BIG SALE IS ADVERTISED FOR JAN. 25

JONES & DAMERON'S ANNUAL OFFERING IS SHAPING UP

IS ANXIETY 4th

Stuff, From Famous Matings And has Been Carefully Prepared for Sale

The annual Sale of Jones & Dameron will be held in the Sale Pavilion at Hereford on Wednesday, January 25, 1922. Preparations to make this the best sale this firm has yet offered have been under way for weeks. Catalogues will be ready for distribution soon. In its advertising in the stock journals the firm calls attention to the six great herd bulls heading their herd and gives the following details:

"All of our cattle have been selected for our January sale and are doing nicely. In selecting these cattle we have had but one thought in mind and that was to give the public the best and most valuable lot of breeding cattle ever offered in the southwest. We know this is a time people want 'good cattle'—that they will buy no other kind—we are going to offer ONLY superior individuals, correctly bred.

The bulls will be Bright Stanway, Beau Randolph, Beau Randolph 2d, Domino 2d, Beau Paladin and Superior Anxiety, and from Beau President, Beau Randolph and Domino dams.

The females will be by such bulls as Beau Randolph, Militant, Beau Modest, Beau Mischief, Superior Mischief, etc."

Swine Convention Dates Corrected To Jan'y 17-18

The Panhandle Swine Breeders Association Convention and Sale, and the Hereford Poultry Show will be held on Tuesday and Wednesday, January 17 and 18, instead of Wednesday and Thursday, January 18 and 19, as announced last week.

The original dates were announced through a misunderstanding of local committees.

The hog and poultry shows will both be held in the Sale Pavilion. Committees from the Chamber of Commerce are now beginning to study details and make preliminary arrangements for both events.

WAYLAND IS BEST SCHOOL OF CLASS OF ENTIRE STATE

Word has been received by the authorities at Wayland College, from the meeting of teachers in Dallas, stating that Wayland has been designated by that meeting as the best school of its kind and class in Texas. The college was rated as A plus among junior colleges of the State, the highest rating given to any school.

This comes as the result of the high standard of instruction maintained and the quality of the courses offered at the college. It should be very gratifying to the officers of the college, and it should be still more gratifying to the people of the city to know that their town is the location of this sort of college. The rating goes regardless of denomination or any other distinction. —Plainview Herald.

E. B. BLACK GOES TO WACO TO MASONIC GRAND LODGE

E. B. Black left Hereford last Sunday for Waco, Texas where he is representing the local Chapter of the Masonic Lodge at a meeting of the Grand Lodge of Texas.

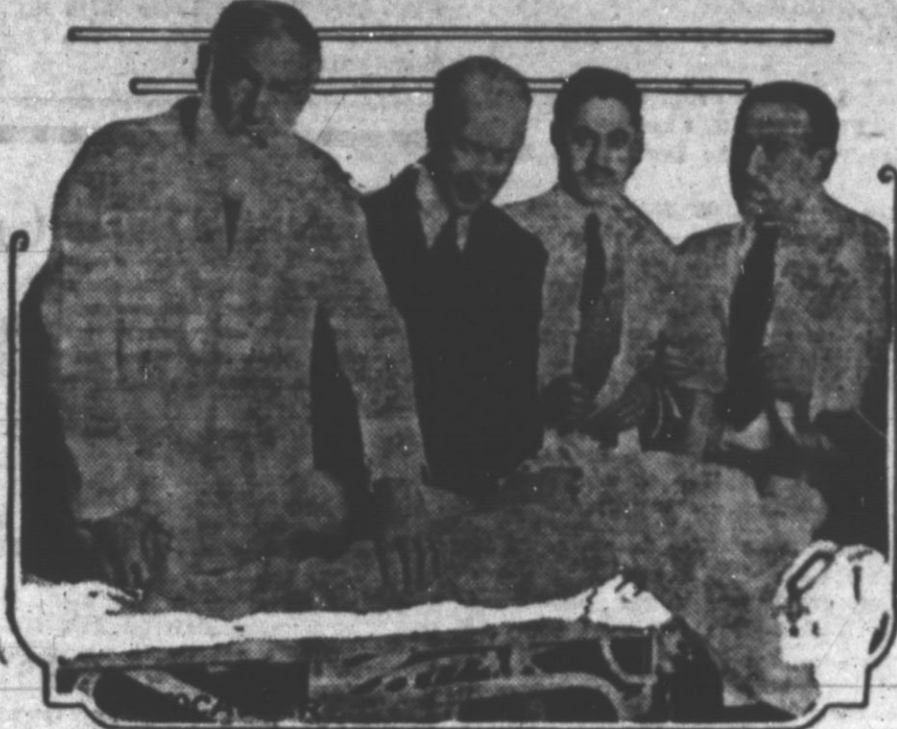

The sessions of the Grand Lodge will last through next Wednesday and Mr. Black will remain for the entire meeting.

BAD WEATHER CAUSE CANCELLING BASKETBALL GAME

A double-header basketball game between the boys and girls of the Hereford and Dimmitt schools had been planned to be played at Dimmitt Friday afternoon, but the high winds and dust caused its cancellation.

It is understood that the contests will probably be staged next week end.

BLOODLESS SURGEON AT WORK

This photograph, taken in a hospital operating room in New York City, shows Dr. Adolph Lorenz, the world's most skillful bloodless surgeon at work saving a little girl from lifelong crippling. Dr. Lorenz has just arrived in this country from Austria to perform his bloodless surgery on many American crippled children. He was our greatest enemy, but an enemy no longer.

