Sights and Faces Seen

Judge Fred Baird is authority for the statement that Jim a paper salvage day has been set Clark, who attended the recent judges and commissioners meet ing in Galveston, spent most of cooperate by gathering up all his spare time just watching the waves roll in from the gulf. According to Jim, he was just trying to figure why those waves-continually coming in downhill-did not "fill up the hole and overflow over the sea

And stories continue to come in about these Hereford boys and girls in service and the high interest caused by their good teeth. Venny Stewart says that most of the medical staff at the Navy induction station at Dallas "took off" and had a good look at her teeth, when she signed up for duty in the WAVES; and E. B. Posey, Jr., writes from somewhere in the Pacific that he was recently called in for "immediate dental attention: and drew the comment, "Why, you've got extra good teeth. You wouldn't be from Hereford, Tex., woud you?"

After which E. B. spent some time answering questions concerning the foods, water and soil in Deaf Smith County. The "immediate dental attention" which he finally received was a tooth cleaning.

Trucks Needed For Paper Drive Sunday, Dec. 17

Aiming to top the record for scrap paper collection reached in the drive several weeks ago, for Sunday, Dec. 17, and all Hereford citizens are asked to scrap paper on their premises and having it ready on the curb when the collectors come by.

County Judge Fred W. Baird states that as yet no owners have offered the use of their pick-ups in the paper drive and urges that any person having a pick-up which could be used in the drive to call him or R. J. Richardson, so that arrangements may be completed as soon

The drive will be conducted by Hereford Boy Scouts, and proceeds from the sale of paper will go to special Boy Scout (Constnued on Page 12)

How Much Is a Billion Gallons of 100-Octane Gasoline?

It's enough to fill 120,000 tank cars—a train 1,000 miles long.

It's enough to fill an 8-inch pipe line that would circle the earth three times at the equator.

It's enough to fuel 400,000 Flying Fortresses for a round trip flight from Britain to Germany.

That's a billion gallons of 100-octane gasoline! But it's more than that. It's the effort of the 14,000 men and women of Humble Oil & Refining Company, who are today celebrating the production of the onebillionth gallon of 100-octane aviation gasoline at Baytown refinery—a remarkable feat in the history of the petroleum industry.

It is one of the wartime contributions of the 14,000 men and women of Humble-scientists, drillers, roustabouts, stenographers, pipeliners, technologists, truck drivers, geologists, glassblowers, stillmen and those working in hundreds of other occupations.

Here is a partial list of their accomplishments to date:

FIRST

to produce at one refinery a billion gallons of finished 100-octane aviation gasoline.

The Baytown refinery has produced more 100-octane aviation gasoline than any other plant in the world.

to produce synthetic toluene.

The Baytown Ordnance Works, first to synthesize toluene from petroleum, has supplied the toluene for at least one out of every two bombs used by the United Nations since Pearl Harbor.

in the production of crude oil.

Humble Oil & Refining Company is the nation's largest producer of crude oil, and is currently supplying about one-fourth of the increased production required for war as measured by the gain since 1941.

in the transportation of petroleum.

The Humble pipe lines transport more oil than any other system, handle one barrel in every seven of the domestic supply.

These accomplishments climax a quarter century of development, planning and team work of a great organization. The men and women who made them possible are behind the billion gallons of 100-octane aviation gasoline. They are behind whatever America needs of them for victory.

Gas Rations Due To Tighten Up

Gasoline Panel members in each of the 71 War Price and day afternoon in the Owen A Rationing Boards have been in- drews home. He visited a sh suance in this District within several days ago. the allocation, according to Ely Fonville, District OPA Rationing Wednesday and Wednesday Executive. night with his daughter, Mrs.

Petroleum Administration for Bill Towns and family. War has announced that gasoline demand is running 89,300 barrels per day over allocation for the first half of the current quarter. "The trend is seriously unfavorable when you recognize that normally the average declines in the colder period of this quarter. Our weather has been favorable this year and it is doubtful that the most unfavorable weather will cut consumption to the point that we wil lbe within our allocation at the end of the quar-

Instructions to Local Boards pointed out that due to the extreme shortage of gasoline and the great demand for it by the armed forces, it is necessary that every Gasoline Panel follow regulations exactly and make every possible attempt to stay within the allocation for the District.

PACKARD MILLING CO HEREFORD, TEXAS

What Helps Agriculture Helps All of Us!

his page is printed here as a service to all farmers and ranchers of America. Together with you producers, we have a big job to do in the business of feeding this nation of ours well.

A short time ago I was talking about improved methods with a farmer. He said, "The way I look at it is this —what helps agriculture helps all of us."

That is it in a nutshell. What helps agriculture does help all of us-producer, meat packer and processor, retailer and consumer. So the purpose of this page is to tell in a few words and many pictures about all manner of things that do help agriculture. We hope that by searching out news items, telling of new trends, big or little, reviewing findings of agricultural experiment stations, by recounting the experiences of successful individuals, and in many other ways, we can render a worthwhile service to all who produce our nation's food.

