

From The Editor's Window

Senator O'Daniel now has two opponents in the race for a seat in the United States senate and the forthcoming campaign this summer promises to be one of great interest.

Both ex-Governors James V. Allred and Dan Moody announced within a few hours of each other the past week. All three candidates are ex-Governors of the state and all three are said to be good campaigners.

Doss Hardin, former State Senator, also announced his candidacy the past week for lieutenant governor of Texas.

A young German officer, Hans Peter Krug, was captured in San Antonio the last week after his escape from a Canadian concentration camp and after a sixteen day nationwide hunt throughout this country.

Jack Wrather, Jr., wealthy young oil man and husband of the former Molly O'Daniel, has volunteered for service in the United States Army as a private.

"Are you an expert accountant?" asked the prospective employer. "Yes, sir," said the applicant.

"Well, my wife kept a household account for 10 days. One night I sat down after dinner and in less time than an hour I found out how much we owed our grocer."

"Are you saving any money since starting on the budget system?" "Sure we are. After we have balanced it every evening it is too late to go anywhere."

A cop, watching a tipsy celebrant rapping on a lamp-post with his cane, suggested that there was no one at home.

It has been reported that "an amazing number of checks" from individuals, plant management, workers, and different organizations all over the country have been received as gifts from the people to the government to help win the war.

Mr. Early said the checks are outright gifts from the people and have been turned over to the treasury. Some officials and others who accused the people of indifference and lethargy concerning the prosecution of the war surely see they were wrong by this time.

The State Board of Education has recently voted to purchase \$10,000,000 federal government bonds for the State's permanent public school fund.

"Texas dried egg plant are producing one-fourth of all dried eggs sent to the Allies under the lend-lease bill," said Dr. Edward W. Gauditz, associate administrator of the AMA.

Clyde Garrett Not To Enter Race For Congress In 1942

Clyde Garrett, former representative from the 17th congressional district who was back in the district a few years ago, returned to Washington to announce he would not be a candidate for congress this year.

News Makes Error Last Week On The School Fund Item

Mrs. Will McCoy, County Treasurer was in Putnam, Friday afternoon and called at the News office while here. She informed the News that we were in error last week, when we stated in a news article that \$3,500 of the permanent school fund had been used for road and bridge purposes.

Three Dollars To Be Paid Schools On 1942 Appropriation

State Superintendent Woods announced another payment of three dollars on the \$22.50 Apportionment made by the Board of Education for the school years 1942-43 terms.

AUSTIN FLINT WILL BE NEW MANAGER AT J. C. PENNEY'S STORE

A. G. Tuttle, who has been manager of the J. C. Penney Co. store at Cisco, for the past several years has been transferred to Kerrville, where he will manage one of the J. C. Penney stores there.

172,324 PENSION CHECKS TO BE MAILED OUT DURING MAY

The Department of Public Welfare announced Thursday 172,324 checks would go out to pensioners this month, totaling \$3,374,649 and averaging \$19.58.

The number of blind persons to receive aid increased from 2816 in April to 2999. Average checks went for \$22.80 totaling \$68,061.

Mr. and Mrs. H. Culwell were in Cisco, Saturday, to see Dr. Lee Culwell who has been ill.

The Baccalaureate Sermon At School Auditorium on Sunday -- Jewel Daughtey

Sunday, May 17, 1942 at 11:00 in the high school auditorium the Senior Class will be honored with the Baccalaureate Sermon. The sermon will be delivered by Dr. Jewel Daughtey of Howard Payne College, in Brownwood.

W. M. Crosby Laid To Rest In Cisco Monday Afternoon

Walter Milton Crosby, prominent oil man of Putnam, died late Sunday afternoon at his home here after several months illness.

The son of the late W.T. and Florence Crosby, was born in Mississippi on February 28th, 1881, and moved to Texas, with his parents when a small boy.

Mr. Crosby had lived in Putnam, many years and was always interested in the upbuilding of the town and community in which he lived.

Several Hundred Attend Homecoming Saturday, May 9th

Saturday morning at eleven o'clock the annual homecoming of Putnam High School convened.

EUJA DEMONSTRATION CLUB MEETS IN EUJA LUNCH ROOM MAY 6TH

The Euja Home Demonstration Club met in the Euja Lunch Room May 6th, 1942, for a program led by Mrs. A. G. Barnes.

THE METHODIST CHURCH Milton Slayden, pastor

The second quarterly conference will be held Sunday night at 8:30 o'clock. The district superintendent, Rev. Roy A. Langston will preach. Everyone is invited and all members of the church are expected to be present.

Mr. and Mrs. John Montgomery of Jayton spent a few days visiting with Mr. and Mrs. G. P. Gaskins, this week.

Recital Presented By Mrs. W. O. Wylie, Jr., Well Received

The piano recital Wednesday evening at the High School Auditorium, presenting Anna Lou Williams, daughter of Mr. and Mrs. L. L. Williams, was well carried out and beautifully rendered.

Miss Williams is one of Putnam's most talented young women and her program showed careful training and ease and perfect performance.

She is one of Putnam's own, having been born and reared here. Miss Williams was assisted by Miss Inadell Mitchell of Baird, vocalist, Miss Mitchell sang "Marie" and the "Last Chord" and received much applause.

