

## HULEN AND HUTCHINGS UP FOR BRIGADIERS

FOUR TEXANS IN REGULAR ARMY ALSO ADVANCED IN LINE OF SERVICE.

### COL. SCOTT PROMOTED ALSO

Approximately Two Hundred Appointments are Announced by President to Command New Army.

Washington.—Four Texans in the regular army will become brigadier-generals as result of about 200 appointments of general officers made by the president to command the national guard and the national army.

Col. W. S. Scott of McKinney, better known in the army as "Tex" Scott and recent commander of the Leon Springs training camp, is one of those advanced. He is now commander of the 16th cavalry.

Another colonel becoming brigadier general is W. P. Richardson of Paris, Texas, who for several years had been the war department representative in Alaska and supervised the construction of government roads there. He did work in connection with locating the route for the government railroad in the territory.

Beaumont B. Buck of Hillsboro, recently promoted to colonel and now in France, is also to be a brigadier general and probably will lead one of the first large units of the American army against the German line.

The president's list of those to be advanced to the rank of brigadier general includes Col. Guy Carleton of Austin, one of the well known cavalry officers of the army.

Adjutant General Henry Hutchings and Gen. John A. Hulen of Texas are among the brigadier-generals nominated by the president. They will command Texas troops.

From the 37 new major generals to be created for the duration of the war and from the existing major generals of the regular army will come the army corps and division commanders of all the forces now being raised of regulars, national guards or national army. Similarly the brigadier commanders will be selected from the list of more than 100 new brigadiers.

### National Guard Troops to France

Coincident with this announcement of high command came the statement from the war department that a composite national guard division composed of troops from 26 states and the District of Columbia was in process of organization under command of Brigadier General Mann, now chief of the militia bureau of the department.

These will be the first national guard troops to be sent to France. No discussion is permitted by the censorship regulations, however, of the time of their mobilization or departure for the front.

### LIMITED HITS FREIGHT; 2 DEAD

Katy Collision Occurs in Watauga Yards, North of Fort Worth

Fort Worth.—Two persons were instantly killed and seven others were slightly injured when the north-bound Katy limited, which left this city at 9:05 o'clock Wednesday night 45 minutes late, collided head-on with a freight train in south Katy yards at Watauga, twelve miles north of this city.

The dead: Jerry Scott, Denton, passenger engineer; W. A. Hammock, passenger fireman.

According to statements of railroad officials and witnesses to the accident, the freight train had pulled out on the main line with the intention of taking the siding to allow the passenger train to pass. For some reason it had not done so, and the passenger train, rounding a sharp curve at the rate of 40 miles an hour, crashed headlong into the train before the emergency brakes were applied.

### Local Option Election Sept. 10

As a local option election in this county has been ordered by the commissioners' court after the filing of a petition declared by members of the local option campaign committee to contain more than 6,000 signatures. The election will be held on Monday, Sept. 10. A small delegation of anti who were present at the session asked for delay in ordering the election.

### Texas Assistant Sec. of Agriculture

Washington.—Clarence Ouseley of College Station, Texas, and Raymond Pearson of Ames, Iowa, were nominated by President Wilson to be assistant secretaries of agriculture under provisions of the food survey

## GOVERNOR FERGUSON DEFENDS HIS COURSE

TAKES STAND IN HOUSE INVESTIGATION OF CHARGES BY SPEAKER FULLER

Austin.—Governor James E. Ferguson was on the witness stand two and one-half hours Friday afternoon engaged in testifying on his behalf in the investigation proceedings being conducted by the house as a committee of the whole into charges preferred against him by Speaker F. O. Fuller.

While testifying Governor Ferguson spoke so that he was heard with ease. Each charge was taken up separately and discussed, but his explanation of only part of the charges was completed.

Among witnesses was Wilbur P. Allen, chairman of the board of regents of the state university, who gave considerable interesting testimony and was subjected to a rigid cross-examination.

Captain W. H. Owens of Galveston testified on direct examination that one ranger had been detailed on one occasion to guard Governor Hogg. On cross examination, he stated that the guard was maintained only a week, for when Governor Hogg found out that he was being guarded he put a stop to it.

### LYDAY FARMERS UNION HEAD

Convention Adopts Resolution Favoring Thirty-Cent Cotton Minimum

Dallas.—D. E. Lyday of Ravenna, Fannin county, was elected president of the Farmers' Union of Texas at the concluding session here Thursday of the fifteenth annual convention, succeeding H. N. Pope of Fort Worth. During the past year Mr. Lyday has been chairman of the executive committee. Less than a hundred farmers were present for the election, although the attendance Wednesday was estimated at 1,100 or 1,200. Many of them had left for their homes when the election came on.

A resolution asking the enactment by congress of a law fixing a minimum price of 30c a pound for cotton over a period of three years was adopted. This matter of asking the government to fix a minimum price on cotton brought considerable discussion.

Resolutions were also adopted endorsing government ownership of railroads, telegraph and telephone lines; favoring the purchase by the government of coal, oil and gas lands; and favoring the levy of an additional tax upon excessive land ownership by one person.

