FROM THE EDITOR'S WINDOW

According to investigations this week, Putnam was found to be 1608 feet above sea level.

A shiny new school bus was delivered to the Putnam Independent School District this week, having a Chevrolet motor purchased from the Ray Motor Company of Baird and the body designed to order.

S. W. Jobe says he has seen oil derricks many times from Fort Worth to El Paso, but he has never seen one that looks as good as the one on the B. P. Cozart land near Putnam.

When you don't advertise nobody knows that you are doing business and it won't be long before you'll not know it yourself.

Diversification Unimportant. Javelock Ellis tells of a man of excellent health, good mind, and keen business judgment, who at the age of sixty put his money into a single investment, and lost nearly all of it.

The incident leads Ellis to reflect: "When we have, foolishly or wisely, put all our treasures—no matter whether the treasure of our money or our love—in one place and awake some morning to find that it is gone and our hearts are bankrupt, what is there left?"

Another reflection might be: Diversification is not only desirable in investments but also in one's other activities and interests.

Women are now assured of two to four times as much mileage from a pair of silk hose before a run appears. A few chemical wash for stockings, approved by the U. S. Bureau of Standards, is claimed to protect against runs and spotting.

W. B. Crawford says a business is usually about what it looks, and that our business ought to be good since we have made our few improvements.

business than one which has been neglected from the standpoint of cleanliness, arrangement, or artistic touch.

PANTHERS TAKE OPENER WITH SCRANTON

OLIVER DAVIS, Sports Editor The Putnam high school Panthers plasted the lid off last Friday by defeating Scranton high 34 to nothing in a non-conference clash on the local gridiron.

The Panthers scored early in the game with Shackelford carrying the ball from the twenty-five yard line on a reverse. Two more touchdowns were made in the first half along with a safety, resulting from a blocked punt.

The Panthers scored a touchdown in both the third and fourth quarter to finish the scoring for the afternoon. The Scranton eleven never seriously threatened the Panther goal during the entire game.

Both teams were light and inexperienced which resulted in often fumbles and confusion on the plays. Many substitutes were used on both squads during the game, which the Panthers second string line began the last half.

Jack Everett, Panther back, was appointed by Coach Clyde Dean as captain for the game. At the present a captain has not been elected by the squadmen. However, a definite captain will be elected and ready for duty in the next game.

A definite games for this week has not been arranged at the present, but the Panthers will probably engage either Rotan of the Abilene Eagles.

A game with Throckmorton has been definitely scheduled for next Friday night at 7:30 on the Throckmorton field. They have a very good team and the Panthers are going to put every effort forward to come back with a victory.

The Panthers' first conference clash will be on October 8th on the local gridiron. The opponent will be the highly touted Strawn Greyhounds. The Greyhounds defeated the Panthers last season 7 to 6 and incidentally this year they are coached by Mr. Willie Geter, a former Panther.

The Schedule

- Sept. 24—Rotan or Abilene Freshmen.
Oct. 1—Putnam at Throckmorton.
Oct. 8—Strawn at Putnam.
Oct. 15—Putnam at Clyde.
Oct. 22—Moran at Putnam.
Oct. 29—Open.

THE COTTON SITUATION

The outlook for cotton prices in the future are not so bright as we have a prospective crop of 36,000,000 bales, with an indication of consumption figures showing around 31,000,000 or it would indicate more than 40,000,000 bales supply. The wise men thought to place a loan of nine cents on cotton would peg the price at that figure; but it has failed to check the downward trend and middling 7-8 cotton if sold on the market is worth about 8 cents and much of it selling for less than that. This will give the cotton farmer around \$640,000,000 for his crop against \$720,000,000 in 1936 or \$540,000,000 in 1932. It is very easy to figure out how the farmer has come out in this New Deal program, since it is not a question of dollars, but a question of how much he could purchase with his income on the basis of a dollar income against his income in the year 1932. Figuring the 1932 income on the basis of a dollar against the 1937 dollar it will figure out that the farmer has actually lost buying power after 5 years of more or less government meddling with an income of \$540,000,000 in 1932. He should, as a class, have an income of \$912,000,000 to equal his buying power with that of 1932, and instead he has an income of only \$640,000,000 or two hundred and seventy million less than his income was in 1932, the low of the depression. These are not just figures, but cold facts which cannot be disputed. As we see it there is no way of holding American farm products above the world markets for the same article. The cotton crop of foreign countries is larger this year and there will be about 20,000,000 bales raised outside of the United States this year and foreign growers are contemplating increasing their acreage again next year, and with more than twenty million bales grown next year, a reduction in the American acreage will not raise the price; but will show less American-grown cotton at possibly cheaper prices than it is at present. No sensible person will argue that the farmer can grow cotton at the present price and pay the price he has to pay for what he has to buy, but this is the point we have been trying to get before the people for three or four years: that a price boosted by inflation or large government spending was building the air castle that would blow the entire thing up later on. Have our predictions come true? The grain market is in the same condition that the cotton is and we must depend on an export demand for an outlet for grain when we make a crop. We have lost all of our foreign buyers and they will buy from us as they did this year only when they cannot get it elsewhere. We do not like to keep talking about foreign markets, but we are trying to get before our readers the true situation that is facing our country.

