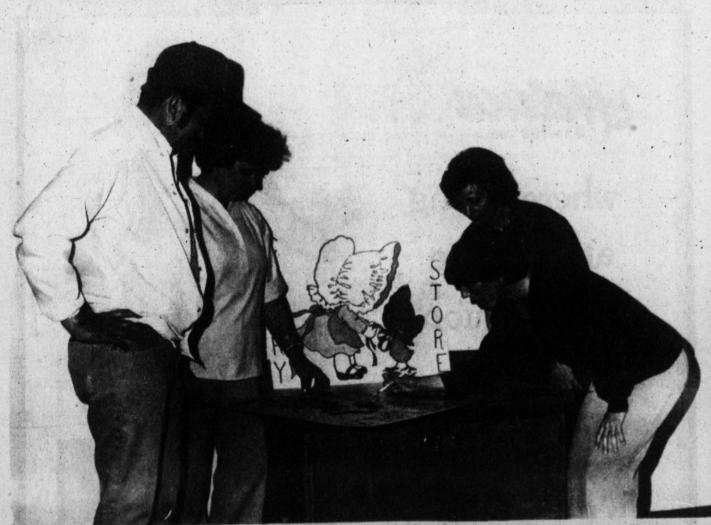

Chairman of this year's country store is Loretta Urbanczyk, right, with small daughter, Lori. Supplying the bazaar with her afghans, which are to be drawing prizes during the bazaar is left, Dora

Berend. This is her fourth year to have donated a afghan. Also donating an afghan this year is Anna Marie Dupnik.

Unloading items to be bartered today during the Country Auction at St. Anthony's Carnival and Bazaar are from left Gary Kriegshauser, auction chairman; and his assistants, Fritz Backus and Larry Walterscheid.

Doing the publicity for this year's St. Anthony's Carnival and Bazaar is left, Brendan Gallagher, who is also chairman of the carnival; Romida

Friemel, Judy Detten, and Mary Zinser. The chosen theme for this year's carnival is "Signs of March."

Getting the cake walk decorations raised for this year's St. Anthony's carnival are kneeling, Linda Dominguez, Jeanette Rogers, and Albert

Scuimbato. The cake walk is just of one of several games to be included in the carnival.

# Easter Seal Telethon To Help Handicapped

to support the Easter Seal Society this weekend in conjunction with the national telethon, to be broadcast on KFDA, Channel 10.

Local pledges will be processed by the VFW, their Auxiliary and the Key Club Headquarters for the local drive will be Lone Star Agency and pledges can be called in to 364-0555. Although there will be no door-to-door collection. individuals can call Lone Star Agency to have their donations nicked up.

The Telethon will begin at 10:30 p.m. Saturday and continue until 6 p.m. Sunday. Actor Jack Klugman will host the 191/2 hour show.

Klugman, whose memorable performance as host of the 1978 National Easter Seal Telethon added a new dimension to his distinguished career as a gifted performer, will be back this year, heading up the star -

#### Mrs. Dettman Honored

Members of Calliopian Study Club nominated Audine Dettman for the Distinguished Service Award being offered by West Texas Study University. The nomination was made Thursday night during a meeting in the library Heritage

In other business, a committee of the following women was appointed to nominate officers for the coming year: Mrs. Dettman, Virginia Holmes and Amy Gillland.

Welcomed as a guest was Buddie McBraver.

"New Doors that Have Opened in Education" was the program topic discussed by a guest speaker, Willie Braddy, counselor at Hereford High School. She stated that students are encouraged to plan their individual education so that they will have, a fulfilling career.

Members in attendance were Jane Gulley, Eula Lee Cave, Mrs. Holmes, Mrs. Dettman, Mrs. Gillland. Claudia Mc-Brayer, Meredith Wilcox, Nancy Hays, Marye Fraser, Lee Alston, Leona Carruth, Marjorie Mims, Irene Coneway, Kay McWhorter, Wilma Nobles, Kathlee Palmer and Sue James.

Engagement Announced

The Rev. and Mrs. Doug Manning, 126 Oak, have announced the engagement of their daughter. Kathy Lou, of Edmond, Okla. to Kevin Dale Burns, also of Edmond. He is the son of the Rev. and Mrs. John Burns of Edmond. The couple plans to marry May 12 in the Baptist Student Union at Central State University in Edmond. The bride-elect is a graduate of Hereford High School. She is presently attending Central State University where she will graduate in May. She is a member of the Student Education Association, Student Council for exceptional children and the Baptist Student Union. The prospective bridegroom is a graduate of Edmond High School and is presently attending Central State University. He is a member of the

singing groups out of the Baptist Student Union at Annual AHA Meeting Scheduled In April

Happyside Singers and The Descendants which are

of the American Heart Association were announced today by Billy Wall, president of the Deaf Smith County Division.

The meeting will be held April 5, 7 p.m. at K-Bob's. The public is invited to attend.

Wall stated that approximately 50 members are at which time the association will elect new directors and officers for the 1979-80 term. Delegates to the regional and state annual meetings will also be elected.

The membership will hear reports on the past year's accomplishments in Deaf Smith County. The master of ceremonies will be Ernest Langley and guest speaker will be Dr. Dennis

Other outgoing officers for the Deaf Smith County divison are Ralph Detten, vice president; Betty Kreigshauser. secretary; and Louise Witkowski, treasurer

# Ann Landers Toilet Check

DEAR ANN LANDERS: I read recently that a new utility charge for sewer use (also known as the flush tax) made a woman in Peoria so mad she paid her bill by check--written on her toilet seat lid. It was in the amount of \$33.56

The woman printed the name of the bank on the lid, also her account number, the amount--\$33.56 -- and signed her name.

The bank officials were less than thrilled with this gimmick but declared her check was legally acceptable. To demonstrate their displeasure, howher the cancelled "check" in the mail with her monthly statement. She was told to come and pick it up.

There were two lawyers at our dinner table the other night and they disagreed as to whether or not the bank was within its legal rights. We decided to ask Ann Landers. -- Perplexed In Peoria

DEAR PERP: I decided the best authority was a banker -- so I went to the legal department of the largest bank in the country, Bank of America. Here's the word from San Francisco: Since there is no legal precedent, there is no law to cover this situation. The bank, however, is under no obligation to return a check written on a toilet seat lid since it would impose an unnecessary hardship. The woman made her point. She should not expect an extra

# **Scribbles** & Scratches

By Kerrie Steiert

The creeping crud and galloping galunk have been taking their toll on The Brand staff in the past few weeks, so we've been pressed for time. The following column first appeared in August of 1977, and we've pulled it from our files with full confidence that no one will mind an infrequent rerun. (If Erma Bombeck can do it, so can we.)

S&S It has always been a source of embarrassment when someone compliments a garment and asks if I made it myself.

"ME," I bluster. "Are you kidding? I couldn't even pass elementary paper dolls."

It's not a matter of being lazy or cowardly, it's just that I recognize my potential for keeping the

ready-made clothing industry in tall cotton, as well as wool, polyester and jersey. I figure that the money I've spent on my store-bought wardrobe easily covers the Christmas bonus for every employee of J.C. Penney, nationwide.

It isn't that I didn't try my stint at the sewing machine, which produced what McCall's laughingly referred to as a dress. Ask my friend Florence, who was the first to set eyes on my homespun debut.

"What on earth are you wearing?" she gasped. "You look like you've been eaten by a silk worm." "Don't be snide, Flo. After all, I deserve an 'A'

for effort, at least.' "The most you deserve is to be rescued. Tell me, where in the name of all that is fashionable

did you find a pattern for a strait jacket?" 'Very funny. For your enlightenment, strait jackets don't have a fitted bodice," I indignantly

Pastor of Thompson Memorial Baptist Church is the Rev.

"Neither do you, honey," she critiqued.

Feeling a condescending sort of sympathy. Florence proceeded to offer advice for rendering my dress "from its resemblance to a Hefty garbage bag," to quote Flo, who has a well-developed flair for sarcasm. She's a regular Don Rickles with needle and thread.

After taking a long, uncomfortable gaze at my creation, she mumbled, "One of the problems is that the darts are set too low."

"I lowered them on purpose," I confessed. "At the rate that my figure is settling, the dress should fit like a glove next month."

"Well, in any case, perhaps we should alter the waistline," she proposed.

"Surgery would be easier," I moaned.

"Now calm down," she purred, trying to sooth my rumpled disposition, which was nothing compared to the silhouette of that awful dress.

Florence dropped to her dimpled knees and puzzled over the texture of my akimbo hemline. "I can't imagine why this hem is so 'stiff," she muttered. "Did you do like I advised and baste

"BASTE it!?" I screamed, sinking into a little mound on the sewing bench, "I thought you said 'paste'." Old Flo thought that was a real knee-slapper and she darn near laughed her fool head off. The only comfort I could find in the situation was that I bring such entertainment into my friends' dull little lives.

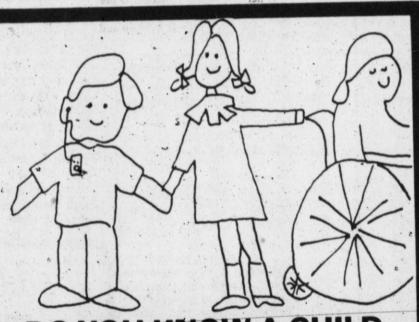

Florence eventually sobered up, although she lapsed into an occasional fit at the sight of my garb. Shaking her head in amusement, she advised that I abandon my attempts at sewing for safer pursuits, such as defusing bombs or doing mission work for Idi Amin.

Mark my words, Flo, I'll get you for that.

# Mrs. Dameron Cited as CowBelle Queen

Mrs. W.E. Dameron, matriarch of a highly-touted strain of urebred Hereford cattle, was crowned this week as Hereford CowBelles' first "Queen over 80." As bearer of the newly-established honor, Mrs. Dameron will be nominated by the local chapter for the state "Queen's" title.

The former Jane Gregg, Mrs. Dameron came to Deaf Smith County at the age of 10 in 1906 with her parents, A.W. and Effie Gregg. When she arrived here with her pioneer family, Hereford's population numbered approximately 600.

During World War II, Mrs. Dameron was a Canteen Girl and later sold Liberty Bonds as a Liberty Girl. She also volunteered her time as a Red Cross worker.

In 1920, the girl from Indiana married W.E. Dameron, who five years earlier had bought the first registered Hereford cattle, that would produce a nationally-recognized strain of Whitefaces. The Dameron family built up their herd and the ranch grew until it encompassed ten sections of prime rangeland here during its peak years.

By 1949, three years before his father's death, Bill Dameron had assumed active management of the ranch. Hecarried on the family enterprise and an impressive list of

#### Vi's Hair Fashions Located at 120 Higgins MARCH SPECIAL

accomplishments in cattle breeding maintained the Dameror dynasty.

In 1965, on the golden anniversary of the first Dameron cattle holdings, Mrs. Dameron, her son and daughter, June, reluctantly decided to dissolve the estate. However, Bill Dameron was a cattleman at heart and reinvested in Colorado ranchland in 1967. The family formed a corporation including Mrs. Dameron, her son, daughter and their families. Instead of Herefords, the Damerons changed their specialty to

The Dameron ranch at Salida, Colo. is one of the largest operations for raising purebred Limousin cattle in the nation. Bill Dameron was recently elected president of the North American Limousin Foundation Board of directors. He was one of two delegates to represent Limousin breeders in the United States at the International Limousin Council at Limouges, France.

Mrs. Dameron owns her own apartment in Hereford and

#### HHS Alumni Plan Reunion

Members of the Hereford High School class of 1954 are preparing for a 25-year reunion which is scheduled for July 28.

An informal coffee and visitation is planned for the morning and an evening dinner for that night.

This class was the last to graduate from the high school that is now Stanton Junior High. All former classmates are invited to attend and several

teachers are being contacted. Local members of the class of '54 will be meeting again April 11 at 8 p.m. in the nome of La Jean Henry for further

planning. Members who can be contacted for further information include Bill Allen. 364-6212; Doug Bartlett, 364-1483; Richard Clark, 364-4151; La Jean Henry, 364-5324 or Marian Kreig, 364-2297.

drives her own car at the age of 83. Mrs. Dameron has been a CowBelle since it was organized in 1971. She has served on numerous committees in the beef-promoting organization and was described by her fellow CowBelles as "truly an inspiration to all of us."

She earned the CowBelle Queen's award because of her dedication to CowBelles and her exemplary representation of the CowBelle Creed, which says: "Believing that the livestock industry is of basic importance to world existence, we, the American National CowBelles, dedicate ourselves to support it with our labor and finances; to encourage its producers with our understanding and love; to do all in our power to instill in the coming generation the love of the land and of life, the humility and awe before nature, and the hope and faith in the future that is inherent in cattlemen."

Mrs. Dameron is a longtime member of First Christian Church, where she holds the distinction of deaconess emeritus. She taught Sunday School there for 40 years. She has been a charter member of Hereford Music Study Club since 1916 and is active in two bridge clubs.

# Potatoes Offer High Nutrition

COLLEGE STATION -- "Spuds" -- or potatoes, offer high nutrition and few calories.

In England, once considered poisonous by some, potatoes were the focus of an attempted

"ban" by the Society for the Prevention of Unwholesome Diet (SPUD).

Today, those initials live on--and so does the potato, a highly nutritious and economical food, says Marilyn Haggard.

Miss Haggard is a foods and nutrition specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

**HIGH NUTRITION** Potatoes are loaded with

Vitamin C--each one contains one-fourth of the recommended daily allowance. Also, they provide B-vitamins thiamine and niacin--along with iron, potassium and phosphorus. FEW CALORIES

Potatoes only have about 100 calories each, so they are not

fattening. In fact, put them back in those

low-calorie menus--just watch what you pile on them, Miss Haggard assures dieters. 'HEART' DIET

Also, use them in highly restricted low-sodium diets. Potatoes have the approval of the American Heart Association

for use in diets. Fat-free and easy-to-digest, they fit any diet.

ECONOMICAL Potatoes offer economy-especially when shoppers choose quality "spuds."

Here's how: -- Look for firm, well-shaped, smooth potatoes--with very few

-- Choose those in bags labeled U.S. #1.

-- Do not buy green potatoes, sprouted or shriveled potatoes or those with skinned or discolored areas.

-- Return those with internal damage to the grocer for replacement.

#### SATELLITE LINK

**BUENOS AIRES, Argentina** (AP) - Plans for building a receiving station to link up to the Landsat satellite data bank have been announced by Argentina's National Space Investiga-

The data bank computerizes lobal climatic conditions and indicates natural resources, according to the commission.

Some types of commercial bottled water include drinking waters that come from a well or spring, specially prepared water with minerals added, and fluoridated water used to prevent tooth decay.

Mr. and Mrs. Carl Last of 231 Beach have

announced the engagement of their daughter,

MRS. OWEN ANDREWS

Revival services this past week have been held at the Frio Baptist Church. Evangelist has been Jim Wilkerson of Slaton and leading music during weekdays and evenings was Gary Brogden, who is music director of First Baptist Church in Friona. Rev. Wilkerson is went on to Sparta, Tenn. pastor of First Baptist Church in Slaton.

everybody bringing basket dinner will be Sunday and at the 16 in the Hereford hospital. His evening service here to bring special music will be Gene Duvall and a group called "The Cornerstone" of Amarillo.

