The dump grounds east of town will continue to be an eye-sore for a while, at least. Dr. Young, Texas Forest Service Chief, this week advised the Civic Improvements Committee through County Agent Hugh Clearman, that trees in the state nursery cannot be moved before December, due to the fact that they have begun to leaf and would not have much chance of survival. Dr. Young said, however, that 500 young trees are being reserved for the Hereford project. The trees will be planted in two rows south of the dump grounds to cover the tract from view along the highway.

The committee declined donation of several local trees, stating that they would like the planting to be of equal size all along the tract.

Hereford Implement Company this week announced the opening of a new department in automotive electrical service. Oren Parsons is now located with the firm and will be in charge of the department.

Becky Kirby, daughter of Mr. and Mrs. Jim Kirby celebrated her second birthday Saturday, but enjoyed the occasion far less than her parents. Friday evening, around 7 o'clock, Becky popped a nickel into her mouth and swallowed. The coin lodged in her esophagus and she was rushed to the Deaf Smith Hospital, but due to lack of necessary equipment was taken on to Amarillo. The physicians put Becky "to sleep," removed the nickel, and she returned home Friday night. Saturday she felt fine and was having a wonderful time on her birthday. So were her parents.

Paul Harvey and Cecil Massey represented the Deaf Smith Chamber of Commerce at the annual banquet and meeting of the Dismitt C. of C. Friday night. Massey was principal speaker of the occasion and talked on "Ghosts Along the Creek Bank," centering chiefly around what the ghosts would think of the town. Approximately 175 attended the meeting.

Mrs. Tunnell, mother of Mrs. N. D. Bartlett, Jr., is in Northwest Texas Hospital, where she underwent an eye surgery Thursday afternoon. Her condition was reported as good.

Mr. and Mrs. John Patton left Wednesday for Truth or Consequences. Among other things, John planned to do a bit of fishing.

Freezing weather two nights this week left owners of fruit trees wondering, especially about peaches.

From Wayland College, Plainview, comes word that Milford Grisham of Hereford is this quarter on the dean's honor roll. Notice of another Hereford honor roll student is Katherine Snare, who is attending TSCW, Denton.

With bleachers moved and temporary installations made, the Whiteface football field this week appeared ready for another plowing or two, then seeding of the grounds.

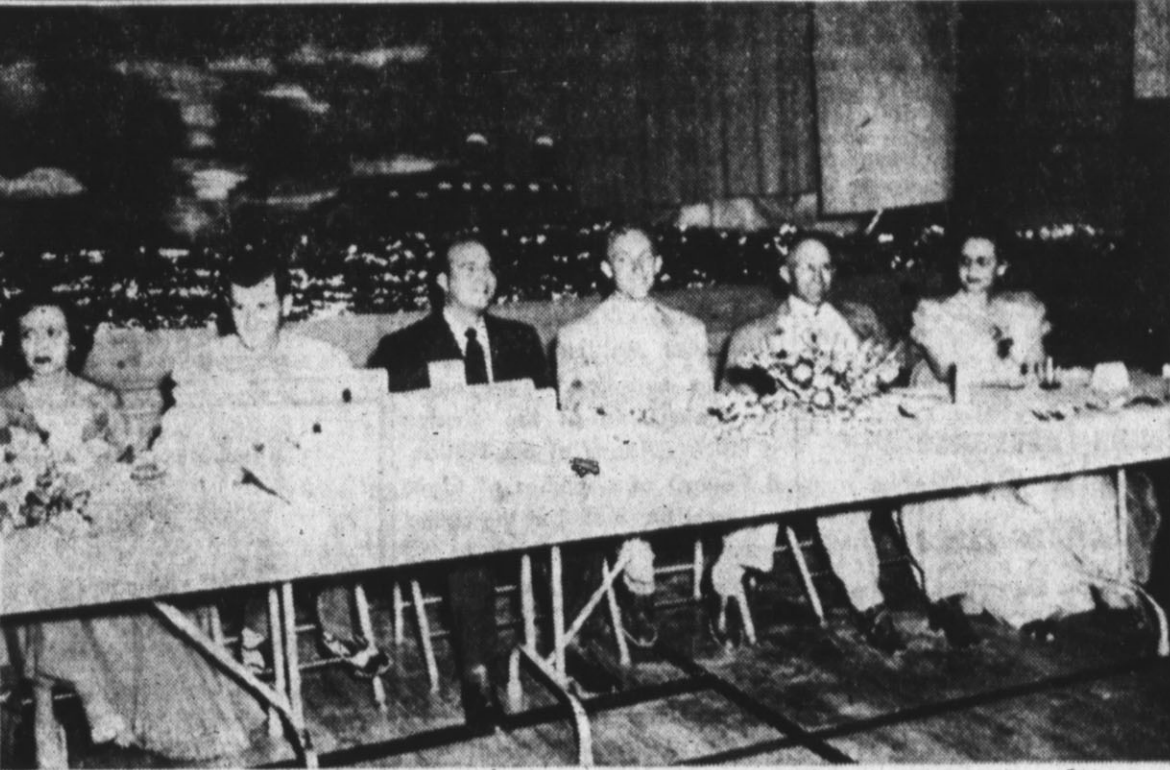

Mr. and Mrs. Wayne Evans left Thursday for Abilene, where Wayne will attend a board meeting and other activities at Hardin-Simmons University. They plan to return early next week.

### Mrs. A. G. Bell Uninjured When Auto Overtakes

Mrs. A. G. Bell escaped without personal injury when she overturned her late model Plymouth on Highway 60, approximately two miles west of Black Wednesday. Damage to the car was estimated at approximately \$400.

The accident occurred when she pulled off the pavement on to loose dirt on the right hand side of the road. The car landed on its side. In addition to damages to the car, considerable damage was also reported on merchandise which the car contained. Mrs. Bell is widely known in this area as a pioneer resident and as representative of the Fuller Brush Company.

## "Ocean Liner" Theme Of Junior-Senior Banquet

The annual Junior-Senior Banquet, highlight of the year for junior and senior high school students, was held in Shirley School gymnasium Friday night.

Theme for the banquet was "Luxury Liner" suggestive of the good ship Hereford Liner anchored in the Hereford High School harbor to pay tribute to the class that will soon go ashore in search of other interests.

Travel scenes along the walls provided appropriate background and on the stage a lighthouse against a shimmering blue sea backdrop beckoned the ship's crew. Tables laid for four, were centered with flame-tipped candles entwined with flowers and favors were miniature ocean liners.

The program carried out the voyage theme with Carroll Jorjes giving the invocation. Tommy Woodford, president of the junior class was the captain (master of

ceremonies) for the evening and gave the anchors awigh welcome. Bill Carmichael, president of the senior class gave the response—A memorable trip.

The Gangplank Melodiers, H. S. quartet, entertained with vocal music accompanied by Raymond Childers. Singers were Leaton Clark, Tommy Osborn, David Goldston and David Stanton.

Harbor Lights was the subject of a talk given by the ship's pilot, Suft. George Graham. Gordon Suits of Amarillo presented a variety show, entitled "Wind and Hurricane" by the deck hand.

Hail Hereford High, the school song, was sung by the entire group to conclude the program.

Officers of the senior class include: Bill Carmichael, president; Buryl Fish, vice-president; Sherry Benson, secretary and Barbara Gabbert, treasurer. Sponsors are: Mrs. S. R. Rateliff and W. J. Stanford.

