Slaton, Lubbock County, Texas

Vol. 12. No. 35. May 25, 1923

## SOCIAL EVENTS OF SLATON AND COMMUNITY DURING PAST WEEK

### Junior-Senior Banquet.

The juniors of high school banqueted the departing seniors at the Hotel Singleton last Tuesday evening, beginning at 8 o'clock.

The dining room was beautifully decorated with draperies from the ceiling of purple and white crepe paper, the senior class colors, and each table was centered with an attractive bouquet of cut flowers.

John Bagby, president of the junior class, was master of ceremonies, while toasts were heard from Miss Melva Bourland, junior; Marion Anderson, junior, and Miss Lois Morgan, senior class teacher. Mr. Sone, superintendent of schools, made a very effective talk, during which he placed the following letters on the wall, one under the other, and indicated verbally the significance of them: J, joyous, and S, serious; U, united and E, enthusiastic; N, nifty; I, industrious; O, optimistic; R, reliable; S, sweet. Between the four courses Miss Audrie Philips gave an appropriate reading; Miss Margie Harris a beautiful piano solo, and Miss Lois Stallings pleased the listeners with one of her selected vocal solos.

We, as seniors, realize that this is a large part of the climax of our high school career, and we shall only leave the next year seniors with fond remembrances of their unselfish attitude and leaving in confidence our place to be filled by them, knowing well that they will even improve the senior name.

Miss Olive Michael, junior teacher, was in a large measure responsible for the success of this splendid banquet.

### Civic and Culture Club.

The Civic and Culture Club will hold their annual open meeting at the home of Mrs. L. B. Parker Saturday afternoon, with Mesdames Parker, R. A. Baldwin, H. C. Jones, and Miss Ramsey hostesses.

### Missionary Society.

The society met at the church in the regular Devotional study. Opening song, "Tis So Sweet to Trust in Jesus." Prayer, Mrs. W. R. Wilson. Roll call and minutes read. Mrs. Price led the lesson. Subject: "The Living Christ in Korea."

We had a very interesting program. Those taking part were Mesdames Merrill, R. L. Smith, Odom, and Mrs. E. E. Wilson read the Bible lesson from the third chapter of John, 1-17. Jesus the teacher, a Jericho ruler's testimony. Closing prayer by Mrs. Proctor.

Next Monday we will meet at 3 o'clock in the regular Bible study.

### Junior B. Y. P. U. Program.

Topic: What Baptists Are Doing in Africa.

Song No. 150.

Prayer for the schools in Africa.

Song No. 1.

Violin solo, C. S. Greer.

Leader, Beryl Hardesty.

1. Introduction, by leader.

2. Nigeria and Yoruba Land, Esta Lee Rice.

3. The Religions of the People, Fern Clausen.

4. Beginning Work in Yoruba Land, Viola Mae Bollinger.

5. How the Work Has Grown. (a) New Missionaries; (b) Schools; (c) The Hospitals; J. C. Harris.

6. Some Results of Our Work, Russel Graves.

7. Poem, Katrina Houston.

8. Poem, Mildred Boyd.

Lord's prayer repeated in unison.

### Baptist Circle No. 1.

Circle No. 1 met with Mrs. Eubanks Tuesday. A goodly number was in attendance. Will meet next Tuesday with Mrs. J. V. Hollingsworth, and the Bible lesson study will be found in the Royal Service. Parts to be given as follows:

Part 1, Mrs. Driver.

Part 2, Mrs. Selmon.

Part 3, Mrs. Hollingsworth.

Part 4, Mrs. Hubbard.

White's Cream Vermifuge is certain destruction to intestinal worms. It is harmless to children or adults. Price, 35c. Sold by Slaton Drug Co.

### Notice—Summer School.

Pupils who have spent the year in school and have failed by narrow margins may have the privilege of attending a summer school in order to work off these subjects. No pupil who is well advanced for age will be allowed to attempt the making of this work in summer session.

If you want to attend the summer school meet at the west ward school on Monday, June 4th, for a conference and a permit to attend this school. None but competent teachers will be allowed to take these classes, as well qualified as those of the regular session. The school will open June 11th and continue two months.

C. L. SONE, Supt.

## Personal Mention.

Miss Vertezuma McReynolds is reported quite sick.

New extracted honey at JONES Grocery. Phone 195.

Miss Fowler of Blackwell, is visiting her sister, Mrs. William J. Klattenhoff.

If you want fresh country butter get it at JONES Grocery, phone 195.

Mrs. D. H. Suite has returned to Olney after an extended visit to her parents, Mr. and Mrs. A. M. Watson.

I want your fryers. Highest market price paid.—JONES Grocery, in front of city water tower.

Net Marshall and family of California, are here visiting the former's sister, Mrs. H. G. Rowley and family.

Mrs. O. D. Wyatt of Fort Worth, spent from Sunday to Thursday with her sister, Mrs. L. C. Odom.

My customers bring me my butter and eggs twice a week. Get that that is fresh.—JONES Grocery, phone 195.

Boys, Kelley's is the place to get your ball goods, balls, bats, mitts and gloves.

Mrs. Jim Stell of Stamford is here visiting her sister-in-law, Mrs. Bob Dyer.

Hamlett & Hanna, real estate dealers, report the sale of a nice residence belonging to Chas. White, to J. W. Thaxton, electrical dealer.

Mrs. L. A. Cozby and children will leave this week for an extended visit to her mother, Mrs. W. F. Upham, at Alexander, Erath County.

Mr. and Mrs. John C. Burton are the proud parents of a son born to them May 23rd. It has been christened J. C., Jr.

Late arrivals at Kelley's: Salt jars, butter jars, salad bowls, mixing bowls, jardiniere, and pitchers, in crockeryware.

Bob Dyer and Mrs. A. M. Watson returned Wednesday from Olney, where they helped to celebrate the fiftieth wedding anniversary of their parents, Mr. and Mrs. J. F. Dyer.

Mr. and Mrs. Ben L. White are rejoicing over the arrival of a fine son, born to them Wednesday. The young man has been christened Ben Henson White.

Rev. and Mrs. F. G. Callaway of O'Donnell spent Sunday here with Mr. and Mrs. F. E. Callaway. Rev. Callaway filled the pulpit at the Baptist church Sunday morning.

Mrs. S. A. Peavy spent the early part of this week in Lubbock with her sister, Miss Grace Boone, who is convalescing after an operation in a sanitarium there.

B. Gentry and family of Millport, Ala., have arrived here for a visit to Mrs. H. J. Gentry and family. They drove through by auto, it requiring eight days to make the trip.

"Better Than Gold," the senior class play to be given tonight (Friday) at the school auditorium. Money well spent to come. About thirty characters to perform. Come out.

Dr. and Mrs. J. Foster Scott and children of Clovis, were here the latter part of last week visiting T. M. George and family. They were en route to Blooming Grove for a visit to relatives and friends.

J. D. Custer and family left Wednesday for Phoenix, Arizona, where he will again enter the picture show business. Slaton regrets to see these people leave, but wish them much success in their new home.

Mr. and Mrs. J. H. Brewer returned Saturday after a week's visit to relatives and friends at Arlington, and also at Dallas, where Mr. Brewer attended the State Bankers' Convention.

T. E. Johnson, editor of the Amarillo Daily News, was in the city yesterday. He was en route home from the W. T. C. C. convention at San Angelo, and stopped off here to get data for an extended development story to be published in the News at an early date.

An attack of heartburn or indigestion calls for a dose of Herbine. It relieves the distress instantly and forces the fermented food into the bowels. You feel better at once. Price 60c. Sold by Slaton Drug Co.

## Angelo Was Scene of Wild Jollification

According to press dispatches the West Texas Chamber of Commerce convention at San Angelo brought from ten to fifteen thousand visitors to that city this week, but that during the second day's session only 98 people were in the auditorium during the meeting, and that ten of that number were officials and newspaper reporters. It is stated that a greater portion of the visitors went to San Angelo for a good time, and evidently accomplished that purpose.

A large delegation headed by R. J. Murray, president, and S. E. Staggs, secretary-manager, attended the convention. R. J. Murray was re-elected a director of that body. Owing to the fact that we are unable to secure a complete list of the Slaton party, it will be given in our next issue.

As usual, the Slaton delegation had an active part in the proceedings, and accomplished much good.

## MANY FROM HERE ATTENDED COUNTY CLUB FEDERATION MEETING AT IDALOU

A meeting of the Federated Clubs of Lubbock County was held at Idalou last Saturday. A splendid program was carried out and the visitors have much praise for the genuine hospitality displayed by the ladies of Idalou.

Those representing the various clubs from this city were: Mesdames W. E. Smart, R. A. Baldwin, J. W. Wallace, B. C. Morgan, W. Y. Price, J. F. Frye, Carl Greer, E. N. Pickens, J. R. McAtee, J. S. Lanham, C. L. Sone, N. G. Whipple, Keys, W. E. Johnson, W. Donald, W. B. Russell, Ray Stephenson, W. B. Montague, H. G. Rowley, R. L. Smith, and R. G. Shankle.

Posey was represented by Mesdames J. L. Benton, Bennett and Vines.

