N 1950, the reasons for moving up to Cadillac will become so great, and so manifold, that if you are contemplating the purchase of any car outside the lowest-price field-you should see the new Cadillacs first!

Cadillac's new cars will have their initial presentation at the General Motors Mid-Century Motorama-at the Waldorf, in New York-from January 19th to 27th.

As soon after that as cars are available, the new Cadillacs will be placed on display for your inspection in this community.

In the meantime, here are some of the things you may look forward to seeing

when America's most renowned motor car builder unveils its new offerings for 1950.

You will see four wholly new series of cars-all with entirely new bodies-and all so gorgeously styled that they are destined to change every existing idea as to how beautiful a motor car can be.

You will see cars whose performance is so outstanding that to drive one of them for a single hour is to want it forever. The advancement embraces every phase of performance-power, quietness, smoothness, safety, and handling ease. To drive one is to get the motor car thrill of a lifetime.

You will see scores of advancements and improvements which add to quality, endurance, economy and dependability.

And, finally, you will see all this in a car whose lowest-priced model will actually cost less than certain models of numerous other makes of cars!

Yes-you should see the new Cadillacs before you act in 1950. They will not only give you the new yardstick for motor car quality-but they will give you the new yardstick for motor car value, as well.

It won't be long! So please stand by for the presentation date for this community.

HELSINKI, Finland, Jan. 12. Ch.—Finland's parliament by a 90 to 69 vote of confidence today approved general wage increases agreed to by Premier Karl-August Fager-holm's cablnet.

It was the fifth vote of confidence the cabinet has won in its year and a half history.

The Social Democrat government had ordered a 7.5 per cent general wage increase after the trade union federation asked for a 10 per cent ra! s. Conservatives opposed the move in a 15-hour debate which preceded the voting.

Fagerholm's cabinet is due to resign in mid-February in accordance with the Finnish constitution after the presidential election.

A DAZZLING CLEAN WASH WITHOUT RINSING!

MORE RINSING FOR ME!

says Mrs. Elizabeth Davis of PORTSMOUTH, OHIO

"I didn't believe Tide could do it . . . till I tried it! But it's true! I took the clothes right out of those wonderful Tide suds and put them through the wringer and onto the line. And, believe me, they looked

so bright and clean-I was proud to hang them up!"

"I took my wash out of the Tide suds-wrung it out —and hung it up CLEAN! I'll never rinse again!"

ays Mrs. M. Hayes OF WEEHAWKEN, NEW JERSEY

Tide now makes possible an amazing new kind of washday—quick and easy, almost beyond belief. Just think of all

the time I'm going to save . . . withing! And think of the wear and tear it saves on my clothes as well as on me! Thank you, Tide, for

"My clothes dried so soft and fluffy-ironed so easily -without rinsing at all!"

says Margaret Lockwood OF INDIANAPOLIS, IND.

"Talk about miracles! I take my clothes out of Tide's wonder suds, wring them out, and the dirt runs right out with the washwater just as they say it does!

And what a beautiful wash . . . fresh, clean, and sweet-smelling withou rinsing at all! It dries soft, fluffy, easy to iron. From now on, it's Tide -and only Tide-for me!"

TIDE cuts washday work in half! No more rinsing! Just wash...wring out...hang up!

YES, another Tide miracle has been discovered-and it's the washday news of the mid-century! With Tide in your washing machine-you can take your clothes right out of the suds . . . put them through the wringer and hang them on the line dazzling clean! Without rinsing! Hard to believe? Yes, but when you use Procter & Gamble's Tide, it's a fact-and women all over America are proving it today.

HERE'S WHYI Tide, with its miracle suds, gets the dirt out of your clothes and keeps it suspended in the sudsy water. When you wring out the clothes, the dirt runs out with the washwater . . . and the clothes come from the wringer white . . . fresh . . . CLEAN!