Officers of the junior class are: Tommy Woodford, president; E. W. Solomon, Jr., vice-president; Nan Longbottom, secretary and Norma Grace Gray, treasurer. Sponsors are Mrs. O. D. Lowry and W. C. Quattlebaum.

### Bernard Roberson, D. C. Kinsey Are Associated In Motor Company

Purchase of the interest of J. A. Rogers of Amarillo in Kinsey Motor Company of Hereford by Bernard Roberson and D. C. Kinsey was announced this week. The transaction became effective as of April 1. Carroll Whiteside was also listed as an officer in the new corporation.

The firm will continue to operate under the name of "Kinsey Motor Company" and will feature the same lines, service, parts and accessories as in the past, the new owners said.

"It is a pleasure to announce the association of Bernard Roberson with the firm," Kinsey said. "Working with Mr. Rogers has been a pleasure at all times, but we feel that an active partner in the firm will enable us to serve the community better than ever before."

Neither of the partners need an introduction to people of this area.

Mr. Kinsey came to Hereford in 1942, when the business was purchased from G. W. Brumley and Kinsey Motor Company was organized. He has been active in the firm since and gained previous training when he was associated with Mr. Rogers in Plains Chevrolet of Amarillo.

Mr. Roberson was born at Rumpfield 45 years ago and has spent most of his life in this community. He graduated from Hereford High School in 1928, and attended West Texas State College. He moved into Hereford three years ago. Both of the partners have been active in community affairs.

"No personnel changes are planned," the partners said. Mr. Whiteside will continue in his post as parts man and service manager; Buford Crosthwait as shop superintendent, Bruce Woodell as sales manager, and Lloyd Neill as salesman. The firm now employs a total of 16 people.

## Case Keeps Jury All Night, Judge Still Trying To Figure Out Who Won

A civil case of wide interest was held in District Court this week. The case was unusual in that it sought termination of a lease contract by the plaintiff, along with the asking of \$230,000 in damages in a cross-filing by the defendant. It gained most publicity, however, from the fact that the jury took the case at 2 o'clock Thursday afternoon — and returned its findings at 5:30 Friday morning.

Another unusual factor in the case was that neither side has yet been able to figure out whether it definitely won or lost.

The case was styled Emmett P. Miller, et al, vs. R. B. Latham, et al, and originated in Austin. It was transferred to District court in this county, however, in view of the fact that the land in question is located in Deaf Smith County.

The case grew out of the fact that Emmett P. Miller, et al, leased a half section of land to R. B. Latham, et al, for a period of 15 years with the understanding that Latham was to drill an irrigation well on the place and to pay \$2.50 cash rent each year. Miller sought to break the lease on the grounds that the lease was secured through misrepresentation. Latham, in turn filed his cross-claim on grounds of financial loss through loss of the lease.

Judge Harry Schultz heard the case and gave the jury a charge which was also perhaps unusual. The charge was a three-page, type-

written instrument containing 36 questions which the jury was bound to answer, and upon which the judge would base his final decision. The jury left the courtroom at 2 o'clock, to ponder over the 36 questions.

The questions were difficult, including how much net profit the place would make each year, ranging from 1956 through 1967. The jury pondered to the extent that a few minor arguments even resulted between 2 o'clock and 12 o'clock, when they were offered an adjournment. Perhaps they were interested, anyway they declined to adjourn and remained in session until 5:30 Friday morning when their verdict was rendered to a sleepy judge, a tired clerk—and practically no spectators at all.

To complicate matters, some of their answers apparently favored one side, while some of their answers apparently favored the other. Judge Schultz took a long look at the verdict, announced that he would have to study the answers on the 36-question form before handing down his decision in the case. The lawyers, including an array of legal talent from Hereford and from Amarillo, were generally inclined to agree with the judge. They couldn't definitely say which side won or which side lost.

The jury included Cecil Gunter, foreman; Wayne Qualls, T. L. Sparkman, Jr., A. L. Logan, H. V. Crawford, R. E. Drager, Leon Bell, Hugh Bookout, Cameron Gault, K. R. Wilson, Delbert Ruland and M. G. Elliston.

### County Sells 504 More Tags Than 1952

Complete figures on 1953 vehicle registrations were Friday released by Johnny Shannon, deputy tax collector. A total of 5,187 vehicles were registered in Deaf Smith County for 1953 as compared with 4,683 registrations last year—a gain of 504.

Passenger cars accounted for most of the gain, according to Shannon, who said that this phase alone showed 639 gain with 3,183 cars registered in 1953 as compared with 2,844 in 1952.

Commercial vehicles also showed a gain with 464 this year and 396 last year. The gain was 68.

Farm trucks showed a gain of 70 totaling 464 in 1953 against 396 in 1952.

Commercial truck tractors lost six, showing 64 in 1952 and only 58 for 1953.

Farm truck tractors dropped two this year with 18 as compared with 20 last year.

Trailers were down five; 148 this year and 153 in 1952.

### Sunday Funerals Discouraged By Local Ministers

The Ministerial Alliance recently took steps to discourage Sunday funerals, except in emergency cases.

The following letter, prepared by Rev. T. Edgar Neal and Rev. Russell Wingert, is presented in behalf of the Alliance, explaining the outlook of the group on the subject.

"We understand the public is asking some questions about the plan to have no Sunday funerals in Hereford in the future, and in order that everyone will understand our position we are led to make this public statement.

"It is a matter of rather general knowledge that there are comparatively few places where they continue to hold Sunday funerals. Amarillo, as with most cities, have funerals on Sunday only in extreme emergencies.

"This practice has become almost universal because of experience and observation. Here are a few of the reasons back of the action of the Ministerial Alliance in asking for the discontinuance of funerals in Hereford on Sundays, except in emergencies:

"Often undertakers have worked all Saturday night getting the body and casket ready for the next day's funeral. The grave diggers, who deserve the rest of the Christian Sabbath, must work most of that day in case of Sunday funerals. The florists often work all night Saturdays preparing the wreaths and sprays so as to have them ready at the appointed hour. The church choirs, in addition to their work as musicians in the regular services of the church on the Christian Sabbath, are called upon for this extra service on Sunday, which they are glad to give if it is necessary. But the ministers do not feel it is necessary. We have said nothing about the added duties of the pastor on this, his busiest day of all the week.

"We believe, in lieu of these facts, when the public stops to think it through that there will be little opposition to this practice, or rule, that has become almost universal throughout the country.

"Prepared and submitted for the Ministerial Alliance by T. Edgar Neal and Russell Wingert"

### Men's Fellowship Breakfasts Are Scheduled Each Wednesday Morning

A men's fellowship breakfast, open to all interested men of the area, is being organized as a weekly feature of the community, according to announcements today.

The organization will be of a non-denominational and non-political nature and, in addition to breakfast each Wednesday morning, will include a brief talk and devotional service. The breakfasts will begin at 7 o'clock and continue to 7:45, allowing ample time for those attending to get to work by 8 o'clock.

Plans for the fellowship breakfasts were made by a group of men from various churches. They asked that their names be omitted

since they might be construed to be of a denominational nature.

The first meeting will be held Wednesday morning, April 22, at the Methodist Church. The second meeting will likewise be held at the Methodist Church, while the next two meetings are scheduled at the First Christian Church to be followed by two more at the Presbyterian Church. Other meeting places will be announced later, they said.

"Remember, the meetings are open to every interested man," they said. "They will be of a devotional nature and strictly without denominational or political influence."

### Texas Insurance Fieldmen To Make Inspections Here

The Texas Insurance Fieldmen's Association will converge on Hereford September 24, 1953, for their thirty-first city wide fire inspection.