J. M. Price Buried In Dothan Cemetery Monday, May 12th

J. M. Price, age 75, died in the County Hospital Monday morning, May 11th, after an illness of several weeks.

Mr. Price was born March 15th, 1870, in Tarrant County, Texas. He was married to Miss Fannie Mitchell, at Cameron, Texas, April 12th, 1898.

On December 8, 1932 Mr. Price was married to Mrs. Minnie Glover, who survives, together with the following children: Mrs. Precilla Yates of Abilene; Mr. Eddie Nobles, Eastland; Mrs. Maggie Hogan, Cisco; Mrs. Oma Dorsey, Baird; Mrs. Billie Hock, Cisco; Mr. one; Mrs. Minnie Fannell, Abilene; Jessie, Walter, and Emmett all of Putnam. Besides 22 grand-children.

Funeral services were held at the Baptist Church in Putnam Tuesday afternoon with the Rev. A. A. Davis, pastor of the First Baptist church of Baird, conducting the services. Mr. Price was a member of the Baptist church several years prior to his death.

Scrap Metal Plea Grows As Nation's Needs Increasing

Another plea to farmers, who have already provided the government with thousands of tons of metal, for that "last ounce" of scrap material has been issued.

It is estimated that there are more than three million tons of badly needed material still on the farms in the United States and "Uncle Sam" wants that by June first.

The night session was made up of the homecoming coronation, followed by a square dance. Under the direction of Mrs. Joe Webb, the evening program carried a patriotic theme throughout. The stage was decorated in red, white and blue and the throne was arched by silver stars, before an audience of 500.

Prof. Chas. V. Froh and four of his students, from John Tarleton College, will present an unusual program over Radio station KGKO Sunday afternoon, May 17, at 3 o'clock. Bobby Clinton will have a part in this program. Don't forget the time and tune in and hear it.

Mr. and Mrs. E. E. Sanders of Electra were passing through Putnam Wednesday enroute home from Baird, where they had been visiting their daughter, Mrs. Bruce Brown.

Mr. and Mrs. E. E. Sanders of Electra were passing through Putnam Wednesday enroute home from Baird, where they had been visiting their daughter, Mrs. Bruce Brown.

Mr. and Mrs. E. E. Sanders of Electra were passing through Putnam Wednesday enroute home from Baird, where they had been visiting their daughter, Mrs. Bruce Brown.

USO LEADERS TO MEET IN BANQUET FRIDAY AT BAIRD CAFE

Earl Johnson, Callahan county chairman of the USO drive, was in Putnam Friday and set up a local organization to assist in the raising of this precinct's share of the county quota of \$750.

Mr. Johnson notified all members of the county set up Tuesday morning that a luncheon will be held in Baird Friday at noon, attended by Jake Sandefer, of Breckenridge, district chairman, and USO officials to stress upon the Callahan county group the need for fast, efficient work.

The object of the USO is to build and maintain the fighting spirit among the men in uniform by showing them how much their friends back home appreciate what they are doing.

Weil Control In Cotton Feasible In Summer Months

In Chambers County Alabama an extensive program was put on to control the boll weevil. As a result, approximately 70 percent of all cotton was dusted to some extent.

In an effort to compare results, to determine the effectiveness of proper use of calcium arsenate dust, records were secured from 28 farms, of these 5 were demonstration farms and six applied no poison.

The six demonstration farms; 7-1 applications were used and the yield was 333 lbs., cost of poison was \$2.45, increased yield was 252 lbs. with increased income of \$51.58.

When to begin poison: When 10 to 15 squares out of 100 on small cotton or 25 squares out of 100 on row cotton begin dusting, using 5 to 7 lbs. of arsenate per acre every 4 or 5 days until weevils are brought under control.

For flea hoppers: If young cotton is not squaring freely, examine the tips of the plants for flea hoppers. When 20 flea hoppers are found on the terminal buds of 100 plants begin poisoning. Alabama is very wet in the cotton growing season and makes it difficult to control the weevil, much more than it is in Texas.

May 15 Last Day For Bait Orders To Wipe-Out Rats

The closing date for ordering rat bait for the county wide rat drive is May 15 and no more orders will be taken after that date.

It is essential that the drive be a united drive of as many farmers in the county as possible because of the migratory habits of the rat. When food becomes scarce rats will travel from one farm to another in the search of food.

The destructiveness of the rats is a serious enemy to our "Food for Victory" program. Products stored in darkened rooms and barns are extremely subject to the ravishes of the rat. Small grains, corn, fruits, and vegetables are all attractive to the gnawing habits of this pest.

Oliver F. Culwell Aviation Cadet In California Field

Air Force Replacement Training Center Public Relations Office, Santa Ana, California, "Taking the first step towards winning his wings as a pilot, Navigator, or bombardier, Oliver F. Culwell, 21, son of Mr. and Mrs. O. W. Culwell of 127 1/2 N. Knechtel St., Stillwater, Oklahoma, has become an aviation cadet at the Air Force Replacement Training Center, according to army officials.

Also included in the Aviation Cadet program are "Refresher" courses in subjects that Culwell will encounter as he "wings" his way toward a 2nd Lieutenant's commission.

