

## Carter 'Assessing' Domestic Needs

WASHINGTON (AP) - President Carter, in the wake of a canceled energy policy speech, is described as undertaking consultations "in and outside of government" on major domestic issues, energy included. The consultations apparently began Thursday afternoon when Vice President

Walter F. Mondale led a group of Carter advisers to Camp David, Md., where the president has been cloistered since Tuesday.

With reasons for the speech cancellation still cloaked in mystery, White House press secretary Jody Powell issued through his office Thursday

evening a brief statement that raised as many questions as it answered.

Powell said, in full: "The president is in the process of assessing major domestic issues which he believes are important to the country and which include, but go beyond, the question of energy.

"He will be consulting with a number of individuals whose judgment he respects, both in and outside of government."

The canceled speech, set for television-radio broadcast Thursday night, was to have dealt with inflation and the threat of a recession, as well as with

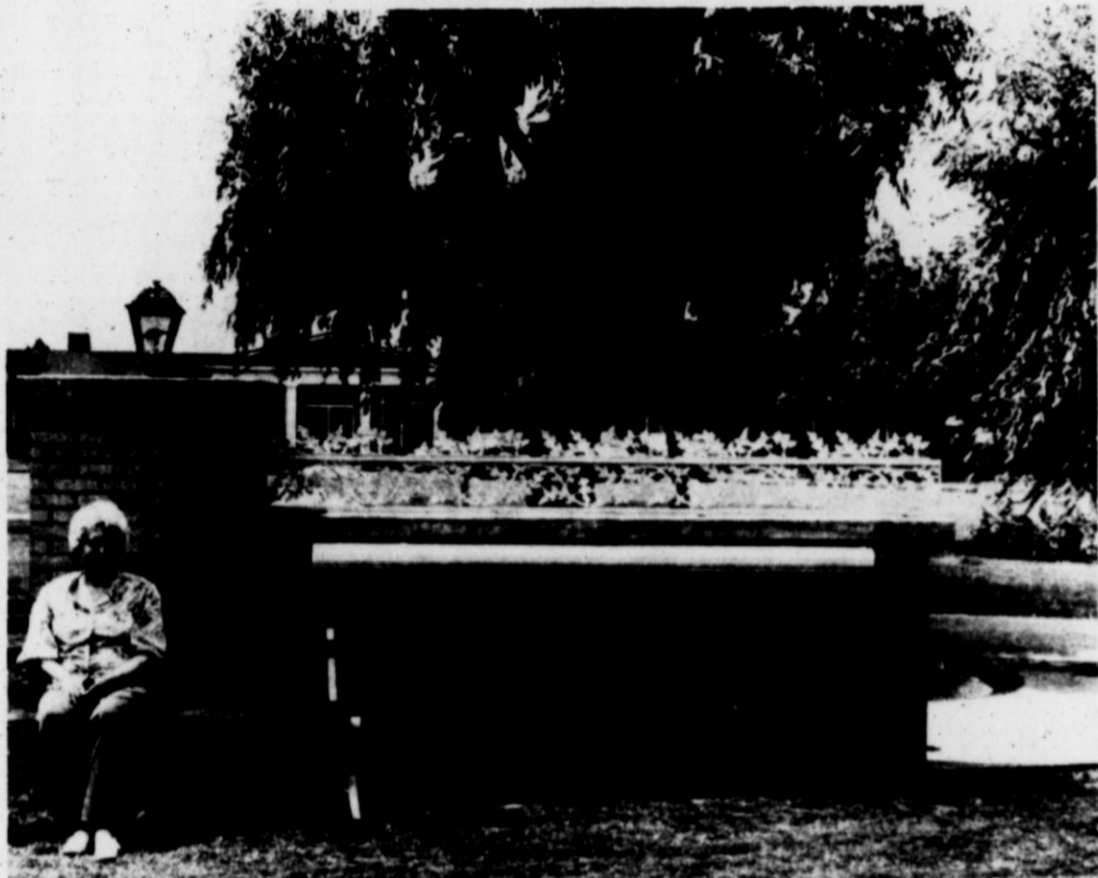

energy. A White House source, who asked not to be named, said Carter's motives for shelving the address went beyond dissatisfaction with a draft text.

This source said it would not be incorrect to say Carter was displeased with the draft. But he added, "That's not

the whole story. I'm not in a position to discuss it further at this time."

Another source, discussing the speech draft, said Carter "asked for a bold new approach and the material he got turned out to be not so bold and not so new."

Both The New York Times and The (See CARTER, Page 2)

**King's Manor Life**

King's Manor residents, like Mrs. Katie Price who sits serenely in front of the Methodist facility above, participate in activities such as sewing and artwork and

enjoy benefits which include a beauty shop. King's Manor, which continually receives superior ratings in state inspections, will host a fund-raising barbeque

from 5-9 p.m. Saturday on the Manor lawn. [Brand photos by Paul Sims]

## Skylab May Hit Next Week

WASHINGTON (AP) - Skylab's time is running out fast.

The National Aeronautics and Space Administration believes the 77.5-ton craft will crash into the atmosphere sometime next week, most likely Wednesday.

The North American Air Defence Command in Colorado, which has been tracking the 118-foot-long space derelict, predicted earlier in the week that the reentry would be between July 10 and July 14, with Thursday the most likely date.

But NORAD advanced its projection one day Thursday to the July 9-13 period, with the target date of July 11.

The low point of Skylab's orbit Thursday was 133 miles above earth, six miles less than the day before. The high point was 144.8 miles, three miles higher than Wednesday.

Skylab's final plunge will begin when it hits the thickening atmosphere.

Meanwhile, the State Department has alerted key personnel around the world to be set to provide last-minute Skylab information to their host governments.

"We have been in continuous contact with the posts for some months now and they have been provided all of the information that has been released by NASA," said a State Department official, who asked that he not be identified.

"We have requested that each of our posts identify key personnel who will be available for providing Skylab information." (See SKYLAB, Page 2)

## TRLA Head To Work With ACLU

David Hashmall, managing attorney of Texas Rural Legal Aid in Hereford, will leave that position next week to work for the Children's Rights Project of the American Civil Liberties Union in New York City.

Hashmall, 28, said his new job will involve working in cases of discrimination against children, placement in adoptions, education and other areas involving the rights of minors.

