

AROUND TOWN SIGHTS, FACES SEEN

J. A. Buckner once said that the name of McKinley should be changed to "Dog Street," which might not be amiss as regards the title of this column.

Gaston Beer's dog, Cuddles, an Eskimo spitz, which was known around town for the past sixteen years was killed in a car accident in front of the post office.

Jackie McCracken's and Joe Will's dogs, "Spot" and "Rags," visited the tonorial parlor with amazing results. Spot, a brown collie, is now white, and even the neighbors can hardly recognize Rags. Anyway, Spot no longer has spots and Rags is far from ragged. Jackie says they have "crew haircuts" but they look more like Bob Higgins might have gone berserk with his sheep shearing machine.

Even veterinarian Jack Oilliland is reported to have had trouble with his Boston Bull, "Eddie," who is now completely recovered.

Moving uptown, we find a new paint job inside the Western Flower Shop. A nice, cool, pale green with white woodwork and shelves.

The Deaf Smith Riders are probably the most unhappy people in town. They traveled to Clovis last week-end to participate in the Pioneer Day Parade—and a little boy ahead of them carried a sign inscribed "Littlerfield." As a result, news items appearing in the various papers omitted mention of the group and gave credit to Littlerfield. Next time, the Riders plan to have some flags and signs, for they are firmly convinced that advertising does pay.

Speaking of signs, the Hotel Score Board recently erected at the intersection of Main and Second Street, is attracting considerable interest. Several businessmen have their eyes on the board for use as a news board after it has served its present purpose.

Mr. and Mrs. E. M. Cox received an unexpected telephone call Monday from Mrs. Alice Luckett, a guest in the R. A. Freeman home. Luckett explained that she brought "greetings and best wishes" from their son, Captain Jack Cox, enroute from an Ohio airfield to California. Mrs. Luckett happened to be sitting with Captain Cox on the train which was delayed four hours last Sunday. She agreed to deliver Cox's message when he was forced to leave Amarillo without a stop-over. Mrs. Luckett finished the trip via bus.

Old Timers at home again are Mr. and Mrs. R. L. Bailey, who returned last week after a year in Brownwood. They were accompanied by a son, Ragdale, and a daughter, Tiajuana. Bob says they are now home to stay, adding that he has moved away five times and has always come back.

Newcomers to Hereford this week include Mr. and Mrs. L. E. Gross of Lockney. Mr. Gross assumed duties Monday as teller in the First National Bank. He has been with the First National in Lockney for the past three years, after service in the U. S. Navy. They have one daughter, Elizabeth, age 10, and are members of the Methodist Church.

E. O. Jordan is a new employee at Hereford Lumber Company. He comes to Hereford after twenty-one years with the Panhandle Cash and Door Company in Amarillo. He is accompanied by his wife, who is a member of the Baptist Church.

Fire Department To Get Help In Long Range Plan

Promise of adequate fire protection facilities in Hereford was made today by Mayor W. E. Dameron, following what he termed as a "lengthy session" of the City Council. The discussion hinged on points recommended by the Texas Underwriters Association, resulting from a recent survey and a raise of two cents in the key insurance rate for Hereford.

We are working on a long-range program which will furnish a detailed report on the entire plan in the near future, Mayor Dameron said, adding that the council wishes to check plans carefully with their engineers before releasing details. Among other points, council members discussed purchase of new fire-fighting equipment recommended in the Underwriters report, the addition of two or three paid, full-time firemen to supplement the volunteer department, and improvement of water pressure and number of fire outlets. Mayor Dameron said the council favored action along these lines as soon as possible.

Flood Makes Vanport City a Ghost Town

This aerial view of Vanport City, Ore., shows the devastating wreckage of the nation's largest housing project, with debris and whole six-unit, two-story apartments floating in the murky floodwaters of the Columbia River. Arrow points to the breakthrough in the dike wall that surrounds the city. Damage was estimated at \$27,000,000.

Wheat Crop Estimate Doubled By Recent Rain In This Area

Prospects on 1948 wheat yields in this territory are approximately double anticipated yields of two weeks ago, according to estimates indicated by grain dealers in a survey made Thursday morning by The Brand. The increased yields are attributed to recent rains. A. W. Erickson, crop reporter who travels over the entire wheat belt, predicted a yield averaging twelve bushels per acre on 250,000 acres—a total of three million bushels for Deaf Smith County.

Hereford Beats Tulia 8 to 7 In Wild Game

Hereford crippled over to Tulia last Sunday, minus two star ball players—Bud Stengel regular catcher who was injured in the Hart game and Jno. Renner third baseman who had a bum knee—it looked like a bad day for Hereford. Bill Stengel started behind the plate for his first attempt at catching and Wendell Burdine in left field for his first game in hard ball. Chris Clark was in right, Carroll on second and Lueb on third with Manager Pete Carmichael the only man on the bench or should say substitute, because Pete is nester on the bench, he is always hustling. Winkler fired in and there for 6 innings allowing five hits, Anderson took over in the seventh and allowed 2 hits.