The convention went on record as opposing woman suffrage and also as opposing the maintenance of a large standing army during times of peace.

### MAY BUILD SHIPS AT BEAUMONT

Shipbuilding Company Joins Texas Steel Company in Offer to Government

Washington.—The Texas Steel company has been joined by one of the leading shipbuilding concerns of the east in its proposal now before the shipping board, looking to construction of steel ships at Beaumont out of Texas materials. This shipbuilding concern is now engaged on contracts for the government and would give added assurance of proper and speedy completion of the work in Texas, providing the government accepts the propositions which Col. L. P. Featherstone, president of the Texas company, has submitted.

The Texas Steel company proposes to use east Texas ore in producing steel plates at \$43.65 per ton. The former proposition has been enlarged by the eastern company agreeing to build ten ships at Beaumont, the first deliveries to be by July, 1918.

The difference between what the government is allowing for plates in the east and the Texas price of \$43.65 will save the government on the contracts quoted according to Colonel Featherstone, from \$30,000 to \$100,000 determinable by the size of the ships.

### Six Texans Become Colonels

Washington.—Six Texas prominent colonels from Texas were in the list promoted to the rank of colonel and will be assigned with others to the national army and the national guard. Among them is Andrew Moses of Burnet, who is remembered in Texas as commandant of the A. & M. college for four years and who was instituted by many ex-students of the institution to organize a regiment for war service. Other Texans promoted are W. McK. Lambdin of Waco, W. L. Westervelt of Corpus Christi and San Antonio, R. S. Abernathy of Gonzales and S. F. Boyer of Waco. All are made all colonels.

### Troop National Army Assigned

Washington.—The 10th Cavalry assigned Baker has been introduced in

## AMERICAN RED CROSS HEADQUARTERS IN PARIS

The new headquarters of the American Red Cross in Paris are in this fine building in the Place de la Concorde.

### ON HIS OIL-DRUM BOAT

British soldier in Belgium taking a pleasure ride on a boat he has made of oil drums.

### Short and to the Point.

One of the shortest summing-up on record is believed to be that delivered by the late Commissioner Kerr at the Old Bailey in a case where a man was charged with being in the unlawful possession of a gold watch and chain.

The appearance of the prisoner certainly did not correspond with the legitimate possession of such costly ornaments, but he asserted his innocence of the charge and declared that he had found the watch and chain on the pavement.

"The judge looked at the man in the dock and then at the men in the box 'Gentlemen of the Jury,' he said, 'I have walked over the pavements of London during the last forty years, and I've never found a gold watch and chain there yet. Consider your verdict.'—London Tit-Bits.

### Japanese Vegetables.

Very little meat is produced or consumed in Japan, the people depending mainly on vegetables, such as rice, fish, certain bulbs such as tiger lily and seaweed, which are very nourishing and different from anything found along our seacoast.

Peas and beans are largely cultivated in Japan, which resemble our bush beans, and are very prolific, including twenty or more varieties; radishes, in all sizes which weigh from half a pound to a pound.

numbers include the climbing vegetable, which has been introduced in France, which are of large size and which are especially turnips and a and favor it a pie bill. The high aspira-

## TEXAS NEWS-BRIEFS

Gov. Jas. E. Ferguson was on the witness stand two and one-half hours Friday afternoon engaged in testifying in his own behalf in the investigation proceedings being conducted by the house as a committee of the whole into charges preferred against him by Speaker Fuller.

Recommendation that the middling price for cotton be fixed at 30c per pound and 60c per ton as the minimum price for seed in made in the report of a special committee on price fixing appointed during the recent annual meeting of the state farmers institute held at Austin.

A local option election has been called in Dallas county by the commissioners' court after the filing of a petition declared by members of the local option campaign committee, to contain more than 6,000 signatures. The election will be held Monday, Sept. 10.

The Gainesville Red River bridge company, capitalized at \$60,000, \$40,000 of which is paid in full, has applied for a charter at Austin. The company will build a steel toll bridge across the river somewhere north of Gainesville, a scheme which has been under way almost a year.

Ten more base hospitals are soon to be called for by the war department, eight have tentatively been accepted. Dallas has had authority to organize a hospital unit to be expanded into a base hospital, and it is believed that Dallas will be one of the additional units to be called.

D. E. Lyday of Ravenna, Fannin county, was elected president of the farmers' union of Texas at the concluding session in Dallas Thursday of the 15th annual convention, succeeding H. N. Pope of Fort Worth. During the past year Mr. Lyday has been chairman of the executive committee.

Secretary Baker has approved the disposition of the 687,000 men of the first draft as recommended by the provost marshal general. The average number of men allotted to each of the 13 cantonments is approximately 43,000 men. Those allotted to San Antonio, Texas, include the troops from Texas and Oklahoma, and total 46,100.

