America!

Put Your Money in the U. S. A.
... it's Good Business ... and Good Americanism!

Uncle Sam needs money. He's got to build some airplanes and tanks and battleships. He's got a few million men in his armies, and the boys have to have guns . . . not to mention food and uniforms.

He needs this money because he thinks that America has really "got something" . . . something that is worth more than lip service, and because he has found out that certain gentlemen in Europe are hurt not at all by words.

And to get down to cases, Uncle Sam needs YOUR money. Of course, if he were like a certain ex-paperhanger or his recent "pal Joey", he would say "Gimme" . . . and you, Mr. Citizen, would give. But Uncle Sam would rather have your

voluntary contribution; and at the same time, he will see to it that you have a good investment, something to cushion the inevitable economic reaction when the present emergency is over.

So that is why Uncle Sam is asking—not demanding—that you invest in the future of your own country by buying Defense Savings Bonds and Stamps. It's a statement of faith which you can make in your own country and it's a statement of faith which will return you a good rate of interest.

Defense Bonds are on sale at the post office and at the banks. Defense Savings Stamps may be purchased at the post office.

SOCIETY

Mrs. Jacobsen Is Complimented On Birthday

Friends and relatives of Mrs. John Jacobsen, Jr., were entertained Sunday, when her mother, Mrs. E. E. Fridley, entertained to honor her on her birthday at the Fridley home.

The table for the dinner-party was laid for thirteen guests. Purple petunias and sweet peas formed the decorations. A birthday cake was featured and gifts were presented to the honoree.

Present were the honoree, John Jacobsen, Jr., Chris Jacobsen, Miss Edah Park, Miss Thelma McMinn, Miss Lucille Park, Mrs. Edna Bowe, Miss Eleanor Pierle, of Canyon, L. J. Bennett, Mr. and Mrs. Berry Orr Jacobsen, and the hosts.

Bridge-Luncheon Is Enjoyed By Group Wednesday

Mrs. Buford Crosthwait entertained with a bridge-luncheon at her home on West Seventh Street on Wednesday of last week. Roses and larkspur that shaded from pale pink to deep rose were used to decorate the luncheon table. Baskets and bouquets of pink and blue larkspur were placed about the rooms. Appointments for bridge games repeated the colors of the flowers. Cocktails were served in the living room and small tables for four were laid in white.

Mrs. Alton Miller received the award for high score and Mrs. R. R. Willis received second high. Those enjoying the delightful hospitality included Mesdames Louis Woodford, Frank Huckert, Ralph Hastings, Willis Edelman, Alton Miller, Urin Streu, Nelson McRight, Sylvester Slagie, Wayne Evans, Gaylord Newell, Ralph Roden, R. R. Willis, and the hostess.

Let's Cook Something

CREAM SALAD

- 1 package lime jello
- 1 1-2 cups hot water
- 2 ten cent packages of Philadelphia Cream Cheese
- 1 small can crushed pineapple
- 1 cup nuts
- 1-2 pint whipping cream
- 3 tablespoons sugar

Dissolve the jello in the water. Break the cheese into small pieces and stir into jello with Dover egg beater. Add the can of pineapple, juice and all the sugar and the nuts. Whip the cream and fold into the mixture. Pour into molds and let congeal in refrigerator. Serve in lettuce cups.

CHERRY SALAD

- 1 package lemon jello
- 1 cup hot water
- 1 can red pitted cherries (the No. 2 water pack)
- 2-3 cup cherry juice
- 3-4 cup sugar

Dissolve the jello in the cup of hot water. Add the cherry juice, sugar and cherries in order given. Pour into molds and place in refrigerator to congeal. Top with mayonnaise and serve with olives and hearts of celery.

This recipe originally belonged to Mr. Richardson's mother and is especially good with meats.

Coterie Club Is Entertained Friday Afternoon

Coterie Club members enjoyed an afternoon party Friday at the home of Mrs. A. R. Bateman. Invited to play contract with the members were Miss Aileen Walker of San Angelo, who is visiting her sister, Mrs. Knox Kinard, and Mrs. T. H. Coursey.

Members present included Mesdames J. W. Witherspoon, C. F. Moore, E. B. Hicks, Colby Conkright, Grant Fuller, Knox Kinard and the hostess.

Miss Walker playing high for score award.

Mrs. Rosson Is Hostess At Bridge-Luncheon

Mrs. S. P. Rosson was hostess at a bridge luncheon last week given for members and guests of the Wednesday Luncheon Club.

Pink roses and blue cornflowers centered the lace covered table from which the luncheon was served, with bridge appointments for games in the afternoon, picking up the summer-time theme to emphasize those colors.

The salad fills a certain definite purpose in every meal. You may serve it as an introduction to the meal, to accompany a dinner or luncheon, as a substitute for dessert or instead of meat, the whole-meal salad, which contains essential protein food, may be served. This is a fine hot-weather idea.

