

'We Care' ...

(Continued from Page 1)

THE PROGRAM has been approved by the United States Department of Defense, whose assistant secretary for public affairs, the Honorable Arthur Sylvester, has said:

"It is a pleasure to have had the opportunity to review your proposed project called 'We Care.' Kiwanis International is to be commended for its fine program to be conducted on behalf of members of our armed forces, who will serve or have served in Viet Nam. The Department of Defense is most appreciative of this expression of patriotism and support on the part of your organization."

Campbell said, "Each week members of the armed forces leave our community, knowing that they are headed for military duty in Viet Nam. Each week veterans of the fighting are returning, some released, some on leave, some on new assignments, and some to hospitals.

Hereford Lions Reveal Line-Up For Convention

The Hereford Lion's Club is planning one of the biggest District 2 T-1 Conventions for April 15, 16, & 17th that has ever been planned by area Lions.

Friday night, April 15, to start things rolling, Flip Breedlove of Clearston will serve free Bar-B-Que to all the Lions and their families in the District.

Over the three day period, there'll be a golf tournament, a bowling tournament, a queen's contest, a real hot district governor's race, and somewhere in the neighborhood of eight bands and six individual acts will perform. There will be hundreds of dollars of gifts given away at the different breakfasts, lunches, and business sessions.

4-H Club Youth Guests Of Guild

For a program on the subject, Youth, members of St. Anthony's Guild invited county winners of recent 4-H Club contests to present their skills and speeches at a meeting in St. Anthony's School auditorium. Gerald Witkowski acted as master of ceremonies.

Mrs. A. Reinart presided for business and Brother Dennis Sennett spoke on Devotions to St. Joseph.

Hostesses, Mmes. Walt Warren, George Turrentine, Mable Wagner and Gerald Banner, served refreshments to 47 members and guests. The hostess prize went to Mrs. Norbert Sky-pala.

drilling and equipping a total of five wells, three of which would probably be drilled immediately.

A BOOSTER station and million gallon ground storage tank with a total cost of \$129,350 is also provided.

Extending water lines south of the creek would cost some \$87,026, Bayne said the planned lines would handle all present developments in South Hereford as well as those anticipated for many years to come.

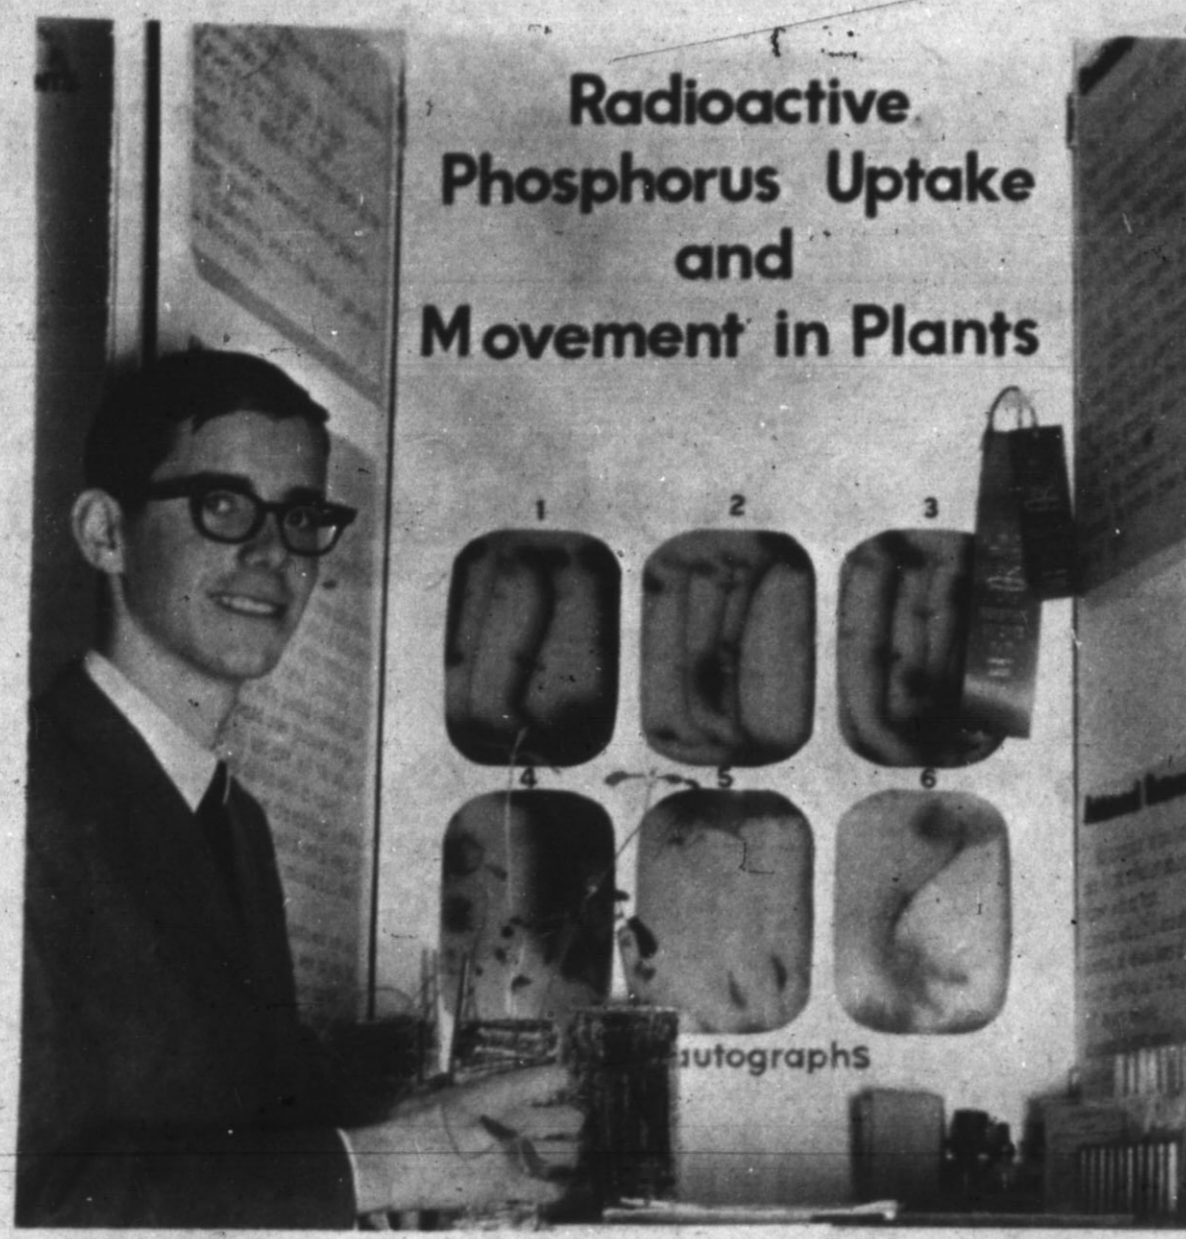

The \$173,902 for sewer expansion includes \$134,142 for South Hereford, plus the junior high school work.

Building ...

(Continued from Page 1)

compared with \$4,496,690 in 1964, \$4,379,739 in 1963, and \$1.7 million in 1962.

Prior to 1962, construction in Hereford had seldom surpassed a million dollars in a 12-month period.

WINNING PROJECT — Frank Nobles, Hereford High School sophomore, is shown with International Science Fair. See story on page the Amarillo Science Fair exhibit which has won him a trip to Dallas to compete in the one. (Staff Photo)

Cancer ...

(Continued from Page 1)

THE HOUSE-to-house solicitation is set for Apr. 25 and these workers will try to collect the remaining \$3,000 of the goal.

Section leaders are Mrs. Robert Willmot, Mrs. Glen Watts, Mrs. Johnny Clark, Mrs. Billy Wayne Sisson, Don Baugous, Mrs. Gene Parsley, Mrs. Dale Barkley, Mrs. Dale Scott, Mrs. Hugh Clearman, Mrs. Joe Frank Clark, Mrs. L. J. Clark, Mrs. Melvin Jayroe, Mrs. George Ritter, Mrs. Edwin Axe, Mrs. Bud Thomas and Mrs. Armon Lauderback.

Marcus Latham, county committee chairman, also announced that each one of the county commissioners will be responsible the crusade in rural portions of the county.

The mayor's proclamation reads:

"THE PRESIDENT of the United States, by direction of an Act of Congress, and the Gov-

Units Of Legion To Have Supper

American Legion and Auxiliary members will meet together for a salad supper Tuesday evening, preceding separate business sessions. Mrs. Jack Flynt of Dimmitt, Auxiliary legislative chairman for the Department of Texas, will be the guest speaker to discuss Child Welfare.

The supper will begin at 7 p. m. in the Legion Hall. Legion members will supply ham to accompany salads brought by Auxiliary members.

Those who cannot attend the supper are urged to come at 8 p. m. for the business meetings, the Auxiliary in the Rock Clubhouse and the Legion in the Hall.

Rural Electric Spokesman Warns Against Cutback

Much of Texas' rural electrification program would be stalled under Administration budget proposals, a spokesman for rural electric consumers of this state asserted in Washington Thursday.

The statement was made by Milton Potts of Livingston, Tex., who represents the states of Arizona, New Mexico and Texas on the National Rural Electric Cooperative Association legislative committee.

POTTS SAID the Administration proposals provide only one third of the growth capital needed by the Nation's Rural Electrification Administration program.

As a result, he asserted, Texas' rural electric systems will be deprived of most of the \$63.6 million needed to provide adequate power for a large segment of the 1,500,000 rural electric consumers of this state.

"You can't make cuts of this size in growth capital loans with out curtailing the rural economy of Texas and the rest of rural America," Potts said.

He and other regional rural electric leaders are in Washington in connection with congressional hearings on the REA budget for the next fiscal year.

The Administration's proposed budget provides only \$270 million in REA loan funds for the nation for the next fiscal year. Potts said rural electric systems in the nation will need \$707 million during that period, about two-thirds more than the Administration would provide.

Potts declared that, "under the present situation, the rural electric systems of the nation will end this fiscal year with a loan fund backlog of \$362 million, more than half the estimated current loan fund needs."

HE ADDED, "Rural electric

loans, and I stress the word 'loans' constitute a major investment in the economy of thousands of towns across the nation."

Potts acknowledged that rural electric leaders of the nation have approved proposals to provide a supplementary source of financing for rural electrification.

But he added that these proposals, despite the fact they are expected to be approved during the current session of Congress, will not be fully operating in the next fiscal year.

"Our growth capital loan need are urgent and they must be met under the existing 2 percent REA loan program," he asserted.

The supplementary proposals call for establishment of a Federal Bank for Rural Electric Systems to be financed by cooperative, government and private funds. Loans from the bank will be used by cooperatives that can afford higher cost growth capital.

The proposals emphasize the present 2 percent REA loan fund program must be continued for those rural electric systems that cannot afford higher cost loans.

DO-IT-YOURSELF PARTY LINE

LORDSBURG, N. M. — A do-it-yourself construction plan by ranches in the Red Rock area north of Lordsburg resulted in 15 of its 17 families receiving telephone service.

Residents did \$5,000 worth of work to lay \$36,000 in telephone company equipment the 25 miles from Lordsburg, in southwestern New Mexico, for the hookup.

Former Hereford Man To Head Medical Papers

J. B. Jabe) Wills, a Hereford native and son of Dr. R. R. Wills of 200 Ranger Drive, has been appointed director of advertising and public relations for the Student American Medical Association, publisher of "The Doctor and the Law" and "The New Physician," the latter of which is one of the largest official publications in the medical world.

His appointment was announced recently by Russell F. Staudacher, executive director of SAMA, at the organization's office in Flossmoor, Illinois, a suburb of Chicago.

Wills, a 1955 graduate of Hereford High, recently moved from Houston, where he had been assistant director of public relations and advertising with the American General Life Insurance Company, to accept the duties of his new post. Immediately prior to his position with the insurance firm, Wills had been an assistant editor for The University of Texas M. D. Anderson Hospital and Tumor Institute in Houston.

FOLLOWING his graduation from Hereford High in 1955, Wills attended school at the University of Colorado for two years before transferring to The University of Texas to study advertising and marketing. He received his BA degree from Texas in 1960.

Wills' interest in the fields of public relations and advertising began while he was a student in high school when he began announcing at KPAN radio following school hours and on weekends. In the years that followed, he continued to gain additional radio experience on a part-time basis as an announcer, copywriter, salesman and newsman and was working part-time at a Houston FM station at the time he accepted the SAMA post. During the intervening years, Wills furthered his experience and knowledge in advertising agency work in the Dallas-

J. B. WILLS

Fort Worth area.

Wills and his wife, Betty, who were married shortly before their departure from Houston, are living in Park Forest, Illinois.

The natural enemies of woodlands — fire, insects, disease — destroy more wood in an average year than is consumed by all of the country's wood pulp mills.

A Message to the Voters...

Albert Maxwell
Candidate for Commissioner, Place 3

Lloyd Sharp
Candidate for Commissioner, Place 4

of the city of Hereford

We would like to take this opportunity to encourage the voters of the City of Hereford to come out Tuesday and vote in the City Commission election, and to support the \$610,000 Water and Sewer Bond issue to be voted on at the same time. Although we do not have opponents in the commission race, we would still appreciate a nice turn-out at the polls, and we would also like to encourage each and every one of you to place your stamp of approval on the water and sewer bond election. This is extremely important to the future growth of Hereford. A portion of this money will go to supply an adequate sewer and water system for the new LaPlata Jr. High School. Remember . . . a light vote could spell defeat for this Bond Issue. so mark your calendar now . . . and make sure you're on hand Tuesday, April 5th to cast your vote for the future of Hereford.

COOPER'S

DOWN IN DEAF SMITH COUNTY Plains Cotton Growers Cites Production Increase For '65

The final tabulation of cotton production from the 23 Texas High Plains counties represented by Plains Cotton Growers, Inc., came to 2,205,097 running bales in 1965. This is the third largest crop on record for the area and is over 300,000 bales above the 1,899,351 bale total for 1964.

The figures were compiled by PCG from the U. S. Bureau of Census report on state and county ginnings for the 1965 crop. The last 1965 estimate of High Plains production, issued jointly by the Lubbock Cotton Exchange and Plains Cotton Growers last December 1, and 2,273,000 bales — slightly over

three percent above actual production.

HOWEVER, production in Deaf Smith County for 1965 was 8,832 bales, as compared to 11,821 the previous year.