Six army lieutenants colonels from Texas were in the list promoted to the rank of colonel and will be assigned with others to the national army and the national guard. Among them is Andrew Moses of Burnet, who is remembered in Texas as commandant of the A. & M. college for four years.

Only the absence of one necessary for a quorum, prevented the state senate from adopting a resolution declaring that C. W. Woodman has continued as commander of labor statistics in "utter defiance of the constitution, and declaring that in the sense of the senate, the official acts of all the governor's vacation appointees have been null and void.

Government of the coal industry appeared imminent when President Wilson turned his personal attention to the subject and heard mine operators and miners' presentation of the situation. Provisions of the food control bill giving the president power to fix prices work the mine to the consumer and investing in him authority to requisition all coal produced and sell it to the public, are expected to be put into force in a short time.

On the western front 25 entente airplanes and four captive balloons are said to have been brought down, according to a report from Berlin.

A machine gun officer tells of his experience in the fighting at Hill 70, as having had a target for an hour and a half enemy reinforcements coming up in columns of fours for use in counter attacks. He said his men killed more Germans on that one day than they had seen altogether on any previous time.

Clarence Ouseley of College Station, Texas, and Raymond A. Pearson of Ames, Iowa, were nominated by the president to be assistant secretaries of agriculture under provision of the food survey law.

Two persons were instantly killed and seven others slightly injured when the north-bound Katy limited, which left Fort Worth Wednesday night, 45 minutes late, collided head-on with a freight train in south Katy yards at Watauga, 12 miles north of that city.

With receipts of 1,500 head the Ft. Worth hog market was active last Friday and one good load of swine set a new record top price of \$17.35.

A resolution asking the enactment by congress of a law fixing a minimum price of 30c a pound for cotton over a period of three years was adopted at the farmer's union convention at Dallas last week. The matter of asking the government to fix a minimum price on cotton brought considerable discussion.

## FRENCH WOMEN MAKING BALLOONS

In this French official photograph showing the manufacture of observation balloons, women are seen suspended in chairs sewing the ropes that hold the car onto the gas bag.

## HEROINE AND HER YOUNG CHARGES

When the war broke out, Mme. Pellequer was schoolmistress at Mancourt, a French village, which the Germans soon occupied. She refused to abandon her little charges and for 30 months kept her school open and also hid wounded French soldiers in the cellar of her home. When the Germans retreated last March they took Mme. Pellequer with them, but she escaped in time to warn her countrymen of a big mine the Boches had prepared under the town hall.

Do You Need  
More ..

# MONEY

In Your Business?

The addition of a little capital to your working fund often produces greatly increased dividends from your total investment.

My Company is prepared to lend money in any sum for the development of all legitimate commercial enterprises and for farm purposes. Approved security of course is required, in compliance with law and sound business principles.

Put your obligations a few years ahead while you have an opportunity. Get long time money and buy more cattle; the cattle will pay the interest and finally pay the principal.

If you are expecting to borrow money on your real estate, our terms of payment and rates of interest will meet with your approval. I invite a confidential interview with you.

Drop me a Postal Card and I will call on you.

# Fads and Fancies of Fashion

The straight-line frock is the foundation on which styles in one-piece dresses are built. However, designers may vary the straight line by the introduction of draperies, or tunics, or girdles, it makes itself evident somewhere in the up-to-date model. The straight-line or "Chinese" dress is entering upon its third season, and also what promises to be its most successful season in point of popularity, and it may have won a permanent place for itself. It is becoming to both full

FLATTERING MODES IN ONE-PIECE FROCKS.

and slender figures, and it is chic and youthful looking. All its advantages may be summed up in the declaration that it is a flattering mode.

Although satin and wool have been chosen for the greater number of the new models, our old friend taffeta is well represented among them. Its texture makes it desirable where certain effects in draperies are sought, as in the frock shown in the picture. Here the straight line appears in the front and back of the dress, but is broken at the sides with drapery that widens the figure and falls from the waist line. The skirt is gathered to the body at the front and back about eight inches below the normal waist line, but a

LIGHT FELT HATS FOR NOW.

short belt at each side supports the full draperies and it is the stiffness of taffeta which gives the effect desired. New details of furnishing appear in the short surplice collar, ornamented with small, silk-covered buttons, and in the sleeves, made of the silk, straight strips of silk, finished at the ends with tassels, extend over the shoulders and are attached to the short neck side, fasten each side, fasten by a little short tassel.

All the hats pictured have rolled edges. Straight edges are sometimes finished with burtonhole stitches at intervals done in black yarn, and in flat forms and leaves posed against the sides of the crown of yarns.

## GOVERNMENT WARNS OWNERS OF HORSES

HEALTHFUL AND VIGOROUS SPECIMENS OF FARM HORSES.

Carbon bisulphid, a cheap and readily obtainable compound, is being unduly exploited under various names and at exorbitant prices as a treatment for bots and worms in horses, according to information which recently has come to the United States department of agriculture. This chemical is a recognized remedy for these ailments, but the department warns farmers against paying \$5 for a quantity, sold under a fanciful name, that probably could be bought at any drug store for 25 cents.

