City Discusses New Sewer Line

Growing Pains Are Apparent

By Gardner Collins
Brand Staff Reporter

The first signs of growing pains and the rapid expansion of the northwestern section of the city are being felt as the City Commission heard a proposal for construction of a new main sewer line at its regular meeting Monday.

Discussion on the proposed line came following the annexation of three new additions at the request of property owners. Plots of two other additions also were approved.

In the discussion it was pointed out by Dudley Bayne, city manager, that the present sewer lines serving the northwestern section were at the point of becoming overloaded.

The need for an additional line to serve the area, he commented, has come "four years before it was expected".

At present only one gathering line is serving the area. The proposed line would add another 10-inch main to the system.

Proposed route of the line was to be from a connection with a 12-inch main at U. S. 80 near the intersection of U. S. 385.

Bayne traced out the route, commenting that it would possibly go north along Clements Street, cross U. S. 385 to Knight Street and then north to Bradley.

With the pipe placed along Bradley Street westward, the line would continue through the proposed Thunderbird Addition and connect with a 10-inch main on Harrison Highway.

The new line is being proposed to serve new additions which are being added to the northwestern section of the city. At present, two new additions have been added, several more have been proposed, and a third is platted, but has not been annexed.

Bayne expressed the belief that the problem had reached the point "where something is going to have to be done."

In the discussion, he commented that cost estimates on the proposed sewer line project were not available for the meeting.

(Bayne and engineer Bill McMorris of Amarillo commented Tuesday that estimated costs will be released at the Commission meeting on May 20.)

It was also brought out in the discussion that if the line were not constructed, a lift station would have to be built to serve the Thunderbird addition.

If this were constructed, Bayne noted, the present line would be seriously overloaded.

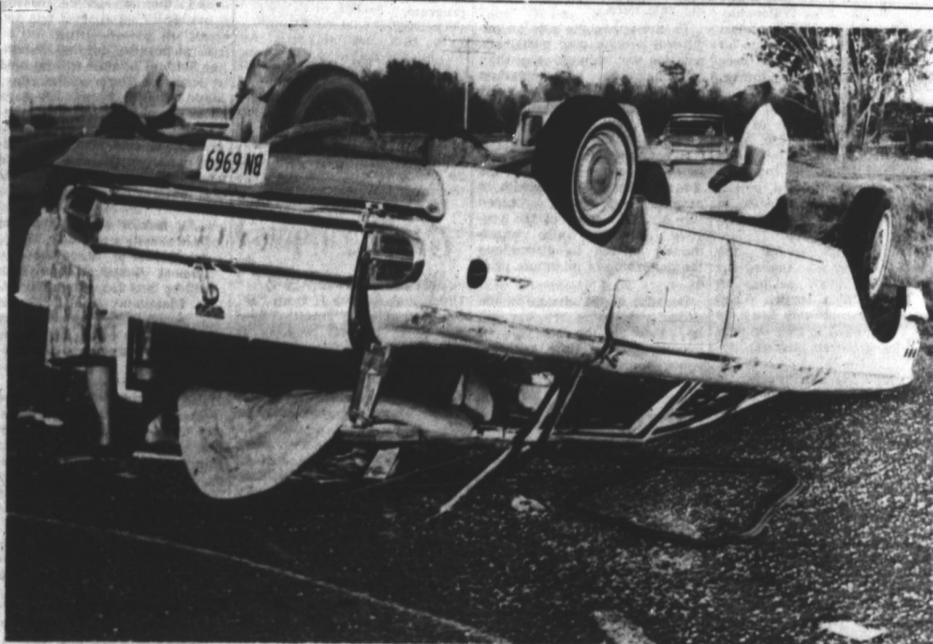

During the discussion, he also pointed out that the line would be "deep" and that elevations were more than enough for a three per cent grade for natural flow.

In other business, the commissioners upheld the decision of the Zoning Commission in approving three changes in property zoning and turning down a fourth petition.

The petition turned down was submitted by Francis Hardwick and Carl McCaslin requesting that their properties at Park Avenue and Avenue K be rezoned from "A" residential to "B" multi-family.

Petitions approved included those submitted by Chris Jacobson rezoning his property at

(Continued on page 2)

A PLAINVIEW FAMILY narrowly escaped serious injury and possible death as their 1961 American-made compact station wagon overturned on Harrison Highway about 6:30 p.m. Saturday. The left rear tire of the vehicle blew out causing the driver, Mrs. Jerry Floyd Dawson, 28, to

lose control of the vehicle. Her husband and possibly their three children were thrown out as the station wagon overturned in the middle of the highway. The accident occurred six miles west of Hereford. Damage was estimated at \$1000. (Staff Photo)

SHETLAND PONY ONLY FATALITY

Heavy Damage In 3 Wrecks

Three wrecks within the county over the weekend accounted for heavy damage to a pick-up and three automobiles. No serious injuries were reported and the only fatality was a Shetland pony that died as it was struck by an automobile.

The first wreck reported during the weekend occurred Saturday about 10 a. m. at the intersection of Avenue H and

Park Avenue as a 1957 sedan and a 1963 pick-up collided. Damage to the sedan, driven by Wanda Riddle Brown, 25, of Hereford, was listed at \$400 with damage to the pickup, driven by Clell H. Best, 54, Amarillo, estimated at \$225 by investigating officers.

Both vehicles were traveling east on Park Avenue. Best was attempting to make a left turn on to Avenue H and collided with the Brown vehicle.

The second serious accident occurred about 6:30 p. m. about six miles west of Hereford on Harrison Highway as a 1961 American-made compact station wagon overturned.

Escaping serious injury was a Plainview family, Mr. and Mrs. Jerry Floyd Dawson and their three children, Kim, Carey, and Janie. The vehicle was headed toward Hereford at the time of the accident.

The accident occurred as the left rear tire of the vehicle blew out causing the driver, Mrs. Dawson, to lose control. The station wagon swerved off of the road and then came back before overturning in the middle of the highway.

Dawson and possible all of the children were thrown out of the vehicle, officers said. Damage to the 1961 model station wagon was estimated at \$1000 by Texas Highway Patrol.

The third accident occurred about 2:55 a. m. Sunday about

nine and a half miles west of the city on Harrison Highway. A 1960 model sedan, driven by Lee Allen Carr, 16, 602 South Main, struck a Shetland pony.

Neither Carr nor the six passengers in the vehicle were injured. The pony was killed, however.

Damage to the vehicle was estimated at \$700 by the investigating Texas Highway Patrolman.

The vote on the 1964 referendum is to decide whether or not wheat producers will set a marketing quota on grain they are to produce.

Under the plan price supports on certificate wheat are to be established on approximately 80 per cent of normal production of the acreage allotment.

Normal production for a farm is determined by the average yield for the years 1958 through 1962.

The announced price support for this wheat has been set at \$2 per bushel on the national average.

Announced price for wheat in excess of the marketing allocation, termed "non-certificate" will be \$1.30.

In the 1964 referendum, pro-

Report Indicates County Is Hub Of Growth Area

A research report just issued by the Population Research Center, Department of Sociology at the University of Texas, shows that Deaf Smith County is near the center of a strong growth area in the state.

Godfrey Baldwin, a research associate of the Center, collaborated with Betty Maynard in compilation of the report. Baldwin is a graduate of Hereford High School and the son of Mrs. H. L. Baldwin of Frio and the late Rev. Baldwin.