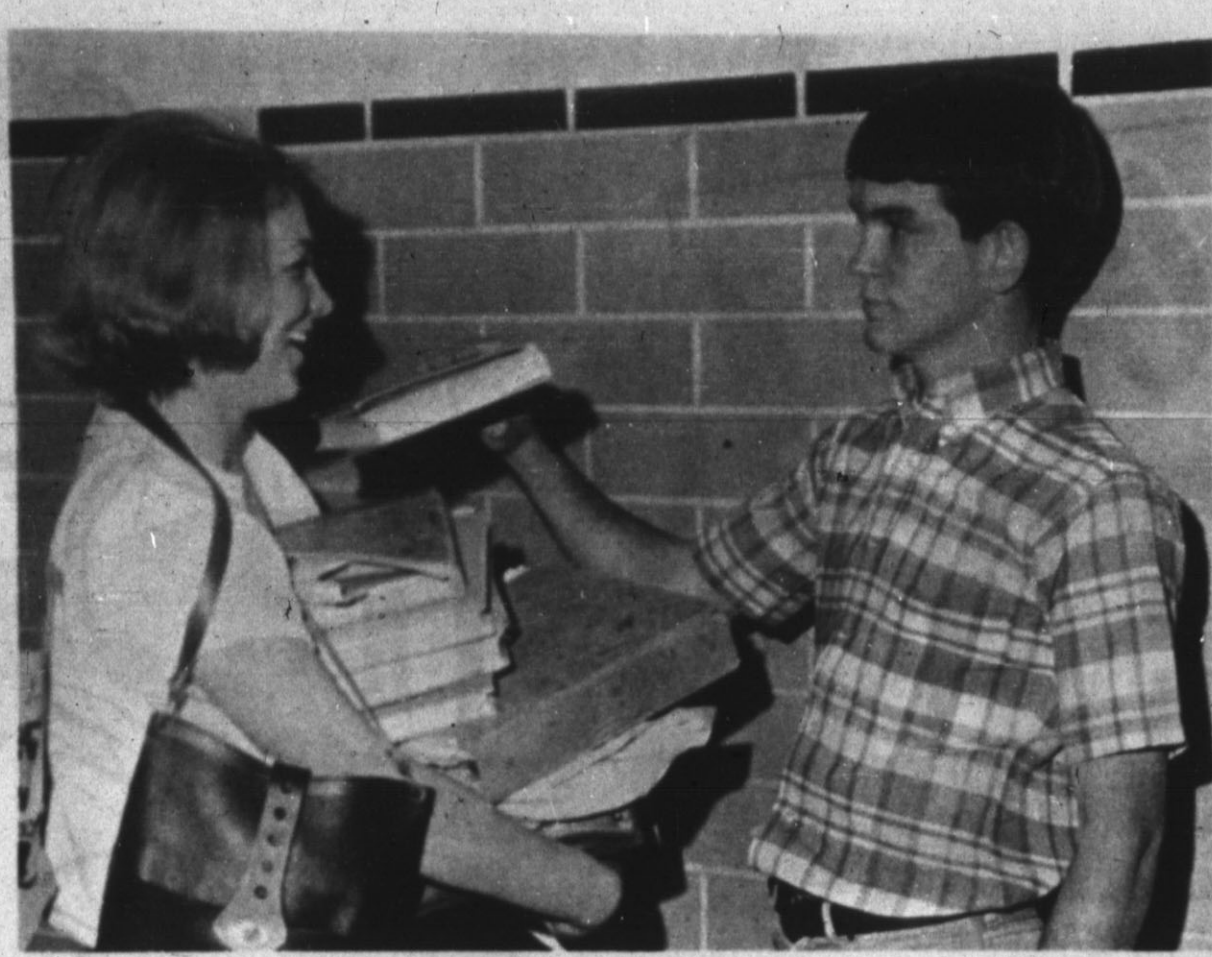

The 1965 output on the Plains was exceeded only in 1961 and 1962, when totals were 2,344,803 and 2,328,293 bales respectively. And it again enables the Plains to boast higher production than any other entire state excepting Texas itself. This was not true in 1964, when the state of Mississippi turned out 2,233,221 bales, about 300,000 bales above High Plains production for that year. But Mississippi dropped to just over 2,019,000 bales in 1965, and no other state has even been close in recent years.

The prolific High Plains area accounted for 14.79 percent or about one-seventh of the 14,912,461 bale total U. S. production, and 47.62 percent, almost one-grown in Texas.

LUBBOCK County again lead all High Plains counties with 271,943 bales, and was the fifth largest producer in the nation behind California's Fresno and Kern counties, each with over 400,000 bales, and Maricopa and Pinal counties in Arizona, with 304,733 and 277,141 bales respectively. Other High Plains counties ranking in the nation's top ten were Hale, eighth, and Hockley, tenth.

Joining Lubbock County to lead all Texas counties in cotton production were Hale 21(6,475), Hockley (199,288), Lamb (193,141) and Lynn (185,619.) These were followed in Texas by Hidalgo County which turned out 189,739 bales.

THE AIR is rife with speculation as to how much production will drop in the nation and on the High Plains under the

SCENE OF THE DAY—Hereford High School Student Council's annual Slave Day netted this and many similar results Friday as lower-classesmen went on sale as slaves for the day . . . and suffered the consequences. Joyce Beznar performs duties assigned by Gregg Johnson in this photo. (Staff Photo)

new cotton law effective this year. This law calls for a mandatory acreage cut of 12 1/4 percent on all farms and gives farmers the option of reducing cotton plantings by 25 or 35 percent with strong payment incentives offered those electing the larger cuts.

Friday, April 1 was the last day for farmers to "sign-up" with county ASCS offices to indicate their planting intentions, and the extent of acreage reduction on the Plains won't be known for some time after that. But preliminary reports show a high percentage of farmers, both on the Plains and elsewhere, taking the maximum 35 percent reduction.

So it is probably safe to say that this area has seen its last 2 million bale crop, at least for the four years of this program.

Total 1965 cotton production, with 1964 figures for comparison, is shown below for each of the 23 High Plains counties.

E. A. Spurgeon, Ex-Resident, Dies Thursday

Edward Aaron Spurgeon, 64, died Thursday in an Amarillo convalescent home after a long illness. Funeral services were conducted in the Rose Chapel of Gilliland Funeral Home Friday afternoon, and burial was in West Park Cemetery here.

Before he moved to Amarillo about a year ago, Mr. Spurgeon had resided 20 years in Hereford. He had been a patient in a hospital here several weeks this year.

Born Aug. 19, 1901 in Potts County, Okla., he married Mary

E. Roseberry April 8, 1927 in Anson. They came to this county from Anson in 1945.

Survivors are his wife, three sons, Andrew Spurgeon of Hereford, Jerry of the U. S. Air Force and David of Goldsmith; three daughters, Mrs. B. W. Dennis of Friona, Mrs. J. L. McNabb of Amarillo and Mrs. L. P. Holland of Lost Angeles; and 19 grandchildren.

Gaither Vanderveer, Church of Christ minister, officiated for the funeral rites, Pall bearers were Dean Nixon, Bill Kendall, Rocky Lee, Les Thompson, Gordon Elliot and Sherman Dufar.

The mystery of color in certain diamonds has been explained by Johannesburg scientists. Research has disclosed that most diamonds contain particles of nitrogen gas and carbon; amount and arrangement of the nitrogen atoms determines a diamond's hue.

REP. ROGERS REPORTS

Congress Studies Promotion Of The Nation's Rural Areas

Some people in the Government are contending that areas of the United States primarily rural in character are not developing as rapidly as are metropolitan areas where, it is alleged, standards are continually rising. On the face of it, there are grounds to challenge any contention that metropolitan standards are rising.

Some of the same people who make the above comparison say in the next breath, that the cities are falling apart at the seams and that the quality of urban life has never been so low. The attitudes of American citizens would seem to support this latter view.

A RECENT national opinion poll showed that while only a third of Americans live in rural areas, nearly half of all Americans would prefer to live in small towns or on farms.

At any rate, it is recognized by everyone that the years ahead are to bring a rapid increase in U. S. population, and that by 1975 this country will have some 225 million citizens. It is obvious that crowding more millions into the already congested cities, which now face very serious problems of transportation, education, and air pollution, among others, is not a desirable solution for the future.

BROADER opportunities need to be developed in every corner of America, in small towns and large, in rural areas as in urban. Business leaders and men in public life at all levels recognize this, and policies public and private are being developed to encourage more diversified growth. Several bills are before the 89th Congress aimed at promoting rural development.

Among them is the proposal entitled the "Community Development District Act of 1966." Deliberations have not yet begun on this measure by the Agriculture Committee of the

House and Senate but are expected to begin shortly. The measure would provide for "Community Development Districts" to be established to plan and coordinate area-wide development of facilities and services.

Whether this legislation will be generally supported in Congress and the country remains to be seen, but it points up the fact that thought is being given to the future.

WE IN THE Panhandle have a story to tell about area development — and the pattern we can show could well be studied and imitated elsewhere. Blessed with abundant resources and excellent soils and climate, the people of the Panhandle have been able to put together in a relatively short period of time a unified economic base offering a broad range of opportunities in agriculture and industry. As further strides are made in developing the Panhandle's agricultural potential as well as its mineral resources, we are going to witness a steady upward curve in population in our towns and on the land and an increasingly larger choice of vocations to attract Panhandle young people who wish, after graduation from high school or college, to make their permanent homes in their native area.

I have "talked up" the Panhandle to business and industrial leaders for years, as have many of you. I'm convinced that American business is becoming more and more aware of the advantages of diversifying operations. We have seen some of this in the Panhandle and we will see more as the men — men in private enterprise — who make these decisions recognize the reserve of skilled, willing, enthusiastic men and women.

BUSINESS and industry have a stake in halting the trend to crowd the already crowded urban centers of the country and

A CAKE FOR THE DOCTORS — As part of the observance of Doctors Day Wednesday, members of Hereford High School Red Cross group presented a decorated cake to doctors at Deaf Smith County Hospital. Kathy Miller makes the presentation to Dr. C. E. Hicks, chief of staff at the hospital. The car-

Extra copies of the employee fact sheet, Document 5642, may be obtained from the nearest IRS District Office.

There are more than 225 apparel-manufacturing plants in the Lehigh Valley area of Pennsylvania comprising Lehigh and Northampton counties. With more than 23,000 workers in the industry, the annual payroll is more than \$70 million.

are looking for opportunities to move out. Areas like our Panhandle will be the beneficiaries.

Meanwhile, we must continue our efforts to see that the agricultural economy is strengthened and that opportunities on the farm are not neglected. The root of America is still in the soil.

WALTER ROGERS
MEMBER OF CONGRESS
18th DISTRICT OF TEXAS

**Tax Changes
Warrant Filing
New W-4 Form**

Why most employees should file a new Form W-4, Withholding Exemption Certificate, is the subject of a special one-page IRS fact sheet, Document 5642, now available from employers.

The reason for filing a new W-4, according to Ellis Campbell, Jr., IRS District Director for the Dallas District, is "to enable employers to withhold the correct amount of income tax under the new withholding system that will go into effect May 1."

Under the system established by the recently enacted Tax Adjustment Act of 1966, the withholding tax on wages will be more exact than in the past. Withholding will be based on six graduated rates instead of the present flat rate of 14 percent.

BEGINNING May 1, the amount of tax withheld will depend

on 1) marital status, (2), the number of exemptions claimed on Form W-4 filed with an employer and 3) the amount earned.

"After May 1," Mr. Campbell explained, "an employee will be treated as a single person — and thus have more tax withheld — unless he files a new Form W-4 indicating he is married. Widows and widowers, too, will be concerned with filing a new Form W-4," Mr. Campbell continued.

"For withholding purposes they are considered married for two years following the death of a husband or wife, but will be treated as single if they do not designate 'married' on their Form W-4."

Sample tables in Document 5642 show weekly withholding amounts under both the old and new systems. By examining the comparative figures, most persons will be able to determine how many lawful withholding exemptions to claim in order to prevent too little or too much being withheld from wages for tax purposes.

Whitefaces Take Victory In Friday Pitch, Hit Duel

Betts, Diaz Strike Out 14 In Skirmish

Hereford Whiteface baseball players took their second win of the season in a pitch-hit duel with the Lazbuddie Longhorns Friday by a 4-2 score.

The locals had originally been scheduled to play the Bovina nine, but the Mustangs cancelled out at the last minute because of a track conflict, but the two teams will play Tuesday in Bovina.

Coach Don Dorman played most of his second string against the 2-B team in the game with Lynn Betts starting off on the pitcher's mound.

BETTS WAS relieved in the fourth inning by Alex Diaz who continued the pitching duel begun by Betts.

While on the mound, Betts, a sophomore, struck out four of the first three innings. In the final four innings Diaz struck out nine batters.

Lazbuddie took the lead in the second inning, 1-0 and in the third inning added another run

to the score, taking a 2-0 lead. BUT THE Whitefaces retaliated in the bottom of the third inning to tie things up at 2-2 when Gary Tucker hit a home run driving in Ray Martinez.

HEREFORD scored two more runs in the fifth inning to give them the final lead.

The win gave the Whitefaces a 2-7 record for the season. The only other win was a 12-7 victory over the Plainview Bulldogs earlier in the season.

Lazbuddie's Bobby Morris handled the pitching duties and

struck out four Hereford batters.

This was the first game of the season for the Longhorns giving them an 0-1 record for the season.

HEREFORD'S MOST consistent hitter, Robby Lemons, who sports a .368 batting average was in Amarillo with the track team for the Amarillo relays.

But Barry Johnson who has a .333 batting average connected for a single in the action. Gene Duvall, Hereford's third high man, who has a .295 batting average, batted only once and flied out.

Tucker connected for a home run in the early part of the game and drove in Martinez for two runs.

THIS WAS the second home run of the season for Tucker who hit the first in the game with the Plainview Bulldogs.

Coach Dorman said he was "well pleased" with the efforts of the men on the team.

HEREFORD will go into action again Tuesday when they travel to Bovina for a game there.

Sports

footnotes

by david butler

Hereford golfers have surely made a good show this year and if everything keeps "Comin' up Roses" for the team it looks as if they might waltz off with the district 1-AAA title.

IT IS HARD to tell about the baseball team yet, since they have not been evenly matched yet this season. All of their earlier games were with tough 4-A schools and the last with Lazbuddie was mostly second string players against the 2-B school.

Dumas is shaping up well in the baseball world with their record blemished only once by the Amarillo Sandies.

Not much has been said about the Canyon Eagles who opened their first baseball season this year.

Whiteface thinclads are also showing some talent this year with a second place in the Wayland meet last weekend.

Only Tulla was in that meet and they finished in the bottom ranks of that meet.

THE FINAL district golf meet and the district track meet are both scheduled in Perryton for Apr. 16.

That should be an eventful day for the Whitefaces in both of the sports.

HEREFORD scored a 326 for the day and Muleshoe was eight strokes behind with a 334.

Dumas was third with a 335 and the Hereford B-team scored a 346 for fourth place honors.

Perryton placed fifth, Canyon sixth and Tulla was seventh for the tournament.

HEREFORD was picked early in the season to take the title and Muleshoe was selected for a close second.

Winner of the district crown will be decided Apr. 16 in Perryton during the final meet of the season.

THE DISTRICT champions will then travel to Odessa where they will play in the regional meet for the region I title.

HEREFORD lost the title last year to Muleshoe. The scoring has been revamped since that time. Only one tournament decided the winner last year, whereas this year the total scores of six meets will be used to decide the winners.

Phillips was the low man for the Whitefaces, Roger Owen was next with an 81, Mike Horton scored an 83 and Jimmy Young and Steve Hendon both scored an 85.

FIVE PLAYERS enter for each team and the low four scores count toward the team score.

The golfers will take a weeks rest from action with the Easter Holidays, but will return to action for the last meet of the season in Perryton Apr. 16.

Baseballers On The Road

Hereford baseballers will spend this week on the road. Tuesday the Whitefaces will be in Bovina and Friday they will be in Nazareth.

HEREFORD was originally scheduled to play Bovina last Friday but the Mustangs had to cancel at the last minute due to a track conflict.

The Whitefaces will begin conference play Apr. 28 when they clash with the Canyon Eagles here at 3:30 p. m.

REPORT

Morning Star Bluebirds, composed of girls from Bluebonnet School, learned about life of a girl in the Philippines when they had Teresita Parba as guest at their meeting in the Camp Fire Hut Friday.

Miss Parba, exchange student in Hereford High School, told the members about her home town in the Philippines, and about schools, play and family life of children who grow up there.

Members present were Twana ha Kendrick, Beverly Cole, Karen Criddle, Mary Ann Escobal, Deborah Taylor, Karen Anstey, Eleanor Gamez, Pat Barrera and Caroline Arellano.

Water buffalo are used extensively as draft animals by the Vietnamese, especially in the rice paddies.

The estimated population of South Vietnam is 14 million, while North Vietnam has about 16 million inhabitants.

Adrian Man Takes Top Place In Club Shoot

Jim Brown of Adrian was top scorer at the Hereford Gun Club Registered Shoot Sunday afternoon.

BROWN BROKE 287 of 300 targets in the event. Jim Cramer of Hereford was the second high scorer, breaking 275 of 300 targets.

This was the second registered shoot this year for the local club and participants, from the area turned out some 30 strong.

Approximately 150 spectators turned out during the good weather to watch the participants in the event.

The club has scheduled a registered shoot each last Sunday of each month during the shooting season. During the other weeks members of the club participate in shoots in other towns in the area or participate in the practice shoots held at the local gun range.

JIM BROWN and Sammy Lesly tied for first place in the Class A shoot, Brown broke 25 straight targets for the title in the tie breaker. Lesly broke only 23.

In the Class B competition James Higgins broke 97 of 100 targets for first place honors. S. M. Johnson took first place in the Class C event when he broke 96 of 100 targets.