Recently, Frio Homemakers Club met in Dimmitt with Mrs: Hereford. Annie Springer at South Hills Manor. She lives there now. Most of the members went at noon and had lunch at a Dimmitt restaurant. Mrs. Elbert Summers and Mrs. Joe Benson were guests. The meeting was in the fellowship room of the Home and several of the residents also visited the meeting. Mrs. Clark Andrews gave a book review for the program. The book was entitled "Pearl" and was the story of a Turkish Christian m who lived carly in this

Others attending the meeting were Mmes. Jim Brooks, Harlan Barber, Eugene Baldwin, Annie Lee Dobbins, Gary Hathaway, Jerry Richardson, T.L. Sparkman, Billy Warrick, D.F. Yandell, Miles Caudle, Owen Andrews and Miss Alma Andrews.

The club, which was organized in 1938 as a Home Demonstration Club, presented Mrs. Springer with an award, a decorative wall hanging in honor of her continuous membership for the 40 years it has existed. She was one of the charter members. The club was organized at the home of Mrs. Earl Springer, by a visiting club from Flagg for a sponsor. Mrs. Springer was elected secretary treasurer. (Mrs. Earl Springer was the first president and Mrs. Aldon Hawks was the first vice-president). Miss Catherine Couch, Castro CHDA was the agent to first assist the club.

Mrs. B.H. Baldwin, Mr. and Mrs. Eugene Baldwin went to Albuquerque the last of the week to visit their Baldwin relatives. Especially important was attendance of the Golden Wedding Anniversary celebration for Mr. and Mrs. Claude Holley. Mrs. Holley is the sister of the Rev. B.H. Baldwin, who died in 1962.

Mr. and Mrs. Glenn Andrews, Carthage, Mo., , were here the last of the week. They came in a truck and hauled a combine to Missouri.

Mr. and Mrs. Ronnie Hathaway, Ron and Tad visited

'GOOD' MARRIAGES NEED **GROWN PEOPLE** 

"Good" marriages require grown people--in their "fifth" stage of emotional develop-

**FIVE STAGES** Age--in years does not

necessarily equal emotional maturity. A sound marriage requires that both partners have progressed through five stages

of development-to reach the MARRIAGE, NEEDS

A marriage is a union involving two separate personalities--and maturity is needed in order to build a mutually satisfying relationship that gives consideration to individual

MATURITY TAKES TIME Maturity is a process that takes time, and it is doubtful

that anyone is completely mature in every way. However, when immaturity hinders successful adult relationships, there is need for

concern

STAGES 'SELF-STUDY' A bit of self-study may help each person recognize his own stage of emotional development--and motivate him to action that leads to "growing

-INFANT SELF-I OVE--The infant stage is one of self-love. Attention to self and concern with self-directed fulfillment are

A marriage partner that keeps major traits of self-adoration will have difficulty in acknowledging the needs of another.

-DEPENDENCY ON MOTH-ER - As an infant grows, his love is expanded to include that of his primary caregiver, usually his mother.

Her attention to his care and

well-being satisfies his most basic needs. Individuals still in this stage

have strong urges to be pampered, to be cared for--or to have their demands met in a 'mothering' way.

-CHILDHOOD PLAYMATES -- A child shows interest in playmates of his own age and

His interests are around activities which include these friends.

If, being "with the gang" remains crucial to the individual, it is easy to understand how remnants of this stage could interfere with marriage.

-- TEENAGE FLIRTATION --In adolescence, there are short but strong attractions to members of the opposite sex. Most are "surface" relation-

ships which rapidly dissolve as

the individual's interest is directed to someone else. The "constant flirt" may be the individual who still has

traces of the adolescent. A long-term involvement or a lifetime commitment could be

unrealistic for him. - ADULT - In the adult stage, the individual has sorted through his trial-and-error experiences and focused on one individual with whom he desires a meaningful relationship.

This relationship shows continued growth in mutually satisfying way.

Attention: The officer leader training session which was scheduled for Monday has been canceled. It will be rescheduled at a later date.

# Scouting The Panhandle

By DAVID CORTEZ

**District Director** 

**Boy Scouts of America** 

Congratulations to all the units participating in this years Scout-O-Rama!! Pack 18, 50 and 54; Troops 18 and 50 all won the award with Honor and Excellence!! Even though spring break was in process, some of our units still made the effort to participate in the Scout - O -Rama. Lack of participation was due to the spring break, and I assure all of the units, next year's Scout-O-Rama will not be in the spring break!

Pack 18 displayed all the ranks of Cub Scouting along with the American Flag, and filmstrips of How to conduct a Cub Pack Meeting. Pack 50 and 53 displayed all of their past projects and albums. You can certainly tell which packs have been around for a while and the class they show, their projects were fantastic - But watch out because Pack 18 has been in existence only for about 3 months, and they're coming on strong!! Pack 50 also had many various games and obstacle course to participate in.

Troop 18 has also been in existence for only 3 months, but put together one of the best displays of First Aid, and drew posters showing exactly how to treat various First aid victims. Super Job Troop!!! Troop 50 followed true to form as they displayed flycasting, and how to make your own fishing material. All kinds of flies, wolly

things from you Scouts.

This Monday there will be a Roundtable at the Community Center for all Cub Leaders. A film strip about Cub Scouts will be shown every 2nd Monday and discussed in detail to help all of our new leaders get the training they need. Bring any questions you may have about Cut Scouting!! Remember the attendance award is still in effect - Pack 18 won it last

Pack 53 and Pack 151 are conducting their Spring Membership into Cub Scouting. West Central's 2nd, 3rd and 4th grade boys are urged to attend Pack 151's meeting on Monday night at 6:30 at the First Christian Church on 401 W. Park. All of Bluebonnett's 2nd, 3rd and 4th grade boys are urged to attend

worms, and anything you can think of as far as bait; the Troop displayed - I learned a few

certain Pack each year to make meetings more convenient. There are many activities being planned this year during the summer months. A Bicycle Rodeo, Pushmobile Derby, Homemake Kite-Flying Contest, Picnics, and Cub Camp are a few big activities planned at this moment - But you HAVE TO BE REGISTERED AS A CUB SCOUT TO BE ABLE TO

#### Enters Last Week The Women's Division of the Chamber of Commerce is seeking to enlist the talents and training of civic-minded women in this area in order to further the effectiveness of women's activities in the community. The Women's Division is in the first week of a two-week

Membership Drive

membership drive, headed up by Glenda Geries, membership chairman, and Betty Gilbert, membership drive chairman.

Women interested in joining the organization will have the opportunity to serve on one of 27 committees, ranging in interest from Animal Action to the Miss Hereford Pageant. Other committees are beautification, blood bank, Christmas lighting contest, community Christmas tree, decorations, finance and budget, fine arts, July celebration, Little Miss Hereford, membership, pet show, public affairs, publicity, scrapbook, telephone, tennis tournament, tours and welcome.

Annual membership dues in the Women's Division cost \$10. Currently serving as president of the organization is Mary Herring.

"Two seventy-nine in 79" is the motto of this year's membership drive and cash prizes will be awarded to the two current members who recruit the most new members. Also, every current member who enrolls at least one new member will be eligible to win tickets to an Amarillo dinner theatre.

Interested persons are asked to contact any Chamber woman or the Chamber of Commerce office, 364-3333.

## At Wits End

BY ERMA BOMBECK

I have never known a woman who can look at a mound of leftover food in a bowl or on a platter and throw it away - the first time around.

It has nothing to do with being frugal or having imagination. It has to do with genetics. When a woman is born she possesses a leftover gene that is fully developed by the time she is 25. Then, there is no amount of food too small

A peach pit in 1/2 cup of juice, half a wiener, two egg yolks (unbroken), a heaping spoonful of apple sauce, a turkey carcass, 1/2 cup gravy, a wedge of tomato or an asparagus spear are given shelf space.

The leftover ritual is practiced by every woman in this country. No one has to tell her how to do it. She knows. First, the leftover is placed in a leftover dish and covered by a lid that is burped, a piece of aluminum foil or put in a pan with a lid. It doesn't matter what the container is just as long as you cannot see the contents.

During the next few weeks, the leftover goes through its rotation syndrome. The first few days it occupies the first row, the second week the second row, and by the third week it is relegated to the back row.

This does not mean that it is ignored. Every time the refirgerator door is opened, someone will pull back the lid or the foil and engage in the original game show of all times called. "What IS this?"

The object of the game is never to throw away a leftover as long as it can be recognized. It is not thrown away until it recognizes you. No fair cheating.

Men do not understand the anatomy of a leftover. They think the process can be hurried by taking food that is left over right from the table and dumping it into the garbage, thus eliminating the ripening process. They do not understand why there are 36 thimble-sized

containers of taco sauce that are left over from take-out Mexican food emporiums. Or why there is more food saved in the name of vegetable soup and you haven't had vegetable soup in six years. I surveyed my leftover domain the other day while my

husband looked over my shoulder and said, "It's getting a little restless in there, isn't it? ' The only thing I recognize is the box of soda on the top shelf. How long have you had that in there and when are you going to get rid of it?"

He just answered his own question.

ESKIMO ART TORONTO (AP) - A gift of 605 pieces of Eskimo art was recently received by the Art Gallery of Ontario.

The pieces consist of sculp-

ture, prints, drawings and wallhangings and some of them are as much as 2,000 years old. The gift was made by Toronto collectors Mr. and Mrs. Harry Klamer and family.

#### To Exchange Vows

Mr. and Mrs. Robert E. Monical of 717 Irving announce the engagement of their daughter, Myrna Sue of Lubbock to James Cliff Wilson Jr., son of Mr. and Mrs. James C. Wilson Sr. of Bartlesville, Okla. The couple plan to wed May 5 in Sunset Church of Christ in Lubbock. The bride-elect is a graduate of Hereford High School and a graduate of Lubbock Christian College where she majored in Music. She was a member of A Cappella Chorus, Music Master's, Lambda Omega Alpha Social Club. She is presently employed by Texas Tech Universty. The prospective bridegroom is a graduate of Sooner High School in Bartlesville. He graduated from Lubbock Christian College and is a member of Kolnonia social club, A Cappella Chorus, Meistersinger Chorus and Music Master's. He is presently employed as a teacher in Oklahoma.

#### Disease-Resistance Needed by Pecan Tree COLLEGE STATION -- Pecan In western areas, scab is not a trees can add significantly to major limiting factor, so other School Honor Roll

attention should be given to selecting disease-resistant var-Extension Service.

The principle disease that Texas homeowners have to scab," points out Dr. Jerral Johnson. "Pecan scab is caused by a fungus. Once infection occurs, small black spots form on the shucks and tree foliage. Heavily infected pecans drop prematurely or may be poorly filled."

Trees infected with pecan scab early in the season often become severely defoliated, says Johnson. This defoliation can reduce the quality of the current season's pecan crop and can also reduce crops for the next two to three years.

"A number of excellent varieties are resistant to this fungus, including Choctaw, Cheyenne, Shawnee and Desirable. Homeowners that annually receive 28 inches or more rainfall should select varieties within this group," recom-mends Johnson. "These four varieties have good size and will perform well in most areas of

any home landscape or home varieties can be used with good fruit planting. However, special success, according to the plant pathologist. Varieties such as Wichita and Western can be ieties, says a plant pathologist grown in these areas with little with the Texas Agricultural chance of loss due to scab. However, these varieties have a disease known as stem and bugnt. ind is occurd by a see control on pecans is pecan fungus that results in severe loss of pecans late in the season. This loss can amount to as much as 24 percent of the crop.

> Although certain varieties have resistance to pecan scab, a limited spray program will normally have to be followed if they are to be grown profitably in humid areas of Texas. contends Johnson. By using a resistant variety, the spray program in many areas can be reduced from seven to four or possibly three applications during a season. In drier areas the spray program may be reduced from four to three or two applications to maintain

healthy, vigorous trees. "Pecans with their many problems still represent a profitable part of any home garden or fruit planting," believes Johnson. "The important thing is to make the right variety selection to help insure your chance of success.

## Gasoline, One Among Flammable Liquids

ing! Flammable liquids require have flame arresters and extreme caution--in use and storage, says Claudia Kerbel.

Ms. Kerbel is a consumer information specialist with the Texas Agricultural Extension fire extinguishers (foam, carbon Service. The Texas A&M University System.

'DANGER' LIST Her . "danger" list includes gasoline, acetone, lighter fluid, lacquer thinner, and paint

thinner. Their flammable vapors pose danger of fire--or explosion.

In addition, there are other less dangerous liquids that still require caution--including turpentine and alcohol. They will burn vigorously, although they discharge a small amount of fumes than the more dangerous liquids listed above, she says.

#### **CAUTION STEPS** Remember these steps for

safe use and storage:

· Never use or store a flammable liquid near a flame or heat.

\* Never store gasoline in the home or car.

\* Always store flammable liquids in well-ventilated areas.

\* Store gasoline in tightly capped--and labeled--metal safety cans.

Never store gasoline in glass or plastic containers.

pressure release valves. \* Keep flammable liquids out

of children's reach.

\* Use only Class-B or ABC dioxide or dry chemical) to put out a flammable liquid fire.

NEVER USE WATER ON A FLAMMABLE-LIQUID FIRE-water can cause the fire to spread or explode.

\* Never use gasoline as cleaning agent.

\* Turn off gasoline-powered equipment and allow it to cool before refueling -- to prevent ignition of gasoline vapors.

\* If you must siphon gasoline, use a hand-operated pump, not your mouth.

\* Use flammable liquids in a well-ventilated place--especially paint sprays, removers, synthetic thinners and quick-drying paints. (Be careful not to breathe the vapors.)

Outdoors is the best place to use these

These dangerous products can evaporate easily--and their vapors will "build up" in a closed room.

\* When possible, choose products that are non-flammable and non-toxic.

\* Always read labels carefully and follow directions for use and

#### Hands Around World

HANDS WIPE OUT HATE WITH UNDERSTANDING

Hands, what wonderful devices these appendages are! Have you ever thought of yourself as separated from them and their actions? How very difficult the task of every day living would be without hands, almost impossible. In gratefulness for such a wonderful gift let us consider their use.

From small hands in over fifty countries of the world have come paintings to say in visual language, this is the way life is in my country. To explore these paintings, one sees some vivid differences, as in one painting from Shrelanka, where elephants appear to be part of daily happenings. The other and probably more important message seen in these paintings is the likeness of human beings working and loving their families and having similar needs to our own. Hereford grade schoolers are increasing their understanding of their

TEXAS OUTDOOR WRITERS ASSOCIATION

of the world...But those in power saw private ownership of these guns as obstacles in their path, and made great efforts to arouse public sentiment against our owning them by claiming these guns were the reason for the crime which was rampant.

They hawked a message that crime could not reservatereservater

The Paint Box Class Starting April 2nd Call Meredith Wilcox 364-0195

exist when guns were not available for criminals to use in their evil deeds...A siren song devoid of truth, for the criminal element continued to find weaponry, even as restrictions on our own gun ownership grew increasingly harsh, and our ability to deter the activities of these vultures was gradually stripped away.

...And then, there were the ones we called "bleeding hearts," who opposed our use of guns in the sport hunting of game animals.