This organization will appear in Hereford upon the request of the civic improvements committee of the Chamber of Commerce. The committee members met with members of the Fieldmen's Association at their last meeting to lay plans for their forthcoming trip to Hereford.

The inspection will be held on strictly a voluntary basis. Those merchants desiring to have their stores inspected will be contacted prior to the arrival of the sixty odd inspectors. The group will inspect along with our local Fire Department and Boy Scouts. Each merchant will be notified of the faulty wiring, fire hazards, etc. by the committee that will inspect all parts of the building.

The one day program will include school and civic club programs, parades, radio programs, and antics by actors will be carried on throughout the city.

Mr. C. E. Colson, President of the Fieldmen's Association notified the Chamber of Commerce that the Association voted "overwhelmingly" to conduct the town inspection in Hereford on September 24, 1953.

That Save Your Health and Your Money

Few purchases today represent bigger bargains than prescriptions. Because the modern drugs your physician prescribed are so effective against serious diseases, people live and get well faster than ever before. This means hospital, nursing and medical costs are lowered.

There's another angle, too. Despite the millions upon millions spent on research, the pharmaceutical industry is dedicated to lowering drug costs.

Within the last five years, for example, streptomycin prices have been reduced 97 percent. Similar price reductions have been made on such other life-saving drugs as penicillin, cortisone and many others.

In these days of inflation we thought you'd like to know your prescription is still an outstanding value. We'd welcome the opportunity to help you to better health at lower cost.

**GRASS ROOTS**

"Spring has Sprung," some joke!! The last killing frost date is now April 18. Won't be long before the other crops we can safely raise here will be the Arctic Tundra. Might not be so bad though, they claim is that the stuff is good grazing—for reindeer anyway.

The pasture grass ball is rolling again. Although many frown on Spring seedings of permanent pasture there are many acres of fine grasses seeded in the spring. Weeds of course present the big hazard. Mowing will take care of the tall growing weeds but goat head will require a good spraying of 2-4-D. If the land where the pasture is to be seeded is infested with goat heads leave out the legume and overseed the pasture in the Fall. If conditions are such that you won't have time to do the spraying job, plant the land to Hubam Clover, turn it under and seed to pasture grasses in the Fall. Every day someone comes in with the blues because they are out of pasture. They have taken off of wheat and it is too early for Sudan or native grass. Regardless of the cattle market there will still be cattle in the country and grass is still the cheapest feed.

Lots of Alfalfa being sown this Spring. Our seeders are busy all the time. I still don't have the complete story on Arizona, California versus Texas seed, but am watching a year old seedling that has both side by side, which should tell us a story by Fall seeding time. The men who have year old seedlings of Buffalo Alfalfa are very optimistic about the use of this variety in our area. This year's cutting record should show us something.

**NOXIOUS WEEDS:** The first up as usual is dandelion in the lawn which is bad enough but can be controlled with 2-4-D. The one that all of us worried about is Bindweed. That is the one the women folk will be "ooing and anahing" over in a few weeks because of its pretty blossom. This pretty little cousin of the morning glory is more dangerous than the worst dust storm any of you ever remember or an eighteen inch rain in five minutes which I doubt anyone remembers. The only known cure is to sterilize the soil. We have these soil sterilants and it seems ironical to sell them on the same inventory with seed. However this weed must be stopped before it spreads any further. There are those who balk at the idea of sterilizing their ground, but the farmers who have tried to raise any crop in Bindweed will tell you that the soil may as well be sterile. This plant reproduces from the seed and from the roots both. Every time farm implements go through a patch the weed is spread that much more. How fast will land go down in value because of a noxious weed? Ask some East Texas people what the Wild Rose did to their area. To top it all off I saw several large patches last summer on the curbs of Hereford being cultivated. Johnsongrass will never see the day it can compete with Bindweed in the destruction of cropland.

The team is made up of Ronald Kerschen, Jimmy Dale Auten, William Albracht and George Ford.

In the first division of the contest the boys had 40 samples to identify from a group of 75 identification samples of grain and weed seed.

The second part of the contest was grading of 10 samples according to the handbook of official grain standards of the U. S. The same process was used as in commercial grading.

The next division was judging of six groups of four samples each of winter barley, white oats, new Era cowpeas, yellow milo, hard red winter wheat and alfalfa.

The team will go to Lubbock on April 25 to the Texas Tech Crops contest.

The Thursday contest was a practice contest in preparation for the Tech contest.

### Four Arrests On Minor Charges

Two charges of "swindling with a worthless check" were also filed on A. Spencer. Charges were filed as the result of bad checks cashed at the City Drug and at the Neat Cafe.

Henry Anthony De Young was released in Hereford on a bond of \$1,000 following charges of "illegal possession of intoxicating liquors for sale." De Young was picked up as he left the bus in the east part of town with a suitcase containing 14 pints of whiskey.

**You really GO when you go V-8**

When you go Ford V-8 you get this fine car power without paying a premium.

What kind of engines are you finding in more and more of America's finest cars? Yes, V-8 engines. And no wonder, for no other type of car engine available today can beat V-8's for compactness... and for smoothness. And Ford and only Ford offers you a V-8 engine in a low-priced car! It's the wonderful result of Ford's experience building more V-8's than all other makers combined... over 13,000,000 of them.

Fifty Years Forward on the American Road

It's just one of 41 "Worth More" features that make Ford worth more when you buy it... worth more when you sell it.

Imagine! A car so low in first cost keeps its value better than any other car on the American Road. Used-car figures on last year's cars prove that. And with its 41 "Worth More" features, this newer, finer '53 Ford holds still greater promise of long-lived value. You'll find built-to-last Crestmark Bodies. You'll find a new kind of ride that practically "repaves" the roughest roads. And these are but samples of the reasons why Ford is worth more when you buy... worth more when you sell.

Danger Spots Of World Reviewed Here By Speaker

"Danger Spots and Growing Points" was the topic of Donald Grant, English Rotarian, who Friday addressed members and guests of the Hereford Rotary Club. Mr. Grant, a sponsored speaker for Rotary International, started off by stressing the fact that nations, like children, do grow—and that sometimes danger results from growth. Four trends were cited by the speaker as a result of growth of nations. First, he pointed to the fact that the "center of power" has changed in recent years from London to Washington, D. C., a fact which he attributed to the size and growth of the United States. Second in his points was the fact that Moscow has developed as the second, or contesting city, in the growth of nations. Third was the rejection of historical impact of the West by races and peoples, namely Asia and Africa. Fourth was the fact that the British Empire is creatively changing into a commonwealth. He cited the United States as one time isolationists, but said that this attitude had been impossible since 1942. The final outcome, he predicted as hopeful and creative in outlook. Lack of sufficient time apparently prevented Mr. Grant from developing each of his points fully. Most of the meeting with a slightly different outlook on the United States and its activities in other worlds, especially as the unquestionably leader of other nations of the present decade.

Larry Walterschied, St. Anthony's School Eighth grader, pitched masterful softball against Price Junior High Eighth grade in Amarillo Friday afternoon. Walterschied held the junior Cardinals of Price to two scratch hits and did not walk a single man. Pete Perez pitched for Price. He is well known as a Golden Gloves boxing champion, and his pitching was effective in holding the St. Anthony boys to four hits and three free passes. St. Anthonys would up with three runs, two of which resulted from Price errors, while Price made one lone tally as the result of a Hereford miscue followed by two hits. One of the best plays of the game was a double out made possible by a fly ball caught by Gene Vashek in left field and a fine peg which named the runner at first. Final score, St. Anthony 3, Price Eighth grade, 1.