7.98 Inches Rain To Saturday Night Against 11.41--41

The rain Thursday night of 62 of an inch makes the total rain for the season to date 7.98 of an inch as compared with 11.41 inches in 1941. With a total for the year, 1941 of 31.75 inches. This report brings the total up to and including Saturday, May 9th.

Many farmers are complaining of too much rain as the time for planting feed is here and none planted, besides it will be the middle of next week before they can get in the fields if it doesn't rain any more.

The object of the USO is to build and maintain the fighting spirit among the men in uniform by showing them how much their friends back home appreciate what they are doing.

County Given \$150 Quota In Berkeley Red Cross Service

An additional all-out war effort on the part of the Red Cross, ten counties adjacent to Camp Berkeley were asked to become members of Camp Berkeley Red Cross Service Council.

The first meeting of the Council, attended by representatives from Callahan County, was held in the Red Cross Recreation Building of the Station Hospital, May 6.

Cemetery Meeting At Funeral Home Tues. Night May 19

A public meeting has been called of all the people of the town of Putnam, to meet at the Wylie Funeral Home in Putnam, Tuesday, May 19, for the purpose of organizing some kind of an organization that will take care of the cemetery.

When to begin poison: When 10 to 15 squares out of 100 on small cotton or 25 squares out of 100 on row cotton begin dusting, using 5 to 7 lbs. of arsenate per acre every 4 or 5 days until weevils are brought under control.

The Putnam News PUBLISHED EVERY FRIDAY J. S. YEAGER

EDITOR AND MANAGER Subscription Price: \$1.00 Per Year. Entered as second class matter August 29, 1934, at the post office at Putnam, Texas.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation that may appear in the columns of The Putnam News will be gladly and fully corrected upon being brought to the attention of the editor.

Cards of Thanks, Resolutions of Respect, and any kind of entertainments where admission fee or other monetary consideration is charged, will be charged for at regular advertising rates.

Mind Your Manners

Test your knowledge of correct social usage by answering the following questions, then checking against the authoritative answers below:

- 1. Should a husband lift his hat when he takes leave of his wife on the street? 2. Should a husband refer to his wife as "the missus," "the wife," or "my woman"? 3. Should a husband and wife disagree in front of other people? 4. If a husband and wife are arguing, should a third person take sides with either? 5. Should a husband show his wife the same courtesies he shows other women?

What would you do if— You send a wedding gift to the daughter of friends of you and your husband—

(a) Enclose a card on which both your name and your husband's name are engraved—or write both your name on a card?

(b) Enclose your card and do not add your husband's name?

- Answers: 1. Yes. 2. No. 3. Not unless they can do so without sounding quarrelsome. 4. No, Yes, and more. Better "What Would You Do" solution—(a).

Be A Book Buddy

THE LONGEST LIVED ANIMAL

It has been thought that the elephant holds the record, since his average life is between 125 and 150 years. In the London Zoo, it has been reported, there were some geese from 90 to 100 years old, which is exceeded by a number of humans. However, all these seem to be over-shadowed by a species of turtle which naturalists believe to have reached an age of as much as 250 years.

NEW ORLEANS — Tillie, a one-year-old chacma baboon sold to the Audubon zoo by a seaman, has adopted a white rat. The motherly baboon typically holds the rat against her in a gentle embrace with one arm, and the rat, though small enough to get through the bars, makes no effort to escape.

CORK OAK TEST PLANTING

Cork oak acorns and seedlings are being planted by scientists of Texas A. & M. College as part of a long-range program to test suitability of Texas soils to this foreign tree whose shortage is causing concern in parts of the government's program.

Foreclosed farms and other real estate for sale, small down payments and easy terms on balance with cheap rate of interest.

See M. H. PERKINS, Secy-Treas. Clyde, Texas, for full particulars Supplemental Second Lien Land Bank Commissioner Loans—5 per cent interest.

Home Making Hints

Kraut From Surplus Cabbage

Cabbage is cheap and plentiful. This is an ideal time to make sauerkraut. First of all, there's plenty of cabbage available. Second, cabbage can be bought almost anywhere in Texas for from one to two cents per pound. And then, too, the weather is about right. Temperature around 80 degrees Fahrenheit is just right for curing sauerkraut, research workers have found.

Caution! Much cabbage on the market lately has been found deficient in moisture which necessitates some changes in the making and storing of kraut. General directions can be found in the Texas Extension Service leaflet, Starring Kraut, C-149, but homemakers will encounter difficulties unless they alter somewhat the regular procedure when cabbage is too dry.

Sauerkraut is made from shredded cabbage fermented in its own brine, and there must be a sufficient quantity of brine to cover the cabbage at all times during the curing process. This year some homemakers have discovered that their cabbage does not contain enough water to cover the kraut on the second day of the curing process.

If the liquid doesn't cover the kraut, cooled boiled water should be added until it rises above the top of the weight which holds the shredded cabbage down in the brine. If it is necessary to add more liquid later, a five percent brine should be made. This five percent brine is made by adding four level tablespoons of salt to a quart of cooled boiled water. The quality of the kraut will be improved if soft water is used.