Farm Loan Ass'n Loans Only Temporarily Stopped

In its issue of November 22 The Brand carried a story regarding a meeting of the directors of the local Federal Farm Loan Association in which it was stated that it had been determined that no more applications for loans would be accepted by this association.

The Brand's information came through a written and signed communication from an official of the association.

It now develops that there was an apparent confusion in the matter of future loans. Secretary Potts states that the trouble is that the association has been too active, has more than \$800,000 on its books, and the government will not supply it with blank application forms for additional loans for the present only. Mr. Potts says:

"The Hereford National Farm Loan Association is a very much alive and going concern and while, were we ever so anxious to get business, it would be impossible to take a new application, for we have no blanks in our office, but if the Federal Land Bank of this District will supply us with them, we are ready to supply any good farmers in Deaf Smith and adjoining Counties with all the money we can obtain. We have not been asleep during the year 1921, for to this time we have delivered to the farmers of this community anywhere from two to one hundred times as much money as any Association adjoining this County, and at this time we have about \$75,000, in approved and inspected loans that we hope to deliver the money between this and the first of the year. This is our trouble now—we have been too active, and the bank will supply us with no more blanks at this time, and if any one wants to go to Amarillo, Vega or Muleshoe, it is their privilege, or if they want to get as many as ten farmers together and organize a new association, that is their privilege, and if they think they can get better service that way, it is their duty to organize, but on the other hand, we want it particularly understood that the doors of this association are not closed to any good business, as long as we can do it."

College Pups to Get First Field Trial for Quail

Those "College pups," recently sent to school at Higgins, Texas, for a polishing up in the art of finding birds, are having the first test of the merits of their sheepskins this week. The dogs, the property of Dr. Gabbert, J. J. Clark and Homer Fox, were taken to Boaring Springs, Texas, Wednesday for a trial hunt in the Sandhills by Dr. Gabbert, Clark, D. L. McDonald and Frank Marrs.

Mr. McDonald's drilling crew are now in this vicinity and the camp will probably be used as a base of operations against the quail. The bunch expects to be away about a week.

CRESAP BROS. CONTINUE TO SHIP TO IOWA FEED LOTS

John Jackman and Johnny Cresap, both of Tucumcari, N. M., spent the first part of the week in Hereford visiting S. E. Cresap. Preparations are under way by Cresap Brothers to ship 200 additional cattle to the Iowa feed lots, making a total of 600 cattle, followed by 1,000 hogs, they will feed out this winter.

McDonald Wants To Drill Water Well for Slaton

D. L. McDonald and L. Baskin spent Monday and Tuesday in Slaton and Lubbock. The city of Slaton has just voted \$90,000 for water and sewer bonds and Mr. McDonald is negotiating with the city council to drill a large well to furnish the city with water.

PANHANDLE SHOWS TREMENDOUS GAINS PAST TEN YEARS

The number of farms in Lubbock County increased from 208 in 1910 to 1,009 in 1920; in Floyd County the number of farms increased from 620 in 1910 to 1,280 in 1920; in Crosby County the number increased from 242 farms to 810; Hale County increased its number of farms from 731 to 1,031; Garza County increased from 31 farms to 425 and every other county shows increases in the number of farms. The same census report shows astounding increases in production of wheat, corn, kafir, mlo, and other grains during the same period. Gray County in 1910 raised 82,860 bushels of wheat and in 1920 1,461,766 bushels. During the same period Carson County increased its wheat crop from 36,187 bushels to 1,277,629 bushels; Floyd County from 98,292 to 962,272 bushels; Hale County from 16,518 bushels to 926,167 bushels; Ochiltree County from 80,833 bushels to 545,484 bushels; in short, every county shows a startling increase in wheat production. The figures on the increase in production of kafir and mlo are even more surprising. Floyd County leading with a 1920 production of 2,501,175 bushels, and many other counties following closely this figure. When the great prairies of northwest Texas become fully settled, and the wide stretches of grassy plains are under cultivation, it will be one of the important food producing sections in North America.—The Earth.

DR. J. W. HICKS IS DOING SPLENDIDLY AFTER OPERATION

Dr. J. W. Hicks, who stood an operation at the Temple Sanitarium, Temple, Texas, on Tuesday a week ago, is reported to be doing very well and is expected back home some time the coming week.

GILBREATH'S RANCH TRADED FOR MILL

DEAL INVOLVED TOTAL OF \$130,000. MILL AT WHITEWRIGHT

MILL TO BARNETT

Real Estate Man Trades Different Property To Gilbreath

The Brand is informed by Ralph Barnett of a double-barreled trade running into quite a figure which has just been closed. Mr. Barnett states that he and John Marshall of Sherman, Texas, traded the W. H. Gilbreath ranch, consisting of 3,725 acres of land eleven miles west of Hereford for the Whitewright, Texas, Milling Company's property, comprising a 300 barrel modern flour mill, 110,000 bushel elevator, storage capacity for twelve cars of flour, etc. The total consideration involved is given as \$130,000.

Following this large deal Mr. Barnett says he himself has acquired the Whitewright mill through a private trade with Mr. Gilbreath, giving in exchange for it property in Hereford, including Mr. Barnett's home, and other property in Amarillo and in the state of Oklahoma.

Mr. Barnett has no intention of going to Whitewright himself, he states, but has in mind another trade involving the mill.

Charlie Lupton Is Accidentally Shot Thru Arm

Charlie Lupton was painfully injured Thursday afternoon and only a lucky chance prevented a more serious injury.

Mr. Lupton was accidentally shot through the fleshy portion of his right arm, between the elbow and wrist, by a 30-30 rifle ball.

