Topics and Times Of Slaton Today

A PERFECT RECORD. NEW HOME IS READY. AIRPORTS MEAN PROGRESS.

Slaton to the fore! Safety Supervisor A. R. Tillman of Albuquerque, in a talk made to the Santa Fe monthly shop council here Wednesday night, brought out the fact that the Slaton division leads the Santa Fe system in safety record, having had no personal injuries reportable to the Interstate Commerce Commission.

This is a record this city might well be proud to hold, and should make a special endeavor to maintain. The reputation which this division point holds as a railroad center is one of its chiefest advertising mediums.

New Home community, twenty miles southwest of this city, is to be host to the delegation of Slaton people who are making the fifth of the series of good-will trips sponsored by the Chamber of Commerce.

Thus far the response made by Slatonites to the call for a large attendance at these meetings has been very encouraging, but there should be no relaxation of effort until one hundred per cent attendance is obtained.

Time spent in gaining new friends is time well spent, and gaining new friends is the object back of these trips—and it has been the result thus far.

In a period when so much attention is being given to the development of aviation, and when everyone admits that air transportation is likely to be the next radical change in methods, no city which intends to continue to grow should be without an airport.

Municipal airports seem to be the most practicable method yet found, or at any rate, it is the most popular. There is scarcely a town of respectable size which lacks an airport.

Activity in aviation in the South Plains region is not at present very marked, but the time will come in the very near future when the town without an airport will be the town that is passed by.

This country is peculiarly adapted in its natural state to have many good landing fields. Agitation in favor of an airport for Slaton, municipal if need be, should begin at once.

And then, there's this matter of sidewalks. If anyone needs to be convinced of the necessity of more sidewalks in Slaton, let him take an evening stroll, after dark, through any of the thoroughfares in the residential district.

Uncle Sam says he can't deliver your mail to your residence unless his carrier is assured of a place to walk. For a town of more than 5,000 people to be deprived of mail delivery service because of the laxness of its citizens is a reflection upon its progressiveness.

W. M. Jardine, secretary of agriculture, is reported to have said, after a visit over the Southwest territory covered by the Santa Fe system, "There is nothing in sight to cause a cloud on the present crop situation." Agriculture conditions as reported in the latest bulletin of the Atchison, Topeka and Santa Fe Railway company verify this statement.

The condition of the winter wheat crop is satisfactory, the Texas Panhandle is a sea of waving grain. This part of Texas will produce 20,000,000 bushels of wheat according to present indications. Planting of cotton is yet in progress in Western Texas. Late rains have put the ground in good condition, and cotton prospects have never been more satisfactory.

Farmers have given particular attention to diversification, and the livestock situation continues to improve steadily. Beef cattle, dairy cattle, sheep, hogs, and poultry will show profit on the books of their owners. Come to Texas!

COW IMITATES AUTOMOBILE MIDDLETOWN, N. Y.—A Holstein cow here discovered a pail of five gallons of gasoline and hurriedly drank it. The cow suffered no bad effects.

Denna—Southern Pacific may build from La Blanca to Rio Grande.

To Install Officers Eastern Star Tuesday

Installation of the newly-elected officers of the local chapter of the Order of the Eastern Star will take place at the meeting of the chapter to be held next Tuesday.

J. F. Merrill is worthy patron; Mrs. Bertina Merrill is worthy matron; Mrs. W. T. Driver is assistant matron; Mrs. Iva Moore is conductress; Mrs. Sam Staggs is assistant conductress; Mrs. Roy Cobb is secretary, and Mrs. G. J. Catching is treasurer.

Building Activity Is Renewed Here In Past Few Days

Building activity in Slaton has been renewed within the past several days, two building permits having been issued from the city office, and two other building projects being under way.

The largest of these is the brick building now under construction on North Eighth street, owned by Abe Kessel. The building is to be about 15 by 40 feet, of brick construction, and the estimated cost of construction is placed at \$2,000. It is to be located just north of the present Kessel building on North Eighth street, but is a separate building from the present one.