GREAT EMERGENCY EXISTS

We have had nothing but emergency legislation for the past five years and Dr. Roosevelt has been prescribing emergency legislation at each session of congress and made a rubber stamp of the most of the representatives and many senators and if we take his speech of last Friday night he is still asking emergency legislation on account of a great crisis. Quoting, "Ideals make understandable the demands of labor for shorter hours and higher wages, the demands of the farmer for a stable income, the demands of the great majority of business men for relief from disreputable trade practices, the demands of all for the end of that kind of license, often misnamed liberty which permits a handful of the population to take far more than their tolerable share from the rest of the people."

We wonder how much Dr. Roosevelt thinks labor should have of the national income. The nation's income was only \$62,000,000,000 (billion) in 1936 and labor received 65.5 percent or \$41,000,000,000 (billion) of the entire income while the other 85 percent only

had left 34.5 percent. In other words about 15 percent received 65.5 of the income while the other 85 percent of the population only received 34.5. And these figures can be found on page two of the Star Telegram on Monday, Sept. 13, in a report given out by the Commerce Department of the United States at Washington.

Quoting Mr. Roosevelt again, he says: "That is why I have been saying for months that there is a crisis in American affairs which demands action—not a crisis particularly dangerous because it's external and internal difficulties reinforce each other. Purposely I paint a broad picture for only if the problem is seen in prospective can we see its solution: in perspective. I am not a pessimist. I believe that Democratic government in this country can do all the things which common sense people, seeing that picture as a whole have a right to expect. I believe that these things can be done under the constitution, without the surrender of a single one of the civil and religious liberties it was intended to safeguard. And I am determined that under the constitution these things shall be done."

Read the language above: "I am determined that these things shall be done." What things does he refer to? Certainly the Democratic platform in 1932 did not demand the many emergency remedies the President has put over them. They did not demand the farm adjustment act that was declared unconstitutional by the Supreme Court by unanimous vote. The platform of 1932 did demand the abolition of the old farm board and congress did that; but they gave us the adjustment act which was many times worse. The 1932 platform did not demand the NRA. The platform did not demand the shooting of cattle and the hogs and many other things that have been done under the guise of emergency legislation. The people certainly haven't made any demand for the reorganization of the courts as suggested by Mr. Roosevelt, as the 1936 platform was very emphatic in stating that there would be no subterfuge offered that would change the form of our government without the consent of the people, but stated if the measures that were advocated could not be done under the constitution they would submit the matter to the people and let them pass on it and certainly there has been no chance for the people to pass on the change that has been recommended, either in the 1936 election or since. Then the question is what people are demanding any legislation except Mr. Roosevelt and his host of government employees who are wanting to perpetuate themselves in office.

Since March 1933 there has been every wild eyed scheme recommended that could be thought of and they have had access to the resources of the United States and have wasted more than \$20,000,000,000 (billion) in public funds and according to the President's statement we are facing the worst crisis in the history of the country and we can't wait long enough to see whether that which is being proposed is legal or not; but after prescribing emergency legislation for five years we are still facing an emergency, and now we must agree to let Mr. Roosevelt, who has been practicing on the patient for four long

years, interpret the constitution by appointing one new justice for every member of the Supreme Court who is past seventy years old. Mr. Roosevelt talks of the country going to a dictator unless congress and the United States agree to let him now control the court, the only thing between the people and a dictator. We know of no one in the United States who is trying to set up a dictatorship unless it is Mr. Roosevelt.

THE REST OF THE RECORD

JAMES V. ALLRED
Governor of Texas

The newspapers during the past week have quoted members of the Senate Committee as predicting that the Legislature would block my program for new taxes unless the subjects of appropriations and reorganization are submitted.

Such statements by the senators are calculated to put me in the false position of being opposed to economy in state government when just the opposite is true and my record bears it out.

