Hereford Yards Involved in Fed Probe

A crackdown on the sale of cattle for slaughter from 30 feedlots was announced Friday by the Food and Drug Administration and the Agriculture department as the result of an investigation by those two agencies that disclosed illegal uses of the alleged cancer-causing drug diethylstilbesterol (DES) to stimulate

the growth of feedlot cattle. Several area feeding firms were involved in an order to delay slaughter of cattle as a result of the investigation.

Among local feedlots involved area Diamond A Ranch and Polan Grain & Cattle of Hereford, Hill Feeders in

Hart and Taylor Feed Yard at Dimmitt.

Also, Coronado Feeders and XIT Feeders of Dalhart, Plainview Feedlots in Plainview, and B&X Cattle Co. of Tahoka.

Although it now primarily involves the 30 feedlots in California, Colorado. Kansas, Nebraska and Texas, a background paper said the problem may be much more widespread.

"Evidence is beginning to accumulate that illegal implants (of DES in cattle) may be in use in Pennsylvania and Ohio. On the basis of present information, 200,000 cattle throughout the nation may ultimately

be involved in the illegal DES operations."

The drug - diethylstilbestrol was used for many years as a feed additive or as implants in an animal which then absorbed it to stimulate growth and thus increase the chance of profit to owners. It was banned in 1979 because of evidence that it causes cancer in animals and humans. Under the ban, all manufacture and shipment of DES was to have ceased last July 13 and all use of DES in

animals was to have ended by Nov. 1. FDA Commissioner Jere Govan and Assistant Agriculture Secretary Carol Tucker Foreman said their order to delay slaughter of the cattle was directed to the 30 feedlots "that we know have implanted cattle with DES."

Two companies, Walco Internaional, Inc. of Porterville, Calif., and Schmidt-Allen of Denver, Colo., are known to have sold DES implants after the FDA ban was imposed last year, officials said. They have agreed to recall existing stocks.

Maxine Farmer, vice president of Schmidt-Allen, said the company was not advised of the July 13 cutoff date. "Our problem is we felt that we got no instructions as to when the cutoff date was," she said. "We thought the user could use it (DES) up to Nov. 1, and thought we could sell it until then."

Comment from Walco International was not immediately available.

The National Cattlemen's Association described the federal government's response as "impractical and cumbersome." The industry group did not condone the illegal use of DES, but it pointed out in a statement that "the number of cattle involved in this incident represents a small proportion of the nation's total annual beef production."

The government said some of the cattle that received illegal implants already had been slaughtered.

Consumers may have been sold some of the contaminated meat, but officials said it posed no immediate health threat.

"The hazard posed by DES in beef is n not from a few exposures, but from continuous exposure over a number of years. FDA and USDA scientists have assured us there is no appreciable health risk to the public from the consumption of beef under this plan," Goyan and Ms. Foreman

Their agencies are requiring the 30 feedlots to have the DES implants surgically removed by or under the (See CATTLE, Page 2)

That feller on Tierra Blanca Creek says one of life's greatest blessings is that we are not compelled to believe everything we are compelled to listen to.

Reporter: "To what do you attribute your success?" Millionaire: "I'm just trying to make an honest living, and there isn't much competition.'

YOU CAN'T BLAME THE INTERNAL Revenue Service for being worried. How would you feel if you had a hundred billion dollars owed to you and it was all coming by mail?

The Census Bureau probably shares the same worry right now. It is hoping to get an accurate court of the population from all citizens mailing in questionnaires. We were lucky to receive the short form. All we had to do was count noses in our house, list birthdates, and answer whether or not our toilet flushes.

It just took me about five minutes, but I understand those who got the long forms needed from one to three hours to fill them out. Maybe this is as good a method as any to take the census, but there should be an easier and least expensive

However, I think the cheese producers have already figured it out. I noticed the other day that Americans consume 3.89 billion pounds of cheese a year, which--they say--averages out to 17.3 pounds per person.

Dividing the total consumed by the average, I compute that there are 224,855,491 people in the United States. That wasn't too difficult with my electric adding machine. Now, if the cheese folks just have their figures right, we don't really need to make that head count!

WE MENTIONED IN THIS COLUMN recently that the Department of Public Safety has started a crackdown on speeders and intends to enforce the 55 mph limit. The primary reason, of course, was because the federal government threatened to withhold highway funds.

We suppose, even though it comes from government statistics, that the speed limit will save a few lives and some gasoline. Even if it does those things, however, we are still observing the speed limit for the wrong reason.

Many of our highways in Texas were constructed for a safe 70 mph speed limit, and those limits were set by the state. But our federal government, at the urging of some Easterners who have highways that are unsafe t 55, use our own funds to hold over our heads.

What realy bothers us is that we've become puppets on a string since the day we turned the purse strings over to the federal government. They exercise more and more control over our schools, our cities, our hospitals, and our highways.

Maybe we do need to drive 55 if it will save lives and fuel, but the folks in Austin can decide this and a whole lot of other matters. We sometimes question their wisdom, but we have more faith in them than we do the ones in Washington.

President, Reagan Louisiana Choices

NEW ORLEANS (AP) - President Carter and Ronald Reagan looked to the South Saturday to pad their widening leads in the 1980 White House sweepstakes as Louisiana held its first presidential primary.

With matching winning streaks in the first round of Southern primaries last month in Alabama, Florida and Georgia, Carter and Reagan were seen as the heavy favorites in a state where little campaigning took place.

Fifty-one delegates were at stake in the Democratic primary while the Republicans were competing for 31 delegates.

Louisiana Secretary of State Jim Brown predicted that just 25 percent to 30 percent of the state's 2 million registered voters would cast ballots. It was a closed primary, meaning no crossover voting by Democrats and Republicans at the polls, which opened at 6 a.m. CST and close at 8 p.m.

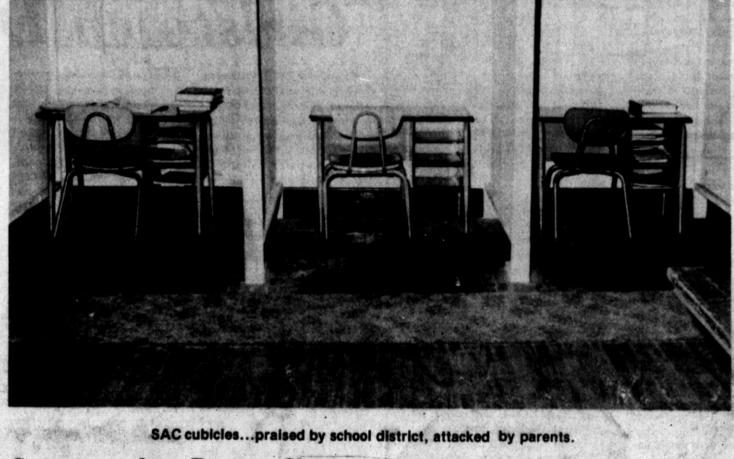

On the GOP side, it was essentially a one-on-one contest between Reagan and former U.N. Ambassador George Bush. Rep. John Anderson, who has benefitted from crossover votes in some states, wasn't on the ballot.

Bush said Louisiana is "considered solid for Reagan, and it probably is. I know it is tough, I know Reagan is strong. I don't have high expectations about this."

John Treen, Bush's state campaign coordinator, said he would be satisfied if the former CIA director managed to win 30 percent of the statewide vote.

While Reagan and Bush made brief campaign forays into (See PRIMARY, Page 2)

now," Clements said. A coalition of social activists said earlier in the week that a million Texans

officials praise the program

as an effective alternative to

suspension from classes.

Students, who normally

would have to make up

missed work to avoid failing

courses, are required to

study in three-sided cubicles

"We've put kids in there for the remainder of a quarter. But, those kids would have been suspended for the remainder of the quarter," Superintendent Harrell Holder said.

Good behavior in SAC may cut down on the length of time a student must remain in the class. However, rules are stringent and closely supervised by Williams, according to Holder.

Students must remain in their seats until permission is granted to move. No talking is permitted, and students' are provided a single restroom break during their 8

a.m. to 5 p.m. stay. Before a student is admitted into SAC, Williams meets with the youngster's teachers to receive his lessons for a particular week. Students are required to do classwork, homework and examinations during the daily five-hour routine.

Extra days may be added to a student's length of stay or he may be suspended for violating SAC rules.

The idea is not new in educational circles, according to Holder, who helped institute SAC locally two (See SAC, Page 2)

"Since early March, some Department. They have got a (See MORTGAGES, Page 2) (See CLAYTON, Page 2) Half of Census Forms Returned

WASHINGTON (AP) -More than half of all Americans already have returned their census forms.

Tuesday was Census Day and Director Vincent Barabba of the Census Bureau reports that as of 4:30 p.m. Thursday, 53.4 percent of the households in the country had returned their forms.

Holding the first in a planned series of regular census updates on Friday, Barabba conceded there are still some problems recruiting sufficient staff, but he expressed confidence in the overall head count.

Although figures were not immediately available for all parts of the country, Barabba cited Cedar Rapids, Iowa, in particular for cooperating with the progam. In that community, the bureau has already had 94.3 percent of the forms returned.

Other communities with high early return rates included Green Bay, Wis., 92.5 percent; Poughkeepsie,

N.Y., 92.2 percent and Tulsa,

Okla., 87.3 percent. In the giant New York City region, officials said, the return rate is currently 35.5 percent with 1,887,000 forms returned so far, although there have been some areas with notably low responses. One Queens office has had only 2 percent of the forms returned so far, he said.

Barabba said part of the problem is the New York transit strike. He estimated that as many as 750,000 forms may still be in the hands of postal officials.

Iranian President Calls For Ouster of Sadat

By The Associated Press

Iran's president Saturday called on the Egyptian people to overthrow President Anwar Sadat and press for the extradition of the deposed shah, as the powerful Islamic Republican Party demanded the American hostages remain in the hands of the militants at the U.S. Embassy in Tehran.

Meanwhile, three American clergymen sympathetic to the Iranian revolution were en route to Tehran to hold Easter services for the 50 embassy hostages and try to help

"bring about reconciliation between America and Iran."

It was the first time President Abolhassan Bani-Sadr had called for the ouster of Sadat. "We hope this uprising will continue until the toppling of the regime which serves the interests of the enemies of Islam," he said in a statement carried by the official Pars news agency.

Sadat's decision to grant the deposed ruler permanent sanctuary in Egypt last month raised a storm of protest among Iranians demanding his return to Iran to stand trial on charges of murder and corruption. The party is believed to

have a majority on the 13member Revolutionary Council, which on Thursday night delayed Iranian President Abolhassan Bani-Sadr's proposal to ask the Islamic militants to turn over the hostages to the government.

Bani-Sadr said in a speech Tuesday he would ask the council to take custody of the hostages if President Carter pledged to issue no further 'propoganda''

"provocations."

Colombian Guerrillas Free More Hostages

BOGOTA. Colombia (AP) - Leftist guerrillas, fulfilling a Holy Week pledge, freed two more non-diplomats from the occupied Dominican Republic Embassy on Good Friday, but there was no sign of a quick release for the 19 diplomats, including U.S. Ambassador Diego Asencio, now in their 39th day of captivity.

William Barquero Montiel, a former Nicaraguan ambassador to Colombia. and Manuel Lozano, a Spanish businessmen who sold liquor and other supplies to a number of embassies here, walked briskly from the occupied embassy and dodged reporters, blocked behind police lines. The two men had been held since Feb. 27 when the leftists stormed the embassy during a diplomatic reception

The guerrillas, members of Movement-19, now have released six hostages since Holy Week began on Palm Sunday. They have promised to free their last remaining non-diplomatic captives, three Colombians and a Dominican, by Easter.

JERUSALEM (AP) - Thousands of Christians, many of them shouldering heavy wooden crosses, moved in solemn procession up the Via Dolorosa to Calvary this Good Friday to commemorate Christ's Passion.

Pilgrims of Roman Catholic, Greek Orthodox and other Eastern faiths jostled around the sites revered by Christendom as the scenes of the Crucifixion and Resurrection. By an unusual conjunction of the Gregorian and Julian calendars Holy Week for the major Christian faiths coincided this year, along with the seven-day Jewish holiday of Passover.

Israeli officials said 30,000 people came to the Holy Land on organized pilgrimages and were among a record 95,000 Christians and Jews here for the holiday season.

Catholic pilgrims marched in warm spring sunshine through the narrow Street of Sorrows from Praetorium, where Jesus was sentenced to the Crusader-built Church of the Holy Sepulcher, stopping for devotions at the 14 Stations of the Cross.

Volcano Baffles

Washington Scientists

VANCOUVER, Wash. (AP) - After four ominous tremors in 16 hours led scientists to forecast a major eruption of lava, enigmatic Mount St. Helens

belched nothing much hotter than ice. The latest developments Friday left observers of the 9,677-foot volcano in southwest Washington scratching their heads.

"Every time we turn around, this lady fools us another way." said Steve Malone, a seismologist at the University of Washington. "We don't know what to expect now.

The mountain began erupting March 27 after a week of intense earthquake activity. Periodic blasts continued Friday with ash and steam reaching an altitude of 13,500 feet as

the mountain spewed wisps of steam all day, said U.S. Forest Service spokeswoman Lynn Robertson.

The mountain's crater has been slowly growing larger as pieces of the 100-foot-thick glacier at the summit fall in and are ejected in desk-sized chunks, said Tom Sayre of the Forest Service.

Singer Sovine

Dies in Car Wreck

NASHVILLE, Tenn. (Ap) - Country music entertainer Red Sovine, best known for his truck driving songs and heart-tugging recitations, is dead from injuries received in a traffic accident. He was 61.

A van driven by Sovine ran a red light and collided with a car Friday in a residential section of Nashville, said patrolman William Bay of the Metro Police Department.

He died shortly before noon at the St. Thomas Hospital emergency room. The driver of the car was slightly injured.

St. Thomas spokesman Lamar Jackson said a prelimary autopsy showed Sovine died of internal injuries - abdominal bleeding related to a cut spleen and liver along with broken ribs and breatbone.

A former partner, singer Webb Pierce, said of Sovine, "He was quiet when he wanted to be and funny when he wanted to be. He was great to work with, probably the best front man I ever had."

from page I

Louisiana this week, Carter and Sen. Edward M. Kennedy made none in their bids for Democratic votes.

Carter stuck to his policy of refusing to campaign actively outside Washington, sending his wife, Rosalynn, and campaign chairman Robert Strauss to seek votes in his behalf.

Friday, Mrs. Carter said her husband should be re-elected because "we need continuity in our programs. We need time for them to work. We need Jimmy Carter in the White House for four more years."

She defended the president's refusal to hit the campaign stump and gauged her words carefully, saying with a laugh: "I wrote all this down because I am afraid I will say something that will irritate the ayatollah."

Kennedy also sent surrogates - his children - as he concentrated on Pennsylvania, where the next large bloc of eastern, industrial-state delegates will be chosen April 22.

The only Democratic candidates to campaign personally were former Mississippi Gov. Cliff Finch, Cleveland attorney Richard Kay and Bob Maddox of Hollywood, Fla.

Also listed on the Democratic ballot were California Gov. Edmund G. Brown Jr. and Don Reaux of Freeport, Texas. Brown pulled out of the race following his Wisconsin loss, but the deadline for withdrawal from the Louisiana ballot had

Working parents whose

sufficiency," said Chapman

train for a skill.

The revised federal guidelines require more day care workers per child, raising the ratio from one adult per four children to one for every three children.

The centers will have to provide breakfast for the children if requested by the parents. Health assessments and immunizations are also

required. The present average daily cost per child under two years old is \$12.42. Under the new rules, the cost will go to \$18.53 per child, according to TDHR.

"I think it is absolutely incredible that the secretary of HEW signed these regulations right after Congress found out it had overspent its budget ceiling by \$10 billion, and right before the President made his announcements that this country is in a financial crisis," Chapman said.

"This is particularly damaging to people who want to be in the work force, off welfare, and enjoy the satisfaction of paying their own way," Chapman said.

WTSU Builds Solar Panels

WTSU - Higher air temperatures than what was expected are coming from the 1,200 aluminum-can solar

Students Honored

COLLEGE STATION -Anthony A. Albracht and Robert B. Hicks, both of Hereford, have earned "Distinguished Student" ranking at Texas A&M University.

The undergraduate honor is awarded to students who excel academically at Texas A&M, the state's land-grant and sea-grant institution responsible for providing not only excellence in academic programs but extension and research in agriculture, engineering and other practical needs throughout the

Recipients of the Distinguished Student honor must earn at least a 3.25 grade point ratio, out of a possible 4.0, during the most recent grading period.

Albracht is a senior chemistry major and Hicks, also a senior, is majoring in animal science.

Temperatures coming from the three-panel solar chamber are "much higher than what we expected," said Dr. Ronald McBride, assistant professor of industrial educa-

"On one day, the air going into the panels was 60 degrees and the air going into the room was 168 degrees, a difference of 108

panels at the industrial

education building at West

Texas State University.

degrees. We get these high temperature readings between 10 and 12 a.m."

The solar panels were built as an experimental project by the students of the basic power technology class. They used about 1,200 aluminum cans-the majority of which were beer cans.

"The input of the hot air doesn't affect the temperature of the room as a whole," said McBride.

McBride plans to rework

the duct work and increase the size of the ducts to increase the volume of air.

"Right now the air flow is restricted and when we enlarge the ducts, the temperature should drop some," he explained.

"We have had a small problem with degassing. Inside the panels the temperature sometimes gets up to 300 degrees and either the paint or caulk or some other material reacts to the

heat and a sort of fog forms on the inside of the glass. This fog creates a block against the sun's ray and cuts down on the effectiveness of the panels."

McBride said that a storage capacity such as water or rocks may be added which will retain heat and release it at night. They also may put the panels on the roof where they may be in the sun's light more each

Inspecting Panels

WTSU - Teresa House, West Texas State University employee, inspects the three solar panels outside the industrial education building at WTSU. Air flows through the panels in a serpentine fashion and warms as it moves over the 1,200 aluminum cans in the panels. The air then exits into one of the class rooms at an average of 160 degrees. 'Death Angel' Pleads Innocent

LAS VEGAS, Nev. (AP) — vestigating reports a ani Adams, an intensive "Death's Angel" was Jani Adams, an intensive care nurse accused of tampering with the lifesupport gear of a terminally ill patient who later died, pleaded innocent Friday to a charge of murder. She was ordered to stand trial beginning June 23.

Miss Adams, who has been suspended from her job at Sunrise Hospital near the Las Vegas Strip, appeared nervous as she entered her plea in Clark County District Court before Judge Michael Wendell.

The 32-year-old nurse had been indicted Wednesday by a grand jury that was inresponsible for the deaths of one or more patients at the hospital. She is free on \$15,000 bail.

Attorney Gary Logan, who described his client as "totally distraught," filed no motions to delay the proceedings. He said he did not want her "sitting around for six to nine months with this Sword of Damocles over her head."

Logan and fellow defense lawyer Melvin Belli claim the indictment is based on skimpy evidence and say comments by "some loose-

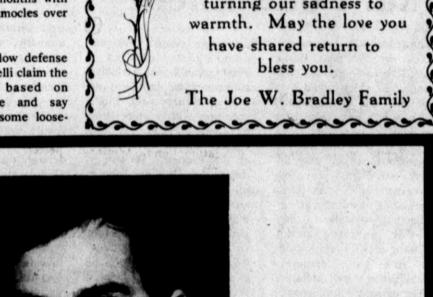

lipped nurses who took things utterly out of context" led to the charge.

lawyer, said he will use the case to test the constitutionality of the grand jury system. Belli, the noted trial

Power Media

By LOUIS B. STRONG Kentucky Assn. of Electric Co-Ops

Much of the information on which the public forms opinions and renders judgments comes to them through the news media. So, the news media has a special responsibility and obligation to educate through responsible reporting.

When the news media is not objective, gets issues out of proportion or omits facts, it becomes very difficult for political bodies to make sound

policy.

The news media has a natural and legitimate objective to gain readers or listeners in order to improve profitability. They have to try to blend this with the objective to inform and educate. Real world facts and information are often dull and uninteresting. The public is attracted to the sensational.

I don't know the answers, but if we fail--at this critical time in our nation's history-to give the public the facts on which to make sound judgments, we will make it difficult if not impossible for our political processes to work and lead us to the right choices.

Many persons and groups have come to realize they can make names for themselves through scare stories, particularly on things the public has difficulty in understanding or judging.

Often, it seems, neither the public nor the news media makes a judgment as to a person's credentials, knowledge or experience in posing as an expert or a critic on any particular subject. CBS's 60 Minutes program made it possible for a person who got his job based on false credentials to get on national television, gain wide publicity by accusing the company that fired him of following unsafe and wasteful construction practices in building a nuclear plant.

A disgruntled employee of a regulatory commission or administration agency can get wide media coverage by accusing the agency or commission for which they work of following unsafe or negligent actions no matter how riduculous, how unfounded or how little credibility

They will get media coverage and are likely to be asked to appear on numerous talk shows. Seldom do you see equal opportunity or time given for the hundreds or even thousands of qualified and able engineers and scientists on the other

A scare story concerning a swarm of killer bees or some unearthly creature can be entertaining to some and does no harm. But a movie like the "China Syndrome" can present a completely unrealistic image of nuclear power and can do much to influence public policy. In the process, of course, the movie makes big money and wins numerous awards. A movie or media story depicting nuclear power in an objective and factual situation would be dull and uninteresting.

Embargo Look

WASHINGTON - Congress has declared that a sound agricultural sector requires a minimization of restrictions on exports of agricultural commodities and products. However, it has cited three situations in which export controls on commodities can be applied: Reasons of national security. foreign policy and short

Responding to the Soviet invasion of Afghanistan and citing reasons of national security of foreign policy. President Carter directed on January 4, 1980, that United States shipment of wheat and corn to the Soviet Union be limited to eight million tons during the 12-month period ending September 30, 1980, The President also directed that exports of other agricultural commodities to the Soviet Union be suspend-

What has been the impact of his decision? Let me share some information with you provided to me by Clarence Palmby, former assistant secretary agriculture for international affairs under President Nixon, and currently vice president of public affairs for the Continental Grain Company.

I should note that under the terms of a five-year bilateral agreement between the United States and the USSR, we are committed to ship eight million tons of wheat and corn to the Soviets each year. Additional amonts can be shipped after consultations between the two governments. As of January 4, the date of the President's announcement. about five million tons had been shipped, and we had authorized the Soviets to purchase up to 25 million ions of corn and wheat for hipment during the current

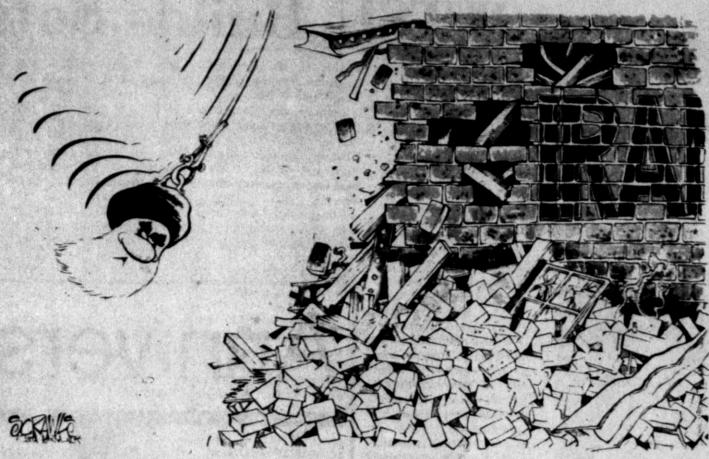

That said, let's look at the

effectiveness of the embargo. First, no other grain exporting country has agreed to embargo grain exports to the Soviet Union. Some major exporting nations have agreed to not increase their exports to that destination. Other major exporting countries have announced that price will determine the destination of their grain and oilseed exports. Second, according to

official and private estimates. the Soviets will import from other origins about 50 percent of the grain not allowed to be shipped from the United States. This availability of other grain will coincide with their shortrun seasonal requirements, and will go far in filling the gap prior to their own new crop harvest. Also the United States will increase its exports of grain to other destinations, and it will be difficult to prevent those countries from then shipping our grain to the Soviets.

Third. the Soviets will likely increase their importation of soybean meal and soybeans as a supplement to grain for livestock rations, thereby improving feeding efficiencies for their livestock and further minimizing the impact of the embargo.

One way to verify these developments is to monitor prices. For example, following the President's decision to embargo exports. a two-tier world market price has developed for corn: One. the United States price which has traditionally been the world price; and two, a higher price for corn of other origins eligible for destination to the soviet Union. This means that an additional volume of world grain is now being traded in the world market isolated from the United States price system, which has traditionally functioned as a global system.

'People Supply' Starting To Run Wild

Carefully, the Federal Reserve calculates our nation's monetary policy in an effort to centrol the inflation

Hourly, economists recalculate the prime lending rate and other controllable factors in an effort to maintain the precarious balance between economic uppers and down-

Yet as meticulously as we try to manage our nation's money supply we are allowing our nation's "people supply" to run wild.