Red Cross Offers Life Saving Class To Hereford Area

A Red Cross Life Saving School, sponsored by the Red Cross and under the direction of Bud Brady, will begin Monday morning at 9 o'clock at the J. A. Pitman Farm, Southeast of Summerfield. Brady, water safety instructor for the Red Cross, said that only persons who can swim, and preferably those 18 years of age or older, will be admitted to the course at the present time. At a later date, when the swimming pool is opened and sufficient instructors are available, swimming instruction will be offered.

Life saving experience will be valuable to members of the class who desire to receive a senior life saving badge. Ben Plummer and Jack Simmons will assist Brady in teaching the life saving course. Brady urges interested persons to talk to him in person. Further details can be obtained by calling telephone No. 448 during the day and 336R at night.

Date For Opening Swimming Pool Is Still A Question

Just when Hereford's new \$60,000 swimming pool will open is a question—but no longer a \$50 question. Due to weather conditions and scarcity of materials the City Commission is reported to have released the contractors from their forfeit clause of \$50 per day after June 1, as originally specified. City officials said they still do not have sufficient help to operate and maintain the pool, but that it will be put into operation when completed. They refused to make an estimate as to any possible opening date.

Youth From West Indies To Realize Dream This Summer On Easley Ranch

Hereford will have its own practical application of the "Good Neighbor" policy this summer, thanks to Mr. and Mrs. Oscar Easley, whose interest in boys does not stop with their own two sons. It all started when Jimmie Easley, a student at Texas Tech, became friendly during the past year with a classmate, Albert Troost, who came from the Dutch West Indies. Both boys are majoring in animal husbandry, and both are intensely interested in cattle and ranching. Young Troost was anxious to work on a ranch this summer, and since Jimmie expected to be working on the Easley ranch near Santa Rosa, N. M., the Easleys have welcomed the young man from the West Indies into their home. It is their plan that Troost share and share alike with the Easley boys. The Easleys, in turn, report that they are enjoying the contact with Troost, who has a cosmopolitan background.

He was born in Mexico, spent two and one-half years in Holland and three years in Cuba. He has a brother attending school in Colorado and a sister attending school in Virginia. Albert Troost has been an American citizen for the past two years, and says his ambition is to be a normal, upright American boy—an ambition which the Easleys, Oscar, Grace, Jim and Joe, are trying to help him attain.

**MOSCOW**—(AP)—Honey is being used successfully in the Soviet Union to treat stomach ulcers, says the newspaper "Evening Moscow." About 250 patients suffering from ulcers have been treated in the Goumou, Basman and Moscow garrison hospitals, the paper says. About 250 grams of honey were given the patients for periods of 14 to 15 days. In many cases pains disappeared after the first day. About 80 per cent of those treated had their ulcers healed by the honey treatment. The article says honey was used during the war in treating wounds and that considerable research and experiment has been since conducted along these lines.

**INDIAN EYES SOUTH AMERICA**  
**MADRAS, India**—(AP)—Sir C. P. Ramaswami Aiyar says "there is tremendous scope for colonization of Indian Nationals in South America." In most parts of South America, he says, there is hardly one house to a square mile and the climate there is more or less like India's. Aiyar had just returned from a lecture tour of North and South America. He visited Brazil, the Argentine, Peru, Panama and Mexico. He suggested the India government take up the question of Indian colonization with South American governments.

**GIVE TO CONQUER CANCER**

If it takes you three minutes to read this message, someone will die of cancer before you're finished. Yes, 188,000 Americans... one every three minutes... will die of cancer this year.

**WHAT EVERYBODY SHOULD KNOW ABOUT CANCER:**

**1 OUT OF EVERY 8** is doomed to die of cancer, according to vital statistics. But this high rate can be reduced by millions of lives through knowledge and prompt action. **CANCER IS CURABLE** in early stages. If you act in time, records indicate your chances are close to fifty-fifty of being cured. For example, 9 out of 10 cancers of the skin or lips can be cured if treated early.

**LEARN TO RECOGNIZE** the danger signs that may mean cancer has struck or is about to strike.

**SEE YOUR DOCTOR** at the slightest suspicion of trouble. His diagnosis should tell whether treatment is required and what to do.

**ACT IMMEDIATELY** to protect yourself and family. **TELL YOUR FAMILY AND FRIENDS** what they can do to safeguard themselves against cancer.

**READ ALL YOU CAN** to keep informed, not only on cancer, but on all subjects related to family health. Knowledge plus action saves lives.

