

Warm Temperatures Rushing Crop Development

LUBBOCK -- Warm temperatures prevailing over the Texas High Plains during recent months are believed to be the primary cause of faster than normal development of early planted crops. In most cases, says Dr. James Supak, the rushing of crop development is expected to have little effect on yields of cotton and grain sor-

ghum, but could cut into corn yields and possibly hurt soybean harvesting. Supak, an area agronomist with the Texas Agricultural Extension Service, says area corn fields already are tasseling and silking almost two weeks earlier than expected. Several factors are contributing to the accelerated de-

velopment, but the primary one seems to be temperature, he says. The specialist explains that all crops require a specific number of heat units to pass from one developmental stage to the next. Records kept by the U.S. Weather Service at Lubbock show that temperatures for April, May and June were sev-

eral degrees above normal, and crops planted during these months accumulated or are accumulating the heat units needed to push them into the reproductive stage earlier. Supak adds that the prolonged spell on the Plains also is contributing to rapid crop development. Moisture stress or lack of water tends to speed up

development especially as the plant nears the reproductive stage. Also, cloudy conditions and rainfall tend to reduce both soil and air temperature. This natural "temperature control" faltered this year due to the drought. "The question now," Supak says, "is what effect are these environmental conditions

going to have on production? To a large extent, this will depend on the crop, the planting date and the general condition of the crop or whether it has endured hail and wind damage or has been severely stressed for moisture." COTTON Early planted cotton has already benefited from this pec-

uliar set of environmental conditions, the Extension agronomist reports. The incidence of seedling diseases normally associated with cool, wet weather in the spring has been essentially nil. Further, the growing season on the Plains is relatively short and any condition that speeds cotton development is usually beneficial.

"This could be of some importance in areas where crops were damaged by hail and wind," he says. "Accelerated development would hasten cotton fruiting, thus shortening the recovery period. Stalks will be shorter and bolls will be set closer to the ground but at least they'll have more of an opportunity to develop fully." Con't on page 2, col.6

HEAD ON COLLISION KILLS ONE, INJURES ONE . . . Pictured above are the two vehicles involved in the accident which occurred at 2:53 p.m. Friday, July 19. The death vehicle was

driven by Kenneth W. Willis, who was pronounced dead at the scene.

Anthrax Infestation Remote Possibility

Wreck Claims One Life Injures Another

Death came early in the afternoon, Friday July 19, for Kenneth W. Willis, 51 of Clovis, New Mexico.

Horsemanship Class Offered

William E. Ottosen, Director of Amarillo College has announced that two five-week evening classes in horsemanship will be offered by Amarillo College beginning July 19 and 20. The Community Service program course will meet Fridays from 6:30 to 8:30 p.m. and on Saturdays from 10 a.m. until noon at Six Gun Territory near Palo Duro Canyon. Jim Sorenson, the amusement center's director, will teach the class, covering all elementary information concerning horsemanship.

County Farmers Are Commended

Abulletin from Agriculture Commissioner John C. White, reveals the following statistics about Bailey County. Bailey County farmers were the third largest producers of castorbeans in the state for 1973. Total production for the county was 4,180,000 pounds. "Because 1973 had one of the latest freezes in recent history, harvest started several weeks behind schedule and progressed rapidly until the end of the year," White said. Bailey County also placed in the top ten in corn production in the state for 1973. Total production for the county was 2,302,000 bushels. White commended on page 2, col.8

Hunting Season Wrap-up

AUSTIN -- With the exception of geese and ducks, the 1974-75 hunting seasons are set and here are how they shape up:

- White-tailed deer, in most regulatory counties, Nov. 16 - Jan. 1, for the regular gun season; Oct. 1-31 for archery.
- Mule deer, Nov. 30 - Dec. 15 in the Trans-Pecos; Nov. 23 - Dec. 8 in the Panhandle.
- Antelope, by permit only, Sept. 28 - Oct. 6 in the Trans-Pecos; Sept. 28 - Oct. 1 in the Panhandle.
- Javelina, Oct. 1 - Jan. 1, with the exception of Real, Kerr, Kenney, Edwards, Schleicher and Frio Counties where there is no closed season and no bag limit.
- Turkey, generally concurrent with the Nov. 16 - Jan. 1 whitetail season.
- Quail, South Texas, Nov. 1 - Feb. 2; Possum Kingdom and Northeast, Dec. 1 - Feb. 16;
- most other sections of the state Nov. 16 - Feb. 16.
- Mourning dove, North Zone Sept. 1 - Oct. 30; South Zone, Sept. 21 - Nov. 3 and Jan. 4 -19; exception are those counties with a whitewing season, fall segment closes Oct. 30.
- White-winged dove, Sept. 1-2 and 7-8, in those counties along the Rio Grande.
- Jacksnipe, Nov. 16 - Jan. 19.

Tax Equalization Program Explained

Mr. and Mrs. Alton Epting visited their son and wife, Mr. and Mrs. Mike Epting in Mansfield. They also attended the Epting family reunion at Lake Whitney, Sunday they visited Mr. and Mrs. Glen Stevens in Gultine and Mr. and Mrs. Unice Copper in Rising Star, traveling to Midland the Eptings visited another son, Mr. and Mrs. Dwayne Epting before returning home Wednesday, July 17.

With the finalizing of the tax equalization program, Judge Glen Williams offered the following by way of further explanation: "The next step for the plan will be for the J. W. McMorris firm of Hereford to prepare file cards in cooperation with the county tax assessor. The tax assessor will list each parcel of taxable property."

"The McMorris firm will then proceed to divide the cards geographically and begin their search of records to determine a market value of the property." The Judge continued, "Taken into consideration when compiling this value will be comparable sales records, capitalization value, location, quality, water availability, improvements to the property and other similar factors."

Judge Williams further advised that "Public and private meetings will be scheduled before this program is begun so that the general public may be acquainted with the procedure. Thus, time may be saved."

SPAG To Hold Area Workshop

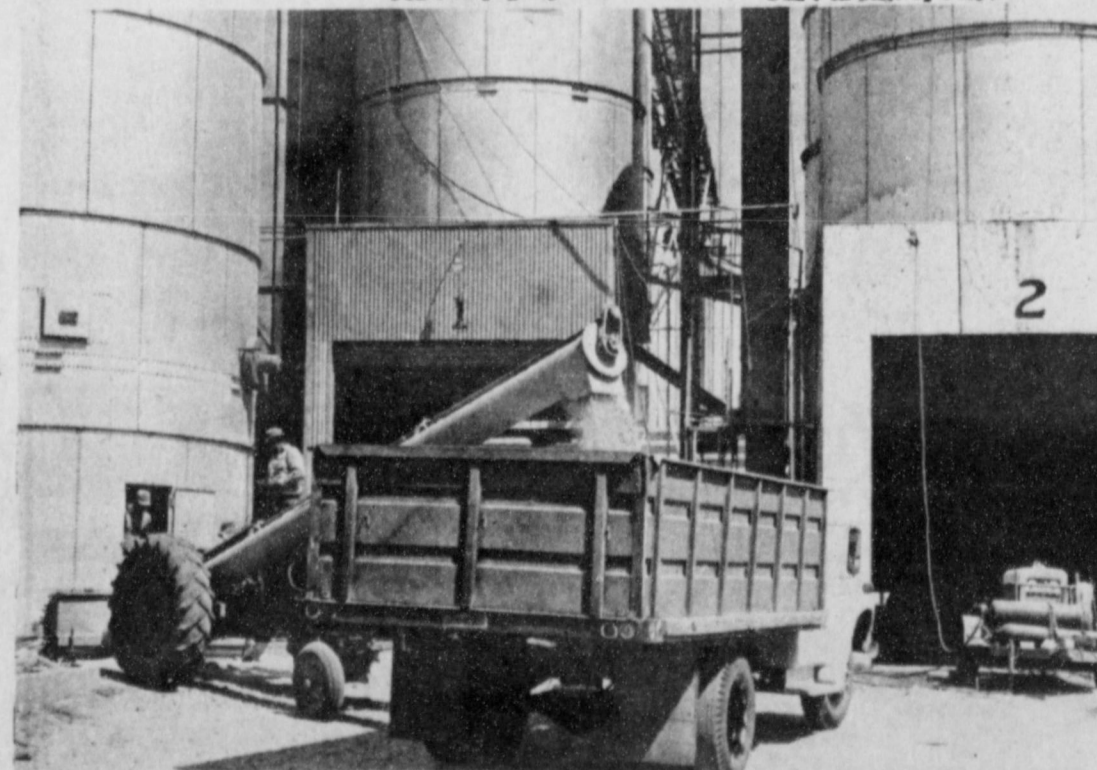

Mayor Alex Williams will be a spokesman in the upcoming South Plains Association of Governments Workshop. The workshop will be held from 9:30 - 2:30 July 25 in the Community Room of the Briercroft Savings and Loan in Lubbock. The theme of the program will be "Solid Waste Management" and will feature presentations concerning rules and regulations for the collection and disposal of solid waste, assistance available to local decision makers, the state of solid waste management in Texas.