John Bolorie took first place in the Class D event when he broke 94 of 100.

Wins Second In Area Race

Members of the Hereford Riders Club placed second in a canyon express race held in Canyon recently.

Express racing has become one of the favorite sports for the members of the club.

Club officials are encouraging interested persons in this area to ride with the club.

Those participating in the race were Johnny Clark, Marvin Finley, L. J. Dirks, Fred Roland, Clifford Johnson, Jimmy Cooper and J. A. Crofford.

Kiwanis Club Makes \$1,500 In Broom Sale

Hereford Kiwanis Club members sold over \$1,500 worth of brooms and mops during their annual sale last week.

Club president Gene Campbell said that the money would go to charity in more than one way. The local club's portion of the funds will go for civic work and toward a scholarship which will be presented to a Hereford High School senior at graduation.

He also said that the other part of the funds go to the blind people who make the brooms and mops which are sold.

The sale is one of two annual money making projects scheduled by the local club.

I-40 Surfacing In County OK'd

The application of additional surfacing to a 15-mile section of Interstate Highway 40 in Deaf Smith and Oldham Counties has been approved by the Texas Highway Commission.

The project will extend from 1.0 mile east of the New Mexico State Line to Caprock. Cost of the project is estimated at \$550,000.

HOLD CONFERENCE LEAD

Whitefaces Gain Eight Strokes In Canyon

Hereford Whiteface golfers gained eight strokes to increase their season lead to 48 strokes above Muleshoe who is in second place.

RUSSEL Phillips who replaced Andy Channer on the varsity team for this weekend while Channer was out of town scored the low score of the day for Medalist awards.

Phillips scored a five over-par 77 despite the bad golfing weather.

Jimmy Young managed to hang onto his medalist lead for the season by one stroke after a bad day and a 13-over-par 85 score.

Sam Johnson is right behind him with only one stroke separating them.

HEREFORD scored a 326 for the day and Muleshoe was eight strokes behind with a 334.

Dumas was third with a 335 and the Hereford B-team scored a 346 for fourth place honors.

Perryton placed fifth, Canyon sixth and Tulla was seventh for the tournament.

HEREFORD was picked early in the season to take the title and Muleshoe was selected for a close second.

Winner of the district crown will be decided Apr. 16 in Perryton during the final meet of the season.

THE DISTRICT champions will then travel to Odessa where they will play in the regional meet for the region I title.

HEREFORD lost the title last year to Muleshoe. The scoring has been revamped since that time. Only one tournament decided the winner last year, whereas this year the total scores of six meets will be used to decide the winners.

Phillips was the low man for the Whitefaces, Roger Owen was next with an 81, Mike Horton scored an 83 and Jimmy Young and Steve Hendon both scored an 85.

FIVE PLAYERS enter for each team and the low four scores count toward the team score.

The golfers will take a weeks rest from action with the Easter Holidays, but will return to action for the last meet of the season in Perryton Apr. 16.

WE WOULD like to express a big "thank you" to the basketball mothers for the fine award presented to us at the annual basketball banquet last Friday.

Recognition should be given to the mothers for their fine work in giving a nice banquet. Coach Gene Gibson, of Texas Tech, also gave a fine talk to both the athletes and other members of the audience.

And of course recognition should be given to Steve Hodgins who won the Fighting Whiteface award and to Robby Lemons who won the Hustling Whiteface award.

Both of these boys did an outstanding job on the basketball team this year, but a number of other players also did good jobs for the Whitefaces this year.

ROBY LEMONS not only did a good job on the basketball team, but he is sporting the highest batting average for the Whiteface baseball team.

EASTER VALUES GALORE! EASTER VALUES GALORE! EASTER VALUES GALORE! EASTER VALUES GALORE!

BRAKE FAILURE BLAMED — A Deaf Smith County woman, Mrs. Vivian Burke of Rt. 4, Hereford, received two broken legs and other less serious injuries when the brakes on this 1964 model auto apparently failed, causing her to

miss a turn on a rural road some 23 miles northwest of Hereford. The mishap occurred Friday afternoon. See story on page one. (Staff Photo)

Texas Vehicle Inspection Law Deadline Near

Approximately three quarters of a million Texas vehicles have only until Friday, April 15th to be inspected as required by law, according to Captain Alan Johnson, Commander of the Motor Vehicle Inspection Service of the Texas Department of Public Safety.

"In the remaining days of the inspection period, it is possible for the State's 5,350 license inspection stations to handle the

last minute inspections only if motorists take their vehicles in immediately so there will be no delayed periods between inspecting one vehicle and the next," he said. The first of the last week is usually not too crowded as the lines begin forming on the last two days due to motorists waiting to the very last minute.

"FROM NOW until the deadline, every minute of the inspection station's time will be at a premium, and waiting lines will become general throughout the State as it approaches."

Johnson urged all Texans to avoid the inconvenience of waiting in line to get the safety inspection sticker for 1966 by tak-

ing immediate action now. He said that beginning Saturday, April 16th, officers will be obliged to start handing out tickets the Motor Vehicle Inspection law which requires an annual safety inspection of vehicles.

WHEN IS A HIDE-AWAY NOT A HIDE-AWAY?

CHICAGO (AP) — There's a "Hide-Away" here that isn't a secluded night spot. It's a piece of equipment heavily used by the meat processing industry. It removes hides from cattle carcasses. Officials of the Allbright-Nell Company, which makes it, say the hide remover can process up to 75 cattle an hour.

Alcoholism Committee Discusses TANE Meet

Members of the Deaf Smith County Council on Alcoholism met Wednesday morning with the Rev. Ron Harpster presiding in the absence of Mrs. O. G. Hill Sr., president. The program was presented to the group by Roy Harris, assistant principal of Aikman School. HARRIE GAVE a detailed report to the group of a Texas Alcohol and Narcotics Education (TANE) meeting which he recently attended at Baylor University in Waco. During the two-day meeting the group discussed alcoholism, smoking and the growing narcotics problem. Different speakers tackled the alcoholism problem from three different angles.

The first outlook was the economic phase. Although many persons think that the community benefits from the local sale of alcoholic beverages, this is not true. Many costs to the county caused directly or indirectly by drinking more than offset the revenue from the sales. THE SECOND phase was the psychological aspect. This portion of the discussion covered the why of, or the reason for a person's addiction to alcohol. Harris pointed out that 70 percent of the persons who drink today began drinking when they were teenagers. He pointed out that the teachers and coaches in the school system play an important role in teaching the dangers on alcohol to the youngsters at that

age. The third phase was the social effects that alcoholism plays on the community. IT CAN cause a number of social problems. A large percentage of crimes are directly blamed on alcohol and an even larger percentage are indirectly connected with alcoholism. During the second day the group discussed the smoking problem and diseases connected with it. A chest specialist from Dallas conducted the discussion and brought out the greater possibilities for the smoker to contract lung cancer. The speaker said that a smoker had a 600 per cent better chance of contracting lung cancer. Although smoking has not been blamed as a direct cause of lung cancer, it has been proved that smokers are more susceptible to the disease.

AT ROGERS-MILLER WALGREEN DRUG YOU PAY ONLY

***You'll find these two
little words bear investigating!***

DON'T JUST SIT THERE GROWLING because you haven't found a renter for that vacancy, the help you want to hire, or a buyer for something you want to sell. There's an easy way to do it that bears investigating. Just grab the phone, dial EM 4-2030, and see for yourself how fast things happen when you place a Want Ad in The Hereford Brand or The Sunday Brand.

THE BARE FACTS are these: (1) For an average of only \$1.00 per insertion you can have a six-line ad—about 20 words—for four times (if you need it that long) in the finest paper in the Magic Triangle. (2) A Brand Want Ad always produces results because readers have all day to react to and respond to your ad.

MAKE TRACKS right away to your telephone and see for yourself what happens when YOU run a Brand Want Ad. Someone is probably HUNTING right now for just what you have to offer.

JUST DIAL THIS NUMBER

EMBLEM OF THE FTA is displayed by Barbra Zinser, president of Hereford High School Chapter, as she stands in the main hall of the school with Miss Ann Warwick, sponsor. Miss Warwick is a first-year teacher, whose assignment is typing shorthand instructor in HHS.

A POSTER HERALDS Teaching Career Month on the bulletin board at Hereford High School. Martha Alkin, left, was a member of the committee which arranged the display; Gwen Cargo and Gayle George are others in the high school's FTA Chapter.