They dubbed us "wanton murderers," and dreamed up every slanderous tale of slaughter against us they could in the name of "saving the

Those of us who loved to hunt asked to pay for the privilege. The funds from the license fees we paid and taxes on our equipment helped to protect the habitat of the game we sought, and thus preserved the wildlife resources we so cherished. We asked for seasons and bag limits, all sorts of regulations, so that the sport hunting of animals would always be subject to rules of good sportsmanship and sound conservation. Only surplus animals were harvested by hunters in order to maintain game populations at healthy

We made every effort to retain high standards of sportsmanship among the ranks of hunters, and although there were those who abused the privilege, they were in the minority...but the deeds of "slob hunters" helped sway public sentiment against caring sportsmen.

The bleeding hearts spent untold sums to stop our hunting, but the animals they claimed to be defending never benefitted from their activities, and wildlife habitat eventually declined.

We held our own, we gun owners, for a number of years. One of our strongest advocates was a group we called the National Rifle Association, and many of us were proud to be included among its membership.

The power grabbers, the uninformed, and the bleeding hearts all unleashed their propaganda machines on our organization. We were the "gun

lobby", branded as brash and irresponsible because we believed in defending our rights, granted in the constitution of our nation.

It grew difficult to fight outright lies as they became more numerous, but we did stave off uncounted efforts to circumvent the electoral system on which our nation was founded. We were the bitterest of enemies to those who advocated the "registration" of our guns.

Registration...It sounded so harmless, yet we knew it would be the beginning of the end for gun ownership if it ever came about.

Handguns were the first to go. They were the subject of the greatest emotion among the gun control advocates who stopped at nothing to get them outlawed.

There was talk of no more crime in the big urban areas as law officers eventually began the long-dreaded process of confiscation of handguns from the private sector... Those in Washington who had bludgeoned the legislation through were guaranteeing that private citizens could always retain their rifles and shotguns, if they would simply turn in their handguns...

I'll never forget the way the deputy sheriff looked when he came by my house for the pistols.

He knew the confiscation was mindless, and his face was drawn in distaste for the whole thing as he read off the serial numbers of the .22 and the .357 single action I'd used in target practice and plinking at cans for years.

The numbers came from prior registration requirements, and it was a simple matter to track the guns down under the gun ownership regulations that had grown increasingly harsh after the NRA was overpowered.

It was a hard thing, turning those guns over, but I knew it would go easier for myself, my family, and this deputy who was my neighbor and a former NRA member himself, we we didn't create a disturbance over the thing.

Several million dollars worth of guns were melted down in our area alone that year...and the crime rate soared, as well-armed thugs preyed on homeowners and merchants.

It was only a couple of more years before the whisperings of long gun confiscation started.

We tried to keep hunting, but special taxes, regulations and all sorts of government-created obstacles to prevent us from doing so proved effective. We couldn't afford to buy ammunition. We tried loading our own for a while, but we couldn't get the components we needed, and finally, it came down to keeping just enough ammunition for an emergency which might arise at home.

There were a lot of us who just couldn't tolerate the thought of it when it became official that rifles and shotguns would be confiscated by the government and destroyed...It was a directive to wipe out a portion of our very being, a treasured part of our lives.

There were many dark night sojourns to quail and pheasant covers and, to the feeding fields of

waterfowl to do what I have done here. Go ahead now, open up the plastic and look at the guns inside.

The beat-up one with the silverish sheen from

AUSTIN - The attitude of Texas hunters regarding mandatory hunter safety training was sampled by the Texas Parks and Wildlife Department last

year in a random mail survey. Questionnaires were sent to ,458 hunters who purchased licenses in the 1977-78 season. Usuable response of 41 percent was obtained.

Approximately 55 percent of males approving it than females and more urbanites than rural residents. Consensus was for 12 to be minimum age for certification and that first-time hunters should be required to

take the course. The training should be done

felt, and a \$5 registration fee should be charged to finance a minimum of six hours of instruction.

The P&WD notes both solicited and unsolicited opinions from sportsmen indicate they are concerned about higher costs and more governmental

the respondents were in favor of mandatory training, with more

worh bluing and the cracked stock is my goose

I don't know if you will have had an opportunity to know geese in your lifetime...They were becoming scarce when I dug this hole. Sport hunters had contributed great sums of money for their well-being, and geese had grown to their greatest number in history, up until the time when the bleeding hearts stopped our hunting of them, and the funds for preservation of their wetland

homes dried up. The geese dwindled in number as food and nesting cover grew harder and harder to find, and the same fate began to overtake the wild ducks.

Maybe you have found something that reaches within and stirs your soul in your time. In our own time, directives that deprived a man of the chance to sit in a cold blind, shotgun in hand, and hear the wilderness voiced through the calling of wild geese snuffed out a flame at the very heart of our

Next to the goose gun is the lever-action .30-.30. It was my choice for the brush country deer in the southern regions of our state, in the time when a man could still travel there and enjoy the sight of a flagging whitetail...But then, you've probably never seen a whitetail either, and it would be hard to explain all about deer here.

The big, heavy rifle with the telescope.. That's my .270. Another deer gun, great for the long open shots on mule deer we used to get across the spectacular mesas of a sprawling canyon near my

There's my 20 gauge pump and an autoloading 12 gauge too. Shotguns for the quail and pheasant covers we used to walk, in search of magical birds, filled with color...And sources of understanding and fulfillment.

The last one, a bit smaller, is the bolt action .22 my parents gave me when I was just a boy. It was the key to the whole outdoor world I cherished, an old friend not to be betrayed.

That's the lot of them. They may not look like much to you, yet I cherished them from my youth on, and never had a regret for having owned them, or walking the paths to which they led me.

They put meat on our family table, joy in many hearts, and a fulfillment in my soul that nothing else could have:

As I said before, there are some things you do not betray. I could not keep my guns any longer, but damned if some urban ultimatum was going to deliver them to the blast furnace either...So, they have been given over to the good earth, up until this time.

I ask now, friend, that you try to understand. Perhaps the times are more favorable for such things once again, but on the other hand, regulations may be even more stringent.

If you run a risk at having found what lies here, or if you cannot comprehend what I have said, give the things you've discovered here back to the earth, cover them over, and walk away.

On the other hand, if you can grasp my meaning, if there is once more a place for the animals, the men who really care about them, and the guns they carry afield as a tool of the outdoors, then I say you are welcome to what you've found here friend

... Think of it as a gift of the earth, like the geese and ducks, the deer, quail and pheasant, and the right to go among them in a pursuit as ancient as man himself.

... And be vigilant, my friend, in guarding these things we loved in our time, but somehow lost.

An informal practice session of trap shooting will be conducted by the Hereford Gun Club today. beginning at 1 p.m.

The local range is located just east of the city

Shoots are conducted on a regular basis on the second and fourth Sundays of the month, and plans call for night shooting following the changeover to Daylight Savings Time.

Competitive shoots are held locally on a regular basis, with a trophy shoot or merchandise shoot scheduled each month.

#### **Junior Rangers** Fight Park Litter

AUSTIN -- If a number of state parks this year seem to have a specially spruced-up look, you'll know the Junior Rangers have been around. A pilot program started in five parks last summer by the Texas Parks and Wildlife Department, whereby youngsters helped to combat the litter problem, was so successful that it now is being extended to 25 parks.

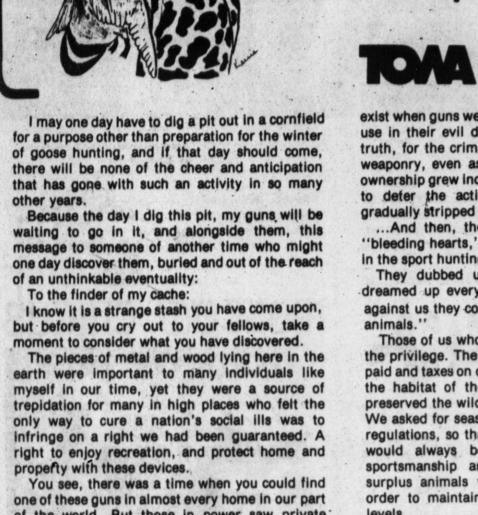

Junior Rangers are young people ages six through 12 years who voluntarily pick up litter for a total of four hours, with permission of their parent or guardian. The time can be divided, on different days and in different parks, but when to meet and where to pick up litter is under the direction of a park ranger. When the four hours have been completed, the child receives a helmet with a decal certifying he or she has become a Junior Ranger.

Besides the obvious benefits to the park and the environment, the youngster is given incentive to learn and care about

the outdoors. At Lake Livingston State Park last year, groups were conducted along a nature trail while they picked up litter. This area had the best record of all for the season, with 85 participants picking up two tons

Parks now instituting the program include: Garner, Inks Lake, Pedernales Falls, Mc-Kinney Falls, Sea Rim. Mustang Island, Copper Bre aks, Palo Duro Canyon and Tyler State Parks; Kerrville, Lake Somerville (Birch and Nails Areas), Goose Island, Abilene, Lake Colorado City, Possum Kingdom, Eisenhower, Lake Livingston, Fairfield Lake. Fort Parker, Lake Brownwood and Lake Arrowhead State Recreation Areas; San Jose Mission, Goliad and Hueco Tanks State Historical Parks.

Displays about the Junior Ranger program will be found in each of the office registration areas of these parks.

NOTICE TO ALL VETERANS WHO HAVE HONORABLE SERVED THEIR **COUNTRY IN TIME OF WAR OR PEACE** IF YOU DO NOT OWN OR HAVE NOT BEEN ASSIGNED BURIAL PROPERTY FILL OUT AND RETURN THE COUPON BELOW IMMEDIATELY TO RESTLAWN MEMORIAL PARK OF HEREFORD

As an honorably discharged Veteran of the United States Armed Forces you are entitled to and will be assigned burial property, however you must register for this. The only cost to you is \$23.65, a one-time charge of \$23.65 required by state law for Perpetual Care. This guarantees burial space in our FIELD OF HONOR which is deeded to you by Certificate of Ownership.

Verification of your Serial Number and Discharge is required. [Special Protective Features are available for spouse as well as for all minor children.]

Please fill in all information on coupon and mail at once. A certificate of entitlement for your burial property will be furnished you as soon as information is verified. [We also will furnish you with valuable information on related cash benefits due you from the United States Government.]

The number of Veterans spaces available in FIELD OF HONOR is limited, and these will be assigned on a first come, first serve arrangement while space exists. To Assure Your Reservation Mail The Coupon Below Today!

This program is not supported financially or otherwise by the U.S. Federal Government nor is it supplemented by tax funds of this city, county or state.

TEXAS PARKS AND WILDLIFE DEPT.

CONSERVATION INTEGRAL PART OF HUNTER SAFETY CHILDRESS -- A thorough

study of wildlife managementand conservation was presented o 17 area hunter safety nstructors by the Texas Parks and Wildlife Department during recent workshop held in hildress.

Hunter safety instructors from Amarillo to Odessa to Wichita Falls were in attendance while P&WD personnel presented the status of conservation in Texas today.

The principles and practices of conservation were presented by Richard Dearment, extension biologist from Wheeler. A picture of change was presented by Dearment from the first game law in 1861 closing the bobwhite quail season on Galveston Island to the present day study of bobwhite quail on the Matador Wildlife Management Area near Paducah.

On the second day of the workshop, the HS instructors, completed a trip to the Matador WMA where they were briefed on the current management practices conducted on the department-owned land by Charles Boyd, Matador WMA

At the conclusion of the field trip, all the instructors were presented a certificate of attendance from T.D. Carrolly Texas hunter safety coordinator.

The workshop furnished the instructors with ample information for them to implement conservation into their future hunter safety classes.

#### ANTELOPE RESTOCKED

LUBBOCK -- For the first time since the Texas Parks and Wildlife Department started stocking antelope in 1938, out-of-state animals have been brought in and stocked on three northwest Texas ranches.

the F.E. Warren Air Force Base near Cheyenne, Wyoming, and they came back with 87 animals to be stocked on traditional antelope range.

"A helicopter from Provo, Utah, was used to round-up the antelope and drive them into a wing trap where they were caught and transported to a ranch near Claude in the Panhandle and two ranches near Wichita Falls and Abilene." said George Litton, antelope project leader.

The Safari International Club of Amarillo picked up the helicopter which was an essential part of the trapping operations," Litton continued. -

The trips from the air base to Texas averaged 20 hours and were made without incident. A and Trans-Pecos regions.

two-inch fresh snow and 10 degree weather at the trapping sites did not seem to hinder the operations.

P&WD biologists noted that the Wyoming antelope are larger than the Texas antelope. Several of the antelope actually jumped over the traps while being herded by the copter.

Over 5,200 antelope have

been trapped and restocked back onto traditional antelope range since 1938. Studies about the fleet animals have shown that Texas once had large herds \$2900 tab for the cost of the of antelope numbering into the millions. The introduction of barbed wire was the determining factor in the continuing decline on the antelope range in the Panhandle, Permian Basin

# Striper Study Raises Questions Concerning Spawning Activities

AUSTIN - A two-year study of striped bass in the Brazos River system by Texas Parks and Wildlife Department biologists has brought to light some new information on the migration and spawning patterns of the imported gamefish.

The study, conducted by biologist Charles J. Mulford of Fort Worth, found that striped bass are able to spawn under a wider range of water flow conditions than was previously believed, and that they may be spawning above as well as below dams on the Brazos.

states has indicated that stripers require long river lengths and high continuous water flows in order to spawn successfully. But the presence of young-of-theyear stripers in Lake Whitney the past two years and in Granbury in 1977 appears to show that while river length still is important, high flow rates may not be as critical as thought

This study, and similar observations on Lake Texoma. appear to show that other factors such as salinity, water temperature and photoperiod all enter into the spawning process. making it difficult to establish hard and fast rules about where the fish can or cannot reproduce naturally.

Producing striper fingerlings by capturing mature brood fish and artificially rearing the offspring has been the method used to stock the fish in Texas reservoirs, but biologists point out that the process is tedious Prior research from other and inefficient compared to natural reproduction.

Mulford said the justcompleted study also raises some other interesting questions about the fish's movements. "For instance." Mulford said, "there are indications that in some cases spawning did not result from fish swimming upstream from the lakes into the

rivers, but rather from resident populations of stripers just below or just above the dams."

This "above the dam" spawning theory is a new one, Mulford said, because it was assumed before that the fish spawned only in the tailace areas below dams or in the river downstream.

'We know that large stripers in the lakes are attracted to the areas just in front of dams during the spring when water is being released, and now we are wondering if spawning might be occurring there and the fertilized eggs are washing through the dam and down the river," Mulford speculated.

If this is so, Mulford said, it might cause the department to alter its stocking programs somewhat, concentrating major efforts in the reservoirs in the upper end of the river basin rather than in the lower reservoirs. "We know for certain that mature fish come through the dams during periods of large water releases, and we also know these fish spawn in the areas just below the dams." Mulford said. "This movement influences us even

more to consider stocking more

heavily in the upper end of the river system." Another change which might spring from this study would be establishment of sanctuary zones in areas such as immediately below the Granbury dam, since spawning

limited resident population of adult fish rather than an annual migration of fish swimming upriver in the spring.