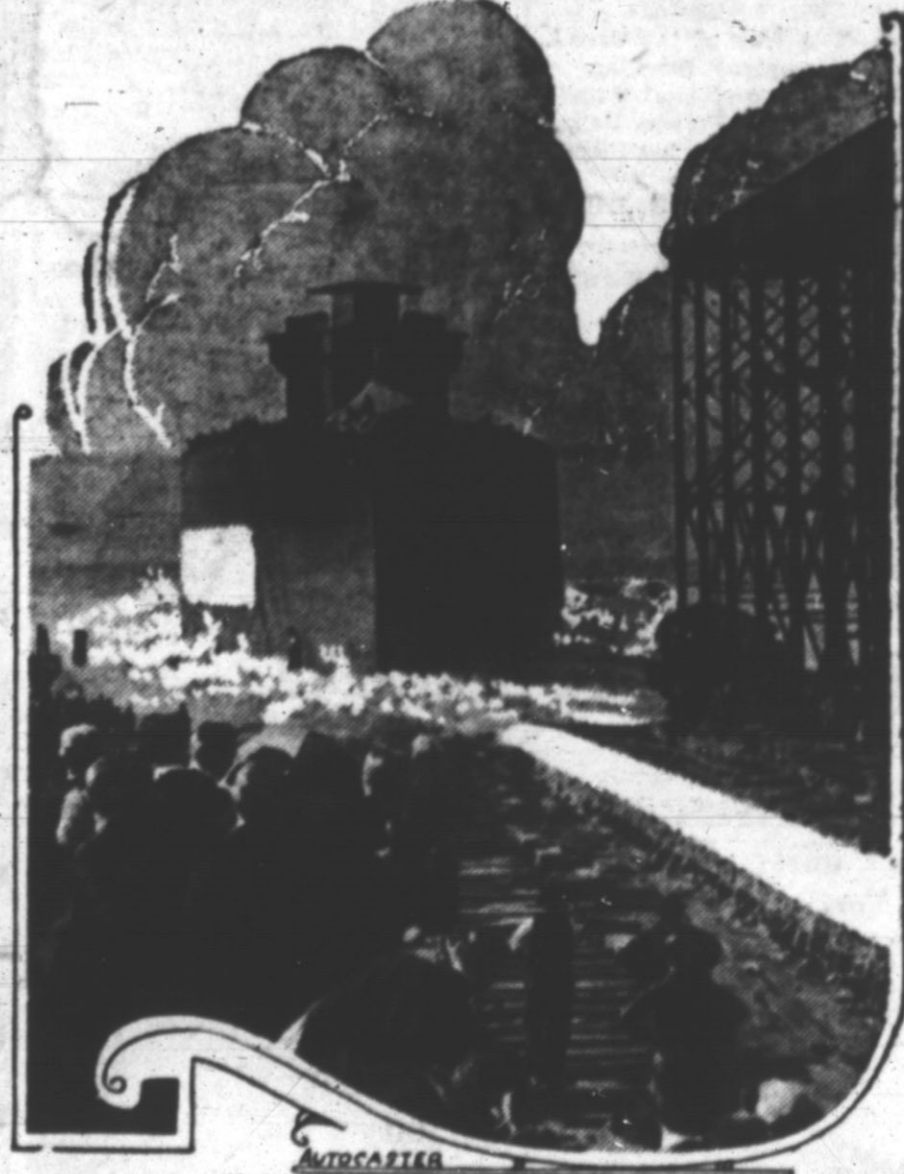

The accident happened on Mr. Lupton's ranch, ten miles east of Hereford about 3:30 o'clock Thursday afternoon. Mr. Lupton, who is visiting the ranch, now held by J. W. Duncan, took the rifle out of his car and put it on the back porch. As he put it down it slipped out of his hand and discharged, the ball plowing through the fleshy outer part of his arm.

Mr. Duncan brought him to town and Dr. LeGrand dressed the wound. It is not thought to be dangerous.

