Written by a group of the best informed newspapermen of Washington and New York. Opinions expressed are those of the writers and should not be interpreted as reflecting the editorial policy of this newspa-ner.

WASHINGTON By George Durne

Teething-The chief topics of conversation behind official doors in Washing ton nowndays appear at first blush te be monetary policy, taxes, probl-bition repeal and then what?

But under the surface a bitter fight is in the making on a subject unrelated to these three.

The real knife-whetting is the proposal to pull some of the teeth from the Securities Act. York lobby to force amendment of the law designed to proand is working full force.

Everything is being done very quietly but those who have felt the force of the pressure-direct and indirect-say it is terrible. Brokers, corporation officials,

punitive clauses softened. Judging from their adroit tactic at both ends of Pennsylvania Avenue they propose to get what they

The last semi-official word from the White House indicated the ad-ministration wanted the act left albje. But this was over a month But this was over a month

We instance Chairman Fletcher of the senate banking and currency committee announced the other day that the Securities Law would be modified. His pronouncement had the ring of authority. President Roosevelt happened still to be in Warm Springs at the time but the impression got around that Senator Fletcher had talked to Acting Secretary of the Treasury Morgenthau. who had just returned from the

Then the president got back. Firstcher called on him. On his way out the senator wasn't nearly so phatic. He would say only that Mr. Roosevelt had asked his comto study the law further

Sources on Capitol Hill hear even that an effort was made by som of the Wall Street boys to trade with the administration. They re-called the \$727,000,000 refunding op eration the treasury is up against next week. It could be financed much easier if there were any assurance the Securities Act's claws would be trimmed

greater power, without requiring
the use of premium fuels of high
anti-knock quality. The valve inshell, grille and other features. Interiors reveal pew tufted upholgreater power, without requiring the use of premium fuels of high anti-knock quality. The valve inserts, together with the special heat resisting chorme nickel alloy valves, maintain the engine's original high efficancy over long regions. steriors reveal new tufted uphol-teriors reveal new tufted uphol-stery and garnish mouldings, a cove-type head lining, new instru-ment planel, arm resta, door pulls and hardware. Sun visors are pro-vided in all closed cars, those in the de luxe cars, being of several

high efficency over long periods. Carburotton The new carburetion system and other engine refinements not only give better gasoline mileage and oil the de luxe cars being of swivel type to prevent glare both from the front and sides. onomy but also insure smoother operation at all speeds and parti-Fenders on de luxe cars now are cularly at normal driving speeds. in color to harmonize with the body With the new carburetor is used a colors. Wheel colors are optional.

A new enamel finish is used on all dual intake manifold which dietri-A new enamel thish is used on all butes the vaporized gasoline equally bodies. This has greater wearing to each cylinder, very materially improving engine performance and and requires only washing to reproviding quicker starting in cold weather. Gasoline economy is increased two or three miles per galling. butes the vaporized gasoline equally ion. Test runs show that the new engine will give 20 miles per gal-

on at 45 miles an hour. Another important engine improvement is the use of water line bermostats. These are automatic mechanical valves which prevent the warm water in the engine from passing out into the cooling radiator until the proper temperature is reached for maximum operating efficiency. In cold weather, the thermosta's enable the engine to warm up quickly and maintain an efficient running temperature.

Ford spring design takes advan-tage of the principle of the transverse spring. It provides the ut-most stability and safety, the practical minimum of unsprung weight with the least possible frame dis-The Ford spring design tends to prevent the body from tilt-ing on uneven roads. Corners can be taken safely at relatively high

Springs Both front and rear springs are placed crosswise. This transverse lesign permits free and easy action of all four wheels because the springs are attached to the axles at their outer flexible tips. This type of construction relains the impor-tant advantages of the solid axle and yet minimizes road shocks transmitted to the frame and body

because the shocks are absorbed first by the most sensitive part of the spring. The rear spring on the 1934 car has been redesigned to provide moother riding. Improved double-acting hydraulic shock absorbers which act independently of weather or road surface conditions are used. Seat cushions have deeper, softer springs. New type individual bucket seats are used in the Tudor.

Driving case also has been in-reased by the use of a new 15-to-1 steering gear ration. The frame is of the double X-type, with the X member running to the rear of the frame to give greater strength.

Brakes are of the mechanical type with 186 square inches of braking surface. Other features of the chassis are a slient synchronizing transmission, torque tube drive, threequarter floating rear axle, one welded steel spoke wheels and 17x5.50 tires.