Wilson was represented by Mrs. L. Lumsden.

## EFFORT TO KNOCK OUT TECH COLLEGE FAILS

Austin, May 23.—An effort to repeal the Texas Technological College act apparently has failed with the reporting today of the Fields bill proposing such action unfavorably by the commerce committee.

The report was unanimous, thus killing the bill unless it is referred to another committee or introduced in the Senate. The committee had the bill before it but a few minutes when action was taken.

Although a majority of the house today voted to recommit the Fields bill which proposed repeal of the Texas Technological College act, the necessary two-thirds vote for such action was lacking and the measure probably will not be brought up again this session. Representative Fields moved to recommit the measure after the commerce committee had unanimously reported it unfavorably. A motion to table the Fields motion was lost and the final vote to recommit stood 56 to 51.

## HAVE YOU NOTICED THAT:

While the schools of Slaton are next month preparing to graduate a lot of captains of industry, statesmen, and authors, what the country needs just now is more diggers, ploughmen, and dishwashers.

The girls are developing great skill with the tennis racket, but it is not usually claimed they are making equal gains with the broom.

The man who drives the family car usually gets considerable auto-suggestion from the rear seat.

There are always some people who will heartily support a home ball team if they are given free admission to the games.

If the potatoes raised in the garden this summer look as big as pictured in the seed catalog, neither the cellar nor the woodshed will be able to hold them.

Much is being said about marking historic spots, and the boys are attending to the same with their pencils and jack knives on the school houses.

The Slaton people who have let it be known that they wish to buy an automobile this spring have not so far complained that no one has called on them.

Some people think the world is in for another upheaval, and anyway the time has come for spring house cleaning.

If we haven't what you want in the harness line we will make it for you.—WHITAKER & WHITE.

We sell Hail Insurance that insures.—Stephenson Bros. Ins. Agency.

"Day by day in every way" our shoe repairing is getting better and better.—WHITAKER & WHITE.

## Cyclone Hit McLean Monday Afternoon

### TWENTY FAMILIES HOMELESS AS RESULT OF WIND STORM.

McLean, May 21.—McLean narrowly escaped a tragedy this afternoon when a cyclone struck the extreme south side of the town, and though it entirely demolished several houses, no lives were lost and no one reported hurt.

The storm struck at 4:30 but the cyclone had dipped down several times and the citizens were watching the clouds closely and at the time it struck most of them were in storm cellars. The cloud came from a southwesterly direction and continued to scatter destruction for several miles down the highway toward Shamrock, and in a northeast direction.

No estimate can be made of the damage done to property, crops and live stock. Thus far only two persons are reported to have been out in the storm. Stella Roby and her little nephew, who live a mile east of town, were at home alone and they attempted to go into the cellar, but were unable to get the door open and were out in the entire storm. The house was blown away but neither child was hurt.

Immediately after the cyclone there was a terrible hail storm, with stones measuring six and eight inches in circumference.

All telephonic and telegraphic communication with the east are entirely destroyed.

## BACCALAUREATE ADDRESS OF SLATON HIGH SCHOOL AT BAPTIST CHURCH SUNDAY

The Baccalaureate program for graduates of Slaton high school will be held at the Baptist church next Sunday morning beginning at 11:00 o'clock. It follows:

Voluntary, Miss Ramsey.

Hymn, "Holy, Holy, Holy."

Prayer.

Song by choir.

Lesson from the Old Testament.

The Gloria Patri.

Offertory.

Duet, Mrs. C. F. Anderson, L. B. Parker.

Sermon: "The Influences That Make Character," Rev. E. W. Dodson.

Doxology.

Postlude.

## AT THE BAPTIST CHURCH.

Sunday School 10 a. m. Paul Owens, Supt.

Preaching at 11 a. m. by Rev. B. W. Dodson, Baccalaureate sermon for high school.

Young peoples' meetings in afternoon as usual.

Preaching at 8:30 p. m. by the pastor. Baptismal services at close of evening sermon.

Public cordially invited to all our services. JNO. P. HARDESTY, Pastor.

## NOTICE, PATRONS.

During my absence Mr. R. A. Henderson will have charge of my shoe repair shop. He is thoroughly capable of handling the work, and your business will be appreciated as usual. MRS. A. L. COZBY.

J. L. Preston has returned from a visit to the bedside of his mother, Mrs. E. J. Preston of Fort Worth. His mother was improved when he left.

For every purpose for which a liniment is usually applied the modern remedy Liquid Borozone, will do the work more quickly, more thoroughly and more pleasantly. Price 30c, 60c and \$1.20. Sold by Slaton Drug Co.

Mrs. Carl Goodman of Abernathy, president of Seventh District of Women's Clubs, is a guest in the home of Mrs. W. E. Smart. Mrs. Goodman will be present at the open meeting of the Civic and Culture Club Saturday afternoon.

Mr. and Mrs. J. P. Posey and daughters, Miss Addie Lou, and Mrs. Roe Gainer and husband, in company with Mrs. Posey's father, I. N. Dillard, all of Lubbock, spent Sunday here with Mr. Dillard's daughter, Mrs. L. C. Odom.

Seat covers will protect the upholstery of a new car, and will make an old car look 100 per cent better. We fit any make or model. Inspect our seat covers and let us quote you prices.—WHITAKER & WHITE.

## QUICK RESULTS.

An exchange says that after praying for forty years for a baby, a Minnesota couple placed a small want ad in the newspaper and that same night a bouncing baby was left on their door step. The exchange adds that prayer is all right if you are not in a hurry, but for quick results advertise.

## W. W. Johnston Interested in South Texas Oil Well

W. W. Johnston received a telegram last Saturday from business associates at Gonzalez, stating that the Hardeman oil well had been brought in and was flowing at the rate of 500 barrels per hour.

This well is located in Caldwell County, about twenty miles northwest of Gonzalez, and is the fifth producing well to have been developed in that particular field.

W. H. Kokernut, whose brother H. L. Kokernut, was well known in this section, is president of the company. He with Mr. Johnston and a few other substantial men, organized and financed this company for the purpose of developing properties they own in that section, and are not offering any stock for sale.

The Hardeman well is just ten mile southwest of Mr. Johnston's ranch, which property he hopes to develop at a later date perhaps. He returned from Gonzalez only a few weeks ago, where he had spent the past several months looking after his interests, and expects to return there within the next few days.

During Mr. Johnston's short residence in this section he has made many warm friends who wish him much success with his oil properties.

## RECITAL TUESDAY EVENING DELIGHTED LARGE AUDIENCE

A recital was given at the high school auditorium Tuesday evening by the pupils of Miss Grace Lanette Bailey, piano and violin, and Miss Margaret Whitaker, expression. It was unusually well attended and was an evening of pleasure for all present. The following program was rendered:

Poika Mignon, Baumfelder, Lorene McClintock.

Billy and Jimmie, Calhoun, Merle Tudor.

Whippoorwill, Severn, Joseph Brewer.

Don't, Dr. A. O. Browne, Maxine Odom.

Meadow Flower, G. Millward, Mary Anton.

Almost Beyond Endurance, Riley, Bonnie Lee Abel.

Playful Kittens, Lawson, Adean Rust and Miss Bailey.

When I'm Married, Doris Mixon.

Le Secret, Gautier, Dayton Eckert.

Wood Ticks, King, Josephine Adams.

False Idylle, Atherton, C. S. Greer.

Bondo Mignon, Baumfelder, Inita Lowery.

Punishment of Robert, Flora Mae Cook.

Ours, Cadamus, Ella Loise Gentry.

## WILSON.

Dixon Green and wife of Shiner, Texas, are visiting L. Lumsden and family this week.

Ralph Deaver and family are visiting in Oklahoma this week.

Rev. Stewart filled his regular appointment at Seagraves Sunday.

A coat of paint is improving the appearance of the Baptist church, as well as other repairs.

M. F. Klattenhoff of Slaton was a business visitor here Monday.

Miss Ida Bird of Merkel spent last week with P. E. Bird's family.

Miss Clara Byers will give her musical recital Friday night.

Rufus Hendrix and wife visited their son near Post last week.

Miss Clara May is in San Angelo this week attending the West Texas Chamber of Commerce Convention.

## PRESBYTERIAN CHURCH.

On account of the Baccalaureate service at the Baptist church the Presbyterians will not hold any service Sunday morning. The evening service will be held at the City Hall auditorium. The general public has a cordial invitation to be present and hear Dr. Browne.

## Infant Died Monday.

Chas. Leslie, Jr., age 3 days, infant son of Mr. and Mrs. Chas. Leslie Tanner of this city, died early Monday morning and was buried Monday afternoon. Rev. Jno. P. Hardesty conducted the funeral services. Funeral arrangements were under the direction of the undertaking department of Foster Furniture Co.

When your breath is bad, appetite poor, and you feel "blue" and discouraged, you need Herbine. One or two doses will set you right. It is a great system purifier. Price 60c. Sold by Slaton Drug Co.

We are paying 20 cents for eggs.—C. O. HEFNER, City Market & Grocery. Phone 43 for fresh groceries and meats.

Now that spring is here let us put a new top on that car.—WHITAKER & WHITE.

FOR SALE: 7-drawer, drop head, Singer sewing machine, good as new, for only \$35.00.—ELROD'S SECOND HAND FURNITURE.

### CONCERNING COLDS

"What is the best thing to take for a cold?"  
"I'm not sure. But the advice of your friends is the worst thing you can take for a cold."

### IN THE SPRING

First Pup—Can trees bark?  
Second Pup—Sure; didn't you ever hear of the bark of the dogwood tree!

### YOUTHFUL FOLLY

"Yes, he was a high-flyer when he was young and now he has gout in his wings!"

# In Linen Frocks

Simple Lines Feature the New Outfit for Women's Summer Wear.

Charmingly Simple Is This Frock of Taffeta

This winsome little frock, a Paris model, is of gray taffeta, set off by Dutch collar and cuffs of white organdie and a necktie, skirt band and girdle of black satin.

Various style types are shown in linen dresses for midsummer occasions, and although the general outline of these frocks is simplicity itself, a generous selection of numbers are distinctive because of their trimming. Drawn work, yarn embroidery, silk embroidery and linen stitcheries are alternately used on these dresses.

Stitched embroidery of oriental effect is extensively used on models of tailored street appearance and fine silk embroidery trims the daintier afternoon frocks of linen. Yarn embroidery is most effective and drawn work reflects the popularity for anything hand-made. Eponge is another wash material used in the developing of tailored frocks, and some printed patterns are to be found in this group.

The kerchief mode, which has so far been confined to silk expression, is incorporated in the new trimming treatments. Some very trim gingham dresses have large organdie collars in kerchief effect and it gives an entirely new appearance to this crisp fabric, which is generally fluted. Flocked voiles seem to summarize the practical needs of cool wash dresses, and following the styles of smart summer skirts many of them are made with long girdled bodices and knife-plaited

Coat-Dress Worn Over Foulard Frock in Scarlet and Black, Frilled with White Organdie.

skirts. The very fact that the majority of them are brown and dark blue means that they will require few washings in a season.

One of the very good three-piece wash dresses is made of an ecrú eponge with bodice of fine tucked voile. The double tiered skirt and similar style features are to be noted.

## The Knitted Cape Is Latest Paris Fashion

The Riviera, writes a Paris fashion observer, is having a big craze for knitted goods, knitted suits, blouses and sweaters in combination of wool and silk and in all-silk. These are both hand-made and machine-made. In some of the latter the patterns look

like a fabric, a beautiful brocade as it were, so cleverly is the pattern thrown to the surface.

Most of the new motor wraps are in the form of big knitted capes. It has gotten to the point on the Riviera that a woman is really not smartly dressed for informal day occasions and for out-of-door sports unless the garment she wears is knitted. Half of the popularity of this style is owing to the fact that it packs so easily and is always ready to wear and the other 50 per cent is represented in its beautiful colorings. Women dare to wear bright yellow, bright coral, cerise and green garments fashioned by the needle and the hook who would not presume to wear the same color in a woven fabric.

## Many Nice Things for the Summer Wardrobe

It is evident that there will be any number of beautiful but inexpensive fabrics from which women may choose their summer wardrobes, notes a fashion authority. The only difficulty is in avoiding the eccentric, for designers, both French and American, in their constant struggle for something new, have often been led into extreme and trying effects. But if a woman has taste she can, from the great quantity of new things shown, be sure of possessing becoming frocks and flattering hats. So it is worth while spending time searching for the best from among these new things.

### Long Veils

New veils from Paris come in prodigious lengths. One in the modish all-over vermicelli pattern is nearly three yards long. These veils fall in long lengths from the sides or back of the hat. Sometimes they are wound about the neck and fall in a long streamer over the left shoulder—in fact, the mode of adjusting the veil is merely a matter of individual fancy.

### Spring Millinery

Quantities of georgette and taffeta are being used in spring millinery. Often they are made into tricorns or very plain little hats, whose only decoration is a lace veil artistically draped.

## Broad-Brimmed Chapeau for the Larger Women

There are rumors in millinery circles to the effect that the broad hat is coming in again. We have clung so persistently to the little tightly-fitting affairs that there is no doubt we would welcome a change. Large hats are clumsy to get about in and hard to keep in perfect shape, but then they have the advantage of being picturesque and of forming frames for the faces under them that add all sorts of charm and good looks.

Broad-brimmed hats are best for the larger women. They conform to their bluntness in build. Their lines fit in with the lines of the clothes that such women must wear, and the spreading shapes do everything that is pleasant by way of throwing the countenances and the figures underneath them into the proportions that they should assume.

If a woman has a large face the little, draped turban hat does not suit her at all. If she will wear a small hat it must be built to order to assume the measurements that will fit the head and properly top off the

face. Now, with the hat of large brim it is different. That is just naturally adapted to larger proportions and lines. It can be posed upon the head and it will look right at once. There need be no fussing about it.

The broad-brimmed hats of this season are made of rather transparent stuffs. Often the straw braids are so filmy in character that the hair and its dressed waves show through the crown almost as though there were no covering imposed. The crowns are round and simple, quite fitting the shaping of the head. Then the brims are flopping with wires only around their outer edges. The trimmings are flowers or ribbons or silk or velvet, or they are embroidered designs, but they are always put on with the utmost simplicity and arranged to show their own decorative effect.

### In Silver or Gold

The bandanna kerchief has become so popular it is even invading the ballroom, and is seen in gold or silver brocade, tied in a careless knot.

**CORNELL GRAPPLERS DEFEAT NAVY IN TOURNAMENT**

MacWilliams (Cornell) getting behind Ray (Navy) on the mat in the 115-pound class, at the recent wrestling tournament in Troy, N. Y., when Cornell scored 13 to the Navy's 11.

**Clenched Teeth Act as Shock Absorber**

Johnny Coulon, former bantam-weight champion of the world, brought up the subject of teeth in connection with boxing during a recent fanning bee.

Coulon also has a fine set of choppers. "I always considered my teeth an asset to me while I was boxing," Johnny said. "Take a look at them as I clench them, and tell me if you can find any unevenness about them. I discounted the effect of many a hard wallop by gritting my teeth as it landed.

"You see, tightly clenched teeth act as a shock absorber and lessen the impact. On the contrary, when a boxer has uneven teeth his jaws are likely to be loose and the shock of a blow jabs them together. Then, also, the mouth and lips are easily cut, and this is a great drawback."

**Lord Murchinson**

Loren Murchinson, sprinter, created a new world's record for sixty yards at the indoor meet of the Millrose A. A., held at Madison Square Garden, New York. Murchinson established figures of six and two-fifths seconds for sixty yards, lowering the old record, made in 1882 by Lon Meyers, by a fifth of a second.

**Bobby Wallace Puts in 24 Busy Seasons**

Very few professional baseball players ever will approach the record of Rhoderick J. Wallace, who starred first in the National league, then in the American, was manager and then umpire before his 24-year career closed.

"Bobby," as he is better known, is nearing his fiftieth year. He broke into baseball in 1894 as a member of the Cleveland Nationals. He wound up his active career in 1918 with the St. Louis Browns. In 1922 he managed Muskogee of the Southwestern association.

**Plans for Memorial for Rube Waddell**

Plans for a memorial over the grave of Rube Waddell, one of baseball's greatest of all time, have been completed, and a monument costing \$500 has been selected to mark the site where the famous athlete lies buried at San Antonio, Tex. The matter is in charge of President Benson, of the San Antonio club, who has appealed to the presidents of the two major and the larger minors for contributions.

**Bill Aims to Limit Price of Admission**

A bill which is about to be introduced into the New York state legislature will prohibit any club charging more than \$5 for the best seat for a regular show and limit the price to \$7 for any championship battle. According to men well informed in boxing circles here, if such a bill is passed, it will mean that New Jersey will be the scene of most of the big battles. While in New Jersey boxing is limited to twelve rounds without a decision it is felt that Jersey may become the center of boxing.

**Manager Wade Killefer**

Wade Killefer, brother of Bill Killefer, manager of the Chicago Cubs, who has just been elected manager and is part owner of the Seattle Baseball club. With Wade Killefer in charge of Seattle and Marty Krug in charge of the Los Angeles team, it is expected that the Chicago Cubs will have plenty of young material available at all times.

**Cleveland to Experiment With Full-Blooded Indian**

Cleveland this year is going to experiment with a full-blooded redskin from the Huron tribe. The latest Indian to break into the big leagues is a left-hander, and the combination of wrong-handedness and Indian blood should produce some colorful moments in the life of Manager "Spoke" Speaker, player-manager of the Cleveland Indians. Moses Yellowhorse, the Indian twirler with Pittsburgh last season, will play out on the coast this year, as he went West in the deal for Kunz.

**One Club Not Enough.**

Ira Thomas and the millionaire oil men associated with him in ownership of the Shreveport Texas league club have more money than they can spend. They also have bought a controlling interest in the Meridian club of the Cotton States league.

**Hummel Signs Contract.**

John Hummel, ex-outfielder and first baseman of the Brooklyn Nationals and later pilot of the Reading International league team, has signed a contract to manage the Birmingham, New York-Pennsylvania State League club.