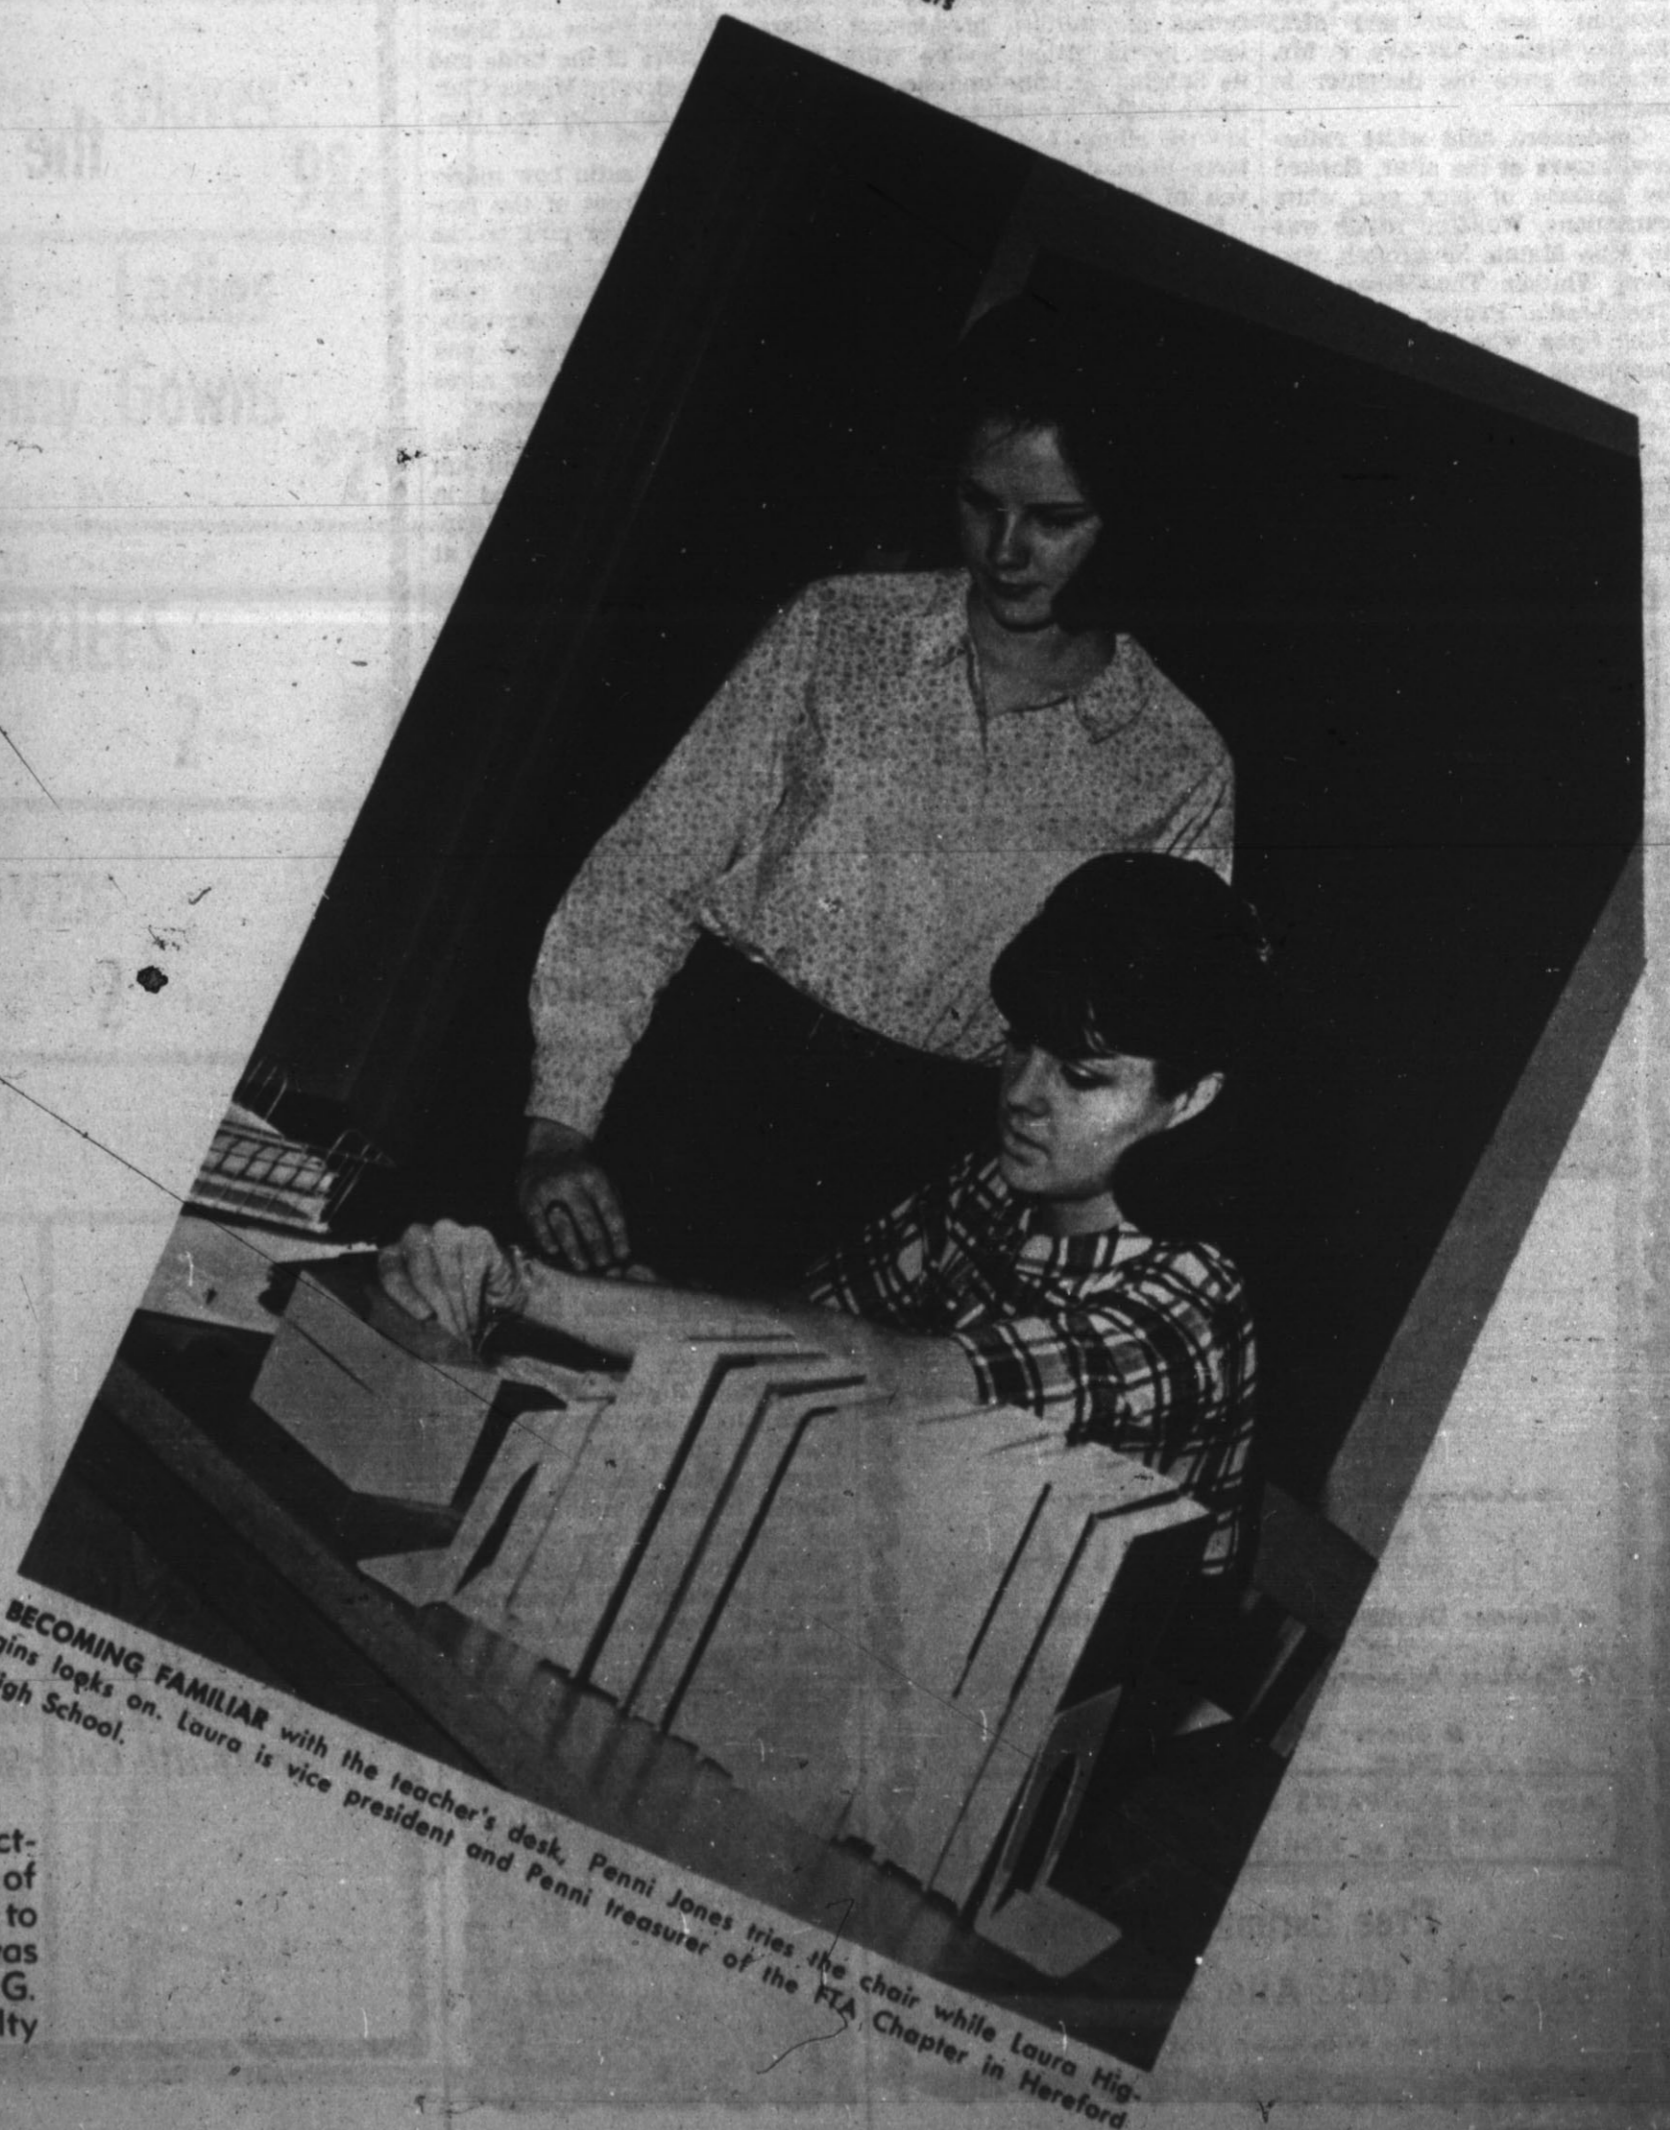

PAST ACTIVITIES of the FTA Chapter here are recorded in scrapbooks, shown here by Pam Winget, left, reporter, and Nancy Smith, historian who also serves as parliamentarian. Cynthia Knox, not pictured, is secretary of the chapter this year.

Teaching Careers Are Anticipated

FUTURE TEACHERS OF AMERICA are observing April as Teaching Career Month, with the Hereford High School Chapter calling attention to their prospective profession. A day will be designated for an annual practice-teaching event, when each of the 48 members will spend school hours in an elementary classroom, acting as

teacher under supervision of the regular instructor. Chartered Feb. 21, 1950, the local chapter of the FTA meets monthly and sends delegates to such meetings as the state convention which was held this year in February at Austin. Mrs. F. G. Collier and Miss Ann Warwick are faculty sponsors.

BECOMING FAMILIAR with the teacher's desk, Penni Jones tries the chair while Laura Higgins looks on. Laura is vice president and Penni treasurer of the FTA Chapter in Hereford High School.

Mrs. Stanley T. Sigman Jr.
... nee Miss Gerry Lynn Wheeler

(Angel photo)

Miss Wheeler Is Bride Of Stanley Sigman Jr.

Marriage vows for Miss Gerry Lynn Wheeler and Stanley T. Sigman Jr. were repeated at the flower-decked altar of First Presbyterian Church in a mid-afternoon ceremony Saturday with the Rev. Russell Wingert, pastor, officiating.

Parents of the couple are Mr. and Mrs. G. S. Wheeler, 112 Douglas, and Mr. and Mrs. Stanley Sigman, 127 Ave. F. Mr. Wheeler gave his daughter in marriage.

Candelabra held white cathedral tapers at the altar, flanked by baskets of pink and white carnations. Wedding music was by Miss Mamie Silvertooth, who sang Whither Thou Goest and The Lord's Prayer, and Mrs. John Sims, who played accompaniments and the marches.

Mrs. Pat Gallagher attended her sister as matron of honor and Mrs. Tommie Tatum of Black was bridesmaid. George Muse acted as best man, Bob Callahan of Perryton, Dick Look

ingbill, Jerry McCaslin and Jim Carter as ushers.

A bouffant skirt of silk-faced peau de soie swept to the floor and rounded into a chapel train beneath the lace bodice of the bride's gown. A flat bow of the material topped added fullness at center back.

Seed pearls and sequins accented the pattern of Alencon lace in the fitted bodice with its Sabrina neckline and sleeves which ended in scallops just below the elbow. Lace petals, similarly decorated, held her pouf veil of silk illusion layers.

Her crescent bouquet of white roses, stephanotis and ivy was placed on her grandmother's prayer book. Another touch of sentiment was in the lace trimmed handkerchief, also belonging to her grandmother, which she carried.

Both attendants were dressed in pink peau de soie, styled with fitted bodice, cap sleeves and full skirt. Their matching hats were worn with pink fingertip veils and accessories were in white. Their flowers were gardenias tied in nosegays with pink satin ribbon.

The bride's mother chose a two-piece beige knit for her costume, matched in the color of

her hat and gloves. Other accessories were black patent and her corsage of white carnations, like that of the bridegroom's mother who wore a beige suit with accent of burnt orange in accessories.

Mr. and Mrs. Wheeler were hosts in their home for the reception. In the house party were Misses Mary Wheeler and Shaun Sigman, sisters of the bride and groom respectively, Misses Clark Adams, Jan Story and Donna Hill.

A large pink satin bow marked the center front of the lace tablecloth laid over pink on the refreshment table. The tiered pink and white wedding cake topped with white wedding bells, and the crystal bowl of pink punch repeated the color notes of the carnation centerpieces.

After the reception Mrs. Sigman changed to a blue knit suit trimmed and accessorized in white, for a short wedding trip. The couple will be at home at 510-A Roosevelt.

The bride, an employe of Hereford State Bank, attended West Texas State University, where the bridegroom is now a student. He is employed by South western Bell Telephone Co. Both are graduates of Hereford High School.

Young Pianist, Nicholas Osborn To Be Presented In Solo Recital

Nicholas Osborn will be presented in solo piano recital at 3 p.m. today in Hereford High School auditorium, a program open to the public, sponsored by the Music Study Club and Hereford High School Band.

Members of the club will be hostesses for a reception in the in the homemaking room of the school.

A pupil of Virgean Estes Latson of Amarillo, the young pianist will be accompanied in one number, the opening movement of Grieg's Concerto in A Minor, by a wind ensemble from the HHS band under direction of Ben Gollehon.

He will begin the program with the allegro section from Toccata in G by Bach, then play all three movements of Beethoven's Pathetique Sonata. Other selections are Hunting Song (Mendelssohn), Bagatelles No. 1 and 10 by Tcherenpin, a Debussy Arabesque and Rachmaninoff's Humoresque.

Osborn is the son of Mr. and Mrs. Glen Osborn, a senior in HHS. He is pianist for the school's award-winning stage band and in the percussion section of HHS band. Frequently asked to accompany vocal and instrumental soloists, he also serves as an organist in Immanuel Lutheran Church here.

He began piano lessons at the age of seven and has been studying the past year with Mrs. Latson, who has taught in Amarillo since 1953. She is a former con-

Nicholas Osborn

cert pianist and professor of piano at North Texas State University, a scholarship pupil of Percy Grainger and Rudolph Ganz and holder of the master of music degree from Chicago Musical College.

VET FOR EVERY 70,000

LIMA, Peru (U) — A University of San Marcos report says there are 70,000 domestic animals in Peru for each veterinarian. The report from the university Veterinary School says there are 700 licenses veterinarians and about 49 million domestic animals.

Couple Will Be Host On Anniversary

A day before the actual anniversary date, Mr. and Mrs. Vance Crume will celebrate their Silver Wedding next Sunday with open house at their home, 218 Ave. J, from 3 to 6 p. m. They were married April 11, 1941 at Farwell.

As newlyweds, they lived in Hereford until Crume began World War II army service in 1943. Afterward they made a home in Friona from 1945 to 1952, then moved back here and have since resided at the same address.

Both are members of Farwell families. Mrs. Crume is the daughter of the late Mr. and

Mrs. W. H. Graham Sr. and Crume the son of C. E. Crume and the late Mrs. Crume. Three daughters were born to the Hereford couple, two of whom are living. Mrs. Judy Nelson resides in Canyon and her younger sister, Prissy, is a schoolgirl here.

Assisting Mr. and Mrs. Crume in receiving callers next Sunday

afternoon will be Mrs. Cliff Ford Galley of Amarillo, Mrs. Carlton Richardson, Mrs. Fredy Mulkey Jr., Mrs. John Gooch and Miss Dianne London. The couple invites their neighbors and friends to the informal reception.

Gardeners Win District Awards

Three first-place awards and a second were brought back by Hereford Garden Club from the convention of District I, Texas Garden Clubs Inc., which closed Wednesday afternoon in Lubbock. The district governor, Mrs. O. G. Hill Sr., was one of the Hereford delegation.

Mrs. Ray L. Johnson, president of Hereford Garden Club, said the club takes special pride in the second-place award, on its yearbook, since it was in competition with the seven other Honor Roll Clubs in the district. The local club totaled 98 1/2 points only to be barely outpointed by a larger Midland club.

First place on its club history and president's report, and first in percentage of members attending the convention were awarded to Hereford Club. It had 11 members at the Lubbock meeting.

In addition to Mrs. Hill and Mrs. Johnson they were Mmes. A. L. Manjeot and R. L. Eth-

ridge, district board members, Mmes. A. O. Thompson, C. D. Kelson, J. V. Pickens, Ben Childers, G. W. Newsom, S. S. Williams and John Jacobsen Jr. Attending from Bud to Blossom Club, a newer group in Hereford, were Mrs. Sam Long, president, Mrs. R. N. Yarbrow, district board members, Mmes. Ernest Kendall, W. H. Gentry and Ray Polan.

In convention business sessions Mrs. Lee Coil of Lubbock was elected as next district governor, to succeed Mrs. Hill at the end of her term next spring, and Big Spring was chosen as the 1967 convention city.

10-DAY APART TWINS
DIGHTON, Kan. (AP) — Roy Hampson's holstein cow delivered twins — 10 days apart. A 50-pound calf was born 10 days after the cow delivered a 70-pound calf. A veterinarian put the odds of such an event at 1,000 to one.

Church Honors Minister On 20th Anniversary

Twentieth anniversary of the Rev. Russell A. Wingert as pastor of First Presbyterian Church here was marked with a recep-

The Rev. and Mrs. Russell Wingert and Son Andrew

tion and brief program in the church fellowship hall last Sunday afternoon, when members of the congregation were hosts to a number of other friends. A plaque engraved to denote appreciation of the church to the minister and his family was presented with a check, the gift of church members and others in the community.

Mrs. Austin-Rose Jr. made the presentation with a sketch of the minister's work here and expression of appreciation for his services as pastor and Mrs. Wingert's in organization of the church music and Sunday School program.

Their contributions to civic movements as well as to their church were mentioned.

Mrs. Rose noted that two building campaigns have been carried out during his tenure, for construction of the sanctuary in 1950 and of additions in 1957, when a new manse was also purchased. Humorous and serious incidents of the congregation's association with the Wingert family were recalled in her talk.

Major Schroeter presided for the program. The invocation was by Francis Hardwick and the benediction by Charles Frye after the Rev. Mr. Wingert had responded to the gift presentation.

came to Hereford just after he had completed military service in World War II. They have two children; a daughter, Anne, now lives in Dallas, and nine-year-old son Andrew was with them at the reception.

Refreshments were served after the program, when Mrs. Lee Conklin, Mrs. George Millard, Mrs. Emmett Milburn and Mrs. W. S. Kerr poured coffee. Jonquils and other spring flowers decorated the table and the piano.

AND WIFE THOUGHT SHE LOST IT IN LAUNDRY

LOUISVILLE (AP) — During a recent heavy snow, one of the tire chains started banging on the fender of Chester Sullivan's auto.

Sullivan thought for a moment, stopped and used one of his socks to tie up the loose end of the chain. The repair job lasted three days.

Sullivan said he didn't use his necktie because the sock was less costly.

THE NEW PEOPLE

After reading an advance review of Edith Iglauer's, "The New People," in the Saturday Review magazine, we were glad when our library obtained a copy.

The book's sub-title gives a better idea of the contents, "The Eskimo's Journey Into Our Time." The setting is in the extreme northern part of Canada.

After thousands of years as nomadic people, who hunted, fished and carried on whaling for food and oil-fuel, they found their way of life vanishing. Many starved and others were forced on relief, to be fed by the Canadian government.

OUR OWN Alaskan Eskimos fared better because, as the author says, our people realized their needs sooner, and did something about it. There is a slight resemblance in the time of this book to our recently reviewed "The Barbarians of Manta." The last named found America's Peace Corps helping the underprivileged people of Ecuador to find a better way of life. In this book the people are led by their government to work out their salvation.

Trained leaders surveyed first then developed the plan where-in organizational meetings were held in many communities of the Eskimos. They were encouraged to think for themselves, as to their needs, how to develop their resources and choose their own leaders.

STRONG, able men and one woman were selected either by blood rank, able leadership, men with a following, or education — especially their knowledge of English — so as to present the plans to the people.

Final plans were worked out in the form of co-ops. These were developed on each community resource — and where there were no resources the people were encouraged to settle some place in a community of their choice. Co-ops set up included fishing, with plants built to can or freeze fish. They were then sold in Canada, the United States and other countries. Other resources developed were lumbering with mills set up to take care of this developed for both food and fuel trade with other communities. The preservation of their culture in form of arts was worked out in projects of painting, carving, the best of these were bought by the government for resale. No tourist or cheap wares were bought or sold. Even their own kind of boats for sale was another development for trade co-op.

THE AUTHOR, who is lauded by the Saturday Review and even the sophisticated critic of Time magazine, says she was fortunate to be able to watch this transition development. She attended, with the organizers, many community meetings in the frozen north to write the story firsthand. She went by large and small planes, dog-sled and even walked and climbed as much as two or three miles over deep snow. This is most difficult thing to do. But by watching Eskimos she learned to bend forward at the knees so she would not sink.

They met in igloos, tents, bark-like buildings, schools, churches and any building large enough. They were often jammed with people.

This is a recommended book for family reading and for those interested in co-ops-but we think it will be interesting to any reader.

—Corinne J. Neely

SOLDIER NEEDS STATURE
NEW DELHI (AP) — A member of Parliament asked Defense Minister Y. B. Chavan why, in this atomic age, persons only 4 feet 3 inches were not acceptable to the army.

Chavan replied a man that short might make a good parliamentarian, but not a good soldier.