Whereas other nations have learned to control their populations with punitive taxes for large families. we use tax dollars to encourage large families for those who can least afford them.

While other nations are limiting immigration, we are opening our doors wider.

Indeed, such is the avalanche of illegal immigrants now flooding our cities that it appears our nation has no doors at all.

Labor Secretary Marshall alculates that our unemployment rate would be reduced to less than four percent except for illegal immigrants already in our

What alerted the secretary was the recommendation by a Harvard professor that we should open our doors to all who want to come here; that immigrants take jobs Americans would not accept anyway; that the influx is good for us.'

On the contrary. Secretary Marshall says, they are siphoning off jobs which homegrown American workers need. And worse, he says, the presence of an ever-increasing number of illegal immigrants in the United States "is sowing the seeds of a bitter civil rights struggle."

The limitless influx can become a "Trojan Horse." ecretary Marshall re-

How To Balance

members that history provides endless examples of "a foreign population becoming an easy focal point for all kinds of social and economic discontent."

We've got to find a solution, says Marshall, before the problem reaches crisis proportions."

Marshall says, "We have come too far in this century to turn back the clock. Long ago we decided to improve the working conditions and pay for all workers. We enacted standards for emplovees and we must enforce

Immediately, while the problem is studied. Marshall says we should issue noncounterfeitable Social Security credentials to all workers changing jobs -- and to all newly hired employees -- and penalize any employer who hires undocumented workers.

Most immigrants come to the United States from Mexico. Turkey. Italy. Greece, Yugoslavia, Algeria and Pakistan.

Significantly, those are the countries which have most

mismanaged their own economic planning and population policy.

Population pressure is everywhere on the sunset side of the world. Refugees from Afghanistan are fleeing across the border into Pakistan at the rate of a thousand a day in a line 500,000 long!

The United States, for all its melting pot tradition. cannot afford to recover all the world's fumbles without creating chaos in our own country.

Richard Lesher

End Capital Punishment

WASHINGTON -- When I recently appeared before the House Committee on the Budget to testify on the Administration's proposed fiscal 1981 budget. I looked distinguished at those legislators and said:

"If physicians went on strike and refused to heal the sick, allowing thousands to die from simple illness, there would be massive rebellion. Well, members of the Committee. I respectfully suggest to you that a massive rebellion is already underway and growing daily -- a rebellion against runaway bureaucracy, spending, inflation and taxes. Millions of Americans are appalled that Washington will not provide the leadership and the medicine that is needed. in spite of the fact that many of the answers are so ob vious."

If my message seemed blunt; even alarming, it was meant to be. I am convinced we are now in the most critical economic, financial emergency this nation has faced since the Great Depression. Failure to take

minds at the last minute.

Meanwhile, I have decided

comprehensive, corrective action in the near future could bring about consequences which would rival the 1930's in lost jobs and economic hardship for millions of Americans.

Quite frankly, time has run out. There are no easy an-«swers left. For 35 years, our government has been wandering through an intellectual wasteland, mindlessly pursuing pumppriming policies while trying to fire tune economic stabilization and inflation. The current Administration has championed these ruinous ideas with such a

vengeance that the nation now faces a truly awful predicament -- soaring levels of inflation, taxation and regulation actually occurring in tandem with plunging rates of savings, investment and productivity. Small wonder that a growing consensus led by the Joint Economic Committee. business, the academic community, the world financial community and even certain members of the press, believes these demand-oriented policies should be relegated to the scrap heap.

We need an immediate. sharp change to signal the world our government can and will reduce inflation, reduce tax and regulatory impediments on business, restore rapid growth in productivity and create a business environment in which market incentives to work, save and invest will be

restored. The U.S. Chamber specifically proposes to: Reject all controls on wages, prices and credit; cut federal spending in fiscal 1981 to 21 percent of GNP; enact a spending limitation to cut spending even further in future years; cut federal taxes by \$25 billion in 1980 by cutting corporate rates, reducing the tax bias against capital formation, and reducing the tax bias against individual savers and investors; limit personal and corporate tax rates still further infuture years; place an immediate freeze on federal hiring retroactive to March 1, 1980; freeze regulatory budgets; freeze new regulations except those deemed absolutely necessary under the law, and move toward a balanced budget over the course of the

Yours faithfully. business cycle. Our prop als are based upon one simple, but undeniable reality: Washington's near exclusive preference for pumping up the economy with more spending, with more demand for goods and services, has severely impaired the ability of the economy to supply them. Thus, it is not enough to merely discourage consumption and deficits; we must also stimulate supply and productionby reducing tax and regulatory burdens. The Administration is to be congratulated for its belated recognition that spending must be cut. Unfortunately, it still has no understanding of "supply-side" economics; it remains wedded to the oldfashioned belief that tax cuts are inflationary and increase the deficit.

But not all tax cuts are created equal. A supply-side tax rate cut that fewards additional production relative to additional leisure, and that rewards additional saving relative to additional consumption will increase productivity, which in turn, will help lower prices. What's more, history clearly shows that such supply-side tax rate reductions have stimulated production to the point of generating greater than expected tax revenues, thereby decreasing projected

Finally, it is time the Administration squared with the American people and informed them of the staggering tax increases it planned. As Congressman Jack Kemp has observed: "...when tax rates are not cut, they rise. Our outdated tax code was designed for an economy without inflation. While devaluing the dollar over the past 12 years, our government has also shoved individuals into ever higher tax brackets, overstated taxable profits by about half and taxed phantom capital gains. On top of that, Congress has already enacted 10 more years of payroll tax increases and is about to pass a huge new excise tax on oil..." How will such enormous transfers and probable waste of the nation's precious capital translate into an effective anti-inflation program?

To date, the Administration has refused to treat inflation with supply-side cures. Thus, one regrettably concludes that after all has been said and done, much more has been said than done.

Doug Manning

Penultimate Word

THE RAPTURE

Tuesday was the pits.

It was April 1 and some preacher had predicted that day to be the day of the rapture. For those who might not be theological, the rapture is the day the theoretical good guys get called out of the world.

So what do you do on the rapture day? Wait around and see if you get taken? Plan how you could disappear if you are not taken so everyone will think you were?

It presents a real dilemma. Should you be super good so you will be taken or since this is it should

you sneak in a little last minute sin? If I knew it was going to happen, I would go borrow all the money in the world and go out as a

The day presents other dilemmas:

If you are going to fly do you insist on a non-Christian pilot?

If you are traveling by car, do you insist on driving no matter whose car it is?

If you are having surgery, do you force the surgeon to take vows of atheism?

I do not mean to be blasphemous. I do not know what is going to happen at the end. I do know that no one knows when, nor how He is going to come. I take it that He wanted it left that way so we would go on with the business of living.

My attitude may be too flippant, but I wonder if some folks don't cheapen the event by their efforts

to make it serious.

I was speaking at a retreat for the young people of one of the big TV churches. In the process I found out this group owed nine million dollars to the Teamsters Union. They were expanding every year and growing deeper in debt.

I ask them how they ever intended to pay the debt. Their response was, "We think the Second Coming is going to happen and we will beat them out of it."

I'll bet Tuesday was the pits at their place...

Warm fuzzies. Doug Manning

Thumbing Back

50 YEARS AGO

A well-balanced wardrobe for women upon limited expenditures, in three groups of \$50, \$75 and \$100 budgets annually, was discussed by A&M College, inspector for clothing demonstrators, at the Chamber of Commerce luncheon in the annex of the Stockman's Cafe. There were 55 members present.

The third snowstorm and blizzard of low temperature of the month, which drove across the prairies was less severe than. its predecessors, but it added much to the moisture and brought the total precipitation of March to one inch, which is slightly higher than the .85 average over the past 22 years. according to records kept by E.E. Ramsey.

25 YEARS AGO Legionnaires of the 18th District passed resolutions at their convention held here over the weekend asking that the Amarillo Veterans Hospital be kept open and calling for an investigation of the Lubbock VA office in regard to discontinuing service connections that have been recognized

as such for 10 years or longer. Paint remover and bandages for mashed thumbs were probably not figured into the intital cost when road signs were erected in several of the surrounding communities to enable residents to be located more easily. However such markers have been a real advantage in many instances to people not familiar with the community.

10 YEARS AGO

The Hereford area, once pointed to with an accusing finger for its water pollution problems, is now looked upon by other Panhandle cities as a good example, mostly due to efforts by local feedyard, slaughterhouse and vegetable shed owners. 'The Hereford area is, in my opinion, in the best position from the standpoint of pollution than it has ever been in the past," says hydrologist with the district water Quality Board

A group of Fort Worth people spent less than 24 hours in Hereford recently and came away completely sold on the town and the enthusiastic community. The major group for the Hereford trip departed on a late afternoon flight from Dallas...with the exception of six of the party who were bumped off the world's largest unscheduled airline due to an

A professor at Perkins School of Theology here has called the crucial question of the 1970 General Conference of the United Methodist Church as "the quality of imagination that we are able to bring to bear on the elimination of white

1 YEAR AGO

Hereford City commissioners approved the tying of the city sewage lines to those of the San Jose Fresh Water Supply District, subject to an agreement on formal resolutions prepared by the two governmental entities. The tentative approval was requested by the regular city commission meeting by the water district in order that a grant application to HUD (Housing and Urban Development) would receive favorable consideration.

chap had been weeping.

Late in the afternoon of the first Easter day, two disciples left Jerusalem and headed toward their homes. They lived in a little town called Emmaus, seven or eight miles away.

They walked in stunned silence.

They were very tired and very grieved and they were afraid.

One of these disciples was named Cleopas.

I don't know the name of the other one. They were not promment in Christ's work. But they were earnest

believers. And now their Friend and Leader had been crucified. The One they had hoped would redeem Israel was dead.

They walked on into the lengthening shadows of the waning day.

As they walked, one of them mentioned the events of the morning ... the removal of the body from the tomb; what the women had said.

Interesting. When the angel had wanted to spread the word fast, he's told the women first.

Suddenly, on the dusty road to Emmaus, a stranger drew near and walked alongside them.

The Stranger asked them what they were talking about. And the two disciples retold what had happened; that this morning the tomb had been found empty.

And the Stranger chided them. He said if you really believe everything the prophets have said, then the Carpenter from Nazareth has done what he was supposed to do. There was nothing to be so sad about.

If they really believed. When they finally got the Emmaus it was almost dark. The grief-stricken disciples

with them. And he did.

District Highway **Engineer Honored**

AMARILLO - A.L. Mc-Kee, Amarillo district engineer of the State Department of Highways and Public Transportation since November, 1973, has completed 30 years of service with the state

He was recently presented with a service pin and certificate and a congratulatory note signed by Amarillo District office employees.

McKee, supervises planning, design, construction, maintenance and operation of highways and highway structures and directs state public transportation planning in a 17-county area of the Texas Panhandle. Deaf Smith County is in his jurisdiction.

The district's 466 employees work on an area network of 3,700 miles of paved highways of all types. including interstate, U.S., state and farm and ranch to market roads.

A native of Faxton, Okla., McKee moved his family to invited the stranger to eat the Abilene area when he was 4. He graduated from Wiley High School in

He then served in a U.S.

Navy- construction battalion in the South Pacific during World War II. At the time of his discharge, he was in a Naval Reserve Officers Training Program at the University of Texas in Austin where he earned his civil engineering degree in 1950.

McKee joined the State Department of Highways and Public Transportation after completing college. His first assignment was that of junior inspector in the Abilene district.

He advanced through increasingly difficult and responsible assignments and was serving as acting district construction engineer at Abilene when he was appointed district engineer in Amarillo. He has served as resident engineer and main-

He also has served on many research committees dealing with the maintenance and construction of highways and is currently serving on the Pavement Design Committee. He is a member of the American Association of State Highway and Transpor-

tenance engineer.

Report Due On Fatal Ship Collision

TAMPA, Fla. (AP) - A Marine Board of Inquiry will be able to pinpoint what caused the fatal collision of the Coast Guard cutter Blackthorn and the tanker Capricorn in a report to be forwarded to Washington by May 1. Rear Admiral Norman Venzke said Friday.

But Venzke said he had no idea when that report will be made public.

"We will come out with a cause, no doubt about it," he said during a press briefing.

Venzke also said he is confident the board will be able to determine, within a tight perimeter, the location of the Jan. 28 crash which sank the cutter and killed 23 Coast Guardsmen of the 50member crew.

For nearly two months now the board, a joint panel of Coast Guard and National Transportation Safety Board members, has been investigating the accident in the shipping channel of Tampa Bay.

The cutter, based in Galveston, Texas, was outbound, while the oil tanker - three times the size of the Blackthorn, was coming into port. No one on the tanker was injured.

Venzke, who is heading the inquiry, said the panel will begin taking final testimony on April 10, after nearly a three-week recess. He has set aside two days for five remaining witnesses, but noted the sessions would continue if necessary to finish that phase of the probe.

To be called are experts on stability and impact, a materials specialist to identify parts of the buoy tender salvaged from the bottom of the channel, a course recorder summoned by tanker attorneys and a diver who has been retrieving debris.

The admiral said he is certain the report will be finished no later than May 1. During the recess board members have been sifting through hundreds of pages of testimony and evidence and working on a draft of their findings.

The report will be sent to Washington for the Coast Guard commandant's staff to review.

Venzke said the board of inquiry will define the one thing that actually caused the accident, contributing causes, conclusions and recommendations. But it will not weigh the findings to pinpoint blame, he said.

Defining location of the wreck site has been a big factor in the investigation.

"I am perfectly confident we will come up with a location," said Venzke. "This is the big question location. We're not going to say "X" marks the spot. But we will be able to narrow the location, pretty tight in my opinion. This was an important ingredient we didn't

Asked for a cost estimate on the inquiry, Venzke put it at about \$1.5 million.

The board's duty is primarily fact finding - to determine what caused the crash and suggest measures

to prevent a recurrence. If there is any evidence of wrongdoing or violation of law uncovered, he said, that information would be passed along to Coast Guard officials

HHS Girls Tracksters Garner 3rd In Meet

By MAURI MONTGOMERY

Brand Sports Editor BORGER (Special)--All the stage hands quietened. SCENE TWO! TAKE SEV-EN! "The Perils of the Hereford Varsity Girls Track Team In Their Bid for the Top! "Alright girls we've got the distance sequence down now, so let's see if we can shoot a good field event piece," said head director Martha Emerson. "Roll it!" CUT. CUT. CUT. CUT!

That's how the set must have looked as Emerson watched her thin clad squad

B&B RECREATION 128 LAWTON NOW OPEN Wednesday, Thursday, Friday, Saturday & Sunday from 5 p.m. to 12 Recreational Center-all kind of games, etc...

garner a third place berth behind Amarillo High and Amarillo Palo Duro in the Borger Girls Track Meet Friday.

And a lack of field event points, as in the past, was the culprit blocking the Herd's way into the winners circle. after the harried squad only managed to accumulate a fourth place in the high jump and a sixth place berth in the triple jump at the conclusion of the day's festivities.

"There's no doubt about it, the field event competition is still hurting our performance and keeping us from winning some of these said Emerson. meets." "It's not any one person's fault," she said. "The girls we have competing do very well for the amount of time

"We just don't have the

they've been at it.

attack that we do in the distance events and we need that depth.'

HHS trackster Deborah Rodgers grasped a fourth place tie in the high jump event along with Amarillo High's Kim Bridges as both leaped to a height of 4-10 behind Borger jumper B.B. Hale who took first with 5-5.

Theresa Schilling landed a sixth place niche in the triple jump with a distance of 32-4 after Plainview's powerhouse Theola Freeman swept the competition with a jump of 36-6 (her first attempt of the year in that event).

But, the distance portion of the meet for the Whiteface track crew was slightly contrary to the team's performance in the field event struggle.

The highly touted HHS mile relay team composed of Darlene Sanders, Lindy

gers and Louise Mays lambasted other 1600 meter relay squads after they tacked on a first place finish in the event with a time of 4:09.5--closest opponent was

Sports

The Hereford Brand-Page 6A Sunday, April 6, 1980

Borger's crew which came in five seconds behind the HHS squad with a second place finishing time of 4:14.6.

Sanders added up a few more high place finishes to her mark in addition to their s'int in the mile relay.

The harrier grabbed two second place berths for the meet as she clocked a 25.6 in the 220 following Theola Freeman's first in the race Freeman once again in the 100 after netting a time of 12.6.

Another high finisher in the day's competition was Louise Mays, as she cinched a second in the 440 after running a 60.4 behind Borger's Zenobia Haynes' 59.9 winning time.

The HHS 440 relay team clinched third in the 440 relay event with a 51.2. Palo Duro won the race at 49.9 and was followed by Amarillo High's time of 51.1 as second place finisher.

Other places in the meet for the Herd included Beatrice Moreno sixth in the mile run with a 6:09.1 while Lori Albracht slipped into the sixth spot of the 220 as she clocked a 27.3.

The next scheduled competion for the Whiteface girl team is slated as the District 4-AAAA meet in Lubbock Saturday, April 12.

The squad netted first in the competition a year ago and qualified several harriers as participants in regional competition.

Whiteface Boy Harriers Land 6th Place Berth In Relays

DUMAS (Special) -- The Hereford varsity boys track team found the going a little rough after they ventured into competition at the North Plains Relays at Dumas Friday and placed sixth in the team standings with 42 total points.

Canyon swept the meet with 125 team points while Plainview grasped 80. Tascosa took 78, Liberal netted 71. and Caprock landed the fifth place berth after adding up 49 for the meet.

Even though the Whitefaces accumulated high finishes in the 440 meter and 440 relay competition, the highlight--if not the most spectacular event cinched for the Herd came as Felix Soliz continued to out-distance other competitors in the 800 meter dash after he clocked a winning time of 1:59.8 in the

Tom Grimmer of Borger followed the HHS harrier in with a 2:01.2 and Liberal's Mark Farmer netted the third place niche after running a 2:01.3 in the event. Norman Brown placed

second in the 440 dash with a 5003 behind Liberal trackster

Oscar Husky who grasped the winner's spot of the event with 50.3, and the 440 relay Hubert D's 364-0937

To Win Relay

AUSTIN (Special)--Former Hereford track standout James Mays took a 20 yard deficit in the last leg of the 3,200 meter relay and turned into a win in the event for the Texas Tech thinclads Friday

during the Texas Relays.

Mays, who turned in sizzling 1:48.2 800 meter-leg, caught the leader about .100 yards from the finish and then sprinted in for a hair-length victory for the Raiders. Tech's time in the two-mile was 7:23.9--only two seconds off the Texas Relays record set by the Raiders last year.

Mays ran on that last year's record setting 3,200

landed in fifth place behind Liberal, Plainview, Tascosa and Caprock after pacing out a 3:29.6 in that competition and Wayne High took sixth in the 120 high hurdles event with a time of 15.2.

The HHS mile relay team

Cougar Jumper Breaks Record

By DENNE H. FREEMAN AP Sports Writer

AUSTIN, Texas (AP) -Carl Lewis likes the long jump pit at the University of Texas mainly because he doesn't have to dodge javelins while he performs.

The world-class long jumper from the University of Houston, only a freshman, smashed a 22-year-old Texas Relays record Friday night with an extraordinary long jump of 26-61/2.

It broke the old record of 26-31/2, set by Ernie Shelby of Kansas, but the effort wasn't Lewis' career best.

Lewis, of Willingboro, N.J., the NCAA indoor champion, soared 26-8 at the 1979 Pan American Games to earn a bronze medal. He jumped 25-8 in the NCAA indoor.

The NCAA outdoor track and field championships will be held here in June and Lewis said, "I think there is such a thing as a home-court advantage for me in the NCAA because a lot of those guys (opponents) have been in the AAU's where they have javelins flying around you. We don't have that kind

Women's Tennis **Entry Forms Available**

Entry forms for the annual Chamber of Commerce Women's Tennis Tournament are now available at the Camber office, 701 N. Main, it has been announced by tourney president Linda Block.

Tuesday, April 15.

Lewis also likes the peace

that will help me."

and quiet of the outdoor

of distraction here so I think

"I like jumping outdoors much better than indoors," said the 18-year-old Lewis. "I don't like indoors at all it's too cramped and too noisy."

He added, "I think it will take a jump of 27 feet to win the NCAA."

There was one other relays record of note Friday night

when Mark Anderson of the University of Arkansas won the 5,000-meter run in 13:41.38. He broke the old record of 13:49.36 by Michael Musyoki of Texas-El Paso in

"I told myself before the race to just forget about the time and stay with the pack," said Anderson, who greeted his mother with a big bear hug at the end of the race. "I wanted to compete and show

the people the type of runner I think I can be. I haven't been running well since high school and a lot of people have been expecting a lot from me. Maybe now they'll start seeing a lot more of

Like Lewis, Anderson enjoys performing at the Texas Relays.

"I just love running in this stadium," said Anderson, whose previous best in the 5,000-meter was 14:02.

The other Texas Relays' record of note was serious.

the 800-meter relay. The previous record was

Louisiana State's 1:22.35 in

established by LSU last year in 1:22.37.

The highlight of today's action was expected in the open 100-meter dash when Texas A&M's Curtis Dickey takes on a talented field.

Dickey had to scratch from the 800-meter relay Friday night because of a pulled calf muscle that was not deemed

Welterweight Prepares for Fight opponent in trouble, he goes or punch," Volbrecht said. Cuevas, who won a 15-round

HOUSTON (AP) — Willie Lock, the manager-trainer for welterweight fighter Harold Volbrecht, says his No. 5ranked contender gets quieter as fight day ap-

proaches. Volbrecht was already in a quiet mood when he arrived here a week ago to begin final preparations for Sunday's title fight against World Boxing Association champion Pipino Cuevas of Mexico.

By Friday he was almost mute.

"When we fight at home (Johannesburg, South Africa) he'll sometimes spend the last few days at my home," Lock said. "He's a quiet fellow anyway but when a fight gets near he gets really quiet. Then I know he's ready. Just sits out on the porch and looks at the birds.'

Volbrecht, 22-2, likely will offer a moving, boxing target for the stalking style of Cuevas, who brings a 26-5 record into his 11th title

"I can go either way, box

Hogs Clip Horns 2-1

AUSTIN, Texas (AP) -Scott Tabor allowed just four hits to pace Arkansas to a 2-1 win over Texas in a Southwest Conference baseball game Friday.

The win gives Arkansas a 7-5 record in the conference, while the loss drops Texas to 11-2 in SWC play.

Arkansas scored a run in the fourth inning when Todd Zacher walked, advanced on a force out and an error and scored on a sacrifice fly by Kevin McReynolds.

Keith Creel, who didn't allow a hit in six innings, surrendered four hits to Arkansas in the ninth when the Razorbacks scored the

winning run. Texas' only run came in the sixth when designated hitter Burk Goldthorn doubled to score Ricky

righthanded, it doesn't make any difference."

Volbrecht will need all his weapons to contain the champion, who has knocked out nine of his 10 challengers, five of them inthe second round.

In 10 title defenses, Cuevas has required only 53 out of a possible 150 rounds to put away his opponents.

was the only title contender

can fight lefty or decision despite a badly sprained left hand.

Cuevas, 22, will take a 26-5 record into Sunday's nationally televised 15rounder in Astro Arena with a possible bout against World Boxing Council champion Sugar Ray Leonard awaiting the victor.

Leonard knocked out Davey "Boy" Green in his first title defense Monday Randy Shields of Chicago and will be at ringside for Sunday's fight.

'Iceman' Chips in 44 Points; Spurs Beat Rockets

SAN ANTONIO, Texas (AP) - George Gervin's 44point playoff performance Friday night didn't surprise anyone, least of all Houston Coach Del Harris. He has seen it too many times

Fueled in the fourth quarter by Gervin and reserve Kevin Restani, the San Antonio Spurs fought off Houston 106-101 Friday night to even the best-of-

Association first-round playoff series. The San Antonio victory sends the series back to Houston Sunday for the deciding third game.

"It was a win for Gervin. He can do that to you," said Harris, who's been plagued by Gervin for many years. "I've coached against Gervin in the NBA, the ABA and in college, believe it or not. I was coaching at Earlham State when Gervin and Eastern Michigan beat us.

three, National Basketball

Nothing he does surprises

San Antonio's interim coach Bob Bass has been around the three-time NBA scoring champion for five seasons. He also was not surprised Friday night.

"It was a typical, George Gervin game. That's the way he has played in the playoffs for three years. I knew he would come up with a big one," said Bass. "It was a super game, and it was under tough pressure. We had to

Gervin had come within two points of his career-best playoff performance Friday night, but still showed the calm demeanor that earned him the nickname, "Iceman."

"Everybody asks me my secret. I have no secret. I never change my game," said Gervin, who was held to only 19 points Wednesday night when the Rockets won the first game, 95-85.

The Rockets led Friday night's bruising, seesaw

Philadelphia Holds Off Washington

contest 74-73 after three

But the Spurs outscored Houston 12-2 to open the final quarter. Gervin had seven of those 12 points.

The Spurs were leading 95-86 with 4:48 remaining, before Moses Malone and Robert Reid combined to bring Houston to within two, 98-96 with 1:33 remaining.

