## First Democratic Primary Election Saturday

The first Democratic Primary election will begin Saturday, July 28, at 7 o'clock and close in the evening at 7. Voting in Slaton will be at the usual places in the city hall.

The ballot carries 34 state candidates and an average of 23 local candidates. The number of local candidates varies according to the precinct candidates.

Interest in the election has been very quiet, much quieter than in other years. This week interest has picked up considerably and prospects are for a good turnout Saturday. Last minute appeals of candidates appear in The Slatonite this week as well as in other means of advertising.

There is one feature of the primary ballot this year that is very unusual in that it carries three referendums on racial issues. They are:

1. For or against specific legislation exempting any child from compulsory attendance at integrat-

On another page of this issue of the Slatonite is a sample ballot on Saturday's election. This is not to be taken to the polls but it is suggested that it be studied in order that all voters may have in mind exactly how they want to cast their vote.

ed schools attended by white persons and negroes.

2. For or against specific legislation perfecting the state laws against intermarriage between white persons and negroes.

3. For or against the use of Interposition to halt illegal Federal encroachment.

The third statement is indirectly concerned with the race question, but goes much further than that, in that other issues are involved, mostly concerning States Rights.

The outcome of these three questions will determine the policy of the Texas Democratic Party in these matters.

J. H. Brewer is presiding judge of box 26. Voting in this box will be in the northwest corner of the city hall.

Charles Whalen will preside over the voting in box 27 which is in the Chamber of Commerce office in the southeast corner of the city hall.

### Girls' Summer Program Closes With Games and Presenting of Awards

Thursday, July 26, was set as the final meeting of the Girls' Summer program with two basketball games scheduled and the awarding of numerous awards being made, according to information received from M. W. Kerr, director of the program, and Mrs. L. A. Reasoner, vice-president.

The younger girls were to begin their game at 8 p. m., followed by a game between the older girls and freshmen girls.

First, second and third prizes were to be presented for the best score in free throws in basketball and for ping pong. All members of the winning team received an award with two awards being presented to the girls who have the highest and next highest attendance record.

Awards also were presented for the best sportsmanship and best all-around athlete.

No admission was to be charged for the games, but a concession stand was open.

### Demo Precinct Conventions Are Set for Saturday

The Democratic Precinct Conventions will be held at the places of voting Saturday at 2:00 p. m.

The three Slaton precincts, Nos. 26, 27 and 28, will be at the city hall.

Precinct meetings will name delegates to the County Democratic Convention to be held on the following Saturday, August 4, and that convention will, in turn, name this county's delegates to the State Democratic Convention. The state meeting will be held September 11th.

### New Pastor at Presbyterian Church

Rev. Clarence N. Wylie and Mrs. Wylie will arrive in Slaton next Monday to accept the pastorate of the Presbyterian Church. He begins his duties August 1st and will preach his first sermon here Sunday, August 5th.

Rev. Wylie has served 7½ years as pastor in Canyon and 11½ years as pastor of the Presbyterian Church in Dalhart, Texas.

### Voters Urged to Polls Saturday By Jaycees

"Vote anyway you want to but Vote" is the Slogan that is being used by the Junior Jaycees this week in their effort to get all eligible voters to the polls Saturday.

Anyone needing transportation to and from the polls Saturday is asked to call 470 or 475 between the hours of one and closing of the polls at 7 and some member of the Jaycees will provide that transportation. Doc Crow Chevrolet Co. is headquarters for the Get Out The Vote drive. "It doesn't matter so much how you vote but be sure you vote" says Wilfred Kitten, president of the Junior Chamber.

## \$150,000 City Bond Election To Be Held August 4th For Improvements

The Slaton city commission has called an election on Saturday, August 4, for approval of five propositions totaling \$150,000. These would be 20 year tax bonds. The commission reports that there would be an increase in taxes of 9 per cent.

The \$150,000 is divided into five separate issues, each to be voted on separately:

- 1. \$38,000 for street improvement.

- 2. \$80,000 for improvement and addition to the water system.
- 3. \$5,000 for sewer improvement.
- 4. \$12,000 for garbage disposal equipment, and
- 5. \$15,000 for fire fighting equipment.

Included in these improvements are repairs of street paving and the city's part of paving twentieth street, a new 300,000 elevated storage tank, new water line and fire protection for the flats, a billing machine for the city office, new

garbage truck, and relief from the city's other expenses in order to get a new fire truck.

Voters can approve or disapprove all or part of the issues as they so desire. Voting will be at the usual places in the city hall. Phil Brewer will be the presiding judge.

### Let's Keep Our Beautiful Parks Clean, Says City Health Officer

"Let's everyone do our best to keep our city parks clean and healthy," said City Health Officer Dr. T. L. Talbert. This statement followed a report by Park Superintendent Willis that too many people were leaving their watermelon rinds scattered on the park grass.

Dr. Talbert explained that leaving watermelon rinds causes flies to gather at the park making it unsanitary and unhealthy for others that want to use the park. Mr. Willis states that there are plenty of disposal units in the city park for the people to use, if they will.

### Little League Wins One, Then Loses; Pony League Fails to Win in Tourney

The Little League and Pony League tournaments are over as far as Slaton is concerned, after entering, playing good games, but coming out on the small end of the score.

Slaton's Little League team clouted Wolforth 40-3 in their first game. Wednesday afternoon they met Northern Lubbock and lost 8-2.

Northern grabbed the lead with a six-run explosion in the initial inning, followed by two insurance runs in the second frame. Max Ybarra, Johnny Santiago, Tirzo Rodriguez, Joe Quirino, Luis Olmos and Frankie Tenayaque tallied in the big inning for the victors. Ybarra; Quirino, Olmos, Tenayaque and Casrre Rodriguez kept the attack alive with singles.

### TSCW Scholarship Awarded Miss Judy Thomas

Miss Judy Thomas, daughter of Mr. and Mrs. W. J. Thomas, received word this week that she had been awarded The Mary Gibbs Jones home economics scholarship at Texas State College for Women at Denton.

This scholarship amounts to \$100 and will be paid at the beginning of the fall and spring semester. She plans to major in home economics education.

Miss Thomas is a 1956 graduate of Slaton High School and was valedictorian of her graduating class with an average of 93.28.

### First Baptist Aim At High Attendance

With a good attendance at both the 7 a. m. and 8 p. m. services of the revival through the week, the membership of the Sunday School of the First Baptist Church is aiming at a high attendance for Sunday morning. "Visitors will be especially welcome Sunday," the pastor declared.

The Evangelist, Rev. Wayland Edwards, pastor of the Southeast Baptist Church, Lubbock, will bring his closing message at the eleven o'clock hour. At the evening hour the Church will administer the ordinance of baptism.

"We are counting on every class to have the best attendance in a long time," observed C. J. Rhoads, the Sunday School Superintendent.

LITTLE LEAGUE ALL STARS—Team representing Slaton in the Little League All Star Tournament is shown above. Boys and the team they have played on during the season are, left to right, back row: Travis Lancaster, Dodgers; Donald Wayne Crawford, Tigers; Robert Keys, Cardinals; Roger Cummings, Indians; Don Caldwell, Indians; Billy Ray Gregg, Indians; Sammy Ellis, Dodgers; and Val Wylie, manager; front row, Joe Loke, Giants; Charlie Curtis, Indians; Johnnie Mangum, Yankees; Larry Burk, Indians; Ronny Jones, Indians; Larry Talbert, Giants; and Winston Rainey, Tigers. L. A. "Doc" Reasoner, who was chosen as coach, was absent at the time the picture was made.

THIS IS THE RIG for the H. T. Swanner No. 1 well that is located only one mile southeast of Slaton. It is being drilled by contract by the Central Drilling Co. of Midland, who plan to go to 5,200 feet. W. M. and A. P. Fuller of Fort Worth are the owners. This is Slaton's nearest oil prospect.

## Oil Rig Goes Up Only One Mile From Slaton On Swanner Farm

The rig is already up and drilling has started on the H. T. Swanner No. 1, located only one mile from Slaton. This is the nearest well that this city has had. For the past three years the oil field from south of town has gradually been getting closer and closer, and now it looks like it is here. The outcome of this well will tell the story.

Oil crews already have moved into town until now housing is almost unavailable. Many just can't find living quarters here. This has put another strain on the already acute housing shortage.

The Swanner No. 1 is being drilled one mile southeast of Slaton in the extreme southeast corner of the county. Surface hole was made to 350 feet prior to setting the 5 1/2 inch casing.

The site spots 660 feet from north and east lines of Section 21, block 24, HE&WT survey. It is some six miles southwest of the Gertrude Wood field of Crosby county and about the same distance north of San Andres production in the Suniland field of Lynn county.

Five miles to the north, the Reaho Corp. was expecting to top Penn Reef at any time at its No. 1 Roscor Slides, Baer survey. Drilling continues below 10,000 feet.

### LET'S BUILD A BIGGER AND BETTER SLATON

(Guest Editorial)

We, the Junior Chamber of Commerce of Slaton, go on record as favoring the coming bond election in our city to be held August 4th. The city commission's letter to our organization and other groups outlining their plans and giving vital information concerning the city's finances is appreciated and we thank them for it.

Slaton is fortunate in having a good group of men on our city commission who are looking toward a better town. They have our support and they need the support of all of Slaton, wholeheartedly. Let's give them this help.

It is hoped and suggested that along with these improvements, the city commission, with the help of our citizens, will increase the city limits of our town. It is felt that this needs to be moved out to include the new colored school, the new high school and beyond, and out the Slaton-Lubbock highway. Renditions can easily be adjusted to conform with the city services available in each section.

We feel that this will make Slaton's chances better for housing development, create space for more industry which in turn would increase our population.

Let's build a bigger and better Slaton by working together.

—The Slaton Junior Chamber of Commerce

**VOTING INTELLIGENTLY IS CITIZENS' RESPONSIBILITY**

Too many citizens are inclined to show distaste when the word "politics" is mentioned. They have the idea that politics is dirty and they, as clean and upright citizens, will have nothing to do with it.

Politics is only as dirty as the people permit it to be. Webster defines politics as "the science and art of government." In practice, politics is government. The United States is a republic, governed by the elected representatives of the people. Ours is a government "of the people, by the people, for the people."

When citizens fail to participate in politics through the medium of the ballot box, they are leaving the field open to organized minorities acting as a political machine to capture elections.

Apathy and indifference by the voters breed abuses of the representative system. Apathetic citizens must share the blame when government becomes corrupt.

The apathy begins to make itself apparent when the time comes for citizens to qualify themselves as voters. Texas requires payment of a poll tax. Citizens may pay the \$1.50 tax from Oct. 1 through Jan. 31. Usually, only half of those eligible to qualify as voters pay their poll taxes.

The apathy shows itself again at the elections, when only a fraction of the qualified voters turn out to cast their ballots. Many important elections here have been decided by a comparative handful of voters.

When voters are so apathetic, why should they be shocked by poor government or corrupt government?

You can't achieve integrity through legislation. Integrity in government is achieved by electing honest, capable persons to public office. An honest man will conduct his office honestly. A capable man will give his constituents the kind of government to which they are entitled.

The voter has a twofold responsibility. He should make a diligent effort to inform himself to the best of his ability on the background, qualifications and character of the candidates seeking public office. He should inform himself on the merits and demerits of the issues to be voted on.

Then the citizen should go to his polling place and cast an intelligent vote. Casting an intelligent vote does not necessarily mean that the citizen votes for any one faction.

It means that he has informed himself well as to each candidate and issue, and votes according to his convictions for honest and capable candidates who hold views nearest his own.

Too many voters are prone to select candidates on the basis of prejudice or propaganda. Emotional votes are highly susceptible to deception by a demagogue. Reason, not emotion, should be the controlling factor in a voters decisions.

It is a civic duty for each citizen to inform himself on candidates and issues, then vote. To help citizens perform their duty is the objective of this special section.

**CAPITOL FACE-LIFT**

Though Europeans might regard it as a fairly new structure, the Capitol in Washington is venerable by United States standards. And whether or not the building is considered ancient, there is little question that it is more dilapidated than our legislative house ought to be. Lawmakers also find it rather cramped quarters in which to conduct the nation's multi-billion-dollar business.

A commission of architects has begun work, at the behest of Congress, on plans to remedy the situation by tearing out the Capitol's front wall and extending the portico. Some architects are unhappy about the proposed changes. One has spoken of the project as "a prize piece of architectural boondoggling."

Americans don't want the Capitol spoiled. But they will recognize the need for more space. If changes can be made in harmony with the present structure, good.

A politician's career is often affected by an accident of timing. Consider, for example, how much better Estes Kefauver's chances for the presidency would have been had he been able to toss his coonskin cap in the ring at the peak of the Davy Crockett fad.

Just as sure as the joy that comes with Christmas are the bills that come after!

**Rev. Edwin Gorom**  
 "We never had it so good" is a catch-phrase used to denote abundance and prosperity. We Americans are fortunate, indeed, that we might live in the land of opportunity and plenty.  
 But Americans sometimes have periods of adversity. This might strike us personally. Sometimes, disaster strikes our families. Occasionally, our entire nation is affected by adversity.  
 Whether prosperity or adversity, Solomon has a word for us:  
 "In the day of prosperity be joyful; but in the day of adversity consider..." (Ecclesiastes 7:12a)  
 In days of prosperity be joyful. Be happy. Try to be content. Give thanks to God for all you possess. Remember to give back to Him,

as "He has prospered you," in tithes and offerings. "Count your blessings."  
 But "in the day of adversity consider." When life gets hard, give serious thought to this shift in your situation. But don't give up your hope and faith in God. Go to Him often in prayer and meditation. Look back to your days of prosperity with thanksgiving and forward to better days with faith and trust. Remember:  
 "God also hath set the one over against the other, to the end that man should find nothing after him." (Ecclesiastes 7:14b).

**PRECIOUS NEEDLE**  
 Electrolysis is a safe permanent method of removing unwanted human warts, moles or hair. In the electrolysis process a high frequency electric current, transmitted through a platinum-iridium alloy needle finer than a human hair, is used to destroy the connection between the wart, mole or hair and the skin, thus causing it to die. The patient suffers no pain, although there may be a slight tingling sensation. The precious metal alloy is used for the needle because of its strength and corrosion-resistance.

**TOUGHNESS IN METALS**  
Many metals used today have to be tough enough to resist sudden shocks. One of the ways to judge toughness is by the ductility of a metal. Ordinary cast iron lacks ductility and therefore cannot be used where toughness is required. Ductile cast iron, developed by International Nickel, is one of the newest ductile engineering materials. It is four to twelve times tougher than ordinary cast iron and so ductile it can be bent and twisted without breaking.

**STAINLESS STEEL TRAILERS**  
Many new truck trailers are being fabricated of nickel-containing stainless steel for economical reasons. The use of a corrugated light gauge of this steel permits savings in weight with no sacrifice in structural strength, thus giving the trailer a greater carrying volume and payload. Also, this steel resists corrosion and never needs to be painted.

**JOHN WHITE**  
TEXAS  
COMMISSIONER OF AGRICULTURE  
FOR CONTINUING PROGRESS IN TEXAS' LARGEST INDUSTRY

## DUCK AND DOVE SHOOTING SETS

The Game and Fish Commission recommended that duck and goose seasons open simultaneously in Texas this fall and acknowledged a slight Federal Fish and Wildlife Service increase in the mourning dove season.

Meeting in Austin, the Commission implied an anticipated curb in waterfowl hunting this fall by stating a preference that if the Federal authorities do reduce shooting privileges that the season's length, rather than the bag limit of five and ten birds, be cut. Last year, the duck season was increased from sixty to seventy-five days. The goose season was kept at sixty days and did not open until fifteen days after the duck harvest began. The Commission asked that zero hour for ducks and geese be identical, with Friday, November 3, suggested as the preferable beginning date in Texas.

The Fish and Wildlife Service authorized continued zoning for Texas mourning dove hunting and permitted an additional five half days to be divided between the two zones which had forty-five days of shooting last fall.

The Commission also authorized

antelope harvests in both the Panhandle and West of the Pecos and voted the usual seasons for the various state areas which, through the Legislature, granted the Commission permission to set harvest regulations according to current conditions.

Public hunts to reduce surplus game on four demonstration-experimental wildlife management areas in key state regions were authorized, and antlerless deer hunting to reduce deer overpopulation in Hill Country areas was again sanctioned with the exception of Kerr County which was exempted by request of Commissioner Hal Peterson of Kerrville.

The Commission decided to keep the whitewing dove season in the Rio Grande Valley closed for another year and approved purchase of the two hundred acre Longoria tract at \$300 per acre as a nesting area to expedite the whitewing dove comeback.

Adopting its annual budget, the Commission recognized coastal sentiment by authorizing \$150,000 for repairs to Rollover Pass, connecting East Galveston Bay with the Gulf. Tentative sanction was given another \$300,000 for 1957-58. It reactivated the closing of Galveston Bay to oyster power dredges and ordered shell dredgers to begin belated conserving of fine shell.

A request by the city of Bowie in Montague County to close Amon Carter Lake to the use of nets and seines for taking fish was granted.

The Commission petitioned the Federal Fish and Wildlife Service to increase the limit of snow geese

from five per day and five in possession since overpopulation of this species in the coastal marshes is reducing feed supplies ordinarily available to the more desirable species.

One change in regulations for the twenty-eight county Panhandle bracket requires plugging of shotguns to a limit of three shells for hunting quail and wild turkey.

Mr. and Mrs. Bob Lemon, Susan and Bobby of Levelland spent Friday here with Mr. Lemon's parents, Mr. and Mrs. L. O. Lemon.

Mr. and Mrs. F. D. Bostick and Elizabeth attended the funeral of Mr. Bostick's brother-in-law, Ed Parks, in Desdemona Thursday.

### Bob Huser Attends Hybrid Sorghum Meeting Recently

Bob Huser, of Huser Hatchery, and local DeKalb Hybrid Sorghum dealer, attended a meeting at the DeKalb Sorghum Research farms near Lubbock last week. He heard a first hand report on sorghum seed given by Tom Roberts Jr., assistant to the general manager of the DeKalb Agricultural Association.

Mr. Roberts stated: "In the DeKalb hybrid sorghum you can expect the following: Seedling vigor; large, open loose heads; more insect resistant; drought tolerance is greater; higher yield per acre; and good standing ability." He stated that in South Texas the DeKalb hybrid sorghum has been harvested and the feeling toward it is very high. The 25 cooperating farmers with them showed a 21% increase in yield over standard varieties.

After attending this meeting Mr. Huser is enthusiastic about the hybrid sorghum variety. "We feel sure that the seed for 1957 will be somewhat better in uniformity; however, we don't think there will be enough DeKalb hybrid sorghum in the Slaton area. Up to date the fields look very promising," said Mr. Huser.

### Gilkerson, Brown Talk to Lions

Two candidates for county attorney spoke at the Lions Club Tuesday noon. Both talks were non-political. Bill Baker was in charge of the program and introduced the speakers.

Sam Brown talked on the need for another county court at law. At the present time the present court is sixteen months behind in the trying of cases, he said.

Geo. Gilkerson's talk was on his experiences as an FBI agent. This proved very interesting to all present.

J. S. Edwards Jr. will be in charge of next week's program.

### Riney Reunion Held Recently At Buffalo Gap State Park

Mr. and Mrs. J. J. Riney of Slaton attended a reunion of the descendants of the late B. F. Riney at the State Park at Buffalo Gap recently. This reunion has been held for the past 30 years on the second Sunday of July.

Relatives attended from Buffalo Gap, Merkel, Lubbock, Floydada, Midkiff and Slaton. Eighty-one were present.

Guests in the home of Mr. and Mrs. E. R. Burns last week were Mr. and Mrs. Jerome Burns and sons of San Angelo. Their week-end guests were Mr. and Mrs. G. A. Leverett of Hobbs N. Mex., Mr. and Mrs. D. G. Burns of Big Spring, Mr. and Mrs. J. L. Carothers and daughters, Carol and Jan, of Levelland, Mrs. H. E. Castevens and two sons of Ft. Worth. Mrs. Castevens and sons will spend the week here.

Mr. and Mrs. Grady Bradley and daughter, Kay, and Mr. and Mrs. Cecil Hobbs and daughter, Barbara, of Dallas spent Friday night here with Mr. and Mrs. T. A. Turner. They were en route to Dallas after vacationing in Colorado and New Mexico.

Ira D. Sexton of Sour Lake visited his brother, F. B. Sexton, and Mrs. Sexton last week.

Mrs. Mildred Lokey and Mrs. Ray Conner have been visiting the past five weeks in Missouri, Kentucky, Tennessee, and the Great Smokey Mountains region. Mrs. Conner returned home Monday while Mrs. Lokey stopped in Ft. Worth to visit for a few days with her son, Billy Lokey, and his family.

Mr. and Mrs. Hobert Trimpa and daughter, Dana, and Mr. and Mrs. Ed. Haddock and daughter, Ann, spent last week-end in Ruidoso.

Jimmy Seiderman of Amarillo is spending two weeks here with his grandparents, Mr. and Mrs. W. H. Seiderman.

Mr. and Mrs. E. L. Boggess and daughter, Brenda, of Lubbock visited in the home of Mr. and Mrs. Harmon Thompson Sunday.

### SEA TURTLES FACE CRISIS ALONG COAST

While a group of outdoor writers were observing night marine life in deep water, a giant green sea turtle moved laboriously into the spotlight illuminating the sparkling green water alongside their ship.

Somebody suggested trying to capture the giant reptile. "But they're mighty scarce," interposed the Director of Coastal Fisheries for the Game and Fish Commission, who was in charge of the detail.

Then, while the huge creature bobbed about in the quiet waves, the Director went on to explain that the green sea turtle, rated as the most valuable reptile, is facing extinction unless legislative protection is provided.

The green sea turtle is considered a table delicacy for both its meat and eggs. In 1890, according to Marine Biologist Terry Leary who specialized in this research, Texas produced commercially 83,000 pounds. Now the green sea turtle is a rarity on the coast.

Leary said the turtle will average about 120 pounds with a shell length of about 23 inches. Such a turtle would be about eight years old.

"The decline of the turtle fishery is mainly caused by the destruction of breeding grounds and overbreeding," said the Director. "The turtle lays its eggs in a shallow hole scooped in the sandy beaches. Our beaches are now heavily traveled and the turtles are often slain before the eggs are deposited. The eggs are gathered from the nests by man and often the young turtles are killed before they reach the water."

"Heavy fishing in the 1890's and 1900's killed off in any single year many times more turtles than were produced in any one year. Both turtle and the vulnerable eggs are unprotected in Texas."

"The American system is an experiment in the most demanding but most rewarding of all forms of government, namely self-government." —Life

### Farmers Entitled To Refund on Gas Used Since Jan. 1

Farmers are entitled to claim a refund of the Federal tax on all gasoline bought and used for farming during the 6-month period January 1 through June 30, 1956, C. H. Bates, extension farm management specialist reminds Texas producers.

Any owner, tenant, or farm operator who buys gasoline for use on a farm may file a claim, says Bates. A farmer may also request a refund of the tax on any gasoline used on his farm by a custom operator or a neighbor in connection with cultivating the soil, or raising or harvesting a crop.

Under the law enacted April 2, 1956, the amount claimable this year is 2 cents on each gallon of gasoline purchased and used on a farm for farming purposes during the first 6 months of 1956. In future years claims will be filed for a full 12-month period from July 1 through June 30.

Claims must be filed on Internal Revenue Service Form 2240. It may be obtained from county agents or District Directors of Internal Revenue. Date for filing for this year's refund is after June 30, but not later than October 1, 1956. The law does not permit payment of claims filed late.

Refund claims must not be made for gasoline used off the farm, according to the specialist, or for gasoline used for other than actual farming purposes, as described in Form 2240. This applies to gasoline used on the highway, for personal use such as mowing the lawn, or for processing, packaging, freezing, or canning operations. Sufficient records should be kept to enable the Internal Revenue Service to verify the accuracy of the refund claimed.

### Coal Needs Stimulated by Atomic Energy

Atomic energy, far from making coal obsolete or even presenting coal with a serious competitive problem, will stimulate coal consumption.

That is a premise of a recognized authority in this field, Representative Van Zandt of the Joint Committee on Atomic Energy, writing in Public Utilities Fortnightly.

According to Mr. Van Zandt, the 20 million tons of coal now consumed annually in this country's atomic energy program will be doubled within a mere five years. Coal will become an ever more important source of electricity. "This," Mr. Van Zandt said, "is another compelling reason why coal faces a future of sustained prosperity."

That last statement requires elaboration. For many years coal has not been prosperous—its profits have been close to non-existent. And coal—save for a small number of companies in especially favorable positions—is not prosperous today. It is true that there has been an encouraging increase in coal consumption, due in considerable part to heavy foreign demand. This has helped. But the plain fact is that coal must get a price for its product which meets the overhead costs and returns a reasonable margin of profit if it is to be able to make the needed heavy investment in facilities that expected future demand will require.

That is coal's big problem now—and it is a problem of national moment.

### JC's Have Fifteen Visitors at Meeting

President Wilfred Kitten reports that the Junior Chamber of Commerce were honored with 15 out-of-town visitors at their regular meeting Monday night. Jerry Sanders, State Vice-President of Lubbock, presided. He introduced the visiting JC's, 10 from Lubbock and five from Falls.

As each visitor was introduced he told what his organization had meant to him since he had been a member. Later those present divided into small groups and held a study of the teachings of their club.

### Church of Christ Revival to Begin August 5

J. D. Thomas of Abilene Christian College will assist the local Church of Christ in a series of revival meetings beginning August 5 and continuing through August 12. Woodrow Chandler of Greenville will lead the singing.

Vacation Bible school is to be held in connection with the morning and evening services on Monday through Friday from 9 to 11:30 a. m. The evening services are scheduled at 8 p. m. each evening.

Sermon topics of the week will include: "Your Memorial," "Fulfillment is Faith Expressed," "Propitiation," "What Saves Us?" "A Clean Heart," "Positive Divine Law," "Excuses," "Interpreting the Bible," "Spiritual Greatness" and "Crises of Decision."

### Brother of Local Woman Buried At Canadian

Funeral services for Clyde B. Murray 35, brother of Mrs. D. J. Bourn of Slaton, were held Friday, July 20, at First Methodist Church in Canadian with military services following.

Murray, a driver for the Transportation Company of Texas, left Lubbock about 5 p. m. on July 17, with a gasoline transport truck loaded with 130 octane gasoline for American Airlines, El Paso. While driving through Ysleta, about ten miles east of El Paso, his truck crashed into the rear of a parked car just after midnight. An explosion and fire resulted with three buildings, two apartment houses and one furniture store, being destroyed and several other business buildings damaged. It was reported that a truck, which had been parked, backed out in front of the gasoline truck and in swerving to miss the truck, Murray crashed into the parked car.

A native of Canadian, Murray graduated from Canadian High School and enlisted in the U. S. Army in 1932 and served for thirty-one months in New Guinea and the south Pacific. He was awarded the Purple Heart for wounds received in the New Guinea campaign.

Survivors besides Mrs. Bourn are four small children ages 8, 6, 5 and 3; his father, C. B. Murray of Canadian; one brother, W. C. Murray, of Canadian and a sister, Mrs. C. A. Hancock of Bridal Veil, Oregon.

### Local Boy Makes Excellent Show In Derby Race

Slatonites can be proud of the showing made by David Cross, Slaton's only entrant in the 9th Annual Soap Box Derby held Monday night in Lubbock, under the sponsorship of the Lubbock Exchange Club and Avalanche-Journal. Ninety-seven boys between the ages of 11 and 15 from 14 towns competed for local prizes, plus an all-expense trip to Akron, Ohio to race against 155 champions from other cities for \$15,000 in college scholarships. David, who was sponsored in the race by Marinell Portraits and was a first-time entrant, made the following record:

In the first heat, he took his gravity-powered midget racer down the 1,000-foot racetrack on U. S. Highway 87 in northeast Lubbock, in 35.7 seconds to win over his opponent Larry Donnithrone of Lubbock. David's time was identical to that of Mike Fowler, Lubbock, who went on to win the Class B Championship. In his second heat, David won over Chuck Perkins, Crosbyton. Due to the odd number of cars remaining in Class B, for the third heat the boys drew for places and David drew a "by". This automatically put him in a fourth round of heats with eight boys left to compete for the group championship. David's opponent was Byron Stovall of Lubbock. Stovall nosed out David in a heat timed at 35.7 seconds.

Winner of the Class A championship was Carroll Powell, Abertaylor, who also won over Mike Fowler, Class B Champion, for the Lubbock championship and the all-expense trip to Akron August 12. Fastest time for the derby was 35.0 seconds in an early heat won by Powell.

An estimated crowd of 18,000 people attended the Lubbock races. David's awards included a miniature trophy cup, a medal, a belt buckle, helmet, racing shirt and pair of jeans.

The skin of the starfish is covered with delicate skin gills through which it absorbs oxygen from the water. To protect them, short heavy spines project from the upper surface, as well as tiny claws or pincers.

### Community Clinic Report Continued In Sixth Article

(Editor's Note: This is the sixth in a series of seven articles dealing with the Community Clinic held May 28-29 at the Slaton High School Auditorium. This article deals with the classifications of Industrial Development and Agriculture and Livestock and was compiled by the West Texas Chamber of Commerce Community Services Department. Manager of the Department is Ralph E. Duncan who assisted local C of C directors in conducting the clinic. The report on the two classifications follows.)

"Little interest was indicated by your people for industrial development. However, may we urge that careful attention be given to the adoption of a well-defined program in this classification," Duncan related.

"Industrial planning is important in the life of each city or community if we are to have a well balanced work program. Since there is no simple solution or quick approach to the solution of our industrial problems or potential, we recommend a long range or general program."

#### Long Range Objectives

Long Range Objectives—organize committee to seek locating small adaptable industries, (a) specific suggestions include: textile mills, auto assembly, cotton oil processing; industrial foundation, (a) make available building and building sites; extend support to existing industries (work with them for possible expansion); locate Santa Fe Deisel shops in Slaton; industrial survey (a) maintain up-to-date industrial survey, and (b) make available to industrial prospects and for use of industrial committee.

The number of suggestions submitted in Industrial Development and their frequency include: develop program to attract, small adaptable industries, 14; specific suggestions for location of (a) textile mill, 3, (b) auto assembly, 1; and (c) cotton oil, 1.

#### Santa Fe Shop

Work to locate Santa Fe Deisel shop, 4; study feasibility of industrial foundation; support existing

#### Short Range Objectives

Short Range Objectives—extend support to 4-H Club and FFA activities, work to provide needed grain storage facilities, make annual award to outstanding farmer in trade area, and make annual award for outstanding soil conservation work.

Long Range Objectives—work for improvement to livestock show facilities, work for expanded telephone service in Slaton trade areas, work for fair prices on farmer's products, commercial beef feeding program, lend support to soil-water conservation programs, and make available facilities for migratory farm laborers.

Suggestions and the frequency of each during the Community Clinic in the Agriculture and Livestock classification are as follows: permanent facilities for livestock shows, 14; work for expanded rural telephone service, 4; additional grain storage needed, 4; seek to establish marketing facilities, 4; and extend support to 4-H and FFA activities, 4.

The seventh article series on the Community Clinic report will be concluded in next week's issue of The Slatonite with a report on the classification of Member Relations-Publicity.

### Soil Conservation Supervisors Meet In Lubbock

Lubbock County Soil Conservation District Board of Supervisors had a number of visitors attend their regular monthly meeting

July 13, when the kick-off meeting was held for their fall cover crop campaign.

Lee York, vice-president of the First National Bank of Lubbock, who has been chosen to head this year's campaign, was present to review plans with the board. York stated that a meeting would be called within a week in which committees composed of businessmen as well as soil conservation service employees, extension service, and other agricultural representatives would begin work on the fourth annual campaign sponsored by the district in cooperation with business and professional people to encourage planting of legumes and other cover crops for protection and building of soils of not only Lubbock County district but the entire South Plains area.

Two supervisors and two soil conservation employees from near-by districts attended the meetings today to observe the workings of this district. Supervisors from the Upper Pease Soil Conservation District were Bryce Marshall of Cee Vee, Texas and Varner McWilliams of Whiteflat, Texas, who

were accompanied by the Work Unit Conservationist of their district, James H. Priddy of Matador. Guy W. Nutt, Work Unit Conservationist from Post, who is associated with the Duck Creek Soil Conservation District, also observed the proceedings of the meeting.

Further plans were made for an organized effort to eradicate harmful bindweeds and Johnson Grass within Lubbock County. Joe Walker, chairman of the board, stated that the board, "doesn't plan to look back but push ahead toward soliciting the aid of county commissioners, all groups owning rights-of-way, and most of all individual farmers in eradicating these weeds which are becoming an increasing threat to agriculture in this section of the country."

Walker said that the group plans to include this effort in the fall campaign emphasis. Persons attending the meeting in addition to York, Walker, and the four guests from other districts included the other four members of the board—Frank Gray, Lubbock; Edwin Merrell, Shallowater; George

Hindman, Slide; and John Pugh, Acuff. Also Mrs. Alton Strickland, district business manager, and M. C. Pennington, WUC of Soil Conservation Service were present at the meeting.

Agreements were reached with L. E. Tucker, Texas Tech College, R. T. Tucker, A. A. Wuensche, T. R. Dillard, and W. J. Klattenhoff, covering 2,827 acres of land on which soil conservation practices are to be applied.

#### Automobile Accidents

Now that millions of people are taking their summer vacations and driving about the country, automobile accidents are occurring with increasing frequency. When involved in an accident, it is hard to keep your wits about you and know just what to do.

It is therefore a good idea to plan in advance just what you would do in event of a smash up. Here are a few simple rules that every driver should commit to memory:

1. **Stop!** Failure to stop can result in serious criminal consequences.  
2. **Render Aid.** If anyone is injured: (1) Render first aid. (2) Stop bleeding. (3) Call a doctor or an ambulance or both. (4) **Do not** move an injured person in any way that could possibly add to his injury.

3. **Protect the Scene from Further Damage.** You may be liable for damages to approaching drivers, unless they are properly warned. If the highway is obstructed at night, have someone turn his headlights beams on the wrecked vehicles.

4. **Call an Officer.** Policemen, Highway Patrolmen, Sheriffs and their deputies are trained accident investigators whose testimony may be invaluable in establishing your civil claim for damages.

5. **Gather Information.** Write it Down. Don't trust your memory. Don't guess—be specific. Measure skid marks. Step off distances. Be sure to obtain names and addresses of witnesses. You are required by law to exhibit your driver's license to the other driver—and he must do the same.

6. **Be Careful What You Say.** Even if you feel you probably are to blame, it is best to make no admission. You may learn later that the other driver was equally at fault, or more so. Emotional comments can be misconstrued by others, or may be misquoted. Whatever you say, make it factual.

7. **See Your Doctor** if there is the slightest chance you may be injured. Serious injuries do not always result in immediate pain or bloodshed.

8. **Consult Your Lawyer Immediately.** The sooner your lawyer is brought into the matter, the better he can advise you and protect your rights. He can obtain statements from the witnesses while their memories are fresh, and do many other things to insure that the true facts are preserved. Get your lawyer's advice before giving any interviews or statements to investigators or adjusters for the other side.

9. **Inform Your Insurance Company Promptly.** Failure to do so may void your policy.  
10. **Report the Accident** to the Department of Public Safety. This is required by law if there is any injury, death, or total damages exceed \$25.00.

An official accident report form may be procured from the Police, Sheriff's Dept., Highway Patrol, or State Dept. of Public Safety.

(This column, based on Texas law, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts may change the application of the law.)

### Cobb Speaks to Rotarians on "Government"

Carroll Cobb, Lubbock, spoke to the Slaton Rotary Club Thursday noon at the clubhouse. O. Z. Ball was in charge of the program and presented the speaker.

"Government" was Mr. Cobb's subject. His experiences in the Legislature concerning the way lobbyists operate proved very interesting.

"The big interests keep your legislators informed as to their side of every question, but the people have a tendency to keep their views to themselves," said the speaker. "Vigilance depends on the citizens that read the newspapers and then write to their representatives in government," he continued.

Mr. Cobb ended his talk with: "The principle element of our strength as a nation is Christianity."

Visitors were Earl Collins, Jim Kelley, Phil Carter, Mark Mailey and Geo. W. Brassell, all of Lubbock; John W. Thomas, Ralls; Finis Griffin and Dr. John C. Lott, Slaton.

Mrs. Travis Irons, Mrs. Joe Tate, and her niece and nephew, Nancy Jane and Edward Atkins, of Galveston spent several days last week sight seeing in Colorado and New Mexico. Mrs. Irons and Mrs. Tate left Monday to take Nancy Jane and Edward back to their home in Galveston after spending five weeks here with their aunt.

### Safety Should Be a Part of Vacation Plans

"Put safety at the head of your list in planning that vacation trip!"

That was the advice given to motorists today by E. C. McFadden of Dallas, Vice President of Employers Casualty Company and President of the Texas Safety Association, in discussing the vacation safety program which his safe driving program— which his agency, the Department of Public Safety and the National Safety Council are sponsoring this month.

"Too often vacation trips are planned without any thought for safety on the road, and often what starts out to be a pleasure trip ends up as another traffic calamity," he said.

He said that the best way to keep out of danger on the vacation trip is to plan certain basic safety measures, and to stick to them. These safety measures are (1) control of speed, (2) keeping the car safety-checked and in good condition at all times, (3) scheduling your driving for daytime hours and allowing for occasional breaks to minimize fatigue, and (4) obeying traffic signs and signals.

"If a driver starts out on the road fully determined to follow these common sense rules to protect himself and his family in

highway traffic, there is little doubt that his vacation will be safe as well as fun," McFadden said.

He said that the purpose of the vacation safety program being conducted this month was to reduce the high toll of traffic accidents during the vacation period by emphasizing the individual's responsibility for traffic safety.

"Safety is a give-and-take proposition," he said. "If you want the other fellow to do right by you on the road, you've got to do right by him."

Mrs. Cecil Long and Sandra visited in Big Spring last week-end with Mrs. Long's sister, Mrs. Tip Anderson and Mr. Anderson.

A friend maintains that absent painters use jig saw puzzles with most of the pieces missing as models from which to work.

WHEREAS, the aforesaid notice was duly published in compliance with said resolution and as required by the aforementioned Article 2368a; and

WHEREAS, prior to the time set for the receipt of bids, as aforesaid, the Commission was delivered a petition signed by more than 10% in number of the qualified voters of the City, whose names appear on the last approved tax rolls as property taxpayers of the City, requesting the Commission to submit to a referendum vote the question as to the issuance of bonds of the City for the purpose of purchasing fire equipment and garbage disposal equipment, and further requesting the Commission not to make such expenditures and not to finally award such contracts unless the proposition to issue bonds for such purposes be sustained by a majority of the votes cast at the election petitioned for; and

WHEREAS, the Commission finds that said petition is in all things regular, timely and properly executed, in accordance with the provisions of Section 4 of Article 2368a, R. C. S. of Texas, 1925, as amended, and that the proper number of qualified voters of the City whose names appear on the last approved tax rolls as property taxpayers of the City have signed said petition as further attested by certificate of the City's Tax Assessor and Collector accompanying said petition; and

WHEREAS, the Commission is authorized and required to submit to an election propositions for the authorization of bonds for the purpose of purchasing the aforesaid fire equipment and garbage disposal equipment in lieu of warrants for the purpose as originally intended; and

WHEREAS, the Commission deems it necessary and advisable to issue bonds of the City also for street improvements and water and sewer improvements and extensions; therefore

BE IT RESOLVED AND ORDERED BY THE CITY OF SLATON:

SECTION 1: That an election be held on the 4th day of August, 1956, which date is not less than fifteen (15) nor more than thirty (30) days from the date of the adoption of this resolution and order, at which election the following propositions shall be submitted to the qualified electors of said City who own taxable property therein and who have duly rendered the same for taxation:

PROPOSITION NUMBER 1  
“SHALL the Commission of the City of Slaton be authorized to issue general obligation bonds of the City to the amount of THIRTY EIGHT THOUSAND DOLLARS (\$38,000), maturing serially over a period not to exceed Twenty (20) years from their date, bearing interest at the rate of not to exceed FOUR PER CENTUM (4%) per annum, payable annually or semi-annually, for the purpose of improving the streets of the City; and shall there be annually assessed, levied and collected upon all taxable property of the City taxes sufficient in amount to pay the annual interest and to provide the necessary sinking fund to redeem said bonds as they become due?”

PROPOSITION NUMBER 2  
“SHALL the Commission of the City of Slaton be authorized to issue general obligation bonds of the City to the amount of EIGHTY THOUSAND DOLLARS (\$80,000), maturing serially over a period not to exceed Twenty (20) years from their date, bearing interest at the rate of not to exceed FOUR PER CENTUM (4%) per annum, payable annually or semi-annually, for the purpose of constructing improvements and extensions to the City's Water System; and shall there be annually assessed, levied and collected upon all taxable property of the City taxes sufficient in amount to pay the annual interest and to provide the necessary sinking fund to redeem said bonds as they become due?”

PROPOSITION NUMBER 3  
“SHALL the Commission of the City of Slaton be authorized to issue general obligation bonds of the City to the amount of FIVE THOUSAND DOLLARS (\$5,000), maturing serially over a period not to exceed Twenty (20) years from their date, bearing interest at the rate of not to exceed FOUR PER CENTUM (4%) per annum, payable annually or semi-annually, for the purpose of constructing improvements and extensions to the City's Sanitary Sewer System; and shall there be annually assessed, levied and collected upon all taxable property of the City taxes sufficient in amount to pay the annual interest and to provide the necessary sinking fund to redeem said bonds as they become due?”

PROPOSITION NUMBER 4  
“SHALL the Commission of the City of Slaton be authorized to issue general obligation bonds of the City to the amount of TWELVE THOUSAND DOLLARS (\$12,000), maturing serially over a period not to exceed Twenty (20) years from their date, bearing interest at the rate of not to exceed FOUR PER CENTUM (4%) per annum, payable annually or semi-annually,

for the purpose of purchasing garbage disposal equipment; and shall there be annually assessed, levied and collected upon all taxable property of the City taxes sufficient in amount to pay the annual interest and to provide the necessary sinking fund to redeem said bonds as they become due?”

PROPOSITION NUMBER 5  
“SHALL the Commission of the City of Slaton be authorized to issue general obligation bonds of the City to the amount of FIFTEEN THOUSAND DOLLARS (\$15,000), maturing serially over a period not to exceed Twenty (20) years from their date, bearing interest at the rate of not to exceed FOUR PER CENTUM (4%) per annum, payable annually or semi-annually, for the purpose of purchasing fire fighting equipment; and shall there be annually assessed, levied and collected upon all taxable property of the City taxes sufficient in amount to pay the annual interest and to provide the necessary sinking fund to redeem said bonds as they become due?”

SECTION 2: That said election shall be held at the City Hall in the City of Slaton, Texas, and the entire City shall constitute one election precinct.

SECTION 3: That the following persons are hereby named officers of the election, to-wit:

Phil Brewer—Presiding Judge;  
Chas. Whalen—Judge;  
Mrs. G. W. Reese—Clerk; and  
Mrs. Dan Liles—Clerk.

SECTION 4: That said election shall be held under the provisions of and in accordance with the laws governing the issuance of municipal bonds in cities, as provided in the General Laws of the State of Texas, and only qualified electors, who own taxable property in the City, and who have duly rendered the same for taxation, shall be qualified to vote.

SECTION 5: That the ballots for said election shall be prepared in sufficient number and in conformity with Chapter 6, V. A. T. S. Election Code, adopted by the Fifty-second Legislature in 1951, and that printed or such ballots shall appear the following:

PROPOSITION NUMBER 1  
“FOR THE ISSUANCE OF \$38,000 STREET IMPROVEMENT BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

“AGAINST THE ISSUANCE OF \$38,000 STREET IMPROVEMENT BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

PROPOSITION NUMBER 2  
“FOR THE ISSUANCE OF \$80,000 WATER SYSTEM BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

“AGAINST THE ISSUANCE OF \$80,000 WATER SYSTEM BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

PROPOSITION NUMBER 3  
“FOR THE ISSUANCE OF \$5,000 SEWER SYSTEM BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

“AGAINST THE ISSUANCE OF \$5,000 SEWER SYSTEM BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

PROPOSITION NUMBER 4  
“FOR THE ISSUANCE OF \$12,000 GARBAGE DISPOSAL EQUIPMENT BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

“AGAINST THE ISSUANCE OF \$12,000 GARBAGE DISPOSAL EQUIPMENT BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

PROPOSITION NUMBER 5  
“FOR THE ISSUANCE OF \$15,000 FIRE FIGHTING EQUIPMENT BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

“AGAINST THE ISSUANCE OF \$15,000 FIRE FIGHTING EQUIPMENT BONDS AND THE LEVY OF A TAX IN PAYMENT THEREOF”

AS TO EACH OF THE foregoing five propositions, each voter may mark out with black ink or pencil one of such expressions, thus leaving the other as indicating his or her vote on the respective propositions, or, in the alternative, each voter may vote on the respective propositions by placing an “X” in the square appearing on the ballot beside the expression of his choice.

SECTION 6: That a copy of this resolution and order, signed by the Mayor of the City and attested by the City Secretary shall serve as proper notice of said election.

SECTION 7: That notice of said election shall be given by posting and publication of a copy of this resolution and order, at the top of which shall appear the words, “NOTICE OF ELECTION FOR THE ISSUANCE OF BONDS”. Said notice shall be posted at three public places in said City, one of which shall be at the City Hall, not less than fourteen (14) full days prior to the date on which said election is to be held, and published on the same day in each of two successive weeks in a newspaper of general circulation, published in the City of Slaton, the first of said publications to be made not less than fourteen (14) full days prior to the date set for said election.

# Highlights and Sidelights FROM Your State CAPITOL

By Vern Sanford  
Texas Press Association  
AUSTIN—Saturday is V-Day...  
Voting Day in Texas. It's the  
democratic primary!

ord-setting 2,410,188  
Not all these people will mark  
ballots. Some are Republicans.  
They don't vote in a Democratic  
Primary. And some Democrats will  
stay home.

Not since the Ferguson era have  
more than 80 per cent of qualified

voters turned out for a primary.  
General elections have run higher.  
Biggest vote ever cast in the state  
was 2,075,946 in the 1952 general  
election. This was an 87 per cent  
turnout. Highest primary vote so  
far was the August, 1954, total of  
1,458,220.

Whether candidates in their final  
fervent appeals, these last few  
hours, will be able to stir out more  
voters remains to be seen. Even  
harder to predict is who will have  
the edge in major state races. Most  
informed observers hedged their  
guesses with "ifs," "buts" and  
"maybes."

They watched the straw votes  
and sample polls, checked the betting  
odds, but still weren't sure.  
Major cause for uneasiness is that  
rapid growth and shifts in Texas'  
population have wiped out many of  
the old rules of thumb on what it

takes to win.  
Fifteen years ago the rural vote  
was all-important. Non-metropoli-  
tan votes still are in the majority  
and they are "dependable" votes.  
However, the five major cities have  
between them nearly a million eli-  
gible voters—917,209. In this big  
city market, labor claims a 450,000  
to 500,000 "sphere of influence"  
vote.—But admitted it couldn't de-  
liver that many in a bloc to any-  
one.

Another big question mark is  
how much voters will be influenced  
by the three segregation-related  
referendum issues.

**How to Vote on Referendums**  
A check of voters who cast ab-  
sentee ballots reveals much con-  
fusion about how to vote properly on  
the three referendums.

Robert Cargill, chairman of the  
Texas Referendum Committee, puts  
it simply, in these words: "If you  
are opposed to mixed schools, mixed  
marriages and illegal federal  
interference, vote FOR all three  
propositions."

Due to the wording of the refer-  
endums, it is necessary for one to  
vote for the measures if he is  
against the subjects that each cov-  
ers.

For example, the first proposi-  
tion reads "FOR (or against) spe-  
cific legislation exempting any  
child from compulsory attendance  
at integrated schools attended by  
white persons and negroes."

Proposition number two reads  
"FOR (or against) specific legisla-  
tion perfecting state laws against  
intermarriage between white per-  
sons and negroes."

Third proposition says "FOR (or  
against) the use of interposition to  
halt illegal Federal encroachment."  
The use of double-negatives is  
most confusing.

Voters also should remember  
that they may split their votes on  
the referendums, if they wish. For  
example, if a voter were opposed to  
mixed marriages and illegal federal  
interference, but not opposed to  
mixed schools, he would vote  
FOR the two propositions, and  
against the latter.

**Research League Helps Texas**  
In contrast with the campaign  
furore, the Texas Research League  
works quietly. Their aim is better  
state government. Election win-  
ners, whoever they are, likely will  
have cause to use the league's ex-  
haustive fact-finding survey.

Only three years old, TRL al-  
ready has provided Texas taxpay-  
ers with nearly a million dollars  
worth of services. All for free. Big  
businessmen are footing the bill.  
Behind the organizing and fi-  
nancing of the league are nearly  
500 business and professional lead-  
ers. Their names constitute a Tex-  
as "Who's Who." These men, with  
a bigger than average stake in  
Texas' future, felt their billion-  
dollar-a-year state government  
should have the benefit of the same  
type of efficiency expert tech-  
niques that aid private enterprise.

Ben C. Belt, president of Gulf  
Oil Corporation, Houston, is chair-  
man of the 72-member board of di-

rectors. Alvin A. Burger, a nation-  
ally-recognized government re-  
search expert, is executive director.  
A modest office suite two blocks  
west of the Capitol houses the 21-  
member staff.

TRL was set up as a non-profit,  
non-political, educational corpora-  
tion. It is prohibited by its charter  
from lobbying for the adoption of  
any of its recommendations. It can  
undertake a survey only at the re-  
quest of the department concerned.

Apparently these restrictions  
have not hampered its effective-  
ness. While its analyses may turn  
up faults and criticisms, state ag-  
encies are standing in line for its  
services. Recommendations from  
surveys made so far have resulted  
in far-reaching administrative and  
legislative changes.

Agencies now working toward  
league-suggested goals include the  
state hospital system, University of  
Texas, and the public school fi-  
nancing (Gilmer-Aikin) program.

A State Library Commission sur-  
vey is to be ready in about two  
weeks. Reports on the Department  
of Public Safety and Board of Con-  
trol are to be completed by the  
end of summer. A mammoth State  
Highway Department analysis is  
due for release in September.

Slated for beginning in 1957 are  
studies of the Department of Pub-  
lic Welfare and the Youth Develop-  
ment Council.

**Shepherd Urges Action**  
Atty. Gen. John Ben Shepperd  
has urged the House Investigating  
Committee to conduct full on-the-  
ground hearings to uncover elec-  
tion frauds in Duval and surround-  
ing counties.

Shepperd's comment on the sit-  
uation came as the result of a wire  
Rep. Wade Spilman, chairman of  
the committee, sent to C. B. Dick  
of Laredo. Dick had requested an  
investigation of absentee voting  
practices in Webb, Zapata, Jim Hog-  
gins, Duval and Starr counties.

In a wire to Spilman, Shepperd  
cited a group of bills introduced in  
the last legislature, at the request  
of his office, and the Texas Press  
Association. The measures, he  
pointed out, would eliminate such  
situations as now exist in the South  
Texas area.

All the bills, Shepperd said,  
failed to win legislative approval.  
"Since 1953, we have tried to  
interest legislative agencies in the  
cleanup of Duval, and your com-  
mittee will discover, as we did,  
that the same thing that happened  
there can happen in any county  
where a political boss can control  
election officials and machinery  
and the judicial processes," Shep-  
perd said.

The bills to which he referred  
would open meetings of public  
agencies, allow full inspection of  
public records, protect reporters'  
sources of information, require an  
audit upon proper petition by tax-  
payers, provide punishment for  
false reporting of official finances  
or theft of public funds or records,  
and give venue in adjoining coun-  
ties in case of theft of public funds.

**More Drought Aid Sought**  
A committee of 175 Texas agri-  
cultural leaders, called together by  
Ag. Comm. John C. White, is work-  
ing for two-way expansion of fed-  
eral drought assistance.

Goals include a six-point credit  
program and direct subsidies of  
\$10 a ton for buying hay and other  
roughage.

County Judge W. S. Pickett of  
Karnes County heads an 11-member  
group designated to push the pro-  
gram.

**Right of Way Buying Urged**  
Getting the "right of way" is the  
only obstacle likely to delay the  
federal highway building program  
in Texas.

Enough road building equip-  
ment now is on hand to double the  
present work capacity within two  
years, said members of the Texas  
Highway Branch of Associated

## Hospitality on the Highway!

Having the inside of your car swept out is one of those  
extra little gestures of hospitality that you can expect  
when you drive in to a Phillips 66 Station.

You'll like the friendliness and courtesy of your Phillips  
66 Dealer. You'll like the conscientious way he cleans your  
windows all the way around. You'll like his clean rest  
rooms. You'll appreciate the way he checks your tires,  
battery and radiator. To Phillips 66 Dealers, "Hospitality  
on the Highway" means much more than just selling gas-  
oline and motor oil. It means pleasing you.

Your Phillips 66 Dealer believes that in the service he  
gives, as well as in the products he sells, "It's Performance  
that Counts." Drive in to his station soon.

## TWO CHAMPIONS OF THE ROAD...

both Chevrolets!

To the eye, the new Corvette and  
the new Chevrolet are far different.  
But these two champions have one  
superb quality in common—both  
were born to cling to the road as  
though they were part of it!

Chevrolet's astonishing roadability  
is a big reason why it's America's  
short track stock car racing cham-  
pion. It can and does out-run and  
out-handle cars with 100 more  
horsepower. When you wed rock-  
solid stability to superb engines  
such as the 225-h.p. V8 that flashed  
the Corvette to a new American  
sports car record—then you get a  
real championship combination.  
Stop by for a sample!

## The WINNING- SIDE

The fans in the grandstand are yelling, "Strike  
him!" and our young pitcher is going to do  
exactly that. This is his day for a shut-out game  
... his day to win.

He's feeling pretty good about it, and who's  
to blame him? But what if things had gone the  
other way? What if some other boy had been  
warming up in the bullpen, about to have taken  
his place? But he is a well-balanced youngster,  
and he would have taken that in stride, too.

He has learned about being a good sport,  
about regard for his fellow men, and about many  
other equally important things in Church. For,  
like thousands of other American youngsters,  
the Church already plays an important part in  
his life. That is one reason why his parents  
have faith in the fact that he will grow up to  
be a pretty fine man.

### THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest fac-  
tor in search for the building of  
character and good citizenship. It  
is a storehouse of spiritual values.  
Without a strong Church, neither  
democracy nor civilization can  
survive. There are four sound  
reasons why every person should  
attend services regularly and sup-  
port the Church. They are: (1)  
For his own sake. (2) For his  
children's sake. (3) For the sake  
of his community and nation. (4)  
For the sake of the Church itself,  
which needs his moral and ma-  
terial support. Plan to go to  
church regularly and read your  
Bible daily.

### Four Slatonites Attending FFA State Convention

Two local members of Slaton chapter of Future Farmers of America were scheduled to receive Lone Star Farmer Degrees, highest degrees given by the state organization, at the annual FFA convention being held at the Statler-Hilton Hotel in Dallas. They are William Kahlich and Rodney Kitten.

Also attending the meeting which began Wednesday, July 25 and continued through today, July 27, were Kahlich, Kitten, Truett Babb, local FFA sponsor and vocational agriculture teacher, and Tracy Crawford.

Tracy Crawford entered the state public speaking contest and became eligible to enter by winning the Lubbock district and Area 1 contests.

About 3,000 members were expected to attend from a state membership of over 40,000.

### Wanted: Entries In Farm Bureau Queen Contest

Any daughter or sister of a Farm Bureau member who is actively engaged in farming, if she is single and between 16 and 22 years of age, is eligible to enter the Farm Bureau Queen Contest to be held in Lubbock at the O. L. Slaton Junior High School Aug. 25.

Girls who are interested may secure entry blanks from any director of the Farm Bureau, according to Mrs. Earl Foerster. One girl in the Slaton area, Miss Mary Ann Klattenhoff, daughter of Mr. and Mrs. Mack Klattenhoff, has already entered.

Winner of the Lubbock contest will receive an expense paid trip to the state convention and winner there will be allowed \$500 for expenses to the American Farm Bureau Federation Convention in Miami, Fla., in December.

Mrs. Foerster says girls will be judged on appearance, poise and personality. Those interested in additional information may call Mrs. Foerster at 988-J1.

### TENDERNESS IN MEAT MAY BE INHERITED

There is some evidence from research with rabbits and in studies of sheep and beef cattle that tenderness in meat is an inherited quality, according to R. W. Snyder, extension meats specialist.

To produce more lean meat of good quality and tenderness, we need a better understanding of what makes tenderness and desirable flavor, says Snyder.

Enough research has been done to show there is no direct relation between tenderness in the meat and outside fat. But tenderness and flavor may be influenced by the particles of fat within the meat cells. It is also possible that there may be a relationship between tenderness and the size and elasticity of different muscle fibers.

Once the chemical nature of tenderness and good flavor are clearly understood, it may become possible to add these qualities to any meat.

### Rewards, Risks Great in Oil Well Drilling

"I wish I had an oil well!" You've heard that said a thousand times—probably you've said it yourself. For oil wells have become a popular symbol of wealth.

And there is no doubt that a big producing oil well would be a nice thing to have. At the same time, getting an oil well, and then making something valuable out of the crude, is a mighty expensive and risky business.

For instance, last year oil producers spent more than \$2.5 billion drilling some 55,000 wells in this country. A great many of them turned out dry and useless. The drillers just had to try again and hope for better luck next time.

One well, in Louisiana, was sunk to a record 22,570 feet—more than four miles—before traces of oil were found. The cost was \$2.4 million.

Much oil now travels via pipeline—and it costs about \$32 thousand to lay just one mile of 42-inch pipe.

Modern gas engines demand fuel of much higher octane content than used to be the case—the average octane rating of gasoline has risen from 74 to 84 in the past 26 years. It costs oil companies \$300 million to improve gasoline quality by just one octane number.

The oil industry offers great rewards—and, with them, great risks.

with electric mixer until very thick. Add cream (unwhipped), strawberries or peaches, milk and freeze.

Mrs. Thompson, who was Lea Beth Drewry before her marriage, has lived in Slaton since she was six years old. Most of the time since she was eleven she has lived in the same house, which is located at 635 So. 12th. Lea Beth says she would like a new home, but possibly would not feel at home. They have remodeled and built on to the original house.

**Bookkeeper at Store**

Being bookkeeper for her husband at their furniture store keeps Mrs. Thompson fairly busy, but she enjoys it. Before her marriage she worked at the local bank and also for the gas company and likes to do any kind of book work.

The Thompsons have one child, Jane, who is 10 years old and in the fifth grade. Jane has been busy this summer going to the girls' summer program and swimming. She is a cat and dog lover and always has some pets around.

**Traveling Is Hobby**

Traveling is enjoyed by the entire family and they look forward to vacation time. This summer they have had a house trailer at Lake Thomas near Snyder and have enjoyed going there for weekends and fishing.

Other activities of Mrs. Thompson includes working with Slaton Girl Scouts. She is treasurer of this group and was leader of Brownie Troop 7 for a couple of years.

The Thompsons are members of the First Methodist Church.

**HELPING MOTHER AT A TIME LIKE THIS** is certainly a happy time for Jane Thompson as she aids her mother, Mrs. Harmon Thompson, in filling a dish with ice cream. They are shown in the den of the Thompson home.

**Miss Edith Holloman Complimented By Pre-Bridal Showers**

A bridal shower was given complimenting Miss Edith Ann Holloman, bride-elect of Jack Haliburton, Thursday evening, July 19, in the home of Mrs. W. P. Layne.

Guests were greeted by Mrs. Layne and presented to members of the receiving line composed of Mrs. W. L. Holloman, mother of the honoree, Miss Holloman, Mrs. R. L. Haliburton, mother of the prospective groom, and Miss Patsy Holloman, sister of the honoree.

Mrs. W. R. Wilson and Mrs. Bruce Pember presided at the punch bowl. Guests were registered by Miss Linda Haliburton and Miss Veneta Green.

**Table Decorations**

The tea table was laid with a pale pink damask cloth centered with an arrangement of magnolia blossoms placed in a silver shell-shaped bowl. White tapers in silver candelabra flanked the centerpiece. Refreshments of pink punch and white cookies continued to carry out the bride's chosen colors of pink and white. Crystal and silver appointments were used.

A blond coffee table of modern design was presented by the hostesses.

Hostesses were Mesdames Charles Felty, C. E. Corley, C. A. Womack, A. C. Burk, Arthur Saage, T. E. McClanahan, George Taylor, E. R. Legg, J. H. Brewer, R. H. Todd Sr., Jack Cooper, R. L. Smith Sr., F. B. Sexton, W. J. Thomas, H. G. Sanders, Travis Reynolds, W. R. Wilson, W. D. Cooper, Bruce Pember, Martin Collins, John L. Jones III, A. E. White-

head and Layne.

**Kitchen Shower**

Another in the series of courtships honoring Miss Edith Ann Holloman, bride-elect of Jack Haliburton, was a kitchen shower held in the home of Mrs. Clarence Holt, with Mrs. H. B. Banks and Mrs. Donald Boudns as co-hostesses.

Garden flowers were used in the entertaining rooms. Refreshments of individual cakes topped with tiny wedding bells, Cokes and salted nuts were served. Miniature kitchen gadgets were used for plate favors.

The guest list included Misses Sue Corley, Barbara Felty, Veletta Polk, Ova Sue Wilson, Viola Walton, Patsy Holloman, Carrall Ann Mann, Pam Maxey, Geraldine Maxey, Callie White, Pat and Sandra Wells, Joan Pember, Suzanne Neill, Linda and Mary Haliburton, Beverly Bland and Peggy Sue Kenney. Mesdames J. D. Basinger, R. L. Haliburton, Danny Joe Holt, Marlee Holloman, W. L. Holloman and Bruce Blair.

**MRS. ADAMS RETURNS HOME**

Mrs. S. H. Adams returned to her home here Saturday, July 21, after an extended trip to the East. She has been visiting her daughters, Mrs. Albert Westfeld in Princeton, N. J. and Mrs. Bankhart Langmore in New York City, N. Y.

Guests in the home of Mr. and Mrs. Otis Neill Sunday were Mr. Neill's sister, Mrs. W. C. Clearman, and his niece, Mrs. Alton Freeman and Mrs. Ross Moore, of Seminole.

**Westview Youth Attend Plains Baptist Assembly**

A large group of youth from Westview Baptist Church attended the Plains Baptist Assembly near Floydada during the last two weeks.

Junior girls attending were Mary Ruth Green, Carolyn Harper, Sherrea Belt, Barbara White, Doris Patterson, Gail Johnson, Shirley and Betty Armstrong, Diane Price, Martha Ellis and Jerry Frank Eddings. They were accompanied by Mrs. George Green and Mrs. Estelle White.

Dave Robison and Calvin Willis accompanied the junior boys. They were Calvin Lydell Willis, Ricky Brush, Tommy Todd, Tommy Gentry, Billy Cooper, Gary Caldwell, Meredith Harper and Max White.

Jerry Gentry, Billy Patterson, J. E. Todd Jr., John Dodson, Dwayne Smith, Ronny White, R. D. Klaus and George Privett attended intermediate boys' camp and were accompanied by Rev. Bryan Ross. Mrs. Bryan Ross accompanied June Johnson, Jenny Lee Christman, Alata Cooper and Charlotte Bland when they attended intermediate girls' camp.

Veneta Green, from the church, went with the Southland church as a sponsor.

**COUNTY FEDERATION**

TO MEET JULY 31

County Federation of Women's Clubs will meet in regular session at the new public library in Lubbock Tuesday, July 31, at 9:30 a. m.

Three clubs will be hostesses for a coffee preceding the business hour and program.

Tommy Turner of Lubbock is spending the week here with his grandparents, Mr. and Mrs. T. A. Turner.

**ROSSES HONORED AT WESTVIEW PARTY RECENTLY**

Rev. and Mrs. Wilson Ross and their two daughters, Judy and Becky, were complimented following the Wednesday evening prayer service at Westview Baptist Church with a surprise farewell party.

The Rosses were presented with three pieces of Samsonite luggage and the girls were given dolls.

They have returned to El Paso where the Rev. Ross is associated with the Spanish Publishing House. They have been living in Slaton for about the past six months while he has been attending Texas Tech doing work on his masters' degree.

**Baptist Assembly Attended by First Baptist Youth**

Youth of the First Baptist Church attended the Plains Baptist Assembly held near Floydada the past two weeks. They were accompanied by adults from the church and report good camps, according to the pastor, Rev. J. T. Bolding.

The junior boys who attended were David Tucker, Bob Bivens, Buddy Turner, Leslie Brown, Robbie Edmondson, Kenneth Romines, Bobby Joe Harlan, Keith White, Oscar Meeks, Bentley Page, Tommy Cooper and Jimmy Howell. They were accompanied by the pastor.

Pam Maxey and Linda Smith were junior girls' sponsor. Those attending were Cynthia Clark, Dorothy Lewis, Catherine Ayers, Bonnie Cole, Eddie Marie Turner, and Sharon Ann Tucker.

Patsy Pettigrew, Jan Smith, Sue Liles, Harriett Perkins, Jan Boudns, Mariellen McNeely and Carolyn Jo Rhoads were accompanied by Mrs. J. T. Bolding for the intermediate girls' camp.

Mr. and Mrs. Leonard Morris visited Mr. Morris' father, W. C. W. Morris, who is a patient in Garza County Hospital in Post.

Mr. and Mrs. Travis Mann visited in Abilene over the week-end with Mr. Mann's sister Mrs. E. J. Galligan and Capt. Galligan.

Mr. and Mrs. Don Britt visited Mr. Britt's mother, Mrs. Mary Britt, in Amherst Saturday.

**SEPARATING FISH FROM WATER**

To commercial fishermen who "pump" their catches on board, separating the fish from the sea water is a highly important operation. The separating mechanism which delivers the fish to the ship's hold and the water back to the sea is exposed continuously to corrosion from salt water. For this reason many of these mechanisms are made of Monel nickel-copper alloy because of its excellent resistance to corrosion from this source.

**Local Resident's Brother-in-Law Dies Wednesday**

H. H. Rowan of Ft. Worth, brother-in-law of Mrs. Otis Gunter, died Wednesday, July 18, following a heart attack. Funeral services were conducted at Pilot Point on Thursday.

Besides his wife, he is survived by a son, Bobby. Mrs. Rowan, the former Gladys Scoggins lived here with her sister and family for several years before her marriage.

Mrs. Gunter left Wednesday to be with her sister.

**BIG FAN**

One of the largest fans in the world is the 198-inch diameter vertical propeller-type fan which delivers fresh air to the Stobie section of International Nickel's Froot-Stobie Mine in the Sudbury District of Canada. It is driven by a 650-horsepower motor. The fan's impeller, mounted directly on the motor shaft, has 12 adjustable-pitch blades which can be set to handle up to 750,000 cubic feet of air per minute.

Mr. and Mrs. Jack Grey of Amarillo were week-end guests in the home of Mr. and Mrs. W. F. Lytle.

Mrs. L. L. Lively had as her guests over the weekend, her daughter, Mrs. Earl Matney and three children of Midland.

**Music Scholarship Awarded Wylie At Tarleton State**

G. W. Wylie of 835 So. 10th St., Slaton, has been awarded a music scholarship to Tarleton State College.

He will enter Tarleton in September where he will be a sophomore. The fall semester starts with freshman orientation Sept. 10. G. W. is the son of Mr. and Mrs. Val Wylie.

**TEXANS ASK FOR EGG GRADING LAW**

Egg production is big business in Texas—187 million dozen worth each year, to be exact.

Yet Texas stands alone among the 48 states with no legal means of protecting its egg industry. As a result, the housewife suffers through unrestricted shipment of inferior egg products from other states, as well as frequent misgrading and labeling which sells her poor-quality eggs branded as "top-quality."

Farmers and egg industry men, alike, are now asking that the State Legislature pass a uniform grading and labeling law. Such a law would have a double-purpose:

1. It would protect the consumer. The industry wants to guarantee the housewife that she will get 12 good eggs in every dozen she buys—and that the eggs actually are of the size and grade which the label claims.

2. It would assure the producer a fair price for the grade of egg he sells, by encouraging and promoting payment according to quality.

Such a law is a strong possibility in the next session of the legislature. In the meantime—and especially during the hot summer months—industry men are recommending to producers methods to keep eggs fresh until they are sold and consumed.

Egg producers are urged to gather their eggs at least three times a day in wire baskets and leave them in the baskets overnight in a cool, damp, ventilated place.

A good on-the-farm storage temperature is around 50 to 65 degrees if eggs are marketed often. The humidity should be 65 to 80 per cent.

These steps are also suggested:

1. Clean dirty eggs with steel wool, sandpaper or emery cloth brush. Be careful about actually washing unless you know the procedures recommended, or the quality can deteriorate rapidly after eggs are wet.

2. Pre-cool egg cases or cartons before packing eggs.

3. Pack eggs with the large end up.

4. Market at least twice a week, more often if possible.

**Funeral Services Conducted for Mrs. J. E. Webb**

Funeral services were conducted Saturday afternoon in First Methodist church for Mrs. J. E. Webb, 65, a resident of Slaton since 1934. Mrs. Webb died in Mercy Hospital July 19 following an illness of about three weeks. Graveside services were also held in the Abernathy Cemetery where she was buried.

The Rev. J. B. Sharp, pastor of the Slaton church, officiated at both services. Burial was under the direction of Williams Funeral Home of Slaton. A native of Bowie, Mrs. Webb moved to Slaton from Hamlin. Her husband passed away in 1930.

She is survived by four sons, Holmes, Tyler; Millard, Central Point, Oregon; Joe, Plainview; and Wayne, Kress; a daughter, Mrs. Juanita Corbin, Lamesa; four brothers, Isaac Holmes, Abernathy; Morris Holmes, Lyeon, Colorado; and Pete and Bryant Holmes, both of Texarkana; a sister, Mrs. Amanda Hibbs, Texarkana; 15 grandchildren; and a great-grandchild.

**STAINLESS STEEL COOKWARE**

To cookware manufacturers, nickel-chromium stainless steel is an important material since it has high resistance to corrosion and good formability. Cookware made of this alloy cannot chip or peel and does not scratch easily in ordinary use. In addition, its surface is so smooth that it is practically impossible for food particles to find a lodging place. Fruit juices and liquids that stain ordinary metals have little or no effect on chromium-nickel stainless steel.

**CARD OF THANKS**

Words cannot express our most heartfelt thanks for each one who was so kind and thoughtful during the passing of our precious one. May God bestow his richest blessings on each of you.

Mr. and Mrs. Ray Ward and Jennifer of Dallas were week-end guests in the home of Mrs. Ward's cousin, Mrs. Jack Cooper, and Mr. Cooper. Mr. Ward returned to Dallas Sunday. Mrs. Ward and Jennifer remained for a two week visit with Mrs. Emma Wallace, Mrs. Cooper's mother who makes her home here with the Coopers. Mr. and Mrs. Cooper left this week for San Antonio where they will visit their daughter and family.

**MONEL LIGHTNING RODS**

It has been found that lightning rods may become useless in as little as eight years when used to protect chemical and power plant stacks. It is not the weather but the stack gases that do the damage. Rods with exposed sections made of Monel nickel-copper alloy are often used for this reason as this alloy has the necessary corrosion-resistance, strength and electrical properties to equal the life of the stack.

**NEW CEILING HEATERS**

Radiant heating panels that can be hung from the ceiling are now available for use in industrial applications where the wall or floor space is limited. Installed as easily as a lighting fixture, these panels emit comfortable infra-red rays similar to the sun. Thermostatically controlled, the panels consist of a special composition molded with nickel-chromium wire completely embedded inside.

Mr. and Mrs. Leland Scott, Randy, Debra, Danny, and Terry Harlan spent the week-end in Ruidoso.

**CANADA—GREATEST NICKEL PRODUCER**

From 1886 when nickel was first produced in Canada to the end of 1955, the free world's production of the metal has been 8,500,000,000 pounds of which Canada has accounted for 84 per cent. In 1955, the combined total deliveries of nickel by Canadian producers were at a record high estimated at 357,000,000 pounds, representing somewhat over 80 per cent of the free world supplies.

## Farm Safety Week Observed Over Nation July 22-28

The nation will observe the 13th National Farm Safety Week, July 22-28, 1956. This safety week is being sponsored by the National Safety Council and the United States Department of Agriculture.

Joe S. Walker, Sr., Chairman of the Lubbock County Soil Conservation District Board of Supervisors, said that the supervisors would like to join the National Safety Council, the USDA, and other organizations in promoting safety among farm people. Walker says, "Let's observe Farm Safety Week and all other weeks of the year by following safety rules and using good judgment to make sure that we are not one of the statistics when the farm accidents for 1956 are counted."

According to the National Safety Council, about 14,000 farm residents lose their lives each year, and 1,200,000 are seriously injured. More work deaths occur in farming than any other major industry. The economic loss to the country from farm accidents is about \$1,500,000,000 as estimated by the National Safety Council.

Safety pays all ways. It saves lives, time, and money. It avoids injury and suffering, and frees people from grief and worry.

SOMETHING TO BE PROUD OF—C. R. Bain, of Bain Auto Store, proudly displays one of the new 1956 Whirlpool freezers to Mrs. L. B. Wootton. Features being explained by Mr. Bain are the Tite-seal door, no dials, roll-out baskets, juice can dispensers, freeze unit, and the five year warranty.

## Bain Auto Is Reddy Killowatt Dealer For RCA Whirlpool Freezer

Following the invention of electricity and the introduction of the electric refrigerator, housewives over the country thought the ultimate in home convenience had been reached. Now the refrigerator has taken a back seat to one of the most important steps toward modern convenience and ease in family eating that has ever been offered the American housewife—the electric home freezer.

**Seasonal Foods**  
With her new freezer, seasonal foods are never out of season or unexpected dinner guests a worry. She can enjoy new confidence and freedom that will enhance her reputation as a hostess who can prepare delicious meals, large or small, with ease even on the short-

est notice.  
The housewife has been increasingly delighted with the savings and economies she can make by preparing her own fresh foods plus taking advantage of bulk buying.