At the beginning of the regular session, I submitted the subject of appropriations and recommended the reorganization of certain state departments in the interest of economy. Not a single thing was done about it. In written messages to the Legislature, I stated definitely that while the Board of Control had recommended increases, and certain bills for salary increases were pending, I didn't join in these recommendations; nor could I approve salary, or other increases until and unless the legislature provided additional taxes to pay them. My recommendations were ignored and appropriations substantially increased, even to the point as these senators now admit, of being "top-heavy." They

would not have been "top-heavy" if my recommendations had been followed.

For the purpose of keeping the record straight, I wrote a friendly letter to Senator Albert Stone, which was not intended to criticize him nor to rebuke him, but merely to point out some of the facts in the controversy that has been started in the newspapers. There are no personal differences between us. In order that the record may be kept straight and the people of Texas may have the facts in this "Rest of the Record," I am quoting the following excerpts from my letter to Senator Stone:

"In the first place, I recommended no increases (in appropriations) except a little more than a million dollars for our insane. You voted for all increases, either as a member of a conference committee or a member of the Senate; one of the biggest increases was in the departmental appropriation bill, for which you voted on May 22nd, as shown at page 2288 of the Senate Journal. Only 4 senators voted against this bill, and this was the biggest vote cast against any general appropriation bill in the Senate.

"You were a member of the conference committee which recommended the passage of the educational appropriation bill—an 'admittedly top-heavy appropriation'—and you voted for the passage of this bill on May 22nd as shown at page 2308 of the Senate Journal.

"You voted for the passage of the eleemosynary appropriation bill on May 19th, as shown at page 1095 of the Senate Journal. "But that's not all: There is a further contrasting record for 'economy':

"You voted for Senate Bill 14, which donated \$350,000.00 State taxes to Harris county each year for ten years, a total of \$3,500,000.00. I vetoed this bill, and you voted to override my veto and give

this money to Harris county, notwithstanding. Senate Journal, page 910.

"You voted for an \$821,000.00 appropriation for an insane asylum in east Texas. Senate Journal page 1592. I vetoed this and saved \$821,000.00.

"You voted for House Bill 24, which appropriated and diverted approximately \$1,500,000.00 each year for soil conservation work—and the Legislature did not provide other taxes to take the place of the diversion for which you voted. Senate Journal, pages 1688 and 2134. I vetoed it and saved the taxpayers \$1,500,000.00 per year.

"You voted for the departmental appropriation bill (S. J. 2228), which carried an appropriation of \$750,000.00 for a Big Bend park, and \$250,000.00 for a cotton research laboratory. The Legislature provided no funds to take care of this appropriation, and I saved taxpayers one million dollars by vetoing it.

"Thus, it will seem that in addition to the 'admittedly top-heavy appropriations,' which you now wish to correct, you voted for a total of almost seven million dollars, which I vetoed. I am wondering if you can point to any such saving that you made for the taxpayers during the regular session? Or to any vote to save the taxpayers that much money? Had it not been for my vetoes, the State would now be about seven million dollars more 'in the hole' as a result of the measures for which you voted.

"I do not personally condemn you for these votes—I simply take the position that it is now the Legislature's duty to raise money to pay the increased appropriations they themselves made.

"You now suggest that I submit the matter of appropriations and reorganization of the government at a special session which can only last thirty days; and after the appropriations have been made for several months and acted upon by the departments, contracts having been let under them.

"I want to appeal to your sense of fairness, Senator, is it reasonable to suppose, that, waiving the question as to whether it is equitable to try to work these appropriations over after the departments have acted upon them and contracts have been made, if I should submit this subject to a special session, the same Legislature would do something in thirty days that it failed to do during a four months' session?"

"In any event, even if you passed any economy measure, which I seriously doubt, could I hope for the passage of necessary tax measures that you failed to pass during a four months' session? if

the canendar is cluttered up with anything other than revenue measures. As Governor I am firmly convinced that no substantial saving would actually be accomplished."

The Legislature has submitted several constitutional amendments. The people have voted the amendments. No one can deny but what it is my duty as Governor to recommend a revenue program to

finance the people's program. It is reasonable to expect that the Legislature who so recently passed the 'appropriation' by overwhelming votes, would now reverse themselves and substantially reduce the appropriations? I point to the fact that only four senators voted against the general departmental appropriation bill in the regular session. This vote is typical of all other votes on appropriation bills.