A pre-nuptial concert was presented by Father James Salvi at the organ, who also presented the vocal offerings: "O Lord Most Holy" (Frank); "Jesu Dulcis Memoria" (Arranged by Rossini); "Ave Verum Corpus" (Mozart); "Ave Maris Stella" (Italian Melody); Mendelssohn's Wedding March was used.

After the marriage ceremony, Fr. Salvi sang "On This Day, O Beautiful Mother" (Lambillote).

During the mass, vocal offerings included "Kwrie eleisan" (Rossini); "Sanctus and Agnes Dei" (Gregorian). The offertory "Ave Marie" was by Schubert.

The bride's attendants were her sister, Marcy Koelzer, who served as maid of honor, and bridesmaids, Mary Hund and Thelma Chronister.

The honor maid's dress was made of nylon net over taffeta in three shades of pink; shell pink, deep pink and fuchsia. The tucked bodice was attached to the full double skirt with a large bow of net drawn to one side. She wore a taffeta lined stole, net mitts and a half hat trimmed with tiny pink roses and net. She carried a cascade bouquet of deep pink roses, tied with tufts of net and satin ribbon.

The bridesmaids wore identical dresses fashioned of shell pink nylon net over taffeta, made with lace bodice and full skirt featuring a large peplum sprinkled with rhinestones. They wore taffeta lined net stoles and half hats to match their dresses trimmed in tiny roses. They also wore matching net mitts and carried bouquets of Johanna Hill roses.

Werner Koelzer, the bride's brother, served as best man and Gerald Banner and Lindal Murray were ushers.

The bride, given in marriage by her father, wore a gown of white nylon net, made over matching satin, designed with fitted bodice featuring a deep yoke of Chantilly lace and finished with small lace

At the present time we have 41 men and eight ladies to make the trip to Plainview for the inter-city matches Sunday, April 19. Tee-off time is 12:30 and green fees of \$1.50 will be charged. However, you can go over early and play a few holes before the matches, get started and it won't cost you any more. The matches will be one point for the first 9 holes, one point for the second 9 holes, and one point for the 18. In other words, three points for each match. If you and your opponent tie the first 9, you will get 1/2 point each, but if you beat your opponent 2 holes on the second 9, you get 2 points to his 0 for that nine, and you win the 18 by two points. Your total would be 2 1/2 points to 1/2 point for your opponent. We still need some players, so if you haven't turned in your

name to the pro shop and want to go, turn in your name by Saturday, April 18, or come on over, and we will match you against one of their golfers who plays about the same game as you do. Plainview will return the match on Apr. 26, or on May 3. If they don't come on Sunday, April 26, we plan to have some 9-hole Scotch four-some matches among ourselves at the local course with ladies commencing at 2 o'clock, April 26.

Several players have been out this week sharpening up their game. A lot of these are coming around 6 p.m. after work hours. If you hurry you can get in 9 holes before dark now, starting at 6 or a few minutes thereafter; so, come on out and let those scores go down. Remember, post all your scores, so we can figure

your handicaps. A large sheet with almost everyone's name is posted in the club house, and it only takes a few seconds to post that score whether it is good or bad.

J. A. Pitman, Earl Hendricks, W. W. Gilbreath and F. M. Corbell were downstate a few days last week and played some mighty fine golf courses. They played at Midland, Austin, Ft. Worth and Wichita Falls, and did pretty well, too.

Dr. J. H. Channer, J. M. Posey, Urlin Streu and Ray Harty journeyed to Littlefield last Sunday and played 27 holes. I understand "Ole" Channer was the "hot boy" in the foursome. It helps your game to play some different golf courses as you can get used to hitting practically the same shot on each hole by playing in only one course. Besides, you get a chance to travel and get away from your wives for a change.

## Eisenhower Makes Strong Peace Bid

President Ike laid some cards on the table this week and in so doing, he echoed some of the sentiments which have been floating around over grassroots America for several months.

Ike's talk will, by now, have been interpreted in several directions. It will mean some things to one person, different things to another. To us, however, it appeared clean-cut and forthright. He asked for, above all else, an honorable peace. He even pointed out ways and means by which this could be accomplished and cited world peace as the aim of this country, when he closed his talk by saying:

"God created man to enjoy, not destroy, the fruits of the earth and their own fall . . . that they may find before them the Golden Age of freedom and of peace."

Ike went quite a bit further, though, in our opinion. He referred to life in the United States under which this country maintained an army to defend its shores or, at worst, an atomic war. This seemed to us a strict interpretation of conditions as they actually exist, followed by an ultimatum to the Russian dictators. Furthermore, he expressed a feeling which appears to be general over the nation. It is applicable in this part of the country to say the least.

This is language which the Kremlin can understand. It means that the American people are tired of sending their sons to a battle front where America has no real quarrel. It means that scientific developments of this country will no longer lie idle while our allies furnish supplies to our enemy. It means, if necessary, America is finally going to take the war where it really belongs: to Russia. It means much more, in our opinion, because we definitely feel that it is the first step to peace in the world.

President Eisenhower achieved an enviable record as a general. He proved himself as a politician. Most important of all, however, he is now emerging in the foreground as a statesman. Those who heard and studied his speech last Tuesday are bound to agree that Eisenhower handled a touchy situation in a manner befitting some of our greatest leaders. Our passive attitude of recent years has been consistently draining our manpower and resources in

an undeclared war, while Russia smugly watched the United States expend itself against another country. The Russians, in fact, could not have asked for a more ideal situation.

Stalin was never faced with such a challenge. Furthermore, it was timely in view of the present internal strife within the Russian borders. It could, of course, lead to total destruction of our way of life, but certainly no more so than future domination by another country. America has always stood for freedom. We pitted our meager forces against overwhelming odds in the wars with England and fought our own Civil War under the identical banners of freedom. Our leaders were men of courage who issued statements like those we heard Tuesday.

President Eisenhower, like those other leaders, is a conscientious and deeply religious man. Also like those other leaders, we believe he is being helped and guided through the aid of a Supreme Being. His statements and his feelings indicate as much. What more could we ask in a conflict which basically involves Christianity vs. Communism?

## City Commission Faces Big Problem

Recently the City Commission voted to eliminate free and "token-payment" water bills. The action has been more far reaching than perhaps even the members expected.

The golf course, for instance, has been operating on free city water, despite which they have still continued to operate at a slight loss as an organization. Many of the members honestly feel that paying a heavy water bill each month may force the organization to abandon the links in which a total of around \$30,000 has been invested.

The City, on the other hand, has outstanding revenue bonds, which definitely specify gollonage charges on all water service rendered. To offer the golf course free water, the old commission felt, is a violation of their contract with bond holders. Since the City has been meeting its obligations on the old basis, it is entirely possible that the bonding company might issue a special release in this case. The situation, we believe, goes deeper than the immediate case, however.

The real controversy, in our opinion, evolves down to a question of principle, since it is certain to also arise in cases of individual churches, schools, hospitals, Boy Scouts, Camp Fire Girls and other organizations.

