face Stadium at 7 p.m. today. The freshman team will be at Muleshoe tonight.

Stanton Junior High's two football teams didn't get to play Canyon Monday afternoon. Both games were cancelled because of bad weather. That ended the season for Stanton. The seventh graders wound up with two wins and one loss and the eighth graders won one and lost five.

Fred Crary, a layman from Pampa, will speak Sunday at 3 p.m. at a mass meeting of Hereford men sponsored by the Wesley Methodist Church, 410 Irving. Bill Stanford will lead the singing.

There are 50,000 farm ponds stocked with fish in Kansas.

competition, Dumas has been defeated by Levelland, 42-7, and by Phillips. Hereford's only district outing was against Littlefield last week, and the Wildcats won that one, 33-5.

Dumas has defeated Canyon, 20-19, and Jefferson High of El Paso, 6-0. The Demons have lost to Snyder, 33-0; Artesia, N. M., 20-0; Seymour, 35-6; and Levelland and Phillips.

In the other District L-AAA game Friday, Phillips is host to Levelland, Littlefield has an open date.

## Milo...

(Continued from Page 1)

handlers acknowledge that an increase in the moisture allowable would be welcome and helpful, few feel that any increase will be granted by Department of agriculture officials.

They point to the origin of the 13 per cent level among grain dealers and fear that the move would not gain widespread backing despite the fact that wheat is accepted for government storage at the 14 per cent level and corn is approved for government warehouse storage at 13½ per cent moisture.

Most warehousemen here in the past have allowed some leeway above the 13 per cent moisture level, accepting at 13 per cent some grain "just a bit wetter" (up to the 14 per cent level in some cases). It appears that when and if the harvest gets underway again the same ground rules will prevail at most elevators.

WHILE THE grain sorghum harvest's long delay is causing much concern, damage to the crop so far has apparently been very minor.

Cotton yields and grade have apparently taken a much bigger beating from the elements than has grain. But with 11,000 acres of 10 to 12 million bushels to be harvested, the milo man's fears are those most often heard. The crop is estimated to be about 25 per cent greater than ever before.

In South Plains counties where the more extensive acreage is devoted to cotton, growers have had yield and grade losses expected to total 25 million dollars.

The small koala bear of Australia does not drink water, but gets moisture from the eucalyptus leaves on which it feeds.

## Airport...

(Continued from Page 1)

turn in a price scale to the city before he begins operations. He must have consent of the city before raising prices.

7. Hill will have exclusive rights to his buildings. The city can ask him to build additional hangars and if he doesn't allow others to do so.

8. The city will be responsible for runways and navigation lights. The city will install storage tanks and pumps for aviation gas and Hill will pay 1½ cents per gallon of gas to the city. The city will do major repair on wear and tear to the pumps and tanks.

9. Hill will furnish reasonable and indiscriminate sale of gas and service, storage and safeguarding of planes, including tie-down service. Hill is an independent contractor, not an agent of the city. He cannot charge for landings, take-offs or any other use of airport except his own businesses.

10. Hill is to keep books and accounts that can be inspected by the city. If the buildings and businesses are not ready by an as yet undetermined completion date, Hill will pay the city a daily penalty until they are ready.

11. The term of the contract will be five years with a five-year option for Hill. It can be voided if it is in violation of any laws or is violated by either party.

12. Similar privileges except those of building storage hangars and sale of gasoline and lubricants will be extended to anyone else who wants them.

The contract was read to the commission by City Attorney Ernest Langley. After considerable discussion of possible loopholes the commission said the contract seemed suitable. Hill took the contract to his attorney for further study and the commission will call a special session for approval of the pact if it is agreeable to both parties.

City Manager Dudley Bayne said a slightly used set of storage tanks and pumps are going to be bought from an out-of-business service station in Canyon for \$1,500.

## Hit Parking Meter

Lupe Garcia Guadiana, 18, was given a ticket for collision with a fixed object after her car jumped the curb and knocked down a parking meter in the 400 block of Main at 6:05 p.m. Sunday. Police estimated damage to her car at \$45.

## Senate Resolution Honors Local Woman

Unusual recognition was accorded Margaret Gilliland Witherspoon, deceased Oct. 16, when a resolution was passed by Texas Senate in her memory. A copy of the resolution carrying the official seal is now in possession of her mother, Mrs. Carl Gilliland. The resolution follows:  
SENATE RESOLUTION NO. 53

In Memory of  
Mrs. Margaret Gilliland Witherspoon

WHEREAS, Our heavenly Father in His infinite wisdom called from her earthly labors on the sixteenth day of October, 1957, Mrs. Margaret Gilliland Witherspoon of Hereford, Deaf Smith County, Texas; and

WHEREAS, She was born at Hereford, Texas, on August 3, 1907. She was the wife of Judge James W. Witherspoon, a former District Attorney, District Judge of the 69th Judicial District, and a member of the Board of Directors of Texas A. & M. College; and

WHEREAS, She was an active member of the First Baptist Church of Hereford, and her civic associations and leadership were wide; including membership in the State Executive Committee of the Democratic Party of the State of Texas; and

WHEREAS, This fine Christian lady's unselfish devotion to her community and her tremendous energy and efforts in behalf of many worthwhile charitable and civic causes contributed greatly to the betterment of the City of Hereford; and

WHEREAS, This gracious lady was a devoted wife and mother, a true home maker, and was active throughout her life in striving to make other people happy; now, therefore, be it

RESOLVED, That in the passing of Mrs. Margaret Gilliland Witherspoon, the Senate of Texas mourns the loss of this great citizen and an outstanding leader in her community; that as a tribute to her memory this Resolution be printed in the Senate Journal; and that when we adjourn today, we do so in her honor; and, be it further

RESOLVED, That copies of this Resolution be mailed to each surviving member of her family as an expression of our sympathy.

Ben Ramsey  
President of the Senate  
I hereby certify that the above Resolution was adopted by the Senate on October 24, 1957, by a rising vote.  
Charles Schnabel  
Secretary of the Senate

## Look Who's New!

Mr. and Mrs. George Zetsche are the proud parents of a daughter, Lora Ann, who was born at 2:11 p.m. Nov. 3, and who weighed 7 pounds and 2 ounces. Maternal grandparents are Mr. and Mrs. Owen Andrews of Hereford and paternal grandparents are Mr. and Mrs. J. E. Zetsche of Bowie.

Mr. and Mrs. Don Hatter are the parents of a boy born at 1:47 p.m. Nov. 2, and who weighed 8 pounds and 6½ ounces.

A son, Lupe, was born to Mr. and Mrs. Sewida Ruiz Nov. 4, at 6:42 p.m. He weighed 7 pounds and 6½ ounces. He is the grandson of Mr. and Mrs. Ramize Senago of Hereford and Mr. and Mrs. Frank Ruiz, also of Hereford.

Lynda Rose, daughter of Mr. and Mrs. Thomas Botsford, arrived at the Deaf Smith County Hospital at 3:17 a.m. Nov. 5, and weighed 6 pounds and 9 ounces at birth. Mrs. Jeanette Allan of San Bernardino,

Calif., is the maternal grandmother and Mr. and Mrs. R. W. Botsford of Hereford are the paternal grandparents.

At 7:50 p.m. Nov. 4, Maria Terrique, infant daughter of Mr. and Mrs. Tidal Terrique, was born at Deaf Smith County Hospital. She weighed 7 pounds at birth. Mr. and Mrs. Ezecla Ramez and Mr. and Mrs. Felia Terrique, all of Hereford, are the grandparents.

Mr. and Mrs. Jim Shirley are the parents of a girl, Myra Sue, who was born at 8:26 a.m. Nov. 5, and who weighed 6 pounds and 13 ounces at birth. D. W. Holland of Hereford is the maternal grandfather.

GETTING AROUND  
OTTAWA (AP) — Turnabout is fair play, they say. Tongue Gurcan, 30-year-old Turkish Tourist Bureau official, has decided to play tourist himself. He and his wife are holidaying in Ottawa.

Use  
**Anhydrous Ammonia**  
on your crop lands this winter!

Apply Anhydrous Ammonia this winter—it won't leach out of the soil. It will turn to available nitrogen in the spring when the soil warms up—in time to give your spring-planted crops the nitrogen vital to their growth. Here's what it does! ANHYDROUS AMMONIA—82% Nitrogen—helps your crop develop stronger roots with more resistance to drought, crops that have higher protein content for feeding—helps your yields go up!

We have the know-how on application and equipment. See us for DOW ANHYDROUS AMMONIA.

By JIMMIE GILLENTE

THIS COUNTRY has produced a lot of exceptional crops and some amazing yields. There is one commodity, however, about which very little has been said. That is the rattlesnake crop...

Included in the group were Roy Phillips, Tom Robinson, Robert Veigel, Don Veigel and O. J. Reimling. The snakes were thick enough that they often killed two with one blast from a shotgun...

VETERAN'S DAY is the currently official designation of Nov. 11. As previously announced, the Legion and VFW will stage a joint observation of the event beginning with a breakfast...

Meanwhile, I doubt if there is anything more fitter than a farmer with a field of grain sorghum which he cannot harvest. Most of them are keeping one eye on the bank and the other on the clouds.

THE PHANTOM space ship which has been sighted in several places, including the Levelland area, is certainly a topic for conversation. Cliff Acker says someone called him up around 2 a.m. the other morning to give him some late dope on the object.

2 to let the dog out, but there weren't any trees in the Levelland country so they shot it on back into the orbit.

Way back when the flying saucer craze was first making the rounds, I personally contended that they were a U.S. development, being used in the war of nerves propaganda campaign with Russia.

CHARLEY HOLT thoroughly disagrees with my theory. Charley pooh-poohs off the whole thing with a shrug of the shoulders and two words, "Fool's Fire." Charley says he has heard of these mysterious deals since he was a little kid and adds that the things folks saw around Levelland is nothing more than phosphorus gas.

The Russians are talking about sending a man to the moon next. So far as I am concerned, they can send them all. One thing is for sure, instead of discouraging our kids from reading those half-raised Buck Rogers space yarns, we had better send them to bed early and read the comic books ourselves - if we expect to stay in the running.

WEATHER FORECAST: I'll go along with the weather boys and say that the sun will be out the remainder of the week. This means that the harvest rush will wheel and deal. I'll even throw in 9 to 12 days of continued fair (but cooler) weather - just so we can get the milo crop gathered. One drawback, though, it will be well up into the day before the farmers can get into the fields for dry grain. By the time harvest is over, everyone will be tired, disgusted and happy. We should hit the harvest peak Nov. 15 or 16.

This is what everyone wants to hear, so I figure I had just as well make it an official predic-

If it doesn't turn out that way most of us are going to wind up behind the eight ball anyway. Nobody is going to leave town. They won't be able to finance the trip. My main reason, though, is the fact that clouds really will clear off this weekend.

DON'T LET IT fool you, however. A long, hard winter is coming. The past few days have been a small sample. Standard equipment will include overshoes, car muffins and mittens. If you do not have these items, now is the time to start shopping. You'll need 'em all before spring. If you are the cautious, but comfortable type, it would also be well to throw in a pair of red flannels and, or, a pair of spats. They won't be absolutely necessary, but will come in mighty handy.

Pete Plank, who plays guard on the Whiteface team and recently took top honors in 4-H activities, is quite a boy. He has been limping since the Clovis game, Oct. 25, and finally started complaining about his leg. They gave it a thorough check Monday and found that his leg has been broken since the Clovis tilt. Somehow, he played in the Littlefield game last Friday. Pete now has his foot in a cast and is definitely out-for the season. Understand the break was a small bone in the lower part of the leg.

FRIJO NEWS

No Point in Talk About the Weather

By MRS. OWEN ANDREWS

Since the weather, which is the chief topic of conversation, has already been so thoroughly discussed, we'll leave that to the one who can do something about it and concentrate on doings in the community.

Your regular correspondent is the mother of a new baby girl and she and her husband are quite occupied. They are Mr. and Mrs. George Zetsche. The daughter is seven pound and two ounce Lora Anne. Mr. and Mrs. Owen Andrews are the maternal grandparents and Mr. and Mrs. J. B. Zetsche of Bowie are the paternal grandparents.

Both mother and daughter are doing fine. The baby was born Sunday at Deaf Smith County Hospital.

Mr. and Mrs. Spicer Gripp have had their house moved and are now located a mile south and a half mile east of the former location. They plan to add a utility room to the house, connecting it to the garage, which was set down to the north of the house. Glenn Gripp and his father, A. B. Gripp, of Conway, have been helping Spicer with the work.

About 10 persons were present for a delayed Halloween party at the school house Saturday night. Mrs. Darwin Miller and Mrs. David Vandell planned the entertainment of games, apples, cookies and candy were served.

Mr. and Mrs. Weldon Stephan and Rhonda took Sunday dinner with Mr. and Mrs. Clark Andrews and family. The Rev. B. H. Baldwin was called to Petersburg Sunday to preach at the funeral services for S. H. Pool, a long time friend and member of a church which the Rev. Baldwin formerly pastored. Mrs. Baldwin and Mr. and Mrs. Henry Aycock of the Temple Baptist Dobbis accompanied him Sunday evening. Sunday evening Henry Church of Hereford spoke to the Frío Baptist Church.

Among those who have been ill are Mrs. Doe Mill, Edna Vinson, Mrs. Herb Schmidt, Dale and Tommy Schmidt. Darlene Sparkman celebrated her eighth birthday with a slumber party on Friday night and spending Saturday with her friends. Present were Carol Robbins, Jana Cole, Jane Shearhart and Sheryl Williams.

The Jeff Terrell family was shopping in Amarillo Monday. Mr. and Mrs. Darwin Miller spent the weekend with Mrs. H. M. Mobley. Mr. and Mrs. Frank Robbins and children took dinner Sunday with Mr. and Mrs. Floyd Cole and family.

Veradelle Andrews and Virginia Cox visited the J. E. Andrews home Sunday. They attended services at the First Baptist Church in Hereford Sunday night to hear Rev. Homer Martinez speak at the final service in the revival there.

Mrs. T. L. Sparkman Jr. and Mrs. W. A. Springer were salesladies for Ben Franklin store in Hereford Monday, Dollar Day.

Mr. and Mrs. Glenn Gripp and children went to Amarillo Sunday after church and had lunch.

Mr. and Mrs. Joe Lindsey were supper-guests of the Glenn Gripp family one night last week.

Mr. and Mrs. Olin Parris and Walker visited the T. L. Sparkman Jr. home on Sunday afternoon.

Joe Andrews spent Saturday night with Dick Fellers and attended church at the Methodist Church in Hereford Sunday with Dick.

Announce Officers for School Classes

Officers for the four Hereford High School classes were announced Tuesday following the counting of run-off ballots.

Heading the senior class are Charlotte Moore, president; Fred Lookingbill, vice president; Jo Ann Potkewes, secretary-treasurer; Nancy Godwin, reporter.

Junior class officers are Gwin Morris, president; Kenneth Clearman, vice president; Linda Russell, secretary-treasurer; Bette Jean Noland, reporter.

Jimnie Brown is sophomore president; Terry Hodges, vice president; Twyla Springer, secretary-treasurer; Rosa Lee Strange, reporter.

Ronnie Botkin is freshman class president; George Paetzold, vice president; Karen Sue Daniel, secretary-treasurer; Charles Thomas, reporter.