According to the report, Deaf Smith County had a population of 14,799 at the end of 1962. The official 1960 census count

for the county was 13,187. The report indicated the population by 1961 was about 14,108.

For the ten-year period from 1950 to 1960, the county's average annual percentage of growth was 2.7, but for the past two years from 1959 to 1960, this has jumped to 5.3 per cent per year.

In the whole state, the average rate of growth has been two per cent per year.

Deaf Smith County is almost in the exact center of an 11-county area which has shown population growth constantly for the past two years. Included are, from the north: Hartley, Oldham, Deaf Smith, Randall, Farmer, Castro, Swisher, Lamb, Hale, Floyd and Lubbock counties.

Of these, the report indicates the following as average annual percentages of growth for the past two years: Hartley, 11.5; Oldham, 7.6; Deaf Smith, 5.8; Randall, 10.6; Farmer, 4.6; Castro, 2.6; Swisher, 3.3; Lamb, 1.7; Hale, 1.3; Floyd, 3.1; and Lubbock, 3.1.

Of the 254 counties in the state, only 62 have shown consistent gains since 1950 and they are widely scattered. However, the report points out, 18 of them are located on the High Plains from the top of the Panhandle south to Midland and Howard counties. Another 17 are in a broken belt from Maverick County on the Rio Grande to Cooke and Grayson counties on the Red River, with a cluster of eight counties concentrated around Dallas.

Still another 18 counties are located along the Gulf. The remaining nine are widely scattered, but generally are around some metropolitan area.

Around Town

BY H. A. TUCK

This is the week when end-of-school activities really start. Our boys can tell you exactly how many days, and probably how many hours, are left in the school year. Surprisingly, we haven't heard a single child fuss about having to finish school on Saturday morning. All they want right now is OUT and the earlier the better.

One of the big nights of the high school year is Saturday, May 11, when the juniors host the seniors at the traditional banquet. It will start at 7:30 p. m. in the high school cafeteria. A formal dance for juniors and seniors will follow in the Community Center.

Justice Real Estate is moving its office. The firm has taken over the building on the northeast corner of First and Main and is in the process of redecorating.

An expansion of the Hereford Pony League baseball program should be a major project for next year. About 60 candidates turned out Tuesday for the first of four days of try-outs at Dameron Park. But only about half that number will be selected to fill team vacancies. And a lot of pretty good players (Continued on page 2)

PUMPS FROM 800 FEET

Deep Irrigation Well Is Indicator Of Area Future

By Wain Miller
Brand Staff Reporter

Another indicator of Deaf Smith County's future registered "very good" here last week as water began being pumped from more than 800 feet under the surface.

A deep irrigation well which

has been drilled on the W. P. Axe farm, located nine miles southeast of Hereford on FM Road 1259, has proved successful.

Success of the well served to brighten optimism concerning the future of local agriculture... which is so dependent upon the fabulous underground water reservoir from which crops get their nourishment.

Importance of the success of the deep well comes in the fact that it proves that the area apparently lies atop two underground water sources. Besides the water-bearing strata from which the county has mined wealth for many years, it is now assumed that there is a separate reservoir lying below the first. However, this does not mean that the area's water supply is

Herd To Dumas Friday For Last Game Of Season

Hereford High will play its last baseball game of the season Friday, May 10, at Dumas. Game time is slated for 4 p. m.

About all Hereford could expect would be an upset victory, since the Demons already have clinched the district title and Hereford cannot hope to move up from its cellar position.

Playing their final game for the Whitefaces will be these seniors: Gary Kendrick, pitcher; Jay Boynton, outfielder-catcher; Gerry Bybee, pitcher; and John Willoughby, shortstop-outfielder.

The Whitefaces currently have a 1-6 record in District 1-AAA action. Dumas is 7-0 after a victory over Levelland Tuesday, while the Lobos are finished with a 3-5 mark.

For the season, the Whitefaces have a record of 5-14.

"unlimited", cautioned one observer. It will merely extend the life of irrigation here.

Installation and maintenance costs of wells drilled to such a depth climbs with each foot... but Axe beamed as he said, "I think we have proved that the water is there and can be used, and I think that this water will pay for itself if the time comes when we need to use it."

Backed by a group of nine neighbors, Axe had the well drilled in order to find out exactly what quality of water supply is available. Although he already had six successful wells on his 662-acre farm, he drilled the well as an experiment.

"We hit redbed at 196 feet on this well. We could have stopped there and had a good, strong six-inch well. But we wanted to see what was below," he explained. The water-bearing strata above the redbed was sealed off from the well.

The well was sunk to a depth of 920 feet, however it is set to pump at 800 feet. Axe reports that there is some 75 feet of formation at this point, which he assumes can all be pumped.

At the present time, the well is pumping some 400 gallons per minute. After 68 hours of operation, the well showed signs of becoming stronger as the flow of water increased. Axe then stopped pumping temporarily in order to connect the well into the underground irrigation pipe system on his farm.

After another two days of operation, the well has increased its flow to "a full pipe."

Powered by a Waksasha 145 engine, the deep well is pumped with equipment furnished by Winger Pump Co. in Hereford. "The system is drawing the water with ease," Axe states, "and there has been no problem in pumping the water (Continued on page 2)

WELL PLEASED with the results of a test well on his farm is Wilbur Axe, who can't resist letting the water run over his hand. The well was drilled as an experimental test, with neighbors offering to defray part of the cost. The well is pumping strong from a strata 800 feet below the surface. (Staff Photo)

visions have also been made for diversion of cropland. A 10 per cent diversion of each producer's 1963 acreage allotment is, however, mandatory.

An additional 20 per cent diversion may also be made. But those with allotments of up to 48 acres may divert more than the additional 20 per cent if it does not exceed 15 acres.

For the first time, growers with allotments of 15 acres or less may elect to participate in the program. There are ap-

Livestock Show Officials Make Rules Changes

Directors of the Junior Livestock show met with county agents and vocational agricultural teachers of the four-county area Tuesday afternoon at the Chamber of Commerce office. The meeting was called for the purpose of reviewing show rules and procedures.

Among the major changes adopted was one which would make the winner of the grand champion award in any class and the champion of any lamb class ineligible to compete in the class in which the award was won. This will not be made retroactive and will only be applied after the 1964 show since many participants have already started working on their projects.

Another rule change provided for the pre-sifting of all animals by a sifting committee. This would be designed to remove from the show those animals which obviously had no chance of making the sale or placing in the show and would relieve the over-crowded conditions prevailing at the Bull Barn. Further details will be worked out at a later date. Much discussion revolved a-

(Continued on page 2)

Issue Information On Best Protection From Tornadoes

Dale Barkley, newly appointed disaster chairman for the Deaf Smith County Red Cross chapter, has issued information regarding the "Tornado season" and precautions which may be taken.

Barkley pointed out that tornadoes can occur any place in the country at any time of the year, however, they are most frequent in the midwestern, southern and central states from March through September.

A tornado, he said, is usually observed as a funnel-shaped cloud, spinning rapidly and extending from the base of a 'hundercloud. When close, it sounds like the roar of hundreds of airplanes.