**Adds Two to Roster.**

Zinn Beck of the Greenville Sally team has added two former Cotton States league players to his roster. They are Peck Williams, a pitcher obtained through Detroit, and Pitcher Ed Tinney.

**College Star Gets Job.**

Harry Randolph, captain of the baseball and football teams of Bethany college, has signed a contract as pitcher with the Birmingham (Ala.) club of the Southern league.

**MORE GOLF COURSES IS GENERAL DEMAND**

Over Million Tickets Were Issued in 1922 to Enthusiasts of Game in Chicago.

The pressing need of more golf courses to supply the demands of the increasing army of golfers was shown by the compilation of the numbers of golfers who played over Chicago's links during 1922. While more than 1,000,000 tickets were issued, starters said three or four times as many would have been in demand if there had been room for play.

The courses were crowded from dawn to dusk from earliest spring to latest fall, and players were sent out in fours, so close to each other that two or three foursomes were on each hole. The largest number were accommodated at the 18-hole links in Jackson park, where 124,584 players teed off, or 5,000 a day from March to December. This required the starting of four players every five minutes from 6 a. m. until 5 p. m. on the average.

The dearth of links in proportion to players has started the building of nearly a dozen pro-rata courses in Chicago, where the golfer may pay as he plays, without the formality of joining a club. These courses cost the golfer somewhat more in cartage and fees; but do not require much more time, for he is able to play on arrival, and cover the course in half the time he takes on congested links.

Plans are already under way in Chicago to build a score more pro-rata links, and the forest preserve commission, with room for 50 additional links, is planning a half-dozen for the near future.

The largest play on any private links in the world was that at the Olympia Fields club, Chicago, which, with three 18-hole courses, took care of 60,000 golfers in 1922. It was estimated that the other 65 private golf clubs in Chicago provided for some 100,000 golfers last year, these courses lying idle most of the day except week-ends and holidays.

**Vincent Richards**

Vincent Richards, the youthful American tennis star, played an exhibition game on the courts of the Princess hotel, Bermuda, with Hon. F. M. B. Fisher of New Zealand. Richards won the first two and only two sets played by a score of 6-0 and 12-10.

**IN THE SPORTING WORLD**

Razzing the umpire is one form of a "pan" American gathering.

Chicago and Ohio State have entered a five-year football agreement.

Lafayette college, Easton, Pa., will occupy its new \$300,000 gym in the fall.

Record for receipts for a soccer game, \$65,000, was established in 1921 at Tottenham.

Connie Mack has a team better fitted for championship play than any he has produced since 1914.

"Chad" See, former Brooklyn semipro pitcher and later an outfielder with the Reds, will play with the Newark International League team during the 1923 season.

**EARLY TROUBLES OF BABY CHICKS**

"Leg Weakness" Is Indicated When Toes Draw Backwards or Turn to Either Side.

**IS COMPARABLE TO RICKETS**

Is Characterized by Deficiency of Lime and Phosphates in Bones and Lack of Rigidity—Cod-Liver Oil Effective.

(Prepared by the United States Department of Agriculture.)

Early-hatched chicks frequently develop the condition known as "leg weakness," say specialists of the United States Department of Agriculture. Its onset is indicated when the toes draw backwards or turn to either side. Later there is lameness, incoordination of movement, and distinct weakness of one or both legs. At times the bill becomes twisted and causes difficulty in feeding.

This condition should not be confused with the infectious diseases of baby chicks such as, bacillary white diarrhea, coccidiosis, and brooder pneumonia; for in the former case the weakness of the legs is the most marked symptom, while in the latter cases it develops shortly before the death of the bird and only as a result of general bodily weakness. Also, the course of the condition is not so acute as is that of the infectious diseases, and the mortality is not as high.

**Comparable to Rickets.**

"Leg weakness" in chicks is comparable to rickets in other young animals. It depends primarily on interference with normal nutrition of the body. It is characterized by a deficiency of lime and phosphates in the bones and, consequently, a lack of rigidity. The deficiency may be due to insufficient bone-forming substances in the feed, or to the failure of the body to properly utilize the material available.

It has become apparent that a number of conditions other than mineral shortage may affect the system of the chick in such a manner as to interfere with nutrition and bring on "leg weakness." Among these may be mentioned lack of certain vitamins which influence digestion and assimilation of food, close confinement with little room for exercise, absence of sunlight, cold and dampness, concentrated feed unaccompanied by green or other bulky feed, and little or no animal proteins.

To counteract "leg weakness," any of the conditions given, if present, should be corrected. A monotonous ration and over-feeding should be avoided. Green feed if possible, or sour milk, should be provided. The chicks should be allowed outside range and sunlight as early as possible. Placing sod in the brooder is beneficial. Also keep broken oyster shell, or calcium phosphate available.

**Cod-Liver Oil Is Effective.**

The United States Department of Agriculture states that the best medical treatment for chicks which are being raised under conditions conducive to "leg weakness" is cod-liver oil. This has a specific effect upon lime and phosphate metabolism within the body, and promotes normal bone formation. It is rich in all vitamins, but apparently contains a special vitamin which concerns itself with the disposition of at least some of the minerals required in the animal system. Cod-liver oil may be mixed with the feed for both affected and apparently healthy birds in sufficient amount so that each chick will get about five drops daily. It serves both as a treatment and preventive of the rachitic type of "leg weakness."

**DO NOT MAKE GOOD MOTHERS**

Neither Geese nor Duck Hens Like to Sit on Eggs—Well to Make Use of Incubator.

Neither geese nor duck hens make very good mothers, and sometimes ducks refuse to make nests or to sit at all. For this reason it is well to have an inclosure for ducks, and to keep them confined each morning until after the eggs are laid. The eggs should be incubated with a chicken hen or in incubators. The chicken hens will give them much better care than their natural mothers would.

**Sow Sweet Clover Seed.**

You can sow sweet clover seed any time now, perhaps the sooner the better.

**Damp Beds Cause Trouble.**

Damp beds are responsible for pneumonia, bowel trouble and skin diseases among pigs.

**Planting Carrot Seed.**

Deep planting for carrot seeds is best. Plant them half an inch deep.

**GOOD TREATMENT OF LEGUMES IS NEEDED**

Alfalfa and Clover Insist on Plenty of Lime in Soil.

Type of Material to Use Is the One That Gives the Most Calcium Carbonate or Its Equivalent of Proper Fineness.

Legumes, since they are such a valuable part of agriculture, have a right to demand, as they do, that conditions for their growth shall be as they want them. That alfalfa and red clover, for example, insist on a fair supply of lime in the soil.

If the soil contains limestone, is neutral, or even slightly acid, no lime need be added, but if the soil is very sour, lime should be put on before seeding red clover. Where clover fails frequently or does not thrive and produce a good crop, lime is usually necessary, and should be applied every time clover is seeded at the rate of one ton or more per acre in the form of limestone, or its equivalent in other forms.

Three forms of lime are in general use: Limestone, "hydrated" lime, and burned or quicklime, together with smaller quantities of marl and oyster shells.

The form of lime to use is the one that gives most calcium carbonate, or its equivalent, of proper fineness, spread on the land for each dollar paid out for lime, freight and labor of hauling and spreading.

For red clover it is usually not necessary to neutralize the acidity fully. Alsike stands more acidity, while vetch and white clover, peas and field beans, are still more resistant to soil acidity. Soy beans respond to conditions favorable to red clover. Alfalfa and sweet clover need more lime than does red clover, and it is desirable to know something of the lime content of the subsoil down to 20 to 30 inches below the surface.

**COMPOSITION OF PRESS CAKE**

Dry Material Produced in Manufacture of Sugar Beets Good for Liming Soils.

The dry material of the filter press cake produced in the process of manufacturing beet sugar consists largely of calcium carbonate, according to the findings of the United States Department of Agriculture and undoubtedly affords a satisfactory material for liming soils. It also contains comparatively small quantities of nitrogen, phosphoric acid, potash and organic material.

The results of the analysis of a number of representative samples of filter press cake are set forth in Department Circular 257, "Composition of Filter Press (Lime) Cake," by Sidney F. Sherwood, chemist in the bureau of plant industry. A copy of this circular may be had upon request from the United States Department of Agriculture, Washington.

**TURKEYS RAISED FOR PROFIT**

Purebred, Healthy Stock Is to Be Preferred Always and of the Large Varieties.

Not very many of us ever have stopped to think of the possibilities in raising turkeys for profit. Purebred healthy stock is to be preferred always, and of the large varieties, birds that bring down the scales to more than the required standard for the large breeds. For the large type birds, the price also is greater. The purebred Bronze or Narragansett turkeys are the largest breeds, and are as easy as any to raise. The Bourbon Reds also have become quite popular, but are not quite so large.

**"MOTHER" INCUBATOR CHICKS**

To Succeed With Young Fowls One Must Be Patient and See That They Learn to Work.

If you would succeed with incubator chicks, "mother" them a bit. Be patient with them and see that they contrive in some way to learn to work in the days of their youth—extreme youth. The mother hen, if you will observe her closely, teaches each of her children how to scratch, paying particular attention to the backward pupil. If wee sma' chicks are to become great sturdy pullets and cockerels, they must early get the habit of exercise, of "rustling" for their feed.

