Generally speaking, the prices of manufactured goods have not climbed any thing like the rises in food prices, out of which about 70 per cent of every dollar is spent.

But more important, there are strong forces working today against the much desired downward readjustment of price level of the future of business men about the future wage level, tax liabilities, cost of materials, and the possibility of another wave of crippling strikes which would further retard

production. Much of this uncertainty could be relieved quickly if the Executive Branch of the government would get behind a sound labor legislative policy to restore real collective bargaining and industrial harmony, tax reduction to free and stimulate investment, and such other actions as are necessary to assure the country that era of

business baiting is over. Industry realizes that prices are too high, and many people are But if they have mass production begin and end in another depres-

Non-operating railroad unions are demanding still another raise of

556 00 00 <u>a year</u>

You would foot the bill!

Look out! There's another big railroad wage demand headed your way!

The non-operating unions alone -whose members do not actually operate trains - are demanding a flat increase of 20 cents an hour. These demands would cost the railroads of the country five hundred sixty-eight million dollars a year!

Last year these employes had an increase of 181/2 cents an hour. This was their third major wage increase since 1939. Their average weekly pay has gone up 75%, as against a cost-of-living rise of 54%.

Since 1939, railroad wage and material costs have gone up more than three times as much as freight rates, and five times as much as passenger fares. That is why in

1946, with the largest peacetime traffic in history, the net income of railroads went down to the equivalent of only 23/4% of the net property investment.

What About 1947?

Even with the recent freight rate increase, preliminary figures indicate that the railroads will make only about the same low return in 1947 as in 1946. This will be because:

-the wage increase made in 1946 will be in effect for ail of 1947;

-special payroll taxes on railroads have recently been increased; -and passenger traffichas declined.

Where Would the Money Come From?

We can't pay out what we don't take in. And we are not taking in enough now to meet present costs and to complete the improvements in service that you need and that we want to

You Would Foot the Bill!

105 WEST ADAMS STREET : CHICAGO 3, ILLINOIS We are publishing this and other advertisements to talk with you at first hand about matters which are important to everybody.

A masterpiece of oratory was the eulogy by James G. Blaine on the martyred President, James A.

Great in life, he was surprisingly great in death. For no cause, in the very frenzy of wantoness and wickedness, by the red hand of murder, he was thrust from the full tide of this world's interest, from its hopes, its aspirations, its victories, into the visable presence of death-and he did not quail. Not alone for one short moment in which, stunned and dazed, he could give up life, hardly aware of its relinquishment, but through days of deadly languor, through weeks of agony that were not less agony because silently borne, with clear sight and calm courage he looked into his open grave.

What blight and ruin met his anguished eyes, whose lips may tell-what brilliant, broken plans, whole life lay in his; the little boys not yet emerged from childhood's day of frolic; the fair fold voices. young daughter; the sturdy sons | With a wan, fevered face tenderly just springing into closese com- lifted to the cooling breeze, he panionship, claiming every day and looked wistfully upon the ocean's love and care; and in his heart on its restless waves, evening, archthe eager, rejoicing power to meet low on the horizon; on the serene all demands.