ATTEND FUNERAL

Mr. and Mrs. Mont Baker left Saturday for Shawnee, Okla., to attend funeral services for his sister, Mrs. Ethel Porter, who died at her home early Saturday morning following a long illness. Funeral rites were held in Shawnee on Monday.

Besides Mr. Baker, Mrs. Porter is survived by two sisters, Mrs. Bonnie Moore of Poteau, Okla., and Mrs. Robert Porter of Oklahoma City.

The Kremlin was originally built as a walled fortress and contained all of the city of Moscow.

Marion Caple in Honor Society

CANYON (Special) - Marion Caple of Hereford has been initiated by Alpha Chi, national honor society, at West Texas State College.

Miss Caple was initiated as a junior member of the honor group, which is composed of the upper 10 per cent of the junior and senior classes.

A member of Kappa Tau Phi and the Mary E. Hudsbeth national honor society, Miss Caple is majoring in elementary education. She is the daughter of Mr. and Mrs. R. D. Caple, 318 Ave. J.

Final Rites Held for Young Girl

Final rites for Linda Huerrea, 5, daughter of Mr. and Mrs. D. H. Huerrea of Rt. 1, were held Tuesday morning in St. Anthony's Catholic Church.

Linda died at 1 p.m. Monday in Deaf Smith County Hospital after a month's illness. She was born Oct. 18, 1952, in Dimmitt. Survivors include her parents, six brothers and one sister. Burial was in St. Anthony's Cemetery.

Phillip Shook Completes School

FORT CHAFFEE, Ark. (AHTNC) - Pvt. Philip W. Shook, whose wife, Rose, lives at 811 N. Main, Hereford, recently was graduated from the eight-week General Supply School at Fort Chaffee, Ark.

Shook received instruction in the fundamentals of Army supply procedures and the preparation of supply records and forms.

He entered the Army in June 1957 and received basic training at Fort Carson, Colo., before arriving at Fort Chaffee.

The son of Mr. and Mrs. William R. Shook, Denver City, he was graduated from West Texas State College this year.

Report as of October 11, 1957, of The First National Company of Hereford, Texas, which is affiliated with The First National Bank of Hereford, Hereford, Texas, Charter Number 5604, Federal Reserve Dist. No. 11.

Kind of business of this affiliate:

The First National Company is a corporation organized for the purpose of constructing a new bank building for the First National Bank.

Manner in which above-named organization is affiliated with national bank, and degree of control:

The First National Bank of Hereford owns 100% of the voting stock of the First National Company. The common stock of the Company consists of 6,400 shares and the par value is \$37.50. The First National Bank owns 2,400 shares which is all of the voting stock. Stockholders of the First National Bank have subscribed and will own the remaining 4,000 non-voting shares. Financial relations with bank:

- Stock of affiliated bank owned by the affiliate (par value) \$ None Loans by the affiliate to affiliated bank \$ None Stock of affiliate registered in name of bank or known to be owned by bank directly or indirectly (par value) \$90,000 Borrowings from affiliated bank, including acceptances executed by affiliated bank for account of affiliate and securities sold to affiliated bank under repurchase agreement \$ None Other obligations of the affiliate to, or known to be held by, affiliated bank \$ None Other information necessary to disclose fully relations with bank: Directors of the First National Company are the same as the Directors of the First National Bank.

I, V. O. Hennen, Secretary-Treasurer of the First National Company, do solemnly swear that the above statement is true, to the best of my knowledge and belief.

V. O. HENNEN

Sworn to and subscribed before me this 4th day of November, 1957. (SEAL) Guilletta Arnold, Notary-Public, Deaf Smith County, Texas

# Champ Tells How To Get the Most Out of Bowling

(EDITOR'S NOTE: Jim Spalding of Louisville, Ky., set a record by winning the American Bowling Congress All-Events championship with 2,088 pins, an average of 232 for nine games. Spalding has written this article on bowling for Associated Press Newsfeatures.)

By JIM SPALDING

Like the great majority of bowlers, I bowl strictly for fun. Bowling is a game that gives me a refreshing break in my business routine of civil engineering. I enjoy the competition, the fellowship and the exercise. I find myself challenged by the urge for self-improvement that the great game of bowling provides.

I bowl in two leagues a week and that's just about par for anyone really interested in the game. Saturday afternoons, some friends and I usually meet for an open bowling practice session. This weekly practice session is one of the reasons I've been able to increase my average in recent years.

**V FOR STRIKES**—The V between thumb and forefinger should point to the 1-3 pocket as you release ball.

To people who bowl just for fun but who would like to improve their game the best tip I can give is that practice is imperative. Practice regularly and practice intelligently. First get your own bowling ball. Obviously, it will fit your grip perfectly and it should "behave" the same way each time you roll it. First, analyze your faults then set out to correct them, one at a time. If your bowling establishment has an instructor, obtain his help because nothing is tougher than trying to analyze yourself.

Remember, too, that there are some practice sessions where you shouldn't worry about your score. If you're not bending your left knee enough, for example, you're going to have a few miserable scores until you get the hang of it. One time when you should worry about scores in practice is in picking up spares. Never shrug your shoulders and go after a spare half-heartedly because it's a tough one and it's only practice. The ability to convert spares is one of the simplest—and most important—ways to increase your bowling average.

**BOWLING STYLE** is simply the way you roll the ball. Unfortunately, many bowlers roll two consecutive balls differently and this habit can prevent a good average in your game.

One of the secrets of improving your average is to "fix" your bowling style so that each time you roll the ball you duplicate your actions as exactly as possible. Once you get this down, you'll come to know what to expect each time you roll the ball.

As for a typical bowling style . . . well, I've been told that my style is about average. At the stance, I bend my body slightly from the waist because I've found that it relaxes me a bit more than standing perfectly upright.

I use a four-step delivery and start from the 12-foot mark which allows me what might be called "average sized" steps. My backswing is not especially high, nor

PERFECT STYLE is the result of perfect balance in ABC champion Jim Spalding's bowling delivery. Curled fingers of right hand are result of spin put on ball at release.

is my arm follow-through. I don't turn the ball to give it spin; I just let it slide off my thumb and give it a lift with my fingertips for spin. My own guess is that I probably bowl more in the style of Joe Wilman than anyone else; I don't have the crouch of Don Carter nor the leg-kick of Bill Lillard. I think Wilman would agree that avoiding exaggerations of style makes bowling easier and more comfortable.

The important point is to adopt a style which feels normal and comfortable to you. Make sure that it's a style that will let you deliver a good working ball. Then stick to that style. Practice your bowling so that each action becomes habit. Then you can duplicate your actions each time you roll a ball. Bowling the same way each time is an important way to improve your average.

**SOME HOOK BALLS** are natural and some are forced. Personally, I feel that one of the greatest improvements I have made in my own bowling came about three years ago when I abandoned a big bending hook (almost a curve ball) that I had forced. Now I use what feels to be a more natural hook. I use only the "lift" of my fingers to apply spin and hook to the ball. The "big-bender" is gone and in its place is a small hook that breaks more sharply just before it reaches the pocket. I can control the small, sharp-breaking hook much better than the big bender. It also works more uniformly under all bowling conditions and on strange alleys. Bear in mind that a hook ball is good only if you can control it at all times. If you can't, you are (Continued On Page 6)

## POTPOURRI

### Dreary Drizzle Has Its Effect on Folks' Looks

By SANDRA GLENN  
It seems those few sunny days which came last week was just a pause in order to dry the people out and get them prepared for the drizzling, dreary weather which is with us again.  
The weather, which is probably doing more harm to the farmer than anyone else, is just a small phase of what is predicted for a long, hard winter. However, not being a weather forecaster, we wouldn't want to say anything which could most certainly be held against us.  
Funny, but in several ways understandable, is the expression on some of the faces around town. For instance, when the sky is dull and silent the people are solemn, when the sun peeps through the overcast of clouds the faces at last began to have a more hopeful look about them, but the minute the clouds overshadow and again hide the sun from the surface, a look of disappointment can be seen on most of the faces.  
That, however, is life and what is the use of being pessimistic? It is easier said than done, as the old saying goes, but since there is nothing to be done about it our only advice would be to find a good cozy chair next to a warm fire and "let the rain come down."

News from a former Potpourri writer: Mrs. Carolyn Pingleton, formerly Carolyn Inman, is now engaged with the paper staff in Larado. Carolyn was employed by The Hereford Brand for two years before her marriage to James Ray Pingleton in December of last year.

Mrs. Ira Ott, 18th District President of the American Legion Auxiliary, will be present in Austin Saturday and Sunday, Nov. 9-10, for the annual fall convention of the American Legion.

Among the 17 members of the Army ROTC at Texas Tech receiving good conduct ribbons was Donald L. Zimmerman of Hereford. Cadet sweethearts of each company presented the ribbons to the boys Thursday afternoon, Oct. 31, at a meeting of the ROTC Cadets.

Donald is the son of Mr. and Mrs. Don Zimmerman.

Miss Helen McCauley and Juanita Bennett attended the (Continued On Page 6)

### Cotton Growers Are Advised To Save Good Seed

**COLLEGE STATION** — Good cotton planting seed with high germination may be scarce next spring. Fred C. Elliott, extension cotton specialist, said the situation which has developed is due to late plantings last spring and the wet weather which has hit all sections of the cotton belt during the harvest season. The situation, he added, is even worse in the eastern part of the cotton belt and seed of certain varieties are almost certain to be in short supply.

Elliott advised cotton growers to save and carefully store any good quality seed of known varieties. This, he said, is one of those seasons when planting seed even with a low moisture content can't be placed in storage and forgotten about until next spring. A continuous check on stored seed is suggested.

Here are Elliott's suggestions for handling seed. Check seed closely for damage before storing and store those with high germination (80 per cent is very good) and low free fatty acid content. Seed saved for bulk storage, he said, should contain less than 12 per cent moisture unless good drying and cooling facilities are available. Small quantities of seed should be turned and sacked.

Large quantities of bulk stored seed, he said, should be cured by aeration to maintain quality. A portable fan and duct system can be used to draw air through the seed. He warned that a moisture content of 13.6 per cent is the critical point beyond which storage may quickly become disastrous. Every effort, he said, should be made to bring the moisture content down to 10 or 11 per cent on seed in storage. Drawing air through the seed must be done during daylight hours and only in fair weather and preferably between 10 a.m. and 4 p.m., he said. Germination test should be run on the seed before planting as an aid in determining how much seed to plant, he said. No germination test should be made until the seed have been in storage for at least 30 days which is the normal rest period of freshly ginned seed. Finally, Elliott suggested a visit with the local county agent for more details on cottonseed storage problems.

### No Comment on Cartoon About Women's Clubs

By ARGEN DRAPER

We've sure taken a kidding over the cartoon, "Grin And Bear It" by Lichty. This cartoon shows club women leaving a club and one says to the other, "I'd be lost if it wasn't for our clubs, Irene. A woman needs something to do after she has her children raised and her husband trained."

There's no comment from the office. The 4-H achievement banquet was certainly a success. We planned for 300 and I believe every one of them was there. Woodrow Northcutt and Billy Dufur earned medals but they are in college, so the medals will be sent to them.

We hear that Billy Dufur has been awarded a scholarship in the Agricultural Division at Texas A. & M. College. Congratulations to Billy on his award.

There are some plates and pans in the office that were left at the banquet. Come by 16 hours belong to you.

Annual reports are due from club women and 4-H members. The club women are to get their annual report to the club presidents. She will take the information which is necessary for her report to council and send the other report to the office. 4-H girls are to mail or bring their annual report to the office.

Home demonstration clubs meeting this month are having programs on "As Birthdays Come And Go." The clubs are planning their program meeting for any (Continued On Page 6)

### Dimmitt Soldier Serves in Korea

1ST CAV. DIV., Korea (AHTNC) — Army Sgt. Willard A. Youts Jr., whose wife, Mae Nell, and parents live in Dimmitt, is a member of the 1st Cavalry Division in Korea.

The division, previously in Japan, has absorbed all units of the 24th Infantry Division in Korea, since the latter's recent deactivation.

Sergeant Youts, formerly a member of the 24th, is a member of Battery A of the division's 52d Field Artillery Battalion. He entered the Army in 1948 and completed basic training at Fort Knox, Ky.

GANGING UP—Wrestler Bob Giegel, in street clothes, moves in to attack Art Nelson as Dory Funk climbs through the ropes to get Nelson from the rear at the Bull Barn Saturday night. Nelson and Funk were engaged in a battle to the finish, which Funk won. (Staff Photo)

## Tag Team Match Is Scheduled

Dory Funk and Bob Geigel will pair off against Tokyo Joe and Hans Schnabel in the Bull Barn Saturday night in the main event of the wrestling schedule. Funk and Geigel recently lost in an effort to take the world's tag team title away from Art Nelson and the Great Bolo here. This will be the first appearance here in several months for Tokyo Joe, the Japanese grappler, and Schnabel, sometimes called the Proud Prussian. The tag team match is slated for two out of three falls or one hour. Preliminary bouts between Funk and Tokyo Joe and Geigel and Schnabel have been scheduled. Last week Funk defeated Art Nelson in a no-time limit, no-fall battle to the finish. Funk won the match after Nelson was unable to answer the bell after 30 seconds. Nelson had taken four falls to Funk's three before Funk won the match. Geigel defeated Bolo in a three-fall preliminary. Geigel won the first and third falls.

FORTUNE TELLING—Jack Renfro has his fortune told by Mrs. Van Coltharp at the Westway community Halloween party last week. Looking on are Deborah Thomas, daughter of Mr. and Mrs. T. B. Thomas, and Mrs. Elmer Combs. (Photo by Mrs. Merlin Kaul)

### Cubs, Scouts Gain Awards

By MRS. R. L. PINNELL

The Cub and Boy Scouts held a community meeting Friday evening in the High School auditorium. The Scouts presented a court of honor and the Cub Pack presented an inspection. Weldon Teague, District Scout Executive of Amarillo and a professional scoutmaster from Dalhart were in charge of the meeting. Several of the Cubs received awards. Among these were David Williams, silver arrow; George Hanwood, gold arrow; Tommy Loveless, on gold and 2 silver arrows, and all the boys and their Den Mothers received a one year service star.

In the Scouts, Terry Williams, Paul Jackson and Freddy Taylor received tenderfoot badges. Sam Brown received the second class badge, Kippy Morgan received the first class and Donnie Morgan received the life badge and five merit badges.

Teague showed a film of the boys taken at the National Jamboree at Valley Forge this summer. The Scouts were presented their new charter. Jerry Burks, who underwent heart surgery this past year, is now working part time. The family is living in Arlington at this present time.

Mr. and Mrs. Odie Stout and family of Chillicothe, Ill., visited with the Manuel Loveless family with the past week. The ladies had been friends for several years and this is their first visit for 14 years.

Rita Speed was taken to an Amarillo hospital Sunday afternoon. She was thought to be suffering with the flu.

Billy Gruhlkey spent three days in a Canyon hospital, with flu this (Continued On Page 6)

## Texas Farm Bureau Plans Busy Meeting

**DALLAS** — The soil bank, production payments, water programs and rural roads are expected to be among the major issues to be debated and voted on at this year's Texas Farm Bureau convention. More than 1,500 Farm Bureau members and their families are expected to attend the 24th annual meeting Nov. 17-20 at the Hotel Adolphus here.