Gervin got the next four points in 41 seconds to give San Antonio a 102-96 advantage. Malone and San Antonio's James Silas then traded a pair of free throws each, . leaving the Spurs with a 104-98 lead with 41 seconds remaining.

Rudy Tomjanovich's threepointer brought the Rockets within striking distance, but San Antonio reserve center Paul Griffin's driving layup iced the game with 11

seconds remaining. Restani got nine of his 11 points in the final period.

"Both teams played well. It was a good playoff game," said Harris. "They made a couple more than we did in the fourth quarter."

Asked what he planned to do Sunday, Harris simply replied, "Just play. We just have to go out and play hard. If we play there like we did here tonight, we'll win. I think the home court makes a significant difference."

Buffalo Lake Meeting is Tomorrow

By JIM STEIERT Outdoors Editor

The Save Buffalo Lake Committee will hold a strategy session Monday at 7:30 p.m. at the Randall County courthouse in Canyon to set the stage for a meeting April 22 when U.S. Fish &

Wildlife Service officials and representatives of the U.S. Department of Interior will come to Canyon to give a status report on studies concerning Buffalo Lake.

Government officials from counties surrounding Buffalo Lake are being urged to attend tomorrow night's session as the SBLC seeks to keep the momentum it garnered with a recent petition drive going.

Plans of action relative to the April 22 meeting will be the primary topic for tomorrow's session.

The April 22 meeting, to be held at the WTSU Science Building in Canyon, will give DOI officials an opportunity to comment on the status of a study on the potential downstream flooding effects removing the Buffalo Lake

dam from the Tierra Blanca

Creek would have.

The session was originally scheduled as a time to explain a DOI decision to breach the dam at Buffalo Lake, but strong and immediate action by the SBLC, which garnered the

signatures of some 20,000 Panhandle residents who opposed the breaching of the

dam and doing away with Buffalo Lake apparently forced further study of that alternative.

Studies by the Corps of

Engineers and DOI are now underway in areas lying downstream from Buffalo Lake in an effort to determine the flood hazard that might be created by destroying the Buffalo Lake dam, and results of those studies are not expected to be released

for several months. The SBLC is also gearing

up to tackle the issue of water availability as the second phase of its overall effort in the event that the destruction of the Buffalo Lake dam is averted.

All interested persons are invited to attend tomorrow night's session, which will be held on the third floor of the Randall County courthouse.

The Sportsman's Den By Jim Steiert

MEMBER

Back several years ago along about this time of the season a few of my high school buddies and myself would usually make a trek off down into the "Caprock Country" to a few cattle tanks located out in the middle of mesquite spreads to try our luck at spring bass and panfish.

We had a "guide," of sorts, in the form of a fellow who had once lived in this part of the country and who knew everybody down there and all of the choice fishing holes.

Worked out pretty well, too. We could come and go and not cause anybody any trouble and once in awhile we even managed to catch a fish or two.

One time we were a little short on grub come evening, but being enterprising I managed to con the guys into slipping up on a couple of giant bullfrogs, which we lowered the boom on with a boat paddle.

The guys got a little skitterish when I announced that the legs of these same critters would fill the bill as our supper fare... More than one of the group swore up and down that he would never touch those detestable objects should they be offered up on a platter as table fare.

... They sure had ganged up around the campfire 45 minutes later though, when those frog drumsticks coated with cornmeal were sizzling along in the frying pan and beginning to turn golden brown, while their odor wafted across the pond on the soft spring breeze.

And by the time the two of us who were venturesome were munching away on our supper their resolute refusal gave way to growling stomachs and before long the whole crew was pronouncing this pretty decent grub...So much for

resoluteness. Our "guide" got us to a pond in a back pasture one time. It was loaded with little perch and we had a field day, having made the trip in a rig that featured a set of canvas-covered livestock racks as

The second day, we decided we'd run into town for a few things. We left the gate of the stock racks along with our fishing gear at pondside and made

Two hours later, when we returned, there were two stern-looking cowboys and a deputy sheriff parked at our campsite in waiting.

We were quickly given to know that the sheriff from over at Matador had already been sent for and that we were suepcted of cattle rustling.

Our "guide" found out the folks he thought owned the place didn't own it any more, and that a prized bull had been stolen from this very same pasture not two weeks before we put in an appearance here.

You talk about a bunch of fishermen gathering in their lines and sweating it out! Visions of being jailed for reeling in a bull instead of a bass were haunting all of us.

Finally, the sheriff made his dreaded arrival and it was time for us to come up with the best fish story we could manage.

We approached the lawman and a shimmer of recognition hit me.

"Aren't you Mr. Spray...J.D. Spray?" He was...The very same man who years before had lived not a quarter-mile down the road from our farm, who used to play "boat" in the irrigation ditch with us kids, and who I guess was not above believing a good fish story...I think what clinched it for us was the fact that he was convinced we just simply couldn't have landed a 2,000 pound bull on

four pound test line and light rods. Anyway, we all had a good laugh over it when it was over, but you never saw a bunch of fishermen break camp and leave a place so fast in your life.

...And you never saw us blindly trusting a "guide" again either.

SBLC Spokesman Urges Meeting Participation

Dear Editor:

We, of the "Save Buffalo Lake Committee", would like to have area residents and government officials meet with us at the Randall County Court House in the District Court Room on the third floor at 7:30 p.m., Monday, April

We, as a committee of concerned citizens, feel that help from our elected

whole issue of Buffalo Lake rests on our representation at the April 22 Meeting. We must have a plan ready for the April 22 Meeting with the Department of Interior. This meeting will be held in the West Texas State University Science Building.

We will be looking forward to a good turnout of area residents Monday.

Special Tax Checkoff in Colorado Benefits State Wildlife Program

By R.T. KERR Associated Press Writer

DENVER (AP) - Such critters as the black-capped chickadee, Mesa Verde night snake and humpback chub are getting special care in Colorado, thanks to a checkoff square on state income tax forms.

The checkoff enables taxpayers to channel any amount they wish from their tax refunds into the state's non-game wildlife program.

In the three years since it was introduced, the refund program has produced nearly \$1 million for the 748 species of non-game animals found in the state, -

In its literature for taxpayers, under a headline "Do Something Wild," the Colorado Division of Wildlife says, "Everything from songbirds and eagles to chipmunks and shrews falls into the category. ... Nongame wildlife includes everything that is not hunted or fished for - that's about 80 percent of all the wildlife species found in Colorado."

The literature describes how checkoff funds have helped efforts to re-establish river otters and greenback cut-throat trout in Colorado waters, restore a habitat for the greater prairie chicken and produce pesticide-free eggs from captive peregrine falcons.

Such creatures had been ignored for years as outdoors enthusiasts concerned themselves with so-called glamour species such as elk, bear and game birds.

"Interest in the non-game species really began to develop in the 1960s," said John Torres, director of the

Wildlife Division's non-game section. "That was when the environmental movement went to the legislatures and asked, 'What are you doing for non-game wildlife?""

California was the first state to react, hiring a nongame biologist in 1968. Torres said.

In 1972 Colorado became the second such state. naming Torres to head the non-game section and giving him \$60,000 to get started.

Those first years, he recalled, were tough. Lots of volunteers were interested in the work but money was

"It was almost corny," Torres said of early fundraising efforts. "We sold stamps, even T-shirts. We collected just about enough to cover the costs of fundraising.

"Then, one day during a brain-storming session, an individual mentioned a checkoff box on the state tax form like the one for presidential campaign on federal forms."

Torres said he drafted a bill to allow a taxpayer to designate a portion of his tax payment for non-game wildlife use.

Anticipating negative reaction from legislators, he also tailored another bill that would allow taxpayers to designate a portion of any refund for the same purpose. The second version passed.

"Some of us didn't think it would result in much," said Arch Andrews, public relations chief for the Wildlife Division. "We

thought the program would be a success if we received \$20,000."

As tax returns trickled in during February 1978, it looked good. About \$20,000 had been checked off for the fund. Then, in a last-minute rush of tax payments, the program collected an impressive \$350,000.

Last year taxpayers turned over even more - \$501,000. Contributions this year, through the end of February, were \$133,000, compared with \$82,000 at the end of

February last year. Wildlife Division officials expect more than \$600,000 for the nongame program before the last returns are processed this

Torres said the program has been so successful that at least 30 other state legislatures secured copies of the Colorado bill and one. Oregon, has passed a similar law. Torres' staff has been expanded to 14 full-time staffers.

In some instances work is done with a particular

species, Torres said, "but primarily we try to manage a system. You just can't go out and try to manage 748 species."

With the systemmanagement approach, biologists define an area and identify species within it with the most restricted populations. When something disturbs the environment, those species are the first to react, Torres explained. The non-game people then work to correct the disturbance in the

The non-game wildlife section is not just concerned with birds, mice, fish and snakes, however.

The grizzly bear, once believed extinct in Colorado, gained attention last year when a female grizzly mauled a hunting guide before being killed.

"We are trying to determine if we have more grizzlies in the state," Torres

Herring Are Eyed For Lake Meredith

AUSTIN -- Texas Parks and Wildlife Department fisheries biologists are hopeful that a pond containing 40 blueback herring will be the first step in establishing the imported fish as a forage species for the state's game fish.

A considerable obstacle was overcome last week when the fish survived an airplane and truck trip from the Santee River in South Carolina to the department's Heart O' the Hills Research Station near ingram. South Carolina officials had expressed doubt that the fragile fish would survive.

Neil Carter, inland fisheries research coordinator, said the herring exhibit several endearing qualities as a forage species. "First, they are a slow-growing fish,

which means they don't grow too large to be used as food during their normal life Carter said. "Secondly, they are very tolerant of extremes in temperature."

Carter noted that the state already has an excellent forage fish in many reservoirs -- the threadfin shad -but it tends to die off when the temperature drops in winter. Gizzard shad, the other Texas shad species, tends to outgrow its role as forage for all but the very largest predator fish.

Blueback herring usually do not exceed eight inches in length in fresh water, Carter

Another advantage of the herring is that it spawns prolifically, and while it

5 LBS. FAMILY STEAK

LBS. GROUND BEEF

S LBS. BEEF RIBS

swims upstream to spawn

like white bass and striped bass, it also can spawn on rocky lake shorelines.

Most people think of herring as strictly saltwater fish, Carter said, but blueback herring actually are anadromous. This means that in their natural life cycle they live mostly in salt water but swim into freshwater rivers to spawn.

"Several southeastern states have had good success stocking blueback herring, so we hope they can provide additional forage in our lakes as well," said Carter. He said current plans call for an experimental stocking at Lake Meredith in the Texas Panhandle as soon as fish from the first spawn reach 'Sagebrush Rebellion'

Dangers Listed by NWF Thomas L. Kimball, executive vice president of the National Wildlife Federation has written the governors of six western states to warn them against legislation supporting the so-called 'Sagebrush Rebellion' -- the

land into state ownership. In his letter to Governors Bruce Babbitt of Arizona, Richard D. Lamm of Colorado, John V. Evans of Idaho, Bruce King of New Mexico, Dixy Lee Ray of Washington, and Ed Herschler of Wyoming, Kimball explained that the 4.5 million-member Federation has always supported the concept of managing the nation's federal lands and resources for the public good. Transfer of ownership of the lands to the states could result in "mismanagement of

transfer of federally-owned

these valuable public re-

sources," Kimball said. While noting that the Sagebrush Rebellion grew from dissatisfactions over the increasing restraints on the use of public lands, especially recent reductions is grazing allotments, Kimball emphasized that these reductions are based on "environmental assessments and management plans developed by the bureau of Land Management in an attempt to balance the competing uses

of our natural resources." Because the states would find the cost of properly managing the lands "unbearable," they would be forced to sell them to the highest bidder, Kimball predicted, and thus many of the lands would pass to private ownership. This, Kimball warned, would mean a loss of public access for hunting, fishing, hiking, camping, and other recreational activities.

"Rebellion" bills now pending in Congress, Kimball said, would affect the six states as follows:

Arizona (bills under consideration: HB 2001 and SB 1012)--In 1979, BLM's expenditures totalled \$19,903. 000 and receipts from such uses as grazing and mineral leasing totalled \$4,298,000. The total deficit resulting from a transfer of public lands to state ownership would be \$15,605,000. Fortyfour percent of the state's land is federally-owned.

Colroado (bill under consideration: HJR 1006) -- in 1979, BLM's expenditures totalled \$44,476,000 and receipts from uses such as grazing and mineral leasing totalled \$43,505,000. Total deficit resulting from a transfer of public lands to state ownership would be \$971. 000. Thirty-six percent of the

364-6751

state's land is federallyowned.

Idaho (bill under consideration: SCP 129)--In 1979, BLM expenditures totalled \$26,033,000, and receipts from uses such as grazing and mineral leasing totalled \$8,429,000. Total deficit resulting from a transfer of public lands to state ownership would be \$17,604, 000. Sixty-four percent of the state's land is federallyowned.

New Mexico (bill under consideration: HR 79) -- In 1979 BLM expenditures totaled \$97,855,000, including \$74,922,000 paid directly to the state. If the state assumed ownership of public lands, it would lose this revenue and approximately \$17.5 million that it presently received from the Federal Highway Administration Act funds. In addition, counties' taxes would be about \$500,000 per year, or five percent of the amount now given under the Payment In-Lieu of Taxes Act. Thirty-four percent of the state's land is federally-

owned. Washington (bill under consideration: SJR 132)--In 1979 BLM expenditures totalled \$3,538,000 and receipts from uses such as grazing and mineral leasing totalled \$370,000. Total deficit resulting from a transfer of public lands to the state would be \$3,168,000. Twenty-nine percent of the state's land is federally-

Wyoming (bill under consideration: HB 6)--In 1979 BLM expenditures totalled \$98,710,000 including \$77. 233,000 paid directly to the state. If the state assumed ownership of public lands, it would lose this revenue plus revenues from BLM lands

MAJOR SERVICE STATION

FOR SALE

earmarked by the Bureau of Reclamation for western irrigation projects. Fortynine percent of the state's land is federally-owned:

In order to offset these losses, Kimball pointed out, each state would have to increase its tax revenues or grazing fees, lease large tracts of land for mining or grazing, or sell the lands to the highest bidder, most probably corporate interests rather than private ranchers.

"The federal management of our public lands is far from perfect, yet the solution is not state ownership but more effective cooperation between the federal government and states taking a more active role in land-use decisions."

Carp Given

There's no doubt that many toward carp.
These widely distributed fish

are accused of misbehavior wherever anglers gather. Yet there are fishermen who

swear nothing beats carp when it comes to action on light

According to biologists, carp don't deserve the contempt given them by fishermen. A popular carp tishing meth-od is to bait an area for several days ahead of when you intend

This is done by placing three or four pounds of cottonseed cake in a mesh bag and sinking it where you will be fishing.

The technique is simple. Bait a #2 short shank, straight eye, straight barb hook with a doughball.

Cast it near the bait bag and wait for action. Don't use a

weight.
The following doughball recipe is one the Mercury anglers like to use for carp: 1 cup yellow cornmeal, I cup flour, I teaspoon sugar, I quart water, I

cup molasses.

Mix flour, sugar and cornmeal with enough water to form heavy dough. Roll into balls one inch through. Stir rest of water and molasses and bring to a boil.

Drop in several doughballs and cook two to three minutes.

NWF Protests Timbering Techniques

Accusing the nation's second largest timber company of "abusive forestry practices," the National Wildlife Federation, the nation's largest citizens conservation organization, has filed two shareholder proposals to be presented at the Weyerhaeuser Company's April 17 annual meeting in Tacoma, Washington.

The proposals would require Weyerhaeuser to adopt specific guidelines to "govern forestry activities impacting wildlife and wildlife habitat" on its approximately 900,000-acre holdings in southeastern Oklahoma and to establish a "formal, written company policy on wildlife and wildlife habitat."

According to NWF attorney Peter Kirby, the Federation learned about Weyerhaeuser's operations in southeastern Oklahoma from the Oklahoma Wildlife Federation, an NWF affiliate. The Oklahoma conservation group, along with other state and local organizations, was deeply concerned that the Weyerhaeuser method of clearcutting extensive areas of the existing mixed pine and hardwood forest followed

by replanting with pure pine was resulting in the loss of hardwood habitat vital for wild turkey, raccoon, squirrel, and other wildlife.

In addition, Kirby said, they noted that streams which only a few years ago ran clear were now clouded with silt eroded from logging roads and clearcut areas. This, they complained, was ruining much of Oklahoma's smallmouth bass population.

Recently, Kirby toured Weyerhaeuser's Oklahoma holdings and saw "concrete evidence of mismanagement and abusive forestry techniques." Cut trees had been dragged along and across streams, bringing with them soil and debris from the forest floor, and hardwood stands along the streams and rivers were being injected with poison and destroyed, Kirby said.

"Weyerhaeuser owns about 900,000 acres of land in southeast Oklahoma--that's an area larger than Rhode Island--and has already cut over and converted more than a quarter of its holdings to an even-aged pine plantation," Kirby explained. "At the current clearcutting rate of 35,000 acres a year, the entire area may be

converted by 1997, except for flooded or very steep areas."

"Unless the company makes plans now to identify and save important hardwood areas, particularly along streams and rivers, there will be a radical change in the area's wildlife," he continued. "Without the nuts and

acorns, as well as the shelter that hardwood trees provide, there will be major reductions in deer, squirrel, and wild turkey populations. Moreover, the endangered red-cockaded woodpecker, which nests only in infected mature pine trees--which are customarily destroyed by

Weyerhaeuser--may disappear entirely."

"And," he concluded,
"just as the state and local
conservationists fear, clogged and muddied streams
could mean the end of the
area's smallmouth bass."

NWF's proposed guidelines are designed to prevent

luded, used by other large profitd local making timber companies.

NWF asks Weyerhaeuser to:
*Retain a number of
standing, dead trees for
cavity nesters and dwellers,

and nut-bearing trees for wildlife food.
*Reduce erosion from

such drastic changes and are

patterned after practices

logging roads.

*Allow for strips of hardwood trees along major streams and primary roads to protect scenic values and

*Limit clearcut areas to under 300 acres and irregularly shape them to provide greater "edge" for wildlife.

The Federation's second proposal asks Weyerhaeuser to establish a formal wildlife policy that would require coordination with state fish and game agencies, local conservationists, sportsmen, and recreation groups.

In its written responses to the NWF proposals, the management recommends that its shareholders vote against both proposals, explaining that there are already corporate policies and guidelines in effect which address NWF's concerns. These include a "Sensitive Area Manage-

ment program," a "Corpor-

ate Environmental Policy,"
"Timberlands Environmental Guidelines," and a
"specific Wildlife Management Policy," adopted in
1979.

Kirby questioned how well these policies addressed wildlife concerns. "The two-page 'Corporate Environmental Policy' never even mentions the word, 'wildlife," he noted. The one-page "Wildlife Management Policy" says that the company's policy of protecting wildlife is "within the frame of the Company's forest objectives." According to Kirby, that statement indicates that wildlife needs will be provided "only so long as they don't interfere

with timber protection."

During long hours of discussion and negotiations with Weyerhaeuser officials, Kirby pointed out, the other

tioned at all, either to him or the local and state conservationists.

"We must wonder how adequate all these policies and guidelines are in the light of continuing abuses." Kirby emphasized. "But we do hope that real action will come soon in the form of new guidelines and a management plan which Weverhaeuser is now developing for the Oklahoma region. While, we hope these plans will resolve our problems, we felt filing these shareholder proposals was our best course of action. If management won't act responsibly. perhaps the shareholders

NWF was able to place the two proposals before Weyerhaeuser's shareholders as the owner of 1,800 shares of Weyerhaeuser common stock--a part of its endowment

Tide Vital To Fishing

AUSTIN -- The movement of tides has fascinated humanity for thousands of years, perhaps even to prehistoric times.

Explanations for tidal movements were mainly mythological until Sir Isaac Newton developed his theory on gravity which led to the discovery that tides were caused by the gravitational pull of the moon and sun on the earth.

On the Texas Gulf Coast, tides are relatively minor compared to those in some parts of the world, but a Texas Parks and Wildlife Department coastal fisheries biologist points out that they have a vital and dramatic effort on the coastal environment -- including sport fisheries accounts.

fisheries resources.

Shad Wendorf said tides along the Texas coast are usually only one to two feet. This is in contrast to Atlantic and Pacific Coast area tides of five feet or more and to those of New Brunswick and Nova Scotia which can reach a height of 50.5 feet.

"Experienced fishermen can use the computer-calculated tide tables published by the National Ocean Survey to predict the movement of game fish," Wendorf said. For example, Wendorf said the onset of a

flood tide causes Gulf waters to flow through the passes into the bays. Shrimp and bait fish move shoreward with the rising water level, followed closely by game

"Fishermen working the passes and jetties at this time should find increased action as the tide-running spotted seatrout (speckled trout) move with the flow," said Wendorf.

"During ebb tide, the situation is reversed." he continued. "The game fish swim offshore to wait in the passes for the bait fish that will soon follow."

Wendorf theorized that the stronger the tidal movements, the more intense the feeding activity is likely to be. The strongest periods are the summer and winter solstices, around June 22 and Dec. 22, and the spring and fall equinoxes, March 21 and Sept. 21.

"Fishing success may be further enhanced if the tidal change occurs in the early morning hours or after dark, when tout and red drum (redfish) normally feed," Wendorf said.

Fishermen also should be aware that wind direction has an effect on tides and water clarity.

Coast Guard Grant To Help Handicapped Physically handicapped overboard. Also covered are procedures, for transferring Safety, said the center's work

Physically handicapped people may be able to take a more active part in the sport of boating thanks to a new safety and information guide

prepared under a grant from the U.S. Coast Guard.

Entitled "Boating for the Handicapped: Guidelines for the Physically Handicapped," the book was written by Dr. Eugene Hedley of the Human Resources Center, who is himself a physically handicapped boater. The guide deals largely with safety for the handicapped boater and lists the types of boating activities available to the disabled.

The book discusses personal flotation devices, emergency equipment and procedures to follow if a boat capsizes or a person falls overboard. Also covered are procedures for transferring disabled boaters to and from the dock and handling special equipment for individual needs. One unique feature of the book is a section on boating safety written in braille for the blind.

His book, Hedley said, is designed to "increase recreational boating opportunities for the physically handicapped" and to provide basic guidance to rehabilitation and recreation professionals who counsel and teach handicapped persons.

Earlier Coast Guard grants permitted the center to research boating safety for the handicapped. This formed the basis for Hedley's book.

Rear Admiral bernie Thompson, Chief of the Coast Guard's Office of Boating Safety, said the center's work "will help to ensure that the handicapped boater can enjoy the sport safely."

A bibliography of recommended reading, a list of recreational organizations for the handicapped and a summary of current legislation affecting handicapped boaters are also found in the guide.

Copies of Hedley's book are available by writing to the Human Resources Center, I.U. Willets Road, Albertson, N.Y. 11507. The Coast Guard grant covered the costs of printing a limited number of books which are available to the public at no charge. An unforseen demand for the publication may require a charge to pay any additional printing costs.

Nava Wins Approval As Mexican Ambassador

By SOLL SUSSMAN Associated Press Writer

WASHINGTON (AP) -Julian Nava, surprised by the Senate's speedy confirmation of his appointment as ambassador to Mexico, says he plans to complete arrangements and be on duty in Mexico City by the end of. the month.

"We did not expect the Senate to act so quickly," the California educator and historian said. "It's thrown the schedule into a state of

Nava's nomination had not raised any controversy, but he had expected that 'the Senate would wait for a confirmation vote until after the spring congressional recess.

The vote came instead as one of the Senate's last actions before adjournment Thursday, following by one day the Senate Foreign Relations Committee's unanimous approval of the nomination.

In an interview Friday at the State Department, Nava said he also had been surprised when he learned last year that the Carter administration was interested in him for the job.

Nava denied, however, that his lack of formal diplomatic experience could present any problems.

"To the people doing the searching for the president, it (choosing Nava) was not surprising at all," he said. "I guess I embodied their criteria. They had done their check."

Nava said he has considered himself a personal ambassador for years through his civic and

Nava was not worried by the initial reaction he noted in the Mexican press that dismissed his nomination as a product of purely domestic

"I like to ski. You don't worry too much about the beginning of the race; it's a long run down the hill," he

Nava is the first Mexican-American selected as ambassador to Mexico, which gave rise to speculation that his appointment was a nod to the growing political clout of Hispanics in the United States.

He said he expects to continue personal links to the Hispanic community but it will be only one aspect of the

It's easy to see where

many of our priorities are.

"I have made it very clear

to Chicano leadership across the country ... that I'm going to be an ambassador for the United States, and every one of them has said, 'Right on,' in English or Spanish," Nava

He said the Mexican administration has taken a clear interest in building closer ties with Mexican-Americans, just as other nations such as Israel maintain relationships with immigrant groups in the United States.

Nava regularly alludes to his experience as a historian. particularly when asked to evaluate the changing relationship between Mexico and the U.S.

"Mexico has emerged from a self-contained life where it had relatively little to do with its neighbors," he said. "Mexico has realized that its welfare does not depend on what it alone does."