When Mrs. R. J. Richardson returned recently from a visit to California she brought with her some delightful recipes for the cold buffet or salad bar. She gives you two of her favorites, either of which with accompanying beverage and sandwiches makes splendid food material for luncheon, afternoon party or a hungry family. Here they are:

Among the special guests were Mrs. Dow Mercer, Mrs. H. K. Fox, Mrs. C. C. Acker, Mrs. Colby Conkright and Miss Eloyse Pitman.

Members-attending were Mesdames Jack Wayland, W. L. Davis, Jimmie Gillentine, J. C. McCracken, Oscar Easley, Alton Fraser, W. M. Emmons and the hostess.

High scores in the bridge games were made by Mrs. Fraser for the club and Miss Pitman, guest.

4-H Club Meets Saturday

The 4-H Club boys met Saturday at the courthouse and heard reports from the winners of the prize pigs given by Sears-Roebuck Company to writers of the best essays of the "Cow, Hog, Hen Plan of Farming." The boys told of the trip to Amarillo where they were guests of the company at a luncheon at a downtown-hotel.

Reports were also made on other projects in progress under 4-H plans.

Miss Edith Jackson, who is employed in Austin, spent the weekend here with her parents, Mr. and Mrs. R. R. Jackson. She returned to Austin, Monday.

SEEDS of ADVICE

from
The Garden Club

The material for the following article on "Types of Roses" was prepared by Mrs. Robert Wagoner for the Deaf Smith County Garden Club.

Types of Roses

There are many types of roses but there are five outstanding types suitable for the Texas Panhandle, and they include about 90 per cent of the rose bushes planted in home gardens. Teas, hybrid teas and hybrid perpetuals are the most common types of low, constant blooming roses suitable for rose-beds. Climbing roses include hardy climbers that bloom but once in the spring and hybrid tea climbers that bloom off and on all summer. They are used on pillars, trellises and as wall covers. A group of low-growing, heavy-blooming plants used for edging and mass planting are the polyanthas and hybrid-polyantha roses.

The tea rose is the most satisfactory for the south but is unfortunately the least known. It blooms continuously from spring until frost, is disease resistant, requires little or no pruning and its blooms carry a delightful tea fragrance. The stems are long and suitable for cutting. Only a few varieties are available from nurserymen today and the yellow ones seem particularly disease-resistant.

Listed among those suggested for Texas gardens are Alexander Hill Gray—lemon yellow; long pointed bud; very fragrant but with weak stem. Bridesmaid—pink, fragrant, lasting blooms. Lady Hillingdon—apricot yellow, very fragrant. Niles cochet cherry red, good stem. White Maman Cochet—white, lasting

with fine stem. The hybrid perpetual rose is suitable for both bedding and shrub border. It is a large and vigorous grower, 5 to 6 feet tall when not pruned. The blooms are produced on last year's wood; therefore a little pruning seems advisable. Some of the best varieties include the American Beauty—crimson, very fragrant and blooms all season; General Jacqueminot—clear red, blooms all spring and into the fall; Hugh Dickson—crimson and scarlet, double and fragrant; Baroness Rothschild—rose pink, vigorous and a profuse bloomer; Frau Karl Druschki, very large bloom with no fragrance.

Polyantha roses include the finest group of roses for edging and bedding where a continuous mass of color is desired. There are two distinct types—the cluster type which seldom grows over 18 inches tall—and the single type which grows 36 inches tall. These types include Cecil Brunner or Sweetheart—biggest pink with long stems; Elise Poulsen—rose pink, in open clusters; and Poulsen—semi-double brilliant scarlet.

Some of the best varieties of climbing roses include Cecil Brunner—beautiful pink; President Herbert Hoover, a long, semi-double apricot and cerise; Talisman—copper yellow and red semi-double and very fragrant; Silver moon, white. The most popular are the hybrid teas which are the result of crossing a tea rose and an hybrid perpetual. Some of the best varieties include the Ami Quinard—a deep crimson; Francis Scott Key, double crimson red; The Radiance family, Briar-Cliff—large, deep rose and pink; Golden Dawn—double lemon yellow and McGredys Ivory, a creamy white.

No type of flower gives more satisfactory returns than the rose, but regardless of the type, the success of the rose garden depends on the care and cultivation.

In test cities and counties where the cotton stamp plan was in operation last year, items most popular with stamp-users were piece goods, ladies' dresses and housecoats, men's shirts, men's underwear, and curtains.

POTATO GROWING

By Joe Ballinger

PLANTING

In heavy soil much as we have in the Panhandle, potatoes should not be planted more than three or four inches deep. Even better, if the land is hilled up and the potatoes planted in beds, they will be planted shallow if planted about five inches deep. The bed itself should be seven or eight inches high.

Seed pieces should be cut blocky. A potato that is 2 1-2 quartered. Full information for treating seed potatoes can be obtained by writing the U. S. Department of Agriculture in Washington, D. C.