Hashmall has been in Hereford for nine months. He is one of four Harvard Law School graduates at the Hereford TRLA office, which assists farmworkers with their legal problems.

"I'll miss Hereford. It's been a nice town. And I'll miss Legal Aid work because I've been doing it for several years now, and it gets in your blood," Hashmall said.

Remaining TRLA attorneys are Bill Beardall, Edward Tuddingham and Jennifer Harbury.

Tuddingham and Beardall are currently involved in representing laborers in a dispute over rental and eviction procedures employed by the management of a migrant labor camp at Dimmitt.

After hearing six hours of testimony Thursday, U.S. District Judge Mary Lou Robinson of Amarillo kept in effect a temporary restraining order issued last week to prevent Castro County Housing Authority, a federally-subsidized housing project, from evicting a tenant without a hearing or written notice.

The order also provides that the housing project must not require a tenant (See TRLA, Page 2)

## Manor: High Quality, Low in Funds

**Editor's Note:** King's Manor Methodist Home, known for its top-notch facilities and activities, is faced with a projected \$90,000 deficit for fiscal year 1979-80. A reason that King's Manor has lost money for the last few years is that it subsidizes room rents of those residents who cannot afford to pay full price. To alleviate the problem, the King's Manor Founder's Association will sponsor a fund-raising barbeque from 5-9 p.m. Saturday at the Manor. Tickets will be sold at the barbeque for \$10 per person or \$25 per family of three members or more. Those attending the barbeque also will have the opportunity to tour the facilities.

By PAUL SIMS  
Managing Editor

Passing state inspections has become so routine and easy for King's Manor Methodist Home administrator Joyce Lyons that she actually looks forward to visits from the investigators to hear their comparisons of the Hereford facility to some other homes around the state.

The secret to earning compliments, and not bad checkmarks, from the state health department is the non-profit status of King's Manor, a multi-level retirement and nursing care complex owned by the Northwest Texas Conference of the United Methodist Church.

"We can offer many advantages that a profit home doesn't. You see, the difference between a profit and

non-profit home is a non-profit home begins with minimum standards and strives to go beyond that. A profit home's ultimate is the minimum standards," said Mrs. Lyons, King's Manor administrator since 1971.

Health department investigators, who recommend license suspensions for nursing homes which do not meet minimum standards, toured the complex again this week. The result: "We were very complimented," said Mrs. Lyons.

The state health department, once a year, awards bonus points to nursing facilities which provide certain services to residents. King's Manor, which is rated "superior" by the state, received 121 bonus points for exceeding minimum requirements.

"You get so many bonus points if you

**'A non-profit home begins with minimum standards and goes beyond . . . Joyce Lyons**

have one volunteer for five residents, and if your nursing staff has attended seminars -- and they're not required to do that -- you get so many points. If you

have more than the minimum number of activity people on hand, you get points. We have 2 1/2 times as many activity people as we're supposed to have," Mrs. Lyons said.

"Whenever the inspectors come to see us, they say our home is pleasant

**'We take care of physical, emotional and spiritual needs.'**

and well-mannered, and our residents are clean, attractive and well-groomed and that we have a fantastic activity department," she added, matter-of-factly, not boastfully.

The state has sent administrators and other top personnel from nursing facilities throughout the state to King's Manor to view the activity department, which was set up to provide things to do for residents.

The American Lung Association recently filmed a documentary of the activity department's exercise program at Westgate, that separate entity of King's Manor which provides round-the-clock nurses to residents unable to care for themselves.

Westgate, located on the west side of King's Manor, is one of three service levels at the home. The other levels are the Manor and cottage retirement.

Westgate is a 78-bed nursing facility

which provides round-the-clock care to residents. There are 14 nurses on duty during the day shift, 11 in the evenings and seven from 11 p.m. to 7 a.m.

"We have so many nurses because we have some skilled-nursing situations -- a number of residents who require total care," Mrs. Lyons said.

Westgate, she said, is not a place to die, but a place where its inhabitants can enjoy life.

"We believe that the needs of the total person should be cared for. Those needs are physical, emotional, and spiritual," Mrs. Lyons said.

Residents at Westgate make ceramics, study the Bible, visit with local pastors, have popcorn parties and birthday parties, play bingo and even take fieldtrips around town. A King's Manor bus equipped with wheelchair lift, transports the residents.

On Mother's Day, the moms at Westgate are hosted by K-Bob's, free of charge. Dads are similarly treated on Father's Day.

King's Manor auxiliary members have begun an activity called the "sunshine cart," which allows Westgate residents to "shop" for items. Stationery, envelopes, hairnets and other items are sold room to room.

"They can buy whatever they want to. We sell the goods to them at our cost. They want to pay for them because they like to shop and like to put away a little money," Mrs. Lyons said.

The Manor provides dormitory-style living for residents who do not require

the care of an attendant. Services include three daily meals, room cleaning, linen and transportation to town.

There are 35 residents at the Manor. Molly Ritter serves as Manor hostess, the equivalent of a college dorm mother.

Manor activities include arts and crafts, china painting, gardening, daily devotionals conducted by the residents, vespers each Tuesday evening, guest entertainment, parties and guest programs.

The Manor's crafts department permits residents to sell handiworks to the community.

There are 33 residents living in nearby cottages -- the third retirement level. Modern one- and two-bedroom cottages are offered to those persons who, like Manor residents, require absolutely no attendant care.

Cottage dwellers eat only their noon meals at the Manors; breakfast and dinner arrangements must be made by the residents themselves.

"The only other service we offer them is we'll do their yard work, if they wish," Mrs. Lyons said. "These people are independent."

Westgate and the Manor are at capacity, while there is only one single-bedroom cottage available. The waiting lists for Westgate and Manor care are quite lengthy.

Residents pay rent for rooms and cottages. Still, King's Manor tries to (See MANOR, Page 2)

## Unemployment Sinks, Wholesale Prices Up

WASHINGTON (AP) - The nation's unemployment rate fell to 5.6 percent in June, the lowest level in nearly five years, the government said today.

At the same time, wholesale prices continued to moderate, rising 0.5 percent last month, the Labor Department said.

Food prices actually declined 1.2 percent, thanks to sharp drops in the prices of beef, pork and poultry. Non-food items rose 1.2 percent, with sharp advances in petroleum prices taking the blame.

Both the unemployment and wholesale price figures were good news for American consumers. The economy is girding for the impact of more oil price increases that will result from the recent decision by the Organization of Petroleum Exporting Countries to raise crude oil prices an average of 25 percent.