Nava said the United States' awareness of Mexico has grown most recently because of a staggering increase in border trade and the development of Mexican oil and gas resources.

He pointed to a 47 percent increase in trade from 1978 to

But Nava said the change over the past 20 years can be attributed to an increasing range of relationships between Mexicans and Americans, including investments and tourism that flow between the nations

"This is the kind of thing that's been going on in the long run — not to mention the undocumented workers," Nava said. "This has changed American attitudes."

He said the Mexican view of the United States is based on a longer historical memory, including Indian and European influences.

"In the Mexican psyche, you have two very powerful and assertive, and proud, psychological heritages, so to speak," Nava said.

The new ambassador said a top priority on starting his duties will be to make sure that everyone on the American Embassy staff in Mexico City be completely bilingual in English and Spanish.

"I think we're just about there," he said. "I want it (the staff) to get out as much as possible into the mainstream of Mexican daily

Nava said the result should be daily reports on Mexican opinions, aimed at avoiding past problems that could be blamed on poor communications or misconceptions.

"An ambassador does not create policy. My function will be to communicate and explain in both directions," he said. "If an ambassador and an embassy staff does his job well, there should be virtually no surprises."

WF Nightmare Revived

Editor's Note: Like a terrible dream, a storm last week revived the haunting memories of the Wichita Falls tornado. It struck a year ago Thursday, killing 45. The latest assault overshadowed the fact that 80 percent of the homes, apartments and businesses have been

By MIKE COCHRAN **Associated Press Writer**

WICHITA FALLS, Texas (AP) - Patsy Carroll is sick of monsters, tired of running, mad as hell and just a little upset about her children's night terrors.

Where do you go to give up?" asked Louise Thomas as she mounted a tattered white symbol of surrender on her front porch.

Said Kathy Scheid: "It was kind of like Pavlov's dog. When the sirens went off, I became irrational."

The source of this fear and frustration was a killer tornado last year and the second storm last week - a haunting reminder of "Terrible Tuesday."

It was a year ago April 10 that a giant twister knifed into this Northwest Texas city of 100,000 and killed, crippled and destroyed with random perversity.

"The Storm Without Pity" read a banner headline in the Wichita Falls Times.

Forty-five persons died, hundreds were injured and thousands were left homeless. Losses ran into the tens of millions.

Witnesses said three separate tornadoes converged into a single broad twister that danced along a populous corridor for more than eight disastrous miles. It struck at 6 p.m. that

Tuesday and by 6:10 it was gone. In its wake was a paralyzed city without power or water or a functional disaster plan.

Recovery was slow, painful and by no means total.

After what crisis counselors labeled a "very hard year," city planners announced last Tuesday that 80 percent of the 5,500 homes damaged or destroyed had been rebuilt.

The next day, a noontime thunderstorm swept into town, packing torrential rain and hail and the climatic

turbulance so common for tornadoes.

'We were almost looking at the same situation as last April 10," said meteorologist Frank Cannon. The National Weather Service confirmed "at least a dozen funnels."

Spotters reported a tornado on the ground at Lake Kickapoo in neighboring Archer County. A second twister touched down just south-southwest of Wichita

Falls. The second funnel rum-

bled toward the city. At 12:56 p.m. officials triggered the ominous

disaster warning sirens. Around town, people scurried for cover. They fled from diners and shopping centers, beauty parlors, grocery stores and

elsewhere. Some panicked. Most did

Many abandoned cars - a lesson from Terrible Tuesday.

The more fortunate took refuge in storm cellars. Others huddled in bathtubs and closets and, in one tragic instance, in a drainage ditch.

A flash flood drowned a woman and her infant grandchild huddled there.

Patsy Carroll, her husband and three children, dragged mattresses and pillows into the bathroom. Louise Thomas rode out the storm in a cellar with 13 people and two dogs. Kathy Scheid, at lunch when the sirens sounded, drove home and hid in a closet.

The storm churned through town without further mishap but its emotional toll was enormous.

"Something is inherently wrong that we keep fighting the environment." said Mrs. Carroll, whose home was flattened a year ago.

"I don't like it that we have monster ice storms and monster thunderstorms and monster tornadoes."

"I decided I can't live the rest of my life running. But I'm mad as hell. I don't like it when I have to listen to my children have nightmares and cry in the night."

As Mrs. Thomas emerged from the storm cellar, she was relieved to find her newly planted trees standing. But she, too, was

"I think it's the nerves," she sighed. "It's not so much that I really worry about dying. It's the horror of it all. When we came up last year it was so eerie. That impression will last a lifetime."

Later, she strung a makeshift white flag across her front porch and declared: "I surrender. If anybody knows who we turn ourselves

into, I'd like to know."

At her home, Ms. Scheid monitored both radio and television weather reports and remembered Terrible Tuesday. Her home was severely damaged.

Hearing a second alarm, she took refuge in a closet as she had done a year earlier. "It wasn't a fear of

dying," she said later, sounding remarkably similar to Louise Thomas. "I mean I wasn't afraid of losing my life. It was fear of having to go through everything that happens afterwards all over again."

Mmes. Carroll, Thomas and Scheid are but three of the thousands whose lives have been touched, perhaps scarred, by Terrible Tuesday.

"A lot of people are suffering from the long-term stress of having their lives rearranged by the tornado," said Naoma Clark, who coordinated a state-funded crisis counseling program.

"It's been a hard year for Wichita Falls." For example:

- Frances Leath, a funeral home employee: "When I

saw the tornado warning on TV Wednesday I was just sick. When the sirens started off, I wanted to cover my ears. I was almost nauseated."

- Linda Swift, whose two children died in the tornado: "Emotionally, I suppose I'm to the point now where at least I can say the word 'tornado' without trembling; but when I let myself think of the actual details, I get cold inside. I feel clammy and shaky."

- Ellen Gagahan, who lost everything: "It's been a nightmare - literally. I dream about it; or I dream about dying. It's never out of my mind. How could it be? It's made all the difference in my life."

- C.E. Holley, who saw three people die at his steakhouse a year ago, and was an emotional wreck after Wednesday's storm: "I never will forget what it looked like that day. We didn't have any warning. I looked out the window and the tornado was crossing the street.

"I knew I was going to

Unemployment Heads Upward

NEW YORK (AP) - Along with interest rates and inflation, the nation's unemployment rate is headed upward.

While the increase has not been as dramatic as the climb to 18 percent inflation and 20 percent minimum business loan rates, several reports suggest employers are growing cautious in their hiring plans.

The Labor Department this past week reported unemployment rose to 6.2 percent in March, up slightly from 6 percent the previous month but the same as in January.

That rate is expected to continue to increase later this year. Carter administration economists predict unem-ployment of 7.2 percent by the end of the year, and some, private forecasters put the rate closer to 8 percent.

Even at the administration's lower estimate, about 7.4 million workers would be unemployed, an increase of 1 million from last month. The latest report showed a total of 97.7 million jobless workers.

Layoffs so far have hit hardest such industries as housing and autos, where high interest rates and

364-5077

slower sales have forced employment cutbacks.

But even in industries where layoffs have not been so great, some surveys "indicate a more difficult time ahead for job seekers.

"Given the recessionary outlook, labor market conditions can be expected to continue worsening over the next several months," said Kenneth Goldstein, who conducts a monthly survey of help-wanted advertising for the Conference Board.

The latest survey by the business research group showed the volume of wantads in 51 metropolitan newspapers declined in February for the third consecutive month. The latest index stood at 151, compared to 154 the previous month. That was down 7 points from the index in February 1979.

Manpower Inc., a temporary employment company which conducts quarterly surveys on the employment outlook, came up with similar results in its survey of business plans for April, May and June.

Hiring plans for the period were up from those reported for the first three months of the year, but that pattern is normal, given increased seasonal demand in the spring, the Manpower report

Compared with results of a survey for the same period last year, plans to hire additional workers declined. The nationwide sampling of 8,000 employers found 28 percent planned to hire additional workers in the next three months, compared to 18 percent in January and 31 percent a year ago.

Letter to the Editor

Dear Editor:

Please publish the follow-

A Day In Washington D.C. In this city of corruption, one arises early to be able to make his snail pace adventure in five lanes of bumper to bumper traffic with the hope that he or she will be able to make the three mile obstacle course from the motel room to the National AAM office directly in front of a Magnificent Capitol Building. From all over the nation they make their way to various hearings and prearranged meetings. At this point, please let me congratulate the office staff, the executive committee, the delegates and the entire work force of AAM members for the super job that is being done in lobbying the "Hill." All of these people are well informed on the issues and they are conducting themselves in a very respectable

The agriculture committee has been receptive to the testimony given and it is my belief that those members do understand the problem. This situation is exactly the same as a church service usually, those needing the serman are absent. Marvin Meek and Pam Frecks from Nebraska gave very informative and moving testimony before the agriculture committee. The Farm Bureau had good testimony up until the question and answer period and at that time their spokesman stated that he felt the target prices were high enough. A spokesman for the Soybean Growers Association testified that bean prices were high enough. A spokesman farmer repudiated this statement and gave his cost of production proving

that he was operating his farm at a loss.

While waiting in the House Gallery for the opening at 12:00 o'clock, I closed my eyes and tried to visualize our early day statesmen who had worked in this identical location. I am confident that Ben Franklin, Thomas Jefferson, Patrick Henry and others who had the concern of the people at heart, could not even imagine that this Nation would ever stoop so low as to elect the type of politicians that are legislating our laws and wasting our money by dilly-dallying around and caling each other Gentlemen when I am confident that they were short on Gentlemen and Statesmen or apparently they were on "back order." The entire afternoon was wasted in discussing the 75 million dollar loan to Nicaragua and what provisions we could make to control their elections.

I would like to suggest to every American particularly to every AAM member to bring your blood pressure pills and to spend an afternoon observing the worlds greatest comedians in action, bearing in mind all the while that the actors fee is being paid out of every tax paying citizens pocket.

Please let me urge everyone who receives this newsletter and to all my friends and neighbors that your support is vital and that if this nation is to be saved it must be done by concerned people and from this vantage point the AAM organization is the only voice speaking totally and wholly for agriculture.

Glenn Allred

'Most Wanted' Caught

By SUSAN J. SMITH **Associated Press Writer**

EVANSTON, III. (AP) -The man identified as the No. 1 criminal suspect on the FBI's most-wanted list, an alleged member of the Puerto Rican terrorist group FALN, has been caught after a three-year manhunt,

authorities say. Carlos Alberto Torres, 27, who police say operated a bomb factory in Chicago to supply explosives for the group, and two other suspected FALN members were among 11 persons arrested Friday by Evanston police, the FBl said.

Torres, his wife Marie, 24. and Ida Luz Rodriguez were among the five leading suspects in FALN bombings since 1974 that have killed five persons in Chicago, Washington and New York City, according to the FBI.

James Ingram, special agent in charge of the FBI's Chicago office, said Torres and his wife were believed to participated in bombings and Ms. Rodriguez was believed to have been a material witness to bombings.

Torres was sought by the FBI on charges of interstate flight, possession of explosives, conspiracy and violation of the National Firearms Act.

The other five men and three women arrested by Evanston police in residential neighborhoods near Northwestern University were not immediately identified.

Lt. Robet Coleman said that as of midnight, eight of those arrested had not been

Torres' father, the Rev. Jose Torres, who went to Evanston police station with three lawyers, said his son "considers himself a prisoner of war. He does not

recognize the jurisdiction of the United States court. ... He demands to be taken before an international court."

Two of the 11 persons were arrested when they returned to a stolen truck that had been staked out by police, Capt. James Gillespie said. After receiving calls from neighbors who reported people in jogging suits making repeated trips to and from a parked van, police found the other nine suspects inside, he said.

No explosives were found,

but Gillespie said the suspects arrested with the stolen truck were armed and carried more than 10 shotguns and pistols in a

A 1977 indictment against Torres charged that 200 sticks of dynamite found in a building owned by him on Chicago's North Side were stolen from construction sites in Colorado and New Mexico. The indictment also accused Torres and another man of planting 16 bombs in Chicago from June 1975 to June 4, 1977, when a bomb exploded on the fifth floor of the Cook County Building.

Last month, terrorists claiming to be FALN members stormed President Carter's campaign office in Chicago and Republican presidential contender George Bush's office in New

FALN stands for Fuerzas Armadas de Liberacion Nacional - the Armed Forces of National Liberation a nationalist group seeking independence for Puerto Rico.

Community Church Schedules Workshop

Community Church, 1508 Whittier, will sponsor a workshop on "Intercessory Prayer and Hearing God's Voice" next Friday and Saturday

Workshop leaders will be Jim and Janice Rogers of Tyler, according to church member and coordinator Earl Alexander. Rogers is director of Youth With a Mission in Tyler and serves on YWAM's International Council. Mrs. Rogers is editor of "20th Century Disciple" magazine and the sister of Loren Cunningham. founder and international director of Youth With a

Youth With a Mission is an international, inter-denominational missionary movement. It provides training in discipleship and evangelism to thousands of volunteers in approximately 50 countries and coordinates missionary outreach and relief efforts in several other countries.

The workshop will begin at

7:30 p.m. Friday with the showing of a 40-minute film. "The Potter's House," a theatrical documentary paralleling Jeremiah's corrupt Israel to today. Rogers produced the documentary.

The second session of the workshop will be from 9 a.m. through 12 noon Saturday. with a third session scheduled for 7-9 p.m.

"It's not necessary for a participant to attend all three

sessions of the workshop, but maximum benefit will be derived by doing so." Alexander said. "Each participant should bring a Bible and some note paper."

Rogers will deliver a message on evangelism and witnessing at Community Church's 10:45 a.m. service Sunday.

Pastor of Community Church is Morris Means.

Reading Matter

Originally a magazine was a storehouse, not a periodical. "The Gentleman's Magazine," introduced to the public in 1731, was the first publication to use the word in its new meaning, stating in its introduction that the publication was intended to "store up" a collection of various subjects,

"as in a magazine."

Mount Taal

Though an erupting volcano brings to mind pictures of flowing rivers of boiling lava, not all active volcanoes emit lava. Mount Taal in the Philippines, with a history of death and destruction, has spewed forth noxious gas, steaming mud and ash, and white-hot rocks - but never

Newspaper Bible

GET THIS TRASH OUT OF HERE!

Then it was time for the annual Jewish Passover celebration, and Jesus went to Jerusalem.

In the Temple area He saw merchants selling cattle. sheep, and doves for sacrifices, and money changers behind their counters.

Jesus made a whip from some ropes and chased them all out, and drove out the sheep and oxen, scattering the money changers' coins over the floor and turning over their tables!

Then, going over to the men selling doves, He told them, "Get these things out of here. Don't turn My Father's House into a market!"

Then His disciples remembered this prophecy from the Scriptures: "Concern for God's House will be My

"What right have you to order them out?" the Jewish leaders demanded. "If you have this authority from God, show us a miracle to prove it."

"All right." Jesus replied, "this is the miracle I will do for you: Destroy this sanctuary and in three days I will

raise it up!' "What!" they exclaimed. "It took 46 years to build this

Temple, and you can do it in three days?' But by "this sanctuary" He meant His body.

After He came back to life again, the disciples remembered His saying this and realized that what He had quoted from the Scriptures really did refer to Him, and had all come true!

Because of the miracles He did in Jerusalem at the Passover celebration, many people were convinced that He was indeed the Messiah.

But Jesus didin't trust them, for He knew mankind to the core. No one needed to tell Him how changeable human nature is!

Questioned about pursuing

hard for it."

Clayton.

By JIM STEIERT

Brand Farm Editor Bill Sarpalius, a candidate for the state's 31st senatorial district seat now held by Bob Price rated water importation, labor and education as some of the top issues now facing the state during an address to the Hereford well-rounded." Young Farmers during their regular monthly business

Community Room. Sarpalius, a former resident of Boys Ranch in neighboring Oldham County who returned there to teach

meeting Thursday night at

the Hereford State Bank

vocational agriculture and other subjects for a total of five years before becoming a legislative assistant to Speaker of the House Bill Clayton commented that being an agriculture teacher "is a tremendous advantage because the field is so

Sarpalius claimed a good understanding of agriculture issues important to this area, but commented, "I'm not a single issue candidate, and I'm not supported by any single issue group."

"I don't regret my association with Speaker

Clayton. He was always honest and fair with me and gave me an opportunity to learn the legislative process," stated the Hereford candidate in response to a question concerning any ill-effects a recent scandal involving Clayton has had on his campaign.

"I've done everything in the legislative process except vote," stated Sarpalius.

According to Sarpalius. one of the major issues he is asked about in the 26 county area in which he has been campaigning is the matter of water importation for Texas.

'There are a lot of plans for water importation and my personal feeling is that we've had enough talk and it's time to act on this important issue because time and water are running out. We need to look at conserving some water but we have more interest downstate concerning water importation and the issue might carry now since they are having water problems downstate as well." he commented.

"The plans are there, there is some idea of the cost. and we are getting some support from other states now. An importation system would probably require 10-15 years to build and would probably be the largest engineering project under-taken on Earth." Sarpalius

The Hereford candidate

also called for a continuing search for energy alternatives and stated that although gasohol has potential for helping with energy problems, he feels more emphasis should be given to the markets for raw alcohol as fuel and as the source for other products.

"We need new incentives to encourage new developments. I've always believed in American ingenuity, and given good incentive, I feel we'll find a new source of energy," he commented.

"I feel strongly about education in the state. Over 51 percent of the state budget deals with education and yet not a single senator has ever been a teacher. I strongly oppose any cutbacks in education such as have been proposed by the present senator," stated Sarpalius.

"I don't like education being put off until last by the legislature at appropriations time, and I would like to see the Minimum Foundation Program beefed up." he related.

Sarpalius also called for an expansion of the Sunset Commission to monitor the expenditures of various agencies more often and money appropriated to various agencies is spent for the reason it was appropriated."

According to Sarpalius, a great deal of resentment toward federal funds has been expressed to him by residents of the district during his campaign travels.

He pointed out that federal guidelines which mandate certain programs such as school breakfasts before federal money is awarded a school system prompt a good deal of resentment and rob local governments of a decision making process which is rightfully theirs.

Questioned on the issue of agriculture commodity imports from Mexico, Sarpalius stated, "I strongly oppose imports from Mexico that are improperly labeled. The problem is, how do you label it? It can be done, but it will cost a lot and it is a matter of convincing the legislature. The present senator sponsored a bill along this line but he let it die in committee and didn't lobby for his bill. You're looking at a lot of expense to stop the flow of imports but I've noticed you

Programs for '80 Feedgrains, Cotton Outlined

By JOHN FUSTON **Executive Director**

PROGRAM PROVISIONS

The NCAA crops are barley, corn, grain sorghum, wheat, rice, upland cotton, oats, rye, soybeans, flax, dry edible beans, sunflowers,

sugar beets and sugarcane. No set-aside is required for any crop, nor is there any opportunity to voluntarily divert an acreage for

All producers of program crops (corn, grain sorghum, rice on allotment acreage. upland cotton, barley and wheat for harvest as grain) may qualify for loans. purchases, disaster payments, and deficiency payments as applicable.

A timely and accurate report of acreage is required. Failure to report accurately and timely may cause loss of program benefits (eligibility for loans, purchases and payments.)

Owner & Operator

EMMETT DUKE

Each producer must sign neccessary applications to be eligible for a payment. Payment must normally be divided as the crops or proceeds are divided (or would have been divided if the crops had been produced). A different division. requested in writing and signed by all involved producers may be approved by the county ASC committee upon a determination that it is fair.

For a farm to be eligible for disaster and/or deficiency payments based on the high target level of \$3.63 per bushel for wheat, \$2.35 per bushel for corn, \$2.50 per bushel for grain sorghum, and \$2.55 per bushel for barley, the sum of the NCA crops reported by the operator must not exceed the NCA established for the

Producers on farms reported to be in excess of the NCA for the farm will be eligible

for disaster and/or deficiency payments based on the low target level of \$3.08 per bushel for wheat, \$2.05 per bushel for corn, \$2.45 per bushel for grain sorghum. and \$2.29 per bushel for Producers on farms report-

ed to have only cotton and/or rice are eligible for disaster and/or deficiency payments based on target prices established under the Food and Agriculture Act of 1977 which are \$9.49 per cwt. for rice and 58.4 cents per pound for upland cotton, whether or not he NCA is exceeded. However, if the farm also grows wheat and/or feed grains, it must stay within the NCA to be eligible for high target benefits for wheat and feed grains.

DEFICIENCY PAYMENTS Deficiency payments will not be made unless the national market prices received by farmers average less than the applicable target prices in 5A, B or C. Payment will be the amount that the applicable target price exceeds the higher of the national average market price or the national average loan rate. times the established yield and times the acres for

deficiency payment. The acres for deficiency payment will be determined by applying an allocation factor (if less than 1.000) to

grain sorghum and upland cotton and to the barley and wheat acreage planted for harvest as grain. To determine the allocation factor; each crop acreage will be estimated nationally and divided into the crop's national program acrege. No feed grain or wheat acreage will be reduced for payment. however, that is no larger than the 1979 planted and considered planted acrege. No cotton acreage will be reduced for payment that is at least 10 percent less than

allotment or planted acres. The law does not permit a deficiency payment on lost production for which a disaster payment is made.

the 1979 acreage. The rice

acres for deficiency payment

will be the smaller of the

DISASTER PAYMENTS To be considered for payment, producers must timely report crop losses due to disaster or other causes beyond the producer's control, crop acreages, and production data separately for each affected crop and

Prevented planting disasters must apply not only to the program crop but also to later nonconserving crops normally planted. Report prevented plantings while evidence of the disaster is still apparent, but not later than 5 days after the ending date of the normal planting

Report low yield disasters and have ASCS appraise the production before mechanical destruction of the damaged crop or use for other than grain or lint. For acreage remaining for grain or lint, report the disaster while evidence of the crop remains but not later than 15 days after the crop is harvested or abandoned.

Report your production as soon after harvest as possible. Farm-stored production will be measured by ASCS. If production from more than one farm must be

mixed, find out in advance the acres eligible for what records to keep for each farm that the county ASC committee will accept. Have ASCS measure production from a prior year before mixing new production with

Payments are available for approved prevented planting of wheat, corn, grain sorghum, barley, rice, and upland cotton computed on 75 percent of the established yield (100 percent for rice) times one-third the applicable target price and times

DAI Anti-Trust Suit Proceedings Continue

Proceedings in a \$32 million anti-trust suit filed by Dimmitt Agri-Industries against CPC International continue in Amarillo, and all indications are that the matter will now take up the full six weeks allotted to it in Federal District Court.

DAI charges in its suit, filed in 1974, that CPC International and eight other firms engaged in corn processing conspired to lower market prices on corn syrup and starch to force the Dimmitt-based cooperative out of business. In addition, the suit alleges that prices on corn starch and corn syrup returned to their former highs as soon as a

lease-purchase agreement was reached by DAI with Amstar Corp.

Out-of-court settlements have been made by eight of the firms originally named in the lawsuit.

Dr. Richard Hoyt of Minneapolis, a statistical economic analyst and president of Analystics, Inc. presented testimony along with Bill Clark, manager of DAI during the past week.

Testimony was also presented on behalf of James R. Harsh, president of Dimmitt Management Co., the firm that was originally formed to operate the Dimmitt corn processing plant.

Harsh has filed a personal damage suit against CPC.

AUSTIN--Texas livestock auction sales picked up considerably during the first month of the new year, with increased sales noted in every category, according to Agriculture Commissioner Reagan V. Brown.

"January auction sales were above a year ago for all species, and most notably for hogs," said Brown. "Sales also rose from the month of December."

calves marketed through Texas auctions during January increased one percent from a year ago, and totaled 544,000. This was also a 78-percent jump from the month of December, 1979. Hog sales, at 54,000 head, registered a 20-percent increase from January, 1979, and were up 42 percent from

last month. A total of 50,000 head of sheep and lambs were sold through Texas livestock auctions during January, 4 percent more than the same month a year ago, and 32 percent more than last payment.

Payments are available for eligible low yields applicable to losses below 60 percent of the established yield for wheat, corn, grain sorghum, and barley and below 75 percent for rice and upland cotton. Payment rates are 50 percent of applicable target price for wheat, corn, grain sorghum, and barley and one-third the target price for rice and upland cotton.

PAYMENT LIMITATION Deficiency payments to each person for feed grains. upland cotton, wheat and rice cannot total more than \$50,000. Disaster payments cannot total more than \$100,000.

APPEAL RIGHT:

Producers may appeal to the county ASC Committee for reconsideration of any decision it makes concerning participation in the program. The appeal must be in writing and be filed within 15 days after written notice of the decision is mailed or otherwise made available.

OFFSETTING COMPLIANCE

compliance requirement under the high and low target concept. Accordingly, owners and operators interested in the production of wheat or feed grain on a farm planting within the NCA are eligible for the higher target price even though they operate or have an ownership interest in another farm which plants wheat or feed grain and exceeds the NCA.

In order for ASCS to provide the service to which you are entitled, it is extremely important that all county office records with respect to your farm be kept current. If there has been a change in ownership, operator, tenancy, size of farm, irrigation systems and use, or other factors which may affect your operation, please visit your county ASCS office at your earliest convenience for the purpose of updating records for your farm.