**Avoid Needless Changes.**

Don't change the positions of the roosts, nests, hoppers or water fountains unless absolutely necessary. When this is done frequently the birds become bewildered and irritated, and frightened hens lay few eggs.

**Concrete Feeding Floors.**

Concrete feeding floors and hog-house floors are a gilt-edge investment.

### Hogville Items.

Friday: The lodge witch pa belongs to must have a lot of nice men in it I gess. 1 of them was here at aire house tonite and he tawked to me and ast me all about how I was gettin on in skool and base ball and shinnie etc. and when he left he told ma and pa rite in my presents that I was a brite young man. And I beleaved him even if I new he was a lieing to me all the time. But I am only a yuman bean.

Saturday: Pa got called down for a nother miss stake he made on the noose paper today. They are taring down a old house up town and the editor went and rote a big peace about it. Then they is a young lady got married this week & he rote a story on that. And then he had pa to set up the hed lines for the paper. And wen the paper cums out pa had put over the wedding peace the hed line witch sed OLD LANDMARK GONE.

Sunday: The other day the teacher told us in skool that heat perduces anger witch means to go and get mad in other wirts. And I diddent no just what she ment, but today when we was out driveing in the 2 handed ford I new what she ment when pa accidently tuk hold of a hot spark plug. I cud tell by the way he spoke.

Monday: ma got a letter from her neffew witch is goin to collige to study fur sum thing and he sed he was playing 1st bais now & pa and ma has spent the rest of the day trying to figger out wether he is in the orkestry or the ball team we dont no witch.

Tuesday: Harvey Bickett witch lives in the vacant house across the crick calls his wife Dynamo & when pa ast him why does he call her that kind of a naim he replied and sed Because she all ways charges for every thing.

Wednesday: Blisters fell off of the tale end of a ottomobel today and scratched up his face and his hands and eet. If I was him I wood be skared to do that because nearly all of his Ancestors died frum Fatalities. And then he ketches a hicking when he got home on top of all that.

Thursday: ma says why dont I try and tawk like the latin teacher at skool. She uses such good English ma says. I shud say. She uses good lagwidge that no 1 can tell what she is tawking of.

"Service You Can Trust"

## Texas Utilities Company Official Makes Public Statement Regarding Rates and Service Planned for Slaton

St. Louis, May 12, 1923.—Hon. H. C. Jones, Mayor, Slaton, Texas.

Dear Sir: The purpose of this communication is to confirm verbal statements made by the writer to yourself and other city officials of Slaton on the occasion of my recent visit to your city in respect to construction of proposed transmission line by Texas Utilities Company from Lubbock to Slaton, and also in regard to schedule of maximum rates and charges for electric service and ice supplied by the Texas Utilities Company at Slaton, viz:

1. Texas Utilities Company has purchased all materials and supplies necessary to construct proposed electric transmission line from Lubbock to Slaton, has secured necessary rights-of-way, and arranged for construction crew to begin work immediately and to complete the erection of poles and stringing of wires, etc., as speedily as possible.

2. The maximum rates to be published and charged for electric service after completion of said proposed transmission line rates and charges published and charged in any town served by the Texas Utilities Company with electric service over any of its transmission lines.

3. In case city officials of Slaton should indicate by proper resolution, that the time actually required for purchasing material and supplies and constructing said proposed transmission line, is a longer period of time than consistent with economic and businesslike methods, and should fix the time in which all of said work should be completed (in the opinion of the Mayor and Commissioners of Slaton), then and in that event the Texas Utilities Company will abide by such decision of said city officials and cause the transmission line rates herein mentioned and referred to, to be published and charged as the maximum schedule of rates and charges for electric service supplied at Slaton from and after the date suggested by said city officials as aforesaid.

4. In order to avoid any and all questions of confusion in the mind of the public regarding technicalities in making rate comparisons, the proposed transmission line rates were stated verbally, substantially as follows:

(a) Texas Utilities Company will, upon the completion of transmission line as aforesaid, publish and charge the same maximum schedule of rates and charges for power that said Company publishes and charges in Lubbock. It being understood that the power rate published and charged by the Texas Utilities Company is the same in all communities served by it without discrimination.

(b) That an optional cooking rate of 6c gross with 1c discount for prompt payment or a net rate of 5c for current used for cooking, with a

\$2.50 monthly minimum charge, will be available to electric consumers in all communities served by the Texas Utilities Company. (At the time the verbal statements above mentioned were made in respect to rates, it was understood that the monthly minimum charge for cooking service would be \$3.50 per month, which has, since the date of said interview, been reduced by the Company to \$2.50 per month. This cooking rate is available to all consumers served by the Texas Utilities Company).

Note: The writer requested the Mayor and others interested in the electric rates, to explain to the citizens desiring information at the hands of public officials concerning proposed rates, the reason for the very low cooking rate above mentioned, which was fully explained to city officials and others at the time of our verbal conversation above mentioned.

(c) A monthly minimum charge of \$1.50 applicable to all light consumers served by transmission lines of the Texas Utilities Company, will be applicable to Slaton.

(d) The present maximum rate of 20c at Slaton will be reduced to a maximum rate of 17c as soon as transmission line is completed, or sooner, if requested by city authorities under circumstances above set out.

5. Maximum rates and charges for ice supplied by Texas Utilities Company at Slaton for 1923, are as follows:

Cash ice, 60c per 100 lbs.  
300 or 500 lb. book, 70c per 100 lbs.  
1000 lb. book, 65c per 100 lbs.;  
minimum delivery 50 lbs.  
2000 lb. book, 60c per 100 lbs.;  
minimum delivery 100 lbs.

Where customers use an average of 300 lbs. per day in any calendar month, a refund of \$1.00 per 2,000 lb. book, which makes a net price of 55c in this case.

As explained to you at the time of our recent interview above mentioned, it is very easy for well meaning persons to do a public utility great injustice, by attempting to make comparisons of rates without having all of the facts at hand.

The above matters were, I am sure, clearly understood by yourself and other city officials as well as a number of citizens with whom the writer talked personally, but it is next to impossible to talk to everyone individually concerning a matter in which the public utility company is vitally interested and one which the representatives of the company would be glad to explain fully to any interested citizen. I am, therefore, asking the Local Manager to bring the above matters to the attention of the public at Slaton through the press.

Yours very truly,  
I. R. KELSO.

THE BIG-SIX SPEEDSTER, COMPLETELY EQUIPPED AS ILLUSTRATED, \$1835

## \$45,000,000 Worth of Studebaker Big-Sixes in 1922

The public paid more than forty-five million dollars for new Studebaker Big-Six automobiles in 1922, buying more of this model than of any other car selling in the same price field.

In the entire world there were only eleven other automobile manufacturers whose total sale of all models equaled the sale of Studebaker Big-Sixes for 1922, and no other manufacturer sold as many cars of the Big-Six class. In addition to the Big-Six, Studebaker builds the Special-Six and the Light-Six in large volume.

For the first quarter of 1923, Big-Six sales showed an increase of 70 per cent over the same period of 1922, evidencing the growing popularity of this model. Big-Six popularity is the result of Big-Six superiority. Materials and workmanship are unexcelled in any car at any price, and unequaled in any car at the Big-Six price.

With its long 126-inch wheel base, big 4 1/2-inch tires, heavy frame, scientifically distributed load, long Studebaker-made springs, the Big-Six Speedster rides more comfortably than most cars selling at much more money. Its 3 3/4 x 5 motor delivers a world of power, plenty of speed and a quickness of getaway hard to equal.

The price is the result of quantity production.

The name STUDEBAKER is assurance of quality. It has stood for high grade transportation for seventy-one years.

Two extra wheels complete with tires, tubes and tire covers. Trunk and dust proof cover. Nickel-plated bumpers, front and rear. One-piece, rain-proof windshield. Automatic windshield cleaner and glare-proof visor. Courtesy lamp. Tonneau light with long extension cord. Combination stop-and-tail light. Quick-action cowl ventilator. Eight-day clock. Aluminum bound running boards with corrugated rubber mats and step pads. Aluminum kick plates.

# The Santa Fe and the Car Supply for 1923

Everyone in Santa Fe territory is asking if we are going to have cars enough when the usual heavy business comes this year.

We hope to have them, but—

Our ability to furnish cars depends not only on our own efforts, but on the ability of all the roads in the United States to function properly. For three years the railroads have been struggling slowly forward. They are beginning to see daylight. Since January 1st, nearly 10% more cars of commercial freight have been handled than in the corresponding months of 1920, the record year. In the same months the car shortage has been reduced by one-half. These figures mean constructive effort by both shippers and carriers.

### In this program the Santa Fe is—

Providing new engines and cars; enlarging its shops; building second track wherever congestion is liable; and enlarging its yards and other facilities. In addition it is making every effort to reduce its "bad order" cars and locomotives to less than the normal number, to get the greatest number of miles per day out of its cars, and to get as heavy loading per car as possible. If what we have set out to do can be accomplished all over the country, the question of the car supply is solved, but to reach that goal the shippers must help.