President Carter and his aides have said the OPEC increase will cost 800,000 Americans their jobs by mid-1980 and add between 2 and 2.5 percentage points to the U.S. inflation rate.

The unemployment rate had held steady in the range of 5.7 percent to 5.9 percent for the past 10 months. The decline to 5.6 percent in June, the lowest level since August 1974, "was due almost entirely to a drop in teen-age joblessness," said Labor Department analyst Kathryn Hoyle.

"The number of unemployed teen-agers fell by 130,000 in June, while their unemployment rate dropped from 16.8 percent to 15.3 percent," the report said.

Ms. Hoyle said that although the figures are seasonally adjusted to account for changes such as heavy summer hiring, some of the improvement in

teen-age unemployment likely was due to summer job programs.

The unemployment rate had been 5.8 percent in May. It averaged 5.7 percent in both the first and second quarters of 1979, compared with about 6 percent a year earlier.

Total employment rose by 440,000 last month, to 96.8 million, the Labor Department said. The employment gain in May had been only 140,000 jobs.

The department said employment recently has been rising by about 300,000 jobs per month and now stands 2.1 million ahead of June 1978.

The Carter administration had hoped to hold inflation to 7.4 percent this year, down from 9 percent last year and the 10 percent-plus rate of recent months.

But President Carter said last Sunday on the way back from an economic

summit conference in Tokyo, that OPEC price increases since the first of the year will add 2 to 2.5 percentage points to the inflation rate.

He also said the increase will cause the loss of some 800,000 jobs and increase the risk of a recession later this year by (See ECONOMY, Page 2)

## Iraq Delegates Miffed at Lines

UNITED NATIONS (AP) - Iraq's delegates to the United Nations are angry because the oil squeeze their government help put on the United States is forcing U.N. diplomats to wait in line at the gas station.

A U.S. delegate suggested that the diplomats take the subway or the bus.

Iraq called a meeting Thursday of the U.N. Committee on Relations with the Host Country - the United States - so that

its chief deputy delegate to the world organization, Saib A. K. Bafi, could complain that he and his colleagues were waiting in line as much as four hours to buy gasoline when they should be carrying out their official duties.

He suggested that some New York filling stations be reserved for diplomats only. Or that they be allowed to fill up at the U.N. headquarters pump now reserved for the 20 Secretariat trucks.

U.S. delegate Herbert K. Reis said his office would support an application for the allocation of more gas to the U.N. pump. But Yoshio Tagaya of the Secretariat said that would mean "some lines here as you have outside."

Reis made no comment on Bafi's proposal for diplomats-only gas stations, an arrangement that would require heavy police guards to protect them from New (See IRAQ, Page 2)

# Can Nuclear Plants Handle Potential Disasters?

**[Editor's Note: Nuclear power - is it safe? Can it be made safe? Is there room for human error? Some say yes, others say no. The power companies say their plant can take a direct hit by a plane or a hurricane. Critics look to Three Mile Island and the potential problems there. Whom does one believe?]**

By GREG THOMPSON  
Associated Press Writer

A jumbo jet. A hurricane. A tornado. Or even a tornado hurling a huge locomotive. Tests show there's not much man or nature could throw that would even dent the four-foot-thick reinforced concrete walls of the giant containment silos at Texas' two nuclear power plants.

The 265-foot domed silos are lined with half-inch-thick steel and have four-foot-thick walls of specially-tested and inspected concrete webbed throughout with several layers of nearly three-inch-thick steel rods. The dome is nearly three feet thick and there's 12 feet of concrete underneath.

The entire building can be immediately sealed off at the slightest hint of a problem to contain any radiation that might leak from the inside.

But there's even more protection inside to prevent any radiation from reaching those massive outer walls.

Four more feet of concrete surround the carbon steel reactor vessel, a 44-foot steel bottle whose eight-inch-thick walls contain the reactor core and the highly-pressurized, radio-active coolant water.

Stainless steel pipes carrying the water are specially designed and welded to withstand pressure of more than 3,000 pounds per square inch. Every millimeter of each weld is radiographed and inspected numerous times.

And should there be a problem - an extremely remote possibility, according to utility company officials - there are safety systems, backup safety systems, backup backup safety systems and, in some cases, backup backup backup safety systems.

The Comanche Peak and South Texas Nuclear Project plants, in short, have been designed to be as safe as man and his computers can make them.

That, however, is not good enough for Pam Mayo Clark, Dale Bridenbaugh, U.S. Rep. Henry B. Gonzalez and the growing number of opponents to the commercial nuclear power that is scheduled to arrive in Texas in 1981.

"The thing about nuclear power is that no matter how safe they claim it is, it's got to be perfect. Everything must work at all times," said Mrs. Clark, one of the leaders of the anti-nuclear Austin Citizens for Economical Energy. "There's no room for mechanical, technical or human error, because the results of such a minor mistake are so massive."

"We saw at Three Mile Island what happened when there are four or five minor mistakes."

Dale Bridenbaugh of San Jose, Calif., worked 22 years as an engineer in General Electric's nuclear power plant program before resigning in 1976 and becoming an outspoken critic of nuclear power.

"We don't know that the safety systems work. They haven't shown that a reactor core that's been operating a long time can be cooled if the coolant is lost. There's a buildup of heat. The

Three Mile Island reactor had been operating only about three or four months and there was a partial meltdown," he said.

"I probably wouldn't be a critic if the industry would level with the public and admit they've got problems," he continued.

"There's economic pressure to put these plants in service."

"When they come out with those asinine statements that no person has ever been killed by nuclear power, that nuclear power is safer than sex, safer than eating beans, then that makes me mad."

The March accident at Three Mile Island, Pa., in which some radioactivity from cooling water pumped out of the containment area and into holding tanks in the auxiliary building escaped into the atmosphere through a ventilation system, has spurred what was already a growing anti-nuclear movement in Texas.

But utility officials and nuclear scientists in Texas again point out that there was no one killed or injured in what was a serious series of mechanical breakdown and operator errors. They hasten to add that nobody has ever been killed or seriously injured in 22 years of commercial nuclear power.

"If you escape away all the commotion from Three Mile Island, it showed how safe nuclear power really is," said Dr. Richard Neff, a professor in Texas A&M's Radiological Safety Office.