THE LONNIE MITCHELL CASE

The case of Lonnie Mitchell, "a negro at Merkel," was tried in the 42nd district court at Abilene last week and was given a death sentence by a jury in the 42nd court. This is a case where the negro killed a nightwatchman at Merkel about one year ago. He was indicted by a Taylor county grand jury that had no negroes on the jury though there were many negroes in the county who were qualified. He was tried and given the death penalty, but the case was reversed by the court of appeals. Since the reversal the United States Supreme Court has handed down in the famous Scottsboro case that the absence of negroes on the grand jury was ground for reversal as there are negroes who were qualified to serve on the grand jury. In view of this decision Judge Milburn Long called a special session of the Taylor county grand jury with two negroes on the panel, but neither of them was chosen on the panel. The attorneys gave notice of an appeal to the court of Criminal Appeals. It looks as though there is a constitutional question involved in the case, since the negro was tried once for his life for the same offense, and it looks as if the former trial would bar any further action.

CONGRESSMAN SUMNERS TALKS OUT

Congressman Sumners had the following to say in a speech at Brownsville September 15: "The United States is headed for a dictatorship if the people do not make their wishes in governmental matter evident once more. Public opinion is the only true governing force in the world," Sumners told a luncheon club group. He said the President had been set on a pedestal as a demigod, and protested expenditures of the government.

Well! Well!
"I turned the way I signalled," indignantly said the lady after the crash.
"I know it," sadly said the man, "that's what fooled me."

R. A.'S MET THURSDAY NIGHT

The R. A.'s of the First Baptist church met Tuesday night at the church in Mission study. The meeting was opened with the singing of "The King's Business." After prayer the group repeated scripture preceding the chapter from which the lesson was taken. The boys voted to buy wash clothes for the Sunbeams Home at Buckner's Orphans Home. The first chapter of "Witnessing for Christ" was studied. Those present were Billy Gaskins, Douglas Kelley, Lewis Williams, Reverend and Mrs. F. A. Hollis. Next meeting will be Tuesday night, September 28th. All boys of the correct age are urged to come at 7:30.

W. M. S. HAD QUILTING

The WMS met in the home of Mrs. L. B. Williams Thursday at which time they completed a quilt for the Paul Bell Mexican school of the Baptist Mission. Each member pieced a block. Refreshments of lemonade and cookies were served. Those present were Mrs. F. A. Hollis, I. E. Cook, W. M. Crosby, John Cook, S. W. Jobe, E. G. Scott, W. M. Tatom, and L. B. Williams.

Mrs. J. E. Green and daughter, Mrs. Arnold Pruet of Admiral, were in Putnam Saturday sporting a brand new high-powered Oldsmobile coupe.

Mr. and Mrs. C. F. McMillan, Miss Hazel McMillan, and Mrs. Exal McMillan were in Putnam Saturday visiting relatives and friends.

FARM NOTES

ROSS B. JENKINS, County Agt.—
1938 AAA Program Announced—
Tentative plans for the 1938
AAA Program have been an-
nounced this week by Secretary

Wallace. The average acreage
from 1928 to 1937 of all soil de-
pleting crops amounted to about
805 million acres. The goal for
the 1938 crop is between 275 mil-
lion and 290 million acres. Every
state, every county, and each in-
dividual is expected to carry out

his pro rata share of this goal
that introduces a new term for
our future programs—goals.

County goals for corn, cotton,
and peanuts will be designated
for Callahan. County goals will
be based on the average acreage
grown in the county and adjusted
when necessary to the trends in
acreage and the recommendations
of the county agricultural com-
mittee. In establishing individual
goals the county committee will
consider tillable acreage on the
farm, type of soil, acreage cus-
tomarily grown on the farm and
acres of food crops needed for
home consumption. County com-
mittees will establish soil building
goals for individual farms taking
into consideration the needs for
terracing, contour listing, soil con-
serving crops, improvement of
pastures to prevent loss from
wind or water erosion. These goals
can be met by maintaining soil
conserving crops and by the use
of soil building practices adapt-
ed to the needs of each county.
Under previous programs separate
rates were established for divert-
ing from soil depleting to soil con-
serving crops and for carrying out
each soil building practice. In 1939
however, the maximum payment
for each producer will be calculat-
ed at the beginning of the crop
year and the attainment of the soil
depleting crop goal and soil build-
ing goal will be set as conditions
of full payment. Every producer
will know what he must do for
complete cooperation. This should
encourage more farmers to enter
the program and should result in a
greater degree of compliance and
ease of administration.

Methods of Payment—

Payments will be made for
staying within the farmers soil
depleting crop goal and for achiev-
ing the soil building goal. These
payments will be calculated as
follows:

(1). \$1.50 per acre, adjusted for
the productivity of the farm, for
each acre in the general soil-de-
pleting goal.

(2). 10 cents per bushel of the
farms normal yield per acre of
corn for each acre in the corn
goal.

(3). 2 cents per pound of the
farms normal yield per acre of
cotton for each acre in the cotton
goal.