A building permit was issued by the city office to A. C. Harrison for a brick filling station on the corner of Panhandle and Lynn avenues, to cost \$400.

Three residences are under process of construction now. W. D. Howard is building two residences on South Seventh street, and W. E. Kidd is building another residence on the same street. No building permits have been issued for either, however.

Slaton Tops List In Safety Record, Supervisor Says

Slaton holds first place among the divisions of the Santa Fe railroad system with regard to safety record, according to statement made by A. R. Tillman, safety supervisor from Albuquerque, N. M., in an address at the monthly shopmen's council meeting held Wednesday night at the reading room.

Mr. Tillman spoke on "Safety." The other speaker of the occasion was R. A. Baldwin of Slaton, who gave an interesting discussion on loyalty.

Motion pictures of the Baltimore and Ohio railroad centenary celebration were shown by fuel supervisor Welsinger. The gathering was probably the largest council meeting ever held here, according to J. A. McGinnis, chairman, who presided.

G. R. Miller, master mechanic, had charge of the program. There were about 75 in attendance.

In Mr. Tillman's talk he said that Slaton's position at the head of the list resulted from the record that there had been no personal injuries this year of importance enough to be reported to the Interstate Commerce Commission. He complimented the division highly on this record, and expressed the opinion that it would continue to maintain it.

C. C. Hoffman Returns After His Graduation

Howard Hoffman of this city and Mrs. Richard Douglas of Lubbock, his sister, returned Wednesday from Austin with C. C. Hoffman, their brother, who was recently graduated from the state university there with a degree of bachelor of business administration.

The party made the trip by car, and took Mrs. Douglas to Lubbock before returning to Slaton. Howard Hoffman intends to re-enter Texas university this autumn.

Port Arthur—Texas corporation will increase oil delivery 10,000 barrels a day by \$4,500,000 pipe line additions.

Port Isabel—220-room hotel to cost \$500,000 will be built here.

New Home Ready To Greet Slaton Visitors Friday

Preparations for the reception of the good-will party from Slaton that will visit the New Home community, 20 miles southeast of town, have been made by the community, according to information received by the Chamber of Commerce.

The French Harp band, an innovation introduced at the meeting held at Union last Friday night, will make the trip this Friday night, and will take a part in the program.

Since New Home is more distant from Slaton than the communities previously visited, the party will leave slightly earlier than on the previous trips. It will be necessary that the auto caravan leave the city hall promptly at 7 o'clock.

In addition to the French Harp band, the high school band will make the trip, and as many car owners having room for extra passengers are urged to make the trip to aid in transporting the band.

Theatre Party Is Success; Film To Be "Shot" Sunday

The Slatonite-Palace theatre-Parent-Teacher association theatre party at the Palace last Wednesday was a huge success, the theatre being filled almost to capacity.

Moving pictures were made of the kids as they emerged from the theatre, and a few more scenes for the story "Us Kids" were made in the lobby of the show.

Little Miss Maxine Odum, who in the story is the hostess, is shown greeting the children as they come out. James Merrill, in his Boy Scout uniform, stops to talk with Miss Odum. At this juncture Billy Jones comes by. He doesn't like the idea of Mr. Merrill's attentions to Miss Odum, and plainly shows it in the sneering look he gives them. Merrill starts after him as he walks slowly away, but restraining hand upon his arm holds him back.

Lawn Scenes Made. Thursday afternoon many scenes were filmed on the lawn and in the garden at the home of J. H. Brewer. Mrs. L. G. Odum and Mrs. L. W. Smith, presidents of the East and West Ward Parent-Teacher associations, respectively, ask that anyone going to the location at the rim of the canyon on the northeast road next Sunday who has room in his car for several kiddies, drive past the city hall not later than 2:30 o'clock, so that kiddies not having transportation may have the opportunity of appearing in the film.