Participation in programs administered by ASCS is open to all eligible farmers . without regard to race, color, age, sex, religion, national origin, or handicap.

Some people think Pioneer Corporation is just a gas utility headquartered in Amarillo, serving the Panhandle and South Plains of Texas.

That we are, but it's only one of our businesses.

Pioneer Corporation is a diversified, energyresources corporation with facilities and/or operations in 14 states.

Pioneer covers the energy spectrum. We explore for and produce oil and natural gas both onshore and offshore. Operate rigs for contract drilling. Explore for and mine vanadium and uranium for nuclear power generation. Extract liquids from natural gas. Through other subsidiaries, we manufacture and fabricate oil field equipment and sell it worldwide . . . and sell, service and lease heavy equipment for construction, roadbuilding, aggregate production and surface mining.

Pioneer is committed to producing energy resources now, finding them for the future. In the past five years, \$415 million has been invested in exploration and capital improvements.

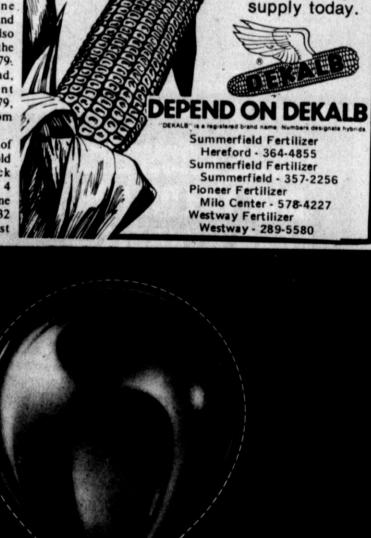

Energy. It's Pioneer's business to find it, to produce it. And we're doing it right here at home to help lessen America's dependence on foreign energy sources. The future is promising, and with your wise use of all our vital energy resources, we will make it.

Want to know more about the corporation some people thought was just a gas utility? Write to us:

Brand Farm Editor

On this day of resurrection, enkindle our hearts with a spark of that new fire of hope that you gave through Your son.

Our Heavenly Father,

14

Grant that in a time when we see each day how great our shortcomings are that we might learn to look a bit deeper for the goodness that is in each of

In a time of trouble and turmoil, help us to learn to tolerate and understand those who are different from ourselves, and lead us toward the realization that no matter what race or creed, each of us is one of your children and that we must learn to live together as brothers and sisters.

Help us to remember, when we feel our own pains are too great, that we were never pierced by nails and left hanging from a cross with the weight of the world on our shoulders to make those cruel spikes tear our flesh... That we have no accusers clamoring for our own blood to atone for their

Let the light and hope that comes with Your only son's resurrection pour into our nation and steady its faltering steps.

Be with the leaders of our land and help us as a people to return our nation to the strength and greatness you saw fit to let us bring forth in a new land that placed its trust in you...Help us in these uncertain times to know that "In God We Trust" is still the key to our land's future. God bless

Guide the people of the land, those who make their living from the soil, and be with them in this time that is full of worry and despair.

Plant the seeds of hope once more within the farmlands, and grant that this work and these people, both so close to you, may yield a fruitful harvest for your glory.

TURN

This is the Sunday on which every kid has been slickered up at least one time in his life.

The ritual starts before Easter Sunday with a pronouncement that a new Easter dress or suit or pair of shoes is in order.

It has grown more profuse and pronounced, if anything, over the years, yet the two hour span of prim and proper that is dictated by the attire on this day probably isn't a bit more bearable for the kids now than it was at any time in the past.

Something about brand new store-bought clothes that spooks me a little, even now.

They're just too darned dandy to wear...What with all that fanciness, you just can't help knowing you're going to do something to mess them up.

I still remember the tragic mistake somebody made one time when I was a kid, taking me to a formal dinner all dressed up in my new suit.

Wasn't I the dandy with the mashed potatoes and gravy gracing my lapels?

What about the time I put ripe cherries in the pocket of my new white shirt while over at grandma's?...At least a soaking in milk cleaned up that little matter.

Ah, but the Easter ritual must be followed. The dressing to the nines, finally the coming home and the endless round of photography which must be endured before the "younger set" can shuck all this grandeur for "plain old everyday" and kidly things that are uncluttered by too much finery.

... About time to "30" this one, I guess. My wife's hollering at me...Something about "get in here and get your new Easter suit on...And try not to spill gravy on it during dinner."

Gee, I hope that crazy uncle will give us a break and not come slinking around with his camera and new light meter this year!

Miss West is Delegate ToWashington 4-H Meet

Alcohol Fuel Seminar

Scheduled for Clovis

Columbia, Puerto Rico, the Virgin Islands and Guam will be represented at the Washington conference, which will follow the theme, "4-H--Expanding Horizons."

Delegates to the conference will divide into groups to discuss 12 contemporary topics of interest to 4-H members throughout the

celebration of the conference. and Agriculture Secretary Bob Bergland will participate in one of the special events. speaking on "Youth and the Structure of American Agriculture and Rural Life."

Special events are set to

mark the golden anniversary

Bergland will make his address April 15 at 9 a.m. in the Jefferson Auditorium of the USDA's South Building.

A total of 500 alumni delegates to national 4-H conferences of past years will also be on hand. Many former delegates are now successful farmers, business leaders, educators and public officials.

The alumni will join this year's delegates in special festivities April 13 of the conference week.

The first national 4-H conference was held in Washington in June of 1927 and was called "National 4-H Camp."

Participants in that gathering were housed in tents on USDA grounds.

The camps were continued until World War II, when they were suspended for three years.

The National 4-H Center was dedicated in Washington in June, 1959, and the annual meeting has been held there since that time.

The conference is conducted under the leadership of the Science and Education Administration, the cooperative Extension Services at the nation's land-grant universities and the National 4-H Council, a private organization that channels private support to the 4-H youth program and is responsible for the National 4-H Center.

Miss West is among seven delegates from Texas who will attend the conference.

She was selected for the honor after submitting an application through the state 4-H office.

Delegates to the conference are selected on the basis of leadership, citizenship, projects and accomplishments.

Miss West attended the National 4-H Congress after winning the state record book competition in clothing in 1976.

She received a \$500 scholarship as the winner of the state 4-H Food Show in 1979 .

Miss West has also attended the State Method Demonstration Contest and the state 4-H Dress Revue.

The county's Gold Star 4-H girl in 1979, she also served on the Texas 4-H Council in

million dollars out in the field That's the amazing figure some scientists have come up with during a special study on energy alternatives. First, some basics. All oil products come from cellulose materials. Plants, especially plant stalks, are largely cellulose. There are a lot of stalks left in the field. Testing the fuel efficiency of this farm residue was the industrial giant, General Motors. Their engineers used a mixture of 10 percent cornstalks for boiler fuel and said the results indicated successful applications of as high as 60 percent cornstalks could be used to fire the boilers. determinations made on the basis of the current value of coal indicate that those stalks particularly high in cellulose content could be worth as much as 20 dollars a ton. Ag officials say the amount of stalks available each year would total as high as 450-million tons.

AMPI President Lauds Milk Support Increase

"The increase in milk price supports announced and effective April 1 are a constructive step toward minimizing long-run consumer costs for milk and dairy products," according to Irvin J. Elkin, Amery, Wisconsin. Elkin is a dairy farmer and president of Associated Milk Producers, Inc., the nation's largest milk marketing cooperative.

"While the quantity of milk being produced today is adequate to meet today's needs, it is essential that milk prices reflect the added costs of production and living expenses brought about by the inflation pervading the remainder of the economy." stated. secretary's decision does just that. He increased the price goal for milk testing 3.5 percent butterfat from \$11.22 per hundredweight to \$12.07. or 11.63 cents per gallon, which was the minimum increase provided by law to compensate farmers for

increases in prices for all of

the things farmers buy." "It is important to consumers for milk price floors to move up with inflation. The find telling evidence of this, one only has to look back to 1977 when an increase in milk price supports prevented dairy product prices from falling ' drastically. Without the price floor, many more cows would have been sold for slaughter in 1977 and early 1978. By mid-year 1978, dairy products were in short supply. Consumer prices soared far above support levels, and were prevented from going even further upward by the USDA stocks of dairy products moving back into commercial channels as prices exceeded 110 percent of the price

the 1977 floor price." "The price support program has served consumers well. While the consumer prices increased 13.3 percent in 1979 -- milk increased only 11 percent and cheese only 9.8 percent. At the same time gasoline was up 52.2 percent and the recently de-regulated air fares increased 30 percent. The fact that dairy prices have increased less than all consumer items is due largely to the stability provided through the price

support level. The 1978-79

price increases were subdued

SBA Disaster Loan Deadline Is April 10

LUBBOCK - William E. Glennon, branch manager of the disaster loan office of the Small Business Administration in Lubbock has announced that farmers, ranchers and people in agricultural-related businesses who might be eligible for disaster loans under SBA Disaster Declaration #1708. must file their applications for these loans by April 10, 1980, for physical losses on crops and by July 10, 1980, for economic injury losses on business.

Disaster Declaration #1708 covers Deaf Smith, Parmer, Castro, Swisher, Briscoe, Lamb, Hale, Floyd, Cochran, Hockley, Yoakum, Gaines, Dawson, Martin, and Upton Counties and the counties adjacent to them.

Applications received after these deadline dates will not be accepted.

More information on Disaster #1708 can be obtained by calling the Lubbock Disaster Office toll free 1-800-692-4296.

Increasing Operating Efficiency Still Remains As Primary Challenge Facing Nation's Farmers

More people, less land, scarce inputs and inflation mean farmers will have to be more efficient in the future.

That's what some of the nation's top corn and sorghum producers heard at the 1979 DeKalb Yieldmasters meeting, held recently in Chicago.

Kent Schulze, domestic seed division manager for DeKalb AgResearch, Inc., told the group, "You will have to become more efficient. Whether it's bigger equipment for less cost per acre or more land to support larger equipment, it doesn't matter. It's all wrapped up in more efficient."

Farmers may suddenly find the inputs they've used to grow top yields will be restricted by inflation, the energy crunch and government, Schulze told the gathering.

Effects will be seen in fuel for irrigation and tillage, in energy for making ammonia and pesticides and in energy used to transport farm products to markets, the seed executive pointed out.

At the same time these occurrences take place.

sioner Reagan V. Brown.

dimension of strength to the staff and is guiding it toward greater production, editorial content and increased sales. Under his direction. The Cattleman will continue its leadership in the beef publication field."

Before being appointed acting editor. Segraves served five years as field representative for the magazine, servicing advertising accounts for purebred breeders of Brahman, Simmental beef cattle.

A native of Era, in North Texas. Segraves is a 1971 graduate of Texas Tech University with a bachelor of science degree in range management.

John Paclik of the Soil Conservation Service office here is shown unloading eastern red cedar seedlings that arrived at the SCS office Thursday afternoon. The Tierra Blanca Soil and Water Conservation District recently took orders for the seedlings, which are to be planted in windbreaks throughout the county. SCS personnel reported hefty orders for windbreak seedlings this year

with over 5,000 trees to be planted when delivery is made on all the orders. Those who had ordered trees were being contacted Friday to pick up their seedlings and encouraged to get them transplanted as quickly as possible. The Hereford SCS office has information on correct tree planting and culture techniques for those in need of advice. [Brand photo by Jim Steiert]

Cankerworms Hit Trees This Spring

COLLEGE STATION .. silken threads, explains Remember the tiny little worms that devoured the leaves of oaks, elms and other trees early last spring over much of Texas? Well, they are back again this

spring. Adult moths of the tiny worms have been found in parts of South Central Texas and other locations. This is a signal of infestations by the leaf-eating worms this spring and should warn us to be on the lookout and to take action if necessary, points out Dr. Phil Hamman, entomologist with the Texas Agricultural Extension Service, Texas A&M University System.

Cankerworms are about an inch long and are slender, They vary in color from light brown to nearly black and from green to brown. The worms feed on buds and

unfolding leaves. Cankerworms are also inchworms or measuring worms because of their spanning or measuring action as they move about. They move from branch to branch or drop from trees on

Hamman. When disturbed, they may stand nearly erect and remain motionless. resembling small twigs. What can be done to control

this cantankerous pest? One method of control is to

band tree trunks with a sticky material such as tanglefoot since female moths must climb tree trunks to lay their eggs. This might be effective in northern areas of the state where egg-laying has not yet started. Place a 3-to-4-inch wide strip around the trunk about 4 feet from the ground, suggests the entomologist.

While this method offers some control, spraying a tree with a residual insecticide soon after worms become active is the surest control practice, points out Hamman. He recommends spraying only those trees where foliage damage is evident and worms are present. Give particular attention to newly transplanted trees, special landscape trees and fruit or

Insecticides registered for controlling cankerworms include malathion, carbaryl (Sevin). Orthene and methoxychlor. A biological insecticide called Bacillus thuringiensis (Dipel, Bactur) is also effective and is nontoxic to humans, pets or wildlife. After using a biological insecticide, worms should stop feeding on

live for about three days. A key to whether or not to spray for cankerworms is the condition of the trees involved, emphasizes Hamman. Trees in good condition and not under stress due to drought, disease and insect

Vandals Plague REC Facilities

Problems of recurring vandalism to distribution system equipment are being reported by officials of the Deaf Smith Rural Electric Cooperative.

REC spokesmen report that a substation transformer was the most recent victim of vandalism which occurred March 14.

The transformer, located on Deaf Smith REC lines on FM Road 1731 ten miles west of Friona, was shot with a high-power rifle, causing oil to leak out and resulting in a short that caused the transformer to burn up.

The transformer, valued at \$70,000, serves approximately 584 rural homes, farms and businesses in the Rhea community and other areas of Parmer County.

REC officials added that a few months ago three insulators were shot south of Friona, resulting in outage time, replacement labor and material costs in excess of

"Individuals don't realize that these costs are paid for out of revenue that would

consumers as capital credit checks. In essence, these vandals are taking from all members of the REC." stated James Hull, manager of the local cooperative.

A STREET OF THE STREET STREET STREET STREET STREET STREET

"Not only should the cost be a consideration, but also the inconvenience to homes, businesses and farms that lose electrical service. Sometimes, if service is not immediately interrupted, the damage isn't noticed until it rains, then the lights go out. This is often the case when you hear it said that everytime we have a rain the lights go out," Hull contin-

The electric co-op official encourages area residents to report suspected vandalism of power distribution facili-

"We ask you to report to the Cooperative office any peculiarities near substations or Cooperative electric lines involving vandalism of any kind," said Hull.

According to Texas law, vandalism of electric utility property is punishable by up to a \$10,000 fine and otherwise be returned to our imprisonment for 10 years.

Tomato Culture **Tips Offered**

COLLEGE STATION ... Growing a few tomato plants can be a fascinating and rewarding venture, or it can be frustrating.

If you're growing tomatoes for the first time, a few pointers can help you avoid some common pitfalls, says Dr. Sam Cotner, horticulturist with the Texas Agricultural Extension Service, Texas A&M University System.

First, don't grow tomatoes unless you have an area that receives sunlight for at least six hours during the day.

Next, good soil is a must. Offentimes, garden soil is poor but can be improved with the right amount of . organic matter and fertilizer.

Select a variety of tomatoes with the maximum resistance to common diseases, advises Cotner. Bonus, Big Set, Better Boy, Spring Giant and Floramerica all carry multiple disease resistance to most common diseases.

Buy short, stocky, young plants. Select plants four to six inches tall and about as

If plants are in peat pots or peat blocks, do not remove them, says the horticulturist. Set the plants deeply into the ground with the top of the peat pot or peat material container below the surface. Plant them into wellprepared soil and water thoroughly immediately after transplanting.

When tomatoes start blooming, begin a weekly dust or spray program to prevent insects and diseases that are common in Texas gardens.

Stake, trellis or cage tomato plants for best results, adds Cotner. Any method is good if it keeps fruit off the ground to prevent rotting.

The Fertilizer Institute predicts U.S. farmers will use a record 53 million tons of fertilizer this year.

Jerry Deckard holds his finger in a bullet hole while Larry McNutt prepares equipment as the two employees of the Deaf Smith Electric Cooperative examine damage inflicted by a vandal wielding a high-power rifle at a transformer west of Friona. The transformer was shot with a rifle, causing oil to leak out and resulting in a short that burned up the transformer. Value of the transformer, which served 584 homes, was set at \$70,000.

New NFU Head Desires Meeting With President

DENVER (AP) — Farmers desperate situation," Stone's and ranchers cannot pay letter said. cannot get capital and an "agricultural credit crisis meeting" should be held, a farmers' spokesman said in a letter to President Carter.

The letter by George Stone, who was elected president of the 300,000member National Farmers Union on March 26, said emergency economic action is needed. He said high interest rates are hitting farmers and ranchers particularly hard because they cannot pass on the increases to wholesalers or consumers.

A rollback in interest rates for agriculture, food, housing and small business should be declared by the president. Stone said.

"I am receiving telephone calls every day from farmers and ranchers who are in a

The interest rate increase from 9 percent to 14 percent

levied by the U.S. Agriculture Department's Farmers Home Administration will "bankrupt thousands of young farmers and smaller farmers," he

Stone said that he wants to talk to the president about having federal lending agencies declare a moratorium until Oct. 1 on collecting loans from farmers and ranchers who have demonstrated they need emergency assistance.

He also suggested that the Department of Agriculture lend farmers money equal to up to 50 percent of the value of their project crop yields. The loans would hinge on farmers volunteering to participate in an acreage diversion program whereby some of their land would lie fallow, Stone said.

Meat Production Up

AUSTIN--Total red meat production in Texas was boosted by three percent in January due to higher slaughter rates for hogs, sheep and lambs, according to Agriculture Commissioner Reagan V. Brown.

The increase in output increased despite a lower output of beef and veal during the first month of the year, Brown added.

"The Texas Crop and Livestock Reporting Service indicates that Texas slaughter plants produced 348.2 million

pounds of red meat during January, topping January, 1979 by over 9 million pounds," said Brown. "Statewide, hog slaughter was up by

about 44,000 head, and slaughter of sheep and lambs topped last year by 33,000

Brown noted that most of the increase in meat production came from greater numbers of hogs and sheep slaughtered, rather from increased live weight.

Cost of Farmer's Money Has Jumped 50 Percent

WICHITA, Kan. (AP) -While David Wilson was trying to get his corn and soybeans to grow last year, interest rates were shooting up like weeds.

Now Wilson, thousands of American farmers, is heading for the bank to borrow money for his spring crop. He dreads the

The cost of money farmers need to borrow to operate has jumped 50 percent in the past year. And farmers are borrowing more — fuel and fertilizer costs have risen 30 percent to 50 percent while crop and cattle prices remain

From now until fall, Wilson will borrow \$13,000 a month for seed, fertilizer, fuel, machinery repairs and food for his table.

Will he make any money?

"All we're hoping for now is to hold our losses down enough to borrow money for next year and hope for better prices then," Wilson says. We'll have to have better prices just to get back where we started."

Interest rates at banks in rural America have risen to about 17 percent, a spot check indicates. That's less than the 19-plus percent prime rate but still a hefty jump from the 10 and 11 percent available just a year

"Farmers are not just crying wolf," says Roy Frederick, an extension economist at Kansas State University. "There really is a serious problem out there. This is the time of year when requests for operating money is at its zenith."

"The average farmer will have to borrow way, way more than, say, a hardware store owner," says Bruce Frost of the Production Credit Association in Salina. "And the farmer can't raise the price he gets for his product."

Wilson's loan, from a PCA, contains an escalator clause based on the prime rate and the interest he pays has risen from 10 percent to about 14 percent. He already owes the bank a third more than he did last year at the start of planting. He borrowed \$27,000 for fertilizer and chemicals in December, hoping to escape price increases.

Wilson farms about 900 acres near Osawatomie and grazes 300 head of cattle on 700 acres. For nearly 20 of his 39 years, he said he has fought to get ahead to avoid the constant borrowing, but his profit margins have been so slim that he's been forced to enlarge and increase his volume so those margins will

MOTORS TO LOAN

pay him a living.
The U.S. Agriculture Department says preliminary figures for Jan. 1, 1980, indicated farm indebtedness rose 18 percent from a year before to \$161 billion. Farmers have relied more on borrowed money to operate their farms as production costs have outpaced market prices.

The USDA announced Tuesday that about half of a 52 billion federal loan program to help farmers is being made available by the Farmers Home Administration. Under a law signed by President Carter on Sunday, the program ceiling in the Emergency Agriculture Credit Act was raised \$2 billion to \$6 billion. The rest of the new funds will be held for emergencies and future needs.

Pork demand has surpassed most expectations. Only six percent more pork was stored last fall, with slaughter running one-third ahead of a year earlier.

alkali-treated gin trash produces daily gains of 1.52 pounds while the untreated gin trash produces daily gains of 1.36 pounds." Daniel L. Arndt, who

studied gin trash roughages as a part of his doctoral dissertation, said alkali treatment of cotton trash is not a widely accepted practice in West Texas. although it is used extensively in other parts of the country, such as the Florida Panhandle.

"The results of my work, however, should encourage the beef cattle industry in this part of the country to take a close look at alkali treatment of cotton gin trash," he said.

Arndt used the alkali. sodium hydroxide, and applied it as eight pounds of 50 percent solution per 96 pounds of dry cotton gin

"Alkali treatment, besides increasing daily gains, also increases net energy of maintenance by nine percent and net energy of gain by 16 percent," he said.

The digestibility studies were conducted over a 112-day period with 120 straight bred Herefords. The research was done at Texas Tech's Northeast Lubbock County Field Laboratories near New Deal.

The graduate student

Foley Urges Action **Over Surplus**

WASHINGTON (AP) Rep. Thomas Foley, D-Wash., chairman of the House Agriculture Committee, said today he has urged the Carter administration to take stronger action to buy grain surpluses caused by President Carter's embargo of shipments to the Soviet Union.

asked the Foley Agriculture Department "to move more directly and effectively to strengthen prices at the local level by purchasing grain in local areas at pre-announced prices" to help boost local markets.

The department recently began buying wheat and corn, mainly from country elevators that submit bids to USDA, which then buys the grain at prices it considers fair. Many of the bids, however, have been rejected because the asking prices were too high.

Agriculture Secretary Bob. Bergland said earlier this week that if elevators do not begin submitting offers for more grain at realistic prices. he will ask farmers to sell grain directly to the government at prices posted at county offices of the department's Agricultural Stabilization and Conservation Service.

compared four alkali treatments with untreated gin trash to determine the best treatment.

The four treatments were: 1) equal amounts of ground gin trash and alkali-treated ground gin trash; 2) treatment number one with 200 milligrams of Rumensen fed per head per day; 3) equal amounts of pelleted gin trash and alkali-treated pelleted gin trash; and 4) treatment number three with 200 mgs of Rumensen fed per head per day.

"The four alkali treatments and the one non-treat-

He is the author of several publications and scientific journal articles and hundreds of popular articles on livestock production and marketing.

Cutback Plans Preceded Embargo

AUSTIN-Farmer intentions for the 1980 growing season show that they already had plans to decrease their acreage in major field crops, except corn and grain sorghum, before the Soviet grain embargo was instituted. Agriculture Commissioner Reagan V. Brown has reported

The Texas Crop and Livestock Reporting Service released the annual January I report on preliminary. planting plans for state farmers this week.

Corn growers surveyed indicated that their acreage would be up 21 percent above 1979, "With the embargo on Russian exports and the

in the U.S., that percentage will probably not hold up," Sorghum acreage is forecast to be up slightly over last year with a total of 5,200,000. With the near-record crop

supplies that will be available

in cotton last year, plantings in 1980 are expected to be down one percent at 7.6 million acres. Other crops which are expected to have decreased

acreage are barley, 100,000; flaxseed. 4,000; oats. 1,500,000; rice 545,000, and soybeans, 850,000. Sunflower acreage showed

a high increase of 87 percent. Farmers indicate planted acreage of 187,000.

Greenbugs, Winterkill Hamper Panhandle Wheat

COLLEGE STATION, Texas (AP) - Corn, sorghum and

cotton planting is virtually complete over South Texas and is at the 95 percent mark in the Coastal Bend, said Dr. Daniel C. Pfannstiel, director of the Texas Agricultural Extension Service, in his weekly crop report.

Sorghum, corn, cotton and rice planting has been active in the Upper Gulf Coast area where field conditions permit, and cotton and sorghum planting increased over South Central Texas. Some corn and sorghum is also being planted in eastern sections, and planting continues in North Central Texas. Corn planting is just starting in the High Plains.

Land preparation continues throughout the Plains and West Texas, with preplant irrigation in full swing. Soil

Umstead REALTOR

Bob Fenley

REAL ESTATE OFFICE: 364-5501 moisture is short throughout these areas, and high winds continue to cause a lot of blowing sand, Pfannstiel

Soil temperatures are cool over the state, according to National Weather Service data, and are delaying seed germination. Temperatures at the four-inch depth the past week as follows: South Texas, high 60s and 70s; Rice belt, low 60s; Central and East Texas, near 60; North Texas, upper 50s; Trans Pecos, upper 50s; West Texas, mid-60s; Rolling Plains, upper 50s; and Panhandle and South Plains,

Planting of sugar beets, onions and potatoes continues in the High Plains while spring vegetable crops are doing well in the Rio Grande Valley. Watermelon planting is virtually complete in the Valley as are the citrus and sugar cane harvests. Strawberries are being harvested in the Poteet area of Atascosa County.