Not only is this compound being thus sold fraudulently, but false claims are made for it and directions for its use improperly prescribed. Carbon bisulphid is poisonous, and if used indiscriminately by inexperienced hands may do more harm than good, the specialists say. The vapor of this substance is suffocating, and inflammable when mixed with air, and must be kept away from all fire. As the method of administering this compound is not altogether easy, it is suggested that the treatment should be given under the direction of a veterinarian.

### Administering Compound.

The usual method of administering it is to give out one dram divided into three doses and to supplement it with a purgative. For yearling colts half the amount, in similar dosage, is sufficient. The carbon bisulphid is administered in sealed capsules in the stomach. Gelatin capsules sealed with glue or otherwise prepared by the druggist so there will be no leakage

may be used. So-called four-dram capsules will actually hold four drams of carbon bisulphid; two-dram capsules about one and one-half drams. An instrument known as a balling gun or balling syringe will facilitate the administration of the capsules. Inhalation of carbon-bisulphid fumes by a horse may have serious consequences, and it is accordingly important not to use of the capsule unless directed during their administration. The day preceding the treatment the horse is fed lightly and all food is withheld in the evening. A purgative of aloes (one-half to one ounce) or a pint of raw linseed oil is given on the day of the treatment three drams of carbon bisulphid in a gelatin capsule or capsules are given to the horse, still fasting, at six o'clock in the morning, three drams at seven o'clock, and three drams at eight o'clock—making in all nine drams of carbon bisulphid in either three or six capsules, according to the size of the animal. These doses are for a mature horse; a yearling colt may be given half the quantity.

### Removing Bots.

When the remedy is used for the removal of "mosquito" bots, which occur commonly in certain Western states, it should be given during the fall of the year, as bots of this species leave the upper part of the intestinal tract after this time and establish themselves in the lower intestine, where they are but little affected by ordinary medicinal treatment.

## CURED ALFALFA HAY SUPERIOR FOR COWS

Result of Experiment Made at New Jersey Station to Determine Feed Value.

In an experiment to determine the feeding value of cured alfalfa hay as compared with green alfalfa feed as a soiling crop for cows producing milk, and to ascertain the physical effect of green alfalfa feed as a soiling crop with sludge as compared with alfalfa hay, two lots of cows were fed by the New Jersey station by the reversal method during two periods of 40 days each. Both lots received in addition sludge, beet pulp, cornmeal, gluten, distillers' grains, cottonseed meal, and bran. The total average weight of the cows on the alfalfa hay ration was practically the same as of those on the soiling crop ration, and the production of both lots remained remarkably constant during the entire experiment. The average daily milk production was 22.6 pounds per head when alfalfa was fed, as compared with 23.1 pounds on the soiling crop ration. On the alfalfa hay ration 253.4 pounds of milk fat from milk testing 9.27 per cent was produced, and on the soiling crop ration 364.9 pounds from 3.23 per cent milk. The cost of feed was \$136.90 and the profit over feed cost \$100.01 on the alfalfa hay ration as compared with a feed cost of \$132.07 and a profit over feed cost of \$125.90 on the soiling crop ration. For every pound of alfalfa hay that was fed 1.9 pounds of milk was produced, while it required 2.68 pounds of green alfalfa feed in the form of a soiling crop to produce 1.9 pounds of milk.

farm-animal books and by the United States department of agriculture. Green feeds have a tonic as well as nutritive value and should be used wherever possible. With some feeds care must be used in feeding to avoid parasitic infection and the infection of such diseases as tuberculosis. Old pastures and stables which have been examples of possible sources of disease to sheep and hogs, respectively. Pure water is another essential to animal health. Animals should not have access to stagnant water, and water, if contaminated, such as streams passing through infested farms above, pools drained from barn lots, and so on.

Two naturally hygienic factors are fresh air and sunlight. Pure fresh air constantly available to a animal, reduces the possibility of lung trouble. Impure air reduces an animal's resistance to disease by failing to supply the oxygen necessary for the purification of the blood. Sunlight is a natural germicide and will keep animal surroundings free from disease germs. All buildings for housing farm animals should be well ventilated and have plenty of sunlight reaching to all parts of the building at some time during the day. When weather permits, the animals should be kept outside as much as possible. Yards, lots, pens and buildings should be kept clean, and may be made free of disease by the use of lime and standard disinfectants. Whitewashing the inside of buildings, scattering lime over the ground, and spraying with disinfectants these places accessible to animals but inaccessible to sunlight will aid sanitation and promote the welfare of the farmer.

## RIGHT FEEDING AND PROPER SANITATION

Two Important Preventives of Disease Losses in Farm Animals—Hygienic Factors.

(From the United States Department of Agriculture.) Proper feeding and sanitation are two important preventives of disease losses in farm animals. If carefully applied these measures may prevent many losses of meat animals. Keep the animals sturdy and disease-resistant by feeding a good, wholesome diet. Young animals need particular care and should be kept growing. A balanced ration should be fed—one that contains enough digestible protein to supply the needs of bone and muscle

## HUNDRED MILLION LOANED TO RUSSIA

THE FALL OF RIGA INTO GERMAN HANDS WOULD NOT BRING DISASTER.