Actual "shooting" of the scenes will begin at 3 o'clock, according to Jack Holman, manager of the theatre. Mrs. Odum says that at least two hundred children in Indian costume could be used in the scenes, and a like number, without costumes, can be used. Every child in Slaton and vicinity is cordially invited to participate.

Scouts To Be Present. Arrangements have been practically completed for a full quota of Boy Scouts to be present, and Ben Holloway, Jr., scoutmaster, asks that all scouts of the city meet at his home Friday afternoon not later than 6 o'clock.

The finished picture, including more than four hundred feet of scenes showing high school students, East Ward students, Catholic school children, and other scenes of the city, will be shown next Friday, June 15, at the Palace theatre, both matinee and night.

Parent-Teacher associations will benefit from the proceeds of the film.

Home Makers Class Has Meet Wednesday

Mrs. B. G. Holloway, assisted by Mrs. Reed, entertained the members of the Home Makers class last Wednesday afternoon.

After the business session, a social hour in which talents for debating and drawing were displayed, were enjoyed. Refreshments were served to about fifteen members and guests.

Debate On Box Bill Is Rotary Feature

Merits and demerits of the Box bill, relating to the control of immigration in the United States, will be discussed at the Friday noon luncheon of the Slaton Rotary club to be held at the club house.

Affirmative speakers, in favor of the passage of the Box bill, will be J. W. Hood and W. P. Florence. Negative speakers, opposed to the bill, will be Oskar Korn and Minter W. Uzzell.

General Manager Allison of Santa Fe Here Wednesday

R. H. Allison, general manager of the western lines of the Santa Fe railroad company, and vice-president of the Panhandle and Santa Fe lines with headquarters in Amarillo, passed through Slaton Wednesday in a private car.

He remained only a few minutes, and went to Lamesa Wednesday afternoon, returning to Slaton that night, and leaving again early Thursday morning.

The occasion of the visit was the regular inspection tour of Mr. Allison's territory, which includes parts of Kansas and Oklahoma, Colorado, New Mexico, and the Panhandle of Texas. He declared that he was well pleased with conditions here, and stated that the Slaton division is at present one of the most active divisions of the system.

Among those who were on the special train with Mr. Allison were M. C. Blanchard, chief engineer, Amarillo; Division Superintendent J. C. Barton, Slaton; and T. A. Blair, division engineer, Slaton.

Crop Conditions Slaton Territory Are Encouraging

Reports received by the Chamber of Commerce from farmers in various sections of Slaton's large trade territory indicate that the farm outlook for 1928 could hardly be more encouraging at this time of the year, officials said yesterday.

Cotton and feed crops are up to a good stand on practically every farm from which a report has been had, and cultivation of these crops has begun in earnest. Warm sunshine and good moisture supply are giving the cotton and feed crops a fine start in early stages of growth. The fields are not badly infested with weeds, on an average.

Crops are from twenty days to one month earlier than they were last year, in the opinions of many farmers. They point out that rains for planting came exactly one month sooner this year than last year when June 13 was the date on which a general rainfall was had for starting planting operations.

Rainfall this year for the month of May totaled 3.8 inches, according to G. H. Orr, local weather observer, and this gave an adequate supply of moisture for crop planting.

The May total was even heavier in some parts of this territory. Early plantings are indicative of good crop yields this year and farmers and business men alike are optimistic over the excellent prospects.

Removal of War Tax Lowers Auto Prices

Removal of war tax on automobiles has been announced and as a result the delivered price on cars has been lowered considerably, according to information received by local automobile dealers.

New Mechanic Joins Green's Garage Here

H. C. McGuire, recently of Melrose, New Mexico, has accepted a position in Green's Garage, having been given charge of the mechanical department. Mr. McGuire is a mechanic of 16 years' experience in the automobile and machine business.