Save containers this way: It's so important this year to save containers, that kraut should be stored in the containers in which it was made. After the kraut is completely cured (usually 10 days to three weeks are required), the dark, discolored kraut on the surface of the container should be removed. Clean paraffin should be then melted and poured in a thin layer over the top of the kraut.

Replanting the Backyard Garden

Now is the time: The time has come for backyard gardeners to replant short-lived vegetables for the second time, and make the first planting of hot weather vegetables. Leaf lettuce, tendergreen mustard, bush beans and radishes mature rapidly and must be replanted to obtain a continuous supply of young tender vegetables of best quality. If not already planted, squash, cucumber, okra, eggplant, butterbeans, pepper and blackeyed or cream peas should be planted now for summer time production.

Plant hot weather vegetables: With warmer soil and passing of frost hazard, vegetables which have a long period of production in spite of hot weather may be planted. Green peppers will produce all summer. Six to 12 plants of the California Wonder variety, a smooth, thick-walled, deep green pepper, will supply the average family's needs. Bush or pole butterbeans may be planted now. Henderson's Bush and Fordhook are small, white, tender beans which mature quickly. Florida Speckled is a pole variety which can be planted on the garden fence and produces a heavy crop or brown mottled beans. This variety will produce all summer with proper moisture.

The Florida Highbush variety of eggplant is of excellent quality and resistant to certain diseases which damage other varieties. A dozen plants is sufficient if planted in deep soil which retains rainfall, or where moisture can be supplied.

Cream or blackeyed peas should follow harvesting of English peas, Irish potatoes, cabbage and other vegetables.

A good gardener does not allow idle space in his garden. In this Victory program, let's keep 'em growin'.

Ration

These recipes and suggestions are given to help homemakers to capitalize on the natural sugars in fruits and other foods and to help spread their sugar ration. Sugar thrift rules to remember are: Serve cooked fruits hot to enjoy their fullest flavor and sweetness. Save sugar syrup from canned fruit to sweeten other fruit, puddings, sauces, or beverages. A pinch of salt increases the sweetening power in cooked food. Be sure all sugar is completely to get its full sweetness. The following table gives the sweetening power of different syrups, of honey, and of maple sugar, as compared with refined white sugar:

- Amount required to equal in sweetness one cup of refined white sugar: 1 cup maple sugar, 1 cup maple syrup, 1 cup honey, 1 1/2 cups sorghum syrup, 1 1/2 cups cane syrup, 2 cups corn syrup. Rules to follow in shifting recipes from refined white sugar to other sweeteners are: For cakes and cookies: In using honey instead of sugar cup for cup, but use one-half the quantity of other liquid called for. This is if the original recipe called

for 1 cup sugar and 1 cup milk. Use one cup and 1/2 cup milk. Other ingredients remain the same.

For corn, cane or maple syrup, replace sugar with syrup, measure for measure and reduce liquid one-third. Cookies made with corn and cane syrup are not as sweet as sugar cookies.

In using sorghum syrup, follow the same rules as with other syrups, but reduce the baking powder called for in the original recipe. Use 1/2 teaspoon of soda for every cup of sorghum. This quantity of soda and sorghum has leavening power equal to 2 teaspoons of baking powder.

LENGTH OF WOMEN'S SKIRTS ARE FROZEN

Women's skirts won't be going up or down during this war. They're to be "stabilized" at present lengths to save cloth and prevent existing wardrobes from becoming obsolete.

The War Production Board moved into a field today where no husband would dare tread—women's fashions—and issued an order designed to eliminate frills and frumpiness from present dress styles and halt radical fashion changes in future women's clothes.

The order is expected to save millions of yards of cloth annually and make possible production of at least 15 per cent more garments out of the same yardage of cloth.

Here are some of the major things that won't appear in the future on sleeves, balloon and leg-of-mutton sleeves, patch pockets of wool, swirly, pleated skirts of great circumference; long, full laytime skirts and sleeves; wide belts. Also eliminated will be suit and coat ensembles of more than two pieces at one unit price.

The order will not affect clothes for this spring and summer, most of which are already made. The restrictions on woolen garments become effective tomorrow in time to apply to next fall, and winter clothes. Restrictions on cotton, rayon and other materials become effective June 19, when this summer's clothes will be completed. Restrictions on retailers' stocks go into effect August 1.

There were some fields of the feminine wardrobe that even the WPB did not (dare) enter—hats, for example and lingerie. Neither does the order apply to infants' and toddler apparel (sizes from one to four), bridal gowns, maternity dresses, clothing for persons of abnormal size, burial gowns, or robes and vestments as required by the rules of religious orders or sects.

Here's how the new fashion order affects the principal garments of a woman's wardrobe:

Coats: No cuffs; no wool evening wraps; no wool linings; no sleeves cut on the bias; no belt wider than two inches; no wool cloth lining under for trimming; no hem more than two inches.

Maximum lengths—for size 16 with others in proportion—42 inches for box coat; 43 inches for fitted coat.

Maximum sweeps—for size 16—60 inches for box coat; 70 inches for fitted coat.

Dresses: No sleeves wider than 14 inches for size 16; no hoods, shawls, capes, scarfs, petticoats, overskirts, or aprons made with dress; no belt or hem more than 2 inches wide.