"We've been telling people that a major accident could be more serious than that. We were wrong. It's not as serious as that," said Dr. Robert Cochran, chairman of Texas A&M's nuclear engineering department.

"People can talk all they want about what happened at Three Mile Island. What really happened? Not a damn thing when you come right down to it," said Bill R. Clements, a former nuclear submarine commander and vice president of the Texas Utilities subsidiary that'll run Comanche Peak.

"I think it's a gross oversimplification to say nuclear power has been operating 20 years with only one problem, Three Mile Island," countered Bridenbaugh. "There are no apparent bodies laying around. That's about all you can say. We don't know what the long term effect of the radiation release at Three Mile Island will be."

"It's what I call a nuclear credit card death. You sentence them today and they die tomorrow," said Gonzalez, a Democrat from San Antonio who has introduced anti-nuclear legislation in Congress.

But Texas Utilities and Houston Lighting & Power Co., managing partner of the South Texas Project, are not taking the Three Mile Island accident lightly. Both have appointed independent technical review panels to study the accident and determine if any design or operational changes should be made with their plants.

"Everybody will improve because of what happened at Three Mile Island," said Jim Parsons, HL&P's director of public affairs.

Frank Shants, nuclear information coordinator for Texas Utilities, noted that although the Three Mile Island plant opened in late 1978, the technology for the Babcock and Wilcox reactor system was seven or eight years old because of the lengthy process of building a nuclear plant.

The Comanche Peak and South Texas Project are virtually identical, both using the slightly different Westinghouse

reactor system that is newer and has several technical improvements that might have stopped the Three Mile Island accident or at least slowed the process enough to allow operators more time to react.

Texas anti-nuclear forces have zeroed in on welding and concrete problems in Brown & Root Co.'s construction of the two Texas plants.

Concrete work on the first containment building at the South Texas Project has been stopped indefinitely after air pockets were found in the concrete directly behind the steel inner lining. The concrete had been poured nearly a year ago, said Parsons, who vowed HL&P will institute more stringent inspections.

Similar voids have been discovered and repaired in the same containment wall. Parsons said the repairs were relatively simple and readily accepted by the governing Nuclear Regulatory Commission.

Comanche Peak has had some concrete problems on the dome of its No. 1 containment tower and is suffering from a high rate of rejections in its welding. Their problems are discovered by Texas Utilities' own stringent quality assurance program and repairs ordered.

The NRC, however, has found no evidence of non-compliance from recent allegations by former construction workers of irregularities in concrete testing.

"We've been concerned about the welding at Comanche Peak," said NRC spokesman Clyde Wisner. "There has been a higher rate of rejection than we would have liked, but the repairs give us a safe weld. If not, we would not have approved them. Any time you have to reheat the metal, it could perhaps lose some strength. But not enough to render it unacceptable."

"They're approved only after being radiographed," he added.

The construction is subject to several levels of inspection at each plant. Shift supervisors are the first inspectors, followed by in-house quality assurance inspectors and then NRC inspectors. There are also unannounced spot checks by both in-house and NRC officials and inspections of the materials before they reach the construction site.

"Inspection procedures built into a nuclear plant are more rigid and strict than any other industry. The only possible exception might be the space program," said Parsons.

Gonzalez, however, claims there is inadequate inspection because the nuclear industry and the industry's defenders in Congress have too much influence over the NRC.

Some utility officials feel there's too much inspection and too many redundant safety systems that unnecessarily drive up the cost of the plants.

"I'm not sure it's all necessary from a product standpoint. It increases the safety and in order to generate a higher level of public confidence, I think it serves a good purpose," said David Chapman, head of the Comanche Peak quality assurance program whose parents live 44 miles from the plant.

Tests have shown that the thick containment building walls can withstand hurricane and tornadoic winds, as well as a locomotive being thrown into the side at more than 100 miles per hour. Tests also have shown the building can withstand the

equivalent force of the crash of a jumbo jet, utility officials said.

"If one of those planes hit it, the plane would be completely destroyed. The containment structure would never know it's been hit," said James Hawkins, a chief quality assurance inspector at Comanche Peak.

Utility officials also point out that a nuclear power plant emits radiation so minute that it's only a fraction of what we absorb each year from natural sources. One chest X-ray, for example, emits 50 millirems of radiation and the average American absorbs about human 100 millirems per year.

A nuclear plant, however, emits the equivalent of only one millirem per year, much less than the granite State Capitol in Austin, officials say. One millirem, says the Atomic Industrial Forum, is the equivalent of watching one additional hour of black-and-white television per day.

Texas utility officials also want to dispel one other popular misconception - it is completely impossible, for a variety of reasons, for a nuclear power plant to blow up like an atomic bomb.

But with all that, with Comanche Peak and the STNP be absolutely safe?

"There is no such thing as an absolute," said Dr. Cochran. "It's not absolutely safe, nothing is absolutely safe."

## Religious Groups Help Refugees

By GEORGE W. CORNELL  
AP Religion Writer

Although it often goes unnoticed, whatever American help is extended to relieve the mounting human tragedy of refugees in Southeast Asia is done largely through religious organizations.

They provide most of the local sponsorships that are required for admitting the castaways, and have promised to line up such hospitality for as many of the refugees as the government will admit.

"This central role that Protestant, Catholic and Jewish bodies are playing in this massive human calamity is rarely recognized, but it's essential to saving lives," says Rabbi Marc H. Tanenbaum of the American Jewish Committee.

"It's a great demonstration of religious faith in action."

With thousands fleeing tyrannies in Cambodia, Laos and Vietnam, many to die, starve or drown in the South China Sea, Christian and Jewish forces have joined forces to press for all-out rescue measures.

It's "the greatest humanitarian crisis of this decade," they declared in a joint statement, urging government leaders "to do everything in their power to meet this vast human catastrophe now."

Already, U.S. religious organizations have resettled three-fourths of the 210,000 Indochinese refugees admitted to this country. Church sponsors are awaiting others still in detention camps, and pledge to handle all additional refugees allowed in the country.

Uncounted thousands of refugees already have perished, including about 200,000 boat people drowned at sea, with other thousands dying on the land, doubtlessly including many of the 40,000 Cambodians recently forced back into Cambodia at gunpoint by Thailand to face starvation or execution.

Refugee experts estimate that the tide of refugees will total a half million by fall, a million in a year, and tant under present conditions, 50 percent to 70 percent of them would perish.