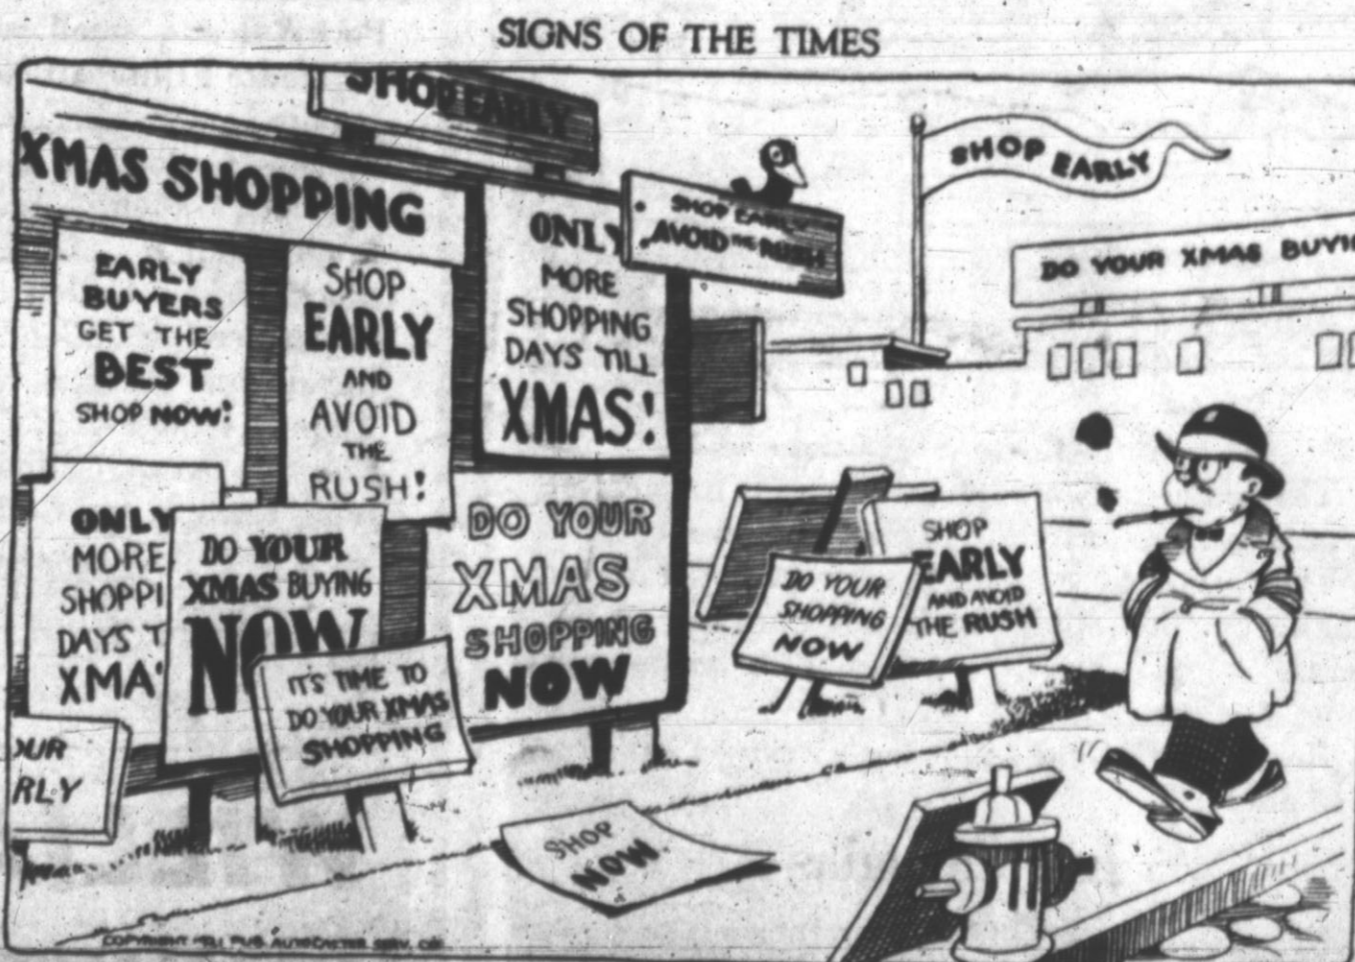

Weather Man Has Another Glaring Bust to Explain

One of those rip-sawtin', aggravatin', nerve-twingin', miserable wind and sand storms which used to be famous on the Plains, but which have been gradually disappearing for the past few years hit this community Friday forenoon and took charge of things for the rest of the day. It was a regular bear-cat, with all the trimmings: The wind was from the southwest, on the whole, but even the weather vane were up against it in truthfully telling which way the wind was blowing. There always has to be a little bitter with the sweet, but the cup was running over Friday.

WILL THIS BE SCRAPPED?

Here is the scene at Newport News when America's latest and most powerful dreadnought, the West Virginia, was launched the other day. In the picture, the ship is just entering the water. If completed, the West Virginia will cost over forty million dollars, but if the Hughes plan is adopted by the nations, it will be scrapped.

XMAS STAMP CAMPAIGN ON FULL BLAST

GRADE SCHOOL ORGANIZED FOR SELLING DIRECT

TO EARN MONEY

High School Pupils Asked to Buy With Money They Earn Themselves

Have YOU bought some Christmas Seal stamps? If not, and you allow Christmas Day to roll around without doing so, your conscience may hurt you as you face that turkey.

For these stamps are sold as a means of raising the money necessary for the Texas Health Bureau to stamp out disease and misery, and in corrective measures for growing school children, that they may develop into strong, healthful and useful citizens of the future.

Just recently Hereford has had a splendid example of how this money is used in the visit of Miss Pearl Hyer and her work in the schools.

The local campaign for the sale of the stamps is in full swing, under the general direction of Mrs. C. B. Smith, county chairman. The high school boys and girls are asked to earn the money with which to purchase seals, as they are old enough to realize the value of the work. In the central school the children are given the stamps to sell in the residential part of the town, but not allowed to sell them down town. There are sub-chairmen for the two highest grades in the central school while the teachers themselves conduct the work in the rooms below the two upper grades. Alice Womble is sub-chairman of Mrs. Parker's room and Opal Rutherford, sub-chairman for Mr. Hawkins' room.

A postoffice booth will be established on Saturdays hereafter, conducted by a couple of high school girls. The stamps allotted this county must be sold by Christmas Day and if everyone will go over with a bang.

District Court's Fall Term Ended Last Wednesday

After a month's solid grind on both civil and criminal dockets the fall term of District Court finally adjourned Wednesday morning and Judge Tatam, District Attorney Braley, Court Stenographer Miss Shackelford and visiting attorneys returned to their various homes.

The session has been a notable one in several ways. One rare and outstanding feature was the conviction of two men charged with violating the Dean liquor law of the state.

THREE EXTRA GOOD NUMBERS TO COME IN LYCEUM COURSE

Two splendid numbers have been given so far in the Lyceum course for the winter months, and under the contract three more are billed so show here.

Everyone attending the Frederick Ward lecture speaks in the highest terms of it, and assurances have been given that all the three remaining numbers will be first class in every particular. The numbers are as follows:

Will Arthur Dietrick, scientific lecture, December 27; Laurence Symphonie Orchestra, February 3; Bell Ringing Male Quartette, February 17.