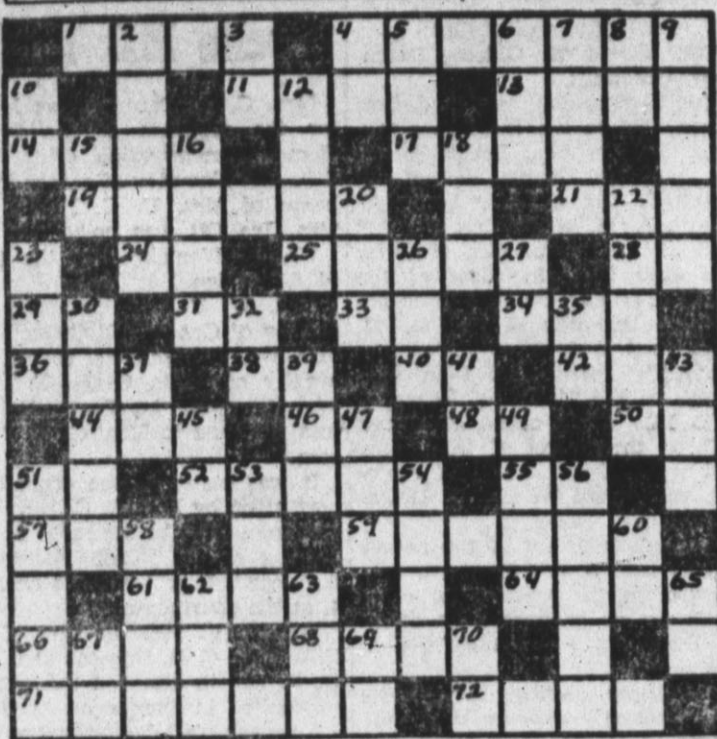

The people of Hereford, as tax payers, are furnishing water for a small group who take an active interest in playing golf. Is it right for all of the people to be taxed to ward the interests of a few? If so, how far should the gratuities extend?

On the other hand, golf courses in many communities are municipal courses, owned and operated by the city. In this case, as the golfers point out, the City not only furnishes water, but in many cases actually loses much more money in the course of operating the links. They contend that in operating the course, which is open to the public, that they are actually doing the City a service. Certainly, the golfers have a sound argument. Merits of having a golf course are unquestionable in that they provide amusement; keep business in Hereford, and sometimes are an important factor in attracting new businesses and citizens.

If the commission decides in favor of the golf course, it will set a precedent which, in the course of time, could prove expensive to the tax payers. If the commission took over and operated the course, it could prove even more expensive -- and might not meet with approval of the players. Brief hours and other operational points have, at least, occurred in operation of the swimming pool from time to time.

The question is a difficult one, especially to throw at a new council which will meet for the first time next Monday night.

### QUESTION OF THE WEEK

## Industrial Expansion Should Tie In With Local Agriculture Trend

What industry do you think the Chamber of Commerce should try to bring to Hereford?

**CLEA MEHARG**

I think perhaps it would be better to bring in an industry in connection with what we are producing in the way of vegetables, such as a cannery. Something that would take care of the processing of the vegetables that we grow here.

**SAM NUNNALLY**

Well, first -- we need a permanent insurance adjustor here. That's just a one man job, but we need it bad.

Second we need a motor outlet for these irrigation motors here. A factory branch of some major outfit to take care of these irrigation motors.

And third we need a truck terminal here for freight lines. We also need a Sears or a Ward store. A farm store.

**LOYD LEVEL**

We need a vegetable processing outfit to take care of the vegetables that are being raised here. I mean some major outfit like Gerber's baby food or Libbys, not some fly by night outfit.

**JOHN AIKEN**

It has always been my opinion that the most practical business for this area and one that would stand the best chance of surviving would be one which would utilize the products we have here either by canning them or processing them in some way so that they would be saleable. A milk plant or a baby food factory or something where-by we could use our widely known reputation. Something along that line I think would have a better chance of succeeding here and lasting for a period of years.

Every pretty day this time of year we feel sure we should be plantin, a garden but when the wind begins to blow and we consider the possibility of hail we put it off a while longer.

Then in the summer when our neighbors begin to pick ripe tomatoes a week or two earlier than we do we wish we could make ourselves always live up to our policy for success on a farm.

When it comes time to plant go ahead and plant because you can nearly always plant over.

Well we certainly fell into a streak of luck when we made the trip to Dumas to the T. H. D. A. District Meeting last week with Helen Parsons, Augustine Gregory, Jessie Mae Dodson and Betty Lou McGaughey because Lucille Parks invited her former neighbors by the apartment which she shared with Lucille Hughes for refreshments.

If the two Lucilles call big slabs of ham for sandwiches along with potato chips sliced tomatoes, pickles, lemons, ada, cookies and ice cream topped with strawberries -- if they call all of that refreshments wonder what they consider a meal.

It is nice to know that all of our teachers have been reelected because if all of them have worked as faithfully as have Mrs. Bookout, Mrs. Crawford, Miss McMas-ters and Mr. True in their efforts to help educate our fifth grader this year we should have a good school.

High grades haven't scorched his report card but his teachers have certainly been doin their part.

## I'll Never Forget

By Willard Witherspoon

Dad was a member of the fire department for years before I was on the department and I went with him to all the fires. He was on the department up until just a few years before I joined them in July 1924.

The fire department had sorta broken up and they were coming around asking just anybody to be on the department. I was 18 years old at the time. Later no one under 21 could join because of the insurance.

Dad helped get the money for the first fire department equipment. He got out and ran around over town trying to raise the money after the biggest part of the town burned down and people began to realize that they had need of some equipment.

They got a horse drawn fire wagon and in 1910 all the fire department had their pictures made on it. Finally the town was so small that they couldn't afford to keep the horses and driver and the department got a hand pulled cart to use in fighting fires.

I remember in 1923 when the south part of the business section burned out. Some of the things that burned were Mace's Trim shop and a feed store and Hellman's shoe shop.

It was as cold as the dickens that night and raining. Greenwood, who had a restaurant on the east side of the street opened up and had coffee all night.

That was when the fire department kinda broke up and had to be reorganized.

We had the Wichita truck when I started on the fire department but it wasn't long before they traded it and got a Napoleon and a Maxwell chemical.

The fire station was an old tin building where the city hall now stands.

Generally everyone would run when we had a fire and help push the truck to get it started. It was a cranker.

In the winter time everything froze up. I remember when old Red Smith's house burned, it almost burned down before we could get the water to it. We had to break the ice at one joint of the hose and then run to the next joint and break the ice there.

That was about the time that the Charley Donald house burned down. There was another house that burned and caught the Donald house afire. I can't remember whose it was but I know we got the furniture out of Charley's house.

Back when Mr. Oberthier had the light plant they used to blow the light plant whistle to rouse the fireboys.

Before they built the city hall they put a siren up on the tower back of the tin fire building. When they built the city hall they moved the siren up on top of it and when it burned out they replaced it with a larger one.

In 1928 we got the LaFrance. It was the first pumper we had. That made us three trucks.

In about 1934-35, during the depression, nearly all the houses in town burned. We didn't get a good night's sleep for quite a while then.

The Fox place burned, the L. R. Bradley house, Dr. Gabbott's house the Cornet place and several others.

The first real big fire we had after we got the new truck was the Bull barn.

It didn't amount to too much, after we got it out but when I got there I wouldn't have given 2 cents for it. It caught fire on the back corner and burned the back end pretty badly. That was along about

**GOOD MORAL**

It was shortly before Christmas in 1907 in the little town of Pottsville, near Hamilton, that W. J. Wisdom laid his billfold containing a \$20 bill on the counter while he checked his pocket watch.

When he reached for the wallet a short time later, it was gone and the last \$20 with it. At the time the present Chamber of Commerce manager of Stephenville was paying \$11 a month for room and board and \$20 was a lot of money.

Last week, 46 years after the loss, a farmer from that part of the state, drove to Sphenville, and with tears in his eyes confessed to the theft and returned the money.