If greater rescue efforts are not made, "we may later look back on a new holocaust," says Bishop Thomas C. Kelly of the U.S. Catholic Conference, referring to the Nazi slaughter of 6 million Jews.

# Presbyterians, Avenue Baptist Win In Softball

Four runs in each of the last two innings gave Avenue Baptist the needed margin to edge the First Methodist team, 13-8 in Slo-Pitch softball last night.

Ave. Baptist, in second place in the league with a 5-1 record, eliminated the Methodists from a chance at the title with the win.

The Methodists held the lead until the sixth inning as they were able to push three runs

across the plate in the second frame and four more in the fourth inning to hold a 7-5 lead going into the sixth inning.

After the four runs in the sixth, the Baptists held a 9-8 lead but the Methodists could not keep the opposition from scoring in the final inning.

The loss dropped the Methodists to a record of 4-3 and into fourth place.

In the second game, First

Presbyterian kept its title hopes active by subduing First Christian 14-10.

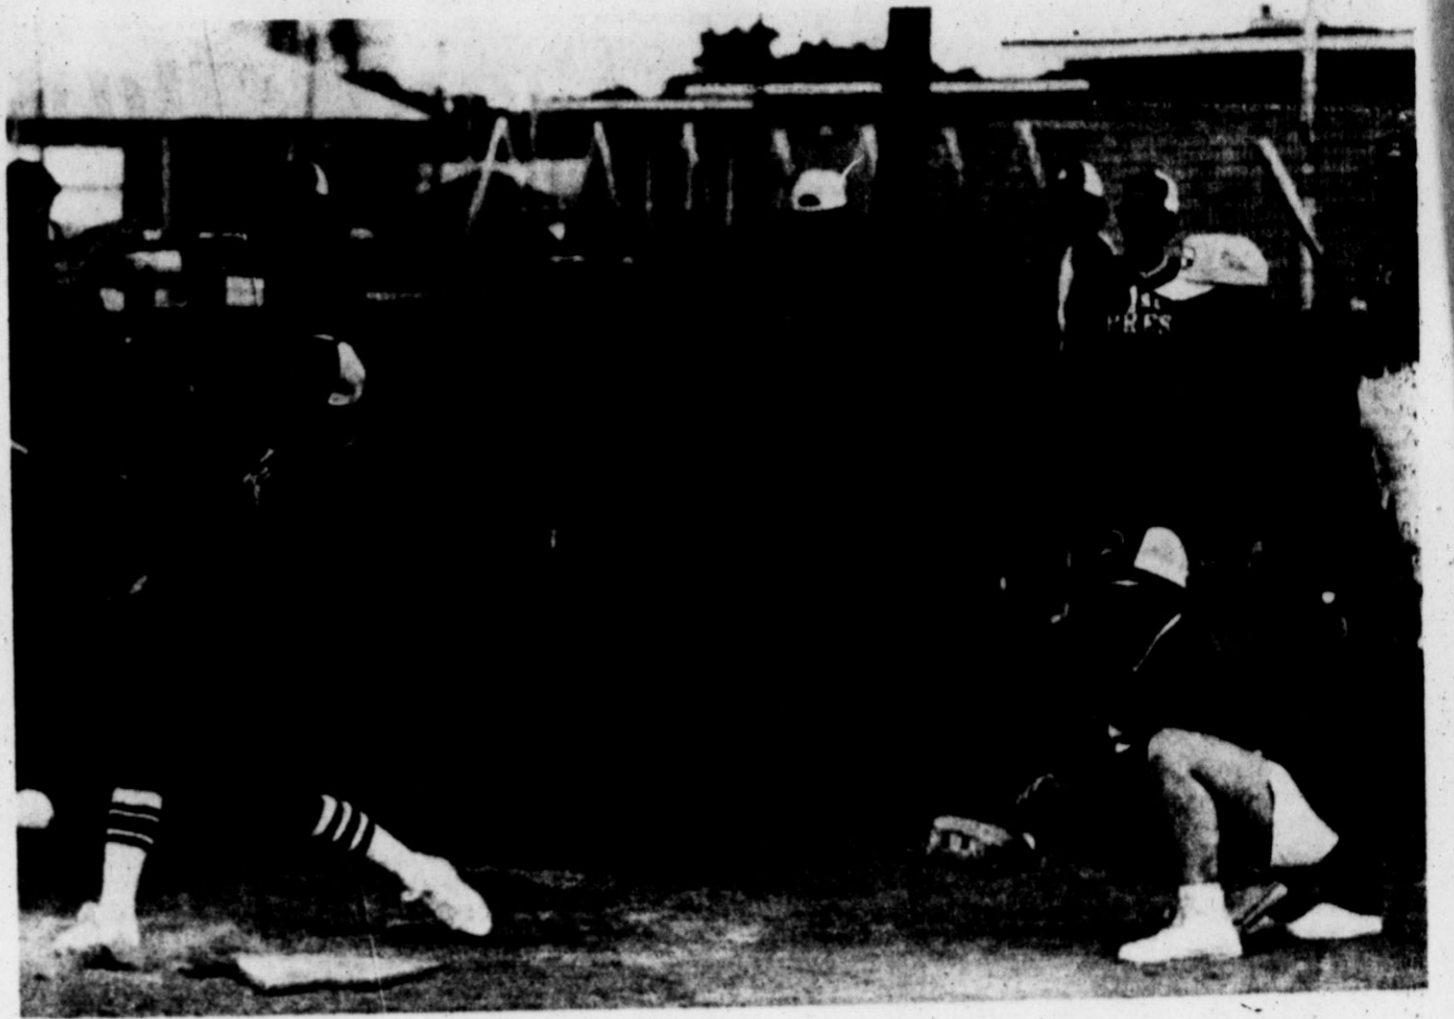

The Presbyterians held the lead the entire game, although the FCI team made a run at the lead in the fifth frame as they scored five runs to cut the margin to 11-9.

In the final frame, FCI needed five runs to tie the game but had to settle for one as the defensive efforts of the Presbyterians

thwarted the comeback efforts.

The First Christian team has yet to win a contest this year while First Presbyterian is in third place with a 6-2 ledger.

There are 10 games remaining on the schedule with First Baptist in first with two games remaining, followed by Ave. Baptist with two games remaining. The Presbyterian team, with one contest left to be played is the only other team with a chance to take the title.