Slaton To Join With Twelve Other Cities Of South Plains In Sending Regional Delegation To Fort Worth

Need More Cars To Transport Band To Fort Worth Meeting

More cars are needed to transport members of the high school band to the West Texas Chamber of Commerce convention at Fort Worth, according to information from those who have been actively interested in providing the facilities for the boys to make the trip.

Only eight car owners have notified Chamber of Commerce officials that they can carry members of the band. An almost equal number in addition is needed to care for the remainder of the boys, it is said.

Those who are intending to make the trip to Fort Worth who can carry a member of the band are asked to get in touch with Chamber of Commerce officials.

Texas Avenue Yet Holds City League Top, Although Idle

Texas Avenue, although idle since Monday, retained the leadership of the city baseball league through Wednesday's game. West Side, in second place, was also idle during the same period, but the two teams will meet Thursday evening in the game which will be a crucial one so far as the season's race is concerned.

Through error, in last Tuesday's issue it was stated that the G. R. M. club defeated the West Side the previous Thursday by a score of 16 to 8; and that the Santa Fe team won over the Texas Utilities nine by 4 to 3. The correct report should have been that the G. R. M. won from the West Side by 12 to 8; and that the Santa Fe and Texas Utilities played to a draw, 4-4, the game being called on account of darkness.

Last Wednesday the Santa Fe took the North Side in for a 7 to 3 drubbing; while the previous day the G. R. M. team lost to the Texas Utilities by the close score of 2 to 1.

Due to the fact that Friday's Slatonite goes to press before Thursday evening's game is played, reports of that game are not available for publication until Tuesday's issue. Reports of each Tuesday's game are reported in the Friday issue.

Following this Thursday's game, the G. R. M. and Santa Fe teams will play Friday evening, Texas Utilities and Texas Avenue will play Monday, and West Side will battle North Side Tuesday.

The standing of the teams through Wednesday's game is:

TEAM	P.	W.	L.	Pct.
Texas Avenue	6	5	1	.833
West Side	4	3	1	.750
Santa Fe	5	3	2	.600
Texas Utilities	6	3	3	.500
G. R. M.	6	2	4	.333
North Side	5	1	4	.200

Badges For Fort Worth Convention Are Received Here

Thirty registration badges for the West Texas Chamber of Commerce convention at Fort Worth, June 18-20, have been received at the office of the Slaton Chamber of Commerce. They were sent for distribution here. The registration fee this year is \$2.50 per person, excluding band members. They are registered free.

Slaton people planning to attend the West Texas convention are invited to put in their bid for a registration badge, thus avoiding worry over this matter when they reach Fort Worth. The fee entitles the person registering to free admission to several varieties of entertainment during the convention, such as Texas league baseball games and theater programs.

THE UNCERTAINTY OF LIFE CHICAGO.—Calvin Wason, 45, insurance statistician, was lecturing insurance employees on the uncertainty of life. In the midst of the lecture he collapsed and died.

Miss Louise Lanham To Be Princess From Here

At a meeting of representatives of thirteen South Plains cities held at the Lubbock Chamber of Commerce offices Tuesday afternoon, final plans were decided upon for these cities to co-operate in sending a "South Plains of Texas" delegation to the West Texas Chamber of Commerce convention at Fort Worth, June 18, 19 and 20. This was the announcement made by L. A. Wilson, secretary of the Slaton Chamber of Commerce, who attended Tuesday's meeting as Slaton's representative in forming the plans.

Thirteen Cities Co-operate.

The cities that will co-operate in the movement are: Slaton, Lubbock, Floydada, Lockney, Post, Ralls, Tahoka, Lamesa, Plainview, O'Donnell, Littlefield, Olton and Levelland. Each of these cities will send a princess to the convention, and these princesses will represent their cities in the parade June 19 when a mammoth float decorated as the "South Plains of Texas" entry in the parade will be used to advertise this section of the West. Each princess will carry a shield in the parade bearing the name of her city, thus connecting her city's name with the South Plains section.