ARTIS DANIEL IS HERE TO LOCATE ON A BELL RANCH

Artis Daniel and family arrived last Sunday morning from Allensville, Ky. Enroute to Hereford they visited relatives and friends along the way.

The family will occupy the Allen Bell ranch in the near future.

ALBERT GREENWOOD AND FAMILY HOME FROM MAYO BROS.

Mr. and Mrs. Albert Greenwood and little son, Billie, reached Hereford from Rochester, Minn., Thursday morning. Mr. Greenwood recently went through an operation at the Mayo Brothers hospital and is reported to be doing well under the circumstances.

CHURCH ANNOUNCEMENTS

LEE LIVE STOCK COM. CO.
 November 28, 1921.

POINTERS FOR THE BACK-YARD POULTRYMAN

Keep the hens confined to your own land.

Don't keep a rooster. Hens lay just as well without a male bird.

Don't overstock your land.

Purchase well-matured pullets rather than hens.

Don't expect great success in hatching and raising chicks unless you have had some experience, and have a grass plat separate from the yard for the hens.

Build a cheap house or shelter.

Make the house dry and free from drafts, but allow for ventilation.

Fowls stand cold better than dampness. You can build a good henhouse with two plano boxes, the backs taken off, and set back to back. Small windows, screened for summer, and provided with glass or cloth for winter, should be provided. It is wise, also, to have these boxes raised off the ground a few inches to prevent rats making their homes under the house. This kind of house should do for 20 hens.

Keep house and yard clean.

Provide roosts and droppings boards. Save the manure. It is worth money if treated properly.

Provide a nest for each four or five hens.

Grow some green crop in the yard.

Spade up the yard frequently.

Feed table scraps and kitchen waste.

Feed grain once or twice a day.

Feed a dry mash.

Keep hens free from lice and the house free from mites.

Kill and eat the poorest hens in the

BY ROBERT FULLER
 Special Correspondence

CHICAGO.—Reports to the American Farm Bureau Federation headquarters from the coast are that the farm bureau drive in California is meeting with great success. Gov. Wm. D. Stephens was the first to join and the above photograph was snapped just after he signed. The Governor is in the middle with Dr. W. H. Walker, president of the California Farm Bureau Federation on his right and Fred Harvey, farm bureau dairy commissioner, on his left.

The governor said: "Realizing that agriculture is the basic industry of California and that every constructive movement for its betterment is a step toward the development of the entire state, I note with welcome relief the constructive and conservative force of rural awakening reaching from the school house center to the county, state and nation, through such organizations as the California Farm Bureau Federation and the American Farm Bureau Federation."

fall when they begin to molt and cease to lay.

Preserve the surplus eggs produced during the summer for use during the fall and winter when eggs are scarce and high in price.

The size of the flock which can be kept most efficiently will depend upon the space available and upon the amount of table scraps and other waste available for feed. It is a mistake to overstock your land. Better results will be obtained from a few hens in a small yard than from a large number. The back-yard flock rarely should consist of more than 20 or 25 hens, and often of not more than 8 or 10. For 20 or 25 hens you should have a yard 25 by 30 feet in size.

New Method Controls Worms In Pigs Through Sanitation

What makes the difference between thrifty pigs and unthrifty ones? Naturally, there are many causes, including breeding, feeding, and shelter, but a principal one and one that may easily be overcome is worms—the common intestinal round worms. These parasites are often largely responsible for the

high death rate among young pigs, and many cases of so-called thumps are the result of worm infection. The average farmer, possibly, would give a great deal to be able to stop this loss.

But a new and effective method of worm eradication, devised by the United States Department of Agriculture and used with success by members of the McLean County (Ill.) Farm Bureau, is available to any farmer who is willing to go to a little trouble, or who will visit the exposition. There will be shown for comparison a pen of wormy pigs and a pen of pigs raised free from worms; the worms themselves, alive and wriggling, will also be on exhibition. In one pen will be a litter of six pigs that gained during a certain period, because of the parasites only 171 pounds; in a neighboring pen will be another six-pig litter on the same feed as the wormy litter but raised free of worms that gained 322 pounds in the same length of time.

This system of swine sanitation to eradicate worms is simplicity itself. First it is necessary to clean the farrowing pens with hot water and lye. Then wash the dirt from the skins of

the sows before farrowing and put them in the clean pens. Within two weeks after farrowing remove the sows and pigs to a clean pasture, and keep the young pigs on clean pasture for at least four months. In order to produce strong, healthy, profitable pigs it

is, of course, necessary that they have good feed, water, and shelter in addition to worm-free surroundings.

Non-freezing dynamite has been invented by a manufacturer as a result of years of experimenting.

Society

Dinner

An all-day dinner in honor of Mother Lowther, mother of A. Lowther, was given at the later's home about three miles southwest on the Summerfield road last Tuesday, November 29. Mother Lowther, who lives at Peabody, Kansas, has been visiting her son for several months, and expects to leave for her own home next Saturday. Those present Tuesday were Mesdames E. E. Ramsey, Kibbe, Corbett, Ricketts, Nance, Vanderburg and Lowther, and Mr. and Mrs. A. Lowther.

Miscellaneous Shower

A miscellaneous shower in honor of Mrs. Otto Oleson, a recent bride, was given at the home of Mr. and Mrs. Joe Bodkin Tuesday afternoon, November 22, by the girls of the Christian Endeavor, Presbyterian Church.

Many useful gifts were given Mrs. Oleson. Refreshments of sandwiches, pickles, and hot chocolate were served and the afternoon was passed with games and other forms of entertainment. Those present were: Misses Lois Cobb, Helen Shore, Elizabeth Corbett, Viola Nunn, Berna Gould, Mabel Barnhart, Mary Mortimer, Vera Godwin and Pearl Golden and Mesdames J. R. Sharp, Furrab, Hughes, A. C. Barnhart, Joe Bodkin and Mr. and Mrs. Otto Oleson.