### Follow The Bouncing Ball

# Reds Break Astro Winning Streak

CINCINNATI (AP) - Enos Cabell was embarrassed. He had thrown a ball to an unattended base, opening the gates for a three-run Cincinnati rally that beat the Houston Astros, 5-4.

"I think that was about the first mistake we made in two weeks, and it cost us the game," Cabell said after Thursday night's loss.

"At least we found out they can make mistakes," said Cincinnati Manager John McNamara, whose club snapped a five game losing streak.

With the Astros leading 3-2 in the sixth inning, pinch hitter

Harry Spilman singled. Ken Griffey and Cesar Geronimo both punted for basehits, although McNamara would have been happy with a sacrifice.

Cabell tried to throw out Geronimo at first, but first baseman Cesar Cedeno and second baseman Art Howe got their signals crossed. The ball sailed to the wall and Spilman raced home.

"Cedeno figured Howe was going to be there and ducked," said Houston Manager Bill Virdon. "Howe thought Cedeno was going back."

Joe Morgan was given an intentional walk to load the bases, but J.R. Richard's unintended bason balls to Dan Driessen forced in the go-ahead run. Ray Knight then hit a sacrifice fly that drove in a run the Reds ultimately needed to preserve the victory.

McNamara conceded that the Reds didn't exactly blow Houston out of Riverfront Stadium, nor is he expecting to knock anybody else around with his present lineup. Although the Reds had 11 hits, they spranged 13 baserunners.

"With out lack of crucial hits, we're going to have to play for one run and grind 'em out until we get George Foster back and

get our hitting going," McNamara said.

Foster has a pulled groin muscle, as does his standin, Dave Collins. Shortstop Dave Concepcion sprained his ankle Wednesday and did not play Thursday night.

The Houston loss ended a six-game string of wins, although the Astros still lead Cincinnati by nine games in the National League West.

Morgan's double in his only official time at bat extended his hitting streak to a season-high 12 games. He also combined with catcher Johnny Bench to cut down a run at the plate in the ninth inning.

"I went out on a limb and said we had to win this one," Morgan said. "If we hadn't won, it would have been almost impossible to rebound."

Tom Seaver, 7-5, got credit for the victory, his fifth straight since returning from a back injury earlier this season.

"I made a couple of bad pitches, but that wasn't when they got their runs," said Seaver, who lasted six innings.

Cincinnati took a 2-0 lead, scoring on a ground out by Seaver in the second inning and on Morgan's double in the fourth.

Let everything that hath breath Praise the Lord, PS. 150:6 Come Praise Him with us.

# Gymnast Captures Medal

SAN JUAN, Puerto Rico (AP) - United States swimmers continue their destruction of the competition and the record books at the VIII Pan American Games, but the ballooning U.S. medal count got some unexpected help from a 14-year-old gymnast.

Jeanine Creek, who enters high school this fall in Great Falls, Mont., surprised a confident Canadian squad with a silver medal individual performance in the free exercise

Gymnastics is a sport the Americans almost have written off in these Games, sending only their second- and third-

## Atlanta Edges Giants

By HERSCHEL NISSENSON AP Sports Writer

Atlanta's Barry Bonnell took a detour en route from second base to third Thursday night and kept a ninth-inning rally going that ended with a 5-4 victory over the San Francisco Giants.

The Braves trailed 4-3 when Mike Lum led off the ninth with a single. He was sacrificed to second and scored on pinch hitter Biff Pocoroba's single.

Pocoroba took second on the throw to the plate and Bonnell was sent in as a pinch-runner. Giants reliever Greg Minton walked pinch-hitter Joe Nolan before getting Jerry Royster for the second out.

Gary Matthews hit a grounder to third. Darrell Evans fielded the ball but missed an attempt to tag Bonnell and the bases were loaded. Evans said Bonnell left the basepath and should have been called out. Evans later was thrown out of the game and Office delivered the game-winning hit.

In other National League action, the Chicago Cubs downed the Montreal Expos 3-1, the Cincinnati Reds edged the Houston Astros 5-4, the St. Louis Cardinals blanked the Pittsburgh Pirates 2-0 and the New York Mets nipped the Philadelphia Phillies 3-2. Los Angeles and San Diego were not scheduled.

"It's true I left the basepath," Bonnell said, "but I had to keep from running over him (Evans)."

team athletes. The best U.S. gymnasts stayed home to prepare for more important international competitions that use Olympic rules, which the Pan Am Games do not.

In Creek's event, there weren't even enough other U.S. competitors to constitute a team for overall scoring purposes.

The swimmers are out to get all the gold medals.

At Mexico City four years ago, U.S. swimmers took the gold medal in all but two swimming races. So far, in 16 events they have 16 gold medals and 16 Pan Am Games records. They earned six golds Thursday.

The suspected weakest links in the chain come up tonight. Jesse Vassallo, upset Thursday night by teammate Peter Rocca in 200-meter backstroke, has to beat world record holder Graham Smith of Canada in the 200-meter individual medley to

keep alive hopes of a U.S. sweep.

In the women's 200-meter breaststroke, the U.S. hopes ride on two little-known swimmers: Patty Spees, of Oakland, Calif., and Renee Laravie of Daytona, Ohio, while breaststroke specialists Tami Paumier and Tracy Caulkins sit out.

Caulkins, of Nashville, Tenn., makes her final Games appearance tonight in the 400-meter freestyle, in which she faces teammate Cynthia Woodhead of Riverside, Calif.

Caulkins' hopes for five gold medals here were dashed Tuesday night when Paumier edged her in the 100-meter breaststroke. She had three golds and a silver entering tonight's competition.

But Woodhead, with three events to go, still was hopeful of running her gold medal count from two to five.

Rowdy Gaines, Winter Park, Fla., and Linda Jezek, Los Altos, Calif., were also competing today for their third gold medals in swimming - he is the 800 freestyle relay, she in the 200 backstroke.

Tom Peterson of Tacoma, Wash., took the seventh U.S. gold Thursday with his second winning performance in the 10,000-meter roller skating final.

The biggest problems the Americans may encounter in some events is overconfidence, since their 34 gold medals through the Games' first four days is more than that of the other 33 countries combined.