Mulford noted that this two-year study is encouraging because it indicates that it may not be necessary for a large group of mature stripers to struggle upstream for miles in a shallow river each year to achieve a viable spawn.

The name Theodore comes from the Greek and means "gift of the gods."

# **Trailer Clubs Favor** State Park System

AUSTIN -- Results of a survey Panhandle and parts of West of the Texas branch of the National Campers and Hikers Association have proved both enlightening and reassuring for the Texas Parks and Wildlife Department.

In Texas the association includes some 70 chapters and 1,600 families, and their utilization of the state parks is high. Returned questionnaires indicate that P&WD park planners have come remarkably close in filling the needs and. preferences of this group of recreationists

A major consideration is the radius within which they prefer to travel, which is shown to be 100 miles. Trailer camping already is available at parks throughout the state within this distance of heavily populated

The majority of clubs held

8-14 outings last year, but groups were not larger than 25 trailer units. This is a significant ndication, because it means there is not much need for group trailer camps to be designed for larger numbers than that. The minimum distance preferred between camping spaces was 20-40 feet, which also is helpful for planners to know.

Fifty percent of the members preferred state campgrounds to others. Top choice was for a quiet, restful atmosphere; next in importance were low fees and charges; scenic surroundings were the next leading factor. Preferences for water-based recreation were 50-50; other went to trap surplus antelope on areas, with the exception of the forms of recreation scored rapin.

evenly. Availability of water topped the type of facilities considered essential, then electricity, followed by a sewage dump station.

People between 51 and 70 years old were by far the dominant age group in this

P&WD park officials feel this study has been of value in monitoring the usability of present park facilities and in identifying unfilled needs, which will be considered along with other recommendations in planning for the future.

# NWF Supports Endangered Species Act

The president of the National Wildlife Federation has called upon the nation's conservation movement to protect from Congressional attacks the Endangered Species Act and the Cabinet-level committee created under that act last year to settle "irresolvable conflicts" between developers and the wildlife protection law.

Dr. Fred R. Scroggin, of Dry Ridge, Ky., president of the NWF, issued the appeal after learning that at least two members of Congress are planning to introduce legislation weakening the act and curbing the powers of the Endangered Species Committee.

The committee, established by an amendment to the Endangered Species Act in the Congressional rush to adjournment last fall, incurred the wrath of Senate Minority Leader Howard H. Baker, Jr. (R .-Tenn.) and Rep. Robin Beard (R.-Tenn.) with its January 23 rulings on the Tellico and Grayrocks dam projects.

It blocked completion of the \$120 million Tellico Dam, on the Little Tennessee River -- not the Basin Electric Power

coming ...

money. And start planning . . . So you can keep your COOL

this summer.

higher this summer.

Here are some things

existence of the now-famous snail darter, a tiny fish, but because it found the project economically unsound. At the same time, the committee exempted the \$12 million Grayrocks Dam and Reservoir, on Wyoming's Laramie River, from the provisions of Section 7 of the act--on the condition that the dam's builders take steps to protect the downstream habitat of the endangered whooping crane, as provided in a December out-of-court settle-

Section 7 prohibits construction of any federally-aided project that would threaten the continued existence of an endangered wildlife species. In the Grayrocks case, construction of the dam was halted last October by a lawsuit brought by the National Wildlife Federation, the state of Nebraska, and four other conservation groups.

In December, before the case went to the Endangered Species Committee, NWF and its co-plaintiffs agreed to withdraw their opposition to the project if Cooperative would limit the amount of water it diverted from the Laramie and set up a \$7.5 million trust fund to protect the habitat of the whooping cranes 275 miles downstream on the Platte River in Nebraska.

The Grayrocks Dam is part of a \$1.6 billion power development that wiil supply electricity to co-ops in eight states. The compromise marked the first time a trust fund was

habitat in the settlement of an environmental lawsuit. "Most Americans applauded the rulings of the Endangered Species Committee," said NWF's President Scroggin in his appeal to conservation groups. "The committee, under Secretary of the Interior (Cecil

D.) Andrus, performed the task assigned to it by the Congress. It weighed the needs of the economy against the needs of the environment and made two difficult but reasonable deci-

"And then," Scroggin continued, "two members of Congress who had supported the committee idea, decided

they didn't like its rulings and called for its abolition and for more weakening amendments to the Endangered Species Act. They said, in effect, 'If we can't win under the rules we all agreed to, then we'll change the rules."

Scroggin pointed out that the

was established, with Senator Baker as one of its creators, in response to critics who argued that Section 7 was "too inflexible...that it was impeding 'progress.'"

"Envrionmentalists went along with the idea in order to

Endangered Species Committee save the Endangered Species Act, which was working well at that time, from even more crippling amendments," the NWF president recalled. "And then, the first time the committee was called upon to act, the same critics called for

"It is clear," Scroggin concluded, "that some members of Congress are against any law that interferes with the construction of any dam or other pork barrel project. They have indicated that they will try in Congres adopted so overwhelmingly in 1973. And so we must

alert all conservationists to the fact that the Endangered Species Act is itself in danger. If all who believe in the protection of endangered species make their feelings known to their representatives in Congress, then we should be able to save the law from destruction by amendment."

#### Gulf Council Key To Marine

established to safeguard wildlife AUSTIN -- The king mackerel, popularly known as the kingfish, has long been truly the king of Texas' offshore gamefish.

> But Texas' kings aren't all Texan, because recent tagging programs conducted by the Texas Parks and Wildlife Department and the National Marine Fisheries Service indicate that the fish spend part of each year in Florida waters.

> The kingfish's travel habits underscore the importance of the Gulf of Mexico Fisheries Management Council -- an organization charged with the responsibility of regulating the harvest of Gulf of Mexico fishes within the 200-mile limit.

The council is made up of conservation agency heads, marine biologists and representatives of sport and commercial fishing industries from all the states whose borders touch the Gulf of Mexico.

Texas' official delegation to the council is made up of Pearce Johnson, chairman of the Parks and Wildlife Commission; John Green, P&W Commission member; Tom Moore, designee for Chaiman Johnson and the department's coastal fisheries chief; and two representatives of the commercial fishing industry, John Mehos and R.G. Mauermann.

Moore said kingfish are a good example of a fish species which needs to be managed on a total Gulf basis, rather than on its occurrence in Texas waters. "We have learned that at least a portion of the kingfish population spends most of the summer months in Texas waters, and probably travels to the Florida area to spawn in the fall," Moore said.

.'ust as migratory waterfowl regulations are based on a "flyway" concept to take into account all the biological factors involved in the birds' movements, migratory fish also should be managed by taking their total cycle into account, Moore believes.

With this in mind, hearings will be held in late 1979 in each Gulf state on proposed king mackerel regulations, and the adopted plan should go into effect sometime in 1980. Moore

. The proposed mackerel plan calls for a total allowable catch of 37 million pounds annually, with 28 million pounds allocated to sportfishermen and nine million for the commercial fishery. The council also recommended that the national Marine Fisheries Service allow experimental use of purse seines for king mackerel for dta seines for king mackerel for data gathering purpose and that a 400,000 pound limit be set for the study.

Similarly, public hearings will be held during April on reef fish regulations. The Texas hearings will be at Port Isabel on April 23, Freeport on April 25 and Port Arthur on April 26. Complete published proposals are available for inspection at U.S. Fish and Wildlife Service offices. Moore said.

Created in 1976, the council has authority to determine maximum sustained yield of certain fish within the 200-mile limit. To achieve the desired harvest level, the council has the power to establish size limits, poundage limits and gear restrictions if a need for a reduction in the catch is seen

"In the case of king mackerel," Moore commented. "we know that you have to go much farther out in the Gulf to catch large ones now than you did a few years ago. Whether

this indicates low populations or the species." perhaps a shift in migration patterns we cannot say at this point, but with tagging programs now underway we're beginning to learn more about

And using this knowledge is where the Gulf of Mexico Fisheries management Council comes into the picture.

# Males 'Dress Up' In Wildlife World

Among humans, it is the female who is noted for primping and preening to attract a mate.

But in the world of wildlife, the situation is often reversed, according to National Wildlife magazine. There. the current (October-November) issue of the magazine reports, it is usually the male who puts on a spectacular show during courtship.

The show may consist of anything from a display of feathers' - which the peacock spreads to impress an admiring hen - to a loud noise or a change of body color. And it sometimes includes the use of weapons, such as spurs or antlers, to fight off other suitors, says the bimonthly publication of the National Wildlife Federation.

Along with the peacock, the male grouse and turkey use their feathers to catch the attention of prospective mates. The grouse raises a ruff of glossy feathers around his neck. The wild turkey, in addition to showing his feathers, sports a "beard" - a tuft of hair-like feathers that sprout from his chest.

The turkey gobbler and the male pheasant wear sharp spurs on their legs to fight off rivals during their breeding seasons. Similarly, the bull moose, the bull elk, and buck deer grow antlers to fend off competition. When the mating season is over the antlers

drop off. Lizards and fish are among the creatures who change colors or even the configuration of their bodies to lure mates, says National Wildlife. Some male lizards inflate brightly colored "fans" at

turkey displays spurs on shanks and "beard," or tuft of hairlike feathers, on chest; caribou bull grows new pair of antlers which drop off after mating season. Illustrations by Ned Smith

their throats. Some species of salmon acquire hooked jaws and humped backs as the spawning season approaches.

Many species resort to mating calls or other sounds, but among the strangest amorous noisemakers is the cricket, who produces his summer evening's "song" by rubbing parts of his wings together. Male woodcocks use special wing feathers to make twittering sounds, while prairie chickens and some grouse hoot loudly by suddenly releasing air from inflatable sacs

A man might think that kind of noise is for the birds, but for those fowl it works better than man's so-called wolf whistle.

on the sides of their necks.

With many species, the magazine reports, mating occurs only after the male suitor instinctively performs a series, of courtship rituals. Painted turtles stroke the female's cheeks with the elon-

**Mark Twain Buffs** 

gated claws of their forefeet. The male fiddler crab waves an enlarged claw in the face of his chosen mate - not a subtle gesture among those

their body weight. Some males must work faster than others. Since adult moths live only a few days. the male is equipped with a broad, feathery antenna that helps him zero-in on the "perfume" of a female, sometimes miles away.

crustaceans whose "fiddle"

claw comprises nearly half of

Modern science has slowed e march of one species, the gypsy moth, according to National Wildlife, by synthesizing the female's scent and releasing it where there are no females. This confuses the males and thwarts their efforts to mate - a mean trick on the moths but a boon to mankind.

# To Remain Closed

AUSTIN The Texas Parks and Wildlife Commission has extended the closing of public reefs in the Galveston Bay system to oystering for the remainder of the oystering season which closes April 30,

The closure, which has been in effect since Dec. 15, 1978, has banned oystering on both public reefs and private lease areas. However, commissioners on Feb. 21 decided to allow private lease holders to recoup their investments by harvasting transplanted oysters from their leases.

This harvest will be allowed "under strict department supervision," the commission was told, and permits were made available to the lease holders by Feb. 26.

The private lease holders also will be permitted to conduct their normal oyster-transplanting operations during the summer period from May 1 through Sept. 1.

Galveston Bay, which annually produces 70 to 90 percent of Texas' oyster harvest, was closed because of the extreme scarcity of marketable-sized oysters. C.E. Bryan, the department's shellfish program chief, told the commission that

cutive years of poor oyster production was the reason for the low oyster populations.

However, Bryan said biological samplings indicate that 1978 was the best year since 1967 for spat setting, the attachment of the larval ovsters to hard objects on the bay floor. This and the resulting large number of small exsters indicates the bay should have sufficient stocks of marketable-sized ovsters to reopen the public reefs for the 1979-80 season, Bryan said.

Department biologists will continue to monitor the oyster resource and report on the status of the fishery prior to the 1979 season.

Although Galveston Bay has historically been the dominant oystering area of the state. production dipped from 212,730 pounds in Nov. 1977 to 13,346 pounds in Nov. 1978, department statistics indicate.

Bryan said a number of environmental factors contribute to poor oyster reproduction. Excessive flooding during the spat setting time is one of the main causes for low reproductive success, he said, and low rainfall during 1978 resulted in high salinities and losses of mature oysters to

PERRY, Mo. (AP) - The climb to Chester Davis's office everything Mark Twain wrote is up a narrow staircase between lingy walls lit by a single vellow published," Davis said. bulb, each step sculpted deep

and smooth. He works at a roll-top desk. Its every piegonhold is in active service. The room is drafty, with a bare wood floor. The view from the window is of the village print shop, across the street.

the village post office. Mark Twain would have approved.

The room itself is located over

Going on 30 years now, Davis has toiled at what he calls his labor of love, which, he confesses, has consumed his life to the exclusion of nearly all other interests.

"You can lose touch with reality if you really get absorbed in this subject," he said. "It grips you."

His subject is the life and work-of a fellow Missourian whose touch with reality was never in jeopardy, Mark Twain. Davis edits, for the benefit of a handful of acolytes and scholars similarly caught in Twain's irresistible grip, a pithy little publication called The Twainian.

Repair.

# The Chamber and You

ered er. If

make

ress,

ige is

exico

ouncil

Let's spend a little time today to give everyone a little update on what's going on around the Chamber of Commerce and around town. There are several areas that certainly makes the Chamber proud.

Our membership drive has gone very well. Even with another week left to make a few more contacts we are very pleased to announce more than 50 new members. With this added membership your Chamber of Commerce will be working harder in helping the economic picture of Deaf Smith County. We have so much to offer, but it will be up to us to capitalize on the asset that we possess.

The Chamber would like to offer a sincere thanks to Mike Patrick and his committee for the excellent job they are doing. We are looking forward to working for all of our members throughout this year. If you want to be a part of a growing active Chamber and haven't been contacted, I invite you to contact me at the Chamber of Commerce office.

The planning stages for the 1979 "Follies" will be getting under way in the near future. The dates for this have been set for November 15- 16- 17. Mark this date on your calendar. There will be lots to do and we want everyone involved. The "Follies" this year promises to be more fun than ever, so make plans now to be in them.

The Deaf Smith County Chamber of Commerce will be sponsoring its annual Hereford Open Tennis Tournament June 1-3. A very good turnout is expected according to John Fuston and Dave Hopper, chairmen of the tournament. Entry blanks are available through the Chamber of Commerce office.

Another sport event coming up will be the All Sports Banquet in April. The Chamber of Commerce will be presenting the Boy and Girl Athlete of the Year and also a new award - Fan of the

The Women's Division of the Chamber of Commerce is certainly getting some activities under way. Their membership drive is doing very well. These new members will be quite busy with these projects coming up. April 21-22 will be the Women's Hereford Tennis Tournament.

During the week of April 23-28 Beautification Week will be held. We would encourage everyone to devote some time to helping make Hereford beautiful.

One of the highlights of this spring will be the Miss Hereford Pageant to be held April 28, followed by the Little Miss Hereford Pageant May 5.

After such a fine week, let's all look forward to another one

# Mexico Human Rights Violations Drop

MEXICO CITY (AP) -An amnesty law and electoral reform enacted by President Jose Lopez Portillo's administration has sharply reduced human rights violations in Mexico, according to human rights watchdogs.

"The last report I got of missing persons was in September when two boys were kidnapped in Puebla," said Rosario Ibarra de Piedra, 52, head of a watchdog group called the National Committee for the Defense of Political Prisoners, Fugitives, Exiles and Disappeared Persons.