The Editor will be F. M. Simpson, who is already well known to many of you as Manager of our Agri-

cultural Research Department. He will welcome your suggestions and original ideas. Mr. Simpson is the Editor-but it is your page. Please help us make it a useful one.

A Merry Christmas to you all!

Sorry if I disappoint some home folks this Christmas. But I've got a date with the Service men and women. I mustn't be too little or too

Nutrition Is Our Business-and Yours!

These six Americans are united in the job of seeing that 132,000,000 fellow Americans get enough of the right kinds of food to eat. The rancher, farmer, meat packer, retailer, housewife and scientist, each has a part in the preparation and distribution of meats and other foods.

Feeders of livestock know that diet has a lot to do with the health of their animals. It is the

same with human beings. There is a great deal of research being conducted at the present time in our universities to find out more about the relationship between diet and human health, and Swift & Company gives many grants to aid this kind of research.

Not so many years ago a lot of people said meat was hard to digest; that children should never be given pork, etc. Nutritionists have proved that pork is one of the most digestible of all meats. rich in Vitamin Bi. These and many other basic truths about meats and other foods have been established by the work of nutritionists. You can readily see why such discoveries help the sale of meat and of livestock. That is why we say— "Nutrition is our business-and yours."

in flour, then brown in hot fat in a heavy kettle. Add water, cover tightly Martha Logan's A beef chuck, and cook slowly for two hours, or until tender. Add peeled potatoes, onions and carrots, and cook for one hour. BEEF POT ROAST round, proroast, accompanied by browned on-ions and carrots. Roll the beef well

Ex-Farm Boy Knocks' Em Dead

Maybe you've heard the epic story of "Zeke" Givan. "Zeke" was a farm boy from Dearborn County, Indiana—until he enlisted in the Marines. His first big show was at Kwajalein. The Japs started to rush him, and "Zeke" started to shoot. When the shooting stopped, those present were "Zeke," one red-hot Browning Automatic Rifle, and 35 dead Japs. "Zeke" says modestly, "I did nothing except my duty." Later he was wounded at Saipan. We'll say that like many thousands of other farm boys, in and out of the Bervice, he is deing his duty extra special well.

IIIIIIIIV, CHICAGO 9, ILLINOIS

Does lots of wool on the face and legs of a sheep and a wrinkled skin help to make a more valuable fleece? No, says the U. S. D. A. Sheep with wool over their eyes produce fleeces of lighter weight and less value than open-faced sheep.

the second secon SOFT CORN FATTENS LIVESTOCK

by I. B. JOHNSON, Director gricultural Experiment Station South Dahota State College

If you are caught with "soft" corn, due to a sudden freeze before your corn matures—remember you still have feed. It makes a good fattening feed for steers, calves, feeder pigs, and lambs.

These were the conclusions of the South Dakota

Experiment Station, based upon the first year's feeding trials, wherein cattle, hogs and lambs fed soft corn were compared with others fed sound corn of No. 3 market grade. The soft corn was bought at 50 cents a hundredweight—the No. 3 corn at 75 cents a bushel.

CANVAS COATS FOR SHEEP PAY OFF

Range lambs grazing in mountains and valleys, fashionably dressed in ducky little white duck

coats sounds more like a pipe dream than a prac-

tical possibility for sheep growers. However, in an experiment at the University of Wyoming,

coats of 15-ounce canvas were tailored to fit half

coats of 15-ounce canvas were tailored to fit half of a flock of 684 range sheep. The fleeces were carefully compared at shearing time and the "coats" proved their worth in a big way... more clean wool per fleece; 6.8 per cent less shrinkage; 13.5 per cent less dirt content; and the staple was a full half-inch longer than on the sheep that wore no coats.

This adds up to extra wool profit no matter how you look at it. In addition, the coats pro-tect the sheep from cold weather, wet, sand,

dirt, burrs, stickers, and reduce death losses and feed consumption. Wool from the coat-wearing sheep compared favorably with the best white Australian wool.

For further information, write R. H. Burns,

University of Wyoming, Laramie, Wyo.

75 cents a bushel.

No preparation was given to this soft corn. It was stored in uncovered piles on the ground, and fed field run—soft, moldy, rotten, husk-covered ears just as they came.

Yearling steers were fed for 150 days, calves 195 days, pigs from 87 to 118 days, lambs 90 days.

In ALL cases the return was greater from the lots receiving the soft corn, due to the price at which the corn was purchased.

The gains of both cattle and pigs on soft corn, compared to those on hard corn, were reduced after the beginning of warmer weather in April. It is advisable to feed your soft corn early.

In figures, the soft corn had the following approximate values when compared with the price of No. 3 ear corn in the rations fed:
