

YOUR HAIR IN SUMMER.

Ever since the vogue of permanent waving became a nation-wide institution women everywhere have paid less attention to the care of their hair in summer than ever before. Once it was a difficult matter to keep straight hair softly curled and neatly arranged through the warm, moist weather. Women worked hard over their hair—they "fussed" with it—spent much time and energy in keeping it smooth, shining and well-groomed.

Now, fortified with a permanent wave, they face the summer season boldly. No extra attention is given to the hair. A shampoo occasionally, a moment for pushing the wave into place with the fingers, and the hair is forgotten for a week, except for the hasty care it gets during the daily combing.

All this saves time during vacation days but it is exceedingly bad for the hair. Even permanently waved hair needs careful regular attention to keep it healthy and well-groomed looking. The operator who waved your hair may have told you not to brush it—that if you brushed it often the wave would come out. But I warn you to brush, and to brush frequently. The wave may be loosened slightly or it may not last quite so long, but your hair will be softer and more shining. The added gloss and life it has will more than make up for a little less in wave. And a wide, loose wave, remember, is much more fashionable than a tight one this season. If you are swimming daily in salt water you should take unusually good care of your hair. Since no swimming cap yet devised will keep the hair from getting wet when you dive or swim under water, you must remember to rinse your hair under a clear water shower after each swim. Salt left in the hair makes it sticky, dull and lifeless.

Exposing your head, hatless, to the warm, summer winds is excellent for the hair. To be fragrant and healthy it must be frequently sunned and aired. Continued exposure to the hot, midday sun, however, will burn and dry it dangerously. Wear a light straw hat if you are to be in the hot sun for any length of time—and if your hair already looks sunburned, use a hot oil massage before each shampoo.

**WE AMERICANS TALK MOST OF ALL THE WORLD PEOPLES**

Americans are the greatest talkers in the world—by telephone. Annual per capita telephone conversations in the United States are 224.7. Denmark, the highest in Europe, averaged 136.8 conversations per capita, Germany 35.5, Great Britain 28.6 and France 17.2. The only other country with over 200 telephone conversations per capita is Canada, with an average of 221.5.

A \$200,000 office building will be erected at Texas and Stanton streets in El Paso.

**Makes Life Sweeter**

Next time a coated tongue, fetid breath, or acid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect anti-acid that helps the system keep rosy and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips. Pleasant to take, and always effective.

The name Phillips is important: it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

**PHILLIPS Milk of Magnesia**

**Installment Buying Is Here to Stay and is New Thrifty Practice**

"It is futile to talk of reverting to the cash system," declares Henry Littleton, president of the Commercial Investment Trust Corporation, which finances \$200,000,000 of installment buying yearly.

"No matter how much everybody wanted to do that, it could not be done. No one, of course, wants to do it. Every business man of the last fifty years must have noticed that business cannot be carried on without the use of credit. But the institution of credit changes just like everything else. There was a time when it was supposed that credit could be extended safely to people of property. In our modern commercial system, credit is being extended to those who have no property, but are well equipped with human energy. And this human energy, if wisely dealt with, is proving to be quite as valid a security as the financial world has ever known.

"I believe profoundly," says Mr. Littleton in Forbes Magazine (N. Y.) "in the idea of thrift. Nevertheless, human relations have undergone such a change during my lifetime that the old conception of what constituted thrift can no longer be applied. A large number of our accepted adages, however, are based upon the old conception. A thrifty man, in my youth, was one who never bought anything until he had the money in his pocket to pay for it. The accepted ethic of life was to save one's money from childhood to old age, never indulging in luxuries, like pianos and sewing machines and automobiles, not only until one had the cash to pay for them but until one had also set aside a sufficient competence to last him through life.

"This sort of thrift produced character. There is no doubt about it. It produced a character which was well-suited for the life of that day.

The sort of character it produced, however, was not at all suited to the life which was fast coming into existence. If everybody had continued to practice such rules of thrift, America would still be a nation of individual farms."—Nolan Co. News.

**SEPT. 27 TO BE PRESS DAY AT WEST TEXAS FAIR**

ABILENE, August 20.—Every newspaper man and woman in West and Central West Texas is invited to attend the West Texas Fair in this city on Press Day, September 27, as guests of the fair association and the Abilene Chamber of Commerce.

Executives of the exposition are preparing to entertain at least 500 newspaper people on that day.

Full details of the arrangements will be announced shortly after the fall meeting of the "Heart of Texas" Press Association in Ballinger on September 9. At that time representatives of the fair and of the local chamber will meet with the members of that body and ask them for their suggestions as to the kind of entertainment they would prefer.

At the annual meeting of the West Texas Press Association in Sweetwater on July 12-13, that organization endorsed the plan for a Press Day and a large part of the members pledged themselves to attend. Eddie Warren, Post, and Jimmy Smith, of Snyder, president and secretary, respectively of that group, will confer with officials of the fair within the next fortnight, regarding the program; and both of them will go to the Ballinger meeting of the "Heart of Texas" association to help the local representatives give the invitation to the members of that body.

Any man who knows what bustle is has reached the age of forty.

**T. C. U. LIBRARY RECEIVES VERY OLD BIBLE**

FORT WORTH, Aug. 20.—An old Latin Bible printed in 1607, antedating by four years the King James version, has just been received at the Mary Coats Burnett Library of Texas Christian University, the gift of J. P. Shannon of Fort Worth, according to Arthur R. Curry, librarian.

Thought printed 322 years ago, the old volume is still in good condition despite its more than three centuries of use, and is enclosed in a parchment cover which reveals the ridges made by the binder's cords on the shanks of the book. It is autographed with the name of "Edward Ellisons, Longport, Burlem, Staffordshire, March 10, 1869," followed by the autograph of Mr. Shannon, written 63 years later in 1928. Not only are the Old and New Testaments included but the apocryphal books as well.

Mr. Shannon is a collector, having in his possession a page valued at around \$1,000 from the first Bible ever printed, the Gutenberg Bible. At the same time, Mr. Shannon made a gift to T. C. U. of a six-volume set by Victor Duruy, "The History of Rome."

LUBBOCK, Texas, August 20.—Members of the Home Economics club of Texas Technological College have announced that they will meet

**ANNOUNCING A VARIETY OF COLORS on the Chevrolet Six at no extra cost!**

In keeping with the progressive policies that have carried Chevrolet to record-breaking heights of success—the new Chevrolet Six is now made available in a wide variety of colors at no extra cost.

Still further enhancing the inherent beauty of the marvelous bodies by Fisher, these striking new colors give to the Chevrolet Six an order of smartness unapproached in any other, low-priced car in the world.

And when you drive the Chev-

rolet Six, you will realize that its performance is equally as outstanding as its beauty. It flashes away at the traffic signal. It tops the steepest hills with an abundant reserve of power. The steering wheel responds to your slightest touch. And the quiet, non-locking, four-wheel brakes are unusually quick and positive in action.

Come in today. See this sensational Chevrolet Six which actually sells in the price range of the four.

The Roadster, \$525; The Phaeton, \$525; The Coach, \$595; The Coupe, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695. All prices f. o. b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charge for delivery and financing.

**How to Raise Poultry**

By Dr. L. D. LeGear, V. S.  
St. Louis, Mo.  
Dr. LeGear is a graduate of the Ontario Veterinary College, 1892. Thirty-six years of veterinary practice on the farms of live stock and poultry. Eminent authority on poultry and stock raising. Nationally known poultry breeder. Nestled author and lecturer.

ARTICLE XXI

**MAKING TURKEYS PAY.**

**Comparative Scarcity at Times of These Fowls When Most Wanted Insures Profitable Market; Problem of Raising Birds Not as Difficult as Ordinarily Supposed.**

Editor's Note—This is another story in a series of 52 stories on poultry raising written by the well known poultry authority, Dr. L. D. LeGear, V. S., of St. Louis. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

"Cant's thee provide naught but this eternal turkey for our board, Goodman?" quoth dame Prudence Pennyfeather in a bit of a pet. "Me-thinks this gloomy forest is full big enough to have in it all birds and beasts created since the Deluge!" Goodman Pennyfeather snatched up his blunderbus and retorted a bit acidly, "Beasts and birds there are aplenty in yon forest and hostile Indians, too—while turkeys in plenty are at our very door. Nae-the-less I shall try again to appease thy impatience."

That might have happened in Pilgrim days. Even right after the Civil War wild turkeys were so numerous in some parts of the country as to constitute an actual pest. They raided grain fields with such devastating effect that it was a problem to cope with them. Now quite the reverse is true.