## UNITED STATES SHOWS FAITH

Moscow is Seat of the Patriots—Bulk of Loan to be Spent Here for Supplies That Will Be Rushed Across Before Winter's Ice.

Kansas Troops Reach Ft. Sill. Fort Sill, Ok. Aug. 25.—The first detachment of Kansas and Missouri national guardsmen who are to mobilize at Camp Doniphan began arriving here at 6 o'clock this morning. The first train brought one company of Kansas infantry, companies D and C, Kansas engineers sanitary detail with Major Leigh Hunt in command. A second train carried a battalion of Missouri engineers under command of Major Stayton. The engineers will lay out the camp. Gov. Ferguson of Texas Out of Office. Austin, Tex., Aug. 25.—James E. Ferguson was suspended from the office of governor of Texas shortly after 9 o'clock tonight when the board of representatives named by the house of representatives presented to the senate a resolution of impeachment alleging official misconduct. W. P. Hobby, lieutenant, governor, automatically succeeded to the governorship, pending disposition of the charges in the senate.

Washington, Aug. 25.—The United States reaffirmed today its faith in the new Russian democracy and gave concrete evidence of its confidence by loaning another hundred million dollars to the provisional government. Announcement of the loan came from the treasury soon after Secretary Lansing, at the state department had denied formally that reports from Russia were of an unfavorable nature, and declared that on the contrary confidential dispatches to the government were the basis for his belief that the administration at Petrograd was strengthening its position.

"I regard the government of Russia as stronger today than it has been for a month," Mr. Lansing said. "I mean in general both from political and military points of view. This opinion is based upon reports more or less confidential that we have been getting. So far as the military situation is concerned the secretary indicated that he felt little concern over the advance upon Riga by the Germans, recalling that the place had been evacuated five times during the war. Major General Scott, chief of staff, who is member of the Rostoff commission agreed that the capture of Riga would not be an important strategical loss. A German advance upon Petrograd would be followed by removal of the seat of government to Moscow, and the conservative forces whom the allies are counting to maintain a firm republican government and the city looked upon by millions of Russians as the natural capital of their country.

In addition to his statement, Secretary Lansing made public a note he had just sent to Ambassador Bakmeistler, replying to a message of assurance from President Minster Trebenko on August 3, and conveying on behalf of President Wilson a renewed expression of sympathy and confidence for the Russian government. The secretary still declined to give out the department's dispatches from Russia upon which other officials of the government have based less optimistic views concerning the situation there. He explained that the information in question would come from the provisional government if made public at all. Much of the money now placed to Russia's credit, bringing her total loan from the United States to \$275,000,000, probably will be spent immediately for supplies and equipment which must be shipped quickly if they are to arrive before the closing of the northern ports by ice.

Germany Will Starve the World. Washington, Aug. 25.—Two more years of war will reduce the entire world to the same shortage of food as now exists in Germany, according to scientists in that country, who have compiled statistics to support their statement. According to this statement the German government is urging the world to continue the war two years more, declaring that if it is done Germany can not be defeated, because the countries at war with her will not endure the hardships which the Germans are willing to undergo.

Normal Hens Have Time for Molting. It Usually Requires 100 Days to Complete the Molt and Few Eggs Are Laid by Fowls.

(By R. H. WILLIAMS, Professor Animal Husbandry, University of Arizona.) All normal hens have a molting season which comes in the late summer and early fall. It usually requires about 100 days to complete the molt and during this period few eggs are laid. This is a critical period for the hens and they should have special care and attention. Only meal, supplement seeds and a limited amount of corn will supply the oil constituents, while skim milk, meat meal and green alfalfa are especially good to furnish the protein. During this time the hens should be given granulated bone to furnish the ash constituents required in the new feathers. Vigorous hens, properly fed, will molt more rapidly than those lacking vitality, or where they do not receive special attention. It sometimes happens that show birds are made to molt early in the season.

Fight Two-Cent Rate in Kansas. Topeka, Aug. 25.—Petitions appealing from the recent decision of the Kansas State Public Utilities commission to raise the rate on passenger rates were filed in the United States district court here today by nine railroads operating in Kansas.

Texas Wants No More Negro Troops. Austin, Tex., Aug. 25.—A resolute declaration that it had been fully demonstrated that negro soldiers in Texas cities have become a serious menace to the safety and welfare of white citizens and requesting Texas senators and congressmen immediately to confer with President Wilson and Secretary of War Baker with a view to having these negroes removed from the state as introduced in the upper house of the Texas legislature.

RECOGNIZE WOMAN AS EQUAL  
Heads of Industrial Plants Say She Can Do Any Work Consistent With Strength Better Than Men.