Policies on state issues will be adopted at the meeting and recommendations on national issues will be forwarded on to the American Farm Bureau Federation convention set for Dec. 8-12 in Chicago. Heading a slate of nationally-known speakers is Gov. Price Daniel who will address the convention Tuesday afternoon, Nov. 19. Other speakers include John C. Lynn, Washington, D. C., legislative director, American Farm Bureau Federation; Louie E. Throgmorton, Dallas, vice president of Republic National Life Ins. Co.; and Jeff Williams, Chickasha, Okla., lawyer - humorist - philosopher.

REGISTRATION will get under way at 2 p.m. Sunday, Nov. 17. A vesper service will be conducted by Throgmorton that evening. An open hearing on resolutions will (Continued On Page 6)

## 14 Students from Hereford Enrolled at HardinSimmons

ABILENE — Fourteen students from Hereford are among more than 1,500 students attending Hardin-Simmons University in Abilene this fall.

They include Margaret Rose Alston, daughter of Mr. and Mrs. J. H. Alston, 229 Ave. I; Charles Taylor Canfield, son of Mr. and Mrs. T. C. Canfield; Marlene E. Gilliland, daughter of Mr. and Mrs. Marlin Gilliland, 236 Ave. B; Wanda Marie Kirksey, daughter of Mr. and Mrs. E. J. Kirksey, 207 Ave. C; Marilyn Joan and Margerene Jocelyn Legg, daughters of Mr. and Mrs. Terry Legg, Route 4; Summie L. McAllen, daughter of Mr. and Mrs. S. B. McAllen, 910 E. Third; Teddy Woodrow Northcutt, son of Mr. and Mrs. B. D. Northcutt, Route 4; Eva Mildred Paul, daughter of Mr. and Mrs. Ralph Paul, Route 2; Alvena Ritchie, daughter of Mr. and Mrs. O. A. Brown, 121 Ave. E; Jack Wayne Rogers, son of Mr. and Mrs. Joe Rogers, Route 1; Edward Eugene Sneed, son of Mr. and Mrs. J. B. Sneed Jr., 125 Ave. D; Carolyn Joyce Virden, granddaughter of Mrs. Alice Virden, 612 Park Ave., and Marianne Young, daughter of Mr. and Mrs. E. W. Young. Marilyn is a member of Cow (Continued On Page 6)

## Freeze May Not Have Hurt Plains Cotton Too Badly

**LUBBOCK** — Recent freezing temperatures and general abnormal fall weather conditions may not have reduced the estimated production of the 1957 cotton crop as much as some observers fear, W. O. Fortenberry, president of the Plains Cotton Growers, said this week.

Fortenberry, who has been a cotton producer and ginmer here for more than 30 years, agreed with some agricultural observers that the light frosts of the past weekend might even help crop conditions.

"The freeze came after about three weeks of unwelecome rain, overcast and cool temperatures (Continued On Page 6)

that minimized maturing of cotton. Over the area the freeze was comparatively mild. Northern areas did receive somewhat lower temperatures but the chill lessened its bite farther south," he explained.

Fortenberry estimated that unfavorable weather thus far has probably cut production of this year's crop some 10 to 12 per cent. "Half of that reduction probably is due to unfavorable conditions prior to the frost — too much rain in October and slow maturing of the crop," Fortenberry added.

LESS THAN a fourth of this year's crop had been harvested or was even open at the time of the (Continued On Page 6)

frost. If weather such as this area received the past Sunday through Tuesday can continue, prospects appear good for the area to produce another sizable crop, the PGF president said.

Fortenberry said he expected the cotton that was unopened in the field before the rain and frost to grade out with good quality if no further wet weather was received. "The cotton may be less in micronaire but it shouldn't be down too much in other qualities," he explained.

One of the important things to remember about harvesting cotton from now on, Fortenberry pointed (Continued On Page 6)

WALTER ROGERS WRITES:

# Daylight Robbery in Illinois

To the people of the 18th District:

Many of you will remember the hair raising stories of gangsterism in and around certain sections of Chicago during the roaring twenties. Mrs. Rogers and I were driving through Washington recently and came through that section of the Chicago suburbs that had once been the hangout of Al Capone and other prominent gangsters.

We did not realize where we were until we saw highway signs referring to Cicero, Illinois, Calumet, Illinois, and other notorious names that were in the papers so much during that lawless age. The highway was terrible — two-lane and loaded with large trucks and buses. Traffic was creeping along over rough pavement and everything seemed to be caught in a bottleneck. We were trying to reach a four-lane toll road which we knew was in the vicinity somewhere, but of which the natives apparently had never heard.

Finally we came to a four-way stop intersection where traffic was very heavy. We proceeded to cross onto a better strip of pavement carrying several lanes of traffic. We were proceeding along with the general flow of traffic, all going about the same speed, except that some trucks and passenger vehicles were passing us on both sides, when we were hailed to the side of the road by a uniformed policeman. We were told that we had exceeded the speed limit, according to an electrical device which the police were using and which was located in a car parked behind a sign. There was another policeman on duty also stopping cars.

I asked the officer about the speed limit, and he advised me that it was 35 mph. The only sign so indicating was a small sign by the side of the road that was not visible to anyone in the

center lanes of traffic. The policeman did not explain how he was able to pick out our car in all the traffic with his electrical device or why the electrical device had apparently failed to pick out the cars and trucks that had been passing us. I do not know how fast we were going, because traffic was so heavy that both of us were watching the highway. I do know that we were not going any faster than any of the cars and trucks around us when we were stopped.

The only thing the policeman would tell us was that we must post a \$10 cash bond since we were from out of state. I asked him when we could have a trial, in accordance with basic American principles, so that justice might prevail. He advised me that it would be several days before a judge would be available to hear any traffic cases in that area. I then asked him if he thought what he was doing was right or if he thought the practice that was being pursued would help to solve any traffic problems. He was most apologetic but said he had no choice in the matter since he had been ordered by higher ups to do what he was doing.

Since Mrs. Rogers was driving, I thought seriously of suggesting that he take her into custody and hold her for trial; however, I discarded this thought before making the mistake of mentioning it. It was very obvious that we had been trapped and that the amount of the ransom was \$10. Of course, we could stay for a week or two and have an opportunity to be heard by some judge who was, in all probability, answerable to the same higher ups as the police officer. So, I dug around and produced \$10 and delivered it to this minion of the law? I handed it to him and watched closely as it joined the ransom money of others in

a wallet that was almost as fat as the man himself.

The whole transaction consumed approximately five minutes, during which two other cars were stopped by the other policeman, both of which had out-of-state licenses. As we were leaving our friend with the fat wallet was stopping another car with an out-of-state license, which led me to the conclusion that the electrical eye he was talking about was his own eye which was sending forth beams that made contact only with out-of-state license plates.

Judging from my own observations, I would say that this "daylight robbery proceeding" of this township should be most lucrative for the city coffers. During my short stay at the side of the road, the city took in some \$30. That would mean \$360 each hour, or \$2,880 for an eight-hour day, or \$86,400 per month, or \$1,036,800 per year. Al Capone and his bunch were pikers. These present-day boys have it much better. They don't have to work at night and don't have to hunt for victims. All they do is stand in one place and the customers come to them.

I do point out that the friendly agent of the city, who served as the middleman in exacting this toll from us, was kind enough to tell us how to get to the legitimate toll road so that we would not get into any other traps.

### GIFTS FOR HIGH OFFICIALS

A few years ago it was considered highly immoral and, in many instances, criminal for high government officials to accept gifts; however, the picture seems to have changed somewhat during the past few years. It seems the new policy which has now been adopted is in keeping with the policy followed by a judge who was trying a hotly contested civil suit. At the beginning of the last day of the trial, the judge called the

# Scientist Plot Noises of Space

(EDITOR'S NOTE: In chains of listening stations all over the world, International Geophysical Year scientists are picking up the noisy static of space. Here is a report by a top AP science writer on what they hope to find in the crackle of their sensitive receivers.)

By ALON L. BLAKESLEE, Associated Press Science Reporter

BOULDER, Colo. — The seemingly silent heavens above you are actually somewhat like a breakfast cereal — full of pop, crackle and snap.

But you need radio ears to hear all this racket. It is generated by lightning flashes of thunderstorms — 50,000 storms a day throughout the world — and by effects of our sun.

This noise at times can drown out radio reception — which can be pretty critical or downright dangerous if you're in a plane homing on a radio beam, or using radio to navigate a ship, or trying to hear over radio telephones.

Outer space keeps broadcast-

court to order and announced that on the previous morning he had been approached in private by the plaintiff and had been handed \$15,000. He announced further that during the afternoon of that same day he had been approached by the defendant in the chambers and handed the sum of \$10,000. He advised those assembled in the court room that he had returned \$5,000 to the plaintiff and that the case would be decided on the law and the facts.

Walter Rogers, Member of Congress, 18th District of Texas

ing noise, too, usually heard as hisses or smoother cracklings, all of it radio talk from distant families of stars.

Charting all this racket — and then trying to predict how loud it will be and when — is one goal of scientists during the International Geophysical Year (IGY).

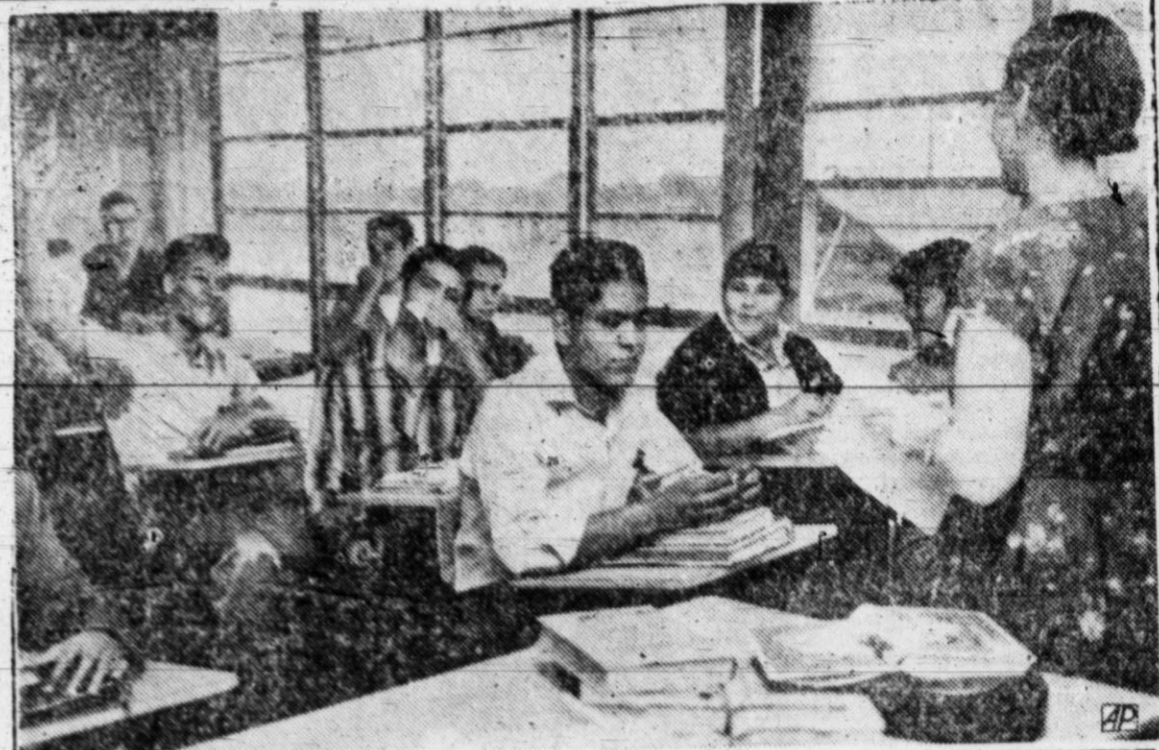

With good predictions, radio signals can be stepped up to ride steady and clear over the noise. Or different frequencies can be chosen to get through, or better equipment designed, explains William Crichtlow, chief of the radio noise section of the Boulder Laboratories, National Bureau of Standards here.

The knowledge and forecasting of atmospheric noise would benefit every user of radio, reducing the risk of accidents to planes and ships, and improving all kinds of radio communication.

To do this, a world-wide chain of 16 special radio stations is tuning in and recording atmospheric and cosmic noise. The IGY, a 64-nation effort to learn new facts about our world and its natural events, provides a global study of the radio cacophony.

Most of our earth-born static or noise is created by storms. Lightning flashes generate energy at all frequencies. Low frequency noise from thunderstorms sometimes can be heard by radio around the world. The heavenly noise varies with season, geography, time of day and sunspot activity. It's noisier at night than in the daytime.

At other times, storm static is bothersome only locally. The sounds are so characteristic that directional antenna can help locate storms far away, or even follow a local weather front, Crichtlow

HIGH SCHOOL INTEGRATED—Timothy Winters, a lanky Negro expected to star on Pleasanton High School's basketball team, contributes an answer in class discussion on the first day of integration at the school. (AP Photo)

said. The bureau designed special noise recorders for use at Boulder, at Bill, Wyo., at Byrd Station in the Antarctic, in Hawaii, Greenland, Panama, Brazil, Sweden, Morocco, Nigeria, South Africa, Japan, India, Malaya, and Australia. All will be in operation by the end of this year.

The listening post of this station, 15 miles away at Gunbarrel Hill, is a wooden building 8 by 12 feet and 8 feet high, nicknamed the doghouse. On the roof is a 21-foot vertical antenna surrounded by a network of 90 wires stretching horizontally from the roof to poles 100 feet away.

Once a day a scientist visits the doghouse, calibrating equipment and removing noise recordings traced on graph paper.

Crichtlow and his team at the Boulder Laboratories are recording and analyzing all the data collected during the IGY by all 16 stations. He figures this means 400 readings per day per station, or some 2,300,000 a year. Electronic computing machines make it possible.

Noise forecasting maps have been drawn in the past. IGY findings will make the maps more accurate, not just for general seasonal noise estimates, but for forecasts at more specific times and places, Crichtlow said.

Then radio engineers can know when to step up power to assure reception — just as you speak louder when a truck goes past your house — or what minimum power will get through, or how to improve equipment, or choose the

best times on fixed circuits to assure good listening.

### ILLEGAL HOBBY

JUAREZ, MEXICO. — Police here have advised Raul Moreno to get another hobby.

He was arrested after being observed letting the air out of an automobile tire.

He explained he liked to stand by and watch the reaction of the car owners.

### NOTHING DOING

HOUSTON, Tex. — Mrs. Beverly Green, 28, vowed to go to jail before paying a fine for speeding and not having a driver's license.

Her husband said: Nothing doing — who'd take care of the kids.

So Mrs. Green paid a \$85 fine.

THE NEW ROCKETS ARE HERE...BRINGING YOU

# OLDSmobility

...THE NEW WAY OF GOING PLACES IN THE ROCKET AGE!

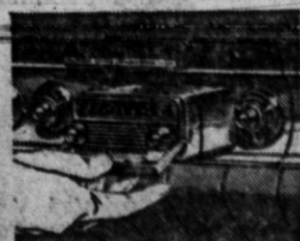

Four-Beam Headlamps increase night-driving safety, reduce glare.

FOR 1958 ...

OLDSMOBILE CREATES A NEW CLASS OF CARS!

New, more-efficient Rocket Engine gives you outstanding performance. Remarkable improvement in combustion offers you up to 20% greater fuel economy.

New Trans-Portable Radio serves as your regular car radio, but can also be unhooked and used as a lightweight, 160-hour battery-powered, transistor portable.

Dual-Range Power Heater delivers the exact amount of heat or ventilation exactly where and when you want it. You push a button...power does the work!