Overconfidence may have been what took over the vaunted U.S. men's basketball team. The Americans blew three 14-point leads Thursday night against Brazil, and barely held on for an 82-78 victory

# Amateur Leads Western

OAK BROOK, Ill. (AP) - Bob Clampett is more than a 19-year-old cut-up from California. He's a darn good golfer.

Although he begs off questions about his U.S. Open antics of last month by saying, "The chapter's over. Why prolong it?" he finds it tough to keep his sense of humor hidden.

"How am I looking for low amateur?" he kidded Thursday after tying Bruce Devlin and Jim Simons for the first-round lead in the \$300,000 Western Open.

Earlier, responding to a question about the strongest part of his game, the shaggy-haired blond - the lone amateur in the tourney - said, "They're all weak. I'd say my strongest part is probably luck."

Clampett, who will enter his junior year at Brigham Young University in the fall, missed the cut in the U.S. Open but played in the third round to fill out a twosome.

On the first two holes, he drove while on his knees. Warned against further breaks with tradition, he cooled his act, then resumed it on the back nine and was disqualified.

He played it straight Thursday to tie Devlin and Simons with 3-under-par 69 over the 7,007-yard Butler National Golf Club course.

One stroke back were two-time Western champion

Tom Watson, Calvin Peete, Allen Miller, John Lister, John Fought, Pat McGowan and Dale Douglass.

Chick Evans was the only amateur to win the Western Open. He did it in 1910.

## Second Wind

by marc herring

Concentration is the key to any athletic endeavor, be it playing a game of tennis or running track. Everything else should be blocked out of the participant's mind with no thought of anything but completing the goal set forth.

With that thought, it's time for a week ago Thursday to come about and be remembered.

The game was won, our team had more than enough runs to salvage the victory, so what is the need to continue going full blast? Well, the idea of competition appeals to me but only if the time spent is used to the utmost...at the full tilt of complete concentration.

One out, a runner at second and my fourth time at bat. The two previous times hits to the right field had caused the defense to pull that way to eliminate the possibility of a third time.

With the idea of trying to hit the ball to the opposite field, concentration at a high level, I hit the ball to the shortstop. Pushing with all I had, a chance to beat the throw, I headed for first base. The throw was a little bit off course, causing the first baseman to swerve into the basepath for the ball. Me, the runner at full speed with my mind on reaching the base did not realize in time that I was going to run into the man at the base. Very determined sounding, right? Well, a week later, I wonder.

The next thing I remember is lying on the ground with tremendous pain in my head. Hopping up, I declared I was alright, as I searched for my head that had felt like it had been ripped from my shoulders. Final diagnosis, out, a headache and a broken left clavicle. In other words I had busted my collarbone.

With it being the first broken bone suffered by this illustrious weekend athlete, my theory of having bones that were unbreakable vanished. I had been in some hard crashes before with nothing more than a bruise, so I felt that I was nearly indestructible. On well, trash that thought.

Now, for the four to six weeks I will be recovering from this misfortune, the prospects of softball for the rest of the summer is dim but the hope is there. A goal has to be reached for and mine is to make it before the end of the games that will be contested this year in the Slo-Pitch league.

Next time out I don't know if I will strive to reach the level of concentration that even realizing that the play is nearly hopeless will be blocked out of my mind, but I hope so. That is competition.

The thing that hurt the most, though was my deep down ego. When I ran into the man, he did not even seem to flinch, while I crumpled like a bug against a windshield. I even sort of wonder whether he knew that I had run into him? Oh well.

# Legion Limelights

**Editor's note:**  
[Due to the end of the American Legion season before the entire team could be given individual highlights, the remaining five players are being run at one time.]

Alan Daugherty, Kenneth Waters, Norman Hill, Steve Bartels and Eddie Lindeman all played key roles in the American Legion team this year.

Daugherty was a key to the infield at third base and provided strong defensive plays throughout the year. A graduate of high school last May, he had 14 years of baseball experience. The coaches had high praise for Daugherty because of his defensive abilities and his desire to improve in all areas of the game.

Waters, in his second year of Legion ball helped in the defensive efforts of the team by holding down the position of second base. He will be a junior in high school and hopes to help the varsity baseball program with his experience.

Coach Joe Don Cummings feels that he has the potential to be a very good player and as he gets older will be able to help the team he plays for.

Hill, a sophomore last year for the Whitefaces, gave needed help to the mound staff, as he

did for the Redbirds this year. Hill, while not pitching played either shortstop or the outfield.

Along with his defensive skills, Hill was leadoff batter and the coaches felt that he was an asset to the team because of his ability to get on base.

Bartels was one of the leading hitters in the district and for the team this summer and along with his power at the plate offered strength at first base.

A righthander, Bartels will be a junior and will be a one year letterman for the Whitefaces

this year in baseball.

Lindeman is a very determined team player according to the coaches, willing to do anything that will benefit the team's success.

At 5-2 and 106 pounds, every pitcher in the district has a hard time throwing a strike to him, which gives the team a baserunner in the form of a walk.

Though small, Lindeman is capable of handling the bat as he layed down bunts throughout the season with great efficiency.

## Borg To Face Tanner In Wimbledon Finals

WIMBLEDON, England (AP) — Playing Bjorn Borg in the Wimbledon final holds no terrors for big Roscoe Tanner.

"If I didn't think I could win there would be no point in going on court," Tanner said Thursday after crushing Pat Dupre, 6-3, 7-6, 6-3 in the semifinals.

Borg beat Jimmy Connors 6-2, 6-3, 6-2 to advance to his fourth consecutive final. He has won the final every time he's entered it, which means he stands to make modern tennis history Saturday. He could become the first man to win four

in a row since Anthony Wilding completed his streak in 1913.

Today, Martina Navratilova and Chris Evert Lloyd will battle for the women's title. Navratilova is the defending champion. Lloyd, who won Wimbledon in 1974 and 1976, beat Martina two weeks ago at Eastbourne.

On Wednesday, Navratilova defeated Tracy Austin and Lloyd downed Evonne Goolagong Cawley to reach the final.

Tanner is not rated with much of a chance against Borg, but that could work to his advantage.

"There may be a little

pressure on him, going for his fourth win, and there is not much pressure on me," Tanner said. "I'll be coming in as underdog and I'll just see how I go. It doesn't worry me that I am not given a lot of chance. It is what I do on court that matters."

Borg has won most of their previous encounters, but Tanner did beat the Swede in the U.S. Pro Indoor in Philadelphia 18 months ago. He feels that result could be significant.