Maximum lengths—for size 16—43 inches.

Maximum sweeps—for size 16—78 inches for rayon and cotton, 75 inches for wool of less than nine ounces, and 84 inches for wool over nine ounces.

Evening Dresses: No overskirts or aprons; no wool evening dresses; no hood; no belt or sash more than two inches wide, no slips with dresses of non-transparent materials.

Maximum length—for size 16—50 inches.

Maximum sweep—for all sizes—144 inches.

Suits, Jackets and Skirts: Skirts—no matching or contrasting belts; no wool lining; no hems exceeding two inches.

BAYOU YOUTH WINS RURAL PENTATHLON

Leonard Swafford, Bayou high school athlete who will attend Cross Plains schools next year, emerged champion of the rural school pentathlon in the Texas University Interscholastic League Track and Field meet in Austin Saturday. The versatile Bayou youth was high scorer among the many rural school boys entered. He is the son of Mr. and Mrs. John Swafford. Leonard, Dobbert Mack Sawyer and another Bayou school athlete will enroll in Cross Plains schools this fall and compete in basketball, track and possibly football.

4-H CLUB BOYS ARE DOING GREAT WORK

Texas 4-H Club boys have collected and moved into the channels of the nation's armament program 1,566 tons of scrap iron.

Collections of other scarce materials include 50,875 pounds of aluminum and 114,084 pounds of waste paper.

On the Food for Victory front, the club boys have 48,070 hens in production with 664,057 baby chicks coming along.

They have on feed 9,145 hogs, 3,677 beef calves and 3,472 lambs. This information is contained in a preliminary report issued by L. L. Johnson, state boys' club agent of the Texas A. and M. College Extension Service, on the basis of returns from county agricultural agent in 113 out of 254 Texas counties.

Johnson said he expected these totals to be doubled when all counties are heard from.

Enrollment reports from 184 counties show 25,243 members in boys' 4-H Clubs. The state goal for 1942 is 43,200.

COTTONWOOD

Mr. and Mrs. Leo Thompson and family of Bangs visited home-folks Sunday.

Mr. and Mrs. F. W. Respass and Daxel, of Cross Plains spent Sunday with Mrs. M. E. Respass.

Stanley Coppinger of Big Lake is visiting home folks.

Mrs. Gladys Mitchell and Betty visited in Baird the first of the week.

Mr. and Mrs. Lawton Cox of Grand Falls visited with her mother, Mrs. W. B. Shirley last week.

Mr. and Mrs. H. S. Varner had as their guests the week end, Mrs. Joe Arvin and daughter, Jo Ruth of Baird, Mrs. Frank Sullivan and Lieut. and Mrs. Durward Varner of San Antonio.

Mr. and Mrs. Buford Tysor and family of Baird visited with her mother, Mrs. Pearl Hylee Sunday.

Sgt. Oliver Davis of San Antonio spent Friday night with his sister, Mr. and Mrs. Norman Coffey.

Donald Strahan of San Diego, California spent last week with home folks.

Mr. and Mrs. D. Moore of Breckenridge spent Sunday with his parents, Mr. and Mrs. S. A. Moore.

Miss Dorothy Ramey of Hendrick Memorial Hospital spent Sunday with her parents, Mr. and Mrs. J. R. Ramey.

Mrs. Chester Woody visited home folks last week.

Mr. and Mrs. J. S. Gafford attended services at Primitive Baptist church at Atwell Sunday.

Willie Welden of Camp Bowie spent the week end with home folks.

Mr. and Mrs. Norman Coffey spent Sunday with her parents, Mr. and Mrs. Davis of Putnam.

Mrs. N. G. Borden visited with Mrs. LeRoy Butler of Cross Plains the first of this week.

Eunice Hembree spent Mother's Day with her sister, Mrs. W. P. Ledbetter of Scranton.

NEW! "BACTERIOSTATIC" FEMININE HYGIENE

now finding great favor among women...

Many doctors recommend regular use of douches as a precautionary measure for women who want to be clean, dainty, for women troubled by offending odor or discharge. Some products may be harmful to delicate tissues. But not Lydia E. Pinkham's Sanative Wash! Pinkham's Sanative Wash is gaining great favor among women because it's NOT a harmful germicide. Instead—it's a mighty effective "bacteriostatic" (the modern trend). It not only discourages bacterial growth and infection but thoroughly cleanses and deodorizes. Very soothing—relieves minor irritations and discharges and has a tonic effect on delicate membranes. Inexpensive! Get your bottle of Lydia Pinkham's Sanative Wash today. All drugists.

Trio Held After Robberies In 3 Nearby Counties

Three men were arrested in Brownwood last week and are being held on charges of theft in Callahan, Coleman and Menard counties. The three are J. W. Benson, who gave his home address at Rising Star; and Vernon and L. D. Williams, whose home addresses were listed as Breckenridge.

According to officers one of the trio has confessed to theft of an automobile tire and articles of clothing from the automobile of L. W. Westerman in Cross Plains and to quantities of wool and mohair in Coleman and Menard counties.

They were being held in Brown county jail and will be bound over to the next grand jury.