Of course, no one is surprised to learn that the wild turkey is practically extinct. One would think, however, that the periodical demand created by our great national feast days would cause poultry raisers everywhere to devote a considerable part of their time to turkey raising. I believe the reason that such is not the case is to be found in the oft repeated story that turkeys can only be raised successfully on great ranches and that, at best, they are so delicate and temperamental as to make them very hard to handle.

For those who have hesitated to take up turkey raising, or who have tried and failed, I want to make a number of recommendations. I shall give a short digest of these recommendations and will be glad to answer further questions from anyone writing me in care of this paper.

For breeding purposes use only thoroughbreds. Select the strongest and healthiest birds. Do not mate

more than 10 or 15 hens with one male. Use incubators for best results. You never have to wait for an incubator to get broody and it will give most uniform results if properly regulated. Use no eggs over ten days old. Practically all the big commercial turkey raisers use artificial brooders. The most up-to-date ones can be closely regulated so that, barring accidents, results are fairly certain. It is always a gamble, however, to brood young poults with such temperamental creatures as turkey hens.

A brooder house on skids is ideal as it can be moved about to fresh ground from time to time. Stake off four temporary runs, one on each side of the house, and rotate the poults from one run to the other. Leave them about a week in each run. Between 200 and 300 poults can be accommodated in a 12x14 brooder house. For heat, use a hard coal stove or any other heating arrangement that will maintain an even temperature of about 80 degrees.

When poults are about 8 weeks old they may be transferred to rearing grounds, about an acre being set aside for each 150 to 200 poults. These grounds should be where chickens have not been allowed to run and should be fenced so chickens cannot get in with the poults.

Feed nothing the first 24 to 36 hours; 36 to 48 hours, short grass on the sod, tender greens and buttermilk or sour skim-milk; 48 to 60 hours, feed eggs boiled for 30 minutes mixed with equal quantity of dry, stale (never mouldy) bread crumbs. Feed this every two hours, removing it in 20 minutes. On the third day feed as on the second and continue same diet on the day following with addition of mash composed of finely

ground cornmeal, wheat bran, wheat middlings and beef scraps in equal parts by weight, or a baby chick starter commercial mash may be fed instead. Feed the mash in hoppers with plenty of green stuff always available. Continue this mash feed with plenty of greens at all times. From day to day feed a little scratch grains, gradually increasing the quantity. Scratch grains should be given sparingly, however, as young turkeys do not require a great deal of such feed. See that a good supply of fresh clean water is always near by. Never allow poults to drink from stagnant pools.

When poults are about 8 weeks old, shift to rearing grounds if weather permits, and put on following ration: Equal parts of corn meal, ground oats, wheat middlings, wheat bran and beef scraps fed in hoppers. Give birds plenty of skim-milk to drink. Keep shell and grit before them at all times and never stint on fresh green stuff of suitable kinds. My experiments prove that baby turkeys can be successfully fed on feeds that are successfully fed to baby chicks. If your present method of raising your baby chicks is successful, use the same method with your baby turkeys which should be successful also.

Finally, enlarge your runs from time to time and keep moving flock if possible to provide fresh feeding grounds.

**New Maynard Film Filled With Fast Riding and Action**

Something to look forward to!—Ken Maynard in his latest thrill twister, "The Lawless Legion", scheduled to arrive at the Palace Theatre on Friday and Saturday. The inimitable Maynard is in a class by himself when it comes to portraying the western types of character and injects plenty of stunts and thrills into his motion pictures. He has built an envious following of fans throughout the world and his latest, fastest, and best "The Lawless Legion" will increase that following to legions.

According to advance reports, both audiences and critics agree that it is by far the best this popular star has appeared in to date. Everything desirable in the way of entertainment is to be seen and had in this thrilling story of the early days of Texas and the border.

The story is an original by Bennett Cohen and deals with the tremendous cattle drive of the late '90s in which settlers pooled their herds and drove them to more fertile pastures. Ken plays the part of a happy-go-lucky cowboy, in charge of the moving herd, and he has plenty of opportunities to display his acting and riding ability.

[THE NEW EMBLEM DEDICATED TO BETTER MOTORING]

## What the MARLAND CONTINENTAL Merger MEANS TO MOTORISTS

THE consolidation of the resources and facilities of the Marland Companies and the Continental Oil Company, under the latter's name, is more than a corporate merger. It is a happy union of well balanced production, manufacturing and marketing operations from which will come a host of unusual advantages to the millions of customers and thousands of distributors.