Engagements Announced For Two In Family Here

Plans for two June weddings in a Hereford family are revealed today, as the Rev. and Mrs. Noah Arnpriester, 409 Brevard, announce the engagement of their daughter, Marilyn Jo, to Jimmy Dan Bell, while the betrothal of Miss Carolyn Adele Herald of Lubbock to the Rev. Marvin D. Arnpriester is announced by her parents, Mr. and Mrs. Rollin T. Herald of Lubbock.

Miss Arnpriester and her fiancé, son of Mr. and Mrs. Aubrey Bell, 506 McKinley, are to be married June 18 in Wesley Methodist Church, of which her father is pastor.

Both are students in West Texas State University, Canyon, after graduation with the class of 1965 from Hereford High School.

Both are also employed here, she with Sears, Roebuck Co. and he with Bravo Smokes.

The Herald-Arnpriester nuptials are set for June 3 in Forrest Heights Methodist Church in Lubbock. The bride-elect is a senior in Texas Tech, a former student at Southwestern University in Georgetown and a graduate of Lubbock Monterey High School.

Son of the Noah Arnpriesters, the Rev. Marvin Arnpriester serves as pastor of Guthrie-Sargentown Methodist Churches while he completes studies at West Texas State University for graduation in May. He attended Texas Tech and McMurry College, Abilene, after graduating from Vernon High School.

Miss Marilyn Arnpriester
... engaged to Jimmy Bell

Travel Scenes Shown For Club

Pictures she brought back from a recent trip to Australia and a previous visit to Germany were shown on colored slides by Mrs. N. D. Bartlett in an entertaining travelogue for Bud to Blossom Garden Club members and guests Friday morning in Community Center.

Mrs. Bartlett commented on scenes of the countryside and cities in New Zealand, Australia, Japan and Hong Kong as she told of traveling and visiting on the tour she and her husband completed last month.

She also included some spectacular views of the Bavarian Alps where she studied and painted last year. Mrs. W. H. Gentry, program chairman, introduced the speaker, who wore a striking dress, in Hong Kong style which she bought on her

trip. Of a deep-cream satin, it was a Chinese sheath embroidered down the front in a floral pattern with gold beads.

Mrs. Jim Conkright and Mrs. Jack Allen were hostesses, serving coffee and fancy rolls as guests arrived. The table was set against a wall and backed with a tall flower arrangement. Mrs. Allen's pretty china coffee service, hand-painted with pansies on a green background, was used.

Five club members who attended the convention of District I, Texas Garden Clubs Inc., at Lubbock last week gave their reports, and Mrs. O. G. Hill Sr., district president who was a guest also commented on the convention.

Mrs. Sam Long presided for business and welcomed guests,

News About Area Men On Duty

Harold R. Moore, son of Mr. and Mrs. Orby R. Moore, Route 4, Dimmitt, Tex., was promoted to Army specialist seven in Yokohama, Japan, March 25,

where he is assigned as a clinical specialist with the 106th General Hospital.

Specialist seven is an enlisted rank equivalent to the rank of sergeant first class.

Specialist Moore entered the Army in 1948 and was stationed at Fort Bliss, Tex., before arriving overseas in December 1965 on this tour of duty.

The 36-year-old soldier is a graduate of Dora High School.

SORRY NO EXCHANGES

LOS ANGELES (AP) — Dave Marr, 1965 PGA champion, used his No. 2 iron to good advantage on the 235-yard 17th hole during the second round of the Los Angeles Open. He sank his tee shot.

"I'd just as soon have those 235 yards chopped into six-foot putts," said Marr following the third ace of his career.

REPORT

Starliners Horizon Club met in the home of Barbara Brook Wednesday evening, with Mrs. Nita Lea, Camp director for 1966, as special guest.

Mrs. Lea discussed with the girls the August camping program, which will be held again this year in Tres Ritos Canyon, near Taos, N. M. Various ideas for Horizon Club participation in special activities are being considered for the camp this year, and the girls were invited to express their ideas for the program.

Girls who were interested in serving as Camp Aides were also advised of the requirements necessary to qualify for this classification in the Camp Fire program.

Attending were Jo Witherspoon Rema Coffin, Sherri Marsh, Becky Elliott, Linda Jacobsen, Sharon Hagans, Linda Glenn, Joyce Curtsinger, Barbara Brook, and Mrs. Abie Crume.

Cuntinta and Takshawa Junior Hi Camp Fire Girls enjoyed

dents who are new members of Delta Sigma Pi.

The fraternity is for professional business students.

ed an outing Saturday. The first stop was at J-Bar-S Ceramics near Canyon, where the girls were shown how ceramics are made.

In Amarillo the group made the complete tour of the Mary E. Bivins Memorial Library and then visited the First Christian Church at Wolflin Village, which features a circular sanctuary.

Sack lunches were spread at Amarillo College Park, and the girls wound up the day by taking in the movie, The Sound of Music.

On the trip were Prissy Crume, Dianne London, Mary Sue Word, Debbie Boardman, Debbie Gholson, Ann Mims, Shaun Sigman, Mary Sue Neff, Gene Ann Guynes, Cynthia Lea, Kerrie Dameron, Martha Baker, Camille Langley, Bonnie Walker, Rhonda Stewart, Janice Edwards, Marilyn Smith and Karen Bain; Mrs. Lewis Lea, Mrs. Bill Dameron, Mrs. Baxter London, Mrs. Dick Gholson, Kevin, Kelly and Stacy Lea.

Jobs for the Jobless

with **Rural Electricity**

Although fewer than one-third of this nation's population lives in rural areas, more than half the nation's poor lives there.

Consumer-owned rural electric systems such as ours have helped to create new industries across the country which have already resulted in more than 125,000 new jobs for rural people.

Volunteering in the war on poverty, we hope to do more in the months and years to come to help develop this community.

WEDNESDAY — Hamburgers,

Sorghum Midge Studies Show Mulching Helps

Sorghum midge studies at the High Plains Research Foundation in 1965 support previous results that over-wintering can be reduced by proper residue management. Two years data show that over-wintering of the sorghum midge was decreased when sorghum fields were tilled in the fall with a stubble-mulch plow that severs the roots but leaves the residue on the soil surface until late fall or early spring.

SPECIFIC tests in 1965 show 42 percent and 93 percent less adult midge emerged from infested grain sorghum heads left exposed on the soil surface until late fall than from infested heads plowed under or covered with 3 to 6 inches of soil.

Larvae (over-wintering stage) from the buried sorghum residue appeared healthy as to shape and color when observed under the microscope. The appearance in general was much the same as larvae found in the summer before diapause is reached.

Midge larvae from florets in the residue above the soil surface appeared dried or dehydrated. The color was a faded orange or yellowish instead of the normal bright orange color.

Another abnormality was a "off" color spots in the larvae. The cocoon, or tissue surrounding the larvae to aid over-wintering, also appeared dehydrated. These symptoms indicate abnormal larvae based on similar studies in 1963 and 1964. Comparative tests are being conducted in the laboratory at the present time.

Lloyd Langford, Associate Agronomist at the High Plains Research Foundation has conducted the midge over-wintering test at the Foundation in 1963, 1964 and 1965. His tests are being continued in 1966. "Don't raise your own midge," Langford warns.

Full details of the sorghum midge research can be read in Report No. 168 in the 1965 Annual Research Report of the High Plains Research Foundation.

French Native Praises Sunshine Of Panhandle

By SUE COLEMAN
Women's Editor

From Paris via New York to a home in Hereford, Mrs. Puzant Torigian is an attractive addition to the list of newcomers brought here by industrial growth. Wife of the president of Bravo Smokes, she came to Hereford last August.

CHIC AND CHARMING, with warm brown eyes and a ready smile, Mrs. Torigian fits the picture most people have of the native Parisienne. Her home, reflecting a taste for the beautiful in furnishings for every-day use, repeats that impression.

The completely feminine Mrs. Torigian, though, has a thoroughly practical side. She holds a bachelor of law degree from the University of Paris, is vitally interested in legislation and social work concerning children in international relations and in United States politics.

She had hardly settled in her home here before she decided to enroll for courses in government at West Texas State University. There she was promptly asked to teach classes in French, so she has been both student and teacher as well as homemaker during her residence in Hereford.

TO DATE, there has not been time to fulfill her wish to travel over Texas and farther west. The Torigians had made their home 15 years in New York, with a brief period of residence in Massachusetts, before they came here, and she had seen only East Coast country.

The Panhandle climate appeals to the transplanted Frenchwoman, and she makes a comparison which West Texans may never have heard before — she says it is somewhat like the Riviera.

Sunshine is characteristic of both places, she says, and she likes the wind and the dryness which contrasts to the humidity characteristic of both Paris and the New York area. Interviewed on a dusty day, Mrs. Torigian dismissed the March dust as a passing irritant and praised the sunshine.

Although her background has been large cities, she says she is familiar with small towns because she has actually lived in suburbs, including her childhood home in a town about the size of Hereford, a few miles north

YOU TAKE YOUR CHANCES IN THE MIDWEST

Lawrence Kan. — A service station attendant was putting gasoline in James Fields' small foreign-make car when the rear mounted engine caught fire. After firemen put out the blaze Fields pointed out that the attendant had been putting gasoline in the car's cooling system.

of Paris "where my family had lived a long time, and, you know, everyone was related to everyone else."

She feels fortunate in having known the small-town atmosphere and having at the same time the advantages of educational and cultural centers of Paris.

SHE CHOSE HER university major in law because of girlhood interest in children's needs. As a teenager she worked with children in camps and centers, and once visited a home for delinquent boys which had been set up by a woman lawyer. Learning of this woman's career gave her the determination to study law.

Marriage interrupted her plans for courtroom practice, and she devoted her attention for a number of years to her home and three children, Christine, now a high school sophomore, John, in junior high, and seven-year-old Michael.

It was when Michael started to school this year that she felt she might resume study and accept the teaching assignment at WTSU.

MRS. TORIGIAN EXPRESSED earnestly her belief that "A mother needs to be with young children. It is impossible to replace a mother's devotion in the training of a child's mind and heart, training which affects his outlook on life."

She had done some private teaching, but her work at the Canyon school has been a new experience for her, one she has found rewarding. She is enthusiastic in saying she enjoys it, and believes the students have shared her pleasure in exploring

not only the language but the first-hand view of France which she can give them.

Music is a long-time hobby of Mrs. Torigian's; she sings as well as playing the piano. Music has also been a part of her participation in social welfare work; when she was growing up she belonged for a time to a group which entertained elderly people in homes.

Organizations in which she has held membership have been those concerned with welfare and charity work.

Toastmasters To Hear Choir Thursday Night

Hereford Toastmasters Club No. 544 will hold its regular meeting Thursday, April 7, at 7:30 p. m. at the Country Club.

Presenting the program will be the Hereford High School Madrigal Singers.

A timely table topic session is scheduled, with Melvin Jayroe in charge. Several members of the club will speak. General Evaluator for the evening's program will be Alvin Smith.

OVERLOOKS MISTAKE NEW DELHI — Laughter erupted in Parliament when a member addressed speaker Hukam Singh as "madam." Silencing the laughter, the 71-year-old Singh, a Sikh who wears a full beard and turban, declared: "A man of my age does not feel concerned about such things."

Small Talk

By SUE COLEMAN
Women's Editor

Did you notice how the pear blossoms suddenly opened, all in a day, after the buds began showing up early in the week? Big old pear trees in many parts of the city are the finest show in town this weekend, begging the Lions Club's pardon.

FOR ACTING the smiling hostess under difficulties, Mrs. Wal-

ter Seed is herewith nominated for a citation. Shortly before a recent bridal shower in her home, while she was getting some dishes from a high shelf she missed the top step of a kitchen step-stool and fell backward to the floor.

Mrs. Seed says she was not only bruised, but "shook-up" generally although she went ahead with her role as hostess.

Similarly, Mrs. Ray Johnson

got through her final duties of staging the federated club convention last week with a painfully bumped knee, when she received when she stepped from her car with arms full of decorations, caught the heel of her shoe in her dress hem — and any woman can finish that story.

GUESTS AT A reception lately who admired a misty effect at the punch bowl may still be wondering how it was achieved. The secret: dry ice.

JEANIE CAISON looks cute as pie with those flapper-style dangly earrings, but that's no sign that I, or possibly you, should rush out and get us some. Not too many women look well in them at all; she just happens to be the type.

TWO HEREFORD students at WTSU Donna Ivy and Mila Beth Gibson, were soloists in last Sunday's University Chorus Concert, when the Easter section of Handel's oratorio, The Messiah, was sung. Donna's senior recital, incidentally, is slated for May 9 at 4 p. m.

The Branding Iron Theatre at WT has announced that mail orders are being filled now for the Opera Workshop's spring production of Carousel, which is scheduled for April 19-23 and April 26-30. The mailing address is Box 275, WT Station, Canyon.

WHILE I'm working at the best part of my job, meeting such nice people, there is the added bonus of meeting their nice dogs. Such as the Puzant Torigians' boxer, Napoleon, who likes to have his ears scratched, and the Bruce Coleman's big friendly Sam and small friendly Susie.

Internal Revenue Lists Tax Changes

The Internal Revenue Service today advised employees who file declarations of estimated tax that the new tax withholding system may eliminate the need to file an estimate for 1966. For those who still must file, the estimated tax payment required may be reduced.

The new rates apply to all paychecks received on or after May 1, 1966. This means that tax will have been withheld at the old rates for the first four months of this year and will be withheld at the new rates for the balance of 1966.

Estimated tax declarations are generally required to be filed only when the estimated tax liability for the year exceeds income tax withheld by \$40 more.

Single employees who earn more than \$5,000 a year and married persons who earn over \$10,000 will be particularly affected by the change in rates.

THESE ARE employees who normally would not have enough tax withheld under the old rates to cover their tax liability at the end of the year. Under the new system, tax withheld will be more in line with their tax liability.

Document 5642, a fact sheet explaining the new withholding system, will be helpful in figuring estimated tax the IRS said. The fact sheet will be furnished in bulk to employers by early April. They will in turn distribute them to their employees. The fact sheet will also be available at IRS offices at that time.

THE FACT sheet contains tables which show the amount of tax withheld on wages up to \$260 a week, under both the old and new withholding systems. It shows, for example, that a married man with a wife and two children who earns \$200 a week would have an additional withholding of \$2.40.

IRS suggested that those who have already filed estimates for 1966 and want to amend them should wait and make the change when the June 15th installment is due. The reverse side of the bill for the June 15th installment can be used to amend the estimate.

Knits Offer Many New Fashion Faces

THE LOOK OF SOFT FACING, asymmetrical striping, knits with personal "pov", all are part of the fashion signature story for Spring. Whether on a Jamaican interlude, a cross-country junket or just shopping around town, these on-the-go-knits can and do go every where.

NEWEST TRAVELERS... blended of cotton/an to, shows up in two-piece, dresses highlighting the bold stripings. The architectural look, so typically Courreges, registers in textured popcorn knits that spotlight spanking white bandings.

PANTS — HERS... NOT A TIGER BUT A "pant-her" is in the streets. The weekend country look is stalking the city.

Impeccably tailored pants in new bonded knits have put another face on fashion. The bonding treatment fuses two fabrics together invisibly, increasing the shape and adding new body to the knitted fabric.

WHEN IS SILK NOT SILK? ... when it shows up in the glamorous man-made synthetic with a silken hand. It makes up in gay little transitional shifts with flickering low flare skirts that wear from dawn to dusk. It also shows up in a variety of patterns that range from blocks of colors... to horizontal and vertical bands of color in a striped effect... to kerchief prints.

"IN" CIDENTS... new textured cotton antron... with a crepe feeling — printed or striped... that's the latest from fashion's knitted bag of tricks... an incoming and forthcoming "star."

What Was That Name Again

Just how much will the words "Democrat" and "Republican" mean in the future? Are the two powerful parties which have guided American destiny for so many decades destined to disappear from the scene?

Probably no one knows the answer to these questions, but we do face a circumstance which may well alter their future destiny and, strangely enough, the fundamental basis of present day politics goes directly back to the same questions which caused the original start of America's two powerful parties: "Liberalism" and "Conservatism", both entwined strongly with federal domination of many problems. Some proponents are already predicting that we will ultimately do away with our states and operate this country on the basis of areas, probably to be called "North, South, East and West".