Project H.E.L.P. Decreasing Tickets

Project H.E.L.P. is well under way according to the chairman, Ted Barnhill. He reported that tickets are rapidly decreasing and everyone should take advantage of this project whether they have donated to the hospital of not. For each ten dollar donation a person will receive two tickets.

Police Report

Arrests logged in the Bailey County Law Center since July 17 were one arrest for Alien DWI - released to Border Patrol, Arrest made by City Patrolmen Forist Williams and Jimmy Mills. One arrested for drunk and no driver's license. He was fined \$42.50.

CORN FIRE AT LOCAL ELEVATOR . . . A fire early Wednesday morning, July 17 caused approximately \$5,000 damage to storages at Texas Sesame. There were 300,000 pounds stored in the elevator. 42,000 pounds were destroyed and 258,000 pounds damaged by smoke. Welding sparks were determined as the cause of the fire.

County Facility Is Nearing Completion

The Bailey County Judge office advises that Bailey County recently purchased the office building at 306 W. Second to be used for much needed office space. It is now being repaired and remodeled on the inside, and should be ready for occupancy by August 1.

The Family Planning Service and Food Stamp Program will be removed from the Court-house and located there. Also, it is expected that there will be space for the State Welfare caseworker, should she desire to use it.

The Welfare caseworker is in Muleshoe to meet with her recipients each Friday. The office reported, "She requires little room, and not many people are in to see her, because she works principally by appointments. This is a State program."

Greenbug Hits High Plains

Grain Sorghum crops in the High Plains are being hit by greenbugs in epidemic proportion, according to Jack King, research director of the Texas Grain Sorghum Producers Board.

King compared this infestation of greenbugs to the epidemic of 1968, but added the main difference is that control is very difficult now.

EXTENDING WEIGHT SCALES . . . Work has been under way for several days at Ray Griffiths and Sons Elevator removing existing scales and installing new scales which are longer enabling the elevator to weigh trucks with a larger load capacity. The increased size of Transcontinental shipping trucks has made the extension necessary.

Two Charged With Arson, Burglary

Bonds of \$10,000 each were set for two Earth men, charged with burglary and arson of Earth Oil and Gas Company last week. Raymond Henderson, 32, and Richard L. Williams, 22 of Muleshoe.

Cotton Meeting To Be Held In Lubbock

Duke Wooters, president of Cotton Inc., New York City, N.Y., along with seven of his top aides from Raleigh, N.C., will be in Lubbock, Wednesday evening July 24, at the South Park Inn, on Loop 289 and Indiana. Meeting will start at 7:30 p.m. Cotton producers with their wives from the west Texas area are expected to attend. The High Plains Women's Cotton Promotion Association composed of ten county clubs are bringing the story of Cotton Inc., operation to Lubbock.

Mrs. Wanda Ligon, District President of Women's Cotton Promotion and bookkeeper at Clauch gin at Bula, says we want all producers to know how their money, (dollar a bale contribution) is being used to enhance the business of producing cotton.

The women of the organization will provide cookies, snacks and candy made from cotton seed, cotton seed oil and cotton seed flour.

There will also be individual discussions of agricultural research, economic research, marketing, advertising and textile research, very few producers have had the privilege of hearing first-hand, the things to Lubbock.

The Bailey-Lamb County club is very active in the Women's Cotton promotion Association and feel this is a wonderful opportunity for all farmers and their wives to get the first hand information about Cotton Inc.

The Muleshoe Jaycees met Monday for their noon general membership meeting at the XIT restaurant. The meeting was called to order by the president, Charles Moraw. Invocation was given by Gene McGuire.

Guests included Doran Reynolds of Barry and Young Equipment and Larry Bilberry.

Other items discussed were the Ruidosa Retreat to be held August 16, 17 and 18; the Dimmitt Orientation to be held July 17; the Summer Board F.O.Y.T.

Earth allegedly broke into the building late Saturday night, July 13, then returned early Sunday morning and set fire to the establishment, police say. Sheriff's officers estimate damage from the fire at \$25,000.

Entry to the building was gained by forcing a window. The office was ransacked, and the petty cash box taken, and several new tires were missing, according to a report by Dutch Beene of the Earth business.

Mrs. Chenault was recommended to the crusade by John Hall, last year's featured singer of the Meet Jesus Crusade.

Willis was dead at the scene. Montana was taken to the Clovis Memorial Hospital where he was treated for lacerations, broken ribs and a brain concussion.

Four flights are scheduled with trophies given for first, second and third in each flight. Teams will be flighted according to lowest handicap.

Out of town golfers are registered from Tucuman, Clovis, Littlefield, Lovington, Oton, Farwell, Friona and Sudan.

The County has nothing to do with the administration of any of these programs. They are using offices in the Courthouse because they have no other place to work. But office space in the Courthouse is very limited. And this has created a crowded condition that needs to be corrected.

The Social Security Representative will continue to meet in the Courthouse, but the Food Stamp and Family Planning services will be at 305 W. Second after August first.

Temperature...

Cont. from Page 1

There are some indications that grain sorghum also is developing at a slightly accelerated pace, Supak notes. Breeders and field men for some of the seed companies in this area recently indicated that a few of their experimental lines are shorter and further advanced than normal. Also, mid-May plantings of early maturing hybrids are beginning to head and will reach the 50 percent bloom stage a few days earlier than last year, he reports.

"The general consensus of grain sorghum breeders and agronomists is that this effect will have little or no influence on grain yields except in situations where producers

are trying for very high yields." Under optimum growing conditions," he figures, "farmers may lose 50 to 100 pounds of grain for each day that the normal maturity period is shortened. Generally, however, the most noticeable effect is likely to be shorter stalks which are more apt to be an asset rather than a problem."

The agronomist points out that the days gained by accelerated development will probably have no noticeable effects on insect infestations such as midge and greenbugs, or on water requirements.

SOYBEANS
"Dr. Raymond Brigham, soybean breeder at the Texas A&M University Agricultural Research and Extension Center just north of Lubbock reports that several varieties in his regional variety evaluation trials are exhibiting early reproductive development," Supak

believes this effect may not be too noticeable since many soybean fields had to be watered earlier than usual this year which encouraged early stalk growth.

Early fruiting coupled with low pod set will be most noticeable in the hail and sand damaged fields and could result in increased harvesting losses, he adds.

Greenbug...

Cont. from Page 1

poor at this time. The use of existing chemical compounds resulting in only 50 to 70 percent control.

"We don't know why we're having control difficulties," King said, "but it could be one of two things: The extremely dry period could have affected the results of chemical usage or there may be a resistance in greenbugs to the present registered compounds."

King added that farmers should recognize that in most cases, the fault is not with the chemical itself or the aerial applicator.

"If chemicals are going to work, then the low rate (one-sixth pint) is enough. If chemicals aren't going to work, it doesn't matter how much is used," King said, adding that if rapid mit buildup is present, higher rates of granular or liquid chemicals could be advisable.

The area hardest hit at this time is north of Plainview, east of the Caprock and west through the grain sorghum producing areas of New Mexico. There appears to be some problem north of the Canadian River, but there's little reported activity in the North Plains.

BURGLAR INDIGNANT

PROVIDENCE, R.I.—Dennis R. Evans, professional burglar, was indignant of the published statement that he had been arrested "on the spot" during a drug store break-in. The 23-year-old Mr. Evans claimed he was picked up an hour later and a mile away.

Farmers...

Cont. from Page 1

mended, "The work of the Bailey county farmers provided a big boost to the total state production of 60,800,000 bushels.

Other counties in the top ten in corn production were: Farmer, Castro, Lamb, DeadSmith Moore, Dallam, Sherman, Hansford and Hale. Other counties in the top five for castorbean production were: Lamb, Farmer, Hale and Castro.

Complete statistics on 1973 field crops are available by writing John C. White, Commissioner, Texas Department of Agriculture.

HELP...

received on chance on a brand new 1974 Ford LTD.