### We therefore ask all Shippers to—

Load promptly and to capacity of the car whenever practicable;  
Unload without delay;  
Ship early in the season for road and building construction and for coal storage and like purposes;  
Increase storage facilities;  
Order only the number of cars that can be loaded daily; and  
Avoid shipping under "to order bills of lading" and reconsignments as far as possible.

W. B. STOREY, President,  
The Atchison, Topeka and Santa Fe Railway System.

# Uncommon Sense . . .

By JOHN BLAKE

## SALESMANSHIP

WHETHER you are taking orders for threshing machines or life insurance, or drawing a salary of ten dollars a week, you are a salesman. In the first instance you are selling somebody else's product. In the last you are selling your own. You will sell threshing machines or life insurance faster if you know something about them, and believe in them. You will sell your own services for a higher price if you believe in yourself. If the merchandise you offer is not worth the price you ask for it, you can't be sincere in your efforts to dispose of it. And if you do not absolutely know that your services are worth more

than you are getting for them, you will never be able to get more. All salesmanship that is worth anything is based on confidence. You will find it hard work to convince people of anything you do not believe yourself. Before you make any effort to raise your own salary be sure that it ought to be raised. Compare yourself with other people doing the same work for the same wages. If they are better than you are at the job, don't ask for a raise until you have made yourself better than they are. Your hands or your brains are the commodity you have to dispose of. Make them just as efficient, just as productive as you can. Discover and eliminate the faults that keep them from doing their best. Work, study, practice—bring yourself up to a higher point of usefulness. Then when you begin to talk about getting more money you will have an argument. Believe in yourself thoroughly and other people will believe in you. But remember that you cannot sincerely believe in yourself unless you are convinced that you can really produce more than the other men who are doing the same kind of work.

## Something to Think About

By F. A. WALKER

### THE GREAT HEARTED

ONLY the great-hearted can be true friends. All along the shadowed ways of life the great-hearted are constantly sending out sunlight and cheer, which humans of inferior natures can never know or bestow. To do good, without having their motives suspected, is their grand intention. They seek no praise. They move about with the quiet of summer breezes, leaving in their trail the delicious scent of gardens and the peace of tranquil skies. In the happiness they give to others, they find a gratification rich beyond price. If but once in your life you should be fortunate enough to meet a great-hearted man or woman, the remembrance of it will linger in your mind until the end of your days. Great hearts often dwell in lowly places. Sometimes they are found in frail bodies, poorly clad, but there is about them a radiance of spirit brighter than a thousand stars and clear as the beaming of the noonday sun. Great hearts blow to flame the spark that blazes with love; they espouse Truth and Mercy; they sling from morn till night of kindness and good will, when their days are lonely and their tables are bare. They are neither silent nor neglectful when the ill and the discouraged need succor or sympathy. Meek or lowly, they are the ministering angels from heaven, carrying to the sorrowing "good tidings of great joy." From idle slumbers they call youth and point the way to honor and fame; from the valley of gloom they bid the despondent to look up to the glorious heavens; from the mire of sin they lift up the fallen, seeking no reward but the joy that is theirs from doing good. They sin as we all sin, but unlike most of us, they are charitable towards all mankind, prayerful, watchful, faithful. When the chimes in the belfry chant

## SCHOOL DAYS

their evening hymns, no souls on earth are more serenely peaceful than the great-hearted; when at the setting sun of their life the streams of light grow dim in the golden west, and the somber shadows fall all about them, no souls on earth are happier than they, or more eager to go.

## WHAT DIES?

By DOUGLAS MALLOCH

WHAT dies? Most certainly the pine Will never die—descendants brave Maintain the old majestic line— The very oak above the grave Speaks Nature's continuity. What dies? Not, certainly, the tree.

What dies? The bud, the rose, the seed, Each has its time and has its turn. One needs his garden but to read Of life's eternity to learn, That every springtime will disclose. What dies? Not, certainly, the rose.

What dies? The sun will fade, the stars Come out, and then the stars will fade— But still the midnight has its Mars. The day will have its light and shade, The sun again when night is done. What dies? Not, certainly, the sun.

What dies? The river finds the sea, The sea the sky, the sky the hill— The hill shall give us presently The river from the mountain rill, With star and sun again to gleam. What dies? Not, certainly, the stream.

What dies? Shall only one thing die?— God's mind in human minds expressed? Shall tree and rose live on, and I Expire, this spark within my breast? Is death the end of all the plan? What dies? Not, certainly, the man!

(© by McClure Newspaper Syndicate.)

## POULTRY

### CLEAN EGGS WORTH TROUBLE

Keeping Hen's Feet Free From Mud and Dirt Is Not an Easy Proposition for Farmer.

(Prepared by the United States Department of Agriculture.) Poultrymen need not be at the nest to wipe Mrs. Biddy's feet before she enters to make her daily contribution to their profits, but if the hen house is so arranged that her feet will be clean and will not dirty the egg, it will mean added profit for the owner. Dirty eggs are a second-rate product on any market, so are washed eggs. This means that the egg must be produced clean, which further means clean nests and clean feet.

Clean nests are easy—comparatively. A change of nesting material, whenever it gets dirty, will do away with the danger of soiling from this source, and special care must be taken to see that the birds do not roost on the edge of the nests at night. Keeping the bird's feet clean is a much more difficult proposition. First of all it is most essential to have a clean doormat in the shape of fresh litter and plenty of it on the floor at all times; secondly, do not let the birds out on muddy days when their feet are bound to get daubed up.

Most important of all, keep the dropping board clean. Daily scrapings are preferable, but if a poultryman feels that he has not the time for this, they should be cleaned at least twice a week. A cage of one-inch or one-and-one-half-inch poultry wire tacked under the perches and over the dropping boards will prevent the birds from walking on the boards, and incidentally will catch any eggs that are dropped in the night.

Even with this extra care, the poultryman must expect some dirty eggs, and a word of advice on how to clean them might be timely. The so-called plain dirties, those soiled by dirty feet and dirty nests, are easily cleaned with a soft damp cloth, which should be used only on the dirty spots. Be careful not to rub them dry, but to allow them to dry by standing in the air. It is very important that the gelatinous coating which seals the egg should not be soaked off, as this covering is germ-proof and serves as a natural means of keeping the egg fresh.

### PURE BRED POULTRY IS BEST

There is Greater Egg Production and Flock More Uniform—More Profit for Raiser.

From a government inquiry the following is reported: "Purebreds excel by 40 per cent. High utility value of purebred live stock. Purebred live stock has about 40 per cent greater earning power (apart from its breeding or sale value) than scrub stock. The superiority of purebreds on a utility basis is due principally to: Better conformation and quality, increased production, more economical production, and earlier maturity. For poultry the superior earning power is 40.7 per cent. Does purebred poultry pay? The above information helps to answer the question, says N. R. Mehrhof, Extension poultry specialist. The following are some reasons why we should raise purebred poultry. (a) There is greater egg production. (b) The flock, being more uniform, looks better and gets better care. (c) Standard birds produce standard products and standard products demand better prices for breeding birds, hatching eggs, and baby chicks for sale. All of these mean more profit for the chicken raiser. Visit the shows and find out which breed you would prefer to raise. Select your breed and variety. Breed for increased egg production, keeping in mind health, vigor and qualification for that particular breed and variety.

## BOY SCOUTS

(Conducted by National Council of the Boy Scouts of America.)

### BOY SCOUT SETS EXAMPLE

A busy man of large affairs, witness of the following incident, was so impressed with its significance that he personally has written this account: "On one of the large green buses of the Washington Rapid Transit company last week, coming down Sixteenth street on its way to Pennsylvania avenue, every available seat was taken and no one was standing. At the next stop a lady boarded the bus. A small boy seated near the window just beyond a lady who occupied the end seat, promptly arose and offered his seat to the new passenger, who protested saying: "Oh, do not give up your seat for me, little lad. You are a little lad and I am a woman. Keep your seat."

"No," said the lad. "I can't do that." Already he had left his seat and the lady proceeded to take it. "She said, 'I am interested to know why you gave the seat up to me.'"

"Well, said the lad, 'there are two reasons. In the first place, you are a lady, and I am a boy. In the second place I promised to do it.'"

"You promised to do it?" said the lady in astonishment. "Whom did you promise and why?"

"Well," explained the boy, "you see I am a boy scout, and I promised my scoutmaster to give my seat to a lady or small child on board street cars and buses when there was no other seat to be had."

"Well, that's fine; but how long do you expect to keep your promise?" asked the lady.

"Oh, I expect to keep it all my life. That is how long I promised to keep it," replied the lad.

"Oh, yes, you see," said the boy, "if you were my mother or my sister, I certainly would give either of them my seat rather than have them stand up, and if anybody let my mother or sister sit down when the bus was crowded, I certainly would be obliged to them for doing so. Anybody would feel that way about it for his mother's and his sister's sake."

"During the conversation everybody on board the bus listened. The effect was instantaneous. Every lady that boarded the bus thereafter got a seat, and when the vehicle arrived at Thirteenth street and Massachusetts avenue, not a man occupied a seat. Eight of them were standing in the aisle."

