# More Than 16,000 Women in United States Found to Die Yearly From Maternity Causes

NEW YORK, Dec. 16.—The magnitude of the maternity problem was shown here today when it was found that approxi mately one-third of a group of expectant mothers showed signs complications which constituted a real peril unless discovered early and adequately treated. A report prepared by Dr. Louis I. Dublin, statistician of the Metropolitan Life Insurance Company, covering 4,726 cases cared for by the Maternity Center Association of New York City was submitted to the officers of that organization today. The death rate in these cases was reduced one-third the pre vailing general average for mothers in the same section of the city not receiving such service. lin, "is indicative of the saving of lives that might be accomlished were every mother to re-ceive the benefits of a specialised maternity service. As more than 16,000 women in the United Big!ps every year die from causer related to maternity—the highes

ized world—this means that more than 10,000 of these deaths are preventable

"The disgrace from which America has suffered can be removed by providing adequate ma-ternity care to the women of the country," Dr. Dublin said.

Not only were mothers' lives saved, but infant deaths in the first month of life were reduced by one-thord. Among the special group, the rate was 29.1 per 1,000

live births, as against a rate of 429 in the general population.

"Results obtained," continued Dr. Dublin, "show a death-rate below that of Denmark, which has the lowest maternal mortality rate in the world. Denmark's is 2.4 per 1,000 live births, while cial care in New York, the rate

In commenting on the report, Mrs. John Sloane, president of the Maternity Center Association "The only explanation of America's toleration of the exist-ing situation is that the people as a whole do not know about it. When fathers and methers realize the vital importance of maternity care, a change for the better can be expected. "A few important points," said

Mrs. Sloane, "were given special emphasis in this demonstration. First, seek exemination by aphysician as soon as a baby-is ex-pected and continue under his care; second, regulate work, rest, exercise and diet in accordance with the doctor's advice, and third, supplement this skilled care during delivery and the weeks that follow by such nursing and household help as will assure rest in bed for .at least ten days and an easy and gradual return to usual activity on the advice of the doctor and atter his examinations."

Mrs. Sloane explained that this

education of mothers was car-ried on by specially prepared public health nurses, who taught them individually and in clauses. These nurses emisted the doctors when the patients were delivered in their formes, and gave nursing care until the beby was at least six weeks old.

T. H. Wilhelm of Fort Worth, general freight agent of the Rock Island, testified yesterday that con-struction of the Texas & Pacific Northern would endanger a fair re-turn from the branch of the Rock Island from Vega to Forrest, New Mexico, already authorized.

Population statistics on the ter-ritory were introduced by C. B. Davis of Amarillo, Rock Island division freight agent, in an effort to show revenue would not justify building both roads. Loss of \$105. 000 in revenue to the Toxas & Pacific Northern was forecast by N L. Callens, assistant general freight agent of the Rock Island, if the for