Time for Planting

The right time for planting potatoes depends on when the grower wishes to harvest. Planting from March 15 to April 1 will produce a harvest as early as July 1, but another three weeks might increase the yield by as much as one-third. Potatoes planted in April will harvest in August; and for the late, or storage crop, planting from June 15 to July 10 has proved satisfactory.

SPACING

The width of the rows depends largely on the slope of the land. If the slope is only two to four inches to the hundred feet, a forty-inch row is better; if the slope is greater, 36 to 38 inches

CHDA NOTES

By Sadie Lee Oliver

—There is growing in the garden of Mrs. Fannie Craddock, at the home of her daughter, Mrs. Will S. Kerr at 1102 East 10th Street, some of the Peachleaf Bellflower, or Campanula persicifolia. This is a perennial which grows two to four feet high, with fine wide-open bells of blue, white or lilac. It is very good as a cut flower. The plant was brought to Mrs. Craddock from a friend's garden in Missouri. The flower is of the same type as the Canterbury Bell.

Mrs. Urlin Streu has three climbing roses on the east side of her home; and they are among the most beautiful we have seen—which is quite a statement considering the number and beauty of the climbing roses which are blooming now.

Delphiniums are in bloom at the Bob Wilson, J. P. Slaton and Essie Cardwell homes. Mrs. Cardwell has a hybrid delphinium about six feet high with seven stalks.

There must be about one hundred flowers on the Regal Lilies now in bloom on the north side of Mrs. J. P. Slaton's home on 25-Mile Avenue.

A recent bulletin from the state extension service informs housewives that if they have a pressure cooker their greatest contribution to defense may be in keeping it safe and in working and using it for a more abundant food supply.

The bulletin goes on to explain that there may not be any aluminum pressure cookers available in 1942 because the country's supply of virgin aluminum is being used faster than it can be produced. Not even scrap supplies of the valuable metal are being used for ordinary domestic needs.

Single 5-quart fill defies Death Valley for 13,398 miles...Certified

The celebrated Conoco Germ Processed oil patent first made it possible for Conoco to bring your engine OIL-PLATING—lasting lubricant with magnet-like attraction for inner engine surfaces. Thus OIL-PLATING can't all quickly drain down—fry up—"rub out" fast. And this same Germ Processed oil patent still assures an OIL-PLATED engine, after you change to the sensational new oil by Conoco . . .

Its name is CONOCO Nth MOTOR OIL —Brings new Economy aid, besides OIL-PLATING

This popular-priced new Conoco Nth oil that OIL-PLATES, can protect itself against today's worst cause of rapid consumption. How? . . . Just consider one truth about latest oil refining methods. Ridding oil of bad things may sacrifice some of Nature's best life-givers! The same happens, you know, in processing some foods. But today that loss is often made up by vitamin synthetics . . . man-made. And today the vigor otherwise sacrificed in any proper refining is more than made

up by patented Conoco Thialthene inhibitor . . . man-made . . . in Conoco Nth oil.

Lasted 74% to 161% longer than 5 other big-name oils in fierce fair test

Across the Death Valley desert Conoco Nth wrote E-C-O-N-O-M-Y. Locked in the engines of 6 new everyday cars—all alike—were 6 prominent oils, including Conoco Nth. One 5-quart fill per car. Never another drop. No mercy. 57 miles an hour under impartial observation—under sun that'd singe you—till each fill gave out and the engine was junk.

Conoco Nth outlasted the next-best oil by 5,683 miles; outlasted the worst by 8,268 miles; outlasted the average of all 5 others by 7,057 miles. All certified. But you don't put your car through torture-tests. For authorities warn you to change oil at regular intervals. No quarreling with that! Now, however, as you change to Conoco Nth . . . the greater new oil that OIL-PLATES . . . set your speedometer-trip at 000. Keep track—and certify Conoco Nth economy for yourself. Continental Oil Co.—Pioneers in Bettering America's oil with Synthetics

CERTIFIED I hereby certify that the Death Valley Test and related work were thoroughly and fairly conducted. Engine Destruction occurred in each case at the mileage stated.

Facts of Draft Registration Summarized

Desiring properly to serve the young men affected by the second registration which will occur on Tuesday, July 1, from 7 o'clock in the morning until 9 o'clock at night in the selective service office on the second floor of the courthouse, the Selective Service Board has summarized the following essential facts of registration.

1. All male citizens who have reached the age of 21 since October 16 must present themselves for registration on July 1. Failure to register carries a heavy penalty fixed by the government, and aliens as well as citizens are required to present themselves to their local board.

2. The code covering the second registration is the same as before except that there has been a considerable broadening of requirements to take care of those who are in school and approaching completion of their work, especially if this work is in line with occupations that are in a degree associated with national defense and sustenance.

3. The list of "necessary" occupations has been extended to include some not before considered, which are now recognized as contributory to the national welfare.

4. As previously, registrants will be expected to notify their local boards promptly of any change of residence or of any change in employment or status of dependants which might affect their draft classification.