Boy Scouts of Jacksonville, Fla., rendered practical aid when they assisted in the "Walk Rite" campaign.

### FROM SCOUT COURT OF HONOR

Credit is due the Court of Honor records of Rochester, N. Y., for the following excerpt: Scout Harry Tompkins of the Roosevelt Troop, passed 15 merit badges last spring during a troop advancement drive.

The chairman of the Court of Honor, thinking that the boy had slipped through most of his requirements without any real work, proceeded to cross-examine him as follows: "What did you do for your electricity merit badge?"

"I wired my father's house," replied Tompkins. "How did you earn your automobile merit badge?"

"I designed and built an automobile." "How fast will it go?" "Forty-five to fifty miles an hour." "What did you paint for your painting merit badge?" "I painted my father's house last spring." "You win," said the chairman. "Next."

## Mother's Cook Book

Last night I gazed upon the world, wrapped in her moon-veil mysterious, and said: "How perfect! 'Tis like heaven." But—is heaven like this? Or do the dead gaze out upon heaven as I upon the world, and say: "How perfect! 'Tis like heaven! Always and always reaching on and on, beyond perfection that is no longer perfection, to that perfection which, too, ends doubt?"—Annie, like Greenwood.

### RECIPES FOR RAREBITS

RAREBITS are not especially easy of digestion, should not be served to the children, and like soufflé must be served at once when prepared.

#### Nut Rarebit.

Take one and one-half cups of milk, heat in a double boiler, then add one cupful of cheese and stir until melted. Add a few dashes of cayenne, one-half teaspoonful of Worcestershire sauce, a beaten egg and let cook for five minutes at low temperature. Add one-fourth of a cupful of chopped olives, one-half cupful of chopped walnuts. If cream cheese is used, no butter is needed, but cheese not so rich should have a tablespoon-

ful of butter. Serve on toast or heated crackers.

#### Tomato Rarebit.

Heat one tablespoonful of butter with a small grated onion, add one-half teaspoonful of dry mustard, six drops of tabasco sauce and a cupful of tomato soup. Cook well together, then add one cupful of grated cheese and stir until melted, then fold in two well-beaten eggs; when creamy pour over well-buttered toast.

#### Baked Bean Rarebit.

Melt one tablespoonful of butter, add one cupful of cheese and one cupful of milk; when the cheese is melted add one cupful of mashed baked beans, one beaten egg, mustard, salt and cayenne to taste. Pour over hot toast.

Nellie Maxwell

#### Stray Bits of Wisdom.

Childhood is like a mirror which reflects in after-life the images first presented to it.—Samuel Smiles.

First Tomato—What do the farms do with the tomatoes they raise? Second Tomato—They eat all they can, and can all they can't.

Smallest of the Great Lakes. Lake Ontario is the smallest an most easterly of the five Great Lakes in North America. Its maximum dept. is 730 feet.

France lost 10 per cent of its population in the war.

## ONCE IS ENOUGH

## POULTRY POINTS

There are poor laying hens in all breeds. . . .

A hen with a yellow beak and shank at any time from June to September is a poor layer. . . .

Heavy capons sell from four to seven cents per pound over the price of spring roosters. . . .

A busy hen is generally a healthy hen, and a healthy hen is almost sure to be a laying hen. Keep your hens scratching. . . .

When consumers buy capons they generally want birds which will weigh from seven pounds up. Leghorn capons do not reach this weight and they consume as much feed as the larger birds.

# The SANDMAN STORY

## THE GOBLINS' CIRCLE

ONCE in a far-off land there lived a band of Goblins, and once every year on a night when the moon was full these Goblins held a dance in the Goblin Circle.

The Goblin Circle was a round, bare spot in the middle of the woods and on a particular night, called Goblins' Night by the magic people, at the full of the moon, any one who entered this circle other than the Goblins was instantly changed from his own shape to that of a little Goblin.

All the Fairies and the Elves and the Pixies and Gnomes and other magic folk on Goblins' Night kept far away from Goblin Circle, for none of them wished to become a Goblin.

Now not far away from Goblin Circle lived a lazy fellow named Tim. He did not help his mother, who was a widow, as he should, but instead lay under a tree in the shade all day

All the Goblins Fell Upon Him.

while his mother worked in the fields or tended the sheep.

But as soon as it was meal time Tim was nimble enough, for he was always hungry, but if he was asked to bring in some wood or draw a pail of water Tim was so slow that his mother often did it herself rather than wait for the slow Tim to bring it.

On one bright moonlight night Tim was coming along the road by the woods when he saw through the trees hundreds of little dancing figures. These were Goblins dancing in the Circle and their red caps could be plainly seen as they bobbed about in the moonlight.

"Now, what is that?" thought Tim, as he stopped whistling and looked closer. "It looks like those funny creatures I have heard of called Goblins, but I never believed there were any."

Nearer and nearer crept Tim until he was close to the Goblin Circle hid-

### A LINE O' CHEER

By John Kendrick Bangs.

#### UNCHANGED

RENDS go soaring to the sky;  
Shoes and hats are very high;  
Food mounts up to fearful heights;

Costly are the world's delights;  
Many suffer from the chills  
At the rising tide of bills—  
But, cheer up! Smiles cost no more  
Than they did before the war,  
While Good Will, and Sympathy,  
Just as strong and just as deep  
Are as cheap

As they ever used to be.

## "What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

### MARTHA

THE names of the sisters of Bethany, Mary and Martha, are closely allied. While Mary signifies bitter, Martha means becoming bitter. Since the sister of the Blessed Virgin bore the same name as her own, both are said to come from Mara (bitter) though some believe that Martha comes from Aramean mar (a word often heard as the title of Syrian bishops.

Martha of Bethany, according to legend, demolished a terrible dragon by holding up a cross one time when her family was making a journey through wild country. The Marfa of Russia is of course like the English Martha, Matty and Patty (though by rights, the last named is a diminutive of Patricia and not connected with Martha at all). Indeed, in Russia Martha is considered the true housewife woman of the Bible, independ-

den behind a bush on top of a rock.

The Goblins' antics were so funny that Tim forgot he was hiding, and when one little Goblin stood on the head of another and jumped with a funny twist of his queer little body, Tim laughed out loud and tumbled off the rock right into the Goblin Circle.

The dance stopped and all the Goblins fell upon poor Tim and before he knew what was happening; he was no longer a big lazy Tim; he was a little Goblin just like the others.

As there were no lazy Goblins Tim had to work. They made him jump and dance, they made him roll big rocks and open the doors to their rock houses, and finally when the dance was over they carried him off to their underground homes and set him to work.

Of course, they all worked, too, but to Tim, who had never worked, it seemed there was no time to rest.

How long he stayed with the Goblins he could never tell, but one night when they all came out of the rocks for a dance in the Circle, Tim waited until they were busy hopping and jumping and he took to his heels and off he ran.

He was almost home before he noticed that he was again the big Tim he had been before he fell into the Goblin Circle, but he was no longer Lazy Tim, for, now he was home once more, he felt sure that his lazy habit had something to do with having to work so hard for the Goblins.

He stayed away from the Goblins' Circle, too, for now he believed in the Goblins and he did not wish to be in their power again, but he did not know that it was a year from the time they caught him that the Goblins let him go.

It is only on the full of the moon on

## Eileen Percy

Eileen Percy, the "movie" star, in order that she might gain the real atmosphere for her acting the part of the blackmailer, devoted many hours studying the prisoners in jails, police stations, and in the courts. The gray, cold bars of the felon's cell, the bustling activity of the detective bureau, and the prisoners' benches of the police courts are miniature laboratories where human emotions are constantly seething and bubbling over.

Goblins' Night, when the Goblins dance in the magic circle, that any one can escape if he has been unfortunate enough to be caught in the circle and changed into a Goblin.

So if any one is lazy and will not help his mother he better be careful not to wander near the Goblin Circle or he will have to work a whole year as hard as Tim did.

## The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

### WHERE TO MEET

A bad beginning makes a bad ending.—Euripides.

ACCORDING to strict etiquette, of course, a young man, if he has an appointment with a young woman, meets her at her own home, and escorts her from thence to their destination. He does not suggest that she meet him at the corner drug store or that they make their rendezvous a park bench under a certain tree or the lobby of a certain hotel or the public library reading room or a railroad station waiting room.

However, for practical purposes this rule cannot always be carried out. The busy young man, who works at some distance from the residence section of town, sometimes finds that he is quite unable to take the time needed to go to a young woman's home and then accompany her to the theater or party as they have planned. There is then no very sensible reason why he should not feel free to ask the young woman to meet him half way. That is, of course, unless they are members of the ultra formal society in which such a thing would be looked upon askance.

There is nothing inherently ill-bred about it. Then, too, the young woman and young man who work in the same neighborhood often find it convenient to meet each other after business hours for dinner or the theater. It would be absurd to insist that they have to meet then in the young woman's home. But one or two simple rules ought to be observed in this matter of meeting outside of one's own home. A young man ought never to set a time for such a rendezvous at an hour when he is not sure to be free. He should always strive to be at the appointed place in advance of the time set, so that the young girl will not be the one kept waiting. The young woman, on the other hand, while she should not keep the young man waiting, should not arrive ahead of time.