Tornadoes most generally occur on hot, sticky days with southerly winds and a threatening, ominous sky. However, many such days occur without tornadoes.

An hour or two before a

tornado, topsy-turvy clouds appear, sometimes bulging down instead of up. The cloud often have a greenish-black color.

Rain and frequently hail precede most tornadoes with heavy downpours after it has passed. Most tornadoes occur between 3 p. m. and 7 p. m., but have been recorded at all hours. In nearly all cases, they move from southwest to northeast.

Urge Pre-Registration For Children's Clinic

Parents who would like their child or children examined during the seventh annual Oasis Shrine Club Children's Clinic are asked to fill out the pre-registration form below. It should be mailed to: Oasis Shrine Club, P. O. Box 187, Hereford, Texas. Parents should have the child examined prior to the clinic by their family doctor, if possible. The clinic will be held in Hereford on Saturday, May 25.

ATTENTION NOTARIES PUBLIC

Secretary of State Crawford C. Martin announced that all qualified Notaries Public desiring re-appointment for the new term ending June 1, 1965 must re-qualify by the payment of the required fee and the filing of a new oath and bond with the County Clerk of his residence between June 1, 1963 and June 10, 1963.

Martin emphasized that Notaries Public should not send requests for re-appointment or for commissions directly to the Secretary of State. The law specifically requires that the County Clerks approve notary bonds.

Any person not now a Notary Public who desires appointment should apply to his County Clerk between April 1, 1963 and May 20, 1963. Application during this period will assure prompt attention before the rush procedure of re-appointing present Notaries.

The Secretary of State further pointed out that each person applying for a commission as a Notary Public must be at least 21 years of age and a resident of the county for which he is appointed. The exact name and permanent address of the applicant must be furnished the County Clerk.

B. F. CAIN, County Clerk
Deaf Smith County
Hereford, Texas

Hoof Prints

By David Stevens
Whiteface Reporter

It was a long week for the Whitefaces last week in more ways than one. Last Friday's game against Levelland lasted two hours and 45 minutes. Levelland won the game 19 - 6.

Eighty-six batters went to the plate, 46 Lobos and 40 Whitefaces. Ted Warren, Lobo leadoff hitter, had 5 for 6, a pretty fair day in anybody's league. Warren's only out came on a fly ball which centerfielder John Willoughby caught while standing against the fence. Eugene Green hit his sixth home run, a three run blast, in the first inning.

Dumas also whipped the Whitefaces by a score of 6-1. The Demons scored five runs in the first inning. The two teams tied 1 - 1 for the next six innings. Joe Ballard, a real menace to the Whitefaces in past games, went 0 for 3.

Frank Cain started for the Whitefaces and was shelled for four runs without getting an out in the first inning. Then Danny Loerwald and Larry Minks combined to give up only two runs in seven innings.

Ronnie Welty ran seventh in the 120 - yd. high hurdles at the state track meet held in Austin last Friday. Congratulations to Ronnie, for this is an honor which he really deserved.

Tornadoes...

(Continued from page 1)
Although they are usually only on the ground for 10 to 40 miles they may move forward as much as 300 miles. Also, the usual tornado path is only 300 to 400 yards, but may be as much as one mile wide.

The average speed of travel is 25 to 40 miles per hour, but they have been clocked at as little as five miles per hour and as much as 139 miles per hour. Wind speed inside the funnel is thought to be up to 500 miles per hour.

Tornadoes result in two types of damage. One is from violent winds, which uproot trees, destroy buildings and create hazards from objects blown through the air. The other is from the difference in air pressure which can lift autos and cause buildings to collapse.

Barkley pointed out that there is no universal protection against tornadoes except caves or underground excavations. When time permits, go to a tornado cellar, cave or underground excavation which should have an air outlet to help equalize air pressure.

If you are caught in open country, move at right angles to the tornado's path. If there is not time to escape, lie flat in the nearest depression, such as ditch or ravine.

If you are in town, seek inside shelter, preferably in a steel reinforced building and, above all, stay away from windows. In homes, the southwest

corner of the lowest floor or basement offers the greatest safety. Brick or stone houses should be vacated. If time permits, electricity and gas lines should be shut off.

Windows on the north and east side of the house also may be opened to help reduce damage to the building by equalizing pressures.

School buildings offer good protection in hallways on the ground floor. However, auditoriums and gymnasiums with large roofs should be avoided.

Above all, Barkley said, keep calm! It will not help to get excited. People have been killed by running outside or by turning back into the path of a tornado. "Even though a warning is issued, chances of a tornado striking one's home or location are very slight," he stated. "Tornadoes cover such a small area, as a rule, that relatively only a few places in an area are directly affected."

Livestock...

(Continued from page 1)
round rule number 9 which states, "All livestock selling in the junior sale must go into the hands of the buyer except the Grand Champion, the Reserve Champion and the Champions of the classes."

County Agents and vocational agriculture teachers pointed out that many major shows have strict rules against the admission of any animal which has previously been in a show sale. They must certify each animal to that effect. Pointed out was the fact that other shows may be lenient in application of the rule to champion animals but they would no longer certify any other animals appearing in the sale here.

To strengthen the rule an additional section was added stipulating that animals other than the champions be earmarked or otherwise branded to clearly and permanently identify the animals as having passed through the sale.

In reference to the lamb classes it was agreed to adopt the same classification system as animals as having passed the Amarillo show of the pre-year. It was also unanimously agreed to discontinue the publishing of minimum prices.

Because of the change in the sifting rule some revision will be made in the schedule of events and the time and day when animals must be checked

Wheat...

(Continued from page 1)
Approximately 100 growers in Deaf Smith County in this category. Such producers desiring to participate in the 1964 program must declare their intentions at least seven days before the election. The deadline is Tuesday, May 14.

Producers eligible to vote are those that have a 1964 wheat acreage allotment. These include growers with allotments of less than 25 acres if they sign an intent to participate in the 1964 program.

Voting requirements state that a person can cast only one ballot in the referendum regardless of the number of wheat farms he has an interest in.

Individual members of a partnership also qualify, but the partnership does not have a vote in the referendum.

Also eligible to vote are administrators or executors of an estate, a trustee or guardian, and the representative of an organization.

Landlords who rent farms to tenants for a share of the crop and their tenants both are eligible to vote in the referendum. However, those renting land for cash are ineligible.

Since Texas has community property status, both husband and wife are eligible to vote if the allotment is on community property.

Both husband and wife may also vote if they both sign leasing agreements or in the case of a verbal agreement, the county committee determines both are responsible.

Windows on the north and east side of the house also may be opened to help reduce damage to the building by equalizing pressures.

School buildings offer good protection in hallways on the ground floor. However, auditoriums and gymnasiums with large roofs should be avoided.

Above all, Barkley said, keep calm! It will not help to get excited. People have been killed by running outside or by turning back into the path of a tornado. "Even though a warning is issued, chances of a tornado striking one's home or location are very slight," he stated. "Tornadoes cover such a small area, as a rule, that relatively only a few places in an area are directly affected."

Radio and television stations will provide the latest tornado advisory information. Do not call radio, or television stations or weather bureaus, however, except to report a tornado.

Students Learn Of Armed Forces During Program

By Whiteface Staff

On Tuesday morning the students were furnished with an assembly program by the United States Armed Forces. The program consisted of information concerning military obligations and opportunities available in the armed forces.

Selective service and the draft was discussed thoroughly and much valuable information was gained by the students.

All branches of the service were represented and both boys and girls were included in the program.

No name has been adopted for the show as yet and up to contest deadline time Wednesday only one entry had been received. Directors agreed to meet again next week to adopt a name. Suggestions will still be welcome although the contest closed Wednesday night.

City...

(Continued from page 1)
Union and Avenue H from "B" residential to "C" multi-family; W. C. Roberts property at Texas and Harrison Highway from "B" residential to "C" multi-family; H. L. Higgins, the rezoning of Northridge Addition from "A" residential to "B" residential.

Annexed into the city were Hare Addition, Lazy Acres Ranch and Crestiawn Addition. All were brought into the city at the request of property owners. Crestiawn Addition was added to the city following approval of the plat.

A plat of a subdivision being developed by Jack Bradley in north Hereford between 13th and 14th Streets was also approved.

Commissioners gave approval to a request made by John Moody for the parking of taxicabs in the 100 block of Main St.

An invitation to the City Commission to meet at a noon luncheon to discuss the county fire contract was turned down.

The Commission, however, agreed to invite the county officials to the next meeting scheduled for May 20 in order to iron out the disagreement.

A lengthy discussion developed as commissioners pointed out that Hereford Community Center was not to be used for commercial purposes.

In discussing proposed rules for the center, they agreed that the sale of merchandise or display of merchandise for sale should be prohibited.

An amendment to the zoning ordinance was also approved concerning the construction of carports. The amendment will allow carports to be built in line with existing structures without being attached.

However, the structure must conform to other zoning rules governing construction in residential areas.

An annexation report was also presented to the Commission by the city manager.

The report showed that with the areas already taken in to the city and those which will be annexed in the near future, annexation will include almost 200 acres of residential developments.

don't even show up, since they know competition will be too keen. But Pony League officials and coaches are well pleased with the candidates who have come out and feel that the league should be well - balanced again this year. The Pony League All - Stars advanced a long way last summer and we hope they can do it again.

We understand that final papers are being drawn up preparatory to opening a Christian bookstore in Hereford. Its backers say they will try to offer a service to the community by having available Christian literature and other acceptable reading matter.

First practice for the Derringer Softball League will be held at Dameron Park on Saturday, May 11, at 3 p. m. All boys 10 to 13 years of age are invited to participate. The Derringer League is a state-wide youth program sponsored by the Church of Jesus Christ of Latter Day Saints.

All former residents of the Hale County area, and others, are invited to attend the 88th Pioneer Round - Up, which will be held Saturday, May 11, at Plainview. There will be a parade, reception, chuck wagon supper and, of course, lots of visiting and tail-battling.

The Retail Trade Committee is to meet at 10 a. m. Thursday, May 9, for a program on bad checks and how to combat this "paper robber" of businessmen. The meeting will be held in the community room of the First National Bank.

Wish we could scare up some more rain, but it doesn't seem likely for a few days. The wind is out of the wrong direction, the fronts aren't right, the fronts aren't in the proper place and besides, the weather bureau says that no rain is expected for a few days. But you can bet your new straw hat that we will get at least one good rain when the wheat is ripe and another right in the middle of vegetable harvest.

American Legion baseball tryouts will begin Monday, May 13, at the high school baseball field. The sessions will begin at 6 p. m. each day. Any boy born Sept. 1, 1944 or after, through age 19, is eligible. Rocky Lee will coach the team and Johnny Haney will be the manager. Hereford will play in the southern half of the Panhandle District.

Little League baseball schedule for the rest of the week includes the Dodgers and the Cardinals on Thursday and the Yankees and the Giants on Friday in the Majors; minor league games Thursday will be the Yankees vs. the Athletics and the Dodgers against the Pirates. On Friday, the minor league schedule includes the Braves and the Giants and the Orioles and the Cardinals.

Excuse us now while we boast

Freedoms Forum, which was held in Lubbock May 1-3 at the Pioneer Hotel.

(Continued from page 1)

from such a depth." "Of course, there was considerable expense involved in sinking this well," Axe pointed out, but then added, "I think as we learn more about drilling so deep the cost will come down. I really feel that deep wells will pay whenever we come to the point when we have to use them."

As drilling operations were planned, a group of farmers in an area surrounding the Ace farm agreed to help foot the bill for the "experiment", should the well prove unsuccessful. "Nine other men and myself decided it would be worth the effort to drill and see what sort of future deep wells could offer. Each of these men agreed to share cost of the drilling if the well had been dry."

"There are no other deep wells to my knowledge within a bit," Wain Miller, Hereford High School senior and Distributive Education student employed at the Brand, was the only state winner in spring events for the University Interscholastic League. He took first place in newswriting on an entire submitted by mail. Our congratulations, also, to Charles Mims in number sense and Ronnie Welty in high hurdles, although they failed to win in the state meet. And, while passing out bouquets, one to the high school mixed choir and girls choir for high ratings earned in the Bucanear Music Festival at Corpus Christi.

We ask your forgiveness for having mostly baseball items. But our note basket this week, with such, was overflowing its rims.

E. B. Gonzales Funeral Service Set Thursday

Funeral services for E. B. Gonzales, 74, will be held today at 10 a. m. at St. Joseph's Mission, with Father Raymond Gilles officiating. Burial will be in St. Anthony's Cemetery.

Mr. Gonzales died May 6 in Wichita Falls. He was born Aug. 2, 1888. A barber by trade, he moved to Hereford from Amarillo in 1954.

Survivors include his wife, Candelina; two sons, John and Ronald Gonzales; four daughters, Elena Gonzales, Mrs. Joe Aguiral, Mrs. Domingo Garza, and Mrs. Ruben Hernandez, and one brother, Leonado Gonzales.

Services are under the direction of Gilliland Funeral Home.

AT C.A.F. MISSION

Four members of the Hereford Civil Air Patrol unit flew to Childress Sunday for a practice search and rescue mission. However, the practice was rained out, so the day was devoted to training meetings. Attending were Carroll Newsum, Benny Womble, Charles Duval and Bill Thompson.

a five-mile radius of the farm," Axe stated. "However, there are several other deep wells in operation in other sectors of the county."

"So now I think we can safely say that there is water down there which we can use when we need it. I think it was a fine gesture on the part of my neighbors to offer to share in the venture, and I really appreciate their concern," Axe stated.

Area farmers who had agreed to share the risk were H. C. Baird, C. E. Dameron, Norman Hodges, Leroy Bodkins, Tom Draper, Jack Strain, G. W. Duncan, L. V. Lively, J. U. Cone, and Ace.

"I think that knowing that there is more water below will help the area by adding faith in the water supply," Axe commented.

HIWAY 385 SOUTH EM 4-1195

By Melvin Young
The ultimate in integration has now come to the state of Texas with the enrollment of ladies at Texas Agricultural and Mechanical College. And the local Aggies are taking a drubbing due to the new ruling; but Bill Davis has the answer to the whole thing. "If they are going to enroll girls at A&M, then it's about time they started enrolling men at Texas Women's University," says Mr. Davis; and we can think of former Aggies who might consider furthering their education if this were to happen. In fact, there might be standing room only in the registrar's office.