Full information on any questions concerning the registration may be obtained at the Selective Service office at the courthouse. Frank Givan emphasizes that all men in the county who have reached the age of 21 will be required to register here, regardless of whether or not this is their regular residence.

Notify AAA If Have Farms In Other Counties

In connection with securing a marketing card for the 1941 wheat crop, it is urged that all producers interested in farms in other counties notify the AAA office as early as possible so that officials may determine whether the producer is eligible for a marketing card.

Marketing cards may not be issued on any one farm if the producer is out of compliance with the AAA regulations, regardless of whether the other farm may be in this county or in another county.

If producers will notify the local AAA office early enough, they will write to other counties in which he has interests and determine his eligibility for a marketing card and thus avoid delay in getting the card and disposing of the wheat when it is harvested.

Wheat had begun to trickle into Hereford elevators this week, loads being received at the Packard and Fraser elevators from the Felix Urbanczyk farm on Monday and Tuesday. Fraser also received a load from T. L. Sparkman on Tuesday.

The rain Tuesday night--57 of an inch in Hereford and more in parts of the county--stopped the harvest, which in most cases was being held up to give the wheat a chance to dry up and lower the moisture content of the grain.

Through letters dispatched this week from the Hereford AAA office, farmers of this area were warned against cutting their wheat too early in view of strict regulations regarding moisture content on wheat that goes into the government loan program.

Whether stored on the farm or in approved warehouses, the wheat cannot contain more than 14 per cent moisture, according to the notice. Wheat which does not contain more than 15 per cent moisture may be conditioned by the elevator, at the expense of the producer, but wheat containing more than 15 per cent moisture cannot be placed in a bin under any circumstances.

With this in mind, producers were warned against cutting their wheat until it is absolutely ready. The loan rate has this year been definitely set at 94 cents in Hereford (\$117 in Galveston) on No. 1, hard winter wheat. The increase of 31 cents per bushel, however, was accompanied with the ruling on moisture content.

Alcoholometer Tests Drunks

New Haven, Conn.—An "alcoholometer" has been invented at Yale to give police a surer method of obtaining drunken driving convictions than the time-honored practice of making the suspect walk a chalk line.

Describing their invention in the university's quarterly journal of studies of alcohol, published today, Assistant Professors Leon A. Greenberg, a physiologist, and Fredric W. Keator, a mechanical engineer, said the person being tested simply breathes into the machine, the operator pushes a button, and eight minutes later takes a meter reading of the percentage of alcohol in the blood.

In contrast to previous methods of testing drunkenness which require the use of a laboratory, skilled technicians and considerable time, they said, the "alcoholometer," is portable, can be plugged into an ordinary wall socket and requires no special training to operate.

Based on the principle that the ratio between the concentration of alcohol in a person's breath and in his blood is constant, this is how it works:

The breath of the suspected inebriate liberates iodine in a tube containing a solution of starch and potassium iodide,

"The gross receipts upon which such tax or charge is to be computed shall be determined as follows: From the total receipts from the sale of natural gas within the corporate limits of the City of Hereford, Texas, for the particular quarter involved, there shall be deducted the receipts from the sale by the Grantee of natural gas to Public Authorities, to-wit: Federal Government and/or Federal Government Departments, the State of Texas, the County of Deaf Smith, the City of Hereford, and the Hereford Independent School District, and the balance remaining after such deduction shall constitute the gross receipts upon which such tax or charge is

The first payment hereunder shall be made on or before the 1st day of May, A. D. 1941, and shall equal two (2%) per cent of the gross receipts as hereinbefore defined for the first quarter of the year 1941.

"The Grantee shall at the time of making any quarterly payment furnish to the City a statement certified by a duly authorized officer of said Grantee showing the quarterly gross receipts as heretofore defined and the amount of deductions as hereinbefore provided for.

"The City agrees that the consideration set forth in the preceding paragraphs shall be paid and received in lieu of any tax, license, charge, fee, street or alley rental, or other character of charge for use and occupancy of the streets, alleys and public places of the City."

Wedding music consisted of two piano solos, "In the Garden of Tomorrow" and "In My Garden" played by Miss Dorothy McNeal and two vocal selections "At Dawning" and "Because" sung by Miss Maggie Routh. By Jimmie Gillentine

The Defense Program is affecting everyone, and most people are most interested in how it personally strikes their own business. For instance, wheat loans will be 94c (in Hereford) this year as compared with 63c. So far, paper prices have advanced very little. Cheaper papers are going up more than the better grades. However, here is an item in the paper field which will hit almost everyone who uses stationery. Chlorine, which is necessary in defense production, is being prorated. Since chlorine is used to bleach papers, notices this week state that some grades of writing paper in the future will be lowered in the standard of white. The quality of the paper itself or the service it will render and the use for which it is made will not be affected.

F. T. Barnum once said, "There's a sucker born every minute." Living evidence of this fact are Roger Corbett, Alton Miller, Bob Thompson and Jimmie Gillentine.