South Plains Princess.

Mrs. Paul Miller, secretary of the Tahoka Chamber of Commerce, and recently elected as president of the Commercial Executives association of the South Plains, will be the South Plains princess. Also, Tech college has been invited to have a Tech princess take part in the parade and ride the South Plains float. Miss Louise Lanham, daughter of Mrs. J. S. Lanham, will be Slaton's princess in the parade. She will also participate in the gorgeous pageant to be staged at T. C. U. stadium on Monday evening, June 18.

All the co-operating cities will send their delegations to Fort Worth where general headquarters have been secured at Ellison Furniture company. After reaching Fort Worth the various South Plains delegations will get together there, but will make the trip to the convention as individual towns, not going in a body together from their separate locations.

Wilson Is Chairman.

L. A. Wilson of Slaton has been named chairman of the South Plains delegation, and will be in charge of details of affairs at the convention. He was selected for this work at Tuesday's meeting.

A distinctive feature of the plan is that all members of the several South Plains delegations will wear arm bands bearing the words, "South Plains of Texas." This will be in addition to badges, hat bands or other advertising which each town's representatives will wear showing what city they hail from. A large sign will be displayed in front of the general headquarters bearing the words, "South Plains of Texas," and also having upon it each city's name which is co-operating in the movement.

Six Bands To Go.

Six bands will go from the thirteen cities in the group. They are: Slaton, Lubbock, Floydada, Plainview, Post and Tahoka. When the parade is formed on Tuesday, these bands will follow the South Plains float in the line of march, according to plans announced.

Chamber of Commerce officials here and in the other South Plains cities co-operating have said the group plan will prove very inexpensive for those participating, and it is believed the benefits derived from the standpoint of publicity will be much larger. It is planned to have representatives of the territory present at the general headquarters throughout the convention to receive visitors, hand out literature furnished by the various cities and answer questions about the South Plains section.

Tyler—Six miles Jim Hogg highway between Duck creek and Sabine river will be asphalt-surfaced competing paved road from here to Smith county line.

Lufkin—\$22,000 addition being built to Angriana hotel.

Champagne Fails To Stop Fire In London

LONDON.—Champagne was used—unsuccessfully—to fight a fire which flared at a fashionable dance in Mayfair. Four hundred and fifty guests at a ball given by Mrs. Bower Ismay for her debutante daughter, Miss Bel Ismay, fled to the street when flames from an overturned oil heater spread over the floor and leaped to the hangings, but several resourceful guests lingered to fight the fire with champagne, of which large quantities were available.

The intrepid champagne throwers were routed however, and the fire was not brought under control until fire brigades arrived and used water.

Tech Summer School Has Big Enrollment

LUBBOCK.—Unofficial reports indicate that the enrollment of the summer school at Tech is greater than both previous summer terms.

Although no official announcement has been made, college officials predicted that the enrollment mark of 1,000 would be reached by the end of the week. A long line of students was waiting when the registration offices closed last night, and registration is expected to last for several days.

Teachers reported that the limit had been reached in a number of courses.

Three-fourths of the enrollment up until last night had been of women. Many former Tech students and many school teachers were included.

A number of classes will begin today. School will be held five days a week, starting at 7 o'clock in the morning.

Cattle Stampede In Palace Theatre Film

Thousands of stampeding cattle usually are a menace to human life and property, but in the Paramount-Zane Grey picture, "Open Range," which comes to the Palace theatre Friday and Saturday, they are the sal-

vation of an entire village. When Indians attack Marco, the hero of the picture stampedes the cattle through the town and drives the Indians out.

Lane Chandler, new Western "find," plays the virile cowboy, Tex Smith; Betty Bronson, the "Peter Pan" girl, is cast as Lucy Blake in her first Western and Fred Kohler, "wolf of the screen," is the villainous half-breed.