**Slaton's Dealer**  
Representative of the home freezer units which have made their appearance on the market is the RCA Whirlpool Tite-Seal Freezer. Slaton Reddy Killowatt dealer who handles a complete line of RCA Whirlpool Freezers is Bain Auto Store at 146 W. Garza. In the RCA Whirlpool Freezer, according to the local dealer the "natural goodness and color of foods are retained. The cold is sealed in by the exclusive Tite-Seal door. And,

your foods are protected by the "constant zero" automatically maintained inside the freezer.

**No Dials**  
"There are no dials or controls to bother with... the temperature is permanently set at the proper level for holding peak flavor in your foods. When you serve dishes from the RCA Whirlpool Freezer the whole family will agree that the foods are as delicious and fresh as the moment they were frozen," he stated.

Some of the features of the freezer he handles, according to Bain, include dry cabinet construction. Bothersome sweating is eliminated because the unique construction prevents moisture from forming on freezer door and outside walls.

**Roll-Out Baskets**  
Roll-out baskets, mounted on silent, easy rolling nylon bearing baskets provide handy storage for packages and most-used items of frozen food. Each basket has a food capacity of 74.2 pounds.

Scientifically-spaced freezing coils are located on four fast-freezing surfaces including three large shelves. All food is on or directly below a prime freezing surface. The open, grid-type shelf construction eliminates sticking of packages to shelves.

**Tite-Seal Door**  
Tite-seal door compresses the multi-ribbed, super-size gasket to seal all the cold inside. At a fingertip touch, the door glides open. As a safe-guard, a lock is built into the distinctive handle.

Juice can dispenser, located on inside of the storage door, holds 20 cans of fruit juices and frozen soups. Chute serves them one at a time... take one can and another drops into its place.

Two package dispensers are also located on the storage door. Each dispenser holds 32 packages. Take one and another drops into its place. Extra shelf above dispenser holds 16 more packages.

Along with a five-year warranty on the hermetically-sealed compressor the owner of a RCA Whirlpool receives a three-year food protection warranty against food spoilage.

### "INVISIBLE" PLATINUM WIRE

Crosshairs used in microscopes and telescopes are often made of platinum wire with a diameter as small as four one-hundred thousandths of an inch. Platinum is used for this wire, which is so fine that it is invisible to the naked eye, because it will withstand the drastic working operation to make it so fine. In its fabrication, a larger platinum wire, surrounded by a heavy silver jacket, is drawn to a small over-all diameter. The silver is then dissolved away, leaving the minute platinum wire core.

Mr. and Mrs. G. W. Privett and Mr. Privett's mother, Mrs. Effie Privett were sight seeing in New Mexico last week.

Bentley Page and son, Kyle were business visitors in Abilene this week.

From where I sit... by Joe Marsh

### Confused "Sit"-uation

Been meaning all week to tell you about Curley Lawson's "baby-sitting" experience.

His Mrs. left him in charge, about seven p.m., with instructions not to let the children come downstairs. So Curley read his paper and whenever he heard footsteps on the staircase he ordered the culprit back to bed. Happened three or four times.

Little while later, Mrs. Miller from next door came over to inquire if Curley had seen her Sonny. "Here I am, Mom" came a voice from upstairs, "But Mr.

Lawson won't let me go home."

From where I sit, jumping to conclusions like Curley did, doesn't always make for an amusing story. I'm reminded of the people who—without due consideration—have concluded that I'm wrong to like an occasional glass of beer. Well, to my way of thinking, that's not only intolerant... but, what's more, "minding" the other fellow's business is not the American way.

Raymond Wilkins will lead the prayer service on Wednesday night, August 1. Harley Castleberry was in charge of the prayer service on Wednesday night of this week.

### A "MOUNTAIN OF MEAT" IS MOVED

The best thing to do with a surplus of any commodity is to encourage people to buy it and to use it. That truism has been followed with outstanding success by the meat industry and other interested groups.

In 1955, livestock and meat production reached new high records. It was clear that all this meat couldn't be moved smoothly from the farms and ranches of the producers to the homes of the consumers unless something special was done. That was done.

The National Live Stock and Meat Board generated consumer interest with educational activities in and out of the schools.

The American Meat Institute, representing the packers, and individual companies in the meat industry, further stimulated consumer interest through advertising and promotion.

The Department of Agriculture carried on a program in which public attention was drawn to the excellent values meat offered.

Retailers cooperated to the full in promoting increased meat sales. The "mountain of meat" was moved—and moved into consumption, not storage.

The Wilson First Baptist Church will begin a revival meeting Monday, July 30th to continue through August 5th. Two services will be held each day, one at 10 a. m. and the night service at 8 o'clock.

Rev. Raymond Bowlin is the evangelist with Mr. Russ McCormick singer. Everyone is cordially invited to attend these services.

### UNITED STATES "NICKEL"

The United States five-cent coin, commonly referred to as a "nickel," was first issued in 1866. Containing 75 per cent copper and 25 per cent nickel, it is one of the most popular and useful coins in the United States coinage system. If all the "nickels" minted since 1866 were laid flat in a single row side by side, they would reach around the earth at the equator with a good many miles to spare.

### NEW IRON ORE RECOVERY PLANT

The first unit of International Nickel's new iron ore recovery plant near Copper Cliff, Ontario, began operations at the end of 1955 and the first commercial shipments of iron ore, analyzing about 68 per cent iron, were made early this year. Built at a total cost of \$19,000,000, the initial unit of the new plant in full operation will treat 1,000 tons of pyrrhotite daily, corresponding to an output of 250,000 tons of iron per year. The main units of the plant's equipment are of larger capacity than any known comparable apparatus built to date.

More than sixty colonies of various foreign peoples are settled in different parts of the Republic of Paraguay.

### Judge Alton B. Chapman

Floyd County FOR ASSOCIATE JUSTICE COURT OF CIVIL APPEALS

"We can do nothing but predict a victory for Judge Chapman in his race for Associate Justice. Judge Chapman is as capable and deserving a Christian man as we have ever known. With the Courts of our land in hands as devoted and capable as the hands of Judge Chapman American Justice in both criminal and civil courts will continue to be a light-house throughout the world."

The above quote was taken from the July 16th issue of the Texas Spur, a newspaper in the town where Judge Chapman finished high school, where he served as County and District Attorney and for the last 19 years as District Judge.

His record on appeals, when the cases he has tried and disposed of are compared to the cases reversed, is better than 98 per cent perfect.

# Disabled Slaton Railroad Fireman Has Promising Invention Approved

Don L. Davis, Director of Operations of the world famous Gadget-Of-The-Month Club, Inc., has advised Reuben A. Thompson, 49, disabled Slaton, Texas railroad fireman, that his new, unusual and ingenious gauze holder has been accepted and approved by the GMC Gadget Jury.

Thompson, a former railroad fireman, had five discs in his back crushed in an accident in 1947. This resulted in a major re-adjustment in his household. "My wife," he explained, "works in her beauty parlor. My son is a butcher, and I cook and keep house for them."

**Gadget Jury**  
Davis explained that the Gadget Jury is the official screening agency of the Gadget-Of-The-Month Club and is composed of experts in patenting, manufacturing, and marketing of new inventions of every kind, nature and descriptions.

A Gadget Jury approval means that the invention submission has been thoroughly evaluated and tested by the experts and found to be new, practical, and possessed of strong commercial potential. Additionally, the Jury approval releases the item to a number of manufacturers who will bid for its exclusive rights and arrange for its national and international marketing.

**Inventor Members**  
Like so many inventor members of the Gadget-Of-The-Month Club, an organization devoted to the stimulation and exploitation of the inventive talent of the individual, Thompson, before his accident, had been able to see a bit of the world. Previous to World War II, he served in the U. S. Navy, seeing duty in Hawaii. He was born in Serling, Oklahoma.

An inveterate tinkerer, Thompson has always been interested in trying to make new things and improvements over old ways. "I was really working on another idea when I dozed off and dreamed a doctor was wrapping my arm with a new-fangled gauze holder," Thompson explains. "That is what led to my own gauze holder. Before starting to work on it I had a long talk with my doctor on the advisability of such a device. He encouraged me to go on, telling me it would be very useful."

**12th Anniversary**  
The Gadget-Of-The-Month Club, Inc., is celebrating its 12th anniversary this year. It was founded by Mary Lou Moffitt, a farmer's daughter from Newton, Iowa. GMC

**GADGET WINS APPROVAL CERTIFICATE**—Reuben A. Thompson, Slaton, disabled railroad fireman, proudly displays his certificate of approval issued by the famous Gadget-Of-The-Month Club, Inc. This award was won by a new invention of an ingenious gauze holder. He says that this gadget is the outgrowth of a dream that he had.

operates internationally. Its world headquarters are located in Los Angeles, and the organization's principal function is to act as a screening and coordinating agency among inventors, manufacturers, distributors from all parts of the world.

GMC is a member of the Los Angeles Chamber of Commerce, the United States Chamber of Commerce, the Invention Industry Association and numerous trade organizations devoted to invention research and development.

**Typical Ingenuity**  
"This invention of Mr. Thompson's is typical of the ingenuity of the American people," Davis stated. "In my opinion it proves that every intelligent man and woman is blessed with 'productive imagination', which is only seeing things not as they are, but as they really should be. Some people call this faculty of creating new and better ways 'invention,' but I think it is better labeled 'productive imagination.' Everyone has ideas, and new and better ways of getting things done, but just seem to lack the determination to do something about it. Or perhaps, it's the lack of knowledge of where to go for help and assistance."

The GMC official continued, "We are satisfied after a decade of study of invention in America that there is a gold mine between the ears of every American and that only doing something about a pet idea can an average person ever hope to become a millionaire overnight. It is difficult to forecast at this time the eventual success of Mr. Thompson's invention, but GMC is determined to push and promote his gauze holder. It has simplicity, utility, practicability, and good basic consumer appeal."

**Profitable Sideline**  
Davis added, "It is not surprising to find a person who has been crippled, like Mr. Thompson, turning to inventing as a hobby and perhaps a profitable sideline. Many GMC inventors are handicapped and their handicaps seem to provide additional incentive and often the time to work out ingenious ideas."

The GMC official concluded, "It's the very simple, handy, and useful inventions that really make good when they catch on. Interestingly enough, most persons, unlike Mr. Thompson, do not pay

enough attention to, nor have sufficient faith in the simple, every day useful inventions. Yet, invention history records that some of the greatest money making devices were those like that of the man who put a 'hump in the bobby pin, the eraser on the end of a lead pencil.' If more people did something about the simple, daily shortcuts that they have devised in their own homes, the world would be an easier and happier place in which to live and the inventors would make a lot more money."