It's like this. Roger and Alton had been reading some ads about a new type mower, which operates on a new idea; Bob Thompson and I came along at the opportune moment and the first thing we knew they had sold us some stock in a corporation to purchase this mower. We ordered the thing and thought if it was OK, we would buy another one. It looks good and the idea is splendid. There are just two things wrong with it—we can't get it to cut Blue Grass or Bermuda Grass. The thing is called a Montamower and if anyone else is inclined to buy one of these contraptions be sure and look this one over first. We have sold it twice, but we made the mistake of letting our victim see it

first—and they backed out both times. We almost hooked H. V. Hennen.

Anyway, it's a good lesson for all of us. I mean buying something out of town, when we could have walked over to Streu's and bought what we wanted and closed the deal in a satisfactory manner. The thing weighs only seven pounds and is just the right weight for your wife to push. If you want to buy this mower, see any of the four above mentioned chumps. Free literature on request. From now on it is for re-sale, just like we bought it—you can look at it after you pay for it in full.

Mr. and Mrs. S. B. Walker this week announced leasing of the Hereford Creamery to Paul Jensen. Mr. Jensen comes here from Wellington and is a thoroughly experienced creamery man. He learned the business first in Denmark, worked in California, managed a creamery at Pampa for 12 years and has been at Wellington two years. Hugh Meredith has charge of the office here; he also comes from Wellington. Mr. and Mrs. Walker expect to manage their farms, one here, one at Portales, and two in Kansas—and expect to keep fairly busy. They came here, as you will recall, in 1930 and have since been connected with the creamery. During the past 8 years they have averaged manufacturing around a million pounds of butter a year, most of which went to California markets.

C. C. Bowman came in the other day to surprise us with a confession. He says he read in this column where J. H. Head said that Russian Thistles would drown when excessive rains fell—and he admits that he didn't believe a word of it. However, he recently noticed some black spots in a pasture and upon investigating found that it was Russian Thistles which were DEAD as a result of recent heavy rains. He says he will never doubt us again. (I was glad to hear this because I doubted the story a little bit myself.)

The Youth Council is sponsoring a Big Community Picnic at the football field Friday evening, June 27—and everyone is invited to bring a lunch basket and attend; games will follow, but no political speeches are planned. They want to put this picnic over in big style as one of their first projects. It's the last one before harvest and they are planning for a tremendous crowd. These kids are really enthusiastic about their projects, and they aren't asking much of the older folks. It sounds like a lot of fun if you like to eat and visit with friends. I think they've "got something"—and I guess we will all know by Saturday morning.

Summerfield

MRS. JIM CLARK

A week has passed without rain! It missed a mighty good chance Saturday night, though. The first few days of this week the men were busy repairing combines and cutting weeds. By Thursday the fields were dry enough for tractor work to start. Several tractors were seen running Sunday. Unless we have more rain, row crop planting should be almost completed by the end of the week and some farmers are binding oats this week.

A late crop of potatoes are being planted on the Joe Evans farm. The early crop is in bloom and looking pretty, with very few weeds in it, in spite of the wet weather.

Speaking of weeds! These country roads are almost like tunnels. There may be some fine looking wheat or some row crop just over the fence, but you can't see it from the road. We can have a log-rolling on the Texas Plains before long.

Rev. Leo Rudd of Hereford preached at both morning and evening services, Sunday. There were 50 in attendance again, Sunday morning. Rev. Rex Rhodes of Waco will preach at both hours next Sunday.

Mr. and Mrs. Pat Morse of Mineral Wells left Friday, after visiting her parents, Mr. and Mrs. Lee Curry, a sister, Mrs. Guy Walsler and family, and friends here. They will visit in Lubbock, Brownwood, Austin, and other Texas points before returning to their home Thursday afternoon. Mrs. Curry and Mrs. Walsler were hostesses at the Curry home to friends, who called to see Mr. and Mrs. Morse. Guests were Mrs. Frank Huckert and daughter, Mrs. C. R. Walsler, Mrs. Jack Streun and sons, Mr. and Mrs. L. L. Cannon and Mabel, and Mrs. Jim Clark and sons. The afternoon was spent recalling past events.

Mr. and Mrs. T. J. Smith and son, Tommy D., and Mr. and Mrs. Garland Smith and children of Amarillo visited Mrs. T. J. Smith's brother, C. R. Walsler, and other relatives here Sunday afternoon. Tommy D. remained to work for his uncle for several weeks.

Other guests in the Walsler home were Mrs. Earl Lance and children, Mrs. S. L. Walsler and Miss Billie Louise Crawford of

Hereford. Miss Ruth Atchley, who works in Hereford, spent the week end with home folks. Her niece, Miss Alma Fay Knox, daughter of Mr. and Mrs. Bill Knox of Hereford, accompanied her home.

Henry Kendall has traded his car for a pick-up.

Mrs. John Allen of Amarillo was a guest in the home of Mr. and Mrs. Kay Johnson last week.

Mr. and Mrs. Tandy Legg and children left Wednesday, for a several week's visit with her sister and other relatives in Kansas.