Once man pretended to place woman on a pedestal and worship her. Now, according to Donald Wilhelm, who reports "The Confessions of a Munition-Maker" in the Century, he is forced to recognize her as an equal, and respect her. The quotation below states the opinion of a hardheaded factory foreman on the importance of women in the world of labor: "Welch, one can see, isn't emotional. One can trust his judgment of women."

"That is why I was glad he was present in the officers' room of the company eating quarters when the report was made in detail of the strike scheduled to take place the following Monday morning. He made a speech, saying: "Gentlemen, we've all known women on practically all our lives—ever since we were born, practically. Most of us get to thinking that a woman can't do mechanical work because they're always willing to let a man use the hammer, that being something he thinks he can do. But a woman can do it. A woman can do anything that a man can do, and most things better, but men can't do anything near what women can do. Now, maybe you can imagine what women can do in mechanics, and I know what they can do. Leaving out big girls, I say women can do any kind of mechanical work that's consistent with their strength better than men."

His Costly Mistake. "What ruined your business?" "Advertising." "How?" "It let it all be done by my competitors."

A Puzzle. "Ice cream is made from milk, sugar and eggs. It is found to be nourishing." "That may be, but I'm hanged if I see how it can contain heat units."

A delicious, healthful food and a pleasing lesson in economy.

"There's a Reason"

# IN BED FOR WEEKS

Smith Was in a Bad Way, But Doan's Restored Him to the Best of Health.

In April, 1916, Louis Smith, 90 No. St. Hackensack, N. J., said: "Words fail to describe the misery I endured from kidney complaint. In my work I have to do a lot of heavy lifting and this weakness my kidneys. At first I only suffered from a slight backache, but almost before I knew it, I was all bent over like a man a hundred years old. "I began to grow worse as the days passed and finally I had to take to Mr. Smith, my bed, where I remained for weeks. My head pained terribly and my back just throbbled. I was always dizzy and it seemed as if everything was turning. Little black specks came before my eyes and I also suffered from faint and scanty passages of the kidney secretions. Everything seemed dark and dreary. "Doan's Kidney Pills completely cured me and I am enjoying the best of health now."

"Desire to before me" E. M. Johnson, Justice Peace. On March 19, 1917, Mr. Smith added: "I will never forget what Doan's has done for me. Whenever I catch cold on my kidneys, I can depend on Doan's to get me up all right."

# PATENTS

Watson E. Coleman, Patent Lawyer, Washington, D. C. A responsible, highest reference. Best service.

A Sad Memory. Availing herself of her ecclesiastical privileges, the clergyman's wife asked questions which, coming from anybody else, would have been thought impertinent.

"I presume you carry a memento of the kind in that pocket you wear?" she said.

"Yes, ma'am," said the parishioner; "it is a lock of my husband's hair."

"But your husband is still alive," the lady exclaimed.

"Yes, ma'am, but his hair is gone."

# SOAP IS STRONGLY ALKALINE

and constant use will burn out the scalp. Cleanse it gently by shampooing with "La Creole" Hair Dressing, and darken, in the natural way, those ugly, grizzly hairs. Price, \$1.00.—Adv.

# GIRL OF 14 SOLDIER'S WIFE

While Her Husband Fights in France Young Bride Will Go to School in This Country.

A fourteen-year-old schoolgirl became a soldier's wife in Brooklyn recently, thus following the example of her mother, who became the bride of one of Uncle Sam's men in khaki 14 months ago.

Mattie Lee Hudshett of Douglas, Ark., was the latest bride, says the Brooklyn Eagle. The soldier boy who became her husband is David Eugene Henry of Spring, Tex. The bridegroom is only twenty-two, and a member of the Twenty-second Infantry, now situated at Fort Hatteras.

The girl's stepfather went abroad with General Pershing, and is now "somewhere in France." His wife planned to join him and come East. While waiting, she reports, here her daughter met Henry, with whom she became acquainted in Arizona, two years ago.

While the bride's mother is absent in France her daughter will remain here and attend school.

# A Get-Rich-Quick Scheme.

Two young Irishmen in a Canadian regiment were going into the trenches for the first time, and their captain promised them five shillings each for every German they killed.

Pat lay down to rest, while Mick performed the duty of watching. Pat had not lain long when he was awakened by Mick shouting:

"They're comin'! They're comin'!" "Who's comin'?" shouts Pat. "The Germans," replies Mick. "How many are there?" "About fifty thousand."

"Begorra," shouts Pat, jumping up and grabbing his rifle, "our fortune's made!"—London Opinion.

# POST TOASTIES

are bully good for any meal and for all the family

# DOTS AND DASHES

## WIRE NEWS OF THE WEEK

### War News.

The great battle for Lens, on the Western front, continued. The Canadian troops have gained another important German stronghold south of the war ravaged city. Possession of the position is being contested strongly by the Germans, but the Canadians have a firm grip on it and so far all counter attacks have failed.

The Italian drive along the Isonzo river apparently is increasing in intensity. Repeated counter attacks in heavy force by the Austrians have been unable to check the advance of Count Cadorna's armies, which are making steady progress toward Trieste.