The Muleshoe Jaycees met Monday for their noon general membership meeting at the XIT restaurant. The meeting was called to order by the president, Charles Moraw. Invocation was given by Gene McGuire.

Guests included Doran Reynolds of Barry and Young Equipment and Larry Bilberry.

Other items discussed were the Ruidosa Retreat to be held August 16, 17 and 18; the Dimmitt Orientation to be held July 17; the Summer Board F.O.Y.T.

Earth allegedly broke into the building late Saturday night, July 13, then returned early Sunday morning and set fire to the establishment, police say. Sheriff's officers estimate damage from the fire at \$25,000.

Entry to the building was gained by forcing a window. The office was ransacked, and the petty cash box taken, and several new tires were missing, according to a report by Dutch Beene of the Earth business.

Mrs. Chenault was recommended to the crusade by John Hall, last year's featured singer of the Meet Jesus Crusade.

Willis was dead at the scene. Montana was taken to the Clovis Memorial Hospital where he was treated for lacerations, broken ribs and a brain concussion.

Four flights are scheduled with trophies given for first, second and third in each flight. Teams will be flighted according to lowest handicap.

Out of town golfers are registered from Tucuman, Clovis, Littlefield, Lovington, Oton, Farwell, Friona and Sudan.

STAMPS DOUBLE ON WED

Miss Geddes Weds Cole

Miss Helen Susan Geddes of Lubbock and Johathan Dale Cole also of Lubbock were united in marriage July 19 at 7:00 p.m. at St. Elizabeths Catholic Church of Lubbock, Rev. Joe Bixenman officiated in the double ring ceremony.

The brides parents are Mr. and Mrs. Jack F. Geddes and the grooms parents are Mrs. Mittie Cole of Muleshoe and William D. Cole of Plainview.

A basket of white gladioli on the altar served as decorations for the church. Robert Pollard, accompanied himself on the guitar while he sang "The Wedding Song" and "My Sweet Lady".

The bride, given in marriage by her father, wore an empire dress with a full length detachable train, made of light blue and ivory skinner lipson. The scoop neck and skirt were accented with pearl ivory lace. The head piece was full length net veil also accented with pearls. Her bridal bouquet was white carnations, baby

breath and purple periwinkle. Miss Diane Enabnit of Lubbock served as maid of honor and wore a full length empire dress made of blue dotted swiss. She carried a bouquet of white daisies.

Candlelighters and ushers were Lynn Akin and Terry Franklon both of Lubbock. Joe B. Duke Jr. of Lubbock served as best man.

A reception followed the ceremony in the home of the bride's parents. Amy Renner registered guests while Sandy Howard, Lou Ann Cole, sister of the groom,

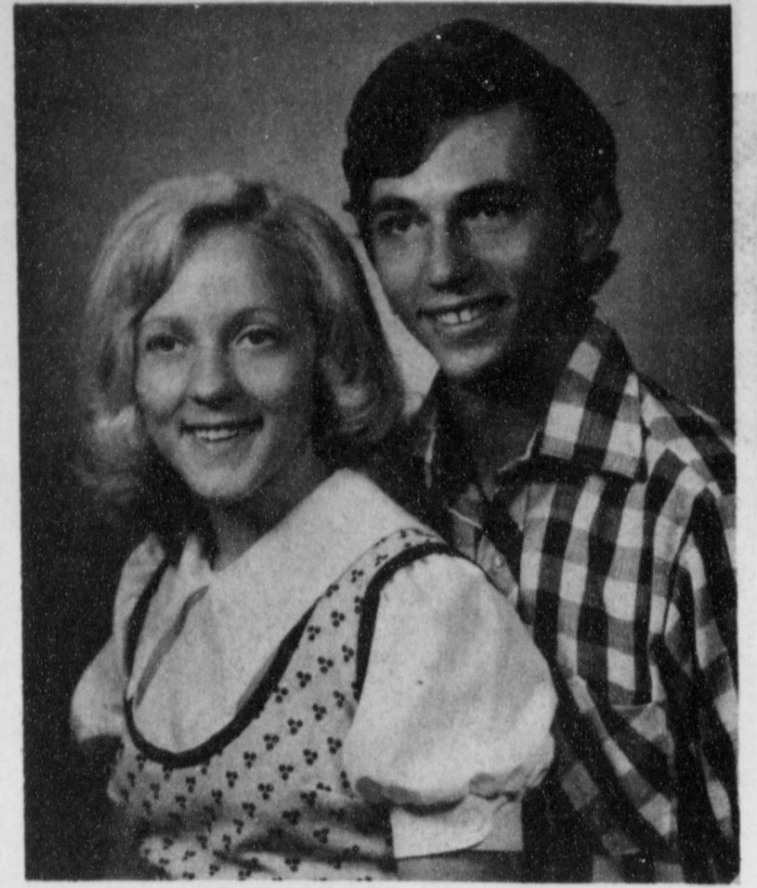

Jimmy Fisher and Debbie Rothwell presided at the table.

For a wedding trip to Oklahoma City, Okla. and Missouri the bride wore a navy blue and white empire dress of double-knit. Upon their return the couple will make their home at 3814 50th, #22, Lubbock, Texas.

The bride is a 1973 graduate of Monterey High School in Lubbock and is a pre-nursing major at Texas Tech. She is presently an E.K.G. Technician at Lubbock Medical Center Hospital.

The groom is a 1971 graduate of Muleshoe High School and a junior business major at Texas Tech. He is presently employed by Scott Welding of Lubbock.

The rehearsal party was held at the home of the bride's parents and the bridal luncheon at 3410 63rd given by Hazel Earsley and Norma Hall.

COUPLE REVEALS PLANS . . . Mr. and Mrs. Archie (Jee) Sowder of Goodland announce the engagement and approaching marriage of their daughter, Kandace Kay, to Jack W. McCarty, son of Mr. and Mrs. Jack W. McCarty of Nara Visa, New Mexico. The bride elect is a 1973 graduate of Three Way High School and the groom is a 1973 graduate of Logan High School. They both will be Sophomore students at Wayland Baptist College in Plainview. The marriage will take place August 24 at 2:30 p.m. in the Calvary Baptist Church of Canyon Texas.

State In-Service Conference

Approximately 2400 vocational homemaking teachers from schools across Texas will converge on Dallas July 29-August 1, 1974 for the State In-service Conference. The theme will be "Homemaking Education in a Multi-Cultural Society" according to Mrs. Ima Dora Haile, Area I Consultant from Texas Education Agency in Plainview.

The conference has as its purposes to provide opportunities for teachers to: Understand the relation between culture and social institutions;

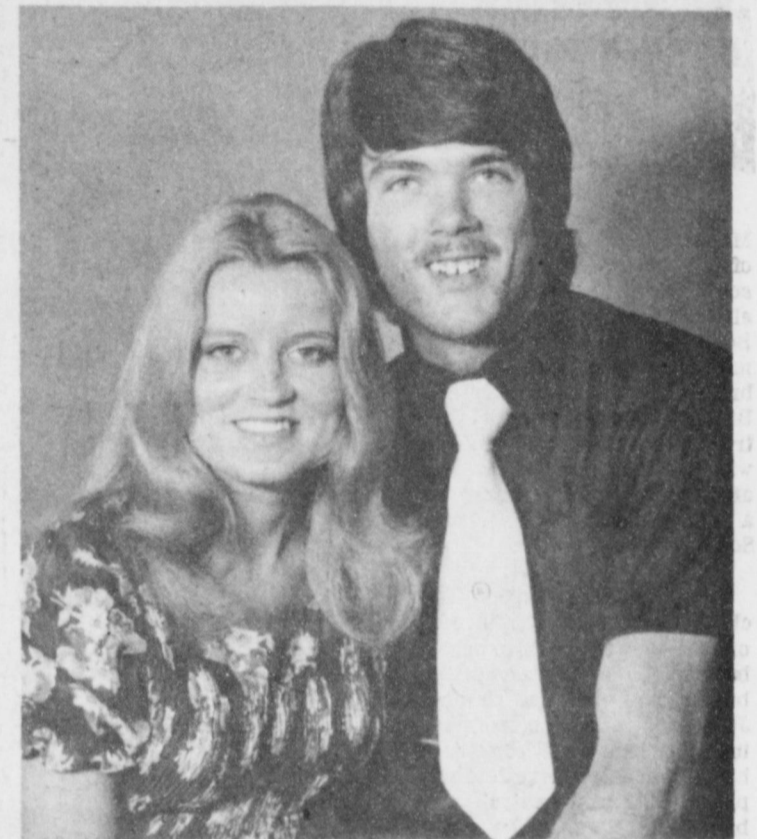

Become aware of ways to use the culture of students in the school program; Identify guiding principles and common communication methods across cultural borders; Determine techniques for meeting the needs of individuals and families in a multi-cultural society; Determine the meaning of multi-cultural education to Homemaking Education; Become more effective as homemaking teachers in a multi-cultural society; Advance in professional development and Plan follow-up of the conference through local program planning.

Two days will be devoted toward helping all cultures gain a knowledge of other cultures. Dr. Bernice Moore, Executive Associate, The Hogg Foundation for Mental Health, University of Texas, will give the keynote address on "The Meaning of Culture in Our Social Institutions", to be followed by Dr. J.B. Jones, Professor of Psychology and Education, Texas Southern University, Houston, who will speak on "Using the Culture of the Student in School Programs."

Mrs. Pete Laney, State Young Homemaker President, will address the group on Wednesday morning, July 31. Area I of Homemaking Education includes 38 counties of the South Plains and Panhandle of Texas. There are 262 teachers in the various types of programs.

20 Years Ago

Mr. and Mrs. J.K. Adams and children, Joe and Joyce spent the July 4 weekend in Las Vegas, Cowles, Pecos and Santa Fe, N.M. and in the Bandero National Forrest. They reported a very enjoyable time.

AUGUST WEDDING PLANNED . . . Mr. and Mrs. Richard Engeling announce the engagement and approaching marriage of their daughter, Debbie Lynn, to Doyle Wade Weir, son of Mr. and Mrs. Billy Weir of Lazbuddie. Both are 1973 graduates of Lazbuddie High School and are Sophomore students at West Texas State University and Amarillo College respectively. The wedding will be August 22 at 8:00 p.m. in the Lazbuddie Baptist Church.

Hobby Club Show Crafts

The Muleshoe Hobby Club met at the Muleshoe State Bank community room with Euna Maye Oswalt as hostess.

Those attending and showing items were Allie Barour, jewelry box; Mrs. Verna Dement, beaded grapes; Mrs. Charlie Phipps, afghan; Mrs. Bub Shafer, grape plaque; Mrs. Levina Pitts, casserole cover, bun warmer and swing set; Mrs. Mable Caldwell, baryboze bottle, miniature toy iron, bread dough doll an arrangement on drift wood.

Those attending but not showing items were Edith St. Clair; Mrs. Zula Carlyle, Mrs. Louis

Henderson, Mrs. Ruth Bass, Mrs. Euna Maye Oswalt, Mrs. George Chambliss, Mrs. Ruth Williams and Barbara Burton. The next meeting will be the first Thursday in August with Edith St. Clair as hostess.

10 Years Ago

Mr. and Mrs. Don Schuman entertained Saturday with a picnic outdoor cooking and shooting fireworks. Jerry, Bruce and Mark Bruns all of Muleshoe were among those enjoying the occasion.

Library News

by Anne Camp

Circulation records show that 6,702 books are checked out in a month of June - this was the largest circulation for one month in the history of the library! Other than books we circulated 1,256 paperbacks; 125 record albums, and 32 magazines.

The Summer Reading Club program is going great, with many boys and girls reading many more than the required number of books. There is still time to start and read 12 books and receive a certificate for the library. August 10 is the final date for the Summer reading club - and a number of activities are being planned for that date, with all members invited for the awarding of the highest readers-as well as contests and games to compete and win prizes. August 5th is the final date for all books and booklists to be turned into the library . . . so boys and girls should get in that summer reading while there is still time!

ENGAGEMENT ANNOUNCED . . . Mr. and Mrs. Cliff Mardis of Muleshoe announce the engagement and approaching marriage of their daughter, Sammie Ann, to Bobby Carroll Henderson, son of Mr. and Mrs. Bob Henderson. The bride elect is a 1974 graduate of Muleshoe High School. The groom is a 1973 graduate of Muleshoe High School. He is presently employed by the Mashed "OY" Land and Cattle Company. The couple plan an August twenty-third wedding in the First United Methodist Church of Muleshoe at 7:00 in the evening.

Bula News

Special guest in the home of Mr. and Mrs. V.C. Weaver first of this week were their grandson, Bob Huffman, from Med-ellin, Columbia, South America. Bob had been visiting with his mother and husband and younger brother Mr. and Mrs. Gene Brannon of San Antonio. His trip here was very short as he was making it a business trip along with a visit. He works for a hard wood lumber firm in South America.

Superintendent James Sinclair has been in Austin part of this week attending to school business. He was accompanied by his wife Ann and children Joel and Kelly. On their return home they will come back by Brownwood, where Joel will play in the east-west all star basketball game, to be played this weekend.

Others going to Brownwood for the ball game were coach Pat Risinger and wife Joyce and small daughter Christi and also Mr. and Mrs. Tom Newton of Lubbock.

Mr. and Mrs. J.C. Withrow and children Jackie, Carla, Jeff and Jarrod returned late Tuesday evening from a few days rest at Red River.

Attending the singing Sunday afternoon at the Shallowater Church of Christ were Mr. and Mrs. Gene Bryan and Mr. and Mrs. J.D. Rowland. They really enjoyed the feast of good singing.

Dennis Quiram, Jr. son of Mrs. Dennis Quiram, has returned home from Cleveland, Minn. where he has been for the past two years with an uncle and going to school there.

Mr. and Mrs. E.O. Battles attended the funeral Tuesday in Dimmitt for her aunt Mrs. Perdie Beck. The funeral was held at 2:30 p.m. in the First Baptist Church.

Mr. and Mrs. H.E. Tiller from Truth or Consequences, N.M., spent from Thursday until Sunday visiting in the home of their son the Dewitt Tiller family.

Mr. and Mrs. John Latham accompanied by Mr. and Mrs. L.C. Jackson of Littlefield, attended the Junior rodeo at Rosevelt, Saturday night. The Lathams' grandsons Chris and Cliff DeSautell of Slaton participated in the rodeo.

Mr. and Mrs. Eddie Riley entertained several young people of the baptist church with a wunner roast with all the trimmings Tuesday evening, followed by playing games. Young people attending were Doug, Dennis and Keith McCain, Timmy Cannon, Cliff DeSautell, Ida and Oralia Davila, Elnora Peacock, Janice Tiller and Bob Stone, methodist minister.

Mr. and Mrs. Tom Bogard say that their daughter and husband, Mr. and Mrs. Glen Gaston received around 75 anniversary cards from their friends around this area. It was their 25 wedding anniversary. These really did help the moral for Mrs. Gaston, since she was having some physical problems. She has been at the Mayo Clinic in Rochester, Minn. for a week for test and x-rays and is to have hip surgery this Friday July 19, there at the Rochester Methodist Hospital. We hope real good luck for her.

Friends of years past, Mr. and Mrs. Hugh Riley of Tulla vis-

The Consumer Alert

by John L. Hill
Attorney General

AUSTIN--The need for insurance is a fact of life for most Texans. You buy it, and then hope you'll never need to use it. And, at some point, most of us worry about whether we're adequately insured. This worry could make some people easy marks for fraudulent or deceptive insurance sales practices. Fortunately, this sort of thing is rare, not only because most insurance companies are reputable, but also because the industry is regulated by the State Board of Insurance. The Board of Insurance works with the Attorney General's Insurance, Banking and Securities Division to see that any licensed insurance companies engaged in illegal activities are stopped. Prior to passage of the Deceptive Trade Practices-Consumer Protection Act in 1973, however, the insurance industry was exempt from regulation for misleading or deceptive trade practices, although individual consumers could sue a company for fraud. Now, under the new law, the Insurance Board can certify

So, the company offering "special services" to such drivers was charging high prices merely to take care of the necessary paperwork. Another case recently settled

by our Consumer Protection Division arose from complaints that an automobile club represented to migrant workers that, in addition to such things as towing and tire-changing services it provided insurance coverage that would protect them in all states, an important selling point for transient workers. Consumers who signed up later found that they had no insurance coverage at all and that they were paying extremely high rates for "club cases of deceptive trade practices in the industry for suit by the Attorney General's Consumer Protection Division. Recently, in the first case to be certified for suit under the new law, our Consumer Protection Division obtained a temporary injunction against a company that specialized in selling insurance and other services to persons whose driver's licenses had been suspended. The company implied, through official-looking letters, that it was especially expert in obtaining insurance for such drivers and that it could get licenses restored in a shorter waiting time than usual. The trial court found that the company was selling services that any individual could perform for himself. To get a driver's license restored, a person must supply the Tex-

ABOUT YOUR HOME

By April Rhodes

Be sure to take a well-equipped first aid kit along on your vacation. Its contents will depend on whether you're going camping or traveling in your car.

Did you know that equal parts of turpentine and ammonia will remove paint from clothing even if the paint has hardened?

Family tired of mashed potatoes? Try cooking and mashing potatoes and carrots together. The slight orange color will be tempting.

Make pillows from leftover colorful material. Stuff with clean wornout stockings.

Little girls, up to kindergarten age, like to play with mom's disc card pocket-book. It will keep their "little treasures" off the floor.

TOP PERSONALITIES ENGAGE FOR MEET JESUS CRUSADE

Evangelist Cecil Todd From Joplin, Missouri

Gospel Singer Sue Ellen Chenault San Antonio, Texas

Choir Director Roy Lee Jones Sugarland, Texas

COME LET'S WORK TOGETHER FOR JESUS

as Department of Public Safety with proof that he is insured and wait the required period of time. For drivers in this category, the procedure usually involves paying higher premiums for insurance in a "high-risk" group, a service that can be arranged through any insurance agent services." Insurance fraud or misrepresentation in any form is damaging to reputable companies as well as to consumers. That's why the State Board of Insurance and our Consumer Protection attorneys say it's important to check carefully before doing business with a company you're unfamiliar with or one which makes exorbitant promises. Consumers can obtain a list of companies licensed to sell insurance in the State from the Insurance Board, and they can check with the Board or our Consumer Protection Division to learn if complaints have been filed about a particular company.

National Cowboy Cook-off

Plans for the Second Annual International Cowboy Campfire Cook-Off are beginning to firm up, Max Polen, chairman of the Abilene Convention & Visitors Bureau Cook-Off committee, said today. All three judges have definitely been secured for the annual event, scheduled for Labor Day Weekend, August 31 through September 2, at Old Abilene Town on Interstate 20. Gary Luskey, President of Luskey's Western Stores, Acey Lockhart, president of Hydro-Tex Oil Co., based in Fort Worth and Mrs. Ruth M. Malone the food editor for Holiday Inns of America, have been confirmed as Cook-Off judges. Mrs. Malone is also the food editor of the Holiday Inn Magazine and is known as "The Cook Book Lady" from coast to coast. Some of the cook books to her credit are "The Dogpatch Cook Book", "Swiss Holiday Recipes", and "Where to Eat in the Ozarks and How It's Cooked." She was selected by the Smithsonian Institution to contribute an article for the 1970 Festival of American Folklife program book.

The Cowboy Campfire Cook-Off was conceived to preserve the historic tradition and color surrounding the cattle era of the old west. Polen said, "While trail drives are a thing of the past, ranch cooks and a few remaining trail cooks continue to feed the cowboys that bring beef to the world's tables. We are trying to perpetuate the tradition of the hearty, wholesome, outdoor meal in this cooking competition." The committee is planning a multitude of events around the actual competition which this year will include three categories: Pro-Trail Cook, Campfire

Polen emphasized that all of this open to the public free of charge and said, "We want this to be an Abilene function and not just a Chamber or Bureau activity. We are encouraging the entire community to be involved in this event so that the visitors to our town will really enjoy their visit to this year's Cook-Off." Additional information, rules and entry blanks are available at the Abilene Convention & Visitors Bureau Office, 341 Hickory in Abilene or may be obtained by writing Cowboy Campfire Cook-Off, P.O. Box 2281, Abilene, Texas 79604.

VISITORS IN MULESHOE . . . Carlos Perez, radio announcer of Lubbock; Carlos Guzman, a singer; Camello Riens; Alissa Favila and Noe Anzaldia of the KMUL Radio station are shown when the visitors stopped at the radio station in Muleshoe.

Unfinished
A man had been talking for hours about himself and his achievements. "I'm a self-made man, that's what I am--a self-made man," he said. "You knocked off work too soon" came a quiet voice from the corner.

Too Much
A widely traveled sportsman was boring guests with a series of long talks about his exploits. "While I was wandering through this deserted village I spotted a leopard," he said. "That does it," said one of his listeners. "I always knew he was a liar. Leopards come that way."

LOUISA'S LETTER

Dear Louisa,
I am married and have four children, we lived in the city and had a happy home, but we decided we wanted to come back to our home town where my husband and I were born and raised and be close to our relatives. We have been back in our home town now for two years, sold our house in the city and bought a home here. My husband and I both have been so unhappy here and want to go back to the city as some certain people here have made our lives so miserable and caused trouble between me and my husband. There's only one reason we don't pick up and go back to the city and that is our four children love the country and would become heart broken if we even suggested going back to the city. I really don't know what would be the right move to make. Please give me some advice as soon as possible. N.F.--Va.

Answer:
Yours is a hard decision to make. But many fine children are brought up in cities. It depends to a great extent on what kind of friends they have and the kind of parents they have. But nothing is worse for your family than the trouble brought on by other people between you and your husband. Relatives can be a wonderful help and comfort in times of trouble but some of them do turn out to be mischief makers. Of course your trouble may not be from relatives but from gossips or women who have roving eyes. If it is a case of saving your marriage I think it would be wise to move. Louisa. Address letters: Louisa, Box 532, Orangeburg, S.C. 29115

ONE MAN'S OPINION TAKES TOP HONORS AT IOWA SHOW... Jim Pearson and One Man's Opinion are shown receiving their award for Open Cutting Competition at the recent International Championship Show in Des Moines, Iowa. The pair also took top honors in the championship western pleasure stakes class. One Man's Opinion is owned by Pearson and Bullock of Muleshoe.

BREAKERLESS IGNITION CUT MAINTENANCE FOR Lester Merrill

Lester Merrill has stopped replacing points on his fourteen pump engines and his sparkplugs last at least four times longer. Lester says, "My breakerless ignition systems have eliminated one of the biggest problems that I have with my irrigation engines."

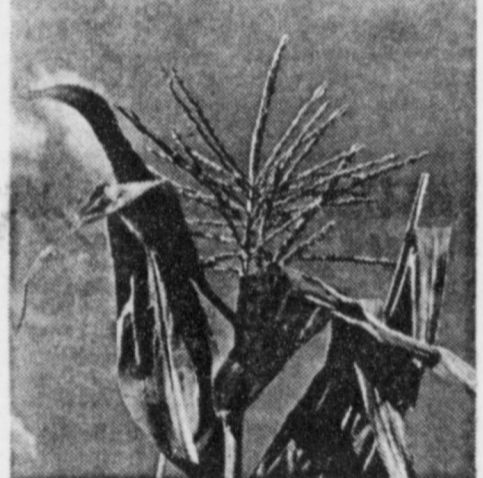

Stop by Cummins Rio Grande and ask to see the Western Controls breakerless ignition system. Don't waste your time and money changing points and plugs again. Talk to Lester. His experience speaks for itself.

Corn Borer alert!

southwestern corn borers are threatening your corn crop

Stop southwestern corn borers before they can cause profit-robbing damage to your corn fields. Use dependable, economical SEVIMOL® 4 carbaryl insecticide... a free-flowing liquid blend of molasses and SEVIN featuring simple measurement and no pre-mixing. It's ideal for ground or air application.

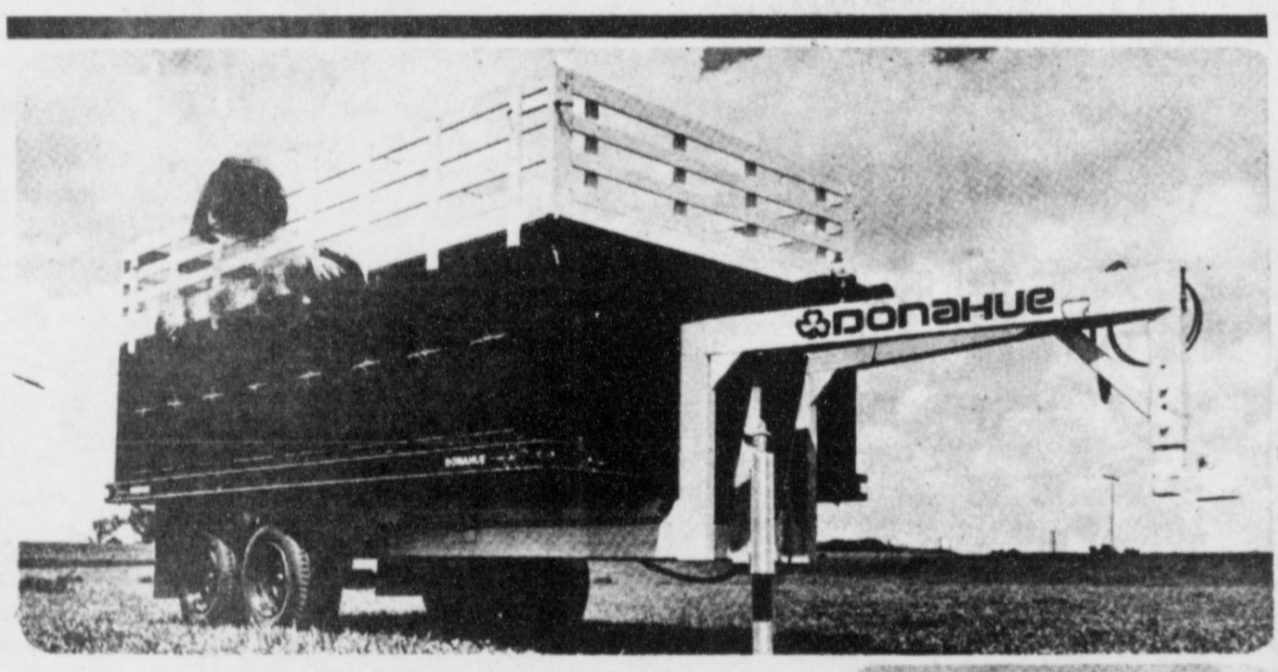

SEVIN carbaryl is biodegradable, and compared with other agricultural insecticides it ranks low in toxicity to people, farm animals, birds and fish. Chances of illegal residues occurring on adjacent crops are less with broadly registered SEVIN carbaryl than with insecticides registered on fewer crops. See bee caution on label. SEVIMOL 4 should be your choice. It lets you get tough on southwestern corn borers... and get tough sensibly.

STOP! All pesticides can be harmful to health and the environment if mis-used. Read the label carefully and use only as directed.

SEVIMOL® 4

The Donahue gooseneck... All the advantages of a big truck plus a lot more!

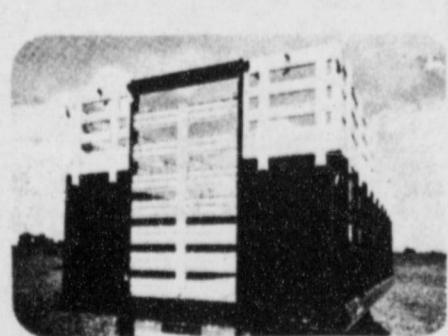

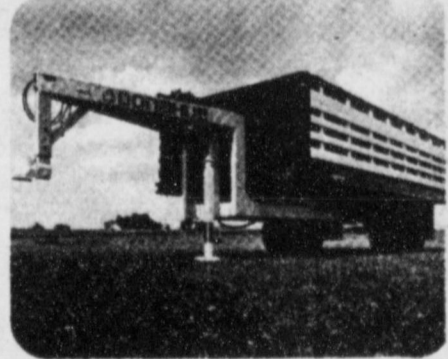

Here's real capacity for hauling either livestock or grain in one versatile unit. And, it's designed for easy hookup to your present pickup and farm tractor. Rugged, heavy-duty construction features high-tensile steel sides, horizontally corrugated for extra strength. Standard flooring is 2" x 6" tongue-and-groove lumber. (Steel flooring optional.) Heavy steel cross beams are built into the front and rear for added durability. Rectangular steel stakes fit snugly into reinforced stake pockets.

Capacity is 300 bushels of grain. With fold-down stock racks, you can switch quickly from hauling livestock to hauling grain. 40-inch sides are standard, complete with vent sides and double deck rail.

When the going gets tough, just hook a tractor on your Donahue grain carrier and go on through...even fully loaded! Helps you get the job done even under the worst field conditions.

One-piece end gate on stock carrier operates quickly and smoothly in welded-steel frame.

GENERAL REVENUE SHARING

General Revenue Sharing provides federal funds directly to local and state governments. Your government must publish this report advising you how these funds have been used or obligated during the year from July 1, 1973, thru June 30, 1974. This is to inform you of your government's priorities and to encourage your participation in decisions on how future funds should be spent.

CATEGORIES (A)	ACTUAL EXPENDITURES	
	CAPITAL (B)	OPERATING/ MAINTENANCE (C)
1. PUBLIC SAFETY	\$ 3695.00	\$

Cotton Wasties Cure For Oil Slicks

LUBBOCK -- Cotton wasties are a drag on the market. Oil spills are a plague to an industrial society. Now it appears that, combined, a new cure for the oil spills could

provide a good market for the wasties.

Cotton wasties are the lowest market grade of the fiber, selling for about a third of a good grade. But these short staple, weak, spotted fibers criss-crossed over an oil slick have a peculiarly superb quality for forming capillary bridges which pick up the oil and hold it, according to a research team

at Texas Tech University.

The three-man team includes two chemical engineers and a textile engineer who began their research with the support of Cotton, Incorporated, and now have an \$89,000 grant from the U. S. Coast Guard to pursue their studies.

They have discovered that cotton can pick up 50 times its own weight in oil and still stay afloat without any apparent loss because of wave action. This, they say, is far superior to any other system used to pick up oil slicks.

The trick, according to the team, is to spread a very fine

gauze-like layer over the oil slick and then sweep up the entire mass. They recommend a layer seven-thousandths of a foot thick, the width of "a grazer's eyebrow."

The team includes Dr. George F. Meenaghan, chairman of the Department of Chemical Engineering, Dr. James E. Halligan, also a chemical engineer, and A.A. Ball, head of fabric structures at the Texas Tech University Textile Research Center.

The objective of their research is to develop a total system for the cleanup of oil spills with important unique advantages.

There is speed in the process they are proposing, and this is important because oil slicks spread rapidly. A 1,000 barrel spill can cover three-million square yards within 24 hours. By the team's process, the cotton would be shipped to the spill area in Coast Guard helicopters--several compressed 500-pound bales being easily carried aboard. A blower mounted on the helicopter first would ring the spill with a hair-thin layer of the cotton and then spread the entire surface with the fibers.

The next step would be to sweep up the mass of cotton with the oil clinging to it, and the final step would be to dispose of the waste material, possibly by incineration. The oil could be wrung from the cotton or the cotton-oil mix disposed of in combination.

For the past 12 months under the sponsorship of Cotton, Incorporated -- the research and marketing company of America's cotton growers -- the researcher team worked with their ideas, using a swimming pool for tests. They found that after six weeks of floating in sea water, neither the dry nor the oil-soaked cotton wasties displayed any tendency to sink. This has the advantage of allowing the slick to be contained as fast as helicopters can reach it, allowing more time for a

surface vessel to arrive to pick it up.

"For any material to be considered as the working medium of an oil cleanup system it must be efficient as a sorbent, economical, readily available, easily dispersed and recovered, and ecologically safe in application and disposal," Meenaghan said.

"Cotton wasties appear to have all features," he said. Compared to synthetic materials now used to oil slick cleanups, he said, cotton wasties are anywhere from 15 to 250 per cent better in sorption rates.

He explained that the process involves sorption and not absorption because the oil is not soaked into the fiber but held between fibers.

"The supply of cotton wasties can be estimated at about 224,000 bales per year," he said, "and this quantity of wasties would have the capacity for holding approximately 750 million gallons of oil."

Because 10,000 major and minor spills occur annually in the navigable waters of the United States, and represent some 15 million gallons of oil being discharged, Meenaghan said, there is an ample supply of usable cotton. Wasties have no strong market, he said, and so this new use could create a valuable use for the low grade. Work by the team this summer

will be devoted to building a tank to test dispersal, retrieval and disposal of oil slicks.

Because the cotton has the capacity to contain the oil slick and keep it afloat, the pickup system the team is developing would likely take the form of a sweep angled out from a ship and pulling the mass onto the ship mechanically at a rate of about 1,000 gallons an hour. The team is currently looking at incineration as the most practical method of disposal. Cotton is almost entirely cellulose and is biodegradable, and

should provide no impact on the environment, team members said.

If the energy crisis dictates that the oil be recovered, this could be done, they said, but there would be no need to recover the cotton because it is not economically justifiable.

"One of the beauties of the systems we are proposing," Halligan said, "is that it does not require the development of new systems but only the modification of existing technological capabilities to a new purpose."