Cucumbers Popular Food Before Christ

NEW YORK.—All the world seems to have a "hankering" for cucumbers. About 10,000 carloads are shipped to market annually. This is in addition to those grown in greenhouses and small truck patches and marketed locally, also those grown for home consumption.

There are historical references to the cucumber 3,000 years before Christ. It is generally supposed to be a native of India, and was taken to China in 86 B. C. Cucumbers were

known to the ancient Greeks and Romans. Pliny mentions their forced culture. They were grown by Columbus in Haiti in 1494. There is a record of their production by the Indians in Florida. Captain John Smith speaks of growing them in Virginia. The Rev. Francis Higginson tells of seeing them in Massachusetts in 1629.

In five years there has been an increase of 50 per cent in the number of telephones in the city of Toronto.

Chevrolet Gives Dealers Voice In Advertising Plan

DETROIT, Mich. — Renewal of a unique series of advertising conferences, in which the automobile dealer is given a voice in the national advertising program of the factory, was announced here today by John E. Grimm, Jr., advertising manager of the Chevrolet Motor company.

This company is now in the midst of the largest and most comprehensive advertising campaign ever undertaken in the history of the automotive industry.

The first of the new series of dealer conferences, held under the general supervision of Mr. Grimm, took place here a week ago when dealers selected from the domestic Chevrolet organization met with factory officials to discuss the publicity plans of the company for the next few months.

"The object of these advertising conferences," Mr. Grimm explained, "is to keep the home office constantly in touch with problems faced daily by the dealers so that Chevrolet advertising may be guided by actual field conditions and thus prove most effective."

"The assistance given by dealers in these monthly conferences," he continued, "is of invaluable benefit in adding to the efficiency of our advertising. This is particularly true of the newspaper advertising, which, of course, forms the greatest retail advertising force for each individual dealer."

"While every type of advertising, from newspaper, magazine, outdoor and electric spectacular signs to trade papers is discussed, major interest attaches to the newspaper schedule because this makes up by far the largest part of the year's budget. There are now more than 5,500 leading newspapers carrying the Chevrolet message to practically every city, town and hamlet in the United States."

"Particular care is taken in selecting the dealers invited to attend these conferences. Some are chosen because they have very large car contracts. Others because their contracts are very small. Every dealer also comes from a different section of the country. In this manner we get an ideal cross-section of the advertising needs of all classes of dealers in all parts of the United States."

"Dealer advertising conferences will be held every month this summer, with a different group of dealers from different parts of the country present each time."

"Each conference is of two days"

SICKLY, PEEVISH CHILDREN

Children suffering from intestinal worms are cross, restless and unhealthy. There are other symptoms, however. If the child is pale, has dark rings under the eyes, but takes no interest in play, it is almost a certainty that worms are eating away its vitality. The surest remedy for worms is White's Cream Vermifuge. It is positive destruction to the worms but harmless to the child. Price 35c. Sold by CITY DRUG STORE

duration. The first day is given over entirely to the discussion of advertising in all its phases. The second day the dealers are taken to the General Motors proving ground where they are shown the rigid test Chevrolet cars undergo before they are put on the market."

An added feature of the recent conference was a radio party held for the dealers by W. S. Knudsen, president and general manager of the Chevrolet Motor company. The occasion was "Chevrolet Hour" on the General Motors family party program. This was held in celebration of the fact that there have been placed on the road more than a half million bigger and better Chevrolets since January 1, a feat never before duplicated by a new model in a similarly short space of time.

Sorgo Silage Best To Fatten Cattle

It has been found that sorgo silage and sorgo fodder, when fed with milo heads and cottonseed meal as concentrates, are somewhat better than cottonseed hulls for fattening cattle, according to the United States department of agriculture. Cattle which were fed sorgo silage and fodder had more finish, made greater gains and also made greater returns than those fed cottonseed hulls. Cottonseed hulls, however, can be used satisfactorily. There seems to be a very slight difference, if any, in the values of silage and fodder in fattening calves.