It was the first time the two men had met since the theft and the two men didn't know each other, but the man who had taken the money when he was 13 years old, said that the good Lord knew he had done wrong and he wanted to ease his conscience.

Coach Wisdom beamed today when he said, "It's a mighty fine world, after all, and full of good people."

And it all happened on April Fool's Day. THE STEPHENVILLE EMPIRE TRIBUNE.

## The BOOTLEG Philosopher

Editor's note: The Bootleg Philosopher apparently has his tongue in his cheek this week, although there's always the possibility it could be something else, say chewing tobacco. Dear editor:

The trouble with scientists is that they're always working against each other and for every step one of em makes toward progress another one of em takes a step to head him off. We don't get anywhere.

Take the atom bomb. Here we had a fine instrument of civilization, you might say the peak of civilized ingenuity in so far as eliminatin more people at one time is concerned, civilization these days you know bein measured not only by the greatest good for the greatest number but the greatest number bumped off in the shortest time.

The atom bomb, you might say, was the ultimate dream of the first cave man who dropped a rock off a cliff on the head of his neighbor. It multiplied a man's power so many times he could eliminate people by cities instead of handfulls. It looked like we might be gettin somewhere toward scarin the daylight out of each other and coverin us into final world peace.

And what happens? We spend billions of dollars and endless hours of scientific research to get it perfected and then what?

Some scientist not willin to let well enough alone gets busy and invents a pill to counteract the effect of the atom bomb's most valuable aspect, its ability to send mysterious rays out and kill people merely by radiations. Accordin to an account I read in a paper yesterday, all you have to do now is take this pill before an atom bomb goes off and, if you're out of the immediate vicinity where the thing explodes, you're safe from the devastating radiation that used to make the bomb such a masterful instrument of slaughter.

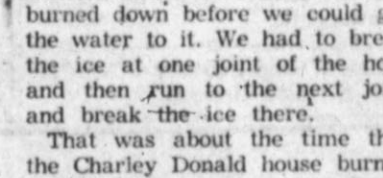

I tell you, that pill has set us back twenty-five years. Now we've got to start all over again and work out something to add to the bomb that'll overcome the effects of the pill, and as sure as we do some scientist will develop another pill to overcome that, and civilization will be right back where it was before. I wish scientists would make up their minds. We'll never get anywhere this way.

Yours faithfully,  
J. A.

(Continued from Page Four)  
1929 or 1930.

After the fire they rebuilt the back of it and fixed it up.

Then there was the fire at the Brumley Oil Company. It was down where the Conoco warehouse is now. They had the gasoline tanks up on an old wooden platform. Some way that platform got on fire all over.

It got hot enough that it boiled the gasoline in the tanks but there wasn't so much damage done. It was really hazardous though.

When the old Hereford Hotel burned we were at a football game. I don't remember what year it was but it was during the afternoon and we all had to leave the game to fight it.

The coldest I ever got at a fire was when the old McDonald place burned.

Iver and Johnny McClendon were living there and they were both members of the fire department. When the alarm sounded it woke Iver up and he saw that the house was about to fall down around him. He hollered at Johnny but Johnny said he believed he wouldn't go out that night. Iver told him he'd better that it was their house that was on fire. They just got out with their pajamas on.

It was before we had slickers and it was raining and freezing as it hit the ground that night. Boy was it cold! When we got the fire out the hose had so much ice on it we couldn't put it up. We had to leave it laying on the ground for two or three days to thaw out.

The department junked the old Napoleon when they bought the Ford pumper.

Several years ago we sold chances on the old Maxwell and gave it to the holder of the lucky ticket.

The elevator fires are really dangerous. Fraser has had two fires and Pitman has had one. They really are something.

There just isn't any comparison between the way we used to fight fires and the modern fire fighting methods and equipment.

**Embroidery Designs**

When drawing an embroidery design on material use a good black lead pencil and press with a hot iron. This will prevent the design from rubbing out so easily. Any mistakes in the design must be removed with an ordinary eraser before ironing.

## Texans In Washington

By Tex Easley

Washington, April 18.—The folks in the Sixth Texas Congressional District, extending roughly from Corsicana down to Bryan, have been given their say on national issues.

Rep. Olin E. (Tiger) Teague of College Station did it by sending out 40,000 questionnaires listing the major problems facing congress. Recipients had only to make check marks to indicate their views on the various questions.

Nearly 10,000 replies have been received and more are coming in—a response which Teague considers exceptional in view of the fact that those answering had to address their own envelopes and pay the return postage.

The first question asked whether voters wanted congressmen to vote for appropriation cuts needed to balance the budget even though this meant cutting federal expenditures in their own community, perhaps affecting their friends or themselves.

Although the final results are yet to be tabulated, the overwhelming opinion of those who have responded is that they'll take a balanced budget, even if it means local sacrifices.

In connection with the Korean war, Teague asked:

"As you know, the Korean conflict is part of a world-wide struggle with Russian Communism. Shooting wars are also in progress in Indo-China and Malaya, and a dangerous situation exists in many other areas near the iron curtain. Bearing in mind that a settlement of Korean hostilities would not necessarily assure peace elsewhere, what steps do you think we should take in Korea? (Check one)

( ) a. Train and equip a much larger South Korean Army and continue the present policy of containment rather than to risk an expansion of the war.

( ) b. Abandon Korea immediately.

( ) c. Apply all the military force at our command such as bombing enemy supply bases in Manchuria, blockading the Chinese coast, use of Chinese Nationalist troops, and use of atomic weapons in an effort to win a victory at the earliest possible time."

The replies so far show a wide split in opinion. Some penciled in notations that they thought we never should have been in Korea in the first place. The questionnaire was sent out before the latest peace overtures.

The views of the voters in Teague's central Texas district may or may not be representative of the state as a whole, but it is interesting to note that the trend of the early replies favored statehood for Hawaii—contrary to the position of most of the 22 Texas house members who voted against statehood when the House approved on March 10 a bill to make Hawaii the 49th state.

Many veterans voted for closer

scrutiny of legislation providing benefits for veterans.

**Around the Capitol**

Texas' congressional delegation is solidly Democratic, but it rates high in this Republican dominated capitol.

The top Democratic leaders of both House and Senate are Texans—Rep. Sam Rayburn of Bonham and Sen. Lyndon B. Johnson of Austin and Johnson City.

Two Texans also hold high administration posts: Oveta Culp Hobby of Houston designated as secretary of the new Department of Health, Education and Welfare, and Secretary of the Navy Robert Anderson of Vernon.

The allocations of office space and parking space for automobiles often represents a mark of distinction in this crowded capitol. Texans do pretty well in these respects.

Of course, officials in such high posts as Mrs. Hobby and Secretary Anderson have government owned and chauffeured cars at their disposal. So do Rayburn and Johnson, as minority party leaders in Congress.

About 1906 Congress built new office buildings for senators and representatives; early in the 1930s a second House office building was built, the membership of the House having increased to 435 in number.

With the construction of the buildings, only the most influential legislators continued to have office

space in the Capitol building itself.

Rayburn for more than 16 years has had his offices in the Capitol, some of the time as Speaker and some of the time as House minority leader.

Johnson now has two office suites assigned to him in the Capitol. In one is the staff of the Senate minority leader, and the other he gets for his personal use as the minority leader. In addition, he has two separate suites in the Senate Office Building, both of which are devoted primarily to the handling of Texas matters.

# Streu's Diary

April 17, 1953.