On last Sunday the Christian Endeavor Society presented the young couple with a set of silver knives and forks.

Thanksgiving Dinner

The neighbors and friends of Mr. and Mrs. Fulkerson enjoyed a very pleasant day at their country home, 20 miles northwest of Hereford on Sunday, the 27th. There were forty-one present who enjoyed their delayed Thanksgiving dinner, also piano and violin music during the afternoon. All seemed to be glad they were present.

The following families accepted the invitation: the Sherm Garret family, the three Williamson families, Thornton, Jerry and Henry, Mr. Boyd's, Mr. Mal Stewart's, Mr. Powell's, Mr. Glava's, Mr. Winter, also Miss Lanta Walker of Vega, Mr. Sherm Jones and brother, Archie, Mr. McCollough, and Mr. Washington.

Roast goose was the drawing card of the day, cooked by the Widow Glava. All the necessary trimmings for a real Thanksgiving dinner were added to make it complete.

A participant.

A politeness contest has been organized by a Paris newspaper. Five thousand francs weekly for six weeks will be paid to the most polite persons in France.

49 CENTS OUT OF \$1 FOR SERVICE

You sell a pound of beef, on the hoof at the yards, for 10 cents. Then you go down town to a restaurant and pay a dollar for it. That does not mean, however, that somebody, or even a group of somebodies, has been profiteering to the tune of 90 cents. Perhaps nobody has profiteered. You have been paying for service. Naturally you didn't want to kill and dress your own beef, and cook your steak on a sharpened stick over an open fire in the woods. You wanted all the trimmings—the orchestra, the table linen, the silverware, etc. And, most of all, you wanted somebody to take that steak and keep it on ice for you, with a cook and a fire waiting, so that when you stepped into the restaurant and said, "gimme a good portehouse steak," you could have it right on the spot. You wanted the service. Everybody wants service.

"A witness before the Joint Congressional Commission of Agricultural In-

quiry," says Chairman Anderson of Minnesota, "put the elements of merchandising in the following order: First, the exact article or the exact type of goods desired or that will ultimately satisfy; second, a pleasing environment and a pleasing, dependable service; third, quality of merchandise, and last, price.

"Goods are sold not so much by offering a price as by offering service, convenience, dependability, reputation, credit. The consumer pays for all of this," says Mr. Anderson. "It is like the invisible tax, easy to pay because it is not apparent. In general, 37 cents of the consumer's \$1 represents the cost of producing the article; 14 cents represents all profits and 49 cents the cost of service."—Farm Life.

Many long-haired cattle are living wild in the foothills of the mountains of certain part of Washington State, according to accounts of Ozette Indians. In summer they follow the water courses down to the lowlands, treeing hunters when they come in sight. The Indians say the meat of these cattle tastes of cedar and is not fit to eat.

Every eleven days America has as many divorces as England has in one year. Every four minutes of every day and night some American couple arranges alimony. In the last twenty years 3,767,182 America men and women have obtained divorces.

Used Cat-o-Two Tails

This morning the trustees of one of the rural schools of Hale county brought to Judge L. D. Griffin a strap of leather, split at the end into two tails having a wire in the end, which they said the teacher, who is a woman, has been using on the pupils, giving one of them as many as sixty-three lashes. They said the wire was longer but was partly broken off while being used.

The matter will be investigated by the authorities.—Plainview News.

THE TRUTH ABOUT CORN IN THE HOG

One of our learned city newspaper editors tells us that corn in the hog is worth 90 cents a bushel, while corn sold in the raw for cash is worth only 48 cents a bushel. The said learned city writer draws the conclusion, therefore, that it will be very profitable for hog raisers to feed their corn to hogs this winter.

We don't pretend to be corn experts, or hog experts, or experts on corn in the hog, but we believe that our city friend has overlooked a few things. That which lies between the 48 cents for cash corn and 90 cents for corn in the hog, is not merely corn.

When you have sold your bushel of corn for 48 cents and delivered it, the bushel of corn has passed from your life. But if you refrain from selling it, and feed it to hogs instead, you add some things that should count as expense. The labor of feeding the bushel of corn into the hog, the labor of taking proper care of that hog, the work and risk of keeping that hog alive, the expense of providing him with a comfortable home, the measures to protect the feed from predatory animals, and finally the toll, trouble and dangers of moving a living bushel of corn rather than an inanimate bushel of corn to market.

Forty-eight cent cash corn, plus human labor, plus human brain work, plus other overhead, equals 90 cents per bushel.

And then when that "corn in the hog" gets to market, you may very well find yourself receiving very much less than 90 cents a bushel for him.

HONEY PHILOSOPHY FOR 1921

Yes, the auto is a great convenience and also a great pleasure, but—but—we can't forget our good old friend, THE HORSE. As Will Ogilvie reminds us in "Field," he was of the days that were steadfast, staunch and slow; when we took time to think deeply and and hearty to principle and duty. Says when our brains made us firm in faith Ogilvie:

Along the road the ceaseless motors thrummed,
Shaking discordant warning and harsh blame,
Then suddenly proud stepping through the dust,
Comes what I'll call for want of better name
One of the Old Contemptibles.
I find a sorrow in his stubborn stride;
With grief unguessed I stand and watch him go.
He carries with him much that nursed our pride:
Remembered things; things steadfast, staunch, and slow.

SAY, BOYS, GIVE US LESS LATIN!