But just because things have gotten better that's no excuse to forget" the past," she added. Mrs. Ibarra de Piedra, whose son Jesus disappeared in a shootout with police five years ago, has been a leading critic of alleged human rights violations in Mexico.

A Communist Party official, Eduardo Montes, said there have been positive changes in Mexico's political climate as well and the government now respects the rights of opposition parties.

He added that the real test will come in the congressional elections July 1. He said that if any of the handful of tiny leftist parties achieve any significant victories that would be evidence of improvement.

A spokesman for the Popular Socialist Party said he agrees with this view. The membership of both parties is not accurately known. The Communist Party was illegal in Mexico for

The amnesty law has permitted the release of 559

persons from prison or had families of political prisoners. their criminal records wiped clean since Congress enacted in Sept. 28, 1978, according to government records.

Spokesman Rigoberto Galindo of the Department of Government - the ministry in charge of Mexican internal security - claims that all persons listed as political prisoners have been freed.

"There are still some who consider themselves political prisoners but they are charged with things not covered under the amnesty law - like murder and bank robbery," he said.

Mrs. Ibarra de Piedra said she disagrees, adding that her National Committee's records show that about 300 political prisoners were passed over by the amnesty bill and are still in

She claims that she herself a resident of the northern city of Monterrey - is under constant surveillance and that often two or three men sit in a car without registration plates outside her

"The internal politics of the country are very different from the face it presents to the world," she said in a telephone interview with the Associated Press. She claimed many of the prisoners are in Military Camp No. 1 on the outskirts of Mexico

A recently released International League of Human Rights report dated last May listed 301 persons missing in Mexico and accused the government of condoning illegal arrests, torture, secret jails, the existence of secret police forces and the harassment of

Attorney General Oscar Flores Sanchez refuted the accusations at a recent news conference and said of the 314 persons listed as missing since 1971 an investigation by his office showed 154 had died in shootouts with military troops or police, 89 were fugitives, 26 had no criminal record and the rest were either in jail or died from

other causes. "Tortures are crazy and don't accomplish anything," he said. "Just like anywhere else, there are bad policemen ...

"The government doesn't have to assassinate anyone or

undetermined date.

Thursday, McRoberts said.

This was especially true in the 1930s and 1940s when at different times prominent Communist Party members David Alfaro Siqueiros, Jose Clemente Orozco and Diego Rivera were jailed for long periods or exiled.

On top of the persecution, parties not officially approved of could only run write-in candidates in elections but had no chance of winning. Their petitions for official certification repeatedly went ignored.

The political reform bill passed by Congress almost at the same time as the amnesty law broke the PRI's power monopoly. Beginning with the House elections July 1, parties by law can obtain official registration and field their own candidates provided they have a certified membership of 60,000

in each of the country's 32 electoral districts.

Congress' Chamber of Deputies has been enlarged from 237 to 400 seats - with 100 seats to be apportioned to minority groups through proportional representation. The PRI currently holds 195 of the 237 seats in the Chamber and all but one of 64 in the Senate, which is renewed every six years.

An official who requested anonymiaty but who is close to Lopez Portillo said the purpose of the two laws is to provide a legal outlet' for dissidents in Mexico and take the wind out of the sails of elements who would

otherwise be prone to violence. "We have reduced anti-social pressures. We have definitely reduced the possibility of violence in the future." the

#### Seed Trade Association Head Claims

# Cutback in Irrigation Could Deprive Nation Of Major Source of Grain Sorghum Seedstocks

Brand Farm Editor Policy proposals being considered by the administration to curtail the use of irrigation on the High Plains could not only Armon Lauderback of WAC result in a direct reduction in the Seed Inc. of Hereford, president nation's food and fiber of the Texas Seed Trade production, but could also Association.

sections of the nation of a primary source of quality planting seed.

That's the contention of

the Texas High Plains and South the nation's stock of grain sorghum seed, and also supply appreciable quantities of forage sorghum and sudangrass seeds. And all of this seed

production hinges on one

Plains are major suppliers for production levels up, according to Lauderback.

> Some of the most severe policy recommendations for the USDA would reduce incentive to use or develop irrigation

Lauderback points out that important aspect-the avail- through measures including ability of irrigation to keep lower loans and purchase levels, environmental restrictions on the use of fertilizers, pesticides and herbicides, and even the taxing of groundwater pumped by producers.

"Up to 90 percent of the grain sorghum seed in the U.S. is currently produced in the Panhandle, or on the South Plains. Farmers in this nation will be in sad shape for sorghum seed if the Panhandle area is taken out of production due to restrictions on irrigation," stated Lauderback.

Production of sorghum seed varieties is spread from the northern tip of the Texas Panhandle to well south of Lubbock in the Slaton area.

Concentrations of seed production are located near Dumas, Stratford, the Vega-Hereford-Friona region, east of Plainview, and northeast of Lubbock.

"Our favorable climate, the availability of irrigation, and the fact that we are isolated are all important factors in making this a prime sorghum seed production region," Lauderback point-

"Isolation is important because it is a factor in the production of clean seed varieties. If any stray pollen blows into the seed field during the pollination period, it results in tall, bastard stalks, which are a real detriment when you're to be away from other sorghums, sudans etc. to get a clean product, and we've enjoyed a particular advantage in the Panhandle in recent

years," he continued. The aspect of increased production provided with irrigation is as important to the seedman as to the commercial sorghum grower, and the possibility of actions that could reduce irrigation is of particular concern to the Panhandle seed

"If you plant a cross-block on dryland acreage in our area, you won't get a uniform growth rate, and the bloom dates won't match up. You miss your pollinations, and this just won't work in a seed production program. Irrigation provides for uniformity, as well as enhancing overall seed stock production," the Hereford seedsman con-

tinued.

ARMON LAUDERBACK ... Concerned for Panhandle seed Industry

from hybrid cross-blocking than in any other area of the country," he indicated.

gion's weather, along with its availability of irrigation, as ideal for seed production.

"Kansas doesn't have a long enough growing season to produce the sorghum varieties we need, and in almost every year, conditions are favorable for more full-season type hybrids. We get a good field down...l can remember only three times in 20 years when we've had to use gas to dry our seed, yet nearly all of the corn seed from the Corn Belt has to be dried. Even open-pollinated sorghums don't do well in south Texas where there is a lot of rainfall...I can't prove it, but I've heard considerable talk among seedsmen that sorghum seed grown here and shipped north performs and produces much better than sorghums produced in the north and shipped here," he stated.

Lauderback, who graduated from Texas Tech in 1957 and

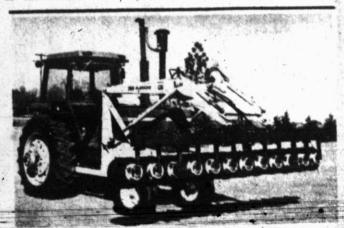

**Several Food Corn Varieties** 

Seed Discount Programs

joined WAC Seed in 1959, has spent most of his seed career working closely with hybrid regaining importance on the

High Plains. "Sorghum won't be any less important than it is now. although corn has been in the limelight here for six or seven years now. We'll probably see more sorghum here from now on, as we return to a balance of corn and sorghum that existed in the 1960's. The days of

pouring on "cheap" water and fertilizer for 8,000 to 10,000 pound per acre sorghum yields are probably gone forever, however. Farmers are cutting back on irrigation, going for the greatest production on the least amount of water application, and seeking the best returns on their investment... This philosophy will maintain sorghum as a viable crop in this region, so long as government policies or other factors do not deny us irrigation," he concluded.

#### BOURQUIN WEED PULLER

Finally, a simple, exciting and workable alternative to hand weeding. The Bourquin Weed Puller is one of the few innovations in cultivators in 30 years.

This inexpensive weed pulling machine will many times pay for itself in labor sav gs within the first season. The Bourquin Weed Puller is ecologically safe, has no reoccurring chemical costs, and may be front or rear mounted.

The Bourquin Weed Puller removes shattercane, careless weed, velvet leaf, beggar weed, coffee weed, and a variety of other weeds from grain sorghum, soybeans, cotton, sugar

The Bourquin Weed Puller is working well in uprooting seedling johnsongrass; and applying herbicide at a root stunting rate should improve the weed puller's performance in established johnsongrass.

An important side benefit may be emerging in our soybean operation. By operating the Bourquin Weed Puller at a slightly lower level, a slight prunning of the soybean leaves occurs. We have a growing number of farmers who feel they will get a boost in yield from this prunning action, in addi-

This may be the missing link in your weed management program. For more information, contact Bourquin Design and Mfg., Inc. Route 3, Colby, Kansas 67701 (913-462-2998 or 462-2065). Send coupon to Royce Cretsinger Box 6, Wildorado, Texas 79098 or Call 806-426-3338

Return coupon for more information more informat to attend a field day

#### Sorghum Seed Source Threatened

The High and South Plains of the Texas Panhandle region remains the primary source of seed for grain sorghum hybrids for the nation, but proposed regulations which would tax groundwater use or otherwise put an end to irrigation are a threat to this vital source of

seedstock. High seed productivity livels are possible in the High Plains due to Irrigation, favorable climate, and the isolation needed to produce new varieties. [Brand photo by Jim

# Texas Seed Production Is First Among States

WACO--Much of the strength of the American seed industry comes from the Lone Star State, a new publication of the Texas Seed Frade Association has reported.

The publication, a brochure entitled "First the Seed," notes that Texas tops all other states as a producer of planting seed. Texas is the world's principal source of seed for grain sorghum and is a major supplier of planting seed for cotton, wheat, rice, and forage

The seed industry brochure also describes the role of planting seed in modern life and outlines the historical development of the

The brochure lists several groups of Texans involved in the seed industry, including agricultural scientists, who work to perfect improved varieties of crops; seed production professionals, who prepare seeds for use by planters; marketing specialists, who advise planters about seed and establish distribution systems; and management personnel, who coordinate the efforts of people with the industry's physical and financial re-

Although they are vigorous competitors in business, the men and women of the Texas seed industry have united to promote higher standards for their industry as a whole and to encourage both public and private investment in improved plant breeding, the publication

# Texas WIFE Delegation Hosts House Agriculture Committee

Texas members of Women Involved in Farm Economics (WIFE) hosted a luncheon for the House Agriculture Committee and Livestock Committee in Austin Thursday in conjunction with National Agriculture

Wilma Allred of Wildorado, president of the Deaf Smith County WIFE chapter was among 20 WIFE members participating in the dinner and lobbying with legislators in

Austin during the past week.

June Saylor of Muleshoe, president of Texas WIFE ddressed the legislators, stating, "WIFE is positive in pursuing our objectives and purposes. We believe in the family farm concept for agriculture. We want to develop and executive bodies to promote economic prosperity for agricul-

Mrs. Saylor informed the legislators that her organization is "concerned about the lack of governmental response to critical farm programs."

According to Mrs. Saylor, the WIFE organization will continue to work closely with legislators for favorable laws pertaining to

"We believe that with the cooperation, of the Texas slature and WIFE, we will be able to resolve many of the problems facing Texas agricul-ture today. We want Texas to lead the nation in alleviating the depressed conditions in agriculture," she commented.

Among special luncheon guests were Commissioner of Agriculture Reagan Brown, Agriculture Committee Chairman Forrest Green and Vice Chairman Pete Patterson, and Agriculture Committee members Pete Laney, Tony Garcia, Bill Keese, Betty Denton, Bob Close, Tom Martin and Foster

Mrs. Allred and Jerome Friemel of Hereford were among those testifying in favor of disclosure of the purchase of land by foreign interests before

House hearings. WIFE members also testified before Rep. Bob Price of Pampa concerning the labeling of meat and vegetables imported from

Texas seedsmen also cooperate to cultivate greater public understanding of the industry, the brochure explains, because broad support is essential to the quest for the food and fiber crops of "You can get more yield here the future.

# Services of SCS Range Conservationist Available To Aid Management of Local Grassland, Pastures

By JIM STEIERT **Brand Farm Editor** 

For the first time. Deaf Smith County has the services of a range conservationist available to its ranchers and farmers involved in cattle enterprises.

Jim Paclik, who came to the area from Brady, is currently alternating his services between Deaf Smith and Randall counties in a new position, recently created by the Soil Conservation Service, to administer to the needs of the grasslands which make up a substantial acreage in the neighboring counties.

Paclik, who holds a degree in range science from Texas A&M University grew up on a small farm in the Gainesville area. and has been working in range management situations for the past five years.

"It's a major change coming to this region from the Brady area, where there was such an. abundance of brush, yet good management is important to pastures wherever you go," Paclik commented.

"There's been a need for someone to work with ranchers

on their unique problems concerning rangeland for some time, and the creation of this new position should help fill the need," he continued.

While dealing with nuisance brush in pastures was often a concern for him in the Brady region, Paclik explained that most rangeland problems in the local area can be related to management.

"Most of our rangeland here should come under the 'good' classification. There is a lot buffalo and blue grama grass, making the composition of the pastures good. The vigor of the pasture grasses could be improved however, with a good rotation grazing system and some favorable weather," he

One of the primary obstacles to outstanding pastures in this region is the lack of precipitation, according to the range specialist.

"Often, the performance of your pastures is directly related to the type of year you've had. There is evidence of some overgrazing, but this may stem from heavier wear on a pasture

to improve the condition of

pastures in this region is to use

a planned grazing rotation

in a dry year than in a normal year," he explained.

system, so that the grass gets a rest period. This one measure can help to accomplish a number of improvements over a period of time," Paclik continued.

The range specialist pointed out that limiting the height to which grass is cropped off in pastures is also a key to pasture

grazing situation consistently

dollars in the producer's pocket than any other system there is." he maintained. According to Paclik, the short

constant grazing ... It puts more

prairie grasses of the region are more susceptible to high rates of runoff than taller grasses of other regions.

"One problem we have in maintinaing soil moisture in our pastures is that when it comes a rain here, we lose a lot of runoff. particularly in these short grass pastures.

We get erosion problems stemming from this, and with any degree of overgrazing, you quickly lose potential to hold soil moisture. A proper grazing system will leave litter on the ground, and vigorous, good doing grass plants will hold more of the available moisture," he emphasized.

With improved cattle prices, Paclik reported that there is greater interest in maintaining and improving pastures.

"I think the majority of the people understand that they must make efficient use of the land without abusing it, and that efficient use doesn't necessarily mean intensifying use. You just can't intensify the use of this native pasture too much, like you can improved pasture, but a rancher can make the most of what he has. With a good grazing system, he can up production 10-20 percent, varying according to the climate and the individual operator," he indicated.

Paclik is still familiarizing himself with the local area and its rangeland, but pointed to a basic procedure which should help to boost the performance of virtually every area pasture.

"A producer needs a system that is flexible, so that if it's dry and he needs to cut down on the conumber of animals on the You want to graze to a pasture, he can do so without height where the plants can hurting himself. It's wise not to ntain their vigor. Research fluctuate the use of your pasture shows that a controlled rotation a lot with the cattle market either. Rangeland is making more for producers now than it you can't just cover your grass . Smith counties, and pointed out up with cattle whenever the market's up. It's probably better to stick with a base number of animals on the pastures and not hike the use too much when the market is up. You'll get more consistent performance from your grass without the danger of excessive grazing and resultant damage in

this manner," he advised. Paclik is alternating his producer assistance efforts

was three or four years ago, but between, Randall and Deaf that he usually works for alternating week stretches out of the Canyon and Hereford SCS offices.