There is no cessation of the terrific fighting on the western and Austro-Italian fronts. At points where the Allies are not attacking they are engaged in beating off German efforts to retake lost positions. The Teutonic loss has been found to be a figure perhaps not equaled by any previous fighting in the war.

The Italian drive along the Isonzo river shows no signs of being checked. General Cadorna's great offensive is warring from the Austrians positions that had been considered almost impregnable. The Austrian report says that Trieste has been bombarded by Entente warships.

The Teutonic battle lines are yielding gradually at three points before the continuous hammering of the Allies. The French at Lens, the French at Verdun and the Italians on the Isonzo front are making steady progress and holding all their gains against counter attacks.

Austro-German forces are making vigorous attacks on the southern Rumanian front. The Russian war office announcement says that stubborn resistance is being offered by the Rumanians and Rumanians, who, however, were forced back at several points.

The French have captured the enemy defenses on both sides of the Meuse over a front of more than eleven miles, penetrating the German line at divers points to a depth of a mile and a quarter. More than four thousand unwarmed German prisoners have been taken.

A dispatch from Copenhagen says that, according to reports from Austria, the battle on the Isonzo front in the Italian-Austrian theater is characterized as the most violent ever fought there.

Government control of the coal industry was made almost complete in the United States. Dr. H. A. Garfield, head of Williams College, as food administrator, fixed anthracite prices and set a limit to profits to be made by bituminous wholesalers.

Secretary Tamm has telegraphed to E. J. Wallace, secretary of the St. Louis Coal Club, that President Wilson had authorized him to say that the bituminous coal prices fixed in the President's recent statement became effective at once.

Bituminous coal prices have been fixed by President Wilson for every mine in the United States. The next step in coal control, a White House announcement said, will be to fix the price to be charged by middlemen and retailers. The prices are set on cost of production, estimates furnished by the federal trade commission after months of exhaustive investigation.

At a 2-hour conference with the Federal Trade Commission President Wilson took up the whole subject of war prices and went over in detail the commission's figures on production costs. Most of the time was given to a study of the commission's report just completed on the cost of producing steel.

Officers and men of the National Guard, the comptroller of the treasury ruled recently, are entitled to pay in the federal service at the rate of their service in the guard. A third enlistment man in the guard, for instance, is entitled to third enlistment pay from the government.

A decrease of \$15 million in the world's meat producing animals is shown in a comparison of present with pre-war conditions, issued by the United States food administration.

### Domestic.

Hog prices, which have risen every day since July 21, reached a new high record in Chicago when they advanced to \$19.75 per 100 pounds. On August 1, 1914, hogs sold for \$8.80.

The curbstone general staff should lose no time in submitting plans to President Wilson to win the war in the shortest time.

Every ounce of food that is saved from waste in the household means a valuable economy now and adds the food supply next winter.

Overalls and heavy shirts are being worn in Paris because the coal shortage has closed the laundries. We'll probably be wearing these garments at the opera next season.

# TO CONSERVE IT TO

## Officials of Food Administration Give Advice.

Unusual Facilities for Financing Storage Have Been Arranged and a Comprehensive Plan of Action Is Recommended.

Washington.—Officials of the food administration gave out the following statement concerning the steady of potato prices, especially important just now:

Unusual facilities for financing storage are offered American potato growers as a result of war conditions. The federal reserve system is at their disposal, and farmers who store their 1917 potato crop in approved local warehouses, may obtain, upon their storage receipts, 90-day loans from member banks of the reserve system at a rate not to exceed 7 per cent. Mr. Louis D. Sweet, potato expert with the food administration, was instrumental in bringing this matter to the reserve board's attention.

Northeast growers have started a movement to take advantage of this ruling to help them solve their marketing problem. The prospect which the growers of this group of states face is that of handling 45,000,000 bushels of potatoes—one-sixth of the entire United States crop—without causing an overstocked market and the resulting loss of all profit on the crop.

The growers communicated with local authorities in their respective states, who in turn laid the situation before the food administration. A conference between the growers, local authorities and experts from the food administration was held recently at Boston, Mass. A plan of action was mapped out at this meeting which includes the following:

1. Marketing of only one-third of the crop at harvest time; another third in 90 days, or placing in storage and later distributed as demand affords opportunity; the remaining third to be stored by the grower and marketed throughout the year.

2. All potatoes to be graded with care, taking out culls, cuts, cracks and any that are bruised. It was recommended that a wire screen grader be used—one and seven-eighths-inch mesh for oblong tubers and two-inch mesh for round ones. Graded stock then to be placed in good two-bushel sacks—one hundred and fifteen pounds to the sack—and the sacks sewed tightly so as to prevent shaking and bruising.

3. Increasing the load in each rail-road car from the normal 30,000 pounds, so that these cars can be utilized within 24 to 36 hours of their arrival at destination.