If experiments at Texas Tech are successful, he said, the results will be turned over to the Coast Guard for application on a trail basis in the real situation of an accidental oil spill.

GOVERNMENT BUYS MEAT

The government will buy up to \$100 million worth of beef and pork for school lunch programs this summer in an attempt to aid the depressed cattle and hog industry.

Screwworm Infestation Reported On Increase

AUSTIN--There were 590 confirmed screwworm infestations in Texas during May, an increase of 414 over the previous month, Agriculture Commissioner John C. White reported recently.

Most of the cases were in South Texas, though smaller numbers were reported in the Coastal Bend and the Hill Country.

Webb County reported 81 cases, the highest in the state. Nueces and Aransas were the only South Texas counties without a confirmed case in May.

The U.S. Department of Agriculture's Screwworm Eradication Program in Mission estimated that 75 percent of the 8,913 screwworm cases in Texas last year were in South Texas. Eighty to 90 percent of these were from tick-redded bites in the ears of cattle.

According to entomologists, the tick is already appearing in extraordinarily large numbers and heavier infestations are expected in

July and August.

Ticks feed on the ears of large animals and drop to the ground, leaving a large wound ready for the screwworm fly. The best protection to slow or stop tick and screwworm injury is to spray or dip regularly. Smears applied directly to the ears are also helpful.

Female screwworm flies deposit their eggs on the edges of wounds. Emerging larvae enter the wound to feed on live flesh, often creating illness and, in the case of cattle, lowering beef quality.

Sterile screwworm flies are released in the area of known infestations. The female screwworm fly mates only once in her short lifetime. If she mates with a sterile male, any eggs she produces will not hatch, thus ending the life cycle.

White recommended that cattle owners examine their cattle more closely. He emphasized the importance

of controlling the pest for health purposes and to maintain the high quality of Texas beef.

Personnel of the Screwworm Eradication Program urged that samples from the center of every larvae-infected wound be submitted to their headquarters, P.O. Box 969, Mission, Tex. 78572.

Larvae should be removed from the wound and killed. Those dropped on the ground alive pupate and continue their life cycle, infesting new animals within three weeks.

BIBLE VERSE

"I have fought long and hard for my Lord, and through it all I have kept true to him. And now the time has come for me to stop fighting and rest."

1. Who is the author of the above declaration?
2. To whom was he writing?
3. Where was he at this time?

Answers to Bible Verse

1. Paul the Apostle.
2. To Timothy, a young preacher.
3. In prison in the city of Rome.

On Wall Street
By Bob Hill
Lentz, Newton & Co.

Weather Experts Concerned

Weather experts are deeply concerned over the possibility that the mild heat wave the world has been enjoying over the past 70 years will soon come to an end. Now temperatures seem to be retreating to slightly lower levels. Some meteorologists say this is causing shifts in rainfall, creating droughts and floods in regions where huge populations have sprung up in the last century. Very small changes in temperature (less than 1% over 20 years) can cause sharp changes in rainfall around the world. In India, before 1900, severe droughts occurred about every fourth year. As the earth warmed throughout this century, the monsoon rains of India failed an average of once every 18 years, vastly improving India's ability to feed its rapidly growing population.

The period 1931 to 1960 is defined by the experts as normal, yet, with its high temperatures, it was the most abnormal period in the last 1,000 years.

Changing climate in other parts of the world has already caused serious food problems. A severe drought has persisted in North Central Africa for

six years. The edge of the Sahara Desert is moving southward at a rate of 30 miles per year. Famine has been the result. A drought has struck the Great Plains of the U.S. and Canada like clockwork every 20 years since the Civil War. It is now overdue. The Dust Bowl days in the 1930's was the result of this cycle. Another long dry spell came to the Southwestern U.S. during the early 1950's. If the cycle holds, another severe drought will hit the Plains states.

Some scientist believe droughts are direct results of periods of reduced sunspot activity on the sun's surface. Recently solar activity has stepped up and this may be responsible for the temporary delay in a severe drought for the U.S., according to those experts who subscribe to the sunspot theory.

Rainfall shortages in the U.S. and Canada are of special significance to the world because North America supplies 10 times more grain for worldwide consumption than does any other continent. In fact, Australia is the only other continent that is a net exporter of grain.

Truck Owners Warned

Owners of certain trucks, truck-tractors and buses that use the public highways are liable for federal highway use tax and IRS has announced that notices of possible delinquency have been mailed to about 5,000 Texas truck and bus owners.

The tax applies to trucks weighing 13,000 pounds or more, truck-tractors of 5,000 pounds or more, and buses that use the public highways. Bus tax is figured on gross weight starting at 26,000 pounds. For trucks, the amount of tax depends on the number of axles and weight of the vehicles.

The nation's tax collectors matched their highway use tax records with state truck registration records to come up with the listing of potential nonfilers. The return is due by the end of the next month after a truck is driven on a public highway. The mailing is the first stage

of a nationwide compliance program, the Internal Revenue Service says. In a few days, the names of truck owners who do not respond to the notice will be referred to district offices. Truck owners will then be personally contacted to clarify the tax status of the vehicles in question.

According to the federal tax agency, a person who receives a notice but is not liable for the tax should provide the information requested in the notice and return it to IRS. Truck owners who recognize that they are delinquent should not wait to be contacted, but should file a return immediately to avoid additional penalties and interest, IRS says. IRS Publication 349, "Federal Use Tax on Trucks, Truck-tractors and Buses," furnishes detailed information on the subject. It is available free at IRS offices.

A DAILY INCIDENT!

Hardly a day passes without the newspapers reporting an automobile accident. Lives are lost and bodies maimed due to careless driving on our streets and highways.

Another daily incident which the newspapers often do not report, and to which others are indifferent, is the ruining of lives and character in the wretched, uneducated, and poverty-ridden parts of the great cities in our land. There are those who despair of ever getting out of their situation and so despondency sets in and a lack of desire to strive for worthy goals enters the spirit.

A loving God would have us aware of these whose lives, self-respect and character could be saved — if we were interested enough.

God often impresses the needs of His children upon those who attend His church. It is His will that we should show forth the love of God for mankind by helping all who are suffering.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Cattle Grub Disease Control Measures Urged

Cattlemen who are faced with grub infestations in their stock ought to be considering control measures now, according to County Extension Agent Spencer Tanksley.

In the High Plains region, says Tanksley, hell flies have laid their eggs on cattle and the grub larvae have penetrated the skin, beginning their migration through the body. Since these larvae are more effectively controlled when they are small, cattlemen should be stepping up their treatments now.

Cattle grubs damage the animals in a number of ways, Tanksley says. Cattle infested with grubs may produce less milk which in turn results in less weight gain of calves. The affected animals are more restless and excitable, generally causing a breakdown in the normal health of the cattle.

Grubs usually reach the back of the animal in late summer, fall or winter, forming breathing

holes through the skin and developing a "cyst" just under the skin. This penetration damages the hide and depreciates the value of the animal on the market.

Although cattle grubs can be killed after they reach the animal's back, Tanksley adds, earlier control is best, particularly in beef cattle.

Systemic insecticides, he recommends, which are administered as sprays, dips, pour-ons or feed or mineral additives, are distributed through the animal's body by the circulatory system, destroying the grubs by contact action.

Grubicides suggested for control are coumaphos (Co-Ral), crufomate (Ruelene), prolate, trichlorfon (Neuvon), famphur (Warbox), Fenthion (Tiguvon) and ronnel. All of these grubicides are animal systemics, Tanksley recommends.

Treating for grub control and drenching the animals should not be done on the same day, he emphasizes. Sick animals or those under stress should not be treated.

The label on treatment containers should be checked carefully before application for instructions on treating various cattle breeds. Precautions and directions should be adhered to strictly.

Farm-facts

A Weekly Report Of Agri-Business News

Compiled From Sources
Of The Texas Department of Agriculture
John C. White, Commissioner

THE BOLL WEEVIL was first found in Texas cotton crops in the early 1890s, and it has been found in every cotton crop since that time, despite efforts to eradicate or control it. At one time, the Texas legislature offered \$50,000 for an effective solution to the boll weevil problem, but a committee appointed to judge entries decided that no one who submitted a plan deserved the \$50,000. This year boll weevils have been reported in cotton fields from the Rio Grande Valley to North Central Texas; and heavy damage has been reported in Ellis, Delta, Dallas, Hunt, Collin and Kaufman Counties. Overwintered boll weevil populations have been noted in Fisher, Foard, Knox and Wilbarger Counties. Increased number of cotton fleahoppers also have been noted in all cotton-growing areas of the State. Bollworm damage was noted in the Valley and in Brazos and Burleson Counties.