"If I can be of assistance to any Deaf Smith County producer in solving his range problems, I'll be happy to do so," he stated.

Local producers may contact the range conservationist by calling the Deaf Smith County SCS at 364-0530.

# Conkwright Ranch Sets Hereford Sale

The Conkwright & Son C Bar Hereford Ranch will conduct its annual registered Hereford cattle sale Tuesday. April 3, 'at the Conkwright Ranch north of Hereford.

A total of 75 bulls and 64 females, including 22 bred heifers, will be offered for sale by local cattlemen Colby and Jim Conkwright.

The sale is scheduled to begin at 12:30 April 3, and will be conducted at a newly-constructed show barn at the Conkwright headquarters, 14 miles north of Hereford on Highway 385, and 11/2 miles east.

The Conkwrights have been raising Hereford cattle for a total of 45 years. according to a ranch spokesman, and have been producing registered stock for a total of 40 years.

Upwards of 200 prospective buyers have attended the local ranch's annual production sales in recent

# CC Favors All-Risk **Crop Insurance**

WASHINGTON, D.C. - The affordable, and workable." National Cotton Council has spoken out in favor of an all-risk federal crop insurance program

Among features desirable in a crop insurance program, Propst advocated: (1) insurance based for cotton, wheat, feed grains, on individual farm yields and area production costs, (2) Herman Propst, chairman of funding by the Commodity the Council's Producer Steering Credit Corporation, (3) selling Committee, urged a Senate and servicing by both ASCS Agriculture subcommittee to offices and private agents, and enact a crop insurance program (4) re-insurance of private that is "economically feasible, all-risk insurance.

Brand Farm Editor

The ancient law of supply and demand has always been an integral part of our economic

Witness the petroleum situation...Fossil fuels are a non-renewable resource growing more scarce each day.

And as the world's oil supplies dwindle, the price of this commodity goes up, and up, and up.

Yet, while the supply and demand situation normally holds true, we have a situation in America today that is a throwback to the downfall of former great civilizations.

One of our basic economic units, the family farm, is fast disappearing from the American scenario.

Taking the place of fertile expanses that gave the land sufficiency are ever-expanding jungles of concrete and asphalt and steel, the housing developments, shopping centers and highways of a modern society that may one day outrace its basic food supply.

With the number of family farms growing scarce, their great value should be realized as it grows with each day the world population expands; wouldn't you think?

Despite knowledge of this fact in rural America, the urban leagues of this nation have not realized a basic truth etched in history...The pilgrimage to the cities brought on by the displacement of the working farms can only end in disaster.

We've all heard of the glory days of the Greek and Roman empires.

Greece, the very heart of democracy in the Western World, saw her governmental system we emulate dissolve into dictatorship.

Foreign conquest followed swiftly.

The Greek philosopher Plato saw the reason for this, and wrote even before the fnal downfall of Greece, lamenting the status of the stewardship of the land.

"When Attica was still intact, what are now her mountains were lofty, soil-clad hills; her so-called shingle plains of the present day were full of rich soil; and her mountains were heavily forested. There were many lofty cultivated trees, while the country produced boundless pasture for cattle. The annual supply of rain was not lost, as it is at present, through being allowed to flow over the denuded surface to the sea."

Plato's words were penned 23 centuries ago...The Greek soil still washes away, remaining too poor to support the mountain forests that one day held the water and prevented erosion.

The mighty Roman empire sprouted from a republic of farmers, who worked hard on their holdings, and responded to the call to arms at first to defend their homeland.

It was the taste for empire and the forgetting of the importance of sustenance from the land that played a major role in Rome's downfall.

The Romans eventually adopted shoddy land

use practices as they expanded their conquests ... Small land holdings were combined into massive absentee-owned estates, the owners reasoning that the land could be more efficiently worked in large sections by slave labor than in smaller lots by family farmers.

There was a grievious error in this thinking...A human ingredient vital to a civilization was overlooked.

Those who own the land they work care far more about it, and maintain it much better than mere slaves of the land.

Grain production fell off as the Romans took new territories, and soon the republic was looking to its conquered lands for its own sustenance.

Farmers driven from the land were pouring into the cities of Rome, where there was no work...only public spectacles in the arena, and

Corrosion of the empire was underway...Those who did not have to work with their hands were making jest of those who did... It was easy to laugh at first, until there was no bread.

By the end of the second century A.D., the Romans were so desperate for farmers to tend their lands once more that a law was passed giving anyone anywhere in the empire the right to take possession of abandoned fields, even if they belonged to the emperor himself, so long as they worked the land.

As author George Reigler wrote, "There were few takers, partly because most such land was beyond the restorative capabilities of most farmers, and because it was still easier and more respectable for Romans to go through the motions of civil service, be 10 percenters in commerce, or even take welfare than to work with one's hands."

We know what happened to Rome...What is left of that once mighty empire now?

Some of these mistakes sound mighty familiar, don't they? Will America squander her most precious resource through mistakes in law and

According to Robert C. Cook, former director of the Population Reference Bureau, in little more time than it has taken you to read through this . column, nearly 50 acres of irreplaceable productive farmland were consumed through housing or other development.

In the ten minute period that consumption was taking place, 1,600 people became members of the earth's population.

In the time it took you to read the last sentence six new people were born.

And as this growing load appears, to make its drain on earth's finite resources, we have to wonder, can we really afford to give up good farmland and gifted family farmers?

We have seen the pilgrimage to our own cities, the welfare rolls might rival those of Rome, right here in our own nation.

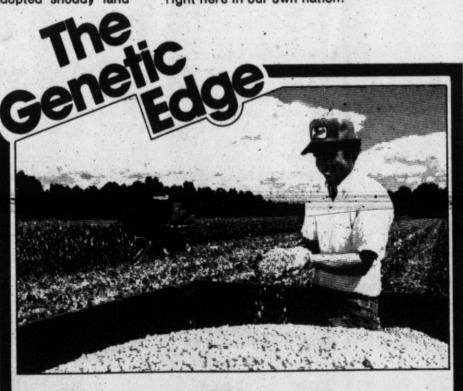

#### Winter Deals **Icy Hand** For Sheepmen

AUSTIN--Old Man Winter is having little sympathy with Texas sheep raisers this season, and the result has been more sheep and lambs-moving into feedlots, according to the Texas Department of Agriculture.

"A February survey shows that the number of sheep and lambs in Texas feedlots is up by 39 percent from a year ago, and the main reason is the weather," said Agriculture Commissioner Reagan V. Brown. "This year's rough winter has deteriorated pastures to the point that many producers have sold their animals as feeders or for slaughter rather than face expensive supplemental feed

According to the Texas Crop and Livestock Reporting Service, there were 82,000 head of sheep and lambs on feed for slaughter in Texas as of the first of February. This is up 23,000 head from the same month a year ago, and is 15 percent above last month. Placements during January totaled 47,000 head, and, like November and December placements, are running well above the previous year.

Marketings during the last few months, on the other hand, have declined or remained steady in relation to 1978. Many analysts blame this also on the weather, saying that winter storms in important Eastern markets have made transportation difficult. In addition, transportation to Texas markets has been hindered in many areas recently due to adverse weather conditions.

Bergland To Avoid Water Session

# Witnesses Are Scheduled For Hearing in Lubbock

By JIM STEIERT **Brand Farm Editor** 

The final list of individuals who will be presenting testimony at a special USDA hearing on irrigation scheduled for Wednesday in Lubbock is taking shape, and despite the fact that Agriculture Secretary Bob Bergland will not be on hand for the meeting, as originally planned, the session could prove vital to the continued well-being of irrigation agriculture on the High Plains.

The session will be a technical meeting on various aspects of water use on the High Plains, and local interest is centered on the meeting primarily due to USDA policy and procedures proposals which are designed to greatly curtail or eliminate.

irrigation. Concern over these policy proposals is centered primarily on the results of a review of agricultural assistance programs to develop appropriate actions to discourage overextension and depletion of groundwater in water-short

Recommendations following the review included proposals which would reduce incentives to use or develop irrigation, through lower loans and purchase levels, and environmental restrictions which would restrict use of fertilizers, pesticides and herbicides, and farmers on the groundwater they pump.

USDA officials including Dr. Rupert Cutler, Dr. Anson R. Bertrand and Larry Myers will be covering the USDA's national perspective on water policy and conservation.

Dr. James Osborn, chairman of the agricultural economics department of Oklahoma State University will present a regional perspective on water resources.

Following these presentations, the USDA will be taking testimony from a number of water industry officials, several of whom are from the local area.

Among witnesses will be Don Anderson of Agricultural Investment Consultants, Inc.; Dale Williamson, director of the Natural Resources Commission of Nebraska; Jack Runkles, director of the water resources center of Texas A&M; Duncan Ellison, executive director of Water Inc. of Lubbock; J.W. Buchanan, manager of the North Plains Water District of Dumas; A.L. Black of Friona, chairman of the Texas Water Development BOard; Dale Hale, representing the Department of Water Resources of New Mexico, and James Mitchell, president of the board of the High Plains Water District of Lubbock.

even a proposal which would tax Ogallala Aquifer for irrigation are expected to be in Lubbock for the session.

A similar meeting is scheduled for Salt Lake City on Thursday, and although Bergland does not plan to attend the Lubbock session, he is expected to be on hand for the Utah meeting.

Plans had originally called for Bergland to participate in the Lubbock water meeting, but

Sorghum Production Drop Predicted

AUSTIN-Texas cotton and sorghum production will fall sharply in 1978 from last year's levels, Agriculture Commissioner Reagan V. Brown has announced.

Across the state, cotton production has been slashed 34 per cent from last year's harvest, with the Texas Crop and Livestock Reporting Service predicting a 3.6 million bale crop this year. State corn production is

expected to decline 18 per cent

through 4 p.m. this year, according to Agriculture Commissioner Reagan V. Brown, with the harvest expected to total 132.3 million bushels. Grain sorghum production is also

# Farm Show Set Short Course on Horticulture Planned

Brand Farm Editor

The Hereford High School Vocational Agriculture Department is sponsoring a horticulture short course for adults, to be conducted beginning April 2, and continuing over four

According to Marcus Phillips, FFA advisor, the shortcourse is part of a public service effort emphasizing that the horizons of the local vocational agriculture program go beyond traditional crop and livestock enterprises.

The local chapter will be providing a service to the community through the program, which will involve information on various garden plants and domestic plant

YOU HAVENT

SHOPPED LUXURY

other topics.

Short course sessions will be Wheld at 7 p.m. on each of four nights in the high school agriculture building, and a minimum of 12 hours of instruction will be presented to participants.

Conducting the course will be John Williamson, horticulture specialist with the Vocational Agriculture Division of the Texas Education Agency and the Department of Horticulture at Texas A&M University.

Williamson holds bachelor's and master's degrees in agricultural education, and is qualified as a certified teacher of horticulture in the vocational agriculture program in Texas.

which the short course is in progress here, Williamson will be available to assist enrollees with individual problems, and to provide on-the-farm and in-the-

nome instruction, according to

He pointed out that Williamson has indicated that the short course can be adjusted to the wishes and interests of those

Among general topics to be covered in class sessions are plant growth and development. propagating media, plant propagation, vegetable gardening. developing and maintaining the landscape, establishing and caring for lawns, house plants. and greenhouse production,

Demonstrations of various cultural practices will be presented and class members will have the opportunity to perform the skills demonstrat-

An entry fee of \$5 will be charged for the course, and horticulture short course certificates will be presented to enrollees who attend all of the training sessions.

Persons interested in attending the local short course should contact Phillips, Ted Young or Jess Robinson at the HHS ag department.

Short courses in horticulture. as well as other subject matter, are now available to adults throughout the state under a cooperative program of the Texas Education Agency and Texas A&M University.

The program is designed to make the services of specialists available to conduct short courses under the supervision of public schools.

Specialists are now available in the fields of beef cattle, farm electric wiring, horticulture, arc welding, swine production, tractor maintenance, oxy-acetylene welding; and pasture management. .

JOHN WILLIAMSON

# Writer Claims Media Misrepresented Farmer

[EDITOR'S NOTE - The ollowing item was submitted by a local reader from the March 8 edition of the Hydro Review, Hydro, Oklahoma. It involves an eyewitness account by Jolene DeBoer, a participant in the recent tractorcade to Washington, concerning an outbreak of violence as farmers arrived in the nation's capital.]

"I'm writing this letter at the suggestion of several concerned citizens from the Bertrand area. Our national and big city news media have deliberately failed to bring out details of how the violence with the tractorcade (in Washington) started and who was responsible.

My husband and I were eyewitnesses to one policemanfarmer conflict, as we were in our tractor only 10 feet away.

This is what we experienced: Wayne Peterson, a farm leader from South Dakota, had been leading our tractor caravan on foot. We'd traveled well over 10 miles through the city, with police escort, and not a single problem erupted.

The next thing we knew. sirens were blaring and lights were flashing, while police cars and motorcycles raced in front of us. They parked their vehicles directly in front of the tractors.

so of course everyone stopped. A billy club, belonging to a policeman, was raised in the air and came down directly on Wayne's head, from behind. A cop yelled, "You can't walk on

our street."

every farmer felt who witnessed this atrocity.

Ken Hilton from Cambridge had been a lead tractor for our group. Cops began climbing on his tractor, and with their clubs started bashing his four tractor windows out. Other cops smiled as they cut his hydraulic hoses.

I don't know how you would have reacted, but mine would have been the same as Ken's. In an attempt to defend himself. his foot slipped off the clutch, and as fate would have it, his tractor hit two motorcycles and two police cars. I get sick to my stomach when I think of what happened next.

Eight cops were yanking and pulling on Ken trying to get him the tractor on the street. Billy club after billy club landed on

Even after he was handcuffed, those cops continued to.'

You can imagine the shock beating on him until he was a bloody, pulverized piece of

> They stuffed him in a paddy wagon and began their work on other unarmed farmers.

One young man had jumped out of his tractor to ask them to please stop beating his friend. He also got handcuffed and battered on the head. They dragged him face down across street, but before they threw him in the paddy wagon, two cops spread his legs apart while another cop beat him unmercifully in the groin. As they threw him through the doors, one cop jeered, "There, farmer, you got your parity."

Whether you support the farmer is up to you. But I do out of the tractor. Unsuccessful, hope you care enough about they next choked him to the your country to find out what is point that he was almost going on. If you enjoy the privileges of freedom you now experience, you may get your chance to stand up and fight to keep them. I am thankful we have a heaven to look forward

# **Council Wants** Repeal Of Limit

WASHINGTON, D.C. - The today's agricultural economy. National Cotton Council has urged outright repeal of the 1902 Reclamation Act's acreage limitation and residency requirements, calling them "outdated" and "inequitable" in

Herman Propst, Anson, Tex., cotton producer who testified for the Council, also told the Senate

Subcommittee on Energy Research and Development that limitations on leasing represent a dangerous concept. He said this restriction had never been contemplated under the 1902 Act until proposed in regulations by Interior Secretary Cecil Andrus in late 1977. .