Here's the New Amazing COUGH MIXTURE From Canada

Druggists Report Big Demand
Buckley's CANADIOL Mixture is different—more effective—faster in action than anything you've ever used. Get a bottle today. Take a couple of doses. Instantly you feel its powerful effective action spread thru throat, head and bronchial tubes. Tickling—coughing ceases—phlegm is loosened and raised—clogged bronchial tubes open up, air passages cleared. All druggists. Satisfaction or money refunded.

District Manager Of WTU Handle Job War Vacated

The drain of manpower from the West Texas Utilities Company into the nation's armed forces Saturday, was reflected in the promotion of T. J. McCarty, Cisco district manager, to succeed H. D. Austin as district manager of District A, with headquarters in Abilene.

At the same time, McCarty will retain management of the company's District B headquarters in Cisco.

The change was necessitated by entrance of Austin, a major in the inactive reserves, into the army. He reported for active duty at Camp Joseph T. Robinson, Ark., Monday.

McCarty, recently appointed to fill the vacancy created by the death of the late H. H. Monk, will operate the two districts as one, maintaining his duties and connections at Cisco. Announcement of McCarty's promotion was made by P. Price Campbell, president of the company.

"The company," Campbell said, "already has given approximately eighty men and so far has not asked for the deferment of any, although production of electric power has been classed as a defense industry. Some of these men already are in foreign service and are giving a great account of themselves. It behooves those of us left here to take on extra duty and fill the gaps while they are away."

"Our problem," he added, "is to do whatever is possible to help win the war and yet it now appears that this cannot be done on the government's basis of forty hours per week. The men who have left us are not fighting the war on any forty-hour week, but are giving full time to the job. Many of us left here are going to have to take on extra duties and put in extra hours to provide ample electric service vital to industry at a time when production is absolutely essential."

A MESSAGE FROM THE SECRETARY OF THE TREASURY

THE SECRETARY OF THE TREASURY
WASHINGTON
May 3, 1942

TO THE PEOPLE OF TEXAS:

This week a new campaign for the sale of War Bonds and Savings Stamps is under way throughout the Nation. It is the War Bond Quota Campaign.

It is urgently necessary that you double the rate at which you are now buying War Bonds and Stamps. This will mean the sale direct to individual Americans of War Bonds and Stamps to the amount of not less than one billion dollars every month.

One billion dollars a month is the national quota. It is equal to one-tenth the combined income of all Americans.

This money is needed to buy the tools of war for your fighting forces. It will not pay for all of them. Our war expenditures are at the rate of about FOUR BILLION a month, and they are growing daily. But a billion dollars a month direct from the people will make all-out production possible. Without it we cannot do our best without it we cannot get forth our full effort.

It is desperately needed for another reason. We can't fight a war and at the same time live and spend as usual. There are not enough goods to go around — the things we buy with money. If we go on spending at the 1941 scale, we'll be robbing the fighting men to add to our own comfort or pleasure. We'll be driving up the cost of living for all of us. We'll be issuing dire handbills on our neighbors.

What is asked of you is ten per cent of your earnings — a little for liberty. It is not a tax; it is not even a contribution; it is a loan at interest, for your use and protection later.

Your Government asks you to cut down your expenditures, TO SAVE — your boys on the firing line and in the training camps, through your Government, ask you to save so that they may have what they need to win THIS WAR for you — America asks you to save; to SAVE TO WIN THE WAR; to buy War Bonds and Stamps up to not less than ten per cent of your income.

Is liberty worth it? Is Democracy worth it? Is America worth it? I think I know your answer.

Sincerely,
A. Morgenthau, Jr.

The above letter was sent to this newspaper by Secretary Morgenthau in Washington. We publish it in the interest of the War Bond Quota Campaign and earnestly recommend that all our readers do their share in the tremendous job ahead of financing the War effort.

CLOTHING STYLES NOT EXPECTED TILL FALL

Here are the facts on what the recent WPB ruling on men's clothing means.

There have been a lot of stories making the rounds lately about how "strange men are going to look in the new 'Victory Models.'" About men wearing suits with no lapels, suits with extremely short coats, etc.

This order only affect clothing manufactured after March 30. But all clothing, except that which is tailor-made, is manufactured several months in advance, hence there will be no immediate changes of importance in the styling of men's clothing.

Actually, the only thing that will happen to clothing one buys after March 30, is that the trousers won't be styled with cuffs. Certainly a change like this won't cause any hardship on any body. After all, dress clothes never have had cuffs, and cuffless trousers for regular suits have often been accepted style in the past.

Too, coats will be only half an inch shorter, and double-breasted suits can be vestless, which are among the changes for clothing made after March 30. But such clothing won't be available here until early next fall. Two-trousers suits and trousers with pleats still will be available for several months, if they're manufactured before March 30.

HELPFUL WAYS OF PREPARING DRIED BEANS DISCUSSED

Because of tin shortages, there won't be any more canned pork and beans or baked beans when the present supply is gone.

This curtailment shouldn't bother homemakers, because there are plenty of dried beans available. These keep well and taste good if they are prepared right.

The following suggestions are offered on preparation of dried beans. The first rule of right preparation is to give the beans plenty of time to soak over night in cold water or five or six hours in lukewarm water. Be sure to wash the beans before soaking them and cook in the water in which they are soaked, for this will save minerals and vitamins. Beans are rich in iron and Vitamin B-1 and these food values soak out into the water.