Grazing continues to improve over the eastern half of Texas with good moisture. but is short in West and South Texas where supplemental feeding remains heavy, Pfannstiel said.

Extension agents showed the following conditions.

PANHANDLE - Most counties remain dry. Dry conditions, winterkill and greenbugs are hampering the wheat crop. Corn planting has started while sugar beet planting is nearly half done. Potatoes and onions have been planted in Deaf Smith County. Cattle feeding continues active; some winter grasses are growing well.

SOUTH PLAINS - Dry conditions continue. Farmers are preparing for spring planting; preplant irrigation is active. Corn planting has started in northern counties. and sugar beet planting continues in Castro County. Onion planting remains active. Ranges are blow average due to dryness. Wind erosion has been high.

ROLLING PLAINS Dryness continues to hamper small grains, pastures and ranges. Livestock remain in fair to good shape, with grazing improving. Some supplemental feeding continues. Farmers are preparing to plant cotton: some are plowing under wheat to plant cotton. Irrigated alfalfa is growing well.

NORTH CENTRAL - Soil moisture remains short. Recent rains should boost

SHOWCASE

small grains, pastures and ranges. Corn and sorghum planting continue, and ranchers are planting and fertilizing pastures. Cattle are in good shape, with calving in full swing.

NORTHEAST - Soil

moisture is adequate. Some corn and sorghum planting is under way, and ranchers are fertilizing hay crops. Wheat continues to do well. Cattle have good grazing. Calving is heavy but there is little

Futures and Farmers

Futures Provide Historical Stability

You've seen it nearly every time there is some major news about grain: the TV news programs show footage of traders the Chicago Board of Trade. Shouting and gesturing erratically, the traders might seem more like wildeyed demonstrators than respectable businessmen. It looks so chaotic.

Yet those traders are actually engaged in some of the Chicago Board of Trade's time-honored business practices, which replaced the real chaos that existed in grain marketing before the exchange was set up in 1848. says Dr. Lloyd Besant, director of the CBT education department.

The traders are shouting because they are required to offer to buy and sell all futures contracts in open outcry, by a rule dating to the earliest days of the exchange," Besant says. "There is no central auctioneer. So all traders, representing thousands of market participants, have an equal chance to conduct business in an open, free market.

"And that gesturing actually is a market language all its own. Different hand signals represent whether the trader is offering to buy or sell, the number of contracts he's offering and the price he wants. This system contributes to liquidity in the market and enables the exchange to quickly reflect upto-the-minute changes in the supply and demand situation in commodities.'

The Chicago Board of Trade was created in the mid-19th Century to bring order to the feast-and-famine grain marketing situation of the time, Besant explains.

"By the 1840's, Chicago had become the hub of one

of the richest and largest grain-producing regions in the world. In the fall, an influx of farmers would converge on Chicago to sell their grain to merchants - sometimes the loaded carts stretched for miles into the city. With the harvest time glut, grain prices plummeted. Sometimes prices went so low that some farmers dumped their grain into Lake Michigan in anger," Besant

"By spring, however, there were often shortages. The price of bread could triple between October and February.'

Chicago clearly needed a large, liquid, year-round market for the bounty of the prairie, Besant says. To provide that marketplace, 82 Chicago businessmen established the CBT in 1848.

"The Board of Trade's first quarters were above a feedstore. The new marketplace brought order to grain merchandising. Surplus grain in the fall now was stored, to be marketed later. The membership association also worked to improve the grain transportation system, to promote favorable trade laws and to standardize grain quality and delivery procedures," Besant says.

From those early years to the present, the Board of Trade's history has sometimes been stormy and other times sleepy, he notes.

The Chicago fire of 1871 destroyed some exchange records, but it is clear that by that time, the practice of futures trading had developed out of forward contracting in grain. For more information on

the futures market, write to: Chicago Board of Trade, Dept. FSI, 141 West Jackson Blvd., Chicago, Ill. 60604.

FAR WEST - Dry, windy conditions continue. Farmers are busy with land preparation and preplant irrigation. Ranchers continue to feed livestock due to poor forage. Fruit trees are blooming and pecan trees are starting to

WEST CENTRAL - Most counties remain dry. Small grains benefitted from some rains last week. Recent cold took a heavy toll of small grains. Land preparation continues for cotton and sorghum. Livestock are in fair shape, with supplemental feeding. CENTRAL - Some coun-

ties remain dry. Recent rains should benefit small grains, young crops and pastures. Corn and small grains are recovering from freeze damage suffered in early March. Sorghum planting continues. EAST - Recent rains

boosted soil moisture to surplus levels. Corn planting is active; some early planting feeding continues, and dry-

will have to be redone due to heavy rains. Winter pastures provide good grazing, bermudagrass pastures are starting to green up. Peach trees are blooming. Livestock are in good shape; marketing was limited, with prices

SOUTHEAST AND UP-PER GULF COAST - Wet conditions are showing spring planting. Early planting and spring gardens are slowed by cool, wet conditions. Pecan trees are in the bud-break stage. Livestock are in good shape. Calving is heavy but marketing is slow.

SOUTH CENTRAL -Recent heavy rains have stalled planting. Corn, cotton and sorghum planting is resuming as fields conditions permit. Most peach trees have bloomed and pecan are in the bud-break stage. Livestock are in good shape, with marketing dropping.

SOUTHWEST - The area is dry, dry, dry. Livestock

land crops have not planted. Strawberry harvesting is under way in the Poteet area of Atascosa County. Buds are swelling on pecan trees.

COAST BEND - Rains should boost young crops. pastures and ranges. Cotton, corn and sorghum plant is 95 percent complete, and 75 percent of the rice is in. Watermelons and cucumbers are doing well in gardens and pecan trees are in the bud-break stage. Livestock remain fair, with markets down.

SOUTH - Cotton planting is complete and only a few fields of corn and sorghum remain to be planted. Watermelon planting is in the final stages. Spring vegetables are doing well while cabbage and carrots remain in good supply. Some early onions are being harvested. Citrus harvesting is nearing completion. Cattle are good to poor, depending on forage. Supplemental feeding remains widespread.

No Relief is in Sight For Cattle, Hog Markets

WASHINGTON (AP) - A new analysis by the Agriculture Department shows that cattle and hog producers still have some way to go before striking it

Market prices lately have been below year-earlier levels, and USDA experts say

no large-scale price boom is in sight.

Although beef supplies have been smaller than a year earlier, the margin is narrowing. Also, supplies of pork and poultry are huge and are expected to continue that way for some time.

Market prices of U.S. Choice-grade steers by late March were down \$5 per 100° pounds from a year ago and og prices were down almost \$15 per 100 pounds, the department's Economics, Statistics and Cooperatives Service said Tuesday.

Moreover, the figures showed little chance of the situation for cattle feeders and hog producers improving much in the near future.

In fact, livestock prices are

expected to be substantially report projected market under the agency forecast prices for the third quarter of issued less than two months this year - steers at \$69 to \$73 and hogs at \$37 to \$40 At that time, prices of per 100 pounds, somewhat Choice-grade steers in the better than in the second but first quarter were indicated far from a big boost.

in a range of \$66 to \$68 per The report 100 pounds and hogs at \$37 "Livestock prices have to \$39 per 100 pounds. decreased because of large total red meat and poultry As it turned out, the new report said, steers averaged production and a weakening \$66.90 or within the earlier general economy." range forecast, and hogs at

Pork output by the nation's packing houses was up 21 100 pounds, which was less percent from a year earlier in the first quarter and is expected to remain at nearrecord levels for much of 1980, it said.

> "Low fed-cattle prices and uncertain future price expectations have made cattle feeders reluctant to sell cattle they have in feedlots and purchase replacement feeder cattle," the report said.

> As a result of slow sales of cattle from feedlots, the animals have put on more weight, thus adding to the beef supply and putting further pressure on prices when the animals are sold for

For the first time, the new **Bergland Pledges** Immediate Funding

WASHINGTON (AP) -Agriculture Secretary Bob Bergland says about half of a \$2 billion federal loan program to help hardpressed farmers is being made available for use right away by the Farmers Home Administration.

major markets, \$36.35 per

than the predicted range.

Looking at the second

quarter, the agency on Feb.

12 forecast steer prices - the

Omaha, Neb., market is used

as a guide — at \$71 to \$75

per 100 pounds, indicating a

substantial improvement in

market prices was expected.

quarter were forecast then at remaining about level at \$37

to \$39 per 100 pounds.

Hog prices in the second

But now, the new report

said, steers are expected to

range between \$68 and \$72 in

the second quarter and hogs,

\$34 to \$37 per 100 pounds.

Congress last week extended the economic emergency farm loan program until Sept. 30, 1981. It was due to expire May 15." President Carter signed the

extension into law Sunday. Bergland said Tuesday all of the \$4 billion Congress had authorized in the Emergency Agriculture Credit Act of 1978 has been obligated by FmHA, an agency of the

Agriculture Department.

The new law raised the program ceiling to \$6 billion, thus making an additional \$2 billion in direct or guaranteed loans available.

Bergland said the FmHA will allocate about half of the additional funds to state offices and then hold the balance "for emergency and future needs" through Sept.

An applicant for a loan of \$300,000 or more must have letters "from at least two private lenders explaining why they rejected the loan request" of the farmer seeking help from FmHA, Bergland said.

"Screwworms are parasitic larvae of a blowfly species that feed on the healthy flesh of warmblooded anin als." the agency said. "Infestations begin when the female screwworm fly lavs eggs next to an open, untreated wound. The larvae hatch, enter the wound and feed until they emerge."

'Round The Corner

Two of the individuals helping with proceedings at the annual spring production sale at the Conkwright Ranch north of Hereford haze a bull around the corner in corrals behind the sale barn and head the animal toward a cattle handling area and an eventual appointment with a buyer. It was

a busy afternoon for cattle handlers and sorters as the auctioneers kept up a rapid pace that sent registered Hereford cattle to livestock operations in Texas and surrounding states. [Brand photo by Jim Steiert]

Cotton Quota is Set Up

WASHINGTON (AP) - As required by farm law, President Carter has set up a special 90-day quota that allows about 500,000 bales of foreign upland cotton to be imported by U.S. textile

The existing quota allows imports to total only about 43,000 bales a year.

But under the Food and Agriculture Act of 1977, the president is required to establish a special import quota whenever the average spot price of cotton for one month exceeds a price level specified by a formula.

Cotton prices rose above the specified level in February, thus forcing Carter to act. The 90-day quota period begins April 3 and ends July 2.

According to the Agrpculture Department, the special quota of about 500,000 bales - some 244 million pounds — represents

364-7640

the equivalent of a threeweeks supply for U.S. textile mills.

The special quota is effective for 90 days, but officials said if the average price still is higher than the trigger level at the end of the period, another quota must be proclaimed.

In a related development, USDA said Tuesday a U.S. cotton trade mission will visit the Far East later this month to discuss the cotton supply situation and help drum up business for American producers.

The team was scheduled to be in Manila, the Philippines, April 16-20; Jakarta, Indonesia, April 20-23; and Taipai, Taiwan, April 23-26. Members include: David

Brandon, Memphis, Tenn., and Walter Locker, Dallas, Texas, representing the American Cotton Shippers Association; Jerry Calvani, Carlsbad, N.M., the

REQUEST FOR PROPOSAL EMPLOYMENT TESTING.

EVALUATION AND COUNSELING PROGRAM The Panhandle Regional Planning Commission, acting as the Administrative Unit for the Texas Panhandle Employment and Training Alliance, is accepting proposals for an Employment Testing. Evaluation and Counseling Program for CETA partici-

pants. The designated purposes of the program are: (1) The development of a testing and evaluation system which can produce an accurate measure of the job-readiness of individuals; (2) predict, with a high degree of accuracy, the probability of success of an individual in any particular occupation; (3) the development of a training and counseling program which will teach employment and life-survival skills to individual participants; and (4) produce functional, jobready participants for the

labor market. The focus of this program is to be directed toward CETA participants who have a work history of hard-core unemployment or are considered to be potential dropouts. The program should be operational October 1, 1980 to September 30,

Eligible applicants of this program will include agencies with the knowledge and capabilities for developing and delivering the described system; which exhibit sound fiscal management practices; and which have demonstrated an effectiveness in reaching and relating to those types of individuals described as the target group

Proposals must be submitted to James Barrington, handle Regional Planning Commission, P.O. Box 9257. Suite 730, Amarillo Building, Third and Polk Streets, Amarillo, Texas 79105, by 5:00 p.m. on Monday, May 12, 1980. Application packages may be requested from

the address listed above.

197-3c THE STATE OF TEXAS TO: HEREFORD CHURCH OF GOD, its members, deacons, officers, pastors, representatives, successors and/or agents, and any and ... all persons or entities. claiming any title or interest n land under deeds heretofore given to the Board of Deacons of the Hereford Church of God and the Hereford Church of God of Deaf Smith County, Texas,

Defendants, Greeting:

You are hereby commanded to appear before the Honorable 222nd District Court of Deaf Smith County at the Court House thereof, in Hereford, Texas, at or before 10 o'clock A.M. of the first Monday next after the expiration of forty-two days from the date of the issuance of this citation, same being the 28th day of April, A.D., 1980, then and there to answer Plaintiffs' Petition filed in said Court, on the 14th day of March, A.D., 1980, in this cause, numbered DC 9391 on the docket of said court and styled Ivagene Elliston, ET AL. Plaintiffs, vs. HEREFORD CHURCH OF GOD, ET AL,

follows, to-wit: Plaintiffs sue. to cancel and set aside one deed conveying fee simple interest in property under warranty deed from R.W. Elliston, as grantor, to The Hereford Church of God, as. grantee, dated December 18, 1978, recorded in volume. 309, page 78, Deed Records of Deaf Smith County, Texas. covering the following property:

Lot 1, Block 11, Engler Addition to the Town of Hereford, Deaf Smith County. Texas:

and Plaintiffs sue to remove the cloud on title cast by conveyance of a remainder interest to Defendants by warranty deed from R.W. Elliston dated October 17,

Defendants. A brief statement of the nature of this suit is as

114 E. Park

1978, recorded in volume 308, page 200, Deed Records of Deaf Smith County. Texas. covering the following pro-

TRACT 1. All of Lot 7, Block 3. Irvings Subdivision of the West 1/2 of Block 4. Evant's Addition to the Town of Hereford, Deaf Smith Countv. Texas, and

Judaism Still Struggling For Biblical Human Rights

By GEORGE W. CORNELL **AP Religion Writer**

NEW YORK (AP) - In a time of religious oppressions in many lands, of terrorist assaults, seizures of hostages and captivities, Judaism is celebrating humanity's first bid for freedom and God's confirmation of it.

"For with a strong hand ... the Lord your God brought you out of Egypt, out of the house of bondage," Scripture describes that ancient origin of emancipation from tyranny and enslavement.

The struggle for those biblically affirmed human rights still goes on as Jews around the world observe Passover, the season of liberation, considered as vital now as of old.

"The struggle for liberty is never over," says Richard Maass, president of the American Jewish Committee, citing the plight of the American hostages in Iran and religious oppression in Afghanistan and the Soviet Union.

But the week-long which began Passover. Monday night with ceremonial seders in Jewish

homes and recitations of the age-old story of escape from the bonds of Egypt's Pharoah, signifies unending hope in the quest for human rights.

"It is a classic example of struggle against odds - and how faith in a cause can surmount insuperable obstacles." Maass says.

"Let my people go!" Moses demanded, and the account says that through God's miraculous intervention they got away.

The observance coincides this year - as was originally the case - with Christian Holy Week, marking the final days of Christ, his crucifixion and resurrection, which Christians celebrate this Sunday.

Both observances are celebrations of redemption, the Passover of victory over enslavement, Easter of triumph over evil and death.

"Praise the Lord!" go the Psalms sung at those Passover seders, paralleling the Easter mood. "For thou has delivered my soul from death, my eyes from tears ... O give thanks to the Lord ... his steadfast love endures forever...

That theme of deliverance also echoes in the renewal of Easter and its promise to humanity.

"I am the resurrection and the life," he said. "In the world you have tribulation; but be of good cheer, I have overcome the world."

Just as Easter signals ultimate release from the epitome of destructive forces, from death itself, so Passover symbolizs redemption from all sorts of shackles on humanity. physical and spiritual.

The occasion should spur "to free Americans themselves from the materialism that holds them in thralldom," says Rabbi Bernard Rosensweig, president of the Rabbinical Council of America.

HEALTH

Lawrence E. Lamb, M.D.

Bad breath cure?

DEAR DR. LAMB - My problem is halitosis. I had my tonsils and adenoids taken out by one doctor and have seen dentists galore. And then one doctor took an interest in my problem and put me in the hospital and ran all kinds of tests. In one test they inserted a tube into my nose and down my throat and it revealed that

I didn't produce enough gas-tric acid to digest my food. He prescribed a liquid eyedropper type medication. I put two or four drops in a glass of water and took it with meals. It helped immensely but gave me a burning sensation in my throat. I stopped taking it for awhile and since then my doctor has passed away. The druggist won't give it to me without a prescrip-

I was wondering if you know the name of the medication and if I can find it in a tablet form, possibly in a health food store since it was some kind of acid. I'm 33 and have lived with this problem all my life. I just can't face all those tests and embarrassment again with another doctor

DEAR READER - If you've read my previous columns on breath problems, you'll know that this is a symptom. It can be caused by dental problems that require dental treatment so you were wise to see a dentist. It can be caused by sinus infections and that's why people sometimes get relief from the problem with treatments from ear, nose and throat specialists.

Incidentally, it's seldom caused by bad tonsils, although in a very few cases in which there are severely infected tonsils present, it can certainly cause a person to have had breath. The truth is an infection anywhere along the respiratory system can cause the bad odor.

Bad breath can come from a chemical imbalance in the A lot of the odors that cause bad breath come out of the bloodstream and escape into the air sacs in the lungs. They literally come out with the breath from the lungs each time you exhale.

I'm sending you The Health Letter number 9-4, Halitosis: The Breath Problem And What To Do About It. Other readers who want this issue can send 75 cents with a long, stamped, self-addressed envelope for it. Send your request to me, in care of this newspaper, P.O. Box 1551, Radio City Station, New York, NY 10019. It will give you more details on the many causes for bad breath.

Your story sounds like the doctor who treated you thought you had achlorhydria. That means the absence of or a decreased amount of hydrochloric acid in the stomach. That can happen, and the only way you can tell it is by analyzing the amount of acid in

friend.

tube test was all about. A person's stomach normal-

ly forms hydrochloric acid and the drops that he gave you were undoubtedly hydrochloric acid in water. DON'T TRY THIS ON YOUR OWN! Despite your embarrassment, go to a doctor and tell him your story. There are a number of digestive and metabolic disorders that can cause bad breath and all of them require medical treatment. Incidentally, if you do have achlorhy dria it can cause other difficulties. So you really shouldn't overlook the problem.

DEAR DR. LAMB -Recently I had X-rays and they showed that I have nervous colitis and diverticulosis. I'm confused as to the difference between diverticulitis and diverticulosis. Could you help me in a way that average people can understand? My doctor said that diet has nothing to do with this.

DEAR READER — Diver-

ticulosis is a very common problem, particularly in indi-viduals past 50 years of age. They're really little pockets of the colon.

The colon has three layers. The inner layer is the lining of the glandular cells, the middle layer is a muscular tube and the outer layer is the fibrous When you have one small

pocket it's called a diverticulum and it really represents a small rupture through the wall of the colon. The muscular wall separates and the inner lining herniates straight through the wall making a little pocket. It becomes an appendage and some people compare them to having a small appendix on the colon. When one of these becomes inflamed then it's called diverticulitis. The ending 'itis" means inflammation. You see this in the use of the

word appendicitis. I'm sending you The Health Letter number 5-6, Diverticulosis. Other readers who want this issue can send 75 cents with a long, stamped, selfaddressed envelope for it. Send your request to me, in care of this newspaper, P.O. Box 1551, Radio City Station, New York, NY 10019.

Not everyone would agree with the idea that diet doesn't have anything to do with diverticulosis if indeed that's what, your doctor actually said. In the past it was believed that people with diverticulosis should eat a bland diet which didn't include much bulk. In more recent years the pendulum has swung and most doctors feel that patients with diverticulosis will do better if they have an adequate amount of bulk in the diet. One of the better sources of this is bran which contains cereal fiber. DEAR DR. LAMB - My husband and I would like a

the digestive juices formed by few questions answered. If the stomach. That's what the one drinks three pounds of milk, does that person gain three pounds of weight right away? If so, how long does this weight stay with one? Is there any difference between that and putting three pounds in one's pocket and then step-ping on the scales?

> Pounds, fat and calories are not the same thing. Three pounds of milk is about a quart and a half ("A pint's a pound the world around.") If you weigh yourself before you drink it and then drink it and hop on the scales, you will weigh three pounds more than you did before. There is no difference between drinking difference between drinking the milk and hanging it in a milk carton around your neck. All weight is not fat tissue,

however, that may be what's bothering you. Nearly 90 per-cent of the weight of milk is water.

Consequently, if you drink three pounds of milk, 90 per-cent of its weight will be lost as you eliminate the excess water that your body doesn't need, either through perspiration or through the kidneys. Incidentally, you would also gain three pounds of weight immediately if you drank three pounds of water but you wouldn't gain a single ourse. wouldn't gain a single ounce of fat from the act. In the long run, if your body doesn't need the water, it would be eliminated.

Convenience Counts

The Seventh Earl of Cardigan, who led the Charge of the Light Brigade in The Crimean War, got tired of pulling a sweater over his head. Tradi-tion says he designed the sweater jacket with buttons that has carried his name down through history.

DEAR POLLY - I have just finished making several pie crusts and realized there must be hundreds of young housewives who do not know my simple trick for cleaning the bread board. I use the large pull-out one under my counter.

After rolling out dough I hold the board under the cold

POLLY'S PROBLEM

DEAR POLLY - I have adhesive backed paper on

my basement windows and the one above the stove has

turned brown, probably from steam. I have tried removing it but nothing will budge that paper. Any suggestions will be appreciated. — GOLDIE

Pry one corner loose and then give it a jerk. If this does

not work try wetting with warm white vinegar. When

paper is removed use acetone to remove any remaining

DEAR GOLDIE - Try wetting the paper thoroughly.

water and scrub with a soft plastic scrubber until all the flour and dough are off of it. I then scrub it clean with a mild soap and hot water. Work quickly so the board is not too soaked, dry and put in the hot sunshine to bleach and dry. My 16-yearold board looks like new. - MARGARET

DEAR POLLY — Wherever you go — be it a restaurant or any place of entertainment — always be aware of where you would exit should an emergency arise. (Polly's note — Do the same when checking into a hotel or motel.)

With our thermostats turned down and wearing sweaters or robes to keep warmer one can make another addition. Cut the toes off a pair of a child's knee socks and then slip these tubes over the arms. This makes a big difference. If you live alone and do not have the strength to open cer-

tain jars and bottles run hot water into a cup or bowl and place the bottle or jar upside down in it. Allow it to remain for a minute or two and find it will open easily. Debbie wrote about the zipper in her son's coat that did not work after she had washed it. This problem arises when one does not close a zipper before laundering an item. I can

remember when zippers first came into use and I have never had one that did not work. — MRS.G.H.P. DEAR POLLY - Some time ago I washed a jacket that has knitted sleeve bands and collar. Both shrank so that the sleeve bands are very tight and the collar too

small. I wonder if there is anything I can do to bring them back to the right size. — MRS. B.R.M.

DEAR MRS. B.R.M. — The type yarn or thread used for this kitting will have something to do with the success of the following. I have stretched wool hand knitting by putting it in hot white vinegar. In your case do be careful to only put the knitting and not the entire jacket in the vinegar. There is no guarantee but this may be worth a try. - POLLY

DEAR POLLY - When visiting a friend who has a rural mail box near the road do not park your car in front of or too near this box. The mail carrier probably will not deliver the mail if he cannot get his car to the box and you will not be a very welcome guest if you cause this complication. — A.W.C.

DEAR POLLY — To remove the odor from my hands after

chopping onions or preparing garlic, etc. I quickly rinse my hands under running water and then rub them along the chrome spout of the faucet itself. I know this sounds crazy but it works and is so simple. I have been doing it for many years

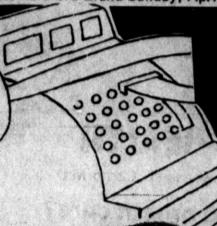

so hope you try it. — KATHLEEN

DEAR POLLY — I clean my toothbrushes in water with a denture cleaning tablet and then use the tablets to clean my

German POW Returns to U.S. to Visit Camp

By DENISE SMITH

Brand Staff Writer Heinz Hohmeyer, 59, of Germany, a World War II Prisoner of War, recently returned to Lufkin, Tex. where he was held by the Allied forces during the early

Upon his arrival in Lufkin. Hohmeyer was greeted with a "Hero's Welcome," prepared for him by an old POW Boss." Also present at the special greeting was the mayor of Lufkin.