'In effect, this would actually place a Washington-mandated limitation on farm size," Propst stated. "With modern agriculture changing so rapidly, who can say that 1,280 acres or any number for that matter will not be as obsolete a few years hence as 160 acres is

The Texas producer maintained that an individual farmer should be allowed under the law to use his managerial talents and financial resources to the extent that he - and not the government - determined to be

"To do less is to hamper seriously the total productive capability of U.S. agriculture," he added.

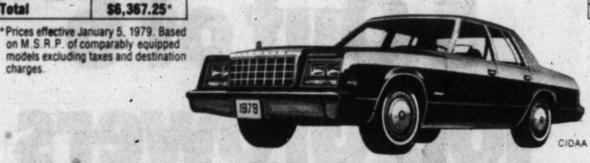

Propst also said there is

concern in all areas of the Cotton Belt that acreage limitations might be applied to irrigated farms drawing water from Corps of Engineers flood control projects. As an example, he cited a court decision which placed the Pine Flat Dam in California under reclamation law restrictions. The dam had been built by the Corps of Engineers as a water storage facility.

#### Cattle on Feed Down; **Beef Supplies Good**

AUSTIN-In spite of a slight decrease in the number of cattle on feed in Texas during February, supplies of choice beef should remain. plentiful for the next few months, according to the Texas Department of Agriculture.

As of Feb. 1, there were 1.9 million head of cattle and calves on feed for slaughter. down by 100,000 head from Jan. 1, but still 3 percent above a year ago. Current feedlots populations are among the largest since January of 1974.

"Marketings of fed cattle are expected to peak, and then taper off," Brown said. "This should provide plentiful supplies of beef for the coming few months, with a decrease following."

According to the Texas Crop and Livestock Reporting Service, Texas cattle feeders placed 395,000 head into their lots during January, which reflected an increase of 27 percent over December. Some 470,000 head of fed cattle were marketed during the month, a hefty 21-percent jump from December

# Young Farmers Discuss 1980 Stock Show Plans

By JIM STEIERT **Brand Farm Editor** 

Members of the Hereford Young Farmers discussed tentative arrangements for their 1980 junior livestock show, and outlined project work during a meeting held Thursday night at K-Bob's Steak House.

Chapter members received copies of their new stock show rules and regulations, and learned that the dates for the 1980 livestock show have been set for Jan. 24-26.

Assignments for the various divisions of the local show were also released.

General superintendents for the 1980 stock show will include Jack Andrews, George Muse and Jimmy Christie.

Steer division superintendents will include Roy Carlson, chairman, Gerald Marnell, Rick Hales. Bob Ward and Mike

White. Ray Schlabs will be chairman of barrow superintendents, and others will include Joe West, Connie Urbanczyk, Ed Ham-

contends the specialist. Springs

czyk. Lamb superintendents will include Tom Schlabs, chairman. Jim Bob Perrin, Ronnie

met, Bill Caraway, Bill Dutton.

Kim Sealy and Kevin Urban.

Andrews, Toby Turpin, Dennis Schilling and Ronald Johnson.

Judging contest chairmen will be Robert Pope and Doug Reinart and publicity chairman will be Jimmy Campbell. Arrangements for securing judges for the various livestock

classes were also discussed, and plans were made to proceed with contacting prospective judges. In a stock show related matter, the local Young Farmers

voted to proceed with a new phase of a panel construction project launched prior to the 1979 stock show.

The project provided for improved livestock holding facilities at the Little Bull Barn. where show animals are quartered during the annual three day show here.

In Thursday night's meeting. members voted to finish out extension of panels for livestock pens through the remaining area of the livestock housing facilities.

YF President Ray Schlabs appointed a committee to investigate summer activities which might help enlist new membership in the local chapter.

Members present voted to designate the first Thursday of each month as the regular meeting date for their organization, and selected K-Bob's as their regular meeting location.

Meeting time was set at 8 p.m. Lee Leatherman of George Warner Seed Co. of Hereford presented a program on seed development and hybrids to

those in attendance. "One eighth of the world's people are underfed, and it has become the work of plant breeders to help sustain our civilization by providing food sources," Leatherman related

in his program. Using a slide presentation, Leatherman traced the history of hybrid development, and pointed out that obtaining new seed varieties is a slow and trying process.

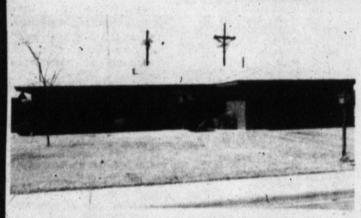

"It takes an average of 10 years for the development of a new hybrid," he reported.

The local YF chapter's next meeting date will be April 5.

Texas Ag Fact

At. 315,000, a 33-per-cent increase in the number of turkey poults hatched was recorded during October, according to the Texas Department of Agriculture.

# Proper Seedbed Preparation Important to New Pastures

COLLEGE STATION .. A little planning and some sound production practices can go a long way in establishing a pasture the next few months. says an area forage specialist with the Texas Agricultural Extension Service.

The planting material should be the first consideration once the type of pasture has been determined, says Don Dorsett. The new grass can be planted by seed (such as Bahiagrass or Kleingrass) or vegetative growth (such as the bermudagrasses) and should be high quality -good germination and free of

Dorsett suggests locating sources of the plant materials well in advance of planting to prevent last-minute rush deci-

Since pasture seed are smaller than row crop seed, they do not possess the stored energy reserves necessary to survive deep plantings. This means shallow planting, which subjects seed to insect removal, soil crusting and premature dry-out of the soil plus many other hazards. Conditions permitting, Dorsett believes an adequate stand will be established if optimum rates of high quality seed are planted.

Depending on the type of vegetative growth used, this type of planting can be more or less hazardous than seeding,

no stored food reserves and must be planted quickly, emphasizes Dorsett. Unlike springs, they should not be completely covered. Instead. one end is buried and the other

remains above ground. Hopefully, adequate moisture will be present until the cutting develops a root and uses soil moisture.

Another important factor for a successful pasture planting is a well prepared seedbed, notes the forage specialist.

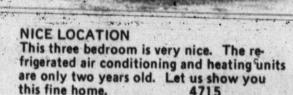

Dorsett says a good seedbed is clean, firm, moist and smooth. It should not be freshly plowed or cloddy. The soil should be well aerated but given time to settle. Soil disturbances near planting time should be kept to a minimum. Crusts that develop can be broken by harrowing or by the planter itself.

A stand should emerge with no further effort if high quality seed is properly placed in a good

seedbed, contends Dorsett. Other considerations in pasture establishment include weed

control and fertility.

Fertility is a key factor, emphasizes the specialist.

# Beets Efficient With Limited, Full Irrigation

AMARILLO - Sugarbeets can be watered a little or watered a lot and still make good use of water according to Dr. Steven Winter, Texas Agricultural Experiment Station Researcher at Bushland. Farmers with limited water can produce 20 or more tons of sugarbeets per acre, using emergence irrigation and one to three summer irrigations. Full irrigation with about 25 inches of water applied during the summer will produce

in excess of 30 tons per acre. These yields can be obtained with timely management to control weeds, fertilizer level, and disease. "If one of these steps are not completed, sugarbeet yields will be poor regardless of irrigation management," Winter said.

In order to reach this conclusion the researcher conducted experiments from 1976 through 1978 at the USDA Research Center on clay loam soil in level bo rders which

retained all irrigation and rainfall on each plot. With furrow irrigation some rainfall will be lost as runoff. This would reduce yield about 0.75 ton per inch of runoff or require additional irrigation.

In 1976, all treatments

received an emergence irrigation and up to eight summer irrigations. Sugarbeets getting an emergence irrigation and 13 inches of rain produced 15 tons per acre. Watering eight times at two weeks intervals from June 4 to September 10 took 27 inches of water and produced 30 tons per acre. Two seasonal irrigations, on July 8 and August 13, with emergence irrigation yielded 22 tons per acre. Water use efficiency varied from 0.58 to 0.66 ton per acre inch of water, but was above 0.60 when the first irrigation was applied in June.

Seasonal rainfall in 1977 was again 13 inches, but six inches came in August. In his studies Winter applied an irrigation for emergence and irrigations of five inches at 3, 4, and 6 week intervals. The most water applied was five four-inch irrigations which produced 34 tons per acre. The most efficient treatment, five irrigations of two inches each, yielded 27 tons and. produced 0.92 ton of sugarbeets per acre inch of water. Emergence irrigation and a single summer irrigation on either June 10 or July 22 produced 19 tons per acre. Two summer irrigations produced in excess of 21 tons per acre, Water use efficiency varied from 0.80 to 0.92 tons per acre if the first seasonal irrigation came in June. Delaying the first seasonal irrigation until July, cut yield and water use

In 1978 Winter designed an experiment to determine if beet spacing in the row affected yield with either a five-inch irrigation for emergence, limited irrigation using 19 inches of water, or a full irrigation with 24 inches. It was a very wet growing season with a total of 19 inches of rain from May to October. Six inches

September. Sugarbeets were spaced at 6, 9, 12 and 15 inches in 30-inch rows. The highest yield came with six-inch spacing regardless of irrigation level. Having 15-inch spacing cut yields two to three tons per acre. Winter said, "Yields were outstanding, sugarbeets on 6 inch spacings that were fully irrigated produced 41 tons per acre." "Limited irrigation

produced 36 tons per acre and emergence only irrigation made

23 tons per acre," he continued.

fell in May and five more in

Summer irrigations and rainfall were most efficiently used by sugarbeets when enough water was applied to maintain continuous growth without periods of major water stress. At least one irrigation in June, to assure early initiation of major top and root growth, was especially important. However, sugarbeets made good use of water even when subjected to

periods of water stress up to 5

Sugarbeets have several characteristics which help them adapt to limited and erratic water supply and fit into a general farming operation. Season-long ability to recover from water stress by growing new leaves is a major advantage over grain crops. Irrigation timing is less important on sugarbeets than on grain crops because sugarbeets do not have a critical reproductive growth period. Sugarbeets can be watered when other crops are not in a critical stage. Sugarbeets can root to and efficiently use water from ten feet or deeper in the soil.

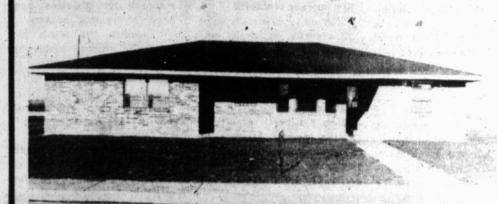

After looking over his results, Winter figures that farmers can get good returns from irrigating sugarbeets. Unfortunately costs for producing sugarbeets other than water are almost the same with a little or a lot of irrigation

water. Winter figures the break even point for most farmers is 18 tons per acre or about the yield obtained with emergence irrigation. This indicates that summer irrigations are needed for a profit. Sugarbeet tonnage per acre inch of irrigation water

and rainfall is about the same with two summer irrigations or full irrigation of four or five waterings. The three year average for all irrigation levels was about 0.75 ton per acre inch rainfall and irrigation water. Sugarbeets with 14 percent

That makes irrigation water put on sugarbeets worth 18 dollars, per acre inch. "That's more return for irrigation water and rainfall than possible with most other crops," Winter said.

# Blood Testing May Help Upgrade Cattle Breeds

By JAMES E. VANCE

COLLEGE STATION -- An immunogeneticist at Texas A&M University is using blood of cattle to develop a system of breeding which he believes will change the century-old philosophy by which ranchers have upgraded their herds.

Breed out the undesirable traits," explained Dr. Jerry Caldwell, "rather than relying strictly on breeding in the good

Caldwell said that inferior qualities within cattle, particularly inherent diseases, may be detected within white blood cells. It's these white blood cells through which Caldwell hopes will come a new technique by which to improve cattle.

Traditionally, cattlemen "eyeballed" the beef-producing characteristics or traits of bulls, and bred their better ones to their cows. This system still left some "byguess and bygosh" in

the production of better beef cattle. Dairymen used similar standards to increase milk production.

In the mid-1950's, however, scientists of the Texas Agricultural Experiment Station initiated "performance testing," recording of an animal's ability at various stages to put more pounds on the scales at market time, and relating weight back to its sire and dam. This triggered a new foundation upon which to more scientifically upgrade beef cattle.

Dairymen had already enlisted records of daily milk production, and a total during a lactation, of a cow as the measure of potential of their bulls and cows.

The bloodtyping program which Caldwell directs in-A&M's Animal Sciences Department was initiated five years ago to analyze red blood cells as a method to take

any intended dishonesty, in claims of parentage, progeny or pedigree of cattle.

"In everyday language, the type work we do is basically for the livestock cattle industry, and is similar to the procedure used by courts of law in paternity suits," Caldwell said. "This is done with red blood cells."

Caldwell said that since the white cells are also a part of the blood sample that he decided to make use of them in basic research for possible new benefit to the cattle industry.

"Together, the words immuno and genetics means the study of the genetic control of the immunological (health) mechanism of animals. White blood cells are the defense system against diseases," Caldwell added.

'We hope to detect animals which are more resistant to, or susceptible to, the various

about a genetic control or operations. eradication of some of these diseases by selective breed-

Should such a testing system become reality, and Caldwell believes it will be perfected within five or 10 years, cattlemen could selectively breed for greater resistance to diseases by an animal.

"In other words, while cattlemen have zeroed in pretty much on breeding for such positive and profitwise improvements as gaining ability and bigger frames to produce more beef." Caldwell said. "this system would permit cattlemen to breed out the negative or unprofitable characteristics or diseases of an animal and retain the animals which proved resistant to a disease."

Citing "pocketbook terminology" Caldwell said that the technique could reduce many of the millions of dollars cattlemen now lose through deaths of caftle, decreased production of both number of animals and pounds of beef, and expenditures for controlling diseases-including time, medications and labor to tend to ailing animals.

A strain of cattle developed and known to be resistant to one or more diseases would surely demand a premium price.

Caldwell assured, however, that many of the diseases which affect bovines are complex, and that true cause of many of these diseases has not been determin-

The scientist predicted that when a genetic system of resistance to diseases is perfected it will be through research with white blood cells.

The laboratory facilities draw blood samples submitted through 23 beef and dairy cattle associations. A barometer of interest and dependency upon the tests is the increase from 4,000 samples processed the first year to 9,000 last year. Caldwell said that fees -- \$20

oper sample through associations under contract and \$25 to individuals--finance 95 percent

bovine diseases, and to bring of the laboratory's cost of

'The biggest single use of the laboratory is to clear up doubt of an owner, or a prospective buyer, or by a breed association about either the sire or dam, or both, of a particular animal," Caldwell said. "We can answer 90 percent of the problems arising about most pure breeds.

Caldwell and his team of technicians are called upon for a myriad of reasons, ranging from identification of a stolen cow involved in a murder in New York, to which bull jumped the fence into a pasture full of cows, and to verify suspicion that the owner of a herd with a Brucellosis problem drew his blood samples from a single cow which had earlier been given a 'clean bill of health."

Bloodtyping can also determine whether an animal was the result of service by natural breeding or by artificial insemination, and whether or not a freemartin (a female born twin to a male) is sterile.