(4). Two-tenths of a cent per
pound of the farms normal yield
per acre of peanuts for each acre
in the peanut goal.

(5). 70 cents per acre on either
the soil-conserving acreage or one
fourth of the total soil-depleting
crop goal established for the farm
whichever is greater.

(6). \$2.00 per acre of the acre-
age annual acreage of commercial
orchards on the farm January 1,
1938.

The sum of any of those pay-
ments which apply to a farm shall
be the farms total payment for
1938, if both the soil-depleting
crop goal and the soil-building
goals are fully set. Only partial
payments will be made if soil-de-
pleting crop goals are exceeded or
if the soil-building goal is only
partially achieved.

The specific crops and practices
to be counted toward the attain-
ment of a farm's soil-building
goal correspond in general to
those approved for use in the
1937 program. State committees
will later select the list of soil-
conserving crops that will apply
to their particular states.

Range Program

The range program, developed
during 1936 and 1937, will be con-
tinued in 1938. The range program
will be a part of the 1938 con-
servation program.

Peanut Growers Meet—

Recently the Southwestern Pea-
nut Growers Association with
headquarters to be at Brownwood
was formed and Callahan is one
of the five counties included in
the area. Mr. J. V. Starr of East-
land county was chosen president
of the association. Steve N. Fos-
ter of Route 4, Cisco, represented
Callahan county and became one
of the charter members. This as-
sociation met Wednesday at Dub-
lin for furtherance of the pro-
gram. Farmers are urged to con-
sult their county agent in the area
affected or some of the officials of
the organization to learn more fully
how it can be entered by them
and thus increase the price that
they will receive for their peanuts.
The government will subsidize the
peanut grower about the same
way as is being done for the cot-
ton producers if members will
sell through the peanut associa-
tion. A guaranteed price, in other
words, will be made to all
members in this association.

As has often been pointed out,
peanuts always go up after the
farmers have sold their crops. This
year it is planned to stabilize the
price at about 70 cents per bush-
el, which is above the price being
offered locally. Then peanuts will
be placed in government ware-
houses to prevent them leaking
out into markets which would
cause a depressing effect. This
type of cooperation has been
clearly illustrated during the re-
cent cotton, wheat and other A.
A. A. programs, and farmers now

realize that by all staying togeth-
er they may control the price paid
for their products but if each man
tried to be a marketing agency on
his own he comes home discourag-
ed and with very little money with
which to pay the year's bills.

**TO IMPROVE LAND-OWNER,
TENANT RELATIONSHIPS**

A new drive is being launched
to improve relationships between
landowners and those tenants who
are being financed by the Farm
Security Administration (former-
ly Resettlement), it was stated by
J. S. McKnight, county super-
visor.

Recommendations of a commit-
tee of supervisors are now being
printed for guidance of all coun-
ty offices in Texas and Oklahoma.
The 45,900 farm tenant families
in these two states who are being
financed by Farm Security can
blaze a trail for the remainder of
the 147,000 Texas and Oklahoma
tenant families, the supervisor
said.

The committee report recom-
mends that leases be prepared at
a conference between landlord,
tenant, and county supervisor. The
lease should always be in writing,
it was suggested, because "dis-
trust frequently exists, and be-
cause of the human element of
forgetfulness as to what agree-
ments have been made." A long-
time lease was recommended, in
place of the one-year lease now
commonly used. Cancellation
clauses were suggested, for use
by either party, for reasonable
cause, at least ninety days before
expiration of any lease year.

"Where it is absolutely impos-
sible to obtain long-time leases, we
feel that one-year leases should be
automatically renewed, unless one
of the parties gives notice sixty
to ninety days before expiration,"
the committee said.

Each Farm Security borrower
is working under a long-time plan,
and it was recommended that the
lease encourage him to make im-
provements which will aid in car-
rying out that plan. Improve-
ments which he makes should be
considered the property of the
tenant, and he should either be
allowed to remove them at expira-
tion of the lease, the report said,
or an understanding should be in-
cluded in the lease as to how the
tenant should be compensated.

Present division of crops, on the
"third and fourth" basis, was de-
clared inequitable. "On good land
it is usually to the advantage of
the landlord, and on poor land,
to the disadvantage of the tenant,"
the report declared, urging that "a
fairer distribution should be made,
based upon the respective contri-
butions of the landlord and ten-
ant." However, the committee
condemned the "bonus" or "priv-
ilege rent," now being used in
many counties of Texas and Ok-
lahoma. It recommended that
payment for special privileges be
made in labor. It was also rec-
ommended that county Farm Debt
Adjustment Committees act as
conciliation boards, to settle lan-
lord-tenant differences.