**How Your Dollar is Spent**

**RESEARCH**

25c of your dollar is devoted to the support of the national research program to learn more about the nature, cause and cure of cancer.

But we don't have to wait for research to save at least one-third of the thousands of cancer patients who die every year. Therefore,

**IN OUR STATE**

60c stays in Texas to teach people how to protect themselves from cancer and to help communities provide facilities for diagnosis and treatment and for the care of the cancer patient.

**NATIONAL PROGRAM**

15c goes to the national organization to help support national education programs and other national activities.

 field, Carmichael who took over the catching in the second inning and batting in Chris Clark's place, filed out to right. Raymond Lueb bused one into center field that the catcher missed up and it went for a home run. Stan Barrett didn't want to be behind so he crashed another one a country mile for a home run and we had three runs and the old ball game was tied.  
 The sun was beaming down and everybody was as hot as a hound dog in a rabbit chase in July. It was so quiet you could hear a pin drop, until the first of the sixth. After two were out L. J. Clark swung on a three-two ball that was up and out so far that Tubby Robinson could have made it around, and we had them down 4 to 3.  
 Anderson went in for Winkler in the seventh, and Winkler went to right field for L. J. Clark. Andy didn't have any trouble in this frame, but Craig, the Tulsa pitcher did, Winkler, the first man up singled, then Carroll belted his second home run of the game and we had them 6 to 3. That was all for that inning.

 Last week an error was made in listing new people on new jobs. Mrs. Ann Knox was listed as working for Dr. Graham, dentist, instead of Dr. Adams, optometrist—which is alright unless you happen to have a toothache.  
 Mrs. Waldo Jennings also called to say that it was Mr. Jennings who was driving the Jennings car which injured Miles Blanton last week. The accident occurred when the small boy was playing in the Jennings driveway.  
 The boy acquits are \$18.50 richer this week, thanks to Sheriff J. C. Reese. The Sheriff wandered into a poker game unannounced and confiscated the money from the gamblers.  
 Sheriff Reese says that local merchants should be ever cautious and vigilant in cashing checks for strangers. He reports that forgeries are increasing steadily, not only in this area but throughout the nation. The Sheriff said that law enforcement officers in both Omaha and Oklahoma City stated that forgeries were on the increase. (He went through the latter city on his trip to Omaha last week to return a forgery suspect. Story is elsewhere in this week's paper.)  
 Reese said that requiring proper identification would solve much of the forgery problem.

### The Bootleg Philosopher

Editor's Note: The Bootleg Philosopher figures he has a better plan for getting Harrison Highway paved than sending delegations to Austin. If his plan fails, how about sending a delegation of women from his neck of the woods?

Dear editor:

I been makin in the copies of the newspapers I've picked up lately out here that the state candidates are busy again and the promisin business is boomin.

Now there ain't nothin wrong with promisin, done a lot of it myself, I'm in favor of it, keeps a man lookin to the future and a woman from throwin a skillet in lots of instances, but I have been thinkin.

I remember as plain as if it was yesterday that two years ago every candidate for office was gonna pave thousands of miles of country roads, but I can't get to town on Harrison Highway any better now when it rains than my granddather could. And since I notice the candidates are promisin more roads again this year, I have hit on a plan, and will appreciate you joinin me.

When a candidate tells me he's gonna gravel so many miles of country roads in the state and pave so many others, I intend to compliment him and then pin him down. "WHERE you gonna build them roads?" is gonna be my next question.

When he starts to say he will consult with the engineers and draw up plans and map out the details and appoint a special committee, I'm gonna pull out a map right then and invite him to sit down on a log and take a pencil and draw off just exactly where he's gonna build them roads.

I'd rather have the promise of a road than no promise, I reckon, don't make no difference if the mud is just as deep either way, but I'm sort of gettin tired of them vague, over-all promises that gets everybody to believe a road is gonna come by their mail box and it winds up being built in the north end of some county 200 miles away.

What I want to know of all the promisin candidates from now on is

## Texans in Washington

By TEX EASLEY

WASHINGTON — The giggling and busy chatter of children at play will echo for the first time through the marble halls of Great Britain's stately embassy here soon.

Caroline and Allison, cherub-faced little daughters of England's new Ambassador to the United States, Sir Oliver Franks and Lady Franks, are the first youngsters to live at the massive stone mansion on Massachusetts Ave., since its construction in 1930.

Bronze-haired Caroline, 8 likes to swim and will probably make excellent use of the pool in the Embassy's garden. Blond Allison, 3, is fond of flowers, asks their names and remembers them. She will enjoy the many fine varieties with which the well-planned gardens are stocked.

"Lulu", Caroline's ginger-colored cat will also be made to feel at home. She can bask in the sun on the wide terrace of the embassy.

Caroline likes to read. When her friends come to visit, she finds them a book so they can entertain themselves. Allison has a tricycle and is hoping for a bike.

The wife of the young, former provost of Queen's College, Oxford, was born in Glasgow. She has been described as "so retiring that even a small dinner party can sometimes be a chore for her."

Lady Franks' parents were "west-country" people and when she was 10 they returned to Bristol, England, where her father, until his retirement, was managing director of a big firm making paper bags and cardboard boxes.

When Sir Oliver joined the Ministry of Supply at the outbreak of World War II, Lady Franks worked at the Royal Institute of International Affairs, in the section dealing with the German Press. She later became deputy borough and county organizer for the Women's Voluntary Services, in charge primarily of clothing.

Sir Oliver, who was 45 years old on February 16, is the second youngest Ambassador ever to be appointed to the United States by Britain. (The youngest was Sir Auckland Geddes, appointed March, 1920; who was 40.) An economist, with a broad knowledge of the Marshall Plan, Sir Oliver has never before held a diplomatic post. He has spent most of his adult life as an academician. He was graduated from Queen's College and taught philosophy there until 1937, when he became a professor of philosophy at the University of Glasgow. He was a visiting professor at the University of Chicago in 1935. He knew Americans well in the war, but his final breaking-in for his new job came last fall when he spent a couple of months in Washington, to answer questions about the recovery plan he submitted.

TWO DES MOINES FARMERS BUILT TRACTOR FOR \$600

DES MOINES (AP) — Two Manocenters farmers have a tractor they built themselves after a visit to junk yards and used car dealers. Carl Antons and his brother-in-law, Lester Childs, needed a light, speedy tractor for hay baling. Unable to find anything to suit their needs, they built their own machine for about \$600.

Features of their tractor include two speeds in reverse instead of the usual one, and a five-speed transmission, which, combined with a two speed rear axle, gives the tractor 10 speeds forward, from one to 35 miles per hour.

just one thing, WHERE you gonna build them roads, after which I can do some intelligent votin.

And if everybody else in the county would join me, we might get the candidates pinned down to committin themselves to a definite, down-in-black-and-white set of roads, not just roads implied with a sweep of the hand and a thrust-out jaw. There just ain't no satisfaction left in hearin a candidate promise thousands of miles of road and millions of dollars. All I want to know is he gonna pave my road from my mailbox to the highway.

I got my map of the state road along with a pencil and am waiting for the next candidate to show up. Will report on what he has to say.

Yours faithfully,  
J. A.

In the eyes of millions of Tibetans and other orientals, the American custom of a wife having only one husband at a time is highly immoral.

There are an estimated 3,000,000 habitual golfers in the U. S.

It is estimated that more than half a million people die in the U. S. every year from causes brought on by high blood pressure.

About 65 per cent of deaths attributed to hypertension involve the heart.

In British show business, a singer or musician who performs well is known as a "nice bloke."

In the Los Angeles area, there are public booths where anybody can get his blood pressure reading for 25 cents.

Hanna were held up by Benton Howell, Carney, Oklahoma, and Claude Williams, of Chanute, Kansas—who had been extended the hospitality of the former's camp the previous night—a

posse started pursuit—Sheriff Ross drove from Bovina to Texaco—he had been there less than half an hour when he saw two horsemen traveling toward the State gate—the recognized Mr. Cox's horse—called to them to hold up—Howell asked what he wanted—"I want you," "You can't get me," replied Howell, reaching for his rifle (stolen from the camp). ### YOUTH HOSTELS PROVIDE LOW-COST TRAVEL LODGING

WASHINGTON—Young Americans will take to the highways this summer when thousands traveling "under their own steam" and inexpensively will bike and hike and bus it all over this country and others as well. They will be aided in their adventures by the American Youth Hostels which provide cheap overnight accommodations, planned itineraries, and trained leadership.

All hostellers carry a youth hostel pass. For those under 21 the pass is \$2. For those under 21 it's \$3. A foreign travel sticker for those going abroad costs fifty cents.

In the United States some 20,000 "young Americans between 4 and 94 held AYH passes in 1947 and 57,160 "overnights" were recorded in 200 hostels scattered over 28 states. The hostels are usually farm buildings with separate dormitories for boys and girls, kitchens where the hostellers can prepare their own food, and recreation rooms for singing, square dancing and other games.

Hostellers provide eating utensils, and a sheet sleeping sack to take the place of the usual bed linen. Hostellers do their own cooking and house keeping, have lights out at 10 p. m. and rise in time to tidy the hostel and get an early start for their days trip.

Hostellers may travel alone, or in groups. The group is a co-educational unit of 10 people with a trained leader. A \$15 registration fee must accompany each application before the applicant is considered for group membership. Trip expenses include this fee, transportation, food, lodging, organization and leadership expenses. AYH emphasizes that hostel trips are "not plush suitcase tours."

In 75 years, the New York Society to Maintain Public Decency has confiscated 203,250 pounds of obscene books and paper stock.

The open-hearth furnace for the making of steel was invented by William and Frederick Siemens in England in 1856.

In searches for oil, more than 30,000 wells were drilled in 1946, compared with an average of 23,700 during 1942-45.

If brevity is the soul of wit and stylists continue the trend in bathing suits, there will be a lot of laughter at the beach this summer.

Gloria Swanson of the silent days of the cinema, said recently that men should don garters, be manicured and do something about those over-the-eye "detective appearing" hats. Now we understand why she was in the silent movies.

Ask a man when he was born and he will tell you the year. Ask a woman and she will tell you the day.

## Buoyant answer to Back Road and Boulevard

White sidewall tires, as illustrated, available at extra cost.

REMEMBER that rough patch of road up yonder where the ruts and ridges make a washboard seem smooth?

Recall the tiring tenseness brought on by the drum and hum of road noise and tremor even over smooth concrete highways?

Well, clock away the miles in this stunningly styled Buick — and meet up with the sweetest answer to such matters this side of cloud cruising.

"It's a ride that's soft and smooth as velvet," folks tell us. And we tell them it comes from a host of things.

It comes from the ample road-weight of a two-ton car built low and wide — and so beautifully balanced it handles light as a baton. It comes from the leveling buoy-

ancy of Buick's all-coil springing which puts a pillow of deeply coiled steel at each wheel to soak up the bumps and ripples.

It comes from the softness of bigger, lower-pressure tires that cushion away road tremors and roughness — from the sure-footed, swerve-free steadiness of Buick's extra wide Safety-Ride rims, widest in the industry.

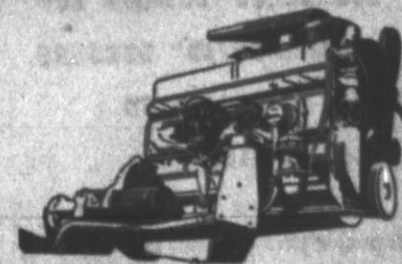

And it comes in special measure from a brand-new engineering gem we call Vibra-Shielding which banishes vibration build-up.

Here for the first time you're freed from the motoring fatigue brought on by tiny tremors piling up into bigger ones. Here your miles are made moss-smooth and quiet — long journeys become mere jaunts.

So why delay knowing the most buoyant answer to any road you ever traveled?

Come visit us now. Know at first hand the distinctive styling, the flashing action, the velvety ride over highway and byway that are Buick's and Buick's alone.

Then follow your heart's desire and get your order in promptly. We'll take it in proper sequence whether or not you have a car to trade.

REASON FOR THE VIBRA-SHIELDED RIDE

Placed with scientific exactness, 3 full cushions of special composition cradle the engine as it is to control its vibration frequency. Engine vibration is thus kept "out of tune" with those that might come from other parts of the car. The result is to shield occupants against living pulsations, cut road noise, make engine vibrations almost imperceptible and motorize practically fatigue-free.

### George Hooker's Sister Passes Away

George Hooker and his daughters, Mrs. Roy Crutchfield and Mrs. Donald Roberson, went to Oklahoma City last week because of the death of Mr. Hooker's sister, Mrs. Ida Outcalt.

#### The Bare Facts

Two-year-old Gary Olsen, "captured" by Chicago police on a charge of "escaping his baby-sitter," gives Desk Sgt. John Rochfort the bare facts of the case. Officers Leo Matrose and Tom Burke stand by. Gary was "sentenced" to two glasses of milk, a bag of potato chips and a trip home to the baby-sitter.

#### PITCAIRN SCHOOL IN TROUBLE

AUCKLAND, New Zealand - (AP) - Pitcairn Island's first school teacher is having a headache getting his prefabricated schoolhouse to the island. Meanwhile descendants of the Bounty who have waited 150 years for a school will just have to be patient. New Zealander A. W. Moverley, under contract to the British Colonial Service, left New Zealand in March for Pitcairn via Suva, Fiji, to set up the first school for the islanders. With him went his wife and daughter.

#### Loveless Gets Research Award

LUBBOCK—Howard Loveless, a Texas Technological college student from Friona, has been granted a teaching and research fellowship at North Carolina State college, Raleigh, to begin Sept. 28, 1948. Loveless is scheduled to take a B.S. degree in August, 1948, from Texas Tech in textile engineering. During his senior year, he has worked as a student assistant in the textile department and has been in charge of several undergraduate textile laboratories. At North Carolina State he will teach and pursue graduate study in the yarn manufacturing department. The fellowship has a limit of two years.

#### COLORADO MUSHROOM FARM DEFIES ADVICE OF EXPERTS

DENVER - (AP) - About 25 years ago some agriculture experts told Charles W. Savery mushrooms could not be grown profitably in Colorado's high and dry climate. But Savery rigged up some caves under a viaduct. He began to have hopes of a going business when the chief of police called to say citizens objected to fertilizer being hauled through the streets every few days, bound for the mushroom caves. So Savery bought a hilltop farm seven miles north of Denver. Then he and his son Robert, went back to Chester County, Pennsylvania, and really studied the mushroom business. Now the farm is one of the three largest mushroom producers in the west, turning out 2,700 pounds of buds daily.

They are still in Fiji. He wrote a friend in Auckland.

"The overhauling of the ship is causing delay. The loading of the buildings, furniture and equipment will take time. Then we have 3000 miles of difficult navigation, followed by the headache of landing everything on a dangerous beach, lifting it up a 300 foot cliff, and then finding a school site where the grade will not exceed one in six on this precipitous island."

Moverley has three Indian builders from Fiji with him and labour for building the school will be found on Pitcairn. The work is expected to occupy several months once the site is found.

As a Texas plainsman, the only value we can see in mountain climbing is to get a better view of the great plains below.

#### REDS PUSH RADIO PRODUCTION

MOSCOW - (AP) - A new type of five-tube home radio receiver with shortwave has been put into production at a Riga factory. The USSR "Pravda" reported, is now in the midst of an intense radiofication plan for the whole nation. More than 7,000,000 "radio points," including wired speakers and regular tube receivers, are functioning in listeners' homes and millions more are planned in the next few years. Listeners pay a small listeners tax.

### Ann McCabe and Bill Carthel Are Married in Double Ring Ceremony

A tower of pink roses formed the background for the double ring wedding ceremony performed for Ann McCabe, daughter of Mr. and Mrs. H. V. McCabe of Dawn, and Bill W. Carthel, son of Mr. and Mrs. Wayne Carthel of Dimmitt. The ceremony took place in the home of the bride's parents Tuesday afternoon, June 1. Mr. McCabe gave his daughter in marriage. Miss Earlene Eustace of McLean attended the bride and Jim McCabe, brother of the bride, was best man. Wedding music was furnished by Mrs. Ray T. Stewart who sang "Because" and "Indian Love Call," accompanied by Miss Eustace. Bill McCabe, brother of the bride, sang "I Love You Truly." Miss Betty Elliott, cousin of the bride, played "Clair De Lune" and the traditional wedding marches. The bride wore traditional white satin with deep lace yoke with seed pearl trim and long bodice buttoned down the back with lace covered

buttons. The long sleeves came to a point over the hands. The veil of illusion, held by a band of orange blossoms fell over a long full skirt. A pearl necklace was her only adornment. Her bouquet of white and yellow rosebuds was tied with white satin ribbon streamers. Miss Eustace wore orchid chiffon and carried a nosegay arrangement of white roses and sweet peas with yellow and white satin streamers. Shirley Carthel, small sister of the bridegroom, carried the rings on a white satin pillow. She wore pink taffeta. A reception followed the wedding. White roses and sweet peas decorated the bride's table which was centered with tall white tapers. Patricia Walton and Dorothy Carthel, sister of the bridegroom, served punch. Mrs. Floyd Tomlinson, of Canyon, aunt of the bride, served cake. For the wedding trip the bride wore a pastel blue woaden suit with a pink hat and white accessories. The couple will make their home near Plainview where Mr. Carthel is engaged in farming. Mrs. Carthel is a senior music student at West Texas State College, Canyon and is a talented musician. Mr. Carthel graduated from Dimmitt High School and served two years in the armed forces. Among the close friends and relatives who attended the wedding were three grandparents, Mr. and Mrs. H. E. McCabe of Amarillo and Mrs. Mary Byrd of Dawn. Also present were Mrs. Taylor Golden of Amarillo, grandmother of the bridegroom and Mrs. G. Harvey Desh of Amarillo. Prenuptial parties honoring the bride included a tea shower in the home of Mrs. Iverson Leake of Canyon with Mrs. Floyd Tomlinson as co-hostess. Mrs. Ray T. Stewart, Mrs. Floyd Walton and Mrs. H. H. Miller of Dawn were also hostesses for a shower for Mrs. Carthel.

### Rev. Wear Explains Democratic Process To Vega Kiwanis

Every citizen should take an active interest in governmental problems and the problems of the day, Rev. Bob Wear, pastor of the Church of Christ, told members of the Vega Kiwanis Club at a luncheon June 2. Discussing the subject, "We, the People," Rev. Wear declared that the state is the servant of the people and must never be permitted to become their master. He said that Americans must be diligent in their efforts to preserve and perpetuate the democratic way of life. The minister emphasized the importance and necessity of the American representative form of government. He quoted the preamble of the constitution as valid statement of reason for the establishment of such governmental institutional organization.