"Sterility of a freemartin results from a biological development of the calves within the cow's uterus. By bloodtyping we can determine whether or not the female has her male twin's blood type," Caldwell explained. "When detected she will invariably be sterile. This trait can be established at three months of age, saving the owner a bunch of money he may have spent raising her to maturity, only to learn that she was a non-breeder."

The technique of bloodtyping centers around antigens (protein complex) in blood of cattle.

Blood samples are, upon arrival, logged as a permanent record--as to breed, sex, registration number and other identifications. Cells are washed and mixed with bloodtyping reagents, after which rabbit serum (blood) is added. Caldwell said that the rabbit serum permits Lysis (destruction) of the red blood cells by the

"Each animal's blood is scored as a 'plus' or a 'minus' reactor for each of as many as 62 different antigens we can detect in blood of cattle," he said. "From these we can determine the blood type of the animal, with respect to a blood group system. Cattle blood types are

controlled by 11 different genetic systems."

Caldwell explained that after the technicians identify the genotype, then they can determine the blood type the father and mother must have in order for them to qualify as

Although all dairy breeds and a large percentage of beef breeds utilize services of the laboratory, primarily through a single contract with the National Society of Livestock Records Association, Caldwell said that "from time to time" requests from other associations are

He noted that the Texas Longhorn Breeders Association of America is interested in establishing an official bloodtyping program for the historical breed which almost vanished, but which has made a tremendous comeback within the past decade.

Most recent affiliation is the American Breed Association at

"There's not only a lot of situation appears brighter. interest, and questions about , R.M. Davis, administrator of (bison) with cattle, and about crossbreeding in general,"

SUNDAY, MARCH 25

Caldwell added, "but questions breed." about the actual content of bison in crossbreeds. One of the research areas has been to detect, or to identify through bloodtyping, whether or not

Caldwell concluded that answering the questions arising about purebreeds is much more simple than answering those about cross breeds.

#### Researching Serum

Dr. Jerry Caldwell draws blood serum from a Texas Longhorn cow on the YO Ranch near Mountain Home for bloodtyping in Texas A&M University's Immunogenetics laboratory where nearly 10,000 samples from beef and dairy herds are processed annually to take the guesswork out of parentage, progeny and pedigree of cattle. Caldwell also is researching white blood cells to detect inherent diseases and other undesirable traits which may be controlled genetically to upgrade cattle.

## on in the cross Runoff Outlook **Improves**

WASHINGTON (AP) - The Agriculture Department says heavy snowfalls last month have helped "alleviate fears of a water supply shortage" in some areas of the West.

A month ago the department said that as of Feb. 1, below normal snowpacks pointed to possible water shortages this summer in much of the West.

But new surveys showed that "as much as 10 to 15 feet of snow had fallen at some high mountain survey sites" in February and that the water

crossing the American buffalo the department's Soil Conservation Service, said "a very heavy snowpack remains on the

334 Elm

341 Elm

watersheds of Arizona, southern Utah, southwestern Colorado and northern New Mexico" and that the region can expect "an excellent snowmelt runoff season."

Snow accumulated in the winter and spring provides about 70 percent of the western water supply during the year as

'Reservoir storage for release to supplement the water supply is excellent in Arizona and near normal in most other states," the agency said 'However, Nevada has only about one-half of its normal water in storage."

The snowpack is still below normal on much of the Cascade and Sierra Nevada ranges but "is much better than one month ago," it said. "Snowpack deficiencies could be overcome by April 1 if the wet trend continues."

The first telephone directory in the world was published Feb. 21, 1878, listing the 50 subscribers to the New Haven, Conn., Telestone Co. phone Co.

# Review of Pesticide Being Planned by EPA

WASHINGTON (AP) - A The Environmental Protection pesticide used to kill destructive roundworms in soil where cotton, soybeans and certain fruit crops are grown will bereviewed again by the government to see if it should be banned or otherwise restricted because it poses threats to human health.

Agency reports a new public hearing will be held to decide what to do about DBCP, known technically as dibromochloro-

Officials said the hearing is planned partly because of recent evidence that DBCP "may leave public. a residue on crops previously

# Growers Seek OSHA Reprimand

Congress created the Occupational Safety and Health Administration (OSHA), the Environmental Protection Agency (EPA) and all other Federal regulatory agencies, and it is from Congress that any lasting relief from their heavy handed regulations will have to come

That is the message repeatedly going to legislators in Washington from Plains Cotton Growers, Inc., Lubbock, primarily aimed at the unreasonable regulations and proposed regulations that adversely affect the cotton industry.

The one regulatory action with the most damaging potential for cotton, PCG points out, is the impossible cotton dust standards adopted by OSHA. But this, says PCG Executive Vice President Donald Johnson, "is just one way in which Federal regulatory agencies with their almost unlimited powers are endangering the very existence of an economy built on private enterprise."

In the case of the cotton dust standards, a number of lawsuits have been filed in an attempt to force OSHA to take a more reasonable approach.

But a court order giving relief from one regulation, assuming the lawsuits are won, at best is only a stopgap measure, Johnson says.

"What is needed," he continues, "is new legislation from Congress - legislation providing for Congressional review of proposed regulations before they are enacted and making these agencies fully accountable to Congress for their actions."

To its most recent communication to Washington on this subject, PCG attached an essay from Time magazine entitled "The Rising Risks of Regulations".

The essay cites figures compiled by economist Murray Weidenbaum, Head of the Center for the Study of American Business at Washington University. Weidenbaum estimates . that administrative costs, which include only visible Federal spending on regulatory agencies, have climbed from \$745 million in 1970 to \$4.8 billion in the 1978 fiscal year. And, he says, this only hints at the total cost.

The heaviest burden, according to Weidenbaum, is in compliance costs and the attendant multiplier effect on consumer prices and therefore inflation. He estimated that the \$3 billion administrative costs of 1976 generated compliance costs that added up to a staggering \$63 billion, equivalent to a hidden tax of \$307 on every person in the United

Applying that same multiplier effect to the \$4.8 billion administrative cost in 1978, the cost of compliance totals over \$100 billion and almost \$500 per person.

thought unaffected."

The EPA said it also will be held to consider a request from the California Rural Legal Assistance Migrant Project that all uses of DBCP be stopped because it may seriously harm field workers and the general

Specifically, the hearing will be aimed at determining whether additional precautions should be placed on the remaining uses of DBCP or whether "they should be completely stopped on the basis that no additional precautions can render them safe for people or the environment," the agency said.

A hearing last September failed to settle the dispute over DBCP, which has been used since 1955 to control soil-borne nematodes or roundworms.

About 18 months ago, the EPA temporarily halted numerous crop uses of DBCP, fearing residues could lead to damaged fertility or cancer among consumers.

Fears about the chemical rose in 1977 after it was identified as the cause of sterility and low sperm levels among workers who produced it at the Occidental Chemical Co. plant in Lathrop, Calif.

Later tests on other DBCP workers on "several hundred" farmers, pesticide applicators and formulators showed the same problem. The EPA already was investigating the chemical as a "suspect human cancer agent" because it had caused tumors in laboratory test animals, the agency said.

DBCP was banned from use on broccoli, brussels sprouts, cabbage, carrots, cauliflower, celery, cucumbers, eggplant, endive, lettuce, melons, parsnips, peanuts, peppers, radishes, squash; tomatoes, turnips and strawberries, except nursery stock not allowed to bear fruit.

"However, where effective alternative products were not available, EPA temporarily allowed other crop uses and certain home lawn and golf course treatments to continue under additional safeguards." portation system.

For example, the panel was told that while perennial rail boxcar shortages are important to some commodities, that situation should not be dwelled upon in coming up with solutions to the national

"I've heard about boxcar shortages since I was born, and I'm tired of it," Bergland said at the panel's first meeting.

"We hope to take on all comers," he said. "There are no limits, no holds barred, and

AUSTIN-Fall and winter are cabbage time in the Lower Rio Grande Valley, although this leafy, nutritious crop is grown in a wide enough area of the state to be marketed 12 months out of the year, according to the Texas Department of Agriculture.

WASHINGTON (AP) - A new

rural transportation task force

made up of diverse interests has

been told to put aside old

prejudices and come up with

fresh ideas on how to improve

the nation's farm-to-market

Agriculture Secretary Bob

Bergland and Transportation

Secretary Brock Adams, co-

chairmen of the 16-member

panel, told it to be tough and not

avoid difficult questions that

confront the beleagured trans-

By early November morethan 100 truckloads had moved out of the Valley this year. Harvest was also under way in the Winter Garden area of South Texas. Agriculture Commissioner Reagan V. Brown reported that quality was "extremely high but no higher than in seasons past. We just grow good cabbage in Texas."

The Texas Crop and Livestock Reporting Service had estimated 6,700 acres for harvest this fall in the Valley, South Texas, the High Plains and Trans-Pecos. Harvest will continue in the Valley until

Hidalgo County, the biggest vegetable-producing county in Texas, is also the biggest cabbage producer. In 1977 Hidalgo accounted for 7,350 harvested acres, bringing the Valley's total to 9,350 and the statewide total to around 14,500. This figure

we hope that you can produce some concrete suggestions."

The task force was authorized by Congress last year to study the agricultural transportation situation and to submit a preliminary report by June 1. Public hearings will be held this summer and a final report to Congress is due Jan. 1.

Selected from among more than 200 nominations, the 14 appointed members represent a cross-section of agriculture and transportation interests, many of which have had rivalries and conflicts over public policy.

For example, the panel includes representatives from rail, barge and trucking industries; agricultural producer and trading interests; universities; the Interstate Commerce Commission; and one each chosen by the House and Senate agriculture com-

Bergland said it was "purely coincidental" that panel members geographically are weighted toward the huge Midwest farm production areas and urged members "to bend over backwards" to make sure other parts of the country are included n their deliberations.

It is to be a study of national transportation problems and must not be bogged down in provincial discussion about specific commodities and transportation difficulties, Bergland

Adams, a former member of Congress, as is Bergland, noted that the "very first case" before the Interstate Commerce Com shortage and that the problem some areas now."

has not been solved by the ICC ordering cars from one part of the country to another or by

other tools at its disposal: Another old complaint about abandonment of railroad branch lines also should be avoided as much as possible by the panel, Adams said.

Also, he said, the trucking industry cannot be expected to fill gaps created by declining or inadequate rail service. The rising costs of energy are a major factor, he said.

"Massive bulk shipments such as we are discussing in the agricultural community - ave cannot put them out on the highways," Adams said. "Weare beating our highways to mission in 1888 was the boxcar death with too heavy loads in ,

special remembrances.

Lawrence E. Lamb, M.D.

#### It's a wise man ...

DEAR DR. LAMB - 1 read an article in the paper about two men who were identical twins. One's testicles never developed. He and his wife had no children. The other twin donated one of his testicles for a transplant. My question is if the twin who received the testi-cie transplant should father any children, whose children will they really be?

DEAR READER - I suppose that depends upon what you mean by whose children. Specifically, who be-longs to whom -- if one ever really belongs to anyone

I read several reports about the case you're talking about. In this instance, as you mentioned, the two prothers were identical twins. That makes a difference. Identical twins have exactly the same genes. That's because originally only one egg was fertilized for the twin pregnancy. The

**西里 西里 米原 米市 一原** 

egg then divided in half, after fertilization, to form two identical twins.

When a pregnancy occurs, half the genes come from the mother and half the genes come from the father. Since both identical twins would have the same genes, the father's contribution to such a child would really be identical irrespective of which twin provided the spents

Of course, there's always the matter of chance as to which set of genes comes from the father and which set comes from the mother. That's what causes all the variability. Not all the genes from either the father or mother are used in the formation of the child. The simple truth is that if you were to obtain sperm cells from either man of identical twins and use them for artificial insemination, it really wouldn't make an awful lot of difference, since they both have the same gene pool for

spermi cellis anyway. So, let's assume that the pregnancy results from the transplanted testicle. The sperm cells would be formed from the genes in the transplanted testicle and will carry the genes of the twin who donated the testicle. In this instance, it wouldn't make any difference anyway, because both testicles have the same senetic charselections for both identical twins to begin with.

One of the best donors for any transplaint situation, whether a testicle, kidney or any other organ, is to obtain the donated organ from an identical twin. The exact same genetic characteris-tics of the Amins means that the probability of tissue rejection is minimized or al-

most nonexistent. Of course, if the twins were fraternal twins, meaning two separate eggs to start with, then they would not have the same basic genes originally, and none of what I said above would

You can draw a similar analogy to women who are identical twins. Since they have exactly the same penes, both are capable of producing genetically ex-

actily the same ovum. Theoretically, if identical twin women married identiral tarin men the rhildren from both marriages should be the same as if they all came from one-couple, since all children from both counies could be the result of two identical gene pools.

Incidentally, medical re-

party are that the twin who received the transplanted testicle produces enough sperm cells to become a father, so your hypothetical question may become a real-

the back of a picture frame breaks, take a wire slacks hanger. remove the cardboard hanger tube, push the free ends of the wire up under the edge of the frame at each corner and bend the hook so that it serves as the foot of the easel.-MARIE.

DEAR POLLY--My Pointer is for those women who shave their legs - transfer the shaving cream from one leg to the other as you shave, and thus make a can of the cream go twice as far .- MARIE. POLLY'S NOTE: Now, that is just about as thrifty as one can be.

Send your helpful hints to Polly's Pointers in care of this newspaper.

DEAR POLLY-Recently I bought a set of plastic shelves to hold my plants. They are the kind that stack. I realized that if I turned them over, the shelves would work like trays and there would be no spilling when the plants are watered. The humidity trays required by some plants are really built into these shelves when so used Also. I put a layer of cat litter on the bottom of each shelf This helps the humidity and prevents the pots from scratching the trays -LONDA

DEAR POLLY-Usually the sides of sheets that are worn in the middle will still be good, so I use these strong sides to make bed pillow protectors. Cut to the size of the pillow and sew like a pillowcase. I have also used such strips to make protectors for the tops of heavy quilts. I make them with about nine inches on each side and hand-stitch to the guilt .--ESTHER.

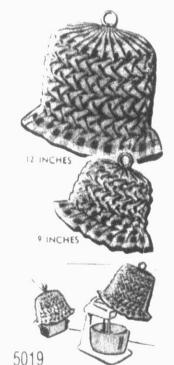

DEAR POLLY-I suggest that those who sew keep an emery board in their sewing boxes When cutting out a garment and a slight burr appears, along the edge, a light touch of the board to the scissors will quickly remove the problem Always stroke toward the edge of the blade --MRS. F.E.F

DEAR POLLY-When I need to warm one serving of meat in a hurry, I wrap it in heavy-duty aluminum foil and put it directly on the burner Warm both sides and do not leave it long.-E.B.

DEAR POLLY-The easiest way ! know to make one's own bread crumbs is to place all old bread on a cookie sheet and put it in the oven with the pilot light on. The bread will dry completely. When dry, put bread in a plastic zip bag and roll it with a rolling pin until it is all crumbled as time as you like.

Smocked Ginghams

Gay gingham is easily smocked to make handsome cover-ups for kitchen accessories - such as the toaster, mixer or teapot! Fun to make, so nice to keep or give. Pattern no 5019 has full directions for making 9 inch and 12 inch

TO ORDER: Send \$1 plus age and handling with name, address, pattern number and size to PATTERNS (name of paper), P.O. Box 4989, Chicago, III. 60680.
