As Dangerous as Poison Gas Shells

in the head, eyes, ears, back or other parts of the body and a feeling of seere sickness. In most of the cases the symptoms disappear after three or four days, the patient then rapidly recovering. Some of the patients, however, develop pneumonia, or inflammation of the ear, or meningitis, and many of these complicated cases die. Whether this so-called 'Spanish' influenza is dentical with the epidemics of influenza of earlier years is not yet known. "Epidemics of influenza have visited this country since 1647. It is interestng to know that this first epidemic was brought here from Valencia, Spain. Since that time there have been numerous epidemics of, the disease. In 1889 and 1890 an epidemic of influenza, starting somewhere in the Orient, spread first to Russia and thence over practically the entire civilized world. Three years later there was another flare-up of the disease. Both times the epidemic spread wide-

ly over the United States. "Although the present epidemic is called 'Spanish influenza,' there is no reason to believe that it originated in Spain. Some writers who have studied the question believe that the epidemic came from the Orient and they call attention to the fact that the Germans mention the disease as occurring along the eastern front in the summer and fall of 1917.'

How can "Spanish influenza" be recognized?

"There is as yet no certain way in which a single case of 'Spanish influenza' can be recognized. On the other hand, recognition is easy where there is a group of cases. In contrast to the outbreaks of ordinary coughs and colds, which usually occur in the cold months, epidemics of influenza may occur at any season of the year. Thus the present epidemic raged most intensely in Europe in May, June and July. Moreover, in the case of ordipary colds, the general symptoms (fever, pain, depression) are by no means as severe or as sudden in their onset as they are in influenza. Finally, ordinary colds do not spread through the community so rapidly or so extensively as does influenza.

"In most cases a person taken sick with influenza feels sick rather suddenly. He feels weak, has pains in the eyes, ears, head or back, and may be sore all over. Many patients feel dizzy, some vomit. Most of the patients complain of feeling chilly, and with this comes a fever in which the temperature rises to 100 to 104. In most cases the pulse remains relativey slow.

"In appearance one is struck by the fact that the patient to eyes and the inner side of his eyelids may be slightly 'bloodshot,' or 'congested,' as the doctors say. There may be running from the nose, or before catch the disease again? there may be some cough. These signs of a cold may not be marked; never- measles or scarlet fever or smallpor theless the patient looks and feels very sick. "In addition to the appearance and appears not to be true of 'Spanish inthe symptoms as already described, examination of the patient's blood may ports the King of Spain suffered an aid the physician in recognizing 'Spanish influenza,' for it has been found

overs. But while the proportion of deaths in the present epidemic has For District Clerk generally been low, in some places the outbreak has been severe and deaths have been numerous. When death oc- For County School Superintendent curs it is usually the result of a complication."

What causes the disease and how is it spread?

"Bacteriologists who have studied inluenza epidemics in the past have found in many of the cases a very For County Treasurer small rod-shaped germ called, after its discoverer, Pfeiffer's bacillus. In other For County Surveyor cases of apparently the same kind of disease there were found pneumococci, the germs of lobar pneumonia. Still others have been caused by streptococci, and by others germs with long For Public Weigher Pre. No. 1.

names. "No matter what particular kind of For Justice Peace Pre. No. 4. germ causes the epidemic, it is now believed that influenza is always For Commissioner Pre. No. 4. spread from person to person, the germs being carried with the air along with the very small droplets of mucus, expelled by coughing or sneezing, forceful talking, and the like by one who already has the germs of the disease. They may also be carried about in the air in the form of dust coming from dried mucus, from coughing and

the disease himself may give a very California. severe attack to others."

What should be done by those who catch the disease?

"It is very important that every person who becomes sick with influenza Bakery, and get the Cash. should go home at once and go to bed. This will help keep away dangerous

complications and will, at the same time, keep the patient from scattering the disease far and wide. It is highly desirable that no one be allowed to sleep in the same room with the pa-

> "If there is cough and sputum or running of the eyes and nose, care should be taken that all such discharges are collected on bits of gauze or rag or paper napkins and burned. If the patient complains of fever and headache, he should be given water to drink, a cold compress to the forehead and a light sponge. Only such medicine should be given as is prescribed by the doctor. It is foolish to ask the druggist to prescribe and may be dangerous to take the so-called 'safe, sure and harmless' remedies advertised by

> patent medicine manufacturers. "If the patient is so situated that he can be attended only by some one who

> must also look after others in the family, it is advisable that such attendant wear a wrapper, apron or gown over the ordinary house clothes while in the sick room and slip this off when leaving to look after the others. "Nurses and attendants will do well

to guard against breathing in dangerous disease germs by wearing a simple fold of gauze or mask while near the patient." Will a person who has had influenza usually protects a person against another attack of the same disease. This location of your land. fluenza.' According to newspaper reattack of influenza during the epidemic thirty years ago, and was again stricken during the recent outbreak in Snain."

#### SAN SABA NEWS, SAN SABA, TEXAS, THURSDAY OCT. 17th. 1918

#### Dr. R A. Lindley Dies in Fort Worth.

A message received here Wednesday morning brought the sad news of the death at 7:00 oclock that morning in Ft. Worth of Dr. Raymond A. Lindley. While the news was not altogether unexpected, yet it was a shock to the many Brady and McCulloch county friends of the doctor. His brother, Dr Harry Lindley and wife had been advised Monday of the serlousness of his illness, and had gone to Fort Worth to be with him. It is learned that the doctor had been ill with Spanish influenza, but that on Tuesday he was so much improved as to venture to be up A relapse, how ever, speedily brought on pneumonia, from which he succumbed.

In Her Mother's Home, Says This Georgia Lady, Regarding Black-Draught. Relief From Headache, Malaria, Chills, Etc.

Ringgold, Ga .- Mrs. Chas. Gaston, this place, writes: "I am a user Thedford's Black-Draught; in fact, it was one of our family medicines. Also in my mother's home, when I was a child. When any of us child-ren complained of headache, usually caused by constipation, she gave us a dose of Black-Draught, which would rectify the trouble. Often in the Spring, we would have malaria and chills, or troubles of this kind, we would take Black-Draught pretty reg-ular until the liver acted well, and we would soon be up and around again. We would not be without it, for it certainly has saved us lots of doctor bills. Just a dose of Black-Draught when not so well saves a lot of days in bed." Thedford's Black-Draught has been

found a volumble remedy for these troubles. It is purely vegetable, and

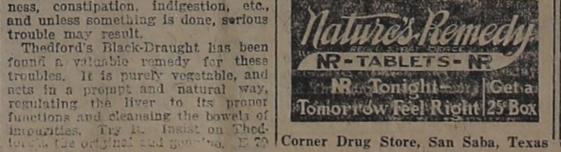

nets in a prompt and natural way, regulating the liver to its proper

in use for many years in the treat-ment of stomach, liver and bowel troubles, and the popularity which it We are always in the market for all kinds of poultry, butter and eggs, and troubles, and the popularity which it now enjoys is proof of its merit. If your liver is not doing its duty, you will suffer from such disagree-able symptoms as headache, billous-ness, constipation, indigestion, etc., and unless something is done, serious trouble may result. Thedford's Black-Draught has been found a subsche wondy for these pay the highest cash price.-J. W.