One of the things we don't understand is why statesmen, who are elected to their jobs by the people, insist on using words at highly important public conferences which most of us don't readily understand.

Take that armament conference. The public, the mass of the people, down to the least educated of us, are millions of times more interested in

that meeting, its deliberations and its results than are the men who are participating in it, no matter how great they think they are. Every so often you hear Briand or Balfour or Hughes or some other fellow speak of "the last plenary session."

"Plenary" nothing! Plenary means "full, complete." Why not say "the last complete session?" Why use words that fuddle folks or drive them to a dictionary?

Then there is the word "agenda," which they love to roll around under their tongues at the conference. No doubt it is a Latin word—probably a derivative of the word "ago," to treat, to discuss—but there isn't one of us in fifty every day folks that numbers Latin among our accomplishments.

If diplomats responsible to peoples must have a lingo of their own, let them

A. & M. TEAM WILL ENTER DAIRY SHOW

College Station, Texas.—The A. & M. College of Texas will enter a team in the students' dairy judging contest which will be held in connection with the National Dairy Show next spring. The show is held annually and will very probably be held in Kansas City this year.

Preliminary training for picking a team was begun last week when twenty junior dairy husbandry students were taken to the Houston Fair and Expo-

sition for practice work with the fine animals on exhibition there. Work will continue with the animals belonging to the College.

Many tons of wild rice fully as nourishing as the tame rice are going to waste in the marshes of the Pacific Northwest. Indians gather their winter supply by running their canoes through the marshes and knocking the heads and kernels together over the heads, the threshed grain dropping to the bottom of the craft.

TWO PILGRIMS 1621 1921

The first fall harvest of the Pilgrim fathers, just three centuries ago, typified THRIFT.

Golden grain and fat turkeys meant more to them then, than bags of gold, as they faced the long New England winters.

Time moved on and our nation prospered. Our definition of harvest has broadened but we are none the less thankful for our stored-up thrift.

Today it is often the growing **BANK ACCOUNT** that we are thankful for. Many folks have had occasion to thank the intelligence which prompted a saving account.

After all, **MONEY** is the real harvest—the ultimate return on our labors—bringing us the comforts and joys of living.

DIMMITT Nov. 27, 1921.

J. A. Womack and Edwin Ramey, who left for South Texas Oct. 29, returned last Monday, Nov. 21, after a pleasant three weeks' hunt in Edwards Co. They were accompanied by Mr. Womack's nephew from Colorado City on. They killed three deer, each man getting one. They also killed plenty of turkey. They got home with one deer and three turkeys.

Ramey Bros. opened the goose hunting season with their first hunt this week and returned home with three fine fat ones.

A Thanksgiving dinner was given at the home of Mr. and Mrs. Cleve Tate. Those who enjoyed the great feast were Mr. and Mrs. Edwin Ramey and family, Mr. and Mrs. Tom Tate and family, Mr. and Mrs. W. A. Tate, Mrs. J. W. Carter and Jack Tate.

Messrs. Jay Hastings and Jack Tate visited friends in Arney Sunday.

Mr. and Mrs. Glenn Hickman are the proud parents of a sixteen pound boy.

Mrs. Etta Brashears and daughters, Ota and Sallye Malline, spent the week end at the Ramey ranch.

Dr. Mayes Miller was a dinner guest at the Ramey ranch Tuesday.

Mr. and Mrs. C. J. Mapes and family and Mr. and Mrs. Fred Galle and family spent Sunday, with Mr. and Mrs. I. B. Brooks.

Word has been received from Mr. Belew that Mrs. Belew, who is in a sanitarium at Dallas, after an operation, is recovering as well as could be expected.

Homer Norwood, who has been visiting his sister, Mrs. Roy Green, in New Mexico, is back home again.

J. A. Womack made a business trip to Lamesa, Texas, last week.

Bryan McDonald was seriously injured at school one day last week. The extent of his injuries has not yet been determined.

R. R. Gilbreath left Friday for Dallas, where he will attend a tractor school.

Messrs. J. R. and Joe Hastings motored to Dawn Tuesday to a sale.

Mrs. Edna Tate entertained Jack Tate, Mr. and Mrs. Bruce McLean and family with a birthday dinner Wednesday in honor of Mr. Ester Nobles.

Mrs. W. A. Tate spent the week end with Mrs. Tom Tate.

Mrs. B. D. Woodlee and children and Mrs. I. B. Brooks and daughter were shopping in Hereford Saturday.