It is never in good form to make your rendezvous a hotel lobby or reception room unless you are planning to have luncheon or dinner there. There are some people, to be sure, who make use of the hotels in this way, but it is in rather poor taste. Even when planning to meet a young woman for luncheon or dinner at a hotel it is better to arrange to meet her in the reception room than in the lobby where she must usually walk or stand or at least encounter something of a crowd.

Human progress is calculated by the contributions that we make, constructively, in that work to which we have assigned ourselves.—George L. Berry.

## The KITCHEN CABINET

(©, 1922, Western Newspaper Union.)

If this world affords true happiness, it is to be found in a home where love and confidence increase with years, where the necessities of life come without severe strain, where luxuries enter only after their cost has been carefully considered. We are told that wealth is a test of character—few of us have to submit to it. Poverty is the more usual test. It is difficult to be very poor and maintain one's self-respect.—A. Edward Newton.

### GOOD THINGS FOR EVERYBODY

The following is a good standard recipe for tomato sauce:

Mince fine a slice of salt pork, cut one-eighth of an inch thick. Fry until light brown in color, then add one small onion finely-minced and a tablespoonful

each of carrot, turnip and sweet pepper; brown lightly in the fat. Now add one and one-half quarts of tomatoes, if fresh, unpeeled; two cloves, a sprig of parsley and celery, and half a bay leaf. Simmer covered one hour, stirring occasionally. Rub all that will go through the colander and thicken with a tablespoonful each of butter and flour cooked together. Serve hot.

Macaroni for Luncheon.—Cook three-fourths of a cupful of macaroni broken into inch-pieces in boiling salted water until tender. Drain, rinse in cold water and drain well. Melt three tablespoonfuls of butter; cook in this a slice each of onion and carrot, then remove the vegetables, add two tablespoonfuls of flour, a little salt and a dash of pepper, one-half cupful each of beef broth and tomato puree, and cook until smooth and thickened. Add the macaroni to the sauce with one-half cupful of grated cheese. Cover and let stand over hot water. Serve very hot. Half a cupful of chopped ham or other cooked meat with or without the cheese may be added.

Purslane, belonging to the portulaca family, is a common weed, growing in sandy places. The little fleshy leaves are full of mineral salts and iron. They are cooked and served either hot or cold.

I have loved the feel of the grass under my feet, and the sound of running streams by my side. The hum of the wind in the tree tops has always been good music to me, and the face of the fields has often comforted me more than the faces of men.—John Burroughs.

### SEASONABLE GOOD THINGS

A crisp green salad is always agreeable and when served with the following dressing is quite nourishing:

Thousand Island Dressing.—Put into a small fruit jar one-half cupful of olive oil, the juice of half a lemon and half an orange, a teaspoonful of onion juice, one-fourth teaspoonful each of cayenne pepper and salt, one teaspoonful of Worcestershire sauce, one-fourth teaspoonful of mustard, three sprigs of parsley, chopped fine. Put on the rubber and cover and shake vigorously. Green pepper chopped may be added, and some enjoy the acid slightly softened by the addition of a teaspoonful of powdered sugar.

Barbecue of Porterhouse.—Have a cut of porterhouse cut about three and one-half inches thick and containing a good piece of tenderloin. Trim into shape, removing most of the fat and skewering it into shape. Mix two tablespoonfuls of dry mustard with one teaspoonful each of salt and white pepper with a little cayenne, add to these four tablespoonfuls of creamed butter and rub the mixture well into the meat on both sides and edges. Place on a grate over a pan and set under the gas flame. Have two tablespoonfuls of olive oil mixed with one teaspoonful of Worcestershire sauce and brush the steak every five minutes with this mixture, reducing the heat after the surface of the steak is seared. Cook forty-five minutes. The brush should be dipped into the drip from the pan after the juice of the steak has begun to drip. Rub with more mustard with the moistened brush, just before it goes to the table.

Barbecued Mutton.—Make a sauce by melting two tablespoonfuls of butter; to this add the juice of half a good-sized lemon, one-quarter cupful of prepared mustard, one-half teaspoonful of salt, a few dashes of cayenne and one teaspoonful of grated orange peel. Reheat the thin slices of mutton in this sauce. Serve steaming hot; but do not cook.

MARY GRAHAM BONNER

### SAMMY SAUSAGE'S PRIZE

"Grunt, grunt," said Sammy Sausage. "I won a prize."

"Squeal, squeal," said Miss Ham, "tell us about it. Let us see the prize."

"Let us see the prize; grunt, grunt," said Grandfather Porky Pig.

"Yes, we take such an interest in you, grunt, grunt," said Sir Percival Pork.

"We do that," said Sir Benjamin Bacon. "Let us see your prize. We want to admire it, for we are sure it is a delicious prize."

"Delicious?" questioned Sammy Sausage.

"Well, surely it is something to eat," said Sir Benjamin Bacon.

"Well, I never said it wasn't food and I never said it wasn't delicious," said Sammy Sausage as he twisted his little tail and looked out of the corner of his right eye in a very amused way.

"Dear me, dear me," said Grandfather Porky, "whatever do you mean, Sammy Sausage? You don't explain yourself at all."

"First you tell us you won a prize."

"Then we all take a nice pig interest in what you have done and in your success and we ask you to show us the prize."

"Then when we say that without doubt it must be a delicious prize you seem surprised and you say 'delicious' in a very surprised manner."

"Then when we say that surely we thought it was something to eat you

say that you never said it wasn't delicious and that you never said it wasn't something to eat."

"True enough. But the puzzling part is that you've really told us nothing at all."

"And here we are, so ready to be interested, dear Sammy Sausage, my beloved grandson, and the pride of his grandfather's porky eye."

"I've always thought you would do well, Sammy, I was always one to say you had it in you."

"I have heard," said Sammy, with a naughty twinkle in his eye, "that when creatures were successful ever and ever so many people were apt to come around and tell them what friends they had always been and how they had always known it was in these successful ones to be successful."

"No, they were going to be around when the good times came. Then they were going to say that they had encouraged these successful ones to this success!"

"And it seems as though now that you think I've been successful you were going to tell me how you always knew I had it in me and yet I never remember your saying this before."

"Never mind," said Porky Pig, "what you remember, I know what I always thought and I know I always thought you had it in you."

"Show us the prize and don't talk so much," the others squealed.

"My prize," said Sammy, "was food, and it was delicious and it is all gone now."

"I wouldn't show you my prize. I could not show you my prize now. But I wouldn't have done so before because I knew that it would only be quarreled about."

"I didn't want to start a lot of fussing."

"You would all have thought in some way you had helped me to get it and so that you deserved your reward."

"But no, I knew you didn't and so I didn't bother to talk about it with you before. Now it is safely put away in my own good tummy and I tell you that I won a prize now that it is all right to tell you."

"I won it because I found a lot of pig weed where no one thought there was any. That was my prize for my smart discovery. I gave myself the prize and I thanked myself for giving myself so fine a prize for this discovery."

But the pigs had all wandered off—Sammy's prize no longer interested them!

"We Take Such an Interest in You."

say that you never said it wasn't delicious and that you never said it wasn't something to eat.

An Ordinance prohibiting the sale, exchange, disposition or bartering of produce, livestock or merchandise of any character whatsoever, at public outcry or public auction or in any manner whatsoever, upon the streets, alleys, sidewalks or any public ground within the City of Slaton; providing exceptions; levying a tax on vendors, peddlers and auctioneers; and providing a penalty for violation of this ordinance.

Be it ordained by the City Commission of the City of Slaton, Lubbock County, Texas:

Sec. 1. It shall be unlawful for any person or persons to sell, exchange, barter, or dispose of, or offer to sell, exchange, barter or dispose of any article of produce, vegetables, groceries, goods, wares, trinkets, accessories, or any article of merchandise whatsoever; or any poultry or livestock, within the corporate limits of the City of Slaton, except as provided in other sections of this ordinance.

Sec. 2. Any person desiring to engage in any business described in section 1 of this ordinance, within the City of Slaton, is required to pay an annual License Fee of Ten Dollars (\$10.00) and shall apply to the City Secretary for such license before the beginning the pursuit of said business, and upon payment of Ten Dollars (\$10.00) to the Secretary shall be issued an Annual License to engage in said business.

Sec. 3. This Ordinance, nor any part hereof, shall not be construed to interfere in any way or manner with any person or persons authorized by Statutes of the State of Texas to sell any article under due process of law, within the City of Slaton.

Sec. 4. All ordinances or parts of ordinances heretofore enacted by the City of Slaton, in conflict herewith, are hereby repealed.

Sec. 5. Any person guilty of violating this ordinance or any provision hereof shall be fined in any sum not exceeding One Hundred Dollars.

Sec. 6. An emergency existing demands that this ordinance become operative and effective at once, and rules requiring that it be read in three meetings prior to its passage and adoption, are hereby suspended, and this ordinance becomes effective upon its passage and publication as required by law.

Passed and adopted this the 15th day of May, A.D. 1923.  
(Seal) H. C. JONES, Mayor.  
Attest: J. W. McKinney, City Secy.