Actually, the fun hasn't started yet. Wait until one of the ladies graduates from the old Alma Mater and then turns up at the annual Aggie muster. What then? And we're wondering what will happen if any of the ladies decided to participate in the school's ROTC program and graduates as a member of the officers corps? All of which may be real fine, but we're predicting that the local Aggies are in for a bad time in the years to come.

J. R. "Monk" Johnson, owner-manager of Rutherford and Company, and president-elect of the local Rotary Club, has been making plans to attend the upcoming Rotary International Convention to be held in St. Louis June 8 through 13. Of course "Monk" is looking forward to the event with a great deal of enthusiasm, but to top off the meal with a bit of des-

sert, the folks from Curlee Cothens, (headquartering in St. Louis) have informed him that they have reserved a box seat for the ball games while he's there; plus the fact that they have secured tickets to the opera and will have a company limousine placed at his disposal for the entire five days of the convention. "Monk" figures that's better than being selected "Queen for A Day"; or is it "King for A Day"? Oh well, it's a pretty good deal, anyhow.

Russell Carver has informed us that the Duplicate Bridge Club of Hereford has contributed over \$375.00 to the local Community Center to be used as it deems necessary. The Duplicate Bridge Club holds its meetings at the Community Center and contributes all proceeds to the center. Among the items that have been purchased with this money include card tables, patio furniture and a portion of the coat of curtains and fence.

Many examples of self-induced "relief" cases in the United States could be cited, but a typical one was discovered in the case of the Georgia cracker who sat barefooted on the steps of his tumble-down shack, smoking a corncob pipe. A stranger stopped for a drink of water. Wishing to be agreeable, he said, "How is your corn coming on?" "Ain't got none," said the cracker.

"Didn't you plant any?" asked the stranger.
"Nope," was the reply; "Iraid o' boll weevils."
"Well," said the stranger, "how is your corn?"
"Didn't plant none," replied the native; "Iraid there wa'n't goin' to be no rain."
The visitor was abashed, but cheerful still. "Well, how are your potatoes?"
"Ain't got none; scairt o' potato bugs — pow'rful lot 'em here."
"Well, really, what did you plant?" asked the stranger, curiously.
"Nothin', jes' playin' safe." — Imperial.

Meanwhile, the Hereford building boom continues, with more and bigger homes being built daily. We are continually amazed at the growth of the northwest section of our city. New streets seem to pop-up overnight, and the next time we look, they are filled with homes. These homes generally are running in the \$30,000 to \$35,000 bracket, and many are being built by long-time residents who are now "moving up" to something better. We keep thinking that this building trend will open up more rent property in the

two and three bedroom class, but so far the situation seems as tight as ever. Perhaps this is good. We had much rather see a town grow gradually (where rent property is tight) than to see it overbuilt and have vacant homes scattered throughout.

In fact, the entire economy of Hereford seems to be moving along with "much vigah" as the president would say. Business houses generally report increases for the first four months of 1963, and apparently there is little or no unemployment problem at this particular time. The farmers are busy seeding row crops; and when the farmers are working, business takes a turn for better.

The pastor of an impoverished parish in the hills often wrote to his bishop for aid, until the bishop demanded an end to such appeals. For a time there was no correspondence. Then one day the bishop received another letter:
"This is not an appeal," it said, "it is a report. I have no pants."

Campfire Choir Presents Spring Concert May 9

Hereford Camp Fire Choir, directed by Mrs. J. Edward Line, presented its spring concert in the Community Center on Thursday evening. The choir is sponsored locally by the Hereford Music Club, and accompanist for the group is Mrs. Paul Lyons.

The girls sang "The Holy City," "Whistle a Happy Tune," and "Dry Bones," the latter accompanied by sound interpretations of the novelty number. Recognized for perfect attendance and receiving pins were Debbie and Ginger Gholson, Mary Sue and Pat Neff, Janet Grubbs, Mary Sue Gooch, Jane Lyons, Martha Kate Aikman and Judy Cargo.

Choir pins were also presented to E'Dana Hopson, Joey Hopson, Cindy and Lynn Hale, Pam and Kathie Miller, Mary and Sue Robinson, Shaun Sigmund, DeeDee and Deborah Boardman, Terri Carter, Connie Stark, Sandra Fields, Kay Lynn Alexander, Terie Beth Line, Gwen Cargo, Sally Bayne, Becky Edelman, Cynthia Knox and Charlotte Babione.

PROTECT FEED DOLLARS WITH PURINA HEALTH AIDS

Kill flies like magic!

Your best attack against disease-carrying flies this spring and summer is a combination of Purina Fly Killers. Here's how to use 'em:

- Put Purina Fly Bait and Purina Fly Checkers in alleyways, near manure, in sunlight wherever you find flies.
- Spray Purina Dairy Spray on your cows at milking time. Dairy Spray kills and repels hornflies, stable flies.
- Use Purina Dairy Oiler Insecticide in a back-scratcher set up in your barnyard. Let cows protect themselves!
- Purina Spray & Dip or Purina Malathion Spray gives long-lasting protection against flies when you spray barns.

In the test that tears 'em apart...the Daytona '500
FORD Durability Conquered the Field
1-2-3-4-5

Here's the box score of durability, stamina and performance at Daytona

Started	Finished	Position
12 '63 Fords	9	1, 2, 3, 4, 5, 10, 11, 17, 24
5 '63 CHEVROLETS	2	6, 14
7 '63 PONTIACS	3	7, 8, 13
5 '63 PLYMOUTHs	3	6, 18, 23
2 '63 DODGES	DID NOT FINISH	
1 '63 BUICK	DID NOT FINISH	

At the Daytona 500 on February 24 Ford cars again proved their durability in 500 miles of accelerated wear-testing, and swept the first five places. Never in history has a single make dominated an event like this! The workout a car gets at the Daytona 500 easily equals the strain of 2 or 3 years' normal driving. Daytona gives dramatic proof that the 1963 1/2 Super Torque Ford is built to outlast all other cars! But see for yourself. Get the full story (and a chance to drive this amazing car) at your Ford Dealer's.

Rules For Survival In Tornadoes Given Clubs

By Argen Draper
Two of the clubs have had programs on Tornado Rules. With May and June being the months when tornadoes are the most prevalent, it does concern us all to spend some time and thought on what action to take when a tornado warning is received.

The probability that any given area of one square mile will be struck by a tornado in any given year is slight, even in states where these storms are frequent. It should never be overlooked, however, that there is no assurance that any particular spot will not be struck without warning in a year, or even more than once in the same year.

There are few calamities that can change the appearance of a community as suddenly and disastrously as a tornado. Homes, together with stately trees and ornamental shrubbery, are reduced almost instantly to a mass of wreckage or blown entirely away. The dead and injured are mingled with the debris in many cases.

So far as the probability of you being killed or injured is concerned, percentages are consoling, but the fact is that no person east of the Rockies can be sure of not becoming a tornado casualty in any year of his life.

It requires fast, intelligent thinking and swift action — or rare luck — to pass through a tornado alive and uninjured. The best protection and only truly safe protection is a storm cellar. When time permits go to a cellar.

If you're in open country, move at right angles to the tornado's path. And if there's no time to escape, lie flat in the nearest depression such as a ditch or ravine. A neighboring town was under threat and the school children were taken to a drained swimming pool. This

gave protection. If in the office, stay away from windows. The basement of a frame house is safe.