More and more frequently we hear people state that it doesn't matter which party one supports, that we will be dominated by liberals and bureaucrats — regardless. Furthermore, there seems to be considerable truth in this thinking, especially with the appearance of Scranton, Rockefeller and

Drink Boosts Arrest Totals

Recent announcement was made through the sheriff's office that Deaf Smith county housed 1,302 prisoners in 1965 as compared with only 539 in 1962—a figure which has more than doubled in the three-year period. An increase in crime is also noted on state and national levels.

Hereford's growth over the same period would automatically account for part of the local increase, but certainly could not account for the entire amount.

It is interesting to note that the lion's share of local crime can be attributed directly to alcohol with 256 drunk offenses, 132 DWI, and 100 for juvenile possession or consumption of liquor for a total of 488 arrests on these counts. This is almost half of the entire county total, which brings up the question of whether such offenses are greater or smaller in areas which are "wet" as compared with Deaf Smith's "dry" status? To say the least, this phase should be investigated. It is also surprising to note that a total of 83 cases resulted from aggravated assault and affray, both of which likely include numerous cases which can indirectly be attributed to alcohol.

Frankly, it seems to us that the community has been foremost in sponsoring movements to combat the alcohol problem and, although "Demon Rum" appears to be our worst enemy, no one has so far come up with a halfway practical answer or cure.

There is also the possibility that our officials may well enforce some of the laws with more energy and vigor than in other territories. To say the least, it always seemed that this county made more DWI arrests than most when compared on a per capita basis. Naturally, this factor is to be considered in determining how good or how bad we may be in comparison with the remainder of Texas.

The fact still remains, however, that crime is on the increase here, regardless of the reason or reasons. We know that crime is expensive, but still worse remains the fact that offenders are no longer privileged to enjoy the benefits of normal living, which today is at the highest peak ever known to the human race.

Romney as leaders in the GOP.

Both of our national parties have certainly strayed afar from their original concept. Both, in fact, advocate theories and practices which 25 years ago would have been too "far out" for even the struggling Socialist party. In recent years we have seen rugged Democrats bolt their party and set up "Rump" conventions, and the Republican national convention in its last presidential nominating session was anything but unanimous.

Probably never before in the history of our nation have people been so interested—or so confused—when it comes to politics. Invariably, things turn out other than what they seem to the average voter. As a result, thousands of voters are putting their option on "the man", rather than on the party. What's more, it frequently appears that the party leaders themselves do not actually and fully know the principles for which their party stands, or how they will be carried out.

Should we blame the parties for this outgrowth? Their sole motive is to get their candidates elected, and if it requires innovations even in the realm of sound business and thinking, they are still faced with the problem of giving the people what the people want. Currently, and in view of statistics, there seems little doubt but that the people are getting exactly this final result.

In part, the confusion may well be attributed to improved methods of communications. Furthermore, the relaxing of poll tax requirements will probably result in an even greater extravaganza of subsidies, give-aways and increased socialist trends.

Some declare this will be our downfall as a nation, others feel that we are filling the destiny of our heritage.

Right now, though, it is hard to tell what the people really do want, chiefly because of the fact that no one really knows what either of our parties represent. To say the least, we are entitled to a clear-cut decision in this category—and then let the winner take the reins. Until this does occur, it is next to impossible to know definitely what the American people do want.

Top Industry Here Not New

These days we hear much about industry, and what it can do for the average community. The industrial race has become so involved, in fact, that many communities are bidding against each other to attract payrolls and other assets which industry usually brings. What has happened, we wonder, to the old standbys: Farming and Ranching?

While people are still migrating in droves to the cities, we note that farm and ranch income has soared many times over—and this means that fewer people are cutting up a much larger cake each year. It also means that the farmers and ranchers who stay on the job are fast becoming established as the bulwark of our community life in America.

Hereford, for instance, has quite a few industries for a small city, but most of these industries are within themselves by-products of farming and ranching activities. And, whether we like it or not, farming and ranching still plays the primary role in our way of life, and in the production of our annual income. In a way this is good in that it takes "open space" to farm and open space is the one thing of which cities have least.

FFA and 4-H organizations are going full tilt, thank you, and they are helping turn out some of the brightest farmers and ranchers this world has ever seen. We should also remember constantly that the one category in which our nation has always outstripped the Communists is that of food production. While our production figures keep soaring, those in Russia continue to fall lower and lower. We might even say that this is the tremendous big difference within the two economies.

America was settled because of its soil. It has prospered in ratio with the things its soil produces. Land is still our No. 1 possession—and certainly farming and ranching are the two big assets in the Golden Triangle. Regardless of all else, this is something we should always keep in the back of our minds.

An organization has been formed to extend the use of educational television to every university, college and junior college in Nebraska.

If that will break the college kids of the Batman habit, it will be worth it whatever the cost. —Norfolk (Neb.) Daily News

Prime Minister Harold Wilson has announced that Britain will switch to the decimal currency system in February, 1971.

This, at least, is one political promise he can keep. After all, for years Britain has been on a decimal monetary system—our. —Manchester (N.H.) Union-Leader

MAIN STREET, USA

Few Facts From Nation's Capitol--And Else where

By BERT MILLS
Washington, D. C. — "Shir-tails" is a word with special meaning to newspaper people. It means a collection of "Shorts" — items which are brief but interesting. Here are some "shir-tails" found sticking out in Washington.

Over one-third of all Americans past 65 are "functionally illiterate" — a phrase used by poverty planners to describe those with less than a sixth-grade education. Among 18-year-olds, less than 4 percent are "functionally illiterate," proving that illiteracy is primarily a trait of a departing generation.

ONE OUT of every four college students today is married. One out of every three college changes majors at least once during a four-year campus career. By 1980, educators expect 1 million students will earn degrees annually.

More Americans were killed in auto accidents during the 1965 Christmas weekend than during the two bloodiest months of the Vietnam war in 1965.

Washington has more telephones per 100 people. You'd never guess what city ranks second. It's Skokie, Illinois, with 76.5.

Cleanliness is a modern notion. In the 18th Century, Frederick the Great considered even washing his face to be unmanly. The White House did not boast a bathtub until 1891.

Few Bills Become Law
Odds are better than 40 to 1 that any particular bill introduced in Congress will not become law in the year proposed. In the first session of the 89th Congress, about 15,000 bills were proposed and 349 were enacted.

WEATHER is no problem to many mailmen. There are 11,000 letter carriers who spend their entire working time in a single office building. There are 23 of

them in the Empire State Building in New York.

In a single second, the sun radiates more energy than the world has used since civilization began.

Nine out of ten residents of Canada live within 200 miles of the U. S. border.

IF FISH were smart, they would go in hiding in the summertime. Bureau of Fisheries has learned that two out of three fish are caught between May and September. July is the peak month for foodfish and June for industrial fish used for fishmeal, oil and fertilizer.

Life expectancy of a dollar bill is only 18 months.

A representative group of 100 Americans divided into age groups would include 11 kiddies under 5, 26 between 5 and 17, 34 between 18 and 44, 20 between 45 and 64, and 9 over 65.

Beer is served in the dining room of the House of Representatives at the Capitol but not in the Senate restaurant. Nothing stronger can be had in either place.

2 Girls in 5 Wed Early
A study of the U. S. Census in 1960 showed that two out of five women who had been married made it to the altar as a teenager. However, only one husband in seven was married before age 20. The average husband in 1960 was 44, his wife 41.

IT TAKES the U. S. Bureau of Engraving and Printing about one week to produce a bill of any denomination. Yet the manufacturing cost is less than one penny.

An education and a job go hand in hand. A youth who fails to graduate from high school is twice as likely to be among the long-term unemployed as one who earns a diploma.

There are more factory workers living in Brooklyn, N. Y., than in Pittsburgh and Detroit combined.

U. S. Department of Labor has issued a "Dictionary of Occupational Titles" which includes such listings as "Squeak-Rattle and Leak Man" (an auto mechanic specializing in test runs), a "Kiss Setter" (one who sheeps candy kisses), and a "Mud Man" (a rubber industry employee who reclaims rubber particles from sludge).

TEN YEARS AGO

Hereford Budget Gets Commissioner's O.K.

Delegates and visitors from the 22 counties in the district will be in Hereford to attend the district One THDA meeting at the high school auditorium.

Voters in the Hereford Rural High School District go to the polls here Saturday to elect two new members of the Board of Trustees.

Miss Roberta Campbell, president of the North Hereford Home Demonstration Club, is Deaf Smith County's 1956 Home Demonstration Club Woman of the Year.

A \$311,338 budget—largest in the history of the City of Hereford was approved by city commissioners Monday night following the annual public hearing at City Hall.

A spirited verbal battle over voting precinct lines in Deaf Smith County came up Monday when county commissioners held a called meeting to meet with a delegation of voters protesting the recent change in the line.

Funeral services for Charley Chaney, 84, were held Monday at 4 p.m. in the Rose Chapel at Gilliland Funeral Home with the Rev. B. H. Baldwin of the Frio Baptist Church officiating.

Deaf Smith County Commissioners Wednesday still had not decided whether or not to rebuild the Bull Barn, which was gutted by an early morning fire Sunday.

Ed Line, county attorney, Wednesday authorized the Board to announce that he would be a candidate for reelection subject to action of the Democratic Primary.

Panhandle Paragraphs

A man feeling the need of medical care went to the medical building for the purpose and upon entering the front door, found himself faced with a battery of doors, each marked with the name of an ailment such as heart, cancer, appendicitis, gall bladder, etc.

He felt sure his trouble could be diagnosed as appendicitis so he entered the door so marked. He then saw two more doors, one marked "Male" and the other marked "Female". Of course he entered the door marked "Male", and found himself in another corridor where there were two doors marked "Protestant" and "Catholic".

Since he was a Protestant, he entered the proper door and found himself facing two more doors, one marked "White" and the other marked "Colored". He entered the White door and again was faced with two more doors, marked "Taxpayer" and "Non Taxpayer". He still owned equity in his home, so he went through the door marked Taxpayer and found himself confronted with still two more doors marked "Single" and "Married". He had a wife at home, so he entered the proper door and once more there were two doors, one marked "Republican" and "Democrat".

He was a Republican so he entered the proper door and fell seventeen stories to the alley! —The Stratford Star

The first shower of spring came Friday morning. But it hardly was more than a teaser. Denver City Water Supt. J. E. Herring recorded only .10 of an inch of precipitation from the shower which commenced at about 9 a.m. and ended with a return of sunshine shortly after noon. —Denver City Press

Nothing so stirs a man's conscience or excites his curiosity as a woman's complete silence. —The Sunday Herald (Perryton)

Continued development of Lake Meredith recreation sites took another healthy step forward this week with delivery of 180 all-steel barbecue grills to the U.S. Bureau of Reclamation Office at the lake.

Phil Kensley, Bureau resident engineer, took one look at the new grills and termed their design "excellent for use in this part of the country."

He pointed out the grills will be erected on metal pivot bases at various recreation area picnic sites around the lake. "The grill unit may be rotated manually 360 degrees for windage and draft adjustment. The grill plate itself may also be adjusted up or down, making the units more flexible for charcoal cookery." —Berger News-Herald

You know, sometimes there is more loyalty among married folks than you'd guess. Not so many years ago a friend of mine was walking peacefully down the road when he heard a woman screaming at the top of her voice, "Help, he's killing me—won't somebody help me?" My friend, a right rambunctious young man, and very husky at that, leaped over the yard fence, dashed up to the door, kicked it in and there was the husband sitting on top of his wife trying to black both of her eyes at once. Grabbing the "scoundrel", he slapped his ugly face, hit him a fast uppercut and knocked him to the floor. . . . That is all our friend remembers, for just at that moment the loving and beautiful wife broke a baseball bat over my friend's head. She explained, "Well, he was hurting my husband so I had to hit him." So there you are—when they fight, let 'em fight. When they howl for help, run the other way. —Levelland Sun-News

A joint tax return is where both the wife and the husband sign for the money the wife spent. —Andrews County News

Today's new status symbol is the odor from the kitchen wafting out over the neighborhood to let the folks know you're cooking dollar-a-pound bacon. —Andrews County News

THE BOOTLEG

—Philosopher

Editor's note: The Bootleg Philosopher on his bindweed farm tells what he learned about Red China from two experts this week. We don't know what it was.

Dear editor:
According to every newspaper I've gotten my hands on lately Red China likely will be the world's worst enemy in the years ahead, even ahead of Russia, although Russia is no slouch in that department.

With Germany and Japan now on our side, with India growing kids faster than wheat, and with Russian men getting interested in automobiles and air conditioning and the Russian women now going to beauty parlors, Red China, the articles are saying, is the No. 1 potential threat.

Therefore when I read that two experts on China were going to appear before a Senate Committee on television, I dropped what I was doing, I don't remember what it was, and tuned in.

One expert said we ought to recognize Red China now and let her in the United Nations, that it'll be years before she is far enough advanced to threaten anybody with nuclear bombs. The other expert said no, we shouldn't recognize China, that she'll be delivering bombs before we know it, and we ought to hem her in now.

What I'd like to see the Senate Committee do now is come up with a man who is an expert on China experts.

When you get two experts coming to exactly opposite views, you're about where you were before you tuned in.

But by all means be sure to tell the Committee to come up with just one expert on the experts. If it gets two, and they disagree, the thing could go on all spring and summer, with one set of experts disagreeing on the expertise of the previous experts, until finally about everybody is used up and they get down to me, and I don't mind saying it wouldn't take an expert to find out how little I know about Red China. I don't even know what's happening at the court house in Hereford.

If you want to stay clear-headed about anything, never consult with more than one expert.

Yours faithfully,
J. A.

Color Comes Strong, — Pale, Too, In '66

Two banner headlines in color will help you keep right in step with fashion this Spring. The first big news is the tremendous variety of clear, lively hues, ranging from palest tints to deep tones.

Heading the list are soft, delicate pastels with a white-washed look. In the bold, bright category, snappy blues, squash, raspberry pinks and sun-struck yellows, oranges and yellow-greens light the way into Summer. A new color twosome is honey beige with fragile pink.

Spring Brings Camera Bugs

The first whiff of spring not only brings out the robins and the groundhogs — it brings all the camera bugs out in full array.

Did you ever go on a picnic where at least one camera wasn't packed along with the lunch basket?

These days it's more likely to be two cameras — one for still pictures and one for movies. The latest revolution in home movies — the new super-8 format — is turning nearly everyone into an amateur movie-maker. New super-8 movie cameras are so automatic, you don't even have to thread the film — just drop in a film, cartridge and you're ready to shoot. And super-8 movies are actually twice the size of traditional 8MM movies, making them more realistic and exciting.

For added fun in movie-making, try experimenting with professional effects. The new Bauer C-1 super-8 movie camera, for example, has a fast 11.8 zoom lens, which means you can zoom in on fast-moving subjects. Like sportscasters do at horse races or ball games. Light weight, unique design and trigger-grip make the camera especially easy-handling. No worry about lighting conditions, because an electric eye does all the figuring.

All you have to remember is to put the camera in the picnic basket.

That Spring fashion classic — navy with spanking white — is destined for new popularity this season. In addition, fabrics will be smooth-surfaced, silhouettes will be slender, easy, swingy.

Second biggest news is that many of the new fashions and colors for Spring — in cotton — will be machine-washable and bleachable.

Liquid chlorine bleach will help keep pretty colors fresh and clear all season long. Added to each wash load, it removes the oily grime around necklines that resists detergents, and also prevents the build-up of dirt which grays colors and makes garments look old before their time.

Professionals recommend one cupful of bleach for a top-loading automatic or wringer washer; one-half cupful for a front-loading machine. For a modern big-load washer, use one and a quarter cups of bleach. The bleach should be diluted in at least one quart of water and added only after the wash cycle has started.

Wondering if that new colored blouse is colorfast? Then run this easy Bleachability Test prescribed by the Clorox Bureau:

Snip about an inch of fabric from an inside seam or other inconspicuous place. Soak it for five minutes in a solution of one tablespoon of liquid bleach to one gallon of hot sudsy water. If the color holds, the blouse is bleachable.

Read The Classifieds

To Be Seen And Seen In This Spring

Fashion burst forth this Spring with a garland of fresh blooming hues in new imaginative fabrics.