NEW-MATIC RIDE™ (A TRUE AIR SUSPENSION) TURNS ROUGH ROADS INTO HIGHWAYS OF SMOOTHNESS. In the 1958 Oldsmobile you'll find most everything you've ever wanted in a motorcar—outstanding styling; smart, tasteful design; delightful new features; alert new Rocket Engine performance; supreme comfort; daring new colors and fabrics. And most important of all, you'll find real down-to-earth operating economy! As never before, Oldsmobile for '58 gives you true big-car size, big-car comfort and handling, big-car smartness—combined with budget-car thrift. Once you Rocket-Test the '58 Olds, you'll know for sure, that from its safer Four-Beam Headlamps to its sparkling Twin Blades—it's the biggest value in Oldsmobile's 60-year history!

\*Optional extra cost.

# British, American Tastes Are Literary Worlds Apart

By W. G. ROGERS  
Associated Press Arts Editor

NEW YORK (AP) — We share the English language with the English, but we don't always share books.

Most of times we wouldn't dream of reading theirs, and they wouldn't read some of ours, either.

A recent British visitor here, head of the English-speaking world's oldest publishing house, had these and other novel comments about the tastes of the English and the Americans, their total unpredictability and, often enough, the impossibility of interchanging them.

He had nothing against our taste, nor any particular defense of the English, but he noted several difficulties:

"Certain subjects do not cross the Atlantic. For instance, we do not like your symposiums. Probably we don't like them because the quality of the writing varies so much, there is no unity."

"Furthermore, we write shorter things. American books are often too long for us."

Are they interested in our Civil War, the subject of a flood of recent publications? "Not really," he admitted. "What's more, there is no topic or event in our past which concerns us anywhere near so much as this conflict does you. But there is an increased interest in history, and I wonder whether that is not bad. It may mean we are unsure of our present and future."

JOHN BROWN

All the girls at the office of his firm's American branch kept whispering excitedly: "He looks like Rex Harrison!" He does, too, but he is not. He is plain John Brown, publisher and manager of Oxford University Press, England. He came to call on Oxford in New York and made the rounds of Eastern universities whose professors write books for Oxford. Among his other remarks on the transatlantic book situation were these:

"How-to books are getting more popular now in England, but we cannot use yours because of the different trade names. In the past we were not much

interested in the history of science, but now that interest awakens.

"Technical books are not so popular with us, we believe a man learns techniques at the bench. We have very little interest in inspirational books."

"Though I know about fiction only as a reader, it is true that your best-sellers are not predictably sure-fire in England."

The English publisher does not

concentrate on best-sellers as we do, he said. The quantities he sells are apt to be, not quantities of one book, but of a lot. Break-even point is about 1,700 copies, and twice that sale would hardly get an American publisher out of the red.

One the other hand, moving in this direction, New York Oxford finds some London Oxford religious books are its most consistent sellers — but they are not inspirational. Henry Z. Walck, president of New York Oxford, says London Oxford's most usual contribution is in the area of scholarship — and he notes, thankfully, that the higher up the scale the scholarly tone lies, the less difference there is in English and American spelling and English and American

phraseology. Some books are brought over all ready for sale, some are photographed, some printed here, some reset, some re-edited. The paperback book here is apt to cost as much over there, exported, as a hardbound volume. "Your standards of production are much higher than ours," said Brown, who in particular praised the "magnificent bindings." But he noted books are more expensive here.

Brown, here for the first time in nine years, said a man doesn't need to be Oxford University to join Oxford University Press. But was he Oxford? In fact he was, he said. He served in the war in the Pacific, was captured at Singapore and held in Japanese prison camps 3½ years.

### MEETING POSTPONED

The meeting of the Hereford Garden Club scheduled for Nov. 8, has been postponed in order that several of the club members may attend a lecture which will be held in Lubbock on that date.

The date picked for the next regular meeting will be Nov. 21, at 3 p.m. The meeting will be in the home of Mrs. Bill Hromas, 200 block, Park Ave., instead of in the home of Mrs. C. C. Ferguson as first planned.

# Don't Bore Your Audience; Edit Film Before Holidays

By IRVING DESFOR

WITH THE HOLIDAY season approaching, it's certain that home movie and slide showings will reach peak activity at family gatherings. But even with a tolerant captive audience, there's much you can do now to make the occasions easier to take and possibly enjoyable.

First, boil down your pictures to the very best shots. Eliminate all the duplicate or repetitious shots unless you have a definite sequence of expressions or a story telling series. Get rid of the ones which reveal that you moved the camera, exposed incorrectly or didn't hit the focus on the nose. Incidentally, by never showing the bad shots, you're likely to gain, and maintain, the reputation of being a pretty good photographer.

Then arrange the year's crop of pictures in some sort of orderly or story-telling groups. Slide magazines should be complete units so that when a change to a new magazine is made, the intermission will not destroy a specific sequence or a particular mood.

When the final order has been established, go through once again as a final check against out-of-sequence, reversed, or upside-down slides. In other words, when you can run through the pictures without the necessity of an apology they're ready for showing.

But there are other preparations to attend to. Select a firm support for the projector and a good spot for the screen so as to provide adequate and comfortable seating for the audience. Let's have none of this emergency moving of the piano or television set and shifting

HOME SHOW PREVIEW, staged in advance of holiday family gatherings, weeds out the year's crop of slides to make a more enjoyable session for viewers. Here the host too can relax as a fully automatic Balamatic 500 projector, with its always-in-focus feature, takes over.

of lamps from the table to the floor to make room for the projector.

For ambitious hobbyists who have a tape recorder, the final frosting on the cake is to write a script, add appropriate music and record the commentary. There's no better way to preserve the enthusiasm of a first commentary and to spare the host's voice and memory at all future showings.

Today, the newest slide projectors have built-in refinements that make showings an automatic pleasure literally. But until now, there

also has been one bugaboo plaguing projector manufacturers and causing extreme annoyance to viewers: the "popping" of slides. In the projectors with 300 watt lamps or higher and affects cardboard-mounted slides. When placed in focus position, the heat of the lamp caused them to "pop" out of focus.

That problem seems to have been licked now in the very latest projector which should reach the camera stores shortly.

## State Cotton Allotments To Be Apportioned Later

COLLEGE STATION — Farmers in Texas will have 7,471,661 acres available on which to grow their 1958 upland cotton crop and producers of extra long staple cotton 27,829 acres.

These state allotments, according to the State Agricultural Stabilization and Conservation Committee, will be apportioned among the counties and the county allotments, to be announced later, among the farms according to the provisions of the law and regulations issued by the Secretary of Agriculture. The state committee adds that individual farm allotments will be mailed to cotton producers prior to the Dec. 10 referendum on marketing quotas for the 1958 crops.

I saw a preview demonstration of the Bausch & Lomb Balamatic 2 x 2 projector and once the first slide was in focus, there was no popping or refocusing of slides for the remainder of the magazine's 40 slides.

It is accomplished by designing the warm-up chamber so that the slide coming on next is heated to the same degree as the one on view. In other words, it is pre-popped.

The Balamatic 500 is fully automatic in that the operator doesn't have to hover around to change the focus while the slides are changing automatically. A knob can be turned to adjust the time cycle between changes from a fast four-second interval to a long 60-second period between slides.

A knob on the single, centralized, illuminated panel for all controls can also be pressed for semi-automatic operation and worked with a remote control button. This feature is also found on a 300 watt model and enables the operator to change slides at will at any interval desired by pressing the button from a distance.

The state committeemen point out that the Dec. 10 referendums, for upland and extra long staple cotton growers, will determine whether marketing quotas will be operative for the 1958 crops. At least two-thirds of those voting in the two referendums must approve the quotas if they are to remain in effect. Acreage allotments, however, say the committeemen will be in effect regardless of how the votes go. Acreage allotments are a condition of eligibility for price support.

A national marketing allotment and national acreage allotment for upland cotton must be proclaimed for the following year if the Secretary finds that the total supply of upland cotton for the current marketing year exceeds the normal supply. For extra long staple cotton, quotas and allotments must be proclaimed whenever the total exceeds the normal supply more than 8 per cent.

The village of Santa Cruz, N. M., has a legal name that will make you lose your breath. Its full title is: La Villa Nueva de Santa Cruz de los Espanoles Mejicanos del Rey Nuestro Senor Carlos Segundo.

## Laguna Area May Be Seen Dry

PORT ARANSAS, (AP) — Ernest G. Simmons, who has made a survey of the Laguna Madre, says the upper eight miles can become dry land within the next 25 years. The prediction is made by the Scripps Institution of Oceanography scientists in a survey just published by the University of Texas Institute of Marine Science at Port Aransas.

"Activities of mankind," Simmons says in his summary, "sel-dom lead to stability in the work of nature. Probably the largest change wrought by man in the area was the building of earth-filled causeway and canals."

"Core samples taken by the writer indicated that the flats south of the causeway to Padre Island were filling at the rate of one inch per year. In addition to taking cores, the investigator placed marked stakes in the bottom near the causeway and measured deposition in this manner.

"Silt, carried by the water, banked against this fill and was dumped on calm days.

"THE RESTRICTED Intracoastal Canal dropped its silt after it had passed the causeway much as a river drops silt at the mouth. Several fairly deep spots have silted up 12 inches or more. Openings between the spoil banks have been reduced by 50 per cent. Oil dredging and drilling apparently silted 24 square miles near Yarrow Pass and five square miles near the Pure Oil Channel."

Simmons' report explains many of the phenomena that make the Laguna Madre in far South Texas of interest to sportsmen and biologists.

For instance the red water that occurs at some time or other during most summers is probably caused by one or more factors, in-

cluding dissolved iron compounds, decaying vegetation and poor water circulation, microscopic plants, and possible clay deposits.

He points out that the average depth of water in the area is only three feet, and the average width four miles. And because the northern end of the area has its water flow restricted by the Padre Island Causeway, and a similar obstruction is caused by the bar that splits the upper and lower Laguna into two basins, the Laguna is silted up at a rate of 12 inches per year.

The watershed of this lake is silted up at a rate of 12 inches per year, and water flow into this area is limited to creeks.

Periodically fish have been killed in the Laguna by conditions of extreme cold and high salinity, Simmons' report says, but he states that, since the opening of the Intracoastal Canal through the entire length of the Laguna in 1948, deaths from salinity have practically eliminated.

### ROTARY INTERNATIONAL

HOUSTON, Tex. (AP) — The 598 members of the Houston Downtown Rotary Club include natives of all 48 states, Greece, France, Sweden, Mexico, England, the Dominican Republic, Italy, El Salvador, Ireland, Germany, Scotland, Canada, Venezuela and Cuba. Only 71 are natives of Houston.

Announcing

THE PURCHASE OF

**KINSEY BUICK CO.**

By

**GLEN OSBORN**

We are indeed happy to announce the recent purchase of Kinsey Motor Company from Mr. Delbert Kinsey, of Portales.

At this time we plan no changes in personnel or policy, but will continue to give the same friendly, courteous service that you came to expect from the entire organization under the capable management of Mr. Kinsey.

We have already met many of you . . . others we have not, but we've been here long enough to know that we're going to like Hereford and the surrounding area, and we're looking forward to many pleasant years as your Buick dealer.

And speaking of Buicks . . . the new B-58 Buick is now on display in our showroom, and if you haven't seen it, drop around at your earliest convenience! We'd like to get acquainted with you . . . and acquaint you with the 1958 B-58 Buick.

Glen Osborn

**OSBORN BUICK CO.**

Phone 42

Announcing

the sale of Kinsey Buick Company to

**GLEN OSBORN**

Glen Osborn, formerly of Tulia has purchased the Kinsey Buick Co., effective immediately.

We have sold the Buick business, but we are still vitally interested in the Hereford area, and of course, the progress of the new Buick Dealer, Glen Osborn. We are pleased to have found a buyer of Mr. Osborn's background . . . he comes to us highly recommended, and we're sure you're going to find him a "nice guy to do business with."

Many of you of course, have already met Glen, but if you haven't, we suggest that you drop by at your earliest convenience and do so.

We would also like to take this opportunity to extend to you our sincere appreciation for the many years of loyal patronage and friendship that you have afforded us since we first entered the automobile business in Hereford. We have enjoyed our association with the folks in this area very much, and we sincerely hope that if you're ever in the Portales area, you drop by to see us.

Again, may we say "Thanks" folks . . . your friendship has meant a lot to us.

D. C. Kinsey

**CALM WINNER**  
 WINDSOR, Ont. (AP) — A gleaming 1957 car, first prize in the Windsor firefighters' Benefit Fund raffle, didn't excite winner Ed Dudley. President of the Windsor Automobile Club, he drove a 1904 model to pick up his prize and said he would sell the new one.

**PEARCUMBERS**

DURANT, Okla. (AP) — No one believed J. T. Bruce when he told friends he was picking cucumbers from his pear tree.

They went to see, and sure enough, he was. A closer inspection showed the cucumber vines had climbed up the tree and fruited.

**CANDLEMAKERS**—This quartet of garden clubbers demonstrates the art of making holiday candles at the Bud To Blossom Club meeting held Friday afternoon in the home of Mrs. Glyn Bilbrey. They are Mrs. Jimmy White, left, who was in charge of the demonstration, Mrs. Preston Hagans, president, Mrs. Glyn Bilbrey and, seated, Mrs. R. N. Yarbro.

**Demonstrates Candle Making for Bud to Blossom Session**

The holiday spirit dominated the Bud To Blossom Garden Club meeting Friday afternoon in the home of Mrs. Glyn Bilbrey. A demonstration of the art of holiday candle making was presented by Mrs. Jimmy White. A variety of Christmas candles in various sizes were made and decorated in the pre-Christmas program.

Mrs. White demonstrated the basic steps in candle making from the melting of the paraffin and the adding of crayons for coloring to pouring into the various-type molds. Beaten paraffin was used as a frosting after the candle was hardened.

Decorations applied included puffs of tinsel, colored balls, sequins, beads and glitter.

The wick was put in last by making a small hole in the center of the handle with a hot ice pick, and then pouring hot paraffin around the wick to secure it firmly.

The next meeting of the club will be held on Nov. 15 in the home of Mrs. Delmo Williams. A program on "Garden Therapy in Mental Hospitals" will be presented.

**Bible Words for Today**

**TITUS 3:2** — "Speak evil of no man...but (be) gentle, showing all meekness unto all men." (King James)

My first knowledge of the medical profession was gained from our family doctors. In making a diagnosis of some childhood disease one of their first requests was, "Let me see your tongue." In our social contacts we cannot learn much by looking at the tongue, but by listening we soon know its kind and color.

Some deserve the reputation of having a merciful tongue, a kind word, and a gentle voice, while others are known to have a long tongue noted for gossiping, fault-finding, or profanity.

David took a stand which we need to follow today, when he wrote in Psalm 39:1, "I will take heed... that I sin not with my tongue; I will keep my mouth with a bridle." Such a resolution followed in spirit and in letter would greatly improve the fellowship in our churches, for most of the unpleasant experiences in our church life are caused by the uncontrolled tongue.

So the next time you are tempted to pick the pastor to pieces, complain about the choir, or find fault with the organist, remember the words of James 1:19, "Every man among you seemeth to be religious, but he that is not his tongue, ...this man's religion is dead."

The Rev. Bruce H. Price  
 First Baptist Church  
 Newport News, Va.