When children are at school, the teachers will take care of them. Think ahead of time about the action you will take in case of a warning and above all, don't panic.

Saturday the members of the project courses met in Denton at Texas Women's University. The big news of the day on the campus was the \$88,786 grant which TWU had received from the National Aeronautics and Space Administration. The grant is in support of a broad series of investigations to prevent loss of calcium from the human skeleton during weightlessness and immobilization. Dr. Pauline Berry Mack, director of the Nelda Childers Stark Laboratory for Human Nutrition Research, will direct the research.

The weather in Denton was hot and muggy. Most everyone had on white dresses and white shoes.

Funeral Service For J. A. Bryant Held In Lubbock

Funeral services for James A. Bryant, a brother of Mrs. W. H. Autry Sr. of Hereford, were held Friday in the First Methodist Church of Lubbock.

Mr. Bryant was killed in an automobile accident on May 1 near Lubbock.

He is survived by his wife; a daughter, Mrs. E. E. Henderson of Shamrock; a son, Noel of Lubbock; three brothers, W. G. Bryant of Kinniwick, Wash. A. J. of Clovis, and Freddie of Anchorage, Alaska; two sisters, Mrs. Autry and Mrs. E. T. Ward of Portales, N. M.; seven grandchildren and three great grandchildren.

Attending the services were Mr. and Mrs. Autry and their sons, W. H. Autry Jr. of Ulysses, Kan., and Deon Autry and family of Friona.

Annual All-School Exhibition Scheduled For Monday Night

Hereford High School will be the scene of an All-School Exhibit, May 13, at 7:30-9:30 p.m. This exhibit is held each year in order that samples of the work done by the students throughout the year might be seen. The public is not only invited, but is also urged to attend.

The exhibit will be set up in the gymnasium. Each department of the school will have something on display for this open-house.

One of the exhibits will be of the business department. Machines which are used in class will be on display. The new IBM Selectric typewriters will be featured.

Homemaking department will have displays which cover all phases of homemaking. This will include such things as cooking, sewing, home nursing, and baby care.

Art department will feature at least one sample of each student's work. There will be paintings, designs, book covers, and even sculpture.

The library will exhibit such things as new books, and audio-visual equipment.

Speech department may have a real treat for everyone. An exhibition of slides from the last few plays and a costume display are being considered.

The wood working department will have a judging just prior to the open-house to determine who has the best Woodworking II project. The winner will receive \$30 worth of tools from Carl McCaslin's. The second place winner will be awarded tools valued at \$25.

On display at this exhibition from the woodworking department will be such various items as chests, china cabinets, desks, hi-fi sets, bookcases, and beds.

Other departments displaying work are English, math, history, and science. Also included is the department of foreign languages, which includes Spanish and French.

STUDENT COUNCIL election winners were for 1963-1964. Named as vice president announced last week following balloting was Beth Ballard. Secretary is Wynn Buck, at Hereford High School. Ronnie Duncan, left, right, was named student council president (Brand Staff Photos)

CAMPAIGN CAPERS made for interesting day night. Above are some scenes showing politics during the annual student council election rally at Hereford High School Tuesday night. (Brand Staff Photos)

Mum's The Word From Juniors To Banquet Guests

"Quiet" is the password between the Juniors and the seniors, now that the work on the decorations on the Junior-Senior banquet has begun. The invitations have been printed and have been addressed to the seniors, faculty, and the members on the program.

Juniors and seniors planning to attend the banquet have turned in their names.

Work has been done by several of the juniors, but can't be described. Theme of the banquet will be a surprise.

Sophomore boys who were chosen to serve at the banquet are as follows: Gary Stagner, Larry Minks, Gary Robinson, Lynn Cook, Gaylon Ward, Steve Siegler, Jerry Don McCaslin, Frank Cain, Dan Thomas, James Proffitt, Stan Sigman, Robert Strange, Terry Hill, George Muse, and John Kreighauser.

Girls chosen to work are the following: Beth Ballard, Nancy Tyler, Brenda Shelton, Cheryl Parker, Becky Duncan, Janis Medley, Peggy Neff, Merle Carmichael, Debbie Beene, Myrna Botkin, Ann Braddy, Barbara Langley, Sharon Tinnin, Penny Johnson, Cheryl Edmonson, and Cathy Billby.

Outstanding senior girl and boy have been elected but will not be revealed until the night of the banquet on May 11.

Honor Band Directors; Slate Concert, Banquet

By Donita Allred Whiteface Reporter
Hereford High School band director, Ben Gollehon, deserves a vote of gratitude and praise for the excellent work he has been doing with the Big Domino Band.

The band recently received a Sweepstakes trophy after being awarded first division ratings in marching concert, and sightreading contests.

Mr. Gollehon, a graduate of Dimmitt High School, attended West Texas State College, where he had a double major of voice and clarinet.

After college graduation, Mr. Gollehon directed the Pampa Junior High band for three years. The band received Sweepstakes each year Mr. Gollehon taught it.

Following these three years, Mr. Gollehon came to Hereford and has been here for two years. Last year the high school band made superior ratings in marching and sightreading, and an excellent rating in concert; Junior high received two superior ratings, and did not march due to bad weather.

Until this year, Mr. Gollehon directed both bands. This year Mr. Clyde Wilson, a senior at West Texas State College, is director of the junior high band.

Mr. Wilson, recently honored with the "Outstanding West Texas Buffalo Band Student" award, has been the drum major at W. T. this past year. He was also drum major in the band at Midland High School.

Mr. Wilson has been in approximately five Sweepstakes bands. As assistant high school director, Mr. Wilson helps with sectionals, marching practice, and fills in in the absence of Mr. Gollehon.

The Sweepstakes award was the highlight of the year's work for the band after marching in the Cotton Bowl parade at Dallas during New Year's weekend.

To climax the year, the band will present a Spring Concert, May 18, at 7:30 p.m., in the high school auditorium. The public is invited free of charge. The band queen and king will be crowned and outstanding bandman will be presented.

The band banquet will be held May 18, at 7:30 p.m., in the high school cafeteria. All bandmen, their dates, and special guests will enjoy the surprise program and theme of the banquet.

This will bring a close to an event filled year, one of which the band can be very proud for the wonderful work and awards it has earned.

Honor Club Names Officers For Year

National Honor Society met in the auditorium Thursday, May 2, to elect officers for the 1963-64 school year.

Jay Carter was elected as the new president. Pegeme Cox will serve as vice president. Janice Hagans is to be the secretary-treasurer. Historian is Myrna Botkin and Ronny Duncan was elected parliamentarian. Members of the National Ho-

nor Society voted to bring the money to pay for the food to be served at the Beatnick Party at Leroy Aven's house on May 17.

Executive council members were also elected. Joe Coffman and Rozi Rush were elected to this office. The executive council members meet with the officers to plan activities for the National Honor Society.

REVIEWING PLANS for the coming band concert, directors, Clyde Wilson, left, and Ben Gollehon outline their schedule. Wilson, director of the Stanton Junior High Band and assistant high school band director, and high school band director Ben Gollehon are nearing the end of a year which has been successful for both bands. (Brand Staff Photo)

Choir Members Garner Excellent Marks At Corpus

Tired but happy travelers of the Mixed Choir returned home Monday night from the Buccaneer Music Festival which they attended at Corpus Christi this past weekend.