It is best to use soft water when available since hard water toughens the beans. Cook them at a moderate temperature. In other words, simmer them, don't let them boil and bubble, for harsh boiling cracks the skins, toughens the protein and makes the beans mushy. Never use soda to cook beans as this destroys the Vitamin B-1. Bake beans in a slow oven, about 250 degrees F.

As far as cooking is concerned, dry beans may be treated—pretty much alike. That is, although a recipe may call for one type of bean usually almost any other variety may be substituted. Season beans with something salty, sour, fresh, crisp, or bright and spicy. Beans are B-1 and they combine well with crisp bacon, ham knuckle, salt pork, chili, a dash of lemon juice, onion or tomatoes.

Miss Rena Ball and Miss Bettie Joe Bray of Abilene were in Putnam Saturday attending the homeing of ex-students.

HERE'S JOHN DOE'S AVERAGE DAY UNDER RATIONING SYSTEM

WASHINGTON—Mr. John Doe, American citizen, has a job, a family, an automobile and a thousand problems aggravated by the fact that this country is now at war.

On the basis of what already has happened to him and what is likely to happen in the near future, here's a picture of what John Doe's typical day will be like:

He gets up in the morning an hour earlier than he once did (by the sun), because the country must save electricity. He has toast and coffee for breakfast, spooning in a lessened amount of sugar because he can now have only one-half pound a week. Maybe his two-egg ration has been cut to one through rising prices.

When he puts on his new business suit it has no cuffs, no frills. He rides a bus or street car, either because his tires are worn through or his gasoline ration card is used up.

Harder Work
At the office he works a little harder, because some of the younger men have gone to the army and new assistants—sometimes women—have to be trained. He saves on office paper to combat a shortage. His secretary uses the old typewriter that doesn't suit her—she can't get a new one now.

At night he and his wife and the kids listen to the radio with only an occasional movie or attend instruction classes in civilian defense. Expenses must be cut because his salary probably hasn't kept up with advancing prices, and he must pay higher taxes and buy war bonds.

Part of John Doe's troubles are going to be eased. The prices he must pay for goods—providing the goods are available—probably will not be more than he had to pay during March. But on the other hand his salary will likely remain static for the duration of the war. That's because the economic system can't stand the strain of an over-balanced ratio of purchasing power to the amount of consumer goods available.

May Lose Job
If John Doe works for a company whose product is hit by priority orders or rationing system he may lose his job. In that case he probably goes to work in a war industry or in government service.

Maybe John Doe was planning a little cottage somewhere out in the country—but not now. No building materials are available. He was saving money for a vacation trip—but that went for war bonds, taxes and increased living costs.

His wife makes over dresses, or buys new ones a trifle shorter and with only one pocket. She hangs blackout curtains in place of the new frilly ones she wanted so badly.

But Mr. and Mrs. John Doe know there's no rationing or ceilings on smiles.

"G'est la guerre," they say.

CARD OF THANKS

We wish to thank our friends and neighbors for their kindness and many expressions of sympathy, during illness and the death of our companion and father, Mr. W. O. Peavy.

To the ladies and everyone who were so nice and thoughtful in sending the food and serving it. May God bless everyone.

Mrs. W. O. Peavy and Family.

County Agent Says --

Save Your Fat
American families eat more than six million pounds of fats and oils yearly. According to Roy W. Snyder, animal industries specialist of the A and M College Extension Service, it would require 6,000 freight trains of 50 cars each to haul that essential food to a central market.

The world shortage of fats and oils makes it imperative to conserve them here. Store lard to be used at home in tight containers in a dry, cold, dark place. Packing lard in gallon buckets with a layer of wax at the top to make the containers air tight is a proved method for keeping it through the summer months. Moisture, air, light and high temperature hasten lard to become rancid.

If using lard from a large container—five gallons for example—take it off the top evenly. Snyder cautions that digging down in the center at one side exposes more surface to the air and increases the chances of rancidity. "Save lard by using no more than necessary in cooking. Bacon and sausage drippings, which are suitable for seasoning other foods, should be strained and stored in a cool place as carefully as new lard.

If lard is strained through several thicknesses of cloth to remove foreign matter after use in deep fat frying, its frying life is increased. Snyder warns against heating fat to the smoking point as it reduces the number of times it can be used effectively.

The election of three supervisors for the Lower Clear Fork of the Brazos Soil Conservation District will be held May 16th, 1942, at 2 p.m. The three supervisors will be elected by a convention being held in Baird, Preckenridge, and Albany.

All land owners in the newly created Soil Conservation District are urged to be present in this election, Saturday, May 16th.

Harvest Seed from Spring Pastures
Faced with a shortage of commercial grass seed, it is most important for farmers to harvest home-grown rescue and rye grasses, and any of the clovers, says Robert R. Lancaster, pasture specialist of the A and M College Extension Service.

"Pasture, which provides the highest quality food at lowest cost and with least labor," he explains, "is imperative to produce meat and milk products for the armed forces and civilian population abundantly and economically. The only substitutes for grass are expensive grains and grazing by mature animals saves grain and cottonseed meal for growing and fattening young stock, and for poultry."