**Hobo Theme Used at Youth Group's Halloween Party**

Members of Junior Two departments of the Sunday School of the First Baptist Church were entertained at a Halloween party given in the garage at the home of Dr. and Mrs. L. B. Barnett Saturday night.

The party was in the form of a hobo get together and members came in appropriate costumes in varied interpretations of the old man of the road.

Mrs. Glyn Bilbrey, superintendent of the department, was in charge of the party, assisted by Mesdames Tommy Braddy, Kenneth Coker, A. J. Schroeter, Mr. and Mrs. Ernest Kendall, teachers, and others attending were Mrs. Troys Carmichael, Dr. Bar-

nett, and Glyn Bilbrey.

Members attending were Merle Carmichael, Lynne Sowell, Cathy Bilbrey, Gayle Witherspoon, Patricia Price, Cheryl Edmonson, Camilia Ann Anderson, Kyle Kendall, Lynn Cook, Gilbert Lee Sims, Douglas Roberson, Joe Childers, Gayland Ward, Mike Ranspot, Paul Christman, Johnnie Pool, Bill Jack Gilliland, Gary Don Roberson, Louis Barnett, Dale Minor, Steve Seigler, Nancy Boyer, Ann Cunningham, Penny Johnson, Linda Faye Fogle, and Ann Braddy.

**BAD DAY**  
 HUNTINGTON, W. Va. (AP) — A 52-year-old man, disgusted with life, leaped off a bridge into the Guyandotte River, but all he got was mud in his eye.

Climbing up the bank, he moaned: "Everything's all wrong. Even the river is too shallow."

**HOME REPAIR DOs-DON'Ts**

By ANDREW C. LANG

DO... know that a table saw is called a 6-inch saw, an 8-inch saw, and so on, depending on the maximum diameter of the blade that can be used in it.

DO... remember that a tiling arbor-saw is adjustable so that the blade can be angled to make a bevel cut, while a tilting table saw is adjustable so that the top can be angled for the same purpose.

DO... whenever possible, keep the table saw in the center of your workshop so that large pieces of wood can be conveniently maneuvered.

DO... if this is not possible, keep your table saw against a wall but equip its stand with casters which can be locked after the machine has been moved into position.

DON'T... use your table saw without keeping the saw guard in place, except for those operations where the guard will interfere with the cutting.

DON'T... be distracted by either talking to or having somebody talk to you while you are making a cut; turn off the machine if you want to converse.

DON'T... stand in front of the machine while making a cut; stay just enough to the side so that you will not be hit should there be a kickback of the material being cut.

DON'T... overlook the use of a dado set for cutting-grooves and dados of various thicknesses.

Australia is now establishing patrol posts in its trust territory of Papua, New Guinea, "to stop the native people killing or inflicting barbarous punishments on one another."

better off with a straight ball because accuracy is the way to a good bowling average.

Spin and a resultant hook can, of course, be put on the ball by turning the wrist (right to left for a right-hander) just at the moment you release the ball.

A more natural, more effective hook and one that is more accurate for most bowlers can be developed by using "finger lift" alone. To do this, keep the "V" between thumb and index finger pointed at the pocket as you release the ball (a handshake position). The upward sweep of the arm in the follow-through motion will give a lift and spin to the ball at that instant when the fingers alone control it after the thumb slides out of the ball first.

This type of hook is not a "big bender" but it can be a mighty good strike-getter because you can control it.

WHEN MY bowling scores start falling I look first at my timing. Over the years I've found that lack of timing is one of the primary bowling faults. Of course, timing is essential to almost every sport.

Timing is the smooth coordination of all the separate actions you go through to deliver a bowling ball — pushaway, steps, arm swing, slide and release of the ball at the foul line. One body motion has got to flow into another in smooth, uninterrupted sequence.

Practice builds timing. As you go through the motions in practice, you gradually build muscular habits so that each action feels natural. Then the total bowling motion that puts all these actions together also becomes a habit that does not require thought. There is absolutely no substitute for practice — and more practice — to gain timing.

It is very puzzling, however, when your timing goes awry after you once have perfected it. The most frequent cause for this is unconsciously making some little change in your bowling style. Perhaps your backswing is a trifle higher. That means you've got to readjust the backswing's coordination with your steps to perfect your timing. If you push the ball away just a little more or a little less, the relationship of all your arm motions to your steps must be readjusted or your timing will

be off. Sometimes you may find yourself dropping the ball behind the foul line instead of getting it out on the alley 6 to 12 inches beyond the foul line. There's one way you can discover this fault for yourself. Put a hand towel on the foul line. If you're dropping the ball short of the foul line, the ball will take the towel with it.

However, the little thing that has thrown you off may be difficult to find. Practice is the only way to look at it.

It's usually best to have someone else observe you during practice to point out the change in your style. And, of course, the best person to check you over is the instructor at your local bowling establishment.

When bowling becomes work, suspect your timing. When timing is right, it takes very little effort to bowl; you're letting your ball do the work.

# Freeze...

(Continued From Page 1)

out, is that farmers should check their fields closely before stepping and be sure the cotton is ready to strip. If farmers strip before cotton is ready and green bolls are mixed with mature cotton, it will mean trouble for the ginners and will result in lower grades and micronaire, he added.

OTHER AGRICULTURAL authorities agreed with Fortenberry. One Platview farmer, Frank Moore, said if a hard freeze will hold off now for two or three weeks and the sun continues to shine, cotton will pop open fast. The light freeze damaged staple only slightly, was his opinion.

Another continued wet spell is the biggest danger cotton now faces, Fortenberry continued. Another frost or freeze wouldn't be as harmful as more wet weather. "What we need now is just more of this warm, sunshine and moderate winds," he concluded. A larger percentage of the 1957 crop may be machined harvested because of this fall weather. Observers agree that 80 to 90 per cent of the cotton now in the fields will probably be stripped instead of hand pulled. This may lower the average grade and micronaire since some immature bolls will be mixed with mature cotton and will probably result in more middling cotton. Light spots and spots from now on will depend to a large extent on the moisture received.

days with the R. D. Sisk family. Saturday visitors in the home of Mrs. L. L. Biddle were her daughter, Mrs. Billy Don Brown and Mrs. Floyd Brown.

Jimmie and Maxine Brown of Canyon spent the weekend with homefolks, Mr. and Mrs. Floyd Brown. Jim is attending West Texas and Maxine teaches in Amarlo.

Mr. and Mrs. John Skaggs and Edd Klein attended the Shrine Ceremony in Lubbock the past weekend.

Sunday visitors in the home of his sister, Mr. and Mrs. Robert Jacobson, was Mr. and Mrs. Henry Baumgardner and family of Lubbock.

Mr. and Mrs. B. L. Kinsey made a short business trip to Clovis and Portales, N. M., Thursday through Saturday of this last week.

Mr. and Mrs. Murry Davis of Shamrock were Sunday visitors at the Baptist Church. Davis is a retired postal employe and was associational Treasurer of the Pan Fork District for some time. The couple are en route to California to make their home.

Mrs. Horace Betts and children spent the weekend with a daughter and her husband, Mr. and Mrs. Gene Hammett at Lockney.

Jeanie and Lurline Simmons of Little Rock, Ark., visited their uncle and aunt and family Saturday. They are Mr. and Mrs. E. B. Pounds.

Jessie Fincher and W. C. Edmonds of Dallas, visited with several of the people in the community this weekend.

The Rev. Bill Lewis conducted graveside service for the infant son of W. W. Benton Saturday. He was born Friday at the Deaf Smith County Hospital. The family are now of the Simms community.

Mrs. A. R. Shipp, mother of Pat Shipp, arrived back in Adrian Monday evening. She reports a wonderful summer in Alabama with son, Mississippi and Tennessee with relatives of her father and in Kentucky with a daughter. She saw the Grand Ole Opry and the U. S. Mint at Fort Knox while in Tennessee. She traveled home by air and was completely sold on the idea of that type of travel she said.

# Texas...

(Continued From Page 1)

Monday morning. Special commodity conferences will be held that afternoon.

One of the features of the convention will be the finals of the TFB queen contest scheduled Monday evening at 7:30 in the Crystal Ballroom of the Baker Hotel.

The Tuesday morning session (beginning of the convention proper) will feature an annual report by TFB Secretary-Treasurer Loys D. Barbour, Iowa Park; and the annual address by TFB President J. Walter Hammond, Tye. Recognition ceremonies to honor counties and individuals who have made outstanding accomplishments in membership work, service programs and public relations will also be held Tuesday morning. Lynn and Gov. Daniel will speak at the afternoon session.

District caucuses of voting delegates will be held at 4 p.m. that day to nominate directors. Williams will be banquet speaker that evening. A dance will be held after the banquet.

ON THE FINAL day of the convention, Wednesday, Nov. 20, the more than 600 official voting delegates will meet in business session to debate and vote on proposed state policies and recommendations to the national convention. This is the culmination of the Farm Bureau's policy development process on the state level.

Adopted resolutions pertaining to state issues will become policies to guide the TFB through next year. Adopted resolutions on commendations to the national convention.

More than 180 organized county Farm Bureaus in Texas have already held their annual conventions and have forwarded their recommendations on state and national issues to the Texas Farm Bureau. A 39-member state resolutions committee will meet Nov. 13 in Dallas to write tentative resolutions based on recommendations from the counties. These tentative resolutions will be submitted to the voting delegates Nov. 20 at the concluding session.

Gilbert Tunnell of Swan Quarter, N. C., hired an entomologist to inspect the building of his new house to make sure that termites would not invade the premises.

FAIR WARNING  
ALBUQUERQUE, N. M. ☞  
Sign at an Albuquerque drive-in cafe: "Be brave. Eat here."

INFLATION, 1852  
MEADOW VALELEY, Calif. ☞  
Who said prices were cheaper in the old days? Ponder these: Peaches, \$2 a jar; flour, \$8 for 50 pounds; bacon, \$1, a pound. That's what gold miners who traded at the Meadow Ranch store in this Sierra community paid in 1853. The prices are shown in store accounts, passed down by early-day merchant, Wilson Deane. As the story goes, the miners considered those prices reasonable as everything was brought in by mule pack train, often the last leg of a journey that began by ship out of New York.

FOOT FACTS  
BOWLING GREEN, Ohio ☞  
After a year-long study of walking

habits, Dr. Willard C. Myser and Dr. James G. Haub of Ohio State University's zoology and entomology department reported to an Ohio Academy of Science meeting here: Males walk faster than females by taking longer strides; to walk faster, people take longer rather than faster steps; people

walk faster when the temperature is lower.

BIT CANTELGUPE  
PONCA CITY, Okla. ☞  
O. W. Meyer has grown a lot of big canteloupes but he had the prize this year. It weighed nine pounds and measured 25 1/2 inches around one way and 28 inches the other way.

## NEW FORD TRUCKS for '58

NEW TILT CAB TRUCKS... Lowest priced Tilt Cab line in America!

NEW '58 FORD RANCHERO... America's first work-or-play truck!

'58 FORD TRUCKS... FIRST WITH THE FEATURES THAT COUNT!

NEW '58 FORD PICKUP... Modern Styleside body is as wide as the cab and standard at no extra cost!

# Step ahead...

with all that's new...costs less, too!

Meet America's newest, most modern trucks—Ford for '58! Discover the new advances in this pace-setting line. See the many advantages that help you do your job better and at lower cost!

Then match your requirements against Ford's over 300 models. Whatever your need—from pickup to heavy duty tandem—Ford's got it! And you'll get a truck that costs you less to own, less to run and lasts longer, too.

**NEW capacity!** Extra-wide Styleside pickup bodies have 23% more loadspace than any other competitive pickup. **NEW heavy ride!** Scientific Impact-O-Graph ride tests have proved amazing superiority of Ford's suspension over competitive pickups... a ride mighty close to that of a car!

**NEW comfort!** Driverized Cabs have non-sag seat springing, suspended pedals and weather-protected inboard steps.

**NEW power!** Powerful, more rugged V-8 engines! More Ford offers Short Stroke economy in both Six and V-8!

**NEW safety!** "Safety Vision" dual headlights... Lifeguard steering wheel... and double-grip door locks... standard on all Ford trucks!

**NEW "fine car" conveniences!** Ranchero offers all power assists, even power windows and air conditioning, factory-installed, at Ford's low prices.

\*Based on a comparison of manufacturers' suggested retail prices.

THE BIG FLEETS BUY MORE FORD TRUCKS THAN ANY OTHER MAKE!

## FORD TRUCKS COST LESS

... LESS TO OWN... LESS TO RUN... LAST LONGER, TOO!

# HOMES FOR AMERICANS

THIS LUXURY-SIZED SPLIT LEVEL, with a luxury design, has five bedrooms, three and a half baths, attached garage and a half basement on four different levels. The combined length of the living and dining areas is more than 37 feet. The living and sleeping levels have a square footage of 2,231. This smart and modern plan, HA-4-5M, was executed by Designer Robert B. Marshall, 455 Herbert St., West Hempstead, N.Y.

## ON THE HOUSE

### 'Light Trough' Helps Solve Ceiling Job

THIS IS THE ARCHITECT'S IDEA for creating a "light-trough" in a dropped ceiling project. A "luminous ceiling" also could be used as an alternative plan.

By JOHN O. B. WALLACE  
AP Newsfeatures  
HAVE YOU EVER thought of lowering the ceiling in your home?

A reader from Winona, Minn., wants to do it. Take our word — it's no do-it-yourself project under the conditions the lady from Minnesota imposes.

Mrs. L. M. writes: "I have a house that has a 10 1/2 ft. ceiling. I would like to lower the ceiling to the picture moulding, which is 16 inches lower than the ceiling. But the window casings are only 10 inches below the ceiling."

"How can I lower this ceiling and still take care of the windows, without putting in all new windows in the house? I have 18 windows, all down stairs, which would be very expensive if I had to change all of them. Thanking you for any information you can give me."

The simple solution to this problem, of course, would be to compromise by not bringing the ceiling down to the level of the picture moulding — but to hold it high enough to clear the top of the window.

In such a case, the owner would have a choice of the type of ceiling to use because it would be a plain, flat surface, the new ceiling could be plaster, dry wall, wood, or could be finished in any one of the many wall board or acoustical tile finishes.

The reader, however, presumably has good reasons for wanting the ceiling lowered to the level of the picture moulding. In seeking a practical solution, we enlisted the technical advice of a top architect. His first reaction was to suggest the simple solution.

"But, wait a minute," added Architect Herman H. York. "You know, this is a very interesting problem. Let's put our heads together and see what we can come up with."

The result is an ingenious method for lowering the ceiling, keeping the windows — and supplying, as well, a dramatic effect to the interior.

The essence of York's idea is to create a "light trough" across the entire wall in which the windows are located. In this way, the ceiling is brought down only to the top of the windows at the point where the ceiling joins the side wall; yet beyond the "light trough," the ceiling will be lowered to the level of the picture moulding.

This indirect lighting trough adds effective decorative treatment to the room and also enhances lighting for the entire area. "To carry the idea another step," York says, "a modern treatment could call for carrying the light trough around two or more walls of the room, thus leaving the ceiling down only in the center area of the room."

"The use of a light trough could be limited to the width of the window, but a more satisfactory result could be obtained by running the trough along the entire wall." Additional lighting could be achieved by using the pin-point type of concealed lighting at the upper level.

In any major home alteration of this kind, the joists above must be located to insure proper hanging from the structural members. If there are ceiling joists, and no insulation in this area, loose insulation could be placed above the new ceiling.