### RUSSIANS DESIGN FLAG FOR 'EAST' GERMANY STATE

BERLIN - (AP) - Reports in the Socialist press state that Russian preparations for setting up an eastern Germany state have advanced to the point of mass-producing an "East Germany" flag. The official "Social Demokrat" reported that the flags were being manufactured in textile factories in Saxony in anticipation of the proclamation of an eastern Germany government. This preparation was preceding, the newspaper claimed, while Russian propaganda was assailing the U. S. and Britain of "Separatist" actions in plotting the creation of a Western Germany government. According to the "Social Demokrat," the Russian zone flag is red, black and white—but mostly red. "Production of flag models," the newspaper said, "was undertaken under special precautions of secrecy. All who worked on it were sworn to silence. In addition, they were told the product was for export."

Those assuming office were Mrs. O. H. Culpepper, president; Mrs. Clyde Russell, vice-president; Mrs. Jack Wilson, recording secretary; Miss Lilye London, corresponding

A business session followed the installation service and group meetings were announced for June 16 in the homes of Mrs. Earl Phillips and Mrs. Roy Smith.

The butcher who dropped 100 feet the other day, without being injured, must have dropped pig's feet.

They call the newest modes in women's clothes the "New Look," but to men it doesn't call for a second look.

## MARKETS

(USDA)—Most farm products brought steady to strong prices at northwest markets last week, except for wheat and milo losses, reports the United States Department of Agriculture Production and Marketing Administration.

Heavy receipts of new wheat dropped prices to \$2.33 per bushel at Texas cotton points Monday, the lowest since last August. Milo declined 12 cents to \$3.68 to \$3.73 per hundred pounds as the new crop started moving from south Texas. Oats were stronger, around \$1.39 to \$1.32 at Fort Worth. Barley gained about 4 cents as corn declined as much.

Except for occasional weak spots on lower grade cattle and stockers, markets reported steady to stronger prices for slaughter classes so far this June. Light receipts last week were just about half as large as for the same period last year, but Monday's run was heavy. Good demand took common and medium cows around \$17 to \$21.50 at Texas markets, while medium and good cows ranged from \$22 to \$24.50 in Oklahoma, Colorado, and Kansas. Heifers reached an all-time high at \$33.25 at Denver.

Hog prices were fully steady to stronger at most southwest markets Monday, reflecting a decline in last week's supplies and continued good demand for pork. Best butchers brought \$23.75 at San Antonio; \$24 to \$24.50 at Fort Worth and Oklahoma City; \$24.25 to \$24.50 at Wichita and \$24.50 to \$25.50 at Denver. Sows ranged mostly from \$17 to \$19. Last week's trading in southwest egg and poultry markets showed some improvement. Monday's prices held this firm tone with lighter supplies of farm eggs quoted at 36 to 38 cents per dozen.

### Latin America Makes Demand for U. S. Machines

by SIGRID ARNE

WASHINGTON—Below the Rio Grande, from Mexico to Argentina, there are men, both in and out of the government, who resent the chunks of American aid going to Europe. Latin resentment on the subject is one of the large hurdles the State Department has ahead of it in keeping friendly relations to the American plan for keeping the peace and rebuilding the war-torn sections of the world.

much of it charity—is going to another portion of the world. It is rather because the Latins want American machinery to build up their own manufacturing industries. And they fear that the Marshall plan for Europe will send most of the United States extra machinery across the Atlantic and that little machinery will be left to ship south to the Latin countries. And there is another difference. The Latins are not so much interested in aid-free help—as they are in just the right to buy machinery which is now very short in the world. Many of the Latin nations are able to pay cash if they can just get the allocations.

In conference after conference they have made this plea for machinery. At the United Nations, at the Havana conference on world trade, and at the recent Inter-American conference at Bogota, the Latins

### Scout Leaders Attend Camp At Constantin

The activities section was designed for scout program directors and covered such skills and activities as axmanship, pioneering, rope work, tracking, sanitation, cooking, nature lore, etc.

J. L. Lookingbill, 75 years old, and a Deaf Smith County resident since 1920, died at the Deaf Smith County Hospital June 3. Funeral services were conducted June 5 in the First Baptist Church and burial was in the West Park Cemetery under the direction of Black Funeral Home.

Mr. Lookingbill was born August 14, 1872, in Leon County and moved to Deaf Smith County in 1920 from Hall County. The Lookingbill family moved to Hereford in 1944.