"I felt I could beat him then," said the man with the huge serve. "I had a game plan that I wanted to use and I stuck to it and it worked." But Tanner wasn't about to reveal any game plans.

Borg was in superlative form in destroying Connors. Tanner and his coach, Dennis Ralston, watched part of the match.

"Borg is playing awfully well," said Tanner. "Guys have tried all sorts of things against him, but nothing has really worked. Borg wins a lot of points with his service. It is deceptive. Even when getting it back, you have to think about his next shot."

Tanner said his own game has improved dramatically over the past 12 months. "Previously thought of as a big server but little more, his game is much better rounded now."

"The key to my improvement is my better movement, concentration and confidence," he said. "I also have a better attitude. I don't let things worry me."

"The key for me to beat anyone is to move well. Borg does the same thing."

Despite being the outsider,

### No-Hitters Close In AL

**By BOB GREENE**  
AP Sports Writer

Milwaukee's Lary Sorenson and Seattle's Rick Honeycutt flirted with no-hitters in day games, but Oakland's Rick Langford came closest.

Langford shut down the potent California attack on just one hit — an infield chopper — as the A's blanked the Angels 3-0.

The only hit was a high bounce by California catcher Brian Downing in the fifth inning that almost went over the head of third baseman Wayne Gross. Still, Gross, who doubled in one Oakland run and scored the other two, was upset.

"If I could have gotten one step back quicker and thrown

overhand, I would have gotten him," he said.

Langford, a 4-9, saw it differently. "Wayne did all he could."

Sorenson and Honeycutt were almost as tough. The Milwaukee hurler pitched 7½ innings of no-hit ball before giving up the first of two New York hits as the Brewers stopped the Yankees 3-0. Honeycutt lost his no-hit bid after 5½ innings, settling for a three-hitter as the Mariners blanked the Minnesota Twins 4-0.

In other AL games Thursday, it was Detroit 3, Toronto 2; Chicago 5, Cleveland 4 and Boston 5, Kansas City 4.

Langford said his outing helped take some of the sting out of Wednesday's shellacking of the A's by California.

Gross doubled off Angels starter Nolan Ryan, 10-6, to score Jeff Newman.

**LOT OF ANTHEMS**

NEW YORK (AP) — You can call Art Friedman — a statistician — a four-sport man. Friedman keeps statistics for the New York Mets and Rangers on a regular basis and has also used his handy pocket calculator for major-league football and basketball teams.

Art has worked more than 3,000 sports events, which he wryly comments is "a lot of national anthems."

## Sports Shorts

By The Associated Press

BOSTON (AP) — The United States swept the men's and women's 1600-meter relay races and defeated the Russian junior track and field team 188-178 in overall scoring to average last week's loss in the first of their two dual meets.

The American men took a 118-102 victory; while the American women, who fared poorly in the Bakersfield, Calif. meet last week, did better here, losing to the Russians 76-70.

OSLO, Norway (AP) — Sebastian Coe of Great Britain set a world record in the 800 meters with a time of 1 minute, 42.33 seconds at the annual Bislett Games.

The old record of 1:43.4 was held by Cuba's Olympic champion, Alberto Juantorena.

defeated Orange Coast College of Newport Beach, Calif., in the Ladies' Challenge Cup by one-half length.

RICHFIELD, Ohio (AP) — Cleveland Cavaliers Coach Walt Frazier?

A longshot, but a possibility according to Nick J. Mileti, president of the Cavaliers, who says he is going to meet soon with the veteran National Basketball Association guard to discuss his future with the organization.

"I'm going to sit down with Walt and discuss his far-reaching future," Mileti said Thursday. "We'll discuss a lot of things, including the coach's job and even assistant coach."

"He's one of the premier

guards of all time, and we will discuss how he plans to go out of the game of basketball. The reputation he carries into retirement will weigh heavy for the rest of his life. We'll talk about this."

Frazier, once an All-Star for the New York Knicks, has been a controversial figure in his two years as a Cavalier.

He injured his foot two seasons ago, then reinjured it last winter. He played little of either season and has one year to go on a contract reportedly calling for about \$450,000 a year.

The Cavaliers have been without a coach and general manager since May when Bill Fitch was released from his contract and became coach of the Boston Celtics.

## Homers Power Gold Sox Over El Paso

By The Associated Press

Home runs by Dane Iertsen and Steve Smith powered the Amarillo Gold Sox to a 7-6 Texas League baseball victory over the El Paso Diablos Thursday night.

In other Texas League action, Shreveport edged Jackson, 3-2, and Tulsa beat Arkansas, 4-0. Midland's scheduled game at San Antonio was postponed because of rain. It will be made up as part of a doubleheader Saturday.

Amarillo jumped off to a 6-0 lead after three innings and the Diablos couldn't catch up. El Paso scored two runs in the eighth to cut the margin to 8-6, but couldn't extend the rally enough for a victory.

Mark Brouhard, the Texas League's leading home run hitter, had two homers for the

Diablos and Mike Bishop added another, his ninth in less than a month.

Fran Hirschy, 5-5, was the winning pitcher. Keith Comstock, 2-5, was the loser.

Bot Tufts, 8-7, got his fifth consecutive pitching victory as the Shreveport Captains edged the Jackson Mets, 3-2.

Sergio Beltre's fifth homer of

the year helped the Mets keep it close.

In addition to his skill on the mound, Tufts helped his own cause by scoring the winning run in the eighth inning. He led off with a double and scored on a two-out single.

Pitcher John Clarkson won 53 games for the Chicago Cubs in 1985.

FAITH REVEALS THE UNLIMITED FACETS OF LOVE

For many of us, the word "love" usually signifies romantic adventure, happy marriage or the care and anxiety of a parent; but while all of these are good examples of it, they by no means tell the whole story. Love is an act of kindness for one's neighbor; an anonymous donation to a worthy cause; food and supplies sent to starving native children or the victims of a disaster; a regular visit to the sick, the elderly or the lonely of any age; and so on indefinitely. Whatever form it takes, the main ingredients of love are thoughtfulness and unselfishness, and you will find the recipe for it at the Church of your choice. It will be served with a generous portion of happiness for you as well as for the recipients of it.

Respect is what we owe; love, what we give.  
—Phillip James Bailey

"A new commandment  
I give unto you, That ye love  
one another; as I  
have loved you."  
—John 13:34