A "luminous ceiling" also could be used in such a project. This is a plastic ceiling with fluorescent tubes between it and the old ceiling.

ing. The plastic sheets are translucent and usually are put up in sheets supported on aluminum angles, hung from the joists above. The plastic lies in place; to remove the light bulbs, the plastic sheets are lifted and set over on the gridiron pattern of aluminum, making access possible.

This type of ceiling is effective in small rooms such as bathrooms and parts of kitchens. It is useful, especially, for "interior" bathrooms — a bathroom which has no window or other exterior glass.

Police reported Torres drove into a fence near the lot, then went a few more blocks before smashing into a building.

Investigation showed it was the first time Torres ever had driven a car.

**LOOKING TO THE FUTURE**

DALLAS — Oak Cliff Hotel Supply, Inc., is a forward looking firm.

Don L. Hill, president of the kitchen supply firm, said the company's Texas charter permits it to expand its operations to do-business-on-interplanetary stations.

and described him as "short, all covered with hair, big balls of fire in his eyes, three horns, a long tail and four hooved feet like a cow." Court Referee E. Wade McBride accepted the description, but advised the boy to make contact with an angel.

**CONTRACT SIGNED**  
RICHMOND, Va. — Douglas P. Moreland went back to his home in Fort Pierce, Fla., with a signed contract he expects to bring him a good income.

Douglas, aged 6, will get 50 cents for every "A" he gets in school. The ante rises to a dollar when he makes all "A's." The contract is with Grandpa Verne Bickelhaup, and it is witnessed and sealed, red ribbons and all.

#### MAIDEN VOYAGE

PHOENIX, Ariz. — Julian Torres, 38, went to a used car lot to buy a car. An obliging salesman told Torres to "try out" a 1951 model.

#### TRULY THE DEVIL

TOLEDO, Ohio — In juvenile court for stealing milk and fruit juice from a delivery truck, an 8-year-old boy blamed it on the devil

# B-58 BUICK

When better automobiles are built Buick will build them

**Born of more Aircraft Principles than any other car yet built**

HERE — coming to you from the freshest blueprints in years — is a car built to make your driving as modern as your thinking.

This one's built with more aviation principles throughout than any car before.

There's a greater use of airweight aluminum in its form and structure — in its engine — in its styling — even in its quick-cooling brakes.

There's an air-borne feeling of flight in its performance with Buick's B-12000 engine and with Flight Pitch Dynaflo\* that can switch the pitch a million ways.

And everywhere you go — you travel in new

skyway comfort with Buick's Miracle Ride plus Air-Poise Suspension.\*

So this is a car of truly exciting ideas for 1958 — the Air Born B-58 Buick. And you should see it and drive it at your Buick dealer's soon. Come on in today.

#### NEVER SO MUCH SO NEW

- \* Fresh bold styling with the Dynastar Grille.
- \* The Miracle Ride plus Buick Air-Poise Suspension.\*
- \* Flight Pitch Dynaflo\* with the instant flexibility of a million switches of pitch.
- \* B-12000 Engine with 12,000 pounds of thrust behind every piston's power stroke.
- \* Air-Cooled Aluminum Brakes\* with smoother, surer control and longer life.
- \* "Velvet Wall" Sound Silencing.
- \* All built to exacting quality standards.

\*Flight Pitch Dynaflo standard on LIMITED and ROADMASTER 75, optional at extra cost on other Series. Air-Poise Suspension optional at extra cost on all Series. Aluminum Brakes standard on all Series except the SPECIAL.

of Hereford High School

## Distributive Ed. Class Sponsors Radio Programs

On Nov. 11 the Distributive Education Club will operate the radio station KPAN. The programs will be from the different schools of Hereford.

Clubs, classes, groups, and ensembles will participate in giving these different programs. All students that have a talent, such as singing or playing an instrument, are invited to participate on the program.

The D. E. classes sold advertisement to the different merchants of Hereford for special prices that were given to the class by KPAN. D. E. students will write the commercials and read them over the radio. Different merchants will sponsor such groups as the High School Band, Junior High School Band, High School Choirs, Junior High School Choirs, and any organizations that have a part on the program.

The D. E. Club will start operating the station at 8:30 on Monday morning and continue until 5:30 that afternoon with an hour and twenty minutes out for lunch. At that time the station will have its regular programs.

Everyone is asked to listen all day because their boy or girl might be one of the many that will participate in giving a program.

All proceeds are given to the D. E. Club by KPAN. This helps the club send delegates to the D. E. C. A. Convention to be held in Austin this year.

## Joan Brown Elected FFA Sweetheart

Joan Brown, daughter of Mr. and Mrs. Jack Brown, was elected sweetheart of the FFA boys at a recent meeting. Joan is a senior in H. H. S.

This entitles Joan to compete for district sweetheart. She will receive a sweetheart jacket and is invited to attend all the FFA meetings.

## ASTROLOGY

This is your special message if you were born between Oct. 24 and Nov. 23.

From the abundance of the hidden forces of the Universe, a tremendous concentration of planetary powers is accelerating your opportunities that you may harvest richly in 1958. Because this mid-year will be the vital halfway point in the present major seven year cycle, some very concrete results should be yours if you have been doing your part to unfold these destined attainments. Occasional upsets, challenges and abrupt changes will have to be met. But these seem to be paradoxically the result of great good fortune rather than of last year's delays and obstacles.

Most happy romance and marriage potentials are slated for you, including renewal of love in long established marriages. A change in your home, or a new home is possible in connection with marriage, or with your own increased social and financial status.

A variety of partnership promises to bring greater mutual returns, not only materially, but emotionally, artistically and psychologically. Indeed, all you touch seems to turn to gold on some plane of manifestation this year, but particularly by the autumn. You will need to curb occasional impatience, wishful thinking and the pitfalls of unconventional financial, personal or social affairs, for your individual and personal (versus outward and worldly) good name will be under constant scrutiny by those of importance. Thoughtless or impulsively upon your growing prominence and could make an uncomfortable dent in your otherwise sure position and increased importance.

The favor of older people can greatly enhance the basic financial and/or social status for some Scorpios. For others, it is the subtle, but powerful new patterns of your life that will lead you gradually but steadily to eminent people in high circles. Regardless of how it applies to your specific station in life, the cosmic emphasis upon you can bring unusual good fortune and the fulfillment of some special ambition or secret wish, perhaps as early as the spring. Be prepared by being worthy to receive these major star blessings.

SHORT GAINER—Littlefield halfback Buddy Jones is being brought down from behind by Hereford lineback Robert Brown (arm and hand visible at left) after a short gain during Littlefield's first touchdown drive of the first quarter. Other identifiable Whitefaces are John Beasley (running behind Jones), Leslie Sharp (on knees), Bobby Burrus (No. 88) and Jim Curt-singer (being blocked at right). Littlefield won 33-6. (Staff Photo)

## PUNCH SERVED NEW TEACHERS

Punch was served to the new teachers of H. H. S. on Monday, Oct. 28, in the high school auditorium. Gladys Lee, president, welcomed the teachers and then asked them to tell when they decided to become teachers. The following teachers told their reasons:

Mr. Hickey admired his speech teacher in college and decided to become a speech teacher.

Mr. Young said that he liked to teach so he became a teacher.

Mr. Alvin Smith's mother encouraged him to teach.

Mr. Muse was tired of eating Arkansas cornbread and beans so he came to Texas for better living.

Mr. Muse said that Mr. Muse thought that they both ought to teach.

Mr. Harris was picking cotton one day and was so tired that he decided he'd go to college so he could get out of the cotton patch. During the depression when he was in college, his coach impressed him very much. He thought his coach was very rich, so he decided to be a coach.

Mr. Silverii was practically forced to go to college by his brothers.

Mr. Rogers started out as a geologist. He says that you really have to study in college.

Mrs. Shook liked us all so well last year that she came back this year.

(Continued On Page 2)

## MEET THE SENIORS

Name — Oma Lee Ranspot.  
Born — Jan. 7, 1940.  
Where — Weatherford, Tex.  
Parents — Mr. and Mrs. Pat Ranspot.  
Color — Pink.  
Show — Rebel Without a Cause.  
Food — Fried Chicken.  
Hobby — Collecting pictures.  
Ambition — X-ray technician.  
College — Texas Tech.  
Pet Peeve — People that think that they know everything.

Name — Richard Sims.  
Born — Oct. 31, 1938.  
Where — Hereford, Tex.  
Parents — Mr. and Mrs. Lester Sims.  
Color — Baby Blue.

Show — Bus Stop.  
Food — Banana pudding.  
Hobby — Sports.  
Ambition — Get Rich.  
College — Texas Tech.  
Pet Peeve — Getting up early.

## QUESTION OF THE WEEK

### How Can We Improve H. H. S.?

VIRGINIA McDONALD—To have more school spirit.

PAT MEDLIN—To have Pat back in school.

CAROLYN LEE—To have more activities with boys and girls participating together.

CHARLES SELF—I think our school is fine the way it is now.

RICHARD SIMS—I'm satisfied with the way it is now.

BENJAMIN GAMEZ—The kids could be friendlier other than that it's a pretty good school.

STELLA HUNTER—I think that the kids could be friendlier.

JEANETTE ROE—I think it's okay the way it is.

LILLIAN DECKER—The student body could be friendlier.

GLADYS LEE—The student body could make H. H. S. better by smiling and being a little more cheerful when they go down the hall. They could try to get along with each other and the teachers more.

BILL DRAKE—I think the student body could be better by not carrying personal grudges with fellow students and teachers.

PHYLIS GOETSCH—The student body of H. H. S. needs more cooperation and participation in the things which our governing body, the Student Council, set before us. The thing of most importance which is lacking from our school is "school spirit." Friendliness will make each day at school more enjoyable for ourselves as well as other students and teachers.

FRED LOOKINGBILL—I think the student body of H. H. S. could be made better by being more friendly and cooperating with everyone in what they ask of you.

## 'Whiteface Whims'

The more we study, the more we know.

The more we know, the more we forget.

The more we forget, the less we know.

The less we know, the less we forget.

The less we forget, the more we know.

So why study?

First Freshman in Math Exam — "How far are you from the correct answer?"

Second Freshman in Math

Exam — "Two Seats."

Lady — "How were you wounded, my kind man?"

Soldier — "By a shell, lady."

Lady — "Did it explode?"

Soldier — "No. It crept up close and bit me."

Professor of Political Economy — "Who's the speaker of the House?"

Student — "Mother."

Teacher — "I take great pleasure in giving you 80 per cent in geometry."

Student — "Why don't you make it 100 per cent and really enjoy yourself?"

Father — "Why is it that you are always at the bottom of the class?"

Johnny — "It doesn't make any difference, daddy. They teach the same thing at both ends."

First Day of School:

The importance of having every child present a birth certificate on the opening of school is impressed upon parents. Nevertheless, little Mary appeared without one. After listening to the teacher's explanation, and order that she go home and get the certificate, the child departed in tears.

"Why Mary!" said another

## AN EDITORIAL

There has been much cussing and discussing this year on the subject of cliques which run the school. It has been stated that the honors are not evenly spread out among the student body, that time after time the very same group plans and takes part in the assemblies, programs, and all other activities which have been launched this year. We have heard these accusations both in conversation and in notes which anonymous donors have presented us in our "Notes to the Editor" box.

It is a delicate subject and we do not pretend to have any stirring answer to the problem. We are merely presenting both sides to you, in hopes of giving everyone a better understanding of whichever side he might oppose.

Whenever an organization is responsible for any activity it looks for persons whom it knows can do the job well. The officers of the group naturally want it to be better than any other of its kind. Picking students to handle the task is not easy. Why shouldn't they appoint the people on whom they are sure they can depend? And how else are they to know whether a student is responsible unless he has proven his talent in some former activity? This is the general trend of opinion of the so-called "bosses of the school."

But there is the other side, which includes the majority of students. They want to help plan things, too. This is the only chance most of them will ever get to work on social functions. High school is no fun if you are not given any opportunity to enjoy these privileges. What is more, this is an important part of education. They are tired of seeing the same faces appearing in every assembly and the same names mentioned on every committee throughout the year. How can they ever show how much talent they have for these various things if they are never asked to work on a committee or be in an assembly?

A more democratic system ought to be installed. For it is rather futile to have a few students so busy with this and that about the school they don't have time to do justice to any of their duties, while hundreds of students are miserable because they are given nothing to do.

We said we had no stirring answer. But we do have a few ideas which might help both sides of the question. Those students whose names you see again and again have not just had things handed to them. They have shown interest in "what's going on." They have gone out for extracurricular activities which are open to everyone. So if you are one of the many who have complained, take a hint from them. Show people you too are interested in "what's going on."

And if you are the other group, next time you are confronted with the task of appointing committees, pause a moment, and try to find a new name!

## Bits of News

My!! What a nice group of students met last Monday for their regular meeting of the Future Nurses.

Officers of this year are:  
President — Carla Sue Crosthwait.  
Vice president — Douglas Womble.  
Recording secretary — Azalee Brown.

Corresponding secretary — Twyla Springer.

Future Nurses are all excited over prospects of earning pins, a baby sitting course, and a rummage sale in the very near future.

Mrs. Millard Nobles and Mrs. H. H. Cavness from the medical auxiliary were guests at the meeting. Incidentally, the auxiliary is going all out to aid the Future Nurses of Hereford High.

Evangelist Homer Martinez, who is holding a revival at the First Baptist Church, spoke to our assembly Thursday morning. Joey Calderon, song leader, sang several religious songs.

The two F. H. A. clubs, Chapter I and Royal Rose, met on Oct. 21 in the high school auditorium in a joint meeting. They discussed the formal initiation, which will be held Tuesday, Oct. 29. All the former members that didn't have "little sisters" were asked to choose one. After practicing the F. H. A. song the meeting was

## Future Librarians Meet in Hereford

The annual meeting of the Teen-Agers Library Assn. was held in Hereford, Oct. 26. There were adult sponsors and Library Club members from 44 counties of West Texas which comprise District One of the State of Texas. The theme of the conference was "Let's Explore With Books."

Registration began at 9 a.m. at the Hereford High School, and continued until 10. The general assembly convened at 10, and following the welcome and response, entertainment was furnished by the Sextette and the Speech Department. The following boys were in the skit entitled "If Men Played Cards as Women Do": Bobby Shelton, Gene Waits, Milner Duval and John Gilliland. The business session began at 10:30, and was followed by the program at 11. Tommy Moore of Borger was in charge of the program. This portion of the meeting adjourned at 11:45 for lunch.

The luncheon speaker was Bob Wear of Canyon, Texas. Mr. Wear's subject was "The World of Books." Approximately 800 persons attended the luncheon. The afternoon business session began at 2:15. The principal item of business was the election of officers for the new year.

Mrs. Olean Leggett, librarian of H. H. S., was in charge of arrangements for the annual meeting. The district officers are Lann Kay Smallin of Lubbock, President; Tommy Moore of Borger, Vice President; Mary Pat Haley of Canyon, Secretary; Betty Harman of Tulsa, Treasurer; Lorene Grantham of Plainville, Historian; and Galvin Boyles of Lubbock, Parliamentarian.

The executive council named Ann Wingert to take the place of Karen Havis, Lubbock, who resigned as State Historian of T. A. L. A. This means that Ann will be a platform guest at the state convention to be held in the Baker Hotel in February.

## IDEAL BOY

By DOLLIE JO FROWELL

Hands — Milner Duvall.