Silhouettes are not confined to one look but the inclination is to soft simplicity with dresses all-important and suits softened down to a dress look. Hemlines remain short and sassy.

Fabrics play a dominant role in influencing styling. The debut of weightier silk crepes coaxes dress lines to become more chemise-y. The fluidity of fabrics, in general, allows for a graceful more "welded" than sewn look with the elegant use of diagonals.

Textures are refined and smooth to the touch or flip and open with airy weaves that swing easily.

As always, prints are in profusion for Spring, with the accent on largeness and goldness with somber rich Gauguin tones, audaciously assembled.

Geometrics are more imaginative, while high-spirited plaids ring through this season's collection with unrestrained vigor.

Enticing are the tiny English posies, baby patterned prints and bright calicos.

In colors, routine pastels are out, with the palest, most delicate tones taking their place. An entrancing pinked-up shade of vanilla, a cool whitened blue and a faint almost-white ivory take stage center.

A new crop of refreshing hues straight from the garden are clover (a clear mauve) lettuce (lime green), tender lilac, cantaloupe and raspberry.

Capes add drama, appearing short or long on dresses, suits and coats with intriguing results.

Two splendid shapes are the tunic over a narrow skirt and an overblouse atop a fling of pleats.

Of new delight are the cut-

out and halter necklines. In many instances, they give the bare illusion under a sheer cage. Sportswear ropes a Western shirt lengthened into a dress.

For play all eyes on a shift that is hip-belted.

Skirts are hip-riding or A line with a cycling look that is swinging.

Tops are a "poor boy" sweater, a T-shirt or tank top, all displaying a devil-may-care, carefully casual approach.

Pants are in, for evening or day... at-home or away... in bold, bright prints on soft, supple fabrics.

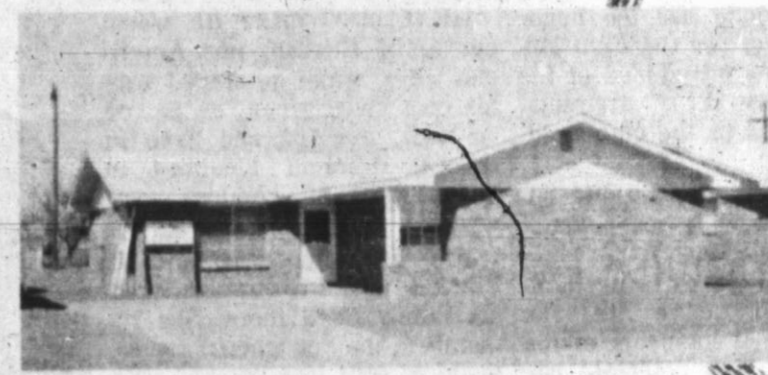

Shoes continue that young, young look with a bit of whimsy in the form of a bow at toes or heels. Pumps are Mondrian inspired and boots harken back to Granny's day.

Colors, because of fabric presentation will be diversified. We look for Navy to be the strongest in the dressy story. We feel that the longer-line suit, including the walking-suit, will be a very important part of the fashion story for this coming March.

CONSUMERS FUEL

is happy to announce

the

Association of

CLYDE RENFRO

with our organization

In Our LP Gas

SERVICE DEPARTMENT

The folks at Consumers Fuel Association are indeed happy to announce the association of Clyde Renfro with our organization, effective immediately. Clyde, of course, needs no introduction to the people of this area, since he has been one of the outstanding Butane-Propane Service men for many years. Clyde knows an LPG carburetor inside and out, and is also well schooled in the repair and maintenance of LPG appliances. In fact, if it concerns LPGas, Clyde knows it.

Again we say, we are happy to welcome Clyde to our organization, and would like to take this means of inviting everyone to come in and visit with CLYDE RENFRO now at CONSUMERS FUEL ASSOCIATION, INC.

CHARGE IT

IN TEXAS, OKLAHOMA

Pioneer Life Recalled

By SUE COLEMAN
Women's Editor

An eventful life as a pioneer in two states has been spent by Mrs. G. E. Pinkerton, who at the age of 89 recalls an Oklahoma land run, a cattle herd lost in a West Texas blizzard, traveling in a covered wagon and living in dugout homes as she grew up, married and made a home in Texas and the Indian Territory which later became Oklahoma.

FOR THE PAST DECADE Mrs. Pinkerton has lived in her own house adjoining the home of her grandson, Bruce Coleman, south of the Bootleg County Barn on Harrison Highway. She still keeps house, prepares her own meals and does some work in her yard.

She regularly attends services at the First Christian Church

here and meetings of Messenger Home Demonstration Club, which has done her the honor of designating her the Club Mother. She was introduced at the recent County H. D. Appreciation Luncheon as the club's oldest member.

Failing sight and hearing bother her now; she jokes about her handicaps but it is plain that she is irked at being hampered in her active life. She likes to talk of incidents of the past, tales which entertain her friends as they do her great-grandsons.

She comes of a robust family, one of eight children of whom seven are still living, some older than she. Her father, member of a family named Lyng, ran away from his home in Norway at the age of 13, worked his way on a ship to the United States, settled in

a community of Norwegians and learned the brick mason's trade.

REALIZING THAT HE would not learn English, nor American ways, while he stayed with his own countrymen, he moved on west, married and lived in several different locations in Texas while his children were growing up.

Mrs. Pinkerton was born at Blanket, near Brownwood, when his family lived there. She remembers the "puncheon" house, made of split logs chinked with mud, and the big fireplace that heated and lighted that early home.

Her father owned a hotel at Canadian for a time; he farmed and freighted with ox-wagons while they lived at Tulla, and another home was in Montague County near Bowie.

She tells of a severe blizzard in which her father's large herd

Mrs. G. E. Pinkerton with great-grandson Jeff Coleman

of cattle drifted before the wind until stopped by a fence, and there they all died in the storm. "That blizzard killed everything," she said, "and we were literally starved out. We had to leave."

ANOTHER DIFFICULT time was caused by an infestation of grasshoppers on their North Texas farm, when the insects ate not only the crops and pasture vegetation, but the bark of the trees, and even riddled a coat that was left outdoors.

A grasshopper that hit her in the face injured her left eye, and some of the sight difficulties she has had in later years she attributes to that old injury.

She completed eight grades of school, all that was offered in her home community, and as was the rule then, took a state examination and qualified as a teacher for elementary grades. She began teaching at Newcastle, in Indian Territory. Parents paid tuition for their children, and her salary depended upon the number of pupils.

SHE MET HER future husband there. His father had owned land and slaves in the South, but freed his slaves and went north to join the Union army in the Civil War. To rebuild his holdings after the war, he and his sons had come to Oklahoma as contractors building railroad.

They built the roadbed for the first railroad into Oklahoma City.

Married in the mid-1890's, Mrs. Pinkerton and her husband joined the land rush in 1898 to the country where Elk City was later located, filed on land and built a sod house. He had equipment for a blacksmith shop, and built a shop and one of the first residences in the new town. However, he kept the farm and the family spent part of the time there.

The shop, which stood on land where Highway 66 now goes through the town, grew with the pioneer city, and eventually had equipment for metal work, wood work and a paint shop. His descendants chuckle now over Pinkerton's refusal to accept the Ford automobile agency for his area, believing that the new vehicle was only a passing fad.

HIS BROTHER was a founder of the Christian Church in Elk City, and Mr. and Mrs. Pinkerton were charter members and very active in the congregation. Mrs. Pinkerton worked for many years as a nurse in Elk City, while she cared for her own home and her two children.

Her son, Ted, now lives in Woodward, Okla. Her daughter, Ruth, married Ray Coleman, whose family lived on the farm concerning the Pinkerton place, when he returned from service in World War I. They were the parents of Bruce Coleman, and his mother lived in another house on his place until her death last year.

Mrs. Pinkerton tells of experiences in the sod house, half dugout, where she lived as a pioneer bride, and remembers that game was abundant around Elk City and she shot deer and elk from the porch of her home.

"I SHOT PRAIRIE chickens out the window," she adds. "They were everywhere I had learned to shoot with a muzzle-loader when I was just a child. Used to practice shooting at squirrels, and that old gun would knock me down every time it was fired. Kept my shoulder bruised all time."

After her husband's death in 1941, Mrs. Pinkerton continued to live in her home at Elk City until she moved to this county. Although she enjoys talking of the past, she is also interested in the present, in her grandson's family, her neighbors and current events.

Since she cannot be as active as she likes, she resorts to the action on the television screen, but she expresses forthright opinions about programs she will watch, and turns thumbs down on the presently popular international spy stories. Not very exciting.

Looks For Springtime, 1966

LOOK FOR . SPRING SHAPES — the smock dress completely at ease with or without sleeves. The sectioned coat of many colors for a new slim A proportion.

The low-line dress in one or two parts with a mobile skirt. The widened-skirt for suits complemented by a shorter jacket and welt seams all around. . . and a "baby dress" for costumes.

LOOK FOR . NEWSY FABRICS — the return of hard-finished worsteds and silks in classic navy, black or white.

LOOK FOR . the increase in the matte-finish gabardine and the double-faced wools in fresh pale greens and lilacs or the softest neutrals, with white. **LOOK FOR .** zesty stripes, bold checks and the Modern 1960 abstracts.

Newest Trend Is 'Neo-Mod'

And now the 'Neo-Mod' . . . in see-thru knits, new bell-bottoms, short Jamaica-jam pants and tailored fabrics in whimsy-type separates.

COLORS . both hot and cool, in deep lush tropic hues of Mo-bay blue, Jamaican berry, gold ingot, jungle jade as opposed to the cooling wash of pale neutrals like wild rice, bone and beige tones, pristine white, or minty greens fading into iced aquas.

PANTS . Leading manufacturers shape up the very newest and pair them with a group of shell tops, poor-boy shirts and tuck-in knits. There's the trumpetbell, a new modified sailor leg; stovepipes, straight-legged charmers; gun-slingers, low-riding, real "in" hipsters; Jamaica-James; newest shorts fad short, straight and cut off at the knee. . . All color them "harmonic." No longer matched, but the harmony of bi-color and sometimes even tri-color. . . like the crisp striping of casual shirts to balance the solo note of swinging A-line skirts.

HIGH KEY STRIPES AND BOLD PLAIDS . shift from penciled lines, to diagonal wanderings and from color to color like a whirling spectrum. Crisp,

bold colorings for the bright young new-mods as interpreted in low-slung shifty dresses that melt into bi-colored plaid skirts worked on the diagonal. Or madras plaid bare midriff, with ruffled detailing off-setting tailored pants with a trumpetbell silhouette.

SHIFTY NIFTIES . like the crisp white one that barely skims the body and is spattered panel fashion, with such stylized flowers you know never came from any earthly garden.

SKIRTS . of solo colors, stripes or plaids follow the far-flung flare of the A-line or are pared down to candle-slimness.

Some are architecturally balanced by the emphasis on the waistline via the use of a tuck-in shirt and encircling belt; others are teamed with squared off tank tops or poor boy T-shirts for equally flattering silhouettes.

College News About Students From This Area

Van Smith, son of Mr. and Mrs. Joe H. Smith Jr. of 216 Ave. B, Hereford, has been elected president of the student body in recent elections at Claremont Men's College.

Smith will be a senior during the 1966-67 academic year. He heads the list of campus student body and class officers.

More land in the western United States was settled during the last three decades of the 19th Century than in the nation's first two and a half centuries, the National Geographic says.

...or how "Mrs. Jones" saved \$40.00 on her clothes dryer!

It pays to be curious as "Mrs. Jones" found out. When shopping for her clothes dryer she discovered that comparable electric clothes dryers were normally priced at \$25 to \$50 less. At 5¢ per load, TOTAL OPERATING COST, and 5 loads per week "Mrs. Jones" figured she got 3 years of gentle electric clothes drying free. Shouldn't you be a curious consumer, too?
P. S. You'll love electric clothes drying!

BUY AT THE STORE WITH Reddy Kilowatt ON THE DOOR!

Restore Winter-Chapped Skin

American women have a problem on their hands — dry skin. Recent surveys reveal that at least half of all women over 18 "feel" that they have dry skin. And the truth is that this feminine intuition is based on solid fact.
First, the atmosphere — indoors and out — is constantly robbing skin of natural moisture. It is moisture that keeps the skin soft, smooth and youthful. Indoor heating dehydrates skin, and so do cold damp winds or blazing hot sunshine.
Next, American women are constantly washing: their hands, clothes, dishes, children, and houses. Modern soaps and detergents are effective, but they also remove the skin's natural oils.
Nature has not been natur-

ally kind to hands, either. For example, hands don't have the same amount of lubrication as skin on other parts of the body. For instance, did you know that there are almost no oil glands on the knuckles, or palms of your hands; and that there are none at all on the backs of your hands?
So if your hands feel dry and thirst for softness, look for a new lotion designed expressly for extra-dry skin. It is thick, rich and concentrated, yet it penetrates quickly and is never sticky or greasy.
The lotion for extra-dry skin was invented to moisturize the hands of "the detergent generation." It contains natural oils to lubricate inflexible dry tissue, and emollients to make skin supple and smooth. A light medication speeds healing of chapped hands.
Did you know that dryness is actually the halfway mark to chapping? The water content of your skin is normally 10 to 20 per cent. Chapping occurs any time this water content drops below 10 per cent. Usually as a result of washing, or evaporation from the atmosphere. Regular use of a nourishing lotion will hinder this evaporation of moisture and oil, and protect your skin against parching, and aging.
The new lotion works equally well on all extra-dry skin areas, hands, elbows, arms, legs.
Bill McPeak, recently released as coach of the Washington Redskins, held the job five seasons.
Moore Business Forms THE INK SPOT

Pedal Away To Health And Beauty

Radiant good health, which contributes so much to beauty, is always at the peak of style. There are few things that contribute so much, so pleasantly to this goal as cycling in the great outdoors.
Cycling is perfect for helping achieve and keep the trim waistline, firm thighs and calves and slender ankles that make a girl look so right in this spring's casual wear.
Gals in culottes of cotton and dacron, and polished cotton pullover sport shirts are perfectly attired to get the most out of their cycling. They will be cool and carefree, knowing

they are properly and stylishly dressed for their activity in outfits that are stain and wrinkle resistant, wash easily, and require little or no ironing.
They will be happy too, to know that they are getting an abundance of health-giving exercise along with their fun, cycling down the open road or on the many new bike paths and trails being opened in our national state and local parks.
It's easy to get carried away with the fun of cycling, and experts recommended a brisk, post-ride rub-down with a mildly astringent lotion like a good quality witch hazel to help the kinks out of tired muscles.
In any case, the right clothes and the right kind of exercise to a long way toward making the modern American woman fashionably healthy and lovely, to show new clothes to best advantage.

By MELVIN YOUNG

Tuesday, April 5, qualified voters of the city will go to the polls to decide the fate of a proposed \$610,000 tax bond issue to provide water and sewer system expansions.

The bond election will take place on the same day as the city commission election, which will see two incumbents running unopposed for re-election.

The April 5 bond election was formally called by commissioners early in March to climax several months of consideration of the need for the improvements.

Bonds proposed would provide \$436,998 for water department expansion and \$173,002 for sewer system improvements, most of which is necessitated simply by growth of the city.

A major item included in the proposed improvements is extending municipal water and sewer service to South Hereford, the portion of the city South of Tierra Blanca Creek, providing water and sewer service for the Knob Hill addition.

Another part of the bond issue will take care of sewer improvements, including extending lines to the new La Plata Junior High School. Cost for this project will be \$38,800. Also included will be a booster station and well supply lines to serve the LaPlata school area.

The election will be held at the same time as balloting for city commission posts three and four — held by Albert Maxwell and Lloyd Sharp, respectively. Only the incumbents filed for the election, but law requires that the commission election be held anyway.

However, we suspect that the two incumbents would appreciate a vote of confidence.

The city commissioners tell us that passage of the tax bond issue will not necessitate an increase in the tax rate at this time. Fortunately, current revenues from taxes will suffice.