DEAR DIARY:

This is National Retail Hardware Week—and all over the country hardware dealers have been cleaning up and hunting for specials and getting ready for the annual event. Insofar as we at Streu's are concerned, every week is Hardware Week—our stocks are always clean and new—and our everyday prices are as low as is consistent with good business practices. So, may we suggest that you shop Streu's this week and every week for the widest selection of merchandise in the Panhandle.

Now, the above may sound like bragging to some of you newcomers but the folks who have lived here for a long time and who have tried all the places around the country will verify the statements I make.

Our shelves and floor space are crowded with thousands of items—items that you see advertised in the Post, Life, Journal, and all the other national publications—items that are the best of their kind—items that will give you years and years of service and good looks—at prices that are the same all over the country.

In order to bring all this merchandise together for you, we buy from suppliers from California to New York—and some of them even import items from Germany, France, Italy, England, Japan and India. All this array of merchandise in one store is not a matter of chance, but the result of many years of experience and study of the needs and desires of the people of the community.

I note that the city Dads have decided to charge the local golf club for water used on the greens—I suppose the next thing will be to charge the Campfire Girls for water used on the lawn at their hut—then, no doubt, citizens living near city parks will have to ante up for water to keep the grass and trees going in the parks—and the Hospital will no doubt have to pay for all water used. I always applaud economy wherever it rears its ugly head—and I think that golf courses and parks are useless foibles anyhow.

By the way, Streu's is still in the Television business—the grapevine tells me that some of our competitors have—or are going to close out TV. I'll admit that there have been times when I've wished I had never heard of the darn stuff, but we're too far into the game to get out now. We'll be with you for some time to come—so you can buy your RCA Victor TV set with assurance that we'll be around to fuss at in event of trouble. And you'll just get better pictures and sound from RCA Victor TV.

Which is about enough nonsense for this time—I'm happy to note definite improvement in several columns in the Brand—that "Grass Roots" is improving—possibly the guy's wife is editing now. And the "Bull" is doing better and better as it is being taken over by "guest" writers.

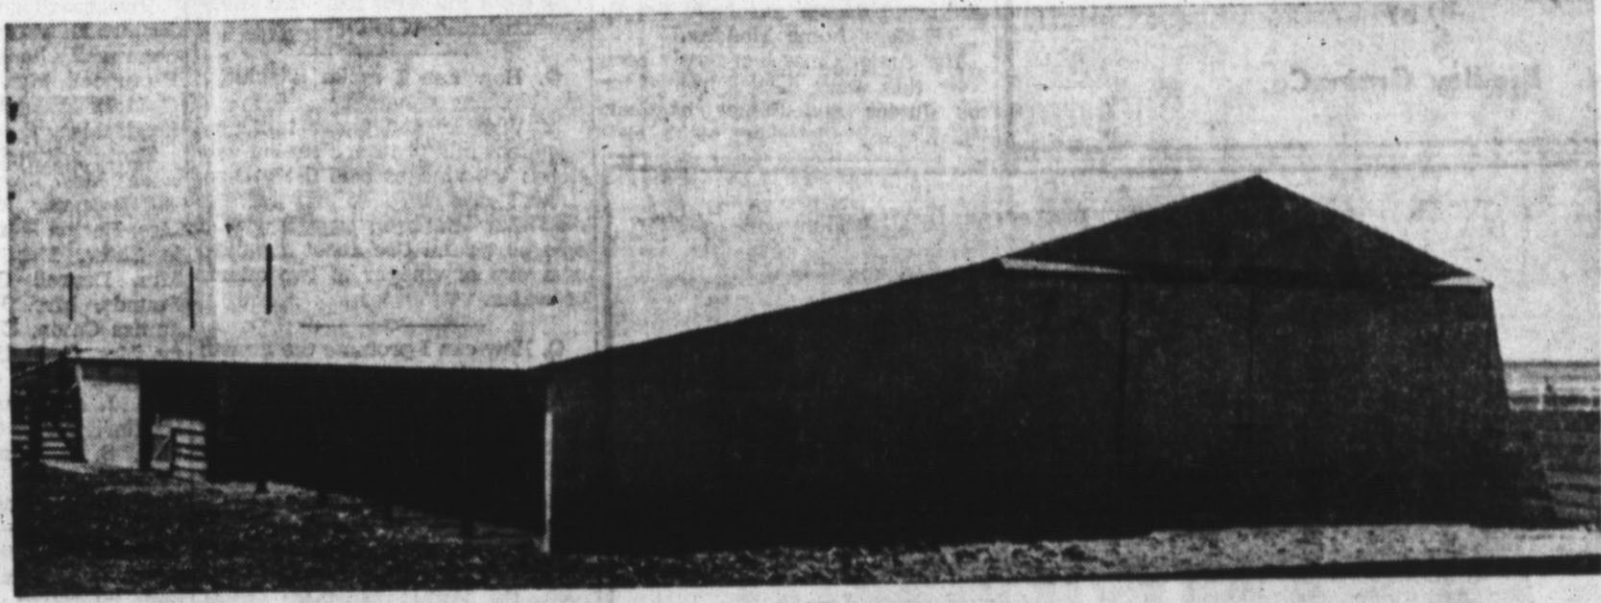

Most everything is getting better except my golf game.

Q. How can I make a solution for cleaning windows?  
A. Vinegar and water make an excellent mixture for cleaning windows; the vinegar cuts the grease. It will also help to get off the dust that has been topped with a splashing rain. Use about one-third of a cup of vinegar to two quarts of water.

Q. How can I promote the growth of the eyelashes?  
A. By dipping a soft brush in pure lanolin and touching the edges of the eyelids with it. The application should be made before retiring for the night.

It is warmer to wear two thin garments than one thick one because the air between them serves as insulation.

Pine trees are less likely to be struck by lightning because their resin interferes with their conducting of electricity.

Here is a new kind of car... the Hudson Jet... a compact, economical car with high-power performance, luxurious interiors and a marvelous ride... yet it sells in the low-price field!

This new wonder car is possible only because of Hudson's exclusive "step-down" design, which gives it the lowest center of gravity among American cars... enables it to safely handle more power in relation to its weight than any other low-priced car.

This highest power-to-weight ratio not only makes the Hudson Jet the most brilliant performer in the low-price field, it is also a key factor in its great economy... with gasoline and upkeep.

We invite you to come in, try this new kind of car—very soon!

LET'S COOK SOMETHING

"Proof Of The Pudding" In Old Tried And True Recipe

"He criticized your wine, and analyzed your meat, yet on plain pudding deigned at home to eat." Pope.

Perhaps the man Pope was thinking about Vanilla Wafer Strawberry Pudding at home, which would be reason enough for his preference. This pudding is a favorite in the L. L. Womble home and is one of those heirloom recipes that deserves repetition down through the years. Mrs. Womble got it from her mother-in-law when she was first married and has used

it often ever since.

**Vanilla Wafer Strawberry Pudding**

1 pint whipping cream  
1/2 cup sugar  
1 teaspoon vanilla  
1 quart fresh strawberries or 1 box frozen strawberries  
1 ten oz. box vanilla wafers

Whip cream, add sugar and vanilla wafers and let stand in refrigerator one hour before serving.

Note: If fresh strawberries are used sweeten them to taste before using in the pudding. The frozen

strawberries are already sweetened.

Here is another recipe Mrs. Womble uses often. It is a filled cookie that may be kept indefinitely in the deep freeze or refrigerator before cooking. It's a sort of pin wheel cookie and may be divided into small rolls and kept until you are ready to eat them. Mrs. Womble obtained this recipe from Mrs. Muek Womble of Colorado Springs, Colo., a former resident of Hereford.