Hohmeyer is presently staying with Mr. and Mrs. Homer Garrison of 126 Cherokee. The Garrison's became acquainted with Hohmeyer five years ago during a trip to the Canary Islands, and have kept in touch with each other since.

The POW captured at the age of 19, in December of 1941, taken at the border of Libya and Egypt and transferred to South Africa. The British, keeping him there for a year and a half. later transferred Hohmeyer The state of the s

Mom

to West Africa where he first came acquainted with the American G.l.'s. It was at this time that the American's seized the young soldier and brought him to the United

Traveling in a convoy of ships surrounded by war ships, the POW was first taken to a camp in Huntsville, Tex. in March of 1943. Working on a cotton field at the POW camp. Hohmeyer recalled the long hours of laborous work picking cotton.

"We were a happy sort of people and we wanted or had to survive," stated the German POW

Being one of few prisoners able to speak English, the youth was promoted as crew chief for his fellow POW's. After becoming weary of his crew's production, he was taken to Southern Paper Mill where he worked as a lumberjack. Later the laborer volunteered to become a log checker for the mill.

Having relatives in the

Happy Birthday

Love, Lynette

United States, the POW recalls trying to contact them from the camp.

"I tried several times to contact my family by letters, but the Americans censored the mail and I was never able to," recalled Hohmeyer.

When the war was finished. Hohmeyer was given the opportunity to travel to Washington where he served as a German Documents translater for six months. He was then shipped back to England.

At the end of 1945, the German man was shipped to Antwerp, Belgium. Taken to Scotland for two years. Hohmeyer was given the responsibility of 60 cows.

In 1947, he was discharged to Germany.

"When I came home I found that I had lost all of my property, house, clothes, and even shoes." stated the local

But putting the war behind him, the determined man worked in a bank up until 1950 when he started his own

tobacco business. In the next 25 years, the German became successful in acquiring a chain of tobacco shoppes. In 1972 at the age of 50.

Hohmeyer sold his business. being pleased with his good fortune, and is now "living for the good times."

Taking travels every year to somewhere unusual in the world. Hohmeyer began his recent travels with a trip to Frankfort. Since then he has been to Pakistan, India. Thailand, Taiwan, Japan, Hawaii, San Francisco. Houston, Lufkin and Here-

Unable to speak the languages of the people he met in several different countries, Hohmeyer stated, "In all my travels, where I was unable to speak the language and had no one to translate for me, I could communicate with my eyes. It is amazing how much a person's eyes can say."

Hohmeyer, who resides in Loen, Germany, has circled the globe in three months. This trip to the United States has been the first since he was a prisoner of war in

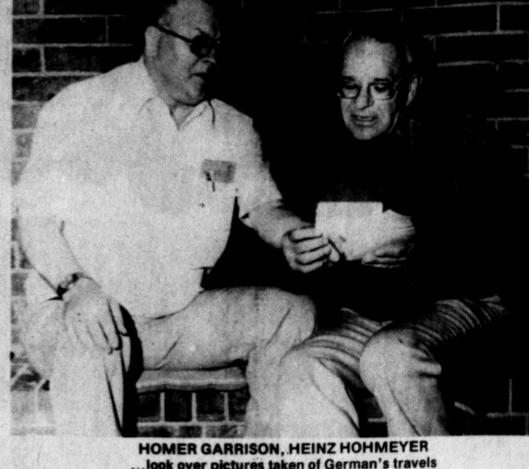

"When I returned to the POW camp in Lufkin, my memory of the camp and its people haunted me. I entered the only remaining barrick of the relic and could remember where everyone had slept. There were 200 of us POW's in that one barrick."

Hohmeyer reflected. Since his stay in Hereford, arriving Wednesday, Garrison has shown him the sights of Hereford. Most impressive to Hohmeyer were the feed lots, and computerized operations, irrigating of "such big fields."

"I had seen cattle feeding lots on German television, but I had never dreamed it was such an enormous size," stated Hohmeyer, adding. "In Europe our tracts of fields are anywhere from 1-5

Hohmeyer will be staying in Hereford until Tuesday, "I promised my wife I'd be home for her birthday." Hohmeyer stated.

Celebrating his 59th birthday Saturday, the Garrison's planned a birthday party for Hohmeyer at the Country

WTSU To Offer Several local residents returned this week from a Scholarships

West Texas State Department of Speech and Theatre has 12 \$200 scholarships available for the 1980-81 academic year.

"These scholarships are for students who will be attending West Texas State University in 1980-81 academic year." said Dr. Ray G. Ewing, associate professor and head of speech and theatre department.

Students who are applying for the scholarship must be majoring in speech communication, mass communications, speech and hearing therapy or theatre."

Ewing also said that to be eligible a student must have average on a scale of 4.0 and a record of participation in speech or theatre activities at the school he or she is attending.

Scholarship application forms may be obtained from. completed and returned to Dr. Ray G. Ewing, chairperson. Department of Speech and Theatre, W.T. Box 275.

Canyon, 79016. Deadline for submitting the applications is Tuesday. April 15. Scholarship winners will be notified by Thursday.

West Texas State University.

Funds for these scholarships are made available by the Friends of Fine Arts.

Mrs. Smith To Change Schedule

Nelda Smith, director of Hereford Community Center, has announced that she is changing her work schedule.

She may be reached at the Community Center from 8:30-11:30 a.m. Monday through Friday. The Community Center phone number is 364-3593. After 11:30. Mrs. Smith may be reached at home, 364-1338. Circus Scheduled

17-day trip through the Southern states, including a three-day cruise to Nassau aboard a luxury ocean liner. Enjoying the Trailways

escorted tour were Ethel Womble, Marlin and Eva Gililland, Jean Ballard, Elizabeth Cesar and official escorts, Robert and Alice Thompson.

Departing from Amarillo, the tour coaches traveled through Dallas toward Vicksburg where a local guide recreated the Civil War seige during a tour of the National Military Park. At Montgomery, Ala., the capital city, the tourists visited the "First White House of the Confederacy." which houses furniture and personal property of Jefferson Davis, as well as

war relics. Edging south into Florida the group visited the Stephen Foster Memorial and the nation's oldest city. St. Augustine, where the Fountain of Youth is located. On the fifth day of their journey. the ftinerary included Kennedy Space Center where points of interest were the Manned Spacecraft Operations building and heavy

transporters weighing six

million pounds. That after-

noon featured a visit to Cypress Gardens for the Water Ski Show and electric boat ride.

An entire day was spent touring Walt Disney World before the travelers boarded Eastern Steamship Company's S/S Emerald Seas for a three-day cruise. The ship docked at Nassau for shopping and visits to Fort Fincastle and Old Fort Charlotte

Arriving back in Miami, the group drove along Miami Beach toward Silver Springs for an excursion in a glass-bottomed boat. Via Tallahassee, the tourists skirted the Gulf Coast for a stop in Mobile, Ala. and a trip down the 35-mile-long Azalea Trail.

On the 13th day of their journey, the travelers visited the meticulously landscaped Bellingrath Gardens. The drive through Gulfport and Bay St. Louis was flanked by masses of magnolias, crepe myrtle, dogwood, roses and azaleas.

In New Orleans, the group visited Notre Dame Seminary, Tulane and Loyola Universities. St. Louis Cathedral and the French Quarter. The day ended with an evening stroll down Bourbon Street.

The world-famous Natchez Pilgrimage was viewed at Natchez, where luncheon was served in ante-bellum surroundings. That evening included attendance at the Confederate Pageant. Before disbanding, the tourists held a farewell dinner at Dallas and returned to Amarillo through Wichita Falls.

When you want to get it first, go to Home Box Office. For world premieres like John MacDonald's gripping saga of love, greed, and corruption... Movies like "Heaven Can Wait" and "The Onion Field"... presented by Mrs. Burkhalter and Mrs. Richburg.

Brenda Thomas presented the first part of the program by discussing Saudi Arabia. Ronna Howell completed the program by speaking about the OPEC nations.

Members present for the meeting were Ilajean Brinkman, Mrs. Burhkalter, Debra Cook, Mrs. Gauthreaux, Opal Glenn, Mrs. Howell, Mrs. Jones, Mrs. Neill, Mrs. Owsley, Mrs. Richburg, Mrs. Ruland, Mary Sledge, Mrs. Stephens, Mrs. Thomas, Ailene Tindal, Jeannie Tucker, Jan Walser and Linda

Conference Broadcast Scheduled

The 150th annual Conference of the Church of Jesus Christ of Latter-Day Saints was to be broadcast live from Salt Lake City, Utah April 5 and 6 at the Amarillo Chapel. Sessions were scheduled to begin at 11 a.m. and 3 p.m. both Saturday and today.

All members and visitors are invited to attend. The Amarillo Chapel is located on the Parker St. exit from Interstate 27, three blocks right on Bowie.

Spring Bride-Elect

Miss Vanessa Eileen Bishop and Billy Lee Frost, both of Amarillo, have selected May 24th as the date for their marriage in San Jacinto Baptist Church, Amarillo. The bride-elect is the daughter of E.E. Bishop, 505 Ave. J, and the late Mrs. Bishop. The prospective bridegroom is the son of Mr. and Mrs. Bill Frost of Amarillo. Miss Bishop is a graduate of Hereford Hgh School, where she was involved in band, student council, Future Teachers, National Honor Society and Flag Corps. She is currently attending Amarillo College and is employed by Beneficial Finance of America. After attending Palo Duro High School in Amarillo, Frost served three years in the US Navy. A student at Amarillo College, he is currently employed as an electronics technician by Owens-Corning Fiberglass.

Umbarger To Celebrate Church's Anniversary

at Umbarger will be celebrating the 50th Anniversary of the dedication of the church on Sunday. April 13.

The observance will begin with a 10 a.m. Mass, to be followed by a covered dish luncheon at noon. An open house will be hosted by the parish from 3-5 p.m. for

St. Mary's Catholic Church residents from neighboring communities. Refreshments will be served and the church will be open to visitors.

> Many of the paintings and wood carvings housed by the parish were created by Italian prisoners of war who were stationed in Hereford during World War II.

Happy Birthday Mom (Dort)

Red Cross Update

CPR Class Set To Begin Here

By BETTY HENSON County Executive Secretary

American Red Cross A special thanks to Gary Phipps and Jim Simon who are teaching a CPR class on Tuesday nights. This class is full, but anyone interested in taking a CPR class can contact the office for further information as to the next class

The Uniformed Volunteers will be holding a workday at the Red Cross office Thursday April 10. Volunteers will be working in the clothing room and on the chapter scrapbook as time

allows. Lunch will be at the Senior Citizens Center.

The Home and Family Nursing Instructors Class will be taught June 30 and July 1 and the Disaster Nursing Class will be taught July 2. These classes will be taught by Bob Berge from Dallas. Interested persons should contact the office for further information.

With the spring weather coming and storms as well, we should all have a disaster action plan which should be discussed with all family members. The Disaster

Committee of our local chapter is working on a larger scale to assure that assistance from the Red Cross to disaster victims is provided immediately after the disaster and on an additional assistance basic should the family not have insurance or be eligible for any government assistance. Immediate assistance following the disaster includes food, cloth-

ing and shelter; additional

assistance includes household furnishing, building repairs, medical assistance and occupational equipment.

The Disaster Committee will meet Tuesday, April 15. at the Flame Room. There are seven areas of disaster. relief for which we are training volunteers to carry. out specific duties. Any interested person is invited to attend the meeting and find out more about the services.

Local EH Program Now Being Audited

County Extension Agent Louise Walker informed Wyche EH club Thursday afternoon of the Federal Audit taking place on the Extension work in Deaf Smith County, during their regular meeting.

Hostess for the meeting was Louise Packard. Opening exercise was read by Nancy Duncan entitled, "What is Easter?"

Members answered roll call with, "The last home assessory I purchased."

Gene Holden reported on the council meeting during the business session. She announced that the District meeting is scheduled April 15 in White Deer. Fee for the meeting will be \$5 per

She then presented a program on home assessories, stressing that a few pieces of furniture are better than many excellent pieces so pourly arranged that they cannot be appreciated.

The next scheduled meeting will be April 17 with members of the local 4-H club giving the club program. This meeting will be held in the Southwestern Public Service Reddy Room with Esther Thuett as hostess. The meeting will begin at 2:30 p.m.

Those present for the monthly meeting were Clara Trowbridge, Novella Hewitt, Lorena Ward, Beverly Brooke, Gene Holden, Carol Odom, Ethel Logan, Elizabeth Hellman, Virgie Duncan, Louise Packard, Pet Ott. Louise Walker and Nancy

Summerfield Club To Help Girlstown

Members of Summerfield Study Club voted to help replace clothing lost in a fire at the Borger campus of Girlstown during a business meeting Thursday afternoon in the home of Mrs. Guy

Mrs. Ray Johnson, president, conducted the business meeting and it was announced that "Handwriting Analysis" will be the program to be given April 28 during a noon meeting of Deaf Smith County Women's Forum. Mrs. Clayton Sanders presented a report of the recent district Federation convention held in Amarillo, where Summerfield Club's yearbook was cited among the top ten in the area. Also, she announced that three mem-

bers of the club won blue

events at the convention.

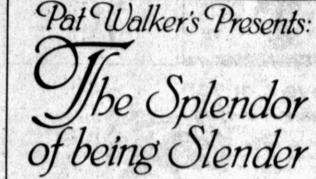

Mrs. Earl Lance Sr. led members in the Pledge of Allegiance.

Mrs. J.R. Euler gave the meditation subject, entitled Christ at the Cross.

In lieu of a program, members made favors for the state convention which is scheduled April 24-27 in Amarillo's Hilton Inn.

Others in attendance at the meeting were Mmes. Thurman Atchley, R.B. Baker, Lee Curry, George Delozier, J.R. Euler and L.H. Lookingbill Sr.

South African diamonds miners have to dig up and lift a hundred million pounds of sand and gravel for each pound of gems they find.

Jeri Lawrence lost 32 pounds at Pat Walker's

If you have a weight problem, you need to know that you can reduce like a lady at Pat Walker's, achieving permanent figure correction privately, pleasantly and in a dignified manner. Here you lose unwanted pounds in an elegantly appointed salon where you always receive all the courtesies due a special and valued

Lovely Jeri Lawrence is one of hose valued patrons; she lost 32 pounds and 49 inches on our proven program of weight reduction. You can succeed, too-without rigid diets or strenuous exercises.

CALL NOW for the FREE appointment that can make a wonderful difference in your life. We want to give you a complimentary treatment and figure analysis; there's no obligation. Simply call or come by to reserve time for your appointment.

Improvisation Workshop Offers Diverse Benefits

Women's Editor

Individuals representing a wide realm of interests can be benefitted by improvisation techniques, according to Tracey Stevenson, who will be conducting a special workshop here Thursday, April 17, at the Community

Incorporating theatre games, pantomime and music, the upcoming workshop will be designed to meet a variety of interests, ranging from amateur drama to special education. Although geared to theatrical techniques, the workshop should be helpful to persons interested in all areas of the fine arts. Mrs. Stevenson explained.

"This workshop is designed to make you more aware of your own creativitity and body movement," the Oregon native stated. "It will encourage a release of inhibition and help individuals to develop and channel discipline and creativity. Above all, the activities in this workshop will be fun and enjoyable.'

The three-hour workshop, sponsored by Hereford YM-CA, will touch on the most basic preliminaries to creative expression. The evening will begin with group theatre games, which will serve as a general warm-up and icebreaker for the participants.

"These warm-up techniques promote concentration but they are also meant to be fun. These are basic excercises in getting rid of your inhibitions while learning to improvise." the newcomer said.

Pantomime and movement to music will comprise the greatest part of the workshop with participants to practice the art of illusion through body language. "This is where you walk without really taking steps and climb stairs when there are none." Mrs. Stevenson added. "We'll also do some things with music, like making small movement compositions."

As a sample of the

be included in the workshop, Mrs. Stevenson described the Make-A-Machine concept, wherein the bodies of people are used to depict the

working parts of a fictitious machine. The movement exercises to be included in the workshop are not to be confused with aerobics, Mrs. Stevenson explained, but can be likened to the very basic steps one

improvisational techniques to

would learn if practicing for a Broadway musical. "These are helpful in coordination and concentration," stated the former director of children's theatre. Mrs. Stevenson, who plans on earning a bachelor's

degree in education, believes that the improvisational techniques workshop will be particularly beneficial to adults who work with children. "I hope that teachers, day care center personnel, youth leaders and others who work with children will come see the techniques which can be used for self-expression."

Mrs. Stevenson is tentatively considering teaching a four-week children's workshop under the YMCA's sponsorship if there is sufficient local interest in the project. The program would be geared to preschoolers and would allow youngsters to create through the use of puppets, games and panto-

Also on the horizon for Mrs. Stevenson is the possibility of forming an adult production company, if there is enough local involvement to justify such a venture. "If we could get a core of just eight people together, that would be enough for a small production," she said. Mrs. Stevenson is particularly interested in stage dance productions for which she would be the choreographer.

Having lived throughout. the United States, Mrs. Stevenson came to Hereford recently with her husband.

scale worker. She has attended Emporia State University at Emporia, Kans., where she directed a pantomime troupe. She has toured with technical theatre and dance for six years and worked with children's thea-

tre for four years. She will begin work this week as a respiratory therapist at Deaf Smith General Hospital. She has previously been employed by the local school system as a substitute teacher.

Individuals who are interested in enrolling in the upcoming workshop must register prior to April 11. Enrollment will be limited to 40 persons and participants must be at least 17 years old. It is required that participants wear loose clothing and soft shoes for unrestricted movement.

The workshop fee will be \$5 for YMCA members and \$7 for non-members. Further information is available from the "Y" office, 364-6990

At Wits End By ERMA BOMBECK

Looking back on it, my entire life changed the first holiday was allowed to eat at Grandma's "big table."

Up until then, I could only speculate on what it was like to be an adult by listening from the kitchen and occasionally getting a glimpse of them as Grandma's swinging door thumped in and out.

Then one Easter, when I was 13, Grandma pointed to a vanity bench brought down from her bedroom that was sandwiched in between my mother and an uncle, and said, "You can sit at the big table."

It was awful. They passed things and took a little bit of everything whether they liked it or not. . .just to be polite. They never laughed with food in their mouths even when

something was funny and needed laughing at. When they talked, they argued usually about things they couldn't do anything about. . . the Germans marching into Czechoslovakia and the high cost of living.

They had a real thing about napkins and dabbed the corners of their mouths when there was nothing there. With every bite, they looked depressed and kept saying, "I should not be eating this. My weight, you know.' Everyone was always shooing the dog away from the table

saying, "Go away, I just washed my hands." Sometimes when the door swung open I could hear the rest of the kids in the kitchen laughing and screaming. I knew my

cousin Billy was blacking out his front teeth with black olives and acting crazy. And my cousin Pat was scraping the grease with her spoon for hunks of chicken that stuck to the skillet. When they wanted seconds, they just brought the pots to the table and ate what was left with the big spoons still in them. Someone would belch and they'd laugh until someone choked and had to be hit on the back. Then they'd hit back and someone would start a fight with cold mashed potatoes and Grandma would say, "If you kids don't settle down out there. I'm going to make you all go outside."

Every Easter Sunday'l think about the big table. It never changes...only the name of the war changes and the names of the adults. But as I hear the laughter from the children in the kitchen, I yearn to shed the yoke of responsibility, decorum, and discipline...and be a child once more.

TRACY STEVENSON ...improvising pantomime routine

YMCA To Offer Workshop

Hereford YMCA will offer a workshop in improvisation techniques Thursday. April 17, from 7-10 p.m. at the Community Center.

The workshop is designed to "make individuals more aware of their own creativity and body movement as well as learning to be self-expressive and explore inter-relationships at the most basic level." A YMCA spoesman stated that the techniques encourage a release of inhibition and helps the individual develop and channel discipline and creativity.

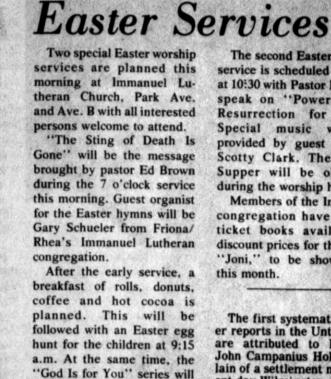

Participants should wear loose, comfortable clothing and soft shoes.

Registration for the workshop will be open at the YMCA office until Friday, April 11. Enrollment will be. limited.

Cost of the three-hour workshop will be \$5 for YMCA members and \$7 for

Further information is

available by calling 364-6990.

service is scheduled to begin at 10:30 with Pastor Brown to speak on "Power of the Resurrection for You." Special music will be provided by guest organist Scotty Clark. The Lord's Supper will be observed during the worship hour.

Ann Landers

Gross Manners

DEAR ANN LANDERS: I need your help. It's a problem with my husband. His manners are gross. I can't figure out why I didn't notice this until after we were married.

The man drinks from the milk container -- too lazy to go get a glass. He tastes things that are cooking on the stove and puts the spoon back in the pot. He will eat from a bowl of chili or salad -just name it - until he has had enough, then he puts the bowl back in the fridge.

I have told him repeatedly this is very unhealthy, that he could spread germs to the whole family -- or guests. when we have company. My criticism only leads to wall-cracking arguments. He says they all did it in his family, and nobody ever died from it.

Maybe if YOU told him, it would help. Meanwhile, any suggestions? -- Ughsville.

DEAR UGH: Try this:

thing for nothing.

DEAR ANN LANDERS: You should be more careful with your answers when someone has a \$10 bet riding on it. I refer to the letter signed "Tokyo" which asked. "Who should go up the stairs first, the man or the woman? And how about

down?" You said. "The woman goes up first, but he leads on the way down so he can break her fall if she should stumble.

I think you're wrong. I read somewhere that the man whould never be lower than the woman. In other words, he leads her up and follows wives' tale predating ERA. he could not see her from the bottom up if her skirts were raised from the floor. -- Va.

Comment DEAR VA.: You don't say where you read that nugget. but the book has got to be at least 60 years old. Women haven't worn skirts long enough to be "raised from the floor" since World War I. Wake up and smell the coffee. Dad.

Do you feel awkward. self-conscious -- lonely? Welcome to the club. There's help for you in Ann Landers' booklet. "The Key to Popularity." Send 50 cents with your request and a long. stamped, self-addressed envelope to Ann Landers, P.O. Box 11995, Chicago, Illinois.

Forest workers call the quaking aspen the "disaster. tree." It is the first tree to grow again in areas where forest fires, strip mining, or other circumstances have stripped the land of vegeta-

New Yarbro Home Viewed by Club

The new home of R.N. Yarbro on Harrison Highway was toured by members of Hereford Study Club, who met there Thursday evening for a salad supper, business session and program. Cohostess was Mrs. Louie Spinks.

The Yarbro home was appointed with bouquets of spring flowers and Eastertheme decorations for the social with each member bringing a salad for the evening meal.

During a routine business meeting, the club regretfully accepted the resignation of Mrs. Bob Poston, who has moved to Dallas. Also. arrangements for the club's next meeting on April 17 were finalized with Mrs. J.D. The reason, as I recall, is that Gilbert Jr. to be hostess in

Sewing Classes To Be Offered

RVING HEREFORD SINCE 1927

ACROSS FROM THE POST OFFICE IN DOWNTOWN HEREFORD

oun em em em em e

By DENISE SMITH **Brand Staff Writer**

Nineteen La Plata seventh, eighth and ninth grade students returned Monday from a three-day trip to Washington, D.C. as participants in a special tour sponsored by Lakeland Tours, Inc., of Charlottesville, Va.

The tour is not schoolsponsored or affiliated. although local mothers and faculty members Mrs. Jer-

ome Friemel, Mrs. Leigh Carter and Mrs. Buster Miller chaperoned.

The students departed from Amarillo Airport Saturday, March 29 at 8:30 a.m. landing in Tennessee that afternoon. The group first went sight-seeing in Washington, ate in Virginia and stayed in the Hampshire Motor Inn in Maryland.

Traveling by bus, the group Saturday afternoon

visited the capitol's best known monument, Washington Monument. The 555 foot structure is in the center of the Mall, midway between the Capitol and the Lincoln

Memorial. Riding to the top of the monument on a five-story escalator, the students were able to see a panorama of the city. Also seen that afternoon by the group were Ford's Theatre and Petersen's Home.

That night the boys and girls toured the Lincoln and Jefferson Memorial, the illuminated Capitol, and Iwo Jima Memorial.

The local group started their Sunday, adventures with breakfast at 7:45 a.m. They departed afterwards for a visit to Mount Vernon, Alexandria, a major port of the eastern seaboard containing many structures of historic and architectural

merit; and the Arlington Cemetery, arriving in time to view the ceremonious changing of the Guards. While the group was there, they stood in front of the impressive gravesite of John F. Kennedy.