Teeth — Bud Martin.

Smile — Charles Burrus.

Nose — Carl Zimmerman.

Physique — Ron Cook.

Eyes — Brendan Gallagher.

Handsome — Danny Martin.

Personality — Pete Plank.

Courteous — Johnny Latham.

Most Fun — Jimmie Brown.

Cute — Donnie Renfro.

Intelligent — Gwinn Morris.

Funniest — Jim Curt-singer.

Hair — Bill Dirks.

Best Dressed — James Brogdon.

Best Dancer — LeRoy Morrison.

Athlete — Fred Lookingbill.

### Bits of ...

(Continued From Page 1)

adjourned.

On Wednesday, Oct. 22, a scholarship test was given to 10 seniors in the Mechanical Drawing room. This test was given by Bill Phillips. The results will be announced sometime around Thanksgiving. The seniors taking this test were Ella Marie Williams, Lynda Phillips, Jo Ann Fowlkes, Ann Reeves, Maxine Ware, Godfrey Baldwin, Jimmy Cartsinger, Terry Higgins, Billy Wimberley and Carl Zimmerman.

In an annual contest held by the Hereford Jaycees on Oct. 30, six high school students gave speeches on the subject, "I Speak for Democracy." Students entering the contest were Durward Jacobs, Polly Cornett, Shirley Schulte, Pat Gandy, De Buck, and Glenda Allison. Judges for the contest were Curtis Traveek, Ray Cowser and Don Zimmerman. Winners of the contest were Durward Jacobs, De Buck, Shirley Schulte, and Glenda Allison.

Final tryouts will be held at 4:30 on Friday at Radio Station KPAN.

Tuesday, Oct. 22, the seniors ordered their rings. This was a long-awaited day for the seniors. The rings will arrive sometime after mid-term.

Homecoming weekend saw several ex-students of Hereford High at the game between Clovis and Hereford, at church, and also in town. Some of these students were Roger Shipley, Kee Skypala, Putt Knox, Charles Seed, Sandra Jo Caraway, Don Ray Parsons, Lynn Boomer, John David Bryant, Bob- by Veigel, Glen Mutter, Don Fellers, Sammie McClellan, Gene Spead, Jack Rogers, Mildred Paul, and Elaine Wagoner.

#### MELON HARVEST

**NORFOLK, Va. (AP)** — Nobody knows how a watermelon seed got into Mrs. M. B. Riviere's flower bed. She just let it grow and soon it was attracting the attention of the neighbors. It bore a 56-pound melon.

#### SIGN ERROR

**CARLSBAD, Calif. (AP)** — Chief Bob Hardin and his fire laddies busied themselves recently making some rustic signs for the city hall grounds; signs saying "entry," "exit" and such.

The signs are carefully made by cutting letters in wood with an electric router and then embelazoning them with yellow paint. Imagine the fire chief's embarrassment when he discovered that the sign so carefully made for the front of the fire station had his name spelled "Hadin" instead of Hardin.

# JUST ARRIVED!

## All-new '58 DODGE Power Giants

### 4-WAY LEADERS OF THE LOW-PRICED 3!

Here—for you to drive now—are the first trucks ever built that lead the low-priced three all four ways!

**Styling, power, payload, economy**—Dodge for '58 is definitely way out front.

**New economy-engineered V-8's and Sixes** give super performance, more miles per gallon (on regular gas).

**New Full-Traction Drive** makes "getting stuck" in mud, snow or sand almost impossible.

**Check the 4-way leader** before you buy—and get your Dodge dealer's special 40th-anniversary deal!

**Drive a DODGE Power Giant today!**

#### 1 FIRST IN STYLING!

All-new design! Sleek, yet rugged. Deluxe chrome grille and trim... modern twin headlights for safer night driving... sweeping, future-inspired lines... sparkling new colors and two-tone combinations.

#### 2 FIRST IN POWER!

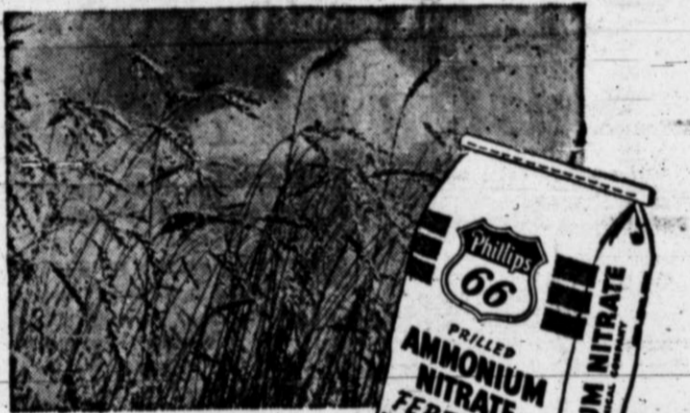

New Super-Torque '58 Power Giant V-8's deliver whopping 204 to 234 horsepower. Extra power cuts trip time, lets you pass more safely, reduces engine strain, assures long engine life.

#### 3 FIRST IN PAYLOAD!

Advanced Dodge construction is extra strong, but without an ounce of load-robbing excess "fat". Lets you haul as much as 1/2 more, thus cut down on trips, on time, on gas, on tire wear.

#### 4 FIRST IN ECONOMY!

Most advanced of all short-stroke V-8 truck engines. Exclusive Power-Dome combustion puts extra miles into every gallon, ends power-stealing carbon deposits, slashes maintenance costs.

## WHEAT AND SMALL GRAINS NEED NITROGEN!

For the nitrogen your crops need, apply Phillips 66 Ammonium Nitrate. The nitrogen and other plant foods removed by last year's crops must be replenished to maintain higher yields and profits per acre. Wheat and other small grains respond quickly to nitrogen to help stimulate early growth... produce and support bigger heads per plant and more plants per acre.

For fall-seeded small grains, apply nitrogen this spring before plants reach the jointing stage. For spring-seeded small grains, apply nitrogen before seeding or as a top dressing early in the season.

**ORDER YOUR PHILLIPS 66  
AMMONIUM NITRATE TODAY!**

## Y-NEWS

**Tri-Hi-Y**  
Mr. Bill Stanford was guest speaker at Tri-Hi-Y Tuesday night.

### How It Got Its Name

Deaf Smith County was named for Erasmus Deaf Smith. He was born in New York State, April 19, 1787, and in 1798 he moved with his parents to Natchez, Miss.

In 1817 he came to Texas alone but only remained a very short while. Four years later he returned to Texas and spent most of his time in and around San Antonio.

When De Witt's colony was first established, he joined it and married a Mexican lady.

By his lonely wandering, he acquired a vast knowledge of the country and during the revolution, he joined the forces of Austin at Gonzales.

He was put in command of the scouts under Houston, and he reported the movements of the Mexican Army.

He destroyed Vince's bridge on April 21 to prevent the movement of Santa Anna.

Later he was made captain of the Rangers. After several minor battles he retired to Richmond, Fort Bend County, where he died Nov. 30, 1837.

A small monument in the corner of the Episcopal Church yard marks the spot where he is buried.

Oct. 22, which was held in the High School Library. Mr. Stanford spoke on the subject, wisdom.

Margaret Boomer gave the opening prayer. Nancy Godwin read the Bible Scriptures and Patsy Covert gave the devotional.

The group discussed what they could do for the school and community projects. The school project will be to have new stairs built for the auditorium and for the girls to be responsible for the bulletin board in front of the office.

The community project will be to buy story books for the children's wing of the hospital.

Charlotte Moore reported that Mrs. Neill said she would be happy to help Miss Rigler sponsor the club.

Sandra Roberson gave the closing prayer.

At a Hi-Y meeting Tuesday night, Oct. 22, Mr. Virgil Young gave the devotional to the group.

New members were discussed and voted on. They elected 26 new members. Plans were discussed and a committee was chosen to plan the program for the D. E. Club Radio Day. The club also discussed and voted on the new members bringing letters of recommendation from their Sunday School teacher, Pastor, and parents.

The meeting was closed with the Hi-Y Benediction.

### Football Boys Elect Queen

Virginia Cox, a 17-year old senior in H. H. S., was crowned football queen at the Homecoming game here Friday night Oct. 25. Her escorts were Don Bomar and Steve Slagle.

Virginia wore a brown suit with beige neck scarf and gloves.

Her attendants were Betty Paetzold, B-team queen and Mary Lois Coker, Freshmen-team queen. Betty was escorted by Jeff Gomez and James Brogden. Ronnie Botkin and Don Scott escorted Mary Lois.

Betty was dressed in a black suit with white scarf and gloves. Her shoes and hat were black. Mary Lois wore a brown and white checked two-piece suit with brown accessories.

Martha Bookout, head cheerleader, presented the queen with a bouquet of roses and Becky Godwin was crown bearer.

### Ideal Teacher

By OMA LEE RANSPOT

- Most considerate — Mrs. McDougal.

Proved and approved around the world and now it's here for you... the 58 FORD

One look tells you... there's nothing newer in the world!

You'll ride in a new world of style in the 58 Ford

- New deep-sculptured styling
- New Interceptor V-8 power
- New Cruise-O-Matic Drive
- New Ford-Aire Suspension
- New Magic-Circle Steering

The 58 Ford is the newest car in the world—the only car ever to meet a world-wide test and win world-wide approval before its public premiere.

Here's a car so new, so beautiful it made eyes pop from Paris to Pakistan . . . a car so rugged it proved its mettle in a road test around the entire world! What's more, it did it on surprisingly little gas—thanks to new Precision Fuel Induction. Come in and let us show you the world's most beautiful new bargain!

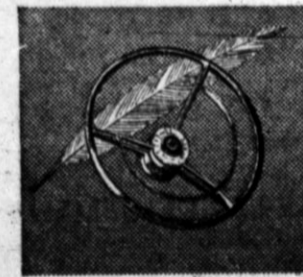

You'll be ahead with Ford's new Interceptor V-8 and Precision Fuel Induction. There's nothing newer than these engines that give you up to 300 hp. Smoother power! From less gas! One secret is Precision Fuel Induction, a wonderful new carburetion, fuel feeding, and combustion system.

You'll get up to 15% more gas savings with the new Interceptor V-8. New D1 position, used for all normal driving, lets you move smoothly, automatically—with just a touch of your toe—from solid-feeling take-offs right up to highway cruising speeds.

You'll ride on a cloud instead of a spring with Ford-Aire Suspension. Four air pillows literally soak up the bumps! And Ford's new air suspension relieves the car every time someone steps inside or luggage is loaded. An extra cost option, you get all this at traditionally low Ford prices!

You'll steer with a feather touch with Ford's new Magic-Circle Steering. Nothing rolls like a ball, and that's the secret of Ford's handling ease. Free-moving steel balls in the steering mechanism are virtually friction-free—give you the closest thing yet to power steering! Come in and try it!

Come in today... Action Test America's only world-proved car!

**TOURIST ATTRACTION**—One of San Antonio's Poster Girls Terry Foulds didn't win a blue ribbon at the annual River Art Show but visitors agreed she was a "prize" exhibit. The San Antonio College co-ed displays her talents as she poses on the banks of the picturesque San Antonio River which wanders through the city and down through South Texas, the winter playground of the Texas-Mexico Holiday Council. (AP Photo)

**FRANK CRITIC**  
NEW GLASGOW, N. S. — Miss Margaret Whadden, town clerk for 25 years, said here that no group of women ever talked as much as the men on the new Glasgow town council. Speaking at a dinner for the high school cadet band, she said she hoped that women would take a greater part in civic affairs.

**LOST KEYS**  
CLARKSBURG, W. Va. — The maintenance engineer at the Harrison County Courthouse, Ernie Long, sometimes wonders if his memory is long or short. Long was one of six persons trapped in the elevator which got

stuck between the first and second floor. After two hours, rescue workers finally found the keys to the elevator control box. . . in Long's pocket.

**IN THE FAMILY**  
OKLAHOMA CITY — An excited man called police to report that his car had been stolen and he thought he saw the culprit driving it south toward nearby Norman. Norman police were alerted, and they picked up the car. The driver was the man's wife.

Napoleon Bonaparte was promoted to general in the French Army when he was 24 years old.

### CHURCH

(Continued From Page 4)

#### Assembly of God

Unton & Ave. G.  
Rev. V. W. Marcell, Pastor  
Sunday School is held at 9:45 a.m. Morning worship service convenes at 11 a.m.

Sunday will be Layman's Day Service and Fred Cary the Dis-

### Foibles--Fancy and Plain

By KENT SNARE

This 1957 Footballer thing is getting down to the epidermis stage and is nearly that tight. A lot of the clubs are barely gonna finish alive and some of them will be sans coaches, in fact the exodus has commenced, headed by Chic Mather, ex-mentor of Kansas. It is reported that Ears Whitworth of Alabama has his bags packed and has not sent out any laundry for a fortnight. Speaking of night: I imagine the list of college tutors who have "insomnia" include Don Clark of USC, Jim Owens of Washington, Sam Boyd of Baylor, Ed Doherty of Arizona, Bob Clausen of New Mexico, Paul Dietzel of LSU and Murray Warmath of Minnesota. Bus Mertes of K-State fluffed his coaching head rest more comfortably with his ruffling of Oklahoma, aided by J. Pluvius, whereas Mr. T. Brennan of Notre Dame is being tossed abed by the shadows in front of him, namely, Michigan State, Oklahoma and Iowa, in that order and what an order. Listed below is this week's roll of contest games and, as usual, note & are last year's results followed by the consensus picks (not mine):  
Miss. S. at Auburn. 20-27. Aub. Georgia at Florida. 0-28. Fla. Mich. at Illinois. 17-7. Mich.

strict Lay Leader of the Pampa District will be guest speaker. 3 p.m. Sunday will be Men Mass Meeting. All men of the city and surrounding territory are invited to come and hear Fred Cary speak. "See you in Church Sunday."

Cincinnati at Indiana. dnp. Ind. Nebraska at Iowa. S. 9-7. Tossup Minnesota at Iowa. 0-7. Iowa. Kans. S. at Kansas. 15-20. K. S. VMI at Lehigh 20-27. VMI. (Both undefeated)  
Notre D. at Mich. S. 14-47. M.S. Houston at Miss. So. dnp. Houston. LSU at Mississippi. 17-46. Miss. Duke at Navy. 7-7. Navy. S. Carol. at N. Carol. 14-0. S.C. Wis. at Northwestern. 7-17. Wis. Purdue at Ohio S. dnp. O. S. Wash at Oregon. 20-7. Ore. Arkansas at Rice. 27-12. Ark. Stanford at USC. 27-19. Stan. Ga. Tech at Tenn. 0-6. Tenn. SMU at Texas A&M. 7-33. Aggies. Tulsa at Texas Tech. 10-7. T. T. Baylor at Texas. 10-7. exas. Ark. S. at Texas W. 0-28. A.S. N. Christian at West T. dnp. A.C.

#### Conference on Irrigation Set

COLLEGE STATION. — The first statewide conference of its kind will bring to Texas the nation's top authorities on irrigation. The Nov. 14-15 Irrigation Conference scheduled for Hotel Lubbock is being sponsored by the newly-formed Texas Inter-Industry Irrigation Council, and will feature speakers recognized for their knowledge of irrigation and related problems.