4. That municipalities and other bodies provide storage for as large quantities as possible at the peak of the harvest.

"A storage house," said Louis D. Sweet, who attended this meeting, "such as will conform to the requirements laid down by the Federal Reserve board, does not call for a specially constructed house. There are innumerable buildings, which if properly cleaned, ventilated provided, and managed so as to maintain a temperature of about 35 degrees, will answer admirably for this purpose."

"This year the United States planted its potato crop from the poorest quality of seed that has ever went into the ground, and naturally the harvest will be potatoes of poor quality. Strict grading, careful packing, common-sense storage, and careful shipping are necessary to insure that returns to the growers who have responded to the president's call for increased production of potatoes."

### SHE HAD WAYWARD DAUGHTER

Neighbor Was Surprised When She Found Cause of Severe Rubuke Administered by Mother.

A lady living in a large apartment house relates the following: "I had occasion one day to visit the apartment of a neighbor. Such grave and earnest tones of remonstrance reached my ears, as I approached my friend's room, that I hesitated about intruding. I found her winsome young daughter with her, and the mother had evidently been rebuking her, for the girl's face was flushed, and there were tears in her eyes.

"Come in," said my friend, "I have finished what I was saying to Jenny, and I hope she will remember my wishes."

"Ah, these children—these children, thought I to myself. How wayward they are, even gentle things like Jenny, and how tremendous are a parent's responsibilities!" "I have just been telling her," continued my friend, "that she must not wear her evening gloves when she goes shopping in the morning. In the first place, it is not genteel; and in the second place, it is extravagant."

Her evening gloves! And yet, I assure you, her tone and expression, and the impression made on the child, would have befitted a serious wrongdoing—one that had issues in time and eternity.

### A Dilemma.

"I couldn't get out of marrying her. When she proposed she said: 'Will you marry me? Have you any objection?'" "You see, whether I said 'Yes' or 'No,' she had me."

"Why didn't you just keep silent then?"

"I did and she said, 'Silence gives consent,' and that ended it."

but possessed by few—a beautiful head of hair. If yours is streaked with gray, or is harsh and stiff, you can restore it to its former beauty and lustre by using "La Creole" Hair Dressing. Price \$1.00.—Adv.

Utter indifference. "No wonder she's unhappy. She doesn't know where her husband is half the time."

"A great many wives don't know where their husbands are half the time."

"Perhaps so; but he doesn't even take the trouble to make her think she knows where he is."

### SKIN TORTURES

That Itch, Burn and Scale Quickly Relieved by Cuticura—Trial Free.

It takes about ten minutes to prove that a hot bath with Cuticura Soap followed by gentle applications of Cuticura Ointment will afford relief and point to speedy healing of eczema, itching and irritations. They are ideal for all toilet purposes. Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Once Was Enough. "My wife never puts me up to cut the grass before breakfast." "Is that so?" "Yes; she tried it once, and I was so sleepy that I ran the lawn mower all over her flower beds."

### To Drive Out Malaria

And Build Up The System Take The Old Standard GROVE'S TASTELESS CHILL TONIC. You know what you are taking, as the formula is printed on every label, showing it is Quinine and Iron in a tasteless form. The Quinine drives out malaria, the Iron builds up the system. 60 cents.

What He Heard. Visitor—"Well, you don't know who I am."

Kid—"Oh, yes, I do. You're the man my sds would be a good catch for our Lillian."

THIS IS THE AGE OF YOUTH. You will look no years younger if you darken your ugly, grizzly, gray hairs by using "La Creole" Hair Dressing.—Adv.

No Chance. "Yes, sir; one hour's uninterrupted reading each evening would make you—"

"Uninterrupted! Where do you think my wife spends her evenings?"

# WRIGLEY'S

The goodly that is beneficial to teeth and stomach is best for children.

Wrigley's is

Chas. H. Fletcher

# In Use For Over 30 Years

The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

### Big Words.

Little Girl—The doctor said mamma must take a constitutional every morning. What does that mean?

Little Boy—That means walking.

Little Girl—Then why didn't he say so?

Little Boy—I don't know, but I guess may be if he called it that he couldn't charge for it.

Wash day is smile day if you use Red Cross Ball Blue, American made, therefore the best made. Adv.

### Couldn't Do It.

Short—I say, old man, can you lend me a dollar? "I don't have one." "You bet I do. My wife would break my neck if I did."

### Not a Hard Case.

"Do you love your son-in-law?" "You bet I do. My wife would break my neck if I didn't."

### Doris' Idea.

Doris' father raised chickens, and Doris understood all about setting hens. One day she was taken to see the new litter of puppies. They were curly black balls cuddled down beside a smooth tan mother.

"Are those really Emmy Lou's puppies?" Doris asked.

"Yes, dear," she remarked in a disgusted tone, "she couldn't have sat on her own eggs."

### What Did He Mean?

Mulford—"Your wife used to sing and play a great deal. I have not heard her lately."

Stifford—"Since we have had children she has had no time."

Mulford—"Ah, children are such a blessing!—Everybody's Magazine."

### A GUARANTEED REMEDY FOR