Buccaneer Music Festival is an annual contest for bands and choirs from the surrounding states. It is one of the largest and hardest of its kind in the United States.

The Mixed Choir received an excellent rating in concert and also in sightreading. A girls choir comprised of girls in the mixed choir received an excellent rating in concert and a superior rating in sightreading.

After completion of contest, the choir settled down for pleasure. Among things the choir did was tour Breckenridge Park in San Antonio. After contest on Saturday, the choir took a sightseeing tour off the coast on the "Corpus Queen." Another venture taken by the choir was an excursion to Padre Island.

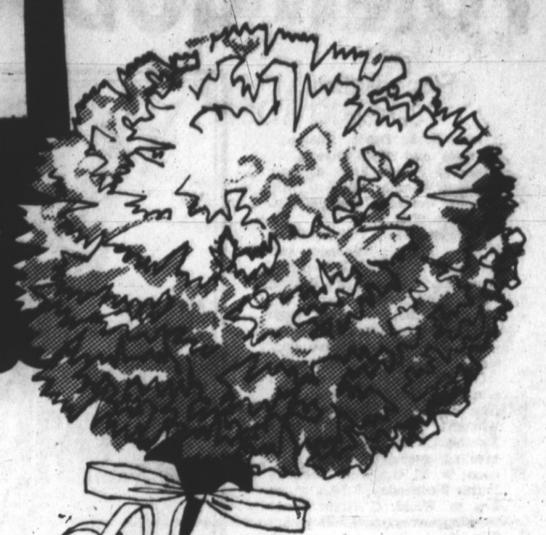

Returning home the choir spent Sunday night in Austin and toured the capitol and university the following morning, returning home following the tour.

Members and sponsors of the trip termed the trip a success - educational - and fun - wise.

about My MOTHER

Most all other things come by twos, threes,
 or even by dozens. See the roses, the stars, the sunsets.
 Ah, there's brothers and sisters, too, and uncles and aunts
 and cousins a plenty. But in all the whole big

You In The Church
 The Church In You
 — form a combination
 for good. Every man,
 woman and child needs
 the influence of the
 church. So, come let
 us go into the house
 of the Lord. Let us
 support her program
 of service to human-
 ity, be a faithful work-
 er, a daily bible read-
 er and attend services
 regularly.

world there's just one mother. There's
 much more about my mother and
 good it all must be. In fact she's as
 good as goodness is, and that's enough
 for me. Her words are
 kind, her faith is strong, and her hope
 as high as the highest tree. You can
 see from here that she is a dear, —
 she means everything to me. Not one sin-
 gle emotion comes nearer
 the divine than my mother's love for
 me. She is the soaring cloud
 of radiant rapture that lifts me to new
 attempts and the strength I need
 to see me through. I'm taking my
 mother to church this Mother's
 Day — what about you???

REP. ROGERS WRITES

Weather Bureau Predicts Chance For Drought, 2-1

TO THE PEOPLE OF THE 15TH DISTRICT:

As you know, the past few months have been unusually dry over the High Plains. What are the prospects for improved moisture conditions? I took up this question with my friend Dr. F. W. Reichelderfer, chief of the U. S. Weather Bureau. It is his estimate that the chances for a wet summer are one in two. Because science has yet to solve nature's weather generation secrets, it is impossible to determine definitely whether the dry pattern will continue over the Plains for a prolonged period.

Despite the advances made in irrigation farming in the Panhandle and South Plains, the fact remains that our area's economic health is closely tied to the fortunes of our ranchers and dryland farmers, and lack of rainfall means decreased income for them. When they are hurt by dry weather, as many of our wheat farmers are this year (particularly north of the Canadian River), retail and wholesale business firms, service firms of all types, and banking institutions also are affected.

Since October of last year, the Panhandle has been in the grip of abnormally dry weather. The Weather Bureau station at Amarillo Air Terminal reports only 3.5 inches of precipitation from Oct. 1 through April 30—only 57 per cent of the 30-year normal for that seventh-month period at Amarillo.

This is by no means a record. On the average, Dr. Reichelderfer reports, the October-April moisture shortage at the Amarillo station occurred in 19-25-56 when the total precipitation for that period was only 1.70 inches.

Dr. Reichelderfer says that the immediate outlook for the Panhandle — up to mid-May — is for above average temperatures with precipitation near normal or below normal. Not for the period beyond mid-May, the Weather Bureau can't be certain. To date, science has not developed a reliable method to predict moisture conditions for as long as a season or a year ahead.

"Such predictions," says Dr. Reichelderfer, "must await clearer understanding of the basic physical factors which produce the atmospheric circulation patterns which generate drought."

The Amarillo rainfall record shows that the March and April, 1963, precipitation totaled less than three-quarters of an inch. It has done this only seven times in the past 70 years.

Three of these seven dry spring seasons were followed by normal or wetter weather during the summer, two of these dry springs produced mild drought during the summer, and in two of the summers severe drought developed.

As Dr. Reichelderfer points out, this small sample does not produce results which are particularly conclusive either way. "However," he says, "it is known that this area has drought in about one year out of three, on the average. Therefore, one can reasonably surmise that drought is more likely this summer than in an ordinary summer because the chances for drought are about 1 in 2 this year, whereas the average expectancy is about 1 in 3."

One of the Weather Bureau researchers, Wayne C. Palmer, has been making a detailed study of drought. He has developed a method for evaluating drought severity. But so far, the results are in climatological terms — that is, they delineate and measure past occurrences of drought but don't solve the separate problem of drought prediction.

The Weather Bureau has not as yet tested this drought analysis procedure in Texas, but Dr. Reichelderfer says some areas of the State, including the High Plains, will be studied in the near future.

He told me, "Perhaps the results of this machine analysis will enable us to give you some estimate as to the likelihood that another major drought of several years duration has begun."

"Right now, our guess is that this will not develop into a major drought like that of the 1950's, but we have precious little basis for such an opinion," said Dr. Reichelderfer. "Let us all hope and pray for better, and wetter, conditions."

Meanwhile, the USDA Statistical Reporting Service analyst in Austin, Clarence Palmer, reports "critically dry conditions in the Northern High Plains," where strong hot winds have sapped moisture and retarded growth. Large acreages of wheat are being plowed out. Northern Low and High Plains soils remain critically dry.

By giving you this report, I am not seeking to encourage pessimism. Our people are well able to adjust to these periodic and not unexpected onslaughts of nature. But I think it is important that we all know what the situation is, as we head toward summer, 1963.

MUSICAL FALLOUT
MIAMI, Fla. (AP) — A nuclear fallout shelter salesman was puzzled by the prospective buyer's interest in whether the shelter was soundproof.

Then the customer explained he was a clarinet player and was interested in a place to practice in the pre-dawn hours after he got off work.

DUCK WHO CAME TO HITCHHIKE
ST. PETERSBURG, Fla. (AP) — Mrs. Lora P. Davis was adopted by a hitchhiking duck.

She was driving in heavy traffic when she saw the duck on the street in front of her. She blew her horn. The duck didn't move.

So she got out of the car to shoot it out of the way. Promptly fluttered in the open door and settled down. Now Mrs. Davis has a duck.