STOMACH and COUGH

NEW FORD V-8 for 1934

UNIVERSAL

The New Ford V-8 for 1934 will be on display tomorrow at the showrooms of Ford dealers. Surpassing even the great Ford of 1933 in economy, beauty and comfort, it is truly the car of this modern age—the culmination of thirty years Ford progress. It combines the proved performance of the V-8 cylinder engine with two important new features-Dual Carburetion and perfected Clear-vision Ventilation. See it and drive it at the first opportunity.

OUTSTANDING IMPROVEMENTS IN THE NEW FORD V-8

BETTER PERFORMANCE. Greater power, BETTER PERFORMANCE acceleration, smoother per-new speed, quicker acceleration, smoother per-formance, more miles per gallon especially at higher speeds, and quicker starting in cold weather—all these result from the new dual carburetor and dual intake manifold. New waterline there mostats enable the engine to warm up more quickly and to maintain an efficient operating temperature. Added engine refinements reduce oil consumption, further improve operating economy and reduce maintenance costs.

NEW VENTILATION SYSTEM permits clear vision, prevents drafts and provides desired amount of fresh air in any weather. Individual control for front and rear side windows. When ventilation is desired the window glass is raised to the top. Then the handle is given an additional half-turn. This slides the glass back horizontally to form a narrow slot, as illustrated.

Through this slot air is drawn out by the forward motion of the car. This simple ventilation system maintains draft-free circulation, insures passenger comfort, prevents fogging windshield in cold or stormy weather. Both windshield and cowi ventilator can be opened to supply additional air needed for comfortable warm-weather

DISTINCTIVE NEW APPEARANCE onhanced by the newly designed chromium-plated rediator shell and grille, new hood louvres, new hab caps. Interiors are attractive, with new tufted upholstery, new mouldings, new covetype headlining, new instrument panel, new arm rests, new hardware. Swivel-type sun visors in De Luxe bodies prevent glare from front or side.

FENDERS IN COLOR. On De Lune care fenders are in color to harmonize with body colors

- wheel colors optional. New ens. of finish on all bodies and fenders has greater wearing quality and more enduring luster.

GREATER RIDING COMFORT results from increased spring flexibility. The spring leaves are newly designed for quieter and easer action. Shock absorbers are improved. Seat cushions are deeper, with new, softer springs. New type, individual bucket seats provide increased comfort for front-seat passengers in the Tudor Sedan. Adding to comfort is the new driving case of the 15-to-1 steering gear ratio.

PRICES REMAIN LOW—Tudor Sedan \$535. Coupe \$515; Forder Sedan \$585; De Laxe Tudor \$575. De Luxe Forder \$825. De Luxe Coupe (5 windows) \$555. De Luxe Coupe (3 windows) \$555. De Luxe Renduler \$255. De Luxe Phaeton \$550. Cabriolet \$200. Victoria \$610. (All prices f. o. b. Deizoit.)

Every day, as you linger over your newspaper, the wares of the world ble before you in the advertisements. Exciting new fashious from your favorite small shop. Household essentials from the great departnt stores. Everything for the menu . . . the motor ear . . . the mode in make-up, offered to you for your choosing and deciding,

And many of these purchases you'll negotiate with more satisfaction than the duchess enthroned at her dressing-table. For, where the duone had to judge of quality for herself, you have the word of the merchant and the word of the manufacturer for integrity, correctness and cost.

HER MOTHER and the price he demanded was THIS GIRL'S LOVE!

EAST OF SUEZ

COLOR and stir of the bazaar . . . beat of the tom-toms and wall of the pipes . . pungent dust of the passing caravan . . . flash of silver and erimson and jade . . . sing-song invitation of the tradesmen!

If you ever travel in the Orient you will feel the fascination of the bazaar-once. Afterward, when you return from a frenzy of haggling and sleight-of-hand, and spread your tawdy purchases on the hotel bed, you will feel differently. You will appreciate as never before the advantages of living in a country where goods are advertised in the daily press ... where you can sit down with your newspaper and decide exactly what you will buy today, what price you will pay, and where you will find the greatest values. Best of all, a country where buying an advertised article means getting your money's worth, without matching wits with unscrupulous traders.

Perhaps you'll never voyage East of Suez. But right now, right at home you can discover the convenience and sound economy of reading the advertisements before you shop. Here is a leading merchant who has combed the markets of the world for quality merchandise at a price his name guarantees to be fair. Here is a great manufacturer who has exhausted science to improve the worth of his product. Here is a little shopkeeper offering unusually attractive prices.

Study the advertisements. Know what is being offered to your advantage. Then do your buying with assurance.