YES, CLEAN! You all know how clean Tide has always washed your clothes with rinsing. Actually cleaner than any other washing product you can buy. Now we'd like you to try Tide without rinsing and compare the results. It's simply unbelievable how bright, fresh and clean you can get your wash with Tide, without rinsing. And think of the time and work you save! So try Tide without rinsing! If you do, you'll never use anything but Tide again!

Escalators will carry them below ground and down there they will be moved around by vast conveyor aystems. On the street level, the city of the future may even have moving sidewalks.

Underground conveyor lines to handle both human and freight traffic would even be a good idearight now for many cities, says. Harold Van Thaden, vice president of the conveyor firm Jewitt-Robbins, Ind. He described his ideas at a recent national meeting of engineers.

Truck traffic along in some busy downtown areas, he says, could be reduced by at least 25 per cent by moving goods below the streets. The conveyors would he even greater. More people, he says, could cover short distances underground with less wear and tear, less congestion, and no waiting. The conveyors would move on chains, to make turns, and the sections to make turns, and the sections would move on chains.

Weather Behavior Offers Unique Speculation On Mass Tendencies

read in a long time on the subject of the weather, or climate, appears in the January American Magazine under the name of Raymond H. Wheeler, Ph. D., for many years a professor at the University of Kansas, and now director of Climate Research, Weather Science Foun-

Climate, Dr. Wheeler finds, does not rule but it does condition human habits, thought and trends, Based on conclusions drawn from findings of 40 researchers and 200 assistants over a period of many years, and covering 3,000 years or more of history, Dr. Wheeler divides each century into the same four seasons as the year-spring, summer, fall and winter. These four seasons, he says, follow the pattern as found in each yearthat is, the first 25 years of a century constitute a warm, wet phase (spring), the second 25 years a hot, dry phase (summer), the third quarter-century the cool, wet phase (fall), and the final 25 years the cold, dry phase (winter).

The spring of a century tends to be stormy, windy and wet, marked by "treus outbursting of human energy." He says that 90 percent of all the Golden Ages of history have occurred in the first years (spring) of any century.

The summer (second quarter) of a ntury tends to increased dryness, and is is when we get drouths and depres-ons. In this century, he cites the Dust owl and the Big Bust. People become less, ache for security, let themselves slaves of dictators (Mussolini,

Hitler, Franco, Stalin, Peron).

The "cool, wet phase" (fall) is the one the present century is now entering, the article reminds us. "People begin over-throwing tyrants," become individualistic,

> The final phase, "cold, dry" is winter -in our century as in all others constituting the fourth quarter. "Culture tends now to become sterile and gaudy," argues Dr. Wheeler. The weather is colder than normal. Women's styles become sedate, gingerbread houses appear, men become dandles and mince around in checkerboard pants and carry canes.

Based on his reading of weather cycles the says this century is one of unusual violence, like every fifth century down through history), the climate specialist predicts many things are in store for us during the remaining half of the 100-year period. For one thing, he sees a great religious revival sweeping the world, now in its beginning stages. (Others are pre-dicting the same phenomenon.) He sees the total rout of communism and all its works. And he sees many other things that may or may not be there.

Anyway, the climatological researcher's studies are intriguing. As he points out, there is a sort of rhythm to the weather, a recurrent pattern of behavior, associated with the decrease and increase of sunspots, about every 11.2 years. And he insists that human behavior is influenced, if not guided by, the rhy-thmic ebb and flow of weather phenomena. Furthermore, he claims that a lifetime of research devoted to this subject bears out the conclusions he has reached.

Whether you agree with Dr. Wheeler or not, he has certainly giorified weather into a major determinant of human history and behavior. And who would be so foolish as to say that the weather has nothing to do with the way we feel and

"Thank goodness," sighed Maureen, "the script doesn't try to stretch the credulity of the audience too long. My identity is discovered quickly."

She described the process of finding the proper costume:

"They tried a good many disguises that didn't work. At first, they put a cape arcund me. But that was no good. It still showed the curves, and after all, the wind might blow.