Dawn HD Club Has Program On Tornado Signs

Members and guests of the Dawn Home Demonstration Club met Friday, May 3, to hear a program on tornadoes presented by Mrs. Jean Beene. She told of the signs and symptoms in weather preceding and during tornadoes and read eye witness accounts of people who had literally looked into tornado funnels and lived to "tell the tale."
 These eye witnesses described the extremely brilliant lacework of lightning among dark, swirling clouds. The noise associated with the funnels was variously described as the sound of thousands of bees, the roar of a freight train, and continuous thunder.
 Mrs. Beene recommended a well - ventilated cellar as the safest place to be during such a storm. However many substitutes were suggested.
 Mrs. H. S. Fuller was elected to fill the position of council delegate vacated by the resignation of Mrs. Glenn Persons.

TEXAS COTTON GROWERS REPORT:

Entire Season Control of Thrips, Aphids and Mites...

Untreated plant

Di-Syston treated

Di-Syston Treated Plants Are Stronger, Straighter... Produce More Squares Earlier

West Texas and New Mexico cotton growers now have a new way to control thrip damage and early-season stunting... with Di-Syston granular insecticide. Di-Syston is placed in the soil with the seed or side dressed after planting. The chemical is then absorbed by the growing roots and carried to all parts of the plant through the sap stream—as soon as the plant emerges. No part of the plant is unprotected—even tender new growth as it is formed.

The result? With Di-Syston, your early cotton grows faster, has stronger, straighter stems, more vigorous foliage. Squares form earlier and the plant produces more of them. Many growers in the Lubbock area have reported full season control of thrip with just the one application. You get higher yields because of the good Di-Syston start. This year, get your crop off to a good start with Di-Syston. Complete instructions for use are printed on the label on every package. Use Di-Syston.

Baggarly Blasts Extremes And Censors Of Textbooks

H. M. Baggarly, editor of the *Tulia Herald*, speaking at a meeting here Thursday of the Classroom Teachers Association, lashed out at extremists and their efforts at school book censorship.

In his opening remarks, Baggarly stated that many were disgruntled and complained about the world situation. Others were making gloomy forecasts.

"I have never heard so much complaining," he remarked as he read an editorial printed in a newspaper on Oct. 10, 1947. The article deplored the state of the world and existing conditions. "It is very characteristic of today," added the *Tulia* publisher.

He also pointed out that many were disturbed about "news management." "It is that our worst worry today," Baggarly declared, "we are in good shape."

In pointing out that many people were disturbed, he told of an incident occurring during a recent talk to the Amarillo Junior Chamber of Commerce.

A young man came up to me,

he said, and stated that a bomb should be dropped on Russia and the country wiped out.

"I asked him what he was saying, and he replied that communism is nothing worse than we have today. But, what could be worse than the atomic holocaust that would follow?"

He continued, stating that he commented that a bomb wiping out the heart of Amarillo might be a good thing. "Wives of Amarillo city commissioners might not get calls at 3 a. m. telling them that their husbands were communists."

"And the Amarillo newspaper might have something else to write about other than three page - one stories on the communist menace in the U. S."

Baggarly also told of the visits and letters he had received. One of these men, he noted, had even labeled Wayland Baptist College as "a hotbed of communism."

Another caller, said Baggarly, charged that a professor's wife had tried to assassinate another professor who had been dismissed because of "his anti-communist activities."

This man even charged that

the Plainview newspaper was bottling up the news because no news stories were written on the 'assassination' attempt, he noted.

"This is the type of world we are living in today. We are doing a lot of bridge crossing, but things are not as bad as they are painted," commented Baggarly.

Among the reasons people give for being disgruntled is the national debt, the publisher stated. He pointed out that the debt since the end of World War II had risen only 17 per cent from \$260 billion to \$300 billion while the gross national product had jumped from \$200 billion to \$580 billions.

He added that during the period business debts have risen 250 per cent, state debts have gone up 400 per cent and personal debt has risen 500 per cent.

Another reason for disgruntlement is the "increasing number" of federal employees, he noted. But, population has increased 20 per cent.

In speaking, Baggarly pointed out that federal employment has dropped from 1.7 per cent in 1950 to 1.3 per cent of the population today. During the same period, the number of state employees has risen more than one per cent.

"If we deduct the number of postal employees and the men in the armed forces from the number of federal employees, the number left will be smaller than those employed by AT-&T."

As he spoke Baggarly listed other points which have caused people to be disgruntled. These included spending, the federal income tax, charges of socialism and the welfare state.

In commenting on the welfare activities of the national government, Baggarly noted that welfare costs in 1959 were 44 cents of every dollar but had dropped to only seven cents today.

Before beginning his comments on school book censorship Baggarly concluded; "I am not giving you these figures to tell you we have no problems. But the situation is not really so hopeless as some say. We are in lots better shape than they say we are."

In commenting on book censorship, he pointed out that in one state the Girl Scout handbook has been labeled as un-American while in another state "Robin Hood" has been termed socialistic.

"It is so serious it is not funny, especially when you start tampering with education," the *Tulia* publisher remarked.

Book censors come from varied backgrounds, he continued. "They have found a

cause to rally around — and that is communism."

"These people are very different. In the South they equate integration with communism. In New England, a businessman says the graduate income tax is part of the conspiracy. Soon they will be side by side in one organization, but for different reasons."

Baggarly briefly reviewed the history of book censorship and commented, "The target of textbook censors has been different in all generations, but we haven't come very far."

He pointed out that following the Civil War, a special history text was published for use in the South. Businessmen in the 1920's urged that the power companies influence book publishers in order to have a better public image.

Concerning recent attempts at censorship, Baggarly charged: "The DAR, in its censorship activities, has the blackest record of any organization. Of the 214 books on the state list, only 50 were approved and most of these were severely criticized."

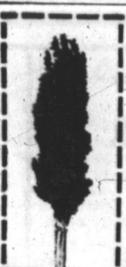

He pointed out that the "book burners" have been successful in their attempts. Publishers have been forced to change their books because they cannot print special editions for Texas.

"Why do publishers listen to these people?" he asked in concluding his talk. "Because they do not want to be martyrs."

A SCHOOL BUS AND an automobile were heavily damaged as they collided early Thursday morning at the intersection of Jackson and Seventh Streets. The 48-passenger bus was only partially loaded and no serious injuries resulted from the crash. Driver of the bus was Arnold Powell, 18, 128 N. 25 Mile Ave. The 1955 model two-door sedan was driven by John Kovacs, 16, 709 Knight. Damage to the Hereford Independent School District bus was estimated at \$350 with damage to Kovacs' automobile placed at \$450. (Staff Photo)

Grain Sorghums

At every stage in the crop season, new Pioneer brand grain sorghums offer you real advantages. Vigorous, high germinating seed gets your crop off to a fast, sure start. Uniform head height, good exertion, and strong standability—a result of advanced breeding and careful seed production—make harvesting run smoothly, helps you cover more acres per day.

Add to these advantages the high yields of Pioneer brand sorghums . . . and you have a crop that spells both profit and satisfaction.

Choose from three new Pioneer brand sorghums: 848, 846, and 820. They cover a maturity range from RS 610 to full-season numbers. Bred by one of America's leading hybrid seed producers, Pioneer brand sorghums can put you—and your sorghum crop—on "safe ground" this year.