**Wide Field for Crude Selection**  
Out of a total area of more than two and one quarter million acres in eight states, Continental selects the crudes best suited for its manufactured products. Raw materials for oils, greases and gasolines may often come from widely separated regions. Continental controls its own crude supply and chooses the best for each refining operation and thus assures a standard uniform output from year to year.

**Strategic Location of Eight Refineries**  
Economical and efficient operation of petroleum manufacture frequently depends upon the relative locations of the raw product, the refinery and the market. Continental is fortunate in that its eight modern manufacturing plants are well placed to afford prompt and economical delivery both before and after refinement. These properties are located at Baltimore, Maryland; Ponca City and Sapulpa, Oklahoma; Artesia and Farmington, New Mexico; Wichita Falls, Texas; Florence, Colorado; and Gleanrock, Wyoming.

**Exclusive Processes Insure High Quality**  
Continental refinery engineers enjoy a national reputation in the oil business. Not only have they adopted the newest and most efficient mechanical equipment for these big refineries but they have designed machinery and developed processes which are exclusive to this company. Under centralized control, these facilities now are made available in the manufacture of petroleum products of exceptional quality.

**Conocoland Covers Tremendous Area**  
More than forty years marketing experience has spread the distribution of Conoco products over an area which reaches from the western slope of the Rockies, far east to the Mississippi River. Practically half of the United States is dotted so closely with Conoco Stations that a motorist may drive anywhere in that tremendous area without introducing other than Conoco products to his car. The outposts of Conocoland range from the Pacific Northwest to the shores of the Great Lakes and from the Atlantic Seaboard to the California boundary.

**Prestige Established in Foreign Lands**  
The Continental coastwise and export fleet operate from terminals at Texas City, Texas; Newark, New Jersey; Baltimore, Maryland; and Norfolk, Virginia; to a dozen foreign countries. Petrol pumps deliver Conoco gasoline to automobilists in the shires of England and Conoco motor oils lubricate industrial plants in north Europe, South America and the Orient.

In brief, the joined forces of these two great companies afford greater, better service to the users of motor fuels and lubricants wherever the sign of the Red Triangle is displayed.

PRODUCERS AND REFINERS OF CONOCO PETROLEUM PRODUCTS

**Are You Ready**

**When your Children Cry for It**

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

**Fitchers CASTORIA**

Dr. W. L. Huckabay returned this week from a business trip to Bowie and Wichita Falls, where he visited the M. Johnson poultry farms.

the "Prel-ave developed undings for the ex- of \$300,000.00 so far this as been the outlay for buildings. he new Mercy Hospital which they expect to complete by early fall, leads the list, with an approximate cost when ready for occupancy of \$173,000.00. This will be in charge of the Sisters of Mercy, known the nation over for their great work in hospital-ization. The cornerstone of this edifice was, with a very imposing ceremony, laid Sunday, Aug. 4th, with the Right Rev. Gerken, Bishop of Northwest Texas, officiating.

The Santa Fe, always in the line of progress, is erected a new Master Mechanic's office building, at a cost of \$15,000.00. Porter Brothers have completed a new brick block on the East side of the square, now occupied by Chick's Help Your Self grocery.

Dr. Marvin C. Overton, Jr., completed a nice office building of tile and stucco, located on the south side of the square. E. L. Hicks, of the Progressive Hatchery, erected a nice brick building on Lynn street, in which to house his 48,000 egg electric hatchery.

The very latest to be added to Slaton's fine homes are L. F. Piwonka's and Bob Merrell's brick veneer residences of a distinctively pleasing architecture, at a cost of \$7,000.00 each.

Changes made by the Santa Fe since taking over the Orient, have been the added trackage to the Slaton division, and we have some 20 or more employees and families that have come to us since Aug. 1st, with the expectation that others will be added later.

The Slaton Creamery was organized and started operating late in April, at a cost of \$15,000.00, and during the first ninety days marketed nine carloads of butter. The plant has a capacity of 1,000,000 pounds of butter annually. It is proving one of Slaton's live assets. The Terminal Grain & Heads Handling Co., erected a large mill at an approximate cost of \$25,000.00, where the farmers find a ready market for their surplus grain.

Slaton has a cotton oil mill that cost \$100,000.00 and six gins. The Texas Utilities Co., furnish electricity for power, and lighting, also have an ice plant large enough to care for the city's needs.

Natural gas is furnished by the