Mr. Lookingbill was united in marriage to Miss Grace Kelly, on September 20, 1896 at Decatur. They celebrated their Golden Wedding Anniversary in 1946. Mr. Lookingbill was a member of the Baptist Church. Mr. Lookingbill is survived by his wife, six sons, two daughters, fourteen grandchildren and four great grandchildren. His children are: Mrs. Homer Crow, of Happy; Mrs. Ruth Adams of Hereford; W. A. T. W. and Harry Lookingbill, all of Hereford; L. H. and L. B. Lookingbill of Summerfield; and C. L. Lookingbill of Amarillo.

### CATHOLICS, CERCHS GET TOGETHER

PRAGUE (AP)—State authorities and Catholic Church officials have come to an agreement that members of the church would not be required to serve in volunteer labor brigades and battalions that work on Sundays on building projects in mines and industry, and in forestry work unless they are called out in emergency.

The question was a sore point because the administration called for workers to come out on Palm Sunday for a national volunteer work day. In Bohemia and in Moravia the workers turned out, some Catholics among them, but the clergy was distressed. In Slovakia because of the religious holiday, the national volunteer work day was postponed until after Easter, but church and state officials began a series of conferences on the program.

Catholics will be permitted to work on Saturdays or other weekdays instead, under the new agreement.

have argued that they must have the machines to set up some manufacturing industries. Historically, the Latin nations have supplied the industrial nations to the north with the raw materials for their factories and grocery stores—minerals, grains, leather, and meats. In return, they have bought autos, locomotives, radios, clothes, electrical equipment and so on.

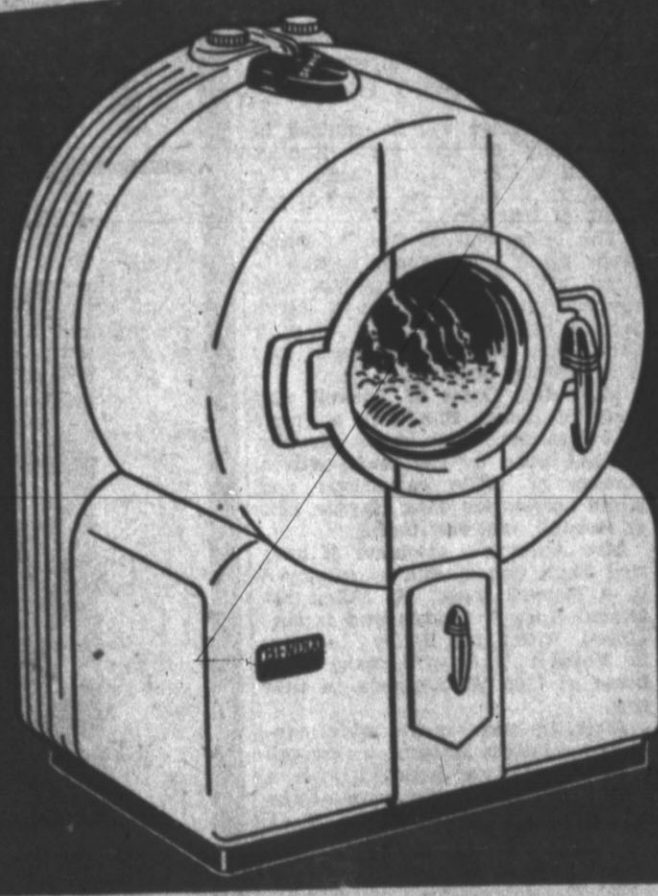

Now they are determined to turn out some of their own manufactured goods. But they need our machines to get a good start. In particular they want machines for transportation, power equipment and some machines to turn out the most essential consumer goods.

From our side, various U. S. Officials have argued: (1) The U. S. can't help Europe and Latin America at the same time to the same degree. (2) Peace and revived trade in Western Europe (which will be helped by the Marshall plan) is just as important to Latin America as it is to the United States. (3) Many of the dollars which Europe gets through the Marshall plan will be spent in Latin America. And Latin America will be free, in turn, to spend those dollars in the United States markets. (4) Latin American governments must be careful to industrialize gradually enough so that when they get machines, their people will be ready to run them efficiently, as fast as they arrive. (5) Some Latin American countries are already buying more than they can afford, and hence should pull in their belts for a while before they go deeper in debt for more foreign purchases. (6) At the same time the Latin Americans are demanding machines for their manufacturing industries, they are talking about new tariffs to keep out foreign goods, including American goods. So, in effect, the United States is being asked to help start a Latin American manufacturing industry. At the same time U. S. factories are being denied the right to sell in Latin American markets.

Talk on this subject with the Latin American countries has been intense for some time. Both sides show good will in trying to get a friendly solution. Both the North and South American continents recognize that they need each other's friendship in the face of alarms from the Old World.