Pasture seed most needed and of highest value rises in April and May. As seed will shatter when too mature, it should be harvested at the earliest date possible. Some green and moist seed may get in, and care will be necessary to prevent heating and molding in the curing. Small quantities may be harvested with hand strippers or by stripping with hands alone.

Rescue grass seed, especially sensitive to moisture, should be spread out an inch or so deep and turned daily for at least two weeks. The same method may be used in curing rye grass. Bur clover seed is swept from the ground after burs and vines are dry. Vines may be gathered with a horse rake with or without mowing, and burs with large stable brooms when pods are thoroughly dry. Raking and sweeping is another way to get rescue and rye grass seed for home use.

Generally, white Dutch clover is harvested by mowing with a woodrow attachment on the cutterbar and allowed to cure before threshing. Combines with pickup attachments may be used to thresh in the field, but stationary threshing allows re-running of the straw and a greater saving of the seed, Lancaster says.

F.S.A. Homemakers in Ceflan County have begun an increased food preservation campaign by pledging themselves to can a minimum of 50 extra pounds for their soldiers. In addition to the victory garden which each homemaker has pledged herself and family wholeheartedly to produce, they again bond together in an effort to save what is produced in their gardens.

A great number of F.S.A. homemakers have sons in the service of their country, others have close relatives and friends, and under the leadership of the Home Management Supervisor of F.S.A. in the county they are signing up 100% pledges for the increased food preservation. Faced with the shortage of available transportation and metal for commercially canned products, these F.S.A. homemakers are co-operating in the nation-wide move to produce as nearly as possible a year around garden, and preserve sufficient food for the non-productive months. Garden plans and canning budgets are worked out for each family who secure a loan from the F.S.A. and with the realization of the increased need of food this year extra efforts are being made to live at home. Instructions in latest methods of canning, drying

I GIVE YOU TEXAS
by BOYCE HOUSE

A child is born; the doctor in attendance gets \$10; the editor get 0. It is christened; the minister gets \$5 and the editor gets 00. When it marries, the minister gets \$10 and a piece of the cake and the editor gets 000. In course of time it dies; the doctor gets from \$5 to \$100; the undertaker \$50 or more; the editor prints a notice of death, an obituary two columns long, besides lodge and society resolutions, a card of thanks and a lot of poetry, and gets 0000. No wonder so many editors die rich!

Found in the Sanger Courier

Interviewed my good friend, Homer Leonard of McAllen on the radio recently. The Speaker of the House tells some amusing stories about the Missouri Ozarks, his native heath. Says Mr. Speaker. "I was walking across the hills one morning and came to a cabin. I stopped to get a drink of water. A woman was sweeping the floor—sweeping it out into the yard. She was bare-footed. I said 'Mawwin', mum.' She said, 'Mawwin', stranger.' I looked down and said, 'I see you had a fish fry here last night.' She said, 'No, stranger, we ain't had no fish fry here, leastwise not in quite a spell now; them ain't fish scales you see—them's toe-nails; we had a square dance here last night."

Here and there, Harry Bengt Crozier appoints your columnist on the USO State publicity committee and Secretary of the Treasury Morgenthau sends a handsome document certifying that this chronicler is a Minute Man, to make talks in the War Bond campaign. "Coke Stevenson is making Texas a truly great governor," says the Sulphur Springs News-Telegram, editorially.

Most people, if asked what is the newest part of Texas, would say unhesitatingly, "West Texas." But Floyd Studer, celebrated paleontologist of Amarillo, tells of the discovery of the ruins of an "apartment house" in the Panhandle, hundreds of years old. Also he says the oldest "newspapers" in Texas are to be found out there in the form of paintings on the rock. One such painting shows a man being killed by a buffalo—a tragedy that occurred many centuries ago. Another painting is found on a cliff overlooking a spring and shows a plumed serpent. In the ancient worship of the Aztecs in Mexico, long before the coming of Cortez and his conquering Spaniards, the plumed serpent was an emblem and you can still see these creatures carved in stone in the crumbling temples near Mexico City.

All newspapermen, sadly familiar with the way an error will creep in and then another error sometimes slips in when a correction is attempted, will smile wryly at this from a paper:

"We stated last week that Mr. John Doe was a 'defective' in the police force. This is a typographical error. Mr. Doe is really a detective in the police force."

"Walking more will be good for us."

"The reduction in quick, easy transportation will cause us to get better acquainted with our neighbors."

"The almost forgotten pleasure of visiting will be rediscovered and the lost art of conversation will be revived."

These are the philosophic observations of Bruce Melvin, regional consumer regulations executive of the Office of Price Administration in the Southwest. His eyes twinkle as he reels off the list, for the former professor of sociology in Cornell University has a sense of humor. Friendly, mild-mannered, soft-voiced, Dr. Melvin has studied housing and rural youth problems over the nation.

Aims of his department are to assist the consumer to adjust himself to the restrictions on the quantity of goods (fine, of course, to the heavy demands of war); to aid the consumer to buy wisely, to conserve and to find substitutes for goods which are becoming scarce.

Lon Boynton of Paris is editor of the Echo. When asked the name of his paper, he says, "A second."