Farmers, agricultural and business leaders and personnel from every segment of the ever-expanding irrigation equipment in-

dustry will find the information to be presented of much value to them, says R. V. Thurmond, extension irrigation specialist. The council, says Thurmond, has arranged for speakers to cover such subjects on the first day as the "Significance of Irrigation on a Changing Texas Agriculture"; "Texas Water Supplies for Irrigation"; "Soil Water and Plant Relationships Under Irrigation"; "Movement of Irrigation Water Through the Soil Profile"; "Pumps for Irrigation"; and "Power Units for Irrigation".

A highlight of the two-day conference will come on Thursday evening when Jack Z. Anderson, administrative assistant to President Eisenhower, will be the banquet speaker. . . his subject, "Irrigation Farming — A Key to Better Living."

The first three speakers on the Friday morning session will discuss subjects dealing with

sprinkler irrigation and the last two will discuss subjects relating to efficient surface irrigation. The final afternoon session will feature the economic side, including financing, of irrigation farming.

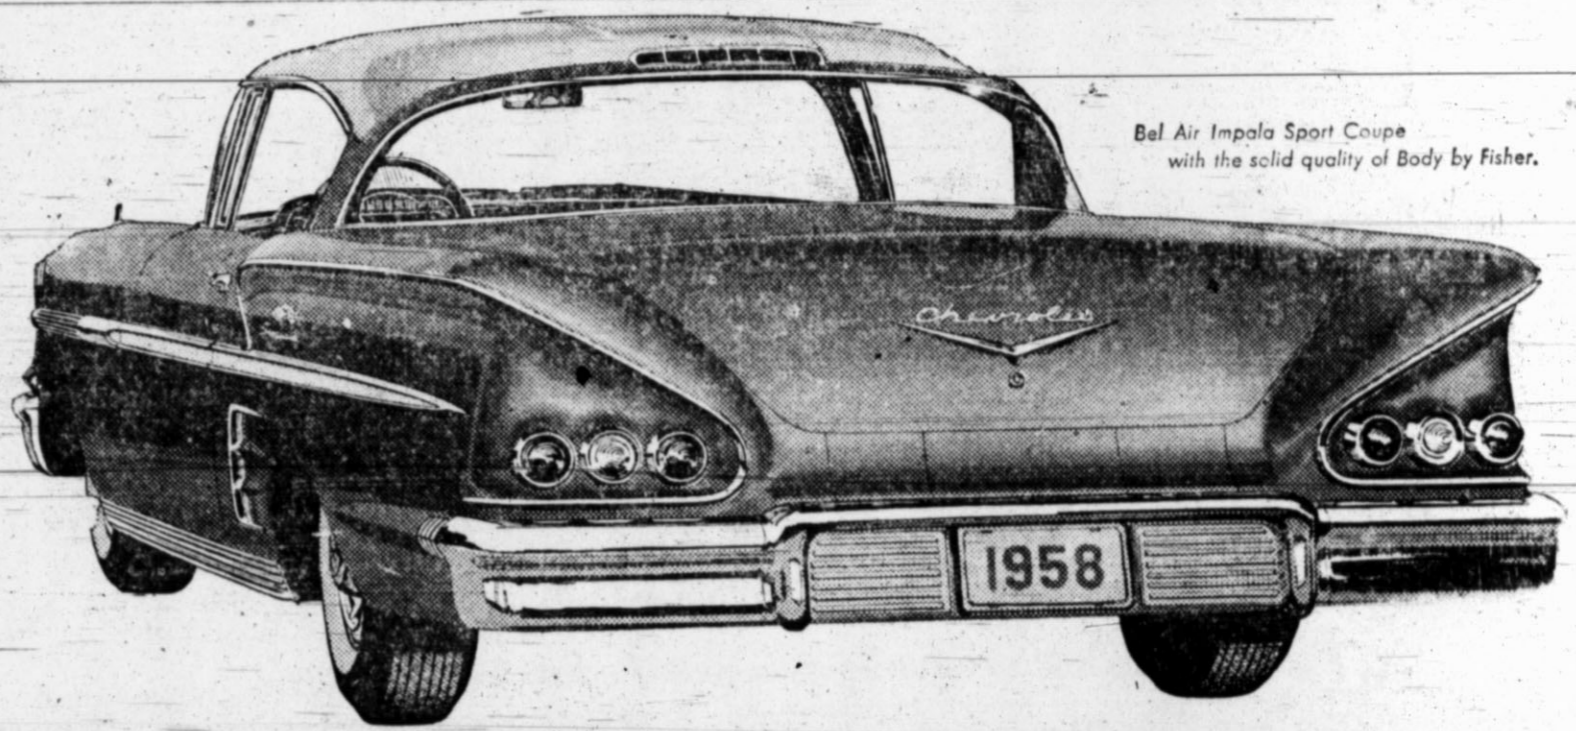

Thurmond points out that speakers will come from California, Colorado, Oklahoma, Utah and the District of Columbia as well as from Texas. "It is an opportunity of a lifetime," he says, "for those interested in all phases of irrigation farming to get information from a group of nation's most outstanding men in the irrigation field."

**SIGH OF RELIEF**  
NORMAN, Okla. — "Let me see that," a Norman father yelled after being informed his wife has requested she be excused from jury duty because of (10) minor children. He read the note and sighed with relief. His wife had requested she be excused because of the 10th item (minor children) in a list of grounds for excusing jurors.

The world's entire supply of cryolite, a sodium-aluminum fluoride, comes from mines in Greenland. It is used in the production of aluminum.

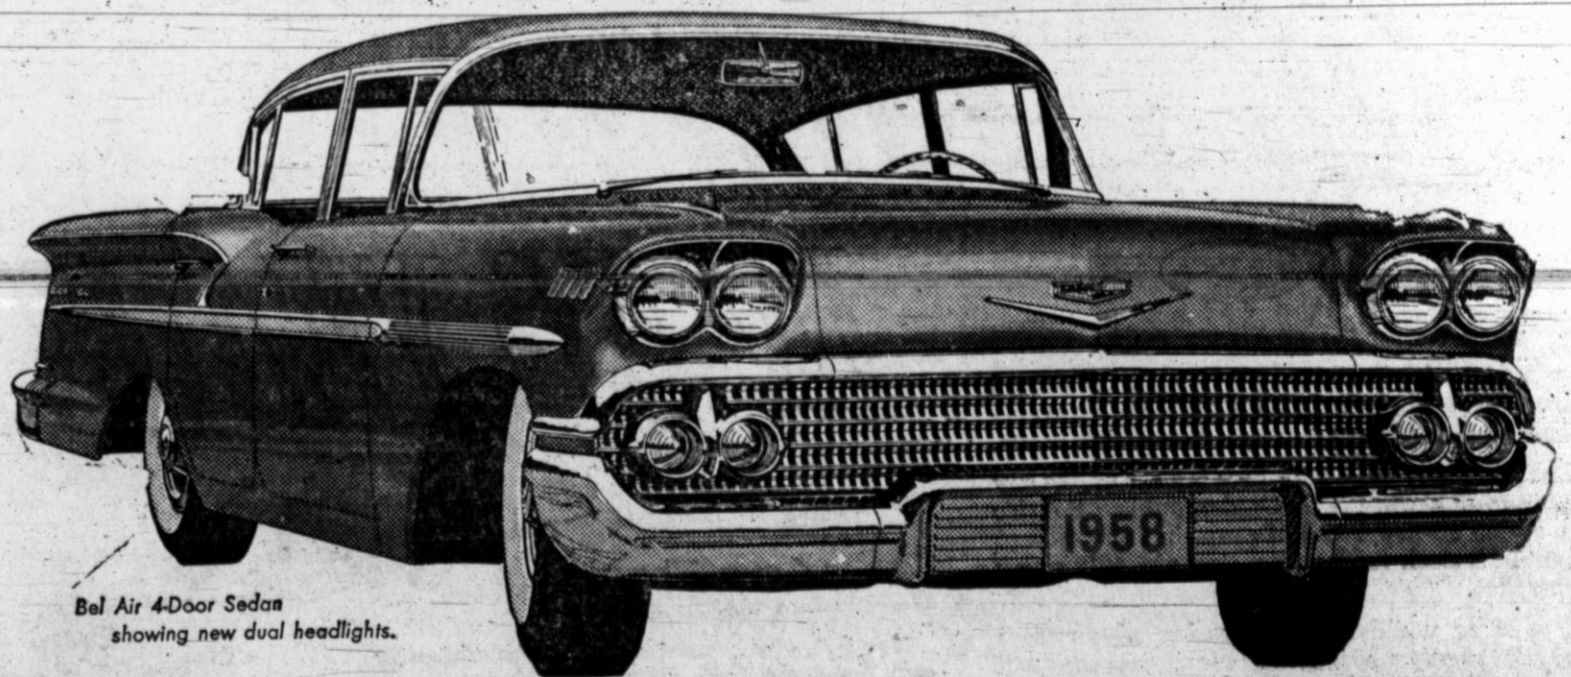

YOU CAN LOOK, LOOK, AND LOOK  
But You'll Find

# Galveston

PORT and PLAYGROUND

STILL FEELS THE MOTION OF THAT DITCHING—American flyer Bill Wyatt appears to be off balance as, with gestures, he tells the story of ditching his plane in the sea off Spain to Commander B. C. G. Place, skipper of the British destroyer Corunna, as the ship arrives in London. Place appears to be

doing just as well as Wyatt with the gestures. Between them is the fuselage of Wyatt's plane, the City of Galveston, in which Wyatt was attempting a non-stop flight from the Texas city to Rome when he was forced to ditch in the sea. (AP Photo)

## Long Time Ago

**45 Years Ago**  
The Democratic Party swept all opposition from the state in last Tuesday's election. First returns indicated victory for Wilson and Marshall, but more complete returns give the party nearly every state in the Union. Taft carried only three small states—Idaho, Utah and Vermont, with 12 electoral votes. Roosevelt carried six states—Kansas, Minnesota, Pennsylvania, South Dakota, Washington and Michigan—with 87 votes. Wilson carried 39 states with 432 electoral votes tucked safely under his belt. He has received a little over 81 per cent of the electoral vote, but will hardly reach a majority of the popular vote.

While a little early, the first man of the county to pay his poll tax and qualify as a voter was L. M. Williams, who lives in precinct No. 1 in the eastern part of the county. His receipt is dated Oct. 1. Others in that precinct who paid early are George Beems, Oct. 15; B. F. Hodges, Oct. 26; J. W. Sellers, district attorney, Oct. 29. In precinct No. 2, W. E. Dameron, county attorney, Oct. 24; in precinct No. 10, G. F. McClain and J. F. McClain, Oct. 11. L. M. Williams was also the first to pay his property tax.

**25 Years Ago**  
The debating club of Hereford High School met Wednesday. Wilma Jo Jones was elected as new

vice-president and Violette Marrs as reporter. Sherman Morgan, president, and Loys Carmichael challenged Wilma Jo and Violette on the question, "Resolved: that at least one-half of all the revenue for state and local purposes should be derived from sources other than tangible property." This is the state question for this year. The debate will be at 4 p.m. Wednesday.

County agent R. O. Dunkler and a group of 4-H boys and girls from Progressive Community visited the Brand office Thursday afternoon of last week to get acquainted and "see the wheels go around." Members of the party were Ira Jeane and Glen Ricketts, Edgar Russell, Ray Neal, Newell and Howard Higgins and Roy Botts.

**LUCY MISFIRE**  
DAYTON, Ohio (AP)—Foreman John Weisman, 49, is a lucky man four times over.

Police said ex-employee Dolphus Cox walked into the Standard Register Co. here and told Weisman, "This is for getting me fired." Whereupon Cox, 40, took out a revolver and pulled the trigger four times.

The gun didn't go off. Cox was sentenced to a year in jail and fined \$1,000 for assault with a deadly weapon.

## Need Soil Tests for Production at Its Highest

**COLLEGE STATION**—High costs of farming necessitate higher yields for maximum profit, and to make the highest production soil should be tested for its needs for lime and fertilizer.

The only true way to determine the amount of fertilizer and lime a pasture or a field needs is in a laboratory, W. F. Bennett, agricultural chemist for the Texas Agricultural Extension Service, said.

"A farmer or rancher gets more for the dollar spent having his soil tested and applying lime and fertilizer according to recommendations than for any other dollar spent producing a crop," he pointed out.

Without the proper nutrient balance, fertilizers will not be as profitable, plus the lack of other necessary practices such as weed, insect and disease control which also reduce the good results.

In soil high in acid or low in lime content, the phosphates, potash and some of the nitrogen is lost to growing plants, Bennett added. But addition of agricultural limestone to such soils keeps fertilizers in good working condition, resulting in increases in crop yields.

Application of agricultural limestone to acid or low-lime soil produces other beneficial results such as providing calcium for plant food, and making phosphates more available to plant use. Other fertilizer nutrients behave the same way. Soil bacteria is stimulated with more activity which causes a greater amount of nitrogenous nodules to form on the roots of legumes.

Soil is easier to work, forage plants are most nutritious for livestock, and toxic materials in soils are neutralized.

All the above benefits are made available to landowners whose soil is tested to determine what is needed in the soil. Soil samples are easy to collect, and any county agricultural agent, soil conservation service representative or teacher of vocational agricultural can assist in taking samples and mailing to the Soils Laboratory, Texas Agricultural Extension Service, College Station, Tex.

## PETROL THIEF

MONROVIA, Calif. (AP)—Some villain may not want the mail to get through.

Postal authorities report that a gas thief was siphoning the tanks of trucks behind the post office here for 45 days.

They estimate the government is short \$21.58 worth of postal petrol.

# A NEW KIND OF CAR IS BORN!

At Your Pontiac Dealer's Nov. 9

## BOLDEST ADVANCE

## IN 50 YEARS!

### THE GOLDEN JUBILEE CAR!

It's a revolution on wheels—boldly planned from the very beginning as a Golden Anniversary showpiece for Pontiac and General Motors.

This one you really must see—here is a car unlike any you have ever known! This Golden Jubilee Pontiac is actually an all-new breed of cars—in four brilliant series and 16 sleek models covering virtually every price bracket.

In all of them you'll find engineering advances so daringly different yet so basically sound that they will trigger the next big change in automobile design. You'll find a few of these ideas illustrated here, but even they can't begin to tell the full story.

Why not be among the first to discover the newest? When you meet this bold new Pontiac, you're in for a driving thrill that is impossible to duplicate in cars of conventional design. So make it a point to see your Pontiac dealer soon and prove to yourself that no car in history ever left yesterday so far behind!

### Aero-Frame STABILITY

Here is the biggest basic construction change since the early days of motoring. Pontiac's revolutionary new frame design is lighter, stronger, more stable than the conventional box type used on other cars.

### Quadra-Poise ROADABILITY

Only the wheels know where the bumps are! Pontiac's new suspension geometry ends dive, sway and bounce to bring you the smoothest ride, easiest handling you've ever known!

### Circles-of-Steel SAFETY

Pontiac's completely new body construction surrounds you with girder steel protection—above, below, fore and aft. Now you can drive with wonderful new peace of mind!

### Tempest 395 PERFORMANCE

Try Pontiac's new jeweled-action response. Scores of exclusive engineering innovations make Pontiac's hefty power plant a miracle of smoothness . . . and you can choose from four horsepower ratings including Tri-Power Carburetion\* and Fuel Injection\*.

### Ever-Level Air Ride\*

The most perfect suspension system ever designed—and Pontiac's revolutionary Aero-Frame is specifically designed for it! Air cushions on all four wheels literally float you over the bumps . . . keep the car perfectly level regardless of load or road!

\*An extra-cost option.