**Nut-Date Ice Box Cookies**

**Dough**

1 cup shortening  
2 cups brown sugar  
4 eggs  
4 cups flour  
1/2 teaspoon salt  
1/2 teaspoon soda

Cream shortening and sugar and add well beaten eggs. Blend thoroughly and then add flour sifted with salt and soda. Divide dough into two parts and chill in refrigerator. When chilled roll each part out in rectangles less than 1/4 inch thick and spread with the date-nut filling which has been allowed to become thoroughly cooled. Roll each rectangle in waxed paper and place in refrigerator or deep freeze until ready to bake.

**Filling**

2 1/2 cups chopped dates  
1 scant cup sugar  
1 cup water  
1 cup nuts

Combine all ingredients except nuts, and cook over slow heat about ten minutes or until thick. Add the nuts and mix and allow to cool thoroughly, then spread as above directed. Leave in ice-box overnight before baking.

When ready to bake them, slice roll in 1/4 inch slices and place on greased cookie sheet. Bake in 425-F oven 12 or 15 minutes.

Social Security Man To Be Here Next Wednesday

Today, throughout the nation, 66 1/2 million persons have worked long enough to be fully insured under the social security program. This means that 66 1/2 million persons have worked at least 1 1/2 years or longer in employment or self-employment that counts toward old-age and survivors insurance. This gives at least temporary protection to themselves and their families. Those of the 66 1/2 million who become 65 or die before July 1, 1954, need have worked only six calendar quarters (about 1 1/2 years) at any time since 1937, to qualify for benefits. However, those who will not be 65 until after that date will need to have worked for a longer period in order to qualify. No person ever needs more than 40 calendar quarters (10 full years) of work. But continuous employment or self-employment is necessary to assure maximum protection and the highest possible benefits.

The Amarillo Social Security Office has a booklet entitled "Your New Social Security." It will answer most, if not all, of your questions. It is free and a request on a post card or letter is all that is necessary.

A representative from the Amarillo Social Security Office will be in Hereford, on Wednesday, April 22, 9:30 a.m. at the Commissioners Court Room.

I understand there is a marker out, mayhap a dozen of that ilk are extant, from a paid predictor, soliciting aid, from various and sundry hacks, in the compilation of an all-american something-guess for the 1953 Football season. These characters, for a considerable consideration, are willing and clamoring, to undertake to balk the suspecting sports-minded public into giving their so-termed pre-determined precasts enough circulation so that they can draw down the same cumshaw, again and again. One method of this guess is to broadcast a sectional list to sports writers, real and alleged, in various sports areas of the US and A. These selected writers, both the R and the A, then absorb the rap for their immediate territory, and eagerly, pick the allotted roster for their region, including friends, neighbors and relations, first in reverse order. In due time, the paid predictor makes his sage selection, often without any regard for the individual sagacity of the F, N and R's, respectively of the fingered hacks. Disdaining, as always, to give cognizance to those great levelers of eligibility, before and during season, they being, as always, in this day and time, in order of impor-

tance, blondes and brunettes, books and Whiskers. Among one of the protruded lists are noted these footballers of the Southwest—Run-ning Backs—Grigg and Leake of Oklahoma; Norton and Eldom of SMU, who won't get to run at all unless they throw up a front line better than the one they offered last lap: Jerry Coady of Baylor, who, last year, ran a distant second to Mr. Dupre and A. Jones, one of the many Baylor Jones boys; Clinkscale and Mal Fowler of TCU. If the Fowler that I saw against Kentucky is a running back, leave us have a recount. I scanned one predicted 1953 AA this spring and listed were three quarterbacks in one eleven, one player already declared ineligible and one army interred. Reminded me of the Basket-Ball All-Americans that had four or more centers listed on each five, which would have been fun to observe, if they ever played against a balanced ball club. Ken ye, it took the apothecary, a rerun or three, to apprise a recent squib of mine as being abusive to his ego. It took me about as long to realize that his being out of my favorite seegar was his backhanded approach at reprisal. My only hesitancy, to so classify the happening, as the above reprehensible behavior is that

# Summer School For Parents To Deaf Children Planned

A ten day session, May 27-June 6, 1953 for the parents of pre-school deaf children has been planned for and applications are now being taken. This session is to be held at the Texas School for the Deaf in Austin.

Any parents and pre-school deaf children who are residents of Texas will be potentially eligible to attend. Formerly, only mothers and the deaf child was eligible, but last year the school enrolled two fathers, so fathers are being included in the planning of the session of this school. Preference will be given to children who become six years of age by September of this year.

This summer school is not an attempt to train parents as teachers, but to help clarify the problems and development of a deaf youngster prior to his entering school. Certain educational leaders have recognized the fact that there is no place available for the counselling of parents confronted with deafness of their child and their need for medical, psychological, and educational counselling. This summer school is being planned to present people of authority who are professional in each of these areas.

More information concerning the summer school may be obtained by calling the State Department of Public Welfare in the Deaf Smith County Courthouse, or by writing to the Texas School for the Deaf at 1102 South Congress, Austin 4, Texas.

Anyone in the community knowing of a deaf child and his parents should make this information available to them. Incidentally, the only cost to these parents and their deaf child is the transportation to and from Austin.

Sponsors of this summer school are the University of Texas; Texas Educational Agency; Texas State Health Department; the Hogg Foundation; the Texas School for the Deaf; and the Department of Public Welfare.

# Graham Speaks at Adrian PTA Meet

George Graham, superintendent of Hereford schools, was guest speaker at an athletic association banquet given by the Adrian PTA Thursday night in the Sims community house.

The Studycraft Club served the group. An Easter theme was carried out in the decorations.

Mrs. T. W. Perrin gave the welcome address and the high school girls' chorus presented two numbers.

Presentation of awards went to 14 girls and 10 boys.

such a degree of subtlety would be a pinnacle beyond the reach of his peak of performance, I thought. Anent, the apothecary, further, I'll give you 6-2-even, that his present dilemma is just that or even more so. This perplexer arose, I am assuming, when the city dad's legislated against further free water being accorded to the pasture pool devotees on the local niner. He would be torn between pleasure and profit, since he pursues the pellet piquantly and his partner, in the paying emporium, is a participant in the pact to preclude non-paying plying of the hose at the puff, pitch and put course. I would opine that the defense of his teetering position, elicits from him, a froth of conversation, two sided and edgy. Incidentally, what is this nigger program, be they trying to retrieve thusly, the city manager's salary and expenses???? Bad Browling, who clocked off several championships as coach of the Phillips 66's, is going to assume the helm next season. Tom Scott, ex-coach, lost only 5 games out of many, but he dropped an early round game in the AAU, which apparently is not considered allowable in the Phillips advertising scheme.

Mr. and Mrs. Carlos Vaughn left Friday for Shamrock to attend the American Legion convention being held there this week end. They will visit in the home of his cousin, while in Shamrock.

HAS A MECHANISM IN IT. MAYBE IT'S A KIND OF RADIO TRANSMITTER.

4

MAYBE THEY'RE SIGNALLING SOMETHING. BUT WHY DON'T THEY MOVE?

I WONDERED ABOUT THAT. OUR GRAVITY IS TOO MUCH FOR THEM. THEY CAN'T MOVE! THEY'RE STUCK!

5

REMEMBER, THAT METAL RING WAS SO LIGHT. THEY MUST COME FROM A LIGHT PLANET --Hey--

Oh--HE'S MOVING HIS HAND--
