The most common kind of malaria is the recurring type which returns at regular intervals. The attack becomes milder each time and sometimes disappear within a few years, usually sooner under proper treatment. New drugs developed during and since the war have proved useful in relieving the symptoms and suppressing recurrent attacks. There is real hope that an even more effective cure may soon be discovered.

There is an increase in recom-

attended director meetings since L. L. BLACKBURN Today the Co-op has 153 members and has supplied farmers with 305 tons of 20% phosphate; has gas and oil station, feeds, and a feed grinder in operation, with other needed farmer services to be added

> In addition to all the above the county agent has culled chickens, assisted farmers in securing grass seeds, sorghum seed, clover seed, supervised the County Grasshopper Poison Mixing Station operated in conjunction with the U.S. Dept. of Agriculture, Bureau of Entomology and Plant Quarantine Poison was distributed over 7,899 acres which gave protection to 3,825 additional acres. Total loss in dollars resulting from grasshoppers was estimated at \$15,410 with a total saving in dollars resulting from control of grasshoppers at \$69,920. Fifty-eight farmers used bait with a net cost to the county of \$19.04 after the amount collected from farmers for mixing charges were deducted. The Co. Agent visited farms and ranches to inspect sick chickens, cows. swine and sheep, assisting in vaccination of hogs, gave a demon stration on killing Johnson and Bermuda grass with sodium chlorate; gave information on control of garden insects, identified in-

CONVENIENCE and NECESSITY

The inside facilities of this bank have been provided for the convenient use of our customers. Accessibility of teller windows, safety deposit boxes, statement collection and note departments are but illustrations of service facilities.

The establishment of a bank, however, in any community extends beyond the factor of convenience. There must exist, as a condition precedent to the granting of a charter, a public necessity for the proposed bank.

We shall constantly strive to serve our patrons to that degree contemplated in the letter of the law and in the spirit of it as well, so that in the final analysis we shall be discharging the responsibilities charged to us through issuance of a "charter" by our Soverign State.