This situation has been brought about, we presume, by increased property valuation due to the steady growth over the past two years, and should hold for some time to come. It will of course, unless something happens to necessitate an unusually large outlay of funds — or if the city should take another accelerated growing spell such as the one in 1963-64. When this happens, cash outlay for expanded sewer and water systems outstrip the income and generally puts the city in a pretty tight spot. Water and sewer expansion has to be made first — but it usually takes a year or more to get a house on the tax rolls at its full taxable valuation — hence the lag in revenue at the time it is most needed.

We believe the passage of the bond issue at this time is important and would urge you to support it. Be sure to vote — remember, a light vote could spell defeat for this issue. Your vote is important.

An optimist, by the way, is a man who sends a post card to a friend and writes across the front in bold letters "PERSONAL."

Clint Homfeld, from way out in western part of Deaf Smith County, is an observant cuss. He drove around the courthouse square Friday, April 1, and counted nine cars with 1965 license plates.

Well now, that's about par for the course. After all, the world is full of absent-minded motorists.

Wayne Woolsey, five-year-old son of Mr. and Mrs. Robert Woolsey, Route 4, Hereford, is beginning to wonder about all the modern electronic gadgets we have these days.

Wayne recently attended the local drive-in theatre with his parents — for the first time. Everything went well until he decided he didn't like the feature.

"Hey mom," he said. "Let's change the channel!" Wayne is still marveling over that giant TV set. Why, you can't even change the channel And no remote control either.

And now comes the old philosopher from Bootleg Corner who is interested in the Department of Agriculture's program to grow food to feed the world.

He wants to know if the government will pay him to grow food on the land they're paying him not to grow crops on now.

And with summer coming on, one of the bits of cheering news comes from the Watermelon Producers and Distributors Association.

Watermelons are not fattening, they say. Nor illegal. Nor immoral.

And besides that, they're delicious.

Don't forget. Vote Tuesday, April 5, in the city election.

"Just a nanosecond, Joe, You've got chads on your sleeve," is typical of the fast-developing language of computers. A glossary of terms used in the automatic data processing field defines a nanosecond as a billionth of a second. A chad is a small bit of paper punched from a card when it is perforated to record information.

4-H Contest Progressing

By Mrs. Argen Draper
Home Demonstration Agent

District 4-H contests were finished yesterday. The next is Round-Up the first full week in June. The Foods Show will be in Canyon April 18. The local agents have been asked to provide entertainment for families during the preparation and judging of the food show. Please, some of you come to the rescue and help with it.

LINDA STEPHEN MOORE invited me to talk to the Ad-

vanced Shorthand Class at West Texas. The students asked for something on home management and working women. I was real impressed with the students their interest, questions and comments.

Linda is a 4-H alumna and we are proud of her. Agents never lose interest in former 4-H members and watch their progress and development with interest and appreciation.

THERE'S A SPRINGTIME look at produce counters this week, with larger supplies of asparagus and other fresh vegetables in ample supply, says Mrs. Gwen Clavitt, Texas A&M University Extension consumer marketing specialist.

Although fresh vegetable prices are somewhat high, there are many good quality items to be found by careful shopping. IF YOUR FAMILY'S health has hit an early-spring slump, a little more vitamin A and

Vitamin C (ascorbic acid) in your diet might provide the needed boost. Both these vitamins help prevent the invasion of cold germs.

These vitamins help the linings of the nasal passages resist bacteria. They also provide resistance against other bacterial infections. Fruits and vegetables are your best sources of these vitamins. But during the winter and early spring months, these protective nutrients are often quite elusive.

Fruits and vegetables produced last season and stored for many months have lost some of their nutrients. The family's supply of frozen foods high in A and C is probably pretty low. And this year's fruits and vegetables are just beginning to trickle onto the market and are priced accordingly.

Here are some ways to supplement your diet with these essential vitamins: Take advantage of the citrus season to include fresh oranges and grapefruit in your menus. Frozen juice is a very reliable source of ascorbic acid. Just one-half cup of frozen or fresh orange juice will furnish almost the daily adult requirement.

Raw cabbage and potatoes are usually inexpensive sources of ascorbic acid. The outer leaves of cabbage contain greater amounts of the important nu-

trients than the inner white leaves. Just 1/2 cup of raw young cabbage provides about one-third of the daily ascorbic acid requirement.

Raw green pepper strips and broccoli are good sources also. Dark-green and deep-yellow vegetables and a few fruits like apricots, are good sources of vitamin A. Spinach is an excellent source of both vitamins.

EXCESSIVE NOISE IN the ordinary home can be a health hazard, says Mrs. Foris Mygament specialist at Texas AYM University.

A recent survey by state and USDA investigators measured noise in a number of Georgia farm community homes over several different 24-hour periods. The study, which had the advantage of avoiding big city background sounds, turned up some interesting findings.

Researchers found that the homemaker's so-called "quiet hour," after everyone has gone to work and school in the morning, can be one of the noisiest periods of the day.

Average noise levels during this period in one home reached more than 77 decibels. In another home, the average level was about 80 decibels. In a third, it was more than 81 decibels. The decibel measures the intensity of sound. Readings

from 0-60 are in the faint to moderate zone. The 60-100 range runs from loud to deafening.

Scientists are in general agreement that sustained levels from 95 to 100 are hazardous to the ear. Levels from 100-120 can cause temporary deafness and levels in the 130 to 140 range can result in permanent loss of hearing.

Other time periods which measured in the 70-80 decibel range from 7 to 8 a. m.; from noon to 2 p. m. and from 5 to 9 p. m.

According to Dr. Lee E. Farr of Houston, professor of nuclear and environmental science, University of Texas Graduate School of Biomedical Sciences, this kind of noise level will commonly produce tiredness and irritability.

Medical investigators have found that sustained sounds near the 100 decibel range can produce gastric ulcers. An Air Force study indicates continued high noise levels can cause indigestion, increase body temperature, impair vision and in extreme cases, cause nervous disorders.

What can the homemaker do about it? A significant number listen to an appliance before buying. Many more are making better use of the sound-killing qualities of draperies, rugs, upholstered furniture and wall coverings.

Frio News

MRS. OWEN ANDREWS
Brand Correspondent

Revival services at Frio Baptist Church closed Sunday evening. Mrs. James Coffman and two daughters came Saturday to be with Rev. Coffman. They returned to Groom after dinner at the church Sunday. Members brought basket dinner and spread it in the dining hall. Several visitors also remained for the meal. Mrs. Leon Hokett, wife of the revival music director came Saturday also. The Hoketts went to Rails Sunday after services, to attend the funeral there Monday for a close friend who died suddenly Saturday morning. The Hoketts are from Daingerfield.

A weekend visitor in the community was Mrs. Parker Rampley, Silverton, who visited in the home of her niece, Mrs.

One scientist advises families to "use a little consideration" and not turn on radios, TV's and record players at the same time.

Sam Ogan. Also spending the weekend with the Ogan was daughter Anna Ruth, Wayland College student.

Mrs. Leon Roberts of Wellington, her daughter, Mrs. Ronnie Ford and baby of Dodson, spent the weekend with Mrs. Roberts' parents, the John Simpsons. They were here especially to visit Mrs. Simpson's sister, Mrs. Cassie Parnell, who has been here about a month visiting the Simpsons and other relatives in the area. Mr. and Mrs. Robert Simpson, Mr. and Mrs. John Simpson and Mrs. Parnell spent Monday night in the home of an aunt, Mrs. Elmer Gardner, Clovis. Mrs. Parnell left there Tuesday, for the return trip to her home in Washington.

Mrs. Frank Robbins and Mrs. Owen Andrews attended a W. M.U. meeting at Dimmitt First Baptist Church Tuesday afternoon. It was for members of this division of the Associational WMU Mrs. Robbins is president of the local organization.

Among children in the community who have had recently or now have chicken pox are Lynette Andrews, Jodie Autry, Jay Manion, Kim Manion and Elizabeth Andrews.

Mrs. Tommy Sparkman and young son, Kirk, came home from the Hereford hospital on Thursday. Her mother, Mrs. Bill Werner of Odessa, came to spend a few days with the family, helping take care of the new baby and Kevin, the two-year-old.

FOR A MINUTE IT SEEMED THE SURF WOULD GOBBLE US UP!

TIM, I JUST CAN'T IMAGINE WHY A BIG EXPEDITION WOULD TRY TO LAND HERE!

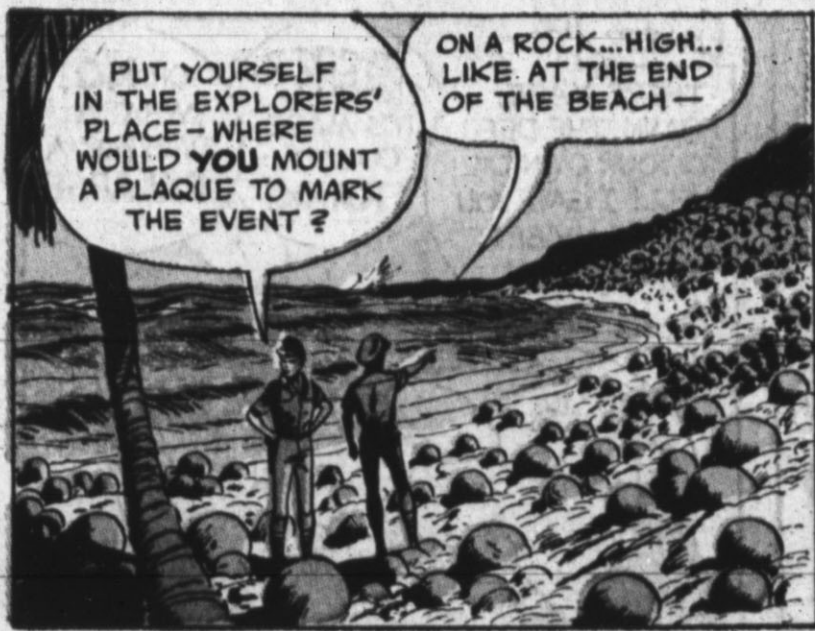

YOU FORGET, SPUD, A HUNDRED YEARS AGO CANNON BALL BEACH DID HAVE A SMALL NATURAL HARBOR -

I CAN SURE SEE HOW THAT SURF WOULD DEMOLISH ANY BREAK-WATER IN TIME!

OKAY - ASSUMING THE STARR EXPEDITION DID LAND AND LEAVE A BRONZE MARKER - WHERE DO WE LOOK FIRST?

PUT YOURSELF IN THE EXPLORERS' PLACE - WHERE WOULD YOU MOUNT A PLAQUE TO MARK THE EVENT?

ON A ROCK... HIGH... LIKE AT THE END OF THE BEACH -

LATER
NOTHING HERE, TIM - WE'VE BEEN OVER THESE BOULDERS, INCH BY INCH -

LOOK THERE BY YOUR HAND!

BY MY HAND?... HUH?... FOUR LITTLE PLANTS... WHAT'S SO STRANGE ABOUT THEM?

TO BE CONTINUED

TIGER

by BUD BLAKE

I'M INVENTING A NEW KIND OF ICE-CREAM SODA!

NEAT!

I'M JUST PUTTING IN THE CHOCOLATE SYRUP - NOW SOME VANILLA AND SOME VINEGAR

... A LITTLE GRAVY AND GINGER ALE

PHEW!

... PEPPER AND SALT AND SOUR CREAM

ICK!

... AND SOME GOOD OLD BUTTERMILK

NOW YOU CAN TRY IT, TIGER

UGH!

WHAT ELSE DOES IT NEED?

LESS SALT!

WHAT'S THAT ODD NOISE?

SEEMS TO BE COMING FROM SARGE

LOOK AT HIM SITTING THERE HALF ASLEEP!

OKAY, SARGE! LET'S GET ON THE BALL!!

I'M BUSHED

NOT A WINK OF SLEEP ALL NIGHT

I CAN'T SLEEP HERE!

I'LL BET BEETLE CAN TELL ME SOME GOOD PLACES TO SNEAK A NAP

WHERE'S BEETLE?

I DUNNO, SARGE. HE WAS HERE A WHILE AGO

HE'S SNUCK OFF, THAT'S WHAT HE'S DONE, AND AFTER THE BIG LECTURE I GAVE HIM!

NOT HERE, EITHER!

I HATE LOOKING ALL OVER FOR THAT JERK! IT'S K.P. FOR HIM, BOY!!

NOW I'M WIDE AWAKE

FLASH GORDON

by MAC RABOY

"FROM THE TIME THEY ARRIVED FROM THE PLANET MERCURY MY PEOPLE HAVE BEEN WITNESSES TO YOUR WARS HERE ON EARTH... THAT IS WHY WE HAVE REMAINED SECLUDED..."

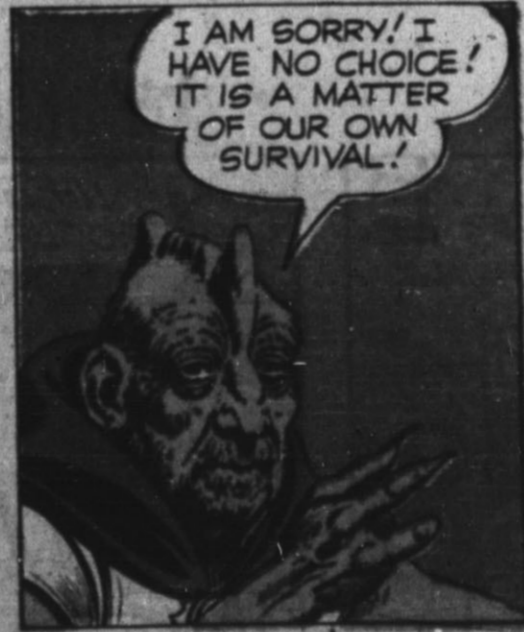

...HERE IN THE CAVERNS UNDER MOUNT VESUVIUS!

I AM AFRAID THAT YOU CANNOT RETURN TO THE SURFACE! OUR PRESENCE MUST BE KEPT SECRET!

BUT WE CAN'T SURVIVE IN THIS HEAT, JAN.J! OUR OXYGEN IS RUNNING OUT!

I AM SORRY! I HAVE NO CHOICE! IT IS A MATTER OF OUR OWN SURVIVAL!

THIS FOOD THE JAILER BROUGHT-- BOILING LIQUID SULPHUR... IT'S PROBABLY A CUP OF ICED TEA TO THESE MERCURY PEOPLE!

WONDER WHAT THESE BARS ARE MADE OF, ZARKOV...

DON'T KNOW, FLASH-- BUT IN THIS HEAT, THE AIR IS POISON! OXYGEN WOULD BURN!

AND WE HAVE PURE OXYGEN IN OUR TANKS!

LET'S SEE HOW LONG I CAN HOLD MY BREATH, THEN ...

IT'S WORKING! THE FLAME'S CUTTING THE BAR LIKE AN OXYACETYLENE TORCH!

... AND MY LUNGS ARE READY TO BURST!

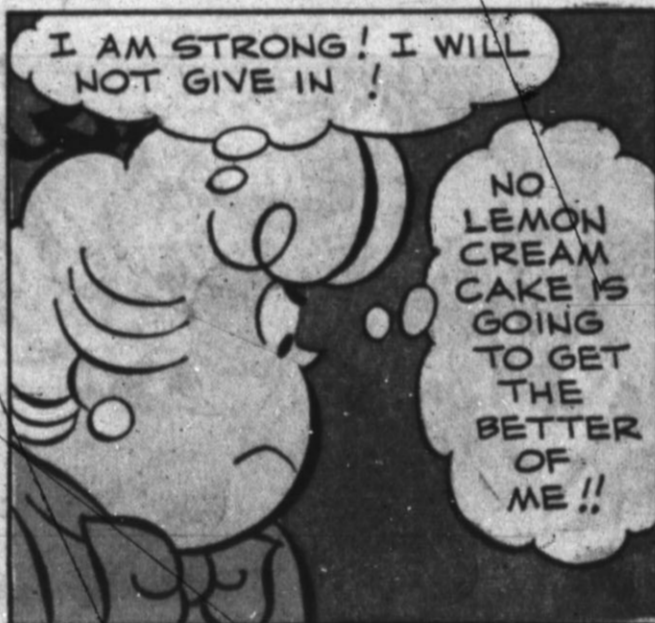

NEXT WEEK-- THWARTED! 4-3