RICE HARVEST is underway, and Texas Crop and Livestock Reporting Service says that prospects for a good crop are good to excellent. Harvest of most other crops is moving north. Sorghum is ripe for cutting from the Blacklands southward, but there are a few fields yet to be planted farther north. Peanut and soybean planting in the State is almost complete; and a good corn crop is in prospect across the State. Hot temperatures and dry weather is affecting pastures across Texas, and some ranchers in West Texas are reporting having to feed to keep livestock in their present condition. Prospects for third and fourth cuttings of hay have decreased because of the weather.

TEXAS FARMERS and ranchers are much better off than their predecessors in 1910-14, if that is any consolation. Texas Crop and Livestock Reporting Service reports that prices received by farmers and ranchers on June 15 were 448 per cent of the January, 1910-December, 1914 period, sometimes known as the base parity period. However, the all-crops index was three per cent below the month of May, 1974 and 36 per cent above a year ago. Food grain prices were up, and wheat and corn prices showed a slight increase over May prices. Hay prices remained about the same. Livestock and livestock product prices were down 12 per cent from May, 1974 and 28 per cent below a year ago. Livestock prices brought the all-farm products index of prices (crops, livestock, etc.) seven per cent below May prices and two per cent below a year ago.

THERE WERE 362,000 head of cattle and calves sold in Texas auction barns during May, which is 51 per cent below a year ago and 18 per cent below a month ago. May sheep sales were 19 per cent more than in April, reaching a total of 145,000 head. That is 37 per cent below a year ago. A total of 40,000 head of hogs were sold at auction in May, two per cent below the same time in 1973 and seven per cent below April, 1974. The number of hogs and pigs on Texas farms also decreased, falling to 930,000 head which is three per cent below 1973 and the lowest June 1 inventory for Texas since 1969. Hog farmers report they plan to farrow 58,000 sows from June through August and 53,000 during September, October, and November. That will be an increase of over four per cent over the same quarters in 1973.

COTTON TALKS

FROM PLAINS COTTON GROWERS, INC.

President and General Manager Dukes Wooters of Cotton Incorporated will be in Lubbock July 24 with seven of his top aids to tell the story of how cotton producer funds are being used in the continuous battle for bigger cotton markets and more cotton producer profits. The program will be presented at 7:30 p.m. at the South Park Inn, South Loop 289 and Indiana Avenue, Lubbock.

The story of the beltwide cotton producer company's operations is being brought to Lubbock area producers and their wives at the invitation of the High Plains District Women's Cotton Promotion Association, made up of 10 county women's cotton promotion clubs, and the women will provide cookies and snacks made of cottonseed flour as an added attraction.

"Only a few small groups of producers have had a chance to hear firsthand about the exciting things being done for cotton by CI," says Mrs. Wanda Ligon, bookkeeper for Claunch Gila at Bula and chairman of the district women's group, "and we want all producers to know how their money is being used to enhance the business of producing cotton."

Cotton Incorporated is the producer research and market development company supported by dollar-a-bale grower contributions. An average 98 per cent of all U.S. producers help to provide CI funding on an annual basis.

All area cotton producers and their wives are invited to the program and officials of the women's cotton promotion group are expecting some 500 to 600 people.

Crude Oil Facts Now Available

DALLAS--Declining Texas crude oil production and the increased drilling stimulated by higher prices are noted in Texas Mid-Continent & Gas Association's "74 Facts About Texas Oil and Gas," published this week for free public distribution.

The leaflet groups significant statistics and historical facts about the state's major industry under eight categories--general, offshore, drilling, production, refining, processing, employment, economics and taxation.

The Association's annual "Facts" publication has for many years served as a handy industry reference for wide segments of the Texas public, ranging from government officials to college and high school students.

In commenting on the Texas energy scene, "74 Facts" notes that early in 1974 Texas began its third year of all-out oil production and that of the state's eco-bing affected by two significant trends.

These are listed as a slow decline in daily oil production because of the strain placed on older fields in trying to maintain high production levels, and a pickup in oil wildcatting which was being stimulated by higher prices paid producers for newly discovered oil and additional oil recovered from existing fields through modern recovery techniques.

Copies of "74 Facts About Texas Oil and Gas" are available to the public free on request to Texas Mid-Continent Oil & Gas Assn., 1341 W. Mockingbird Lane, Suite 1111-E, Dallas 75247.

of CI's overall program by Wooters, there will be individual presentations on agricultural research, economic research and development, Textile research and development, marketing and advertising.

"There is no reconciling the wide variations in cotton acreage figures being bandied about recently," says Donald A. Johnson Executive Vice President of

WRECK INVOLVES TWO VEHICLES . . . Pictured above is the Worley Mills truck which was involved in the July 19 mishap three miles east of Clovis which claimed the life of one and seriously injured another.

Plains Cotton Growers, Inc., "which points up the fact that there just isn't enough solid information available at this stage of the game to make firm estimates."

The joint PCG-Lubbock Cotton Exchange Estimates Committee met July 9 and estimated there were at that time 1,964,200 acres of "standing" cotton in the 25 PCG counties surrounding Lubbock. But with its announcement of this figure the Committee noted that farmer acreage reports to county offices of the Agricultural Stabilization and Conservation Service, the ultimate source of final acreage figures, were not far enough along to promote much confidence in the estimate's accuracy.

Potato Producers Advised Closing Proper Steps

Potato production is moving into last stages before harvest across the High Plains and producers would do well to take proper steps in closing out their crop, advises an area vegetable specialist.

Different varieties of potatoes demand different husbandry practices, says Dr. Roland Roberts of the Texas Agricultural Extension Service. Tuber maturity, irrigation, vine killing and soil nitrogen level at harvest time all influence quality of the various types of potatoes grown in West Texas.

"These factors are important to the consumer," Roberts explains, "because they determine the potato's baking and frying quality, skin development and uniformity of size and shape."

He says that growers are working overtime during final production stages to put a high-quality potato on the consumer dining table, but change in the weather during the latter days before harvest could reduce that quality.

Roberts reports that early potatoes grown on the area's sandy loam soils appear to have a nice finish and good skin development. Continuing dry weather, he says, would enable growers to control soil moisture near harvest and produce more mature potatoes.

"The red varieties, Norland and Red T. Coles, are usually

harvested before the plant tops are fully mature," he explains. "The immature tubers of these varieties skin excessively if they are dug too soon after the tops are killed. On the other hand, if reds are left in the soil for more than seven to ten days after the water is cut and the vines killed, they tend to lose their bright red color and gloss as a consequence of exposure to high soil temperature."

Early strains of Norgold Russet as raised in the Muleshoe area mature rapidly during the hot days of early summer, the specialist says. Norgolds can tolerate being left in the soil a little longer than the reds after the tops are killed. When left too long, the tubers that set near the soil surface tend to develop greening and bitterness if light reaches them. They also become more susceptible to injury from white grubs and wireworms, Roberts warns. It is unwise to leave them in the soil beyond ten to fourteen days after tops are killed.

A common situation with all varieties is that tubers are dug

before the skin is firmly set, he adds. The skinning that results does not hurt the internal quality of the tuber, but the buyer is left with an unfavorable impression. The best indicator of plant maturity is gradual yellowing of the lower leaves and thickening of the tuber skin.

"For best skin development it is desirable to keep the soil as cool as possible right up to harvest," he advises. "Optimum temperature for development of netting or resetting is 75 to 80 degrees. Higher soil temperatures, excessive soil nitrogen, excessive potash and low soil moisture inhibit resetting of the skin."

Roberts recommends applying the last irrigation as close to harvest as possible to keep the soil cool. Those producers with clay soils must wait longer from last irrigation to harvest.

The specialist explains that potato vines are usually killed with mechanical beaters or chemical desiccants to facilitate harvest of early crops. Growers who kill the vines mechanically, he says, should take care to set the flails or blades so that they clear the soil surface. Otherwise, tubers near the surface will be uncovered

and bruised. "Chemical vine killing is becoming more popular because tubers suffer less mechanical damage, more acres per day can be killed and the tubers run through the combine easier," Roberts says. "The chemicals should not be applied dur-

ing the hottest part of the day, but rather early in the morning or late in the evening. "The freshly dug West Texas potato is a welcomed relief for the consumer who has been faced with the rapidly declining quality of winter stored potatoes," he concludes.