Mr. and Mrs. J. L. Lookingbill and Harry, visited relatives in Oklahoma, last week.

Mr. and Mrs. John Helseman and family of Helseman were visitors in the home of her parents, Mr. and Mrs. Louie Huckert, Sunday. Johnny Helseman is spending this week with his grandparents. Mrs. Ridder of Hereford is also a guest in the Huckert home this week.

Mrs. Dee Brown and father, W. G. Harris, visited in the Pete Carmichael home at Progressive, Sunday.

Lee Curry went to Dimmitt, Monday afternoon.

Mr. and Mrs. Louie Huckert were in Dimmitt, Saturday.

Mrs. Laura Shaw was pleasantly surprised last week when her sister from Illinois arrived to spend several days with her and Mr. Shaw.

Whole Grain Cereals Will Combat Jitters

As a cure for jitters caused by fretting about the defense situation, or to prevent the occurrence of such a nervous state, the Bureau of Home Economics, Washington, D. C., has advised the use of a whole-grain cereal twice daily, says Miss Sadie Lee Oliver, CHDA. The standard adequate diet includes one whole-grain cereal each day.

"You don't mean to say that these are good for me!" was the comment of the boy whose mother had made cookies using the following recipe:

OATMEAL RAISIN COOKIES

- 3-4 cup butter
- 1 packed cup brown sugar
- 2 eggs
- 1 1-8 cup flour
- 2 level teaspoons Baking Powder
- 1-2 teaspoon salt
- 1 teaspoon cinnamon
- 2-3 cup milk
- 1 teaspoon vanilla extract
- 1 cup seedless raisins (or nuts)
- 3 cups quick oatmeal.

Cream the butter and sugar. Add the eggs and beat thoroughly. Sift together the flour, baking powder, cinnamon and salt. Add to the cream mixture alternately with the milk. Add the raisins, vanilla and the quick oatmeal. Mix thoroughly, with a teaspoon drop on greased cookie sheet. Bake in a moderate oven (350° F.) for approximately 20 minutes or until properly browned.

On page 154 of the July Good Housekeeping, Dr. Walter H. Edwards, well known chemist, presents this question and answer:

How much wheat germ—just as it comes from the miller—gives 500 international units of B-1?

There is considerable variation in wheat germ, but you may count on an average of about 200 International Units per teaspoonful. The range is from 600 to 1300 Units per 100 grams, and a teaspoonful weighs approximately 20 grams.

Vitamin B-1, Thiamin, has to do with health of the nervous system; essential to growth; plays an important part in maintaining the appetite; needed for the body's utilization of sugars; essential to proper functioning of the digestive system.

An adult needs 500 International Units of Vitamin B-1 per day. A cup of white flour (4 ounces) contains 40 Units; one half cup of wheat bran flour (1 ounce) contains 70 Units; a cup of wholewheat flour (4 ounces) contains 200 Units of B-1.

The local mills sell a wheat-germ-middling product for 6 to 7 cents per pound.

Adrian News

By MRS. GEORGE A. SYMS

Farmers and grainment of the Western Panhandle area inspected wheat fields in Oldham County, Monday, in the first of a series of inspections arranged by the Texas Wheat Improvement Association and the Texas Extension Service.

Mrs. J. E. Speed was brought to the home of her brother, E. A. McAadoo, from Northwest Texas Hospital on Saturday.

A report has been received here from relatives of the Aten family at Lelia Lake concerning the sudden death of Chalmer Trobaugh of Cutler, Ind. Mrs. Trobaugh was Cassie Aten before her marriage. Another Aten sister, Rena, resides in Cutler, and the girls' mother and sister, Moody, of Lelia Lake, have been visiting in Cutler some time. The Aten's lived southwest of Adrian before moving to Lelia Lake years ago.

The condition of G. F. Morgan who suffered broken ribs and other injuries in a car accident in Amarillo on Tuesday, is improving.

The June issue of the Producer Consumer, farmers co-operative magazine carried quite an article concerning the Adrian Wheat Growers, Incorporated, stating that they have their facilities paid for in full, and have a very happy and efficient set up with a real live Board of Directors as follows: A. C. Klein, president; Joe E. Speed, vice-president; E. N. Jacobson, secretary-treasurer; R. M. Gruhlkey, director, Lorin Creitz, director, and Robert E. Caldwell, manager.

Those present at the shower given Mr. and Mrs. R. E. Caldwell at the home of Mr. and Mrs. W. O. Vanderwork on last Tuesday night were: Messrs and Mesdames E. N. Jacobson, Hurley Maynard, D. W. Binkley, J. B. Monahan, Clayton Cook, Mesdames O. G. Calhoun and daughters, Sarah and Evelyn, W. J. Brown and daughter, Freda, Percy Gruhlkey, Mildred Loveless, R. M. Gruhlkey, E. C. Chapman and Misses Stella Mosteller, Donna Gayle Harris; Messrs Manuel Loveless, Joe Speed, John Horton, Fnis Barnett, Bobbie Harris and Eddie Monahan. Many other persons, unable to attend, sent gifts.