"Then they tried puting a wide strap across my cheat, but that still didn't hide anything. They tried a few other tricks until they decided to pad me.

But to me it was the glorlous fulfillment of all my boyish imaginings, especially when I met by Ma-donna of the Tents.

How did I get acquainted with her? I never knew. How do kids get acquainted with each other, anyway? Occasionally, grownups who are utter strangers meet and realize that they are old friends without a word being spoken. It was like that with me and my Madonna, and we simply accepted the situation instead of bothering our heads with the theory of reincarna-

I don't recall her name, but she was beautiful, and not in the least stuck-up, even though she was the queen of a fairy-There was no afternoon performance, so she conducted me over the show grounds, pointing out things and explaining them. Moreover, she talked familiarly of far-off places with magic names-San Francisco, Denver, Chicago, St. Louis and New Orleans. I was only a small-town kid, and I was humbled to the dust before, such a cosmopolitan little person,

That night I discovered that my Madonna was billed as the circus child star. True, she had told me modestly that she was one of the performers, but I was scarcely prepared for anything like this. Spellbound, I watched her take part in the grand entry, dressed in a black English

around the arena standing erect upon the broad white back of an Arebian stallion, and finally she appeared in spangled tights to do breath-taking feats on her own spec-cial flying trapeze and Roman rings.

Next morning the circus was gone, and I never saw my Madonna again, although I have been a faithful circus-goer through childhood, youth and manhood, I should have known her. I think, even after she had grown into a young lady and was per-forming for a top-notch outfit such as Sells-Floto, Ringling Brothers, or Barnum and Balley. I wonder how many times I have watched a graceful, birdlike form balancing on a tight wire or flying from one trapeze to another, and fancied that was she. For, as the ringmaster the gaping crowd on that long-ago night, she was destined to be a great aerialist. All showgirls have something other-

worldy about them, but this is particularly true of those wonderful girl athletes who risk their lives daily under the big top. Some of the greatest aerial artists quently work without nets, and in any vent a net affords little protection in a fall of a hundred feet. If the girl is not killed outright, she may be crippled for life, and this to a real trouper is worse death itself.

Certain writers, notably Jim Tufty, have tried to deglamourize the circus, but they fail to explain why a young girl will sacrifice everything, even the chance of a happy marriage, to perform upon the high wire or trapeze, where the slightest slip may mean death, Naturally, the roar of the crowd, the feverish excitement, the bright lights, the colorful costumes, and the intoxciating smells of sawdust, tanbark and wild beasts, all have something to do with it, but I believe the real reason is that one pointed out by the German philosopher, Nietzsche, who said that only those live who live gerously.—R. A mortal illness and troubled conscience Wednesday was credited with breaking up a forgery racket extending from West Texas to Kentucky.

Deputy Sheriff C. E. Kiser revealed here that two men, Leon L. Maddy, about 50, Carisbad, N. M., and Vernon Allen Maddox, 32, Seminole, had been returned here to face forgery charges after Maddox had walked into the sheriff's office at Seminole and told a story of passing bogus checks in several states.

"He said a doctor told him be had tuberculosis and did not have long to live," Kiser declared, "So he made a complete statement." Maddy, arrested first in Carisbad, N. M., and returned to Seminole before being sent here, denied implication.

A total of six bogus payroll checks, drawn on the Fitzpatrick and Ward Drilling company of Nouston, a nen-existent organization, appeared here in the early part of INIO. Others showed up at Kermit, Crane, Odessa, McCamey, Colorada City, Ivestivater and in Missouri and Kentucky.

Maddox told authorities he and Maddy, who are brothers in-law, went to Lamess and set up thop for the ring by printing a thousand payroll checks and enlisting the aid of a lamber in renting office space for the fictitious concern.

The two, Maddox stated, obtained about 1355 from passing the checks in Big Spring.