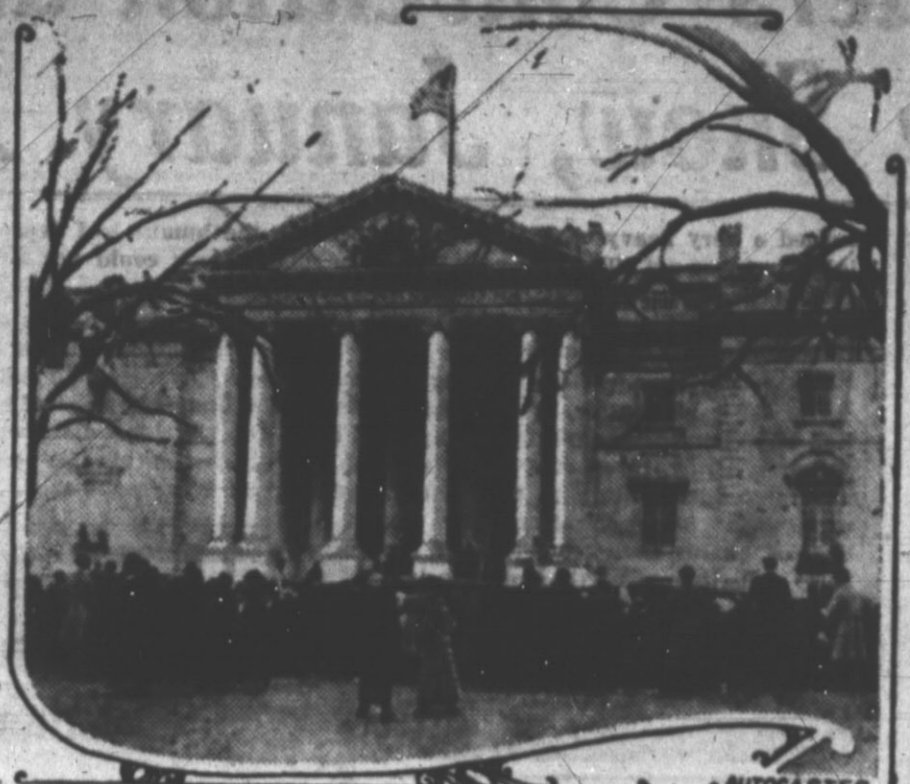

BIRD RESERVATION FOR TEXAS COAST

New York City.—Since President Roosevelt established the first Bird Reservation in Florida, back in 1903 at the request of the Audubon Society, the bird reservation idea has spread over a large portion of the United States and is now invading Texas.

At a recent session of the Texas Legislature a law was enacted authorizing the State Land Board to lease for fifty years to the National Association of Audubon Societies the various famous bird islands situated in Laguna Madre. The marvelous bird-life on these islands hitherto scarcely known to science was brought prominently to public attention in the summer of 1919 by the ornithological work of T. Gilbert Pearson of New York City, President of the Audubon Societies.

Mr. Pearson estimated that the total

"WILL THEY DO IT! DARE THEY DO IT!"

Memorial Continental Hall, Washington, where the Armament Conference is being held. Will this be a new "Liberty Hall" for all the peoples of the earth—liberty in universal world peace?

bird population of these islands through out the year falls little short of 100,000. Of the birds resorting here for nesting purposes in the summer Mr. Pearson enumerates Ward's Herons, Snowy Egrets, Louisiana Herons, and Black-crowned Night Herons. Also thousands of Laughing Gulls, one colony of Brown Pelicans and various species of Terns. A peculiar interest to science on Green Island, about thirty miles is a great gathering of Reddish Egrets north of Point Isabel. For twenty years this species was supposed to be extinct as a breeding bird in the United States. It was only by the discovery of these colonies on the Texas coast that this species was again recognized as a nesting species within our boundaries. Here also was discovered a colony of White Pelicans with their eggs and young. Heretofore this great bird has not been known by science as breeding in the waters of the Gulf and the nearest colony known was that in the Salton Sea of California, 2,000 miles away.

EGG PRODUCTION INCREASED BY USE OF ANIMAL FEED

Meat scrap or some other animal feed high in protein is the one essential constituent of the mash which cannot well be omitted. The United States Department of Agriculture found that a pen of pullets, on free range, which did not get meat scrap or any other animal-protein feed laid only 90 eggs each in a year, compared with flocks of from 125 to 150 eggs from pens fed rations containing meat scrap. The eggs from the pen where no meat scrap was fed cost 22 cents more a dozen for feed than

or sour, is excellent for replacing part or all of the meat scrap. The milk may be used in mixing the mash if a moist mash is fed, or it can be kept before the fowls as a drink. If clabbered and fed thick or like cheese, hens will eat enough of it to replace all of the meat scrap needed. A little bone meal makes an excellent addition to the mash or it can be used to replace a part of the meat scrap. Green cut bone, if fresh and sweet, will also take the place of meat scrap if fed at the rate of one-third to one-half ounce daily per hen.

John F. Hylan has been selected Mayor of New York City.

Dear Children

In the little book I sent you from "The Christmas Store," (SKELTON'S) I asked you to write me a letter telling me just what you want for Christmas, as I thought this would save a lot of time; and I am sure going to have a lot of work this year to get around and see all the little boys and girls.

Now I want you to get your letter off right away. Just write me and give a list of what you would like to have and mail it to "SANTA CLAUS, care of C. A. SKELTON," and I will get it all right. I have put two nice prizes, a pretty, big curly haired doll that goes to sleep for the girls, and a dandy, blue racer automobile for the boys, in the south window at Mr. Skelton's and I am going to give these free to the boy and girl who write me the nicest letter.

Now, go down to Mr. Skelton's right a way and see what you would like to have and write me a letter about what you want and if your letter is the best one you will get one of these dandy prizes.

Santa Claus

The Panhandle Swine Breeders Convention and Sale, With Hereford's Poultry Show, January 17-18, 1922

turned a very heavy crop of weeds on land that was not tilled last year. The results showed excellent increase in crops over the same land that had been cultivated clean the year before.

Humus is formed by the turning under of vegetable matter, by the application of barnyard manure, by the application of straw, litter, etc. Many soils have failed, according to the writer's experience and observation, more for lack of humus than from lack of fertility constituents of the soil. It is a fact often shown that soils with much plant food, when analyzed by chemists, failed to yield crops in heavy cropping,

because the humus had depreciated so the plant foods could not be used by plants.

Those who have thin soils should begin this winter to turn under vegetable matter, or apply vegetable matter to increase the humus content of such soils. Unless this is done disappointing results will most surely be seen when commercial fertilizer is used. For com-

mercial fertilizer does not add humus nor will it give good results where the soil is lacking in humus. But with plenty of humus, commercial fertilizer of the right kinds and the proper amounts will economically increase yields on many soils.—Farm & Ranch.