Two other granaries are being built in the Adrian community. N. L. Jacobson is constructing one and Floyd Brown is building one from the material of the shed building of the Panhandle Lumber Co., which he recently purchased and razed last week.

Josephine Barnett began work at the Chapman Cafe last week. Rosalena and Jimmie Jackson of Amarillo are visiting their grandmother, Mrs. A. L. Reynolds, and other relatives.

Mrs. William Moore and daughter, Norma Jo, returned to their home at Hale Center, Wednesday, after visiting her sister-in-law, Mrs. N. L. Jacobson and family. Mrs. Jacobson's father remained for a longer visit.

Orville Calhoun, Jr., left Saturday, for Western Life Boys Camp near Las Vegas, N.M. The official opening of the camp was Monday, June 23, and it will last for six weeks.

A baby boy was born to Mr. and Mrs. Lannie Rutter at Cutler, Ind., last week. Mrs. Rutter will be remembered as Miss Rena Aten, daughter of Mr. and Mrs. Cal Aten, pioneer residents of southwest of Adrian.

Mrs. Dorothy Little is recovering satisfactorily from an operation, performed last week in Amarillo.

Mr. and Mrs. R. E. Caldwell visited Mr. Caldwell's parents near Bovina on Sunday.

Messrs Floyd Harris, James Hall and Orland Buck of Illinois Bend, are working in the harvest.

Mrs. Zettie Syms of Amarillo spent the week end with her son and family.

A double wedding ceremony was performed at Vega by Rev. W. V. Allen, pastor of the Baptist Church, on Saturday evening at five o'clock. Miss Minnie Gibson of Adrian became the bride of Mr. Elmer Cook and Miss Dorothy Hopson of Hereford became the bride of Mr. Orville Gronerman. Mrs. Cook is the daughter of Mr. and Mrs. Joe Gibson, Sr., of Adrian and is a graduate of the Dalhart High School. She has recently been employed at the Chapman Cafe.

Mr. Cook is the son of Mr. and Mrs. Bert Cook of near Hereford. The bride-grooms are cousins.

Mrs. Bert Cook has been a recent patient at an Amarillo Hospital.

Attendance at Sunday School, June 22 was 58. G. A. Syms had charge of the morning church service in the absence of Rev. D. W. Binkley, who is attending pastors' school in Dallas.

Bushes and briars thrive best on soil that makes best pastures. Close grazing and frequent cutting close to the ground gradually will kill them out.

RAILWAY LABOR UNION DEMANDS WOULD COST 900 Million Dollars A YEAR

THE labor unions have made their demands upon the railways of the United States—and through the railways upon the PUBLIC. These demands are vastly larger in proportion than any they have ever made. The economical and efficient operation of the railways is vital to the nation's defense effort. Therefore, the Western Railways present to the public the following facts:

The labor unions representing engineers, firemen, conductors, brakemen and switchmen are demanding a 30 per cent increase in wages, amounting to 190 million dollars a year—although their present rates of pay are the highest in history.

Other unions representing a greater number of railway employees are demanding wage increases ranging as high as 95 per cent—averaging 47 per cent—and amounting to 580 million dollars a year—although their present rates of pay also are the highest in history.

Thus the wage increases being demanded by the labor unions amount to 770 million dollars a year, an average increase in excess of 41 per cent.

In addition, certain of these labor unions have demanded advances in their pay not included in the above figures, and more rules for the creation of unnecessary jobs.

The situation, then, is this: The total cost of complying with all the demands made would be approximately 900 million dollars a year!

The average weekly earnings of railway employees are now 15 per cent higher than in the peak year 1929, while the cost of living is 12 per cent less.

The demands of the railway labor unions are being made when the entire nation has just been asked to make a supreme effort for National Defense.

The railways cannot meet these demands without a great increase in the cost of transportation. They exceed by more than 700 million dollars the income that the railways had left after paying their annual expenses, taxes and charges in 1940.

The railways have a vitally important job before them. They need all their resources to continue adequately to serve you and contribute effectively toward the National Defense Program.

Announcements have been received here of the marriage of Miss Belle Harris and W. C. Hromas of this city in a quiet ceremony held Wednesday morning, June 18, at the home of the bride's parents, Mr. and Mrs. G. W. Harris, in Bluff Dale.

Dr. Harry Lee Spencer, pastor of the First Baptist Church of Stephenville, read the singleing ceremony in the presence of members of the bride's family.

The bride wore a navy blue sheer frock with white trim and navy and white accessories. Her corsage was of white gardenias and she carried a small Bible that has been in her family since before the Civil War.

An informal coffee was held after the wedding. The table, which was laid with lace, was decorated with shasta daisies and a tiered wedding cake, topped with a miniature bridal couple. Mr. and Mrs. Hromas left immediately after the coffee on their wedding trip, after which they will be at home here in their new home.