Before lunch, the junior high group was taken to the Museum of History and Technology, containing the Hall of Graphic Arts, Hall of Transportation, Hall of Underwater Exploration, First Ladies Hall, National Postage Stamp Collection and Flag Hall.

Other points of interest seen by the students in the Smithsonian Institute were Hirshhorn Museum. Air & Space Museum, Natural History Museum. National Art Gallery and Arts & Industrial Building.

Attracting the students most in the Institute was the amazing Hope Diamond. The group's tour guide was quoted in saying, "If a person took one second to look at everything in the Smithsonian Institute, it would take that person 2,000 years to go through the enormous building.'

Sunday evening, the 19 students enjoyed a dance planned for them and other students touring the city at the motel.

Monday, March 31, after packing and having their luggage transferred, the group had an appointment with the F.B.I.

This, taking priority over all other memorials, museums and shopping, presented a dramatic explanation of the work of the Federal Bureau of Investigation. Included in the tour were displays of the F.B.I. organization, spectacular cases, airline sabotage and espionage techniques.

Also seen by the students were the many laboratories located in the building while actual work was in progress. The end of the tour was a shooting display with a pistol and submachine gun. Unfortunately the students were allowed no cameras during the 90-minute tour.

Other points of interest visited by the group before departing were the newest of Washington's national shrines, the largest Catholic Church in the country and the seventh largest religious structure in the world, "The National Shrine of the Immaculate Conception."

Additional sights seen included the Botanic Garden. The students while visiting

in Washington, were able to catch a glimpse of President Carter's feet when he was playing tennis on the White House private tennis courts. They were also able to stop and speak with Congressman Langley of Texas, and listen to a rally against "aid to Savador."

During their stay, the students were approached several times by "Moonies." This was an unexpected sidelight to the tour for the students.

The only complications encountered by the students were ear aches and air sickness.

The La Pleta students arrived at Amarillo Airport Monday evening March 31. Comments about the trip were summarized by sponsor Leona Miller, "The kids seem to have developed more respect for their government. We went into the Senate Room and I wanted to just sit down and cry, just thinking that this is where it all happens. The kids, well they were terrific, I couldn't have picked them any better."

Mrs. Miller, science teacher at La Plata Junior High, intends to continue the tours next year, hoping to have Stanton students and high school students participate

Meet Your Educator

Lu Sherman has been a fifth-grade teacher in Shirley Elementary for ten years. Before that she taught third grade at Aikman and drove a bus from 1960 to 1967.

She started her teaching career in Oklahoma in 1947 and then taught in New Mexico while her husband was overseas during the Korean War.

Mrs. Sherman graduated from High School at Shattuck, Oklahoma, She attended S.W.J.C. at Keene. Texas and Union College at Lincoln, Nebraska before receiving a Bachelor of Science from West Texas State University.

N.E.A., T.S.T.A., C.T.A., and Hereford Art Guild are professional organizations in which Mrs. Sherman holds membership.

The teacher and her husband, Vernon, have four daughters and one grandson. They are members of Hereford Seventh-Day Adventist Church.

Painting, sewing, photography, gardening, travel, and music are all hobbies

"My philosophy of education is to help a child feel necessary--to find a reason for learning and a desire for understanding," stated Mrs.

Library Receives New Cookbooks

By SHARON CHAMPION **Deaf Smith County** Librarian

Cookbooks are among the most popular books at the Library. This week three new cookbooks will be on the new book shelf at the Deaf Smith County Library. Julia Child. popular TV cook and author of several cookbooks, has written a new book entitled, JULIA CHILD & MORE COMPANY. This book includes the recipes for everything she demonstrates on her second cooking for company television series. Thirteen menus for entertaining company are included. The color photographs of preparation techniques and the finished products are guaranteed to make your mouth water.

FREEZER COOKERY by Mary Berry offers all you need to know about freezing fresh food plus a wide variety of recipes for dishes to cook

for the freezer. These recipes have clear instructions for preparation, freezing, thawing, and serving. This book is also crammed with advice on freezing meats, vegetables, fruit and dairy products.

Barbara Gibbon's YEAR ROUND TURKEY COOK-BOOK provides 300 recipes using this versatile meat. Turkey meat is relatively low in cal ies, very low in choles.erol and high in protein making it a perfect addition to menus during the entire year. Recipes range from traditional holiday feasts to turkey salads, stews, and cassaroles. New non-fiction. . .

Certain to make the best seller list, THE THIRD WAVE by Alvin Toffler is an explosive book that will dramatically alter the way we view ourselves and the world around us. This book provides a brilliant analysis of the forces that are creating

a new civilization in our midst. It shows how all of us can make a peaceful transition to a new, saner, wiser and more democratic society. Startling in conception, written with extraordinary clarity and perception. THE THIRD WAVE prepares us to cope with a future that

is already here.

H.R.H.: THE MAN WHO WILL BE KING is the first revealing, in-depth portrait of Prince Charles, the British monarch-to-be. This biography, authored by Tim Heald and Mayo Mohs, is based on many personal interviews with Prince Charles, his friends, teachers, coaches, fellow navel officers, and members of the Royal Family, and is illustrated with over seventy

photographs. Noami James is the first woman to sail single-handedly around the world. ALONE AROUND THE WORLD is the first hand narrative of her epic sea voyage. During her nine months at sea, she read 200 books, repaired numerous popular.

leaks, and survived the capsize of her boat. This book is an entralling account of sea adventure.

New fiction. . .

Historical fiction fans will enjoy LION OF IRELAND by Morgan Llywelyn. This novel is based on the life of Brian Boru, King of Ireland during the Middle Ages. Inspired by Charlemagne, Brian led the Irish to the peak of their Golden Age, an age of poetry and art, saints and scholars. Brian Boru came as close to realizing the dream of a united Ireland as that troubled land has ever

OPERATION ARTEMIS by Douglas Scott is an actionpacked thriller set in World War II. OF HEREFORD In Sugarland Mall

Corner

"Death Begins In The Colon," an important discussion of ailnentary toxemia was recently discussed in London before the Royal Society of Medicine by 57 of the leading physicians of Great

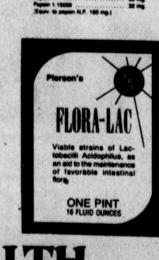

The colon is a sewage system, but by neglect and abuse it becomes a cesspool. You may have several pounds of waste not needed in your colon lying there causing a toxic condition.

When the colon is clean and normal, we are well and happy; let it stagnate, and it will distill the poisons of decay, fermentation and put refaction into the blood, poisoning the brain and nervous system so that we become mentally depressed and irritable; it will poison the heart so that we are weak and listless; poisons the lungs so that the breath is foul; poisons the digestive organ so that we are distressed and bloated - with much gas; and poisons the blood so that the skin is sallow and unhealthy; in short every organ in the body is poisoned, and we age pre maturely, look and feel old, the joints are stiff and painful, neuritis, dull eyes, and a sluggishbrain over takes us.

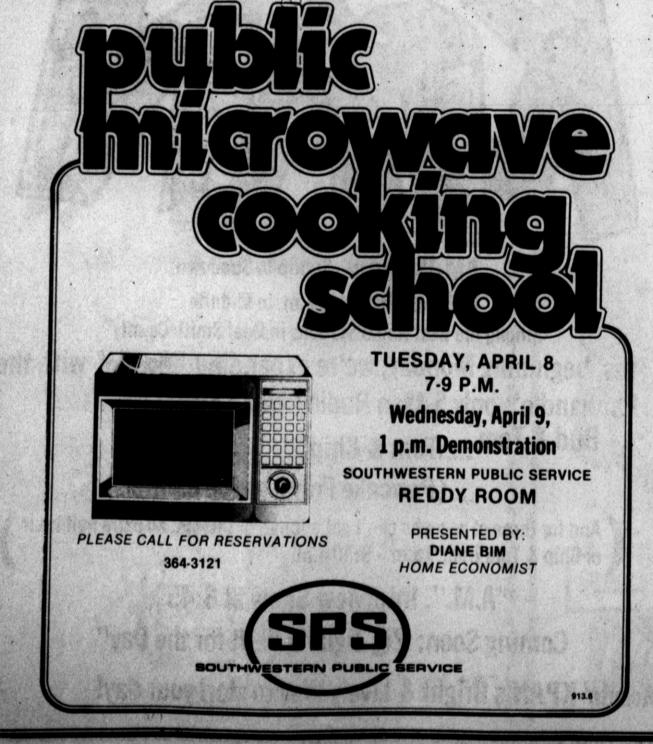

If you want a really clean, healthy colon try World of Health's Dyfenz-digestive formula. It really digests fats, proteins, starches, and sugars while eliminating waste products.

Used in connection with this is liquid Flora Lac, and bran tablets, these products clean the colon and completely renews the friendly

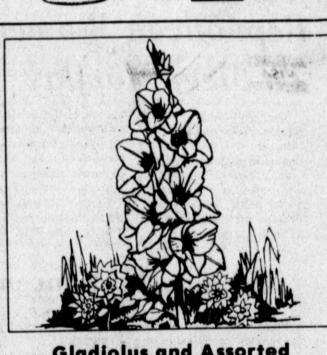

Eating lots of good yogurt also helps a colon problem - yogurt such as Alta Dena Brand, which contains live bacteria unlike other brands widely sold on the market today.

College Students Combating Depression

By LOUISE WALKER **County Extension Agent**

support from friends and family -- especially to combat College students need depression, the leading

American college students might suffer some symptoms of depression, according to a 1978 research report.

What triggers depression? Traditional student pressures, mainly -- and the result can be mild or serious.

Major pressures include failure to meet personal academic standards, the need to define goals for life and career and perhaps lack of friends or adults to support the college student and ward off loneliness.

CONFUSION REIGNS

Students often have a hard time determining the seriousness of the problems.

When they are depressed, they often perceive themselves as alone.

It's hard to tell whether they are feeling temporarily sad or whether they are heading for a full-blown clinical depression.

This confusion is understandable.

A student who is just "low" and one who is clinically depressed might describe themselves alike -blue, unhappy, empty, sad and lonely.

Both may have trouble sleeping, feel fatigued and lose their appetities.

BUILD UP YOUR SAVINGS.

Regular passbook savings is still the best way to

build up your savings to the high interest rates.

WE'LL SHOW YOU HOW TO EARN MORE.

between them, though -- the number, intensity and duration of their symptoms.

NEW-SITUATIONS 'BOOGLE'

Another part of all this is the dilemma of so many new situations all at once.

College students experience simultaneously all the transitions that are major stresses in adulthood. They leave family, friends

and familiar surroundings -and college provides no ready-made substitutes the moment they hit the campus. In addition, the college student may also lose social status and become a "little frog in a big pond," instead of a "big frog in a little pond."

'OBLIGATED SUCCESS'

Making all the pressures even stronger is the "obligated success" felt by students -- those on scholarships, those from middleclass families who are in school knowing their families have sacrificed for them, and those who feel the pressure to live up to the family's expectations of them.

There is also increased pressure -- or self-torment -for the student who is "not cut out for college" or who finds he cannot discipline himself and manage his time appropriately for college studying.

HELP! RIGHT NOW!

As colleges wind down their academic year, the depression rate increases.

Final exams conjure up "make-or-break" scholastic pressures. It's end-of-theyear, end - of - the - bank account time. It soon will be time to leave friends and social contacts.

Fear of failure and the possible humiliation of facing family can certainly contribute to some negative feelings about self-worth this time of year and bring about depression.

College is no snap, but with the understanding and support of friends and family, students can better handle stresses related to college

'POINT-OF-USE' WATER

HEATING MAY SAVE To combat high-energy use of water heaters, "point-of-use" water heating may appear on the new-

appliance horizon. Simply, "mini-water heaters" would be placed in the

laundry room--and take the place of today's one large water heater.

These "mini-water heaters" would prevent energy waste that now exists when today's single water heaters must transport hot water-and keep it hot--over many feet of piping to points of use

throughout the house. Today's water heaters use more energy than any other home appliance besides heating and cooling systems.

With the "mini-water heater"--or point-of-use water heater--families will have better control over many energy-saving factors: tank size, temperature settings and the time of day each unit

For example, a one-gallon tank might serve the bathroom's showering and sink needs, although "hot unit that small.

soaks" in the tub might tax a Manufacturers already have point-of-use heating in mind--one offers a dishwash-

er that heats its own water. Eventhough point-of-use water heating isn't common now, its technology is feasible for widespread domestic use and may represent a major contribu-

tion to energy conservation. Educational programs conducted by the Texas Agricultural Extension Service serve people of all ages regardless of socio-eonomic levels, race, color, sex, religion or national origin.

Memorial Opry Scheduled Here

Hereford Rebekah Lodge #228 will sponsor the Woody McDeritt Memorial Opry, May 10 at 8 p.m. in the IOOF Temple, 205 E. 6th St.

The Memorial Opry is a tribute to McDermitt who helped produce earlier shows of this genre.

In honor of McDermitt and as a gesture of appreciation for his support, the Woody McDermitt Memorial Opry will be an annual event here and Woody McDermitt Day is to be proclaimed in conjunction with this year's show.

Musicians wishing to perform in the show are asked to contact Judge Glen. Nelson, this year's music. coordinator. All Country-Western musicians are welcome to participate.

Newcomers Schedule Dutch Treat Lunch

will convene at noon Tuesday at K-Bob's Steak House for a Dutch Treat luncheon. No reservations are needed for

Mrs. Troys Carmichael will address the group of newcomers on the history and purpose of Deaf Smith County Women's Forum.

will follow and plans will be finalized for the annual progressive dinner scheduled during the month of April. , All newcomers to the City

of Hereford are extended a cordial invitation to attend the luncheon. For further information regarding the club, one can contact Mrs. Jim Campbell, president, at .

A short business session Republican Women To Meet Monday

The proposed slate of officers will be presented for election by Deaf Smith County Republican Women's Club during a meeting at noon Monday in Hereford State Bank coffee room. Persons attending are asked to bring a sack lunch.

Also on the business

agenda of the newly-formed club will be consideration of the bylaws, further organizational matters and discussion of future plans, including a permanent meeting time.

Further information may be provided by Edwina Thomas, 364-2913 or 364-

Plans for the state convention at Houston in June will be discussed Monday by members of Deaf Smith General Hospital Auxiliary during a noon luncheon at Dickies Restau-

President Olivia Denning

urges all interested persons

to attend. Other business to be considered at the meeting will be the appointment of an officers nominating committee and discussion of salemerchandise in the hospital

Many do not make adequate preparation for the future. In line with this, it is well to think of your family monument. When a family is overwhelmed with grief, it is hard to face the hard practicalities of life. You can save them from these heartbreaking arrangements by making preparation beforehand.

Let us assist you in choosing a fine quality memorial now that will adequately commemorate your life and personality as well as those of your family members.

DOUBLE YOUR INTEREST RIGHT NOW!

EARN TWICE AS MUCH INTEREST.

At Security Federal Savings, you can DOUBLE YOUR INTEREST that you may be earning on your bank or savings and loan passbook account. Our new 30-month Treasury Rate Certificate hits inflation where it lives. High interest (better than any bank can legally pay) for a short term. And only \$100 minimum deposit is required!

HIT INFLATION WHERE IT LIVES.

You may have \$100 or more in your checking account which is sitting idle and earning nothing. Put it to work at Security Federal Savings. We pay a higher interest rate than your bank and we can DOUBLE YOUR INTEREST over passbook rate on \$100 or more.

An important part of our business is showing people how to save more and earn more. Like how to DOUBLE YOUR INTEREST! And if you don't feel that you have enough in your passbook account to set up our DOUBLE YOUR INTEREST account, we'll show you how to get there!

hole loaf of bread, five ranges, eleven eggs, two ups of broccoli, and five and half pounds of ground beef? Calcium!

Calcium is one of the nacronutrients everybody needs to stay well. Studies done with rats deprived of milk in their diet have shown that the young rats gain weight slowly, if at all, have poor muscle tone and poor one structure. After the four-week limited diet; the rats were nervous and jumpy, with watery, dull eyes and sores around the eyelids.

Similar studies conducted by Dr. Lennart Krook, a Swedish-born investigator of animal bone disease at the State University of New York's College of Veterinary Medicine at Cronell, produced bone disease in monkeys, horses, cats, dogs and swine. But adding calcium to the diet can reverse these symptoms.

Calcium is the nutrient responsible for hard bones and teeth. It's important in the way food is used in the body, and is necessary for transformation of nerve impulses, including contraction and relaxation of the heart. Calcium helps in the clotting of blood, and is needed by pregnant nursing womens for fetal growth and human milk production.

Calcium doesn't just stay in the bones and teeth. The little parathyroid glands in the neck keep busy sending out hormones to strip calcium reserves in bones and teeth to get it into the bloodstream for all of its many uses.

With not enough calcium coming from the diet, the parathyroids keep stripping calcium until anywhere from 10 to 40 percent of the mineral is stripped. This stripping process leaves bones brittle and teeth subject to disease.

As people grow older they tend to eat less, so chances are very good that their meals will be deficient in many nutrients, unless we make a concerted effort to see that every essential nutrient is there. If we're hooked on coffee or tea, chances are that we won't go out of our way to drink enough milk.

Carbonated soft drinks pose another problem in maintaining a "calcium balance." Most colas contain small amounts of phosphates, which along with phoshates from high protein foods and some vegetable sources, overload the phosphorus side of the body's ideally balanced calciumphosphorus scale. Too much phosphorus and too litle calcium in the diet means trouble, especially for teenagerse who drink more soft drinks, yet need more calcium, than any other age

Well, then, how about getting at calcium in cheese or yogurt? Fine. But you have to eat the cheese or yogurt, not just plan to eat it. And you will have to eat enough of it to make up a reasonable amount of calcium to keep you in good health, not just an occasional grilled cheese sandwich.

Practically every survey done on the eating habits of Americans has shown that a large number of people do not get enough calcium for good health. In 1968 a federal survey found that 31 percent of all Northeastern families did not get enough calcium. the same in the North Central states and the West. Thirty percent of all Southern families did not get enough

By "enough," we mean the recommended dietary allowance that has been set by the National Academy of Sciences. Specialists in the field of calcium metabolism feel certain that older people should be getting considerably more than this official level.

Officially adults need 800

mg., pregnant and lactating women need 1,200 mg., depending on age (pregnant teens need 1,600 mg.). Several kinds of nuts and seeds are an excellent source of calcium, but they tend to be high in calories: 1/4 pound of almonds contains 234-mg. calcium, and 675 calories; sesame seeds contains 1,600 mg. calcium and 636 calories.

Whole milk, the bestknown source, has 590 mg. in two cups, at 322 calories; cheddar theese, 750 mg. in 1/4 pound, at 448 calories. Yogurt supplies 590 mg. in two cups. Greens are a fine source, supplying about 200 mg. per 1/4 pound, at only about 40 calories, unseason-

One of the best ways to guarantee that all your calcium is put to good use is to get lots of exercie every single day. Losing calcium because of inactivity was one of the most serious conditions our astronauts had to contend with. Don't "save yourself" trips. Do your own yard work, walk the dog, carry groceries, and don't put telephones in every corner to save exertion. It's the exertion that will maintain good circultion, good heart action and good

Car Clinics Make Sense for Women

NEW YORK (NEA) - You say, "Check the oil, please," and he plunges the dipstick into the engine and studies it, like a pagan priest divining the future from a chicken's

Finally, he gives you his findings and you think, wow. What he must know to be able to do that.

What he must know, it turns out, is how to read. The oil dipstick has a mark at the bottom that says "full" or "add

That's the kind of demystifying thing the Goodyear Tire and Rubber Company is teaching in car-care clinics for women. So far, more than 35,000 women around the country have learned it, in more than 1,000 clinics at Goodyear stores.

What's more, says Dave. Chowning, one of the developers of the program. "At these clinics, we pick someone's car at random for demonstration purposes and the women learn how, for instance, to check the oil themselves by doing it."

By the time the three-hour program ends (usually at 10 p.m.), they've also learned how the other things that keep a car running work, what those things look like new and worn, and what symptoms indicate which ones are to blame if the car refuses to run

The leaks, for instance. The color alone can tell you where they come from. "If you find a red fluid under the car from about where your feet rest in the driver's position back to about the rear door, normally that's transmission fluid, Chowning says. "Coolant 'or anti-freeze comes in a number of colors — green, yellow, orange, blue — and you'd find that under the grill in the

Then you can drive to the gas station and say, "My transmission is leaking." Or, "I need transmission fluid," if there is no leak but, during your weekly 15-minute carmaintenance check the clinic teaches you to perform (in the morning because the engine is

the bottom for an accurate gauge), you've checked the transmission fluid (with its dipstick that has all kinds of instructions on it) and found the level low.

In short, you'll know what's up. And you'don't have to worry about forgetting it. "We provide illustrated workbooks at the clinics the women can also take notes in," says Chowning. "And if they want to attend more than one clinic, that's fine. There's a lot of information to absorb.

Since March '79, Chowning and others have taught the company's 41 national service supervisors how to train their local personnel to dispense that information. So, sooner or later, all 1,400 Goodyear stores will be running clinics, if they're not already.

Attendance is limited to 12 if it's a small store with one instructor (or 25, if there are two). But, he says, "If a store gets 40 people signed up, it will simply schedule another clinic to accommodate the overflow." The clinics, in short, are held on demand.

And while it's true they were planned as a niffy public-relations gambit for the company, "They're absolutely free and there's no sales pitch," he says.

And they're open to ques- couldn't thing she wants," he says What people ask most frequently is, 'How do I know I'm not getting ripped off by a service station? And I say, 'First, ask to be shown what someone wants to repair or replace. Then ask for an estimate in writing and request your old parts back so you're assured they needed to be

But the best precaution, he stresses, is to "be exact about the problem so it doesn't still exist after they work on the car. Don't just walk in and say. 'My car pulls.' The mechanic may think you have a front-end alignment problem when, actually, if your car pulls when you put your brakes on, it's something

Better still, fix it yourself if you can. Just make sure you're prepared, by stuffing the trunk of the car, he says, with a flashlight, a rag, a flare, a screwdriver, a pair of mechanic pliers, gloves, a small can of brake fluid and electrical tape. The tape because "if you get a ruptured battery hose on the road, you may be able to tape that rupture and get home.

You might want to keep a thermos of coffee and some Damish in there, too. You have to wait for the engine to cool before you can operate, so you may as well sit back and The Calliopian Study Club planning committee

convened Thursday afternoon in the Episcopal Church to discuss and finalize plans for the upcoming Anniversary Tea, which will be held from 3-5:30 p.m., Thursday in the E.B. Black Historical House. From left are Faye Holt, decoration committee; Irene Coneway, kitchen

Ladies Sang 'Independent' Blues

woman calling the shots with

gusto, rather than reeling

That's what attracted Ms.

"There was a decade in my

Reitz to the blues in the first

life, from 40 to 50, when I had

to support my children by

myself with various jobs, and it was a time when I needed to

"I'd come home at night exhausted to three daughters

who were too young to cook supper, and then I'd do the

wash, help with the homework and listen to their problems." No one said take heart,

you'll survive, except the

black women whose voices

lifted her over the burdens.

"I'd put the music on as soon as I got home," she says, "and

the feeling in their voices sus-tained me. But the lyrics were

often embarrassing. They'd sing things like, 'I'll fall down

on my knees and be your

slave.' But as I hunted around,

I found these women had also

sung 'independent' blues

which were even more nurtur-

from them.

be nurtured.

NEW YORK (NEA) - They sang the blues in the '20s and '30s because they were poor, black and stranded in the

They couldn't go North to work the assembly lines or the mines because they weren't allowed to ride the freight trains. And even if they got there, they wouldn't have been hired because they were

So they stayed South and did white women's housework (which they couldn't do up North because Irish women who'd fled the potato famine years before were doing that) and watched their men heading North to do what they

So they sang the blues but not just the way you think. Says Rosetta Reitz, 55, a lifelong New York jazz buff and collector, "The blues records reissued in the '60s always show these women lamenting being abandoned, but this is an historic distortion. The women who recorded the blues - and I have cards on 326 of them - didn't

just sing about lost love.' They sang about the joy of life, too. "One of the most significant elements in the blues is humor," she says. And they celebrated their sexual inde-pendence, boldly. "The only self-esteem they had was in their private lives," she says. These were working women who were outwardly very dependent on men as employ-ers, but they were the lowest of the low on the socio-economic totem pole, so they had nothing to lose by exulting in

their bodies.' That's not quite the picture handed down of Bessie Smith, Ida Cox, Sippi Wallace (81 and still living, in Detroit) and the other classic blues singers. But that's because up to now, she says, men had done the painting.
"Records reissued from the

'Records reissued from the '20s and '30s were reproduced to show the past accomplishments of the great male jazz musicians like Louis Armstrong, who were just playing backup behind the classic women blues singers

And, since male record producers were selecting the material, "They obviously chose to ignore songs that were insulting the men, in favor of the more flattering ones." Which resulted in the tear-stained portrait of the

female pining for her man.

Two years ago, Ms. Reitz set about retouching the picture. "I'd been writing a book about these women," she says, "and I realized people might think I was making up the songs to make my points
