The Fourth War Loan has been oversubscribed by \$1,884,000,000 and not all in yet.

There is not a nation under the sun that is ahead of the United States when it comes to getting the job done. Our people are interested in the welfare of our country and are generous, alert, and full of energy and have never yet quit before the job was done.

We are not quitters and neither are we complacent and indifferent once we understand what is necessary to be done to put anything worthy over the top.

Mrs. Mahatma Gandhi, wife of the well-known Indian leader, died recently at the age of seventy-four years.

She and her famous husband had been married since they were each thirteen years old. Mrs. Gandhi was a woman of quiet demeanor and never sought publicity, but rather kept herself confined more to the background, encouraging her husband in his work quietly and unobtrusively.

She had been suffering for months from intermittent heart attacks.

Mrs. Gandhi died quietly, as she had lived, at the Aga Khan's palace at Poona, India where she had been confined with her husband since his arrest last August 9 for advocating Indian independence.

A new Cancer Research hospital has been recently opened and dedicated at Houston, Texas. It was founded to unravel the mystery of the cause, prevention and cure of cancer—a most worthy cause.

The new building, known as the M. D. Anderson Hospital cost approximately \$1,000,000.

The dedication ceremonies were attended by Governor Coke Stevenson, well known medical authorities from different parts all over the country, and the University of Texas officials.

A legislative appropriation of \$500,000 was matched by a like amount from the Anderson Foundation, the largest trust fund for charitable purposes in Texas, made the hospital possible.

Clinical and hospital treatment of patients is scheduled to begin within the next few weeks.

The following correction appeared in a certain town newspaper:—"Our paper carried the notice last week that Mr. John Doe is a defective in the police force. This was a typographical error. Mr. Doe is really a defective in the police force."

It is reported that seventy-one divorce suits were filed in Dallas in one day recently. The first one was filed four minutes after the District Clerk's office opened for work at 8 a. m. and filing continued at the rate of about ten an hour before noon. Just about the time employees thought they had done a good day's work others would come in and so it continued all through the day.

The seventy-one cases in one day was said to have been the largest in the history of the county and the reasons for the heavy run was that general wartime factors are causing a wave of divorces, and the fact that the day was a holiday.

### CALLAHAN COUNTY GRAND JURY RETURNED EIGHT INDICTMENTS

comes the news that this state alone could supply the entire nation with all the salt it needs for the next one million years.

This conclusion was reached after a survey of hundreds of deep well drillings in the lower peninsular of the state by the University of Michigan's geology department.

This is indeed good news, and being one staple which is plentiful, hope is held that probably it will never be rationed.

### W. A. Petterson Announces for Callahan Sheriff

TO THE PEOPLE OF CALLAHAN COUNTY:

After much consideration I have decided to offer myself as a candidate for Sheriff of Callahan county, subject to the action of the Democratic primaries.

In asking for an office of such responsibility I feel that you are entitled to know something of my record as a citizen and a peace officer.

I was born in Callahan county 56 years ago and with the exception of six years have spent my entire life here. I feel that I know the people, understand what they expect of a Sheriff, and believe that I am capable of meeting their expectations. I have served 22 years as a Peace Officer, six years as Deputy Sheriff in Parker County, 13 years as a Deputy Sheriff in Callahan County, and three years as Chief of Police at Cross Plains. During this span of time I have found it advantageous to familiarize myself with the law as it concerns the problems with which a peace officer is usually confronted. Too, I believe that my years of experience qualify me to serve you in a manner acceptable to all.

I wish here and now to again express my gratitude to all who supported me in my campaign for Sheriff six years ago, and to those who did not. I wish to say again that I hold no unfriendliness toward you at all. I will appreciate it, however, if you will weigh my qualifications and study my record carefully before casting your ballot in the forthcoming election.

If elected I will devote my full time to the job. The law will be enforced to the very best of my ability, and it will be my policy to conserve funds wherever possible so long as it is consistent with good government and the maintenance of law and order.

The rationing of tires and gasoline, together with the necessity of carrying on the duties of my present job will prevent my making as extensive a campaign as I would like, however, our government has asked that candidates curb their driving to the very minimum, and in this request I will comply to the letter.

Thanking each and every one of you for the kindnesses accorded me in the past and hoping to have the privilege of seeing and talking with you during the coming months, I am,

Sincerely yours, W. A. PETERSON.

Miss Ruth Mobley has been called to Gorman where she is a special nurse in some case.

**How to take care of your Gas Range**

1. Do not put wet dishes directly on the enamel. (This enamel is glass.) Protect top with asbestos mats.
2. Wipe off spilled foods at once, with dry cloth. Later when range is cool, clean with damp cloth.
3. To clean top burners of aluminum or enamel, use mild soapsuds; rinse and dry. (Do not boil in soda solution.)
4. To clean broiler grill, let cool before washing with soapsuds; use fine steel wool. (Remove grill and pan from the range as soon as food is taken off.)
5. The oven-lining will last longer if you roast meats at low temperatures (250° to 325°). It makes better-tasting meat besides, and also cuts down grease-spatter on oven-walls.
6. To clean up spill-overs on oven-floor, let cool, and then use a fine steel wool.
7. Don't load the oven-door with heavy roasts as you put them in or take them out. It might warp the door.

Whenever possible, use only a moderate heat for broiling, and you will find the broiler easier to clean. (Many foods broil well with a moderate heat.)