Mr. Hromas is a graduate of the High School and attended John Tarlton College and the University of Colorado at Boulder, afterwards receiving a B. Last year he was president of the Business and Professional Women's Club.

Mr. Hromas is the son of the late Mr. and Mrs. John Hromas, who lived for many years at Moran.

Announcement of the forthcoming marriage was made here in May at a breakfast given at the home of Mrs. J. P. Hagan.

WARNING

to Wheat Farmers of this Territory . . .

Do Not Cut Your Wheat too Early!

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL ADJUSTMENT ADMINISTRATION
Hereford, Texas

June 25, 1941.

TO ALL WHEAT PRODUCERS IN DEAF SMITH COUNTY:
Re: Moisture Content of Wheat Eligible for Government Loan.

A wheat loan rate of 64 cents for number one hard winter wheat has been announced. The loan value of hard winter wheat for Galveston is \$1.17 per bushel.

No doubt, you plan to take advantage of this good loan rate. We would like to point out the fact that wheat will be eligible for storage on the farm provided it shall contain not more than 14% moisture.

The present indications are that there will be a great deal of wheat with high moisture content. As you know, wheat placed in an approved warehouse will be eligible for loan provided it shall contain not more than 14% moisture, or if it contains 14 percent moisture, and not more than 15½ percent, it may be conditioned by the warehouseman at your expense and be eligible for a loan. Wheat containing more than 15½ percent moisture content cannot be placed in a loan in any instance, either warehouse or farm stored.

It will expedite the loan procedure and be of great advantage to the producer if he will arrange to have any liens taken care of before making application for a loan. The AAA office will be glad to assist producers in this regard.

We trust this information will be helpful to you when you begin harvesting this year's crop.

Signed:

JAMES EILAND,
Secretary, Deaf Smith A. A. A.

(Similar letters have been mailed by Government Agencies over the nation!)

Government Wheat Loan Rates

HAVE BEEN INCREASED . . . FROM

63c to 94c

PER BUSHEL, on No. 1 HARD WINTER WHEAT

in This Territory!

However, considerable government wheat was lost or badly damaged last year, due to excessive moisture, and the Commodity Credit Corporation (which makes the government wheat loans) has this year issued statements that NO WHEAT WHICH CONTAINS MORE THAN 14% MOISTURE WILL BE ACCEPTED FOR A GOVERNMENT LOAN.

As your elevators, it is our wish to serve you in such a manner that will protect your interests—and since NO LOANS WILL BE MADE ON WHEAT WITH EXCESSIVE MOISTURE CONTENT, we feel that it is only fair that farmers of this area be warned against cutting their wheat too early. We will have no choice in the matter; it is a government regulation and we are publishing this ad in an effort to save you trouble and money.

DON'T CUT YOUR WHEAT TOO EARLY . . . WE WILL MAKE A TEST ON YOUR WHEAT SAMPLES IF YOU ARE IN DOUBT AS TO MOISTURE CONTENT!

In announcing the election judges, County Judge A. J. Schroeter urged voters to go to the polls. In a time of national crisis such as this, the judge pointed out, we should all exercise our right of suffrage.

the picnic crowd will have a square dance, which should give the whole town an opportunity to see whether the youngsters have really learned to "swing your partner" in a style which would do justice to the older generation.

"Get your lunch and bring the whole family to Hereford's picnic," says Mr. Coneway, "We've got a good program and all we need is your co-operation to make this a grand time for the whole town."

Creamery Owner

(Continued from Page 1)

try and I have had several letters from him since the German occupation—but naturally, with German censorship, he could not tell me anything except that he was "all right."

Jensen himself returned to Denmark for a visit in 1930. Conditions then, he said, were good; despite the beginnings of the

world depression. Denmark was Democratic.

"Denmark was a democratic country," adds Jensen. "As far as democracy was concerned, it was very much like the United States—Oh, there was a king, but he was popular with the people and he didn't have much to say about the government."

The government of Denmark now is controlled by Germany and Danish Quislings. The king is still titular head, but he has no voice in the government; and the production of the formerly prosperous dairy industry, which used to go to England, has now been diverted to the Reich.

Jensen says, we have no way to know how conditions are in the occupied countries. We might guess that there is some sabotage and some slowing up of production under the German overlords; but we have no way of knowing.

"My country, is very small," explains Jensen. "Just consider, it is no larger than some of your smaller states; and in Europe a small country has no chance when a large neighbor goes on the march. Sometime, perhaps, when this is over; the Danes can be free and democratic again."

Citizen for 15 Years

Jensen has lived in this country for 20 years, been a citizen for 15. He came first to Denver and has lived in Pampa for 12 years. He comes here from Wellington, where he was manager of a creamery; and he organized a creamery in Tullia several years ago.

Mr. Jensen expects to move his wife and four-months-old baby to Hereford in the near future. "I like your town," he concludes, "And hope to have a very pleasant business and personal association here."