In the Southwest thousands of acres of land formerly used for grazing purposes only are now under cultivation and are being planted to cotton, grain sorghum, sorgo (sweet sorghum) and other crops. This region is adapted to the production of cotton and the common varieties of sorghum and farmers there are turning more and more to livestock feeding as a means of utilizing these crops to best advantage.

Miniature Holy Land Is Made By Monk in Alabama

CULLMAN, Ala.—Tucked away in the hills of northern Alabama, about two miles from the town of Cullman, "Little Jerusalem," a miniature Holy Land in the monastic gardens of a family of Benedictine monks, is attracting tourists.

The shrine is the work of a Benedictine lay brother identified only as Brother Joe, who has passed years in its construction. Brother Joe came to St. Bernard college, the Benedictine school near Cullman, from Germany in the early nineties to pursue his studies preparatory to entering the priesthood. He suffered a physical injury, however, which incapacitated him for ordination as a priest, so he became a lay brother.

The name "Little Jerusalem" is something of a misnomer, since the shrine is not a reproduction of Jerusalem. The central and most prominent part of the mound is the grotto of the Blessed Virgin Mary, the nucleus around which all else has been built. It was commenced in 1905. At the present the work covers not more than 500 or 600 square feet.

To the left of the grotto the mound is covered with many miniature buildings, the most imposing of which is the Temple of Solomon. Near the temple are the Palace of Herod, the House of Pilate and the walls of Jerusalem. Outside the walls and as if it were at a distance three crosses stand mounted on a miniature Calvary. At the foot of Calvary is the tomb of Our Lord. In another portion of the

hillside almost directly down from the temple site is Bethesda with its pool of healing waters.

A short distance away is the Well of Jacob and the Cave of Nativity. Proceeding to the right of the grotto there is nothing to suggest the Old Testament and nothing of Palestine. The first building to be seen is an imposing church, the largest single structure of the entire group, measuring two and a half feet in height. Nesting in the miniature hills above the church on winding ways and picturesque settings is a mountain village of the Tyrol.

Further to the right and on the south side of the mound is the Carmelite convent of Lisieux, France, home of the recently canonized saint known as the Little Flower of Jesus. The interior of the convent church is completely furnished and decorated. At the rear of the mound is the cave and grotto of St. Benedict.

All of the material used in the construction has been gathered on the

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Bayer Aspirin. The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monochloroacetic Acid of Salzig, Germany

QUALITY AT LOW COST

Aquatic Bird Eats Underneath Water

The most interesting species of aquatic bird is the little creature popularly known as the "dipper." It is a sort of cousin to the robin, thrush and catbird, the chief difference being its very compact plumage, with an under growth of thick, downy feathers acting as a protection while the bird is under the water. The dipper is to be found in many parts of the world, especially in northern countries, and it readily adapts itself to any peculiar water conditions.

Sometimes a colony of dippers will divide a stream among themselves, each bird occupying a portion thereof as its right and violently opposing any intrusion by its own or any other species. For the most part these birds seek waterfalls and running streams, where the water comes fresh and cool from the hills, leaving here and there deep, clear eddies. About the stones and rocks the diminutive dipper is always hunting for food. In this manner of obtaining it lies his most interesting characteristic.

Sometimes the dippers gather, as if by common consent, and indulge in a series of antics similar to those affected by human beings about to enter the surf. But gradually the birds cease this preliminary proceeding and run quickly into the water, whirling about, splashing it with their wings, now hopping out again and then rising into the air and dropping bodily and running in up to their eyes. Finally, one after another, some diving, others sinking, they all disappear beneath the surface of the water, only a train of bubbles remaining to tell of their movements.

As soon as the dippers enter the water their bodies appear entirely covered with silvery bubbles, so that they look like silver birds darting about. The short, broad wings are raised and moved up and down vigorously, the divers actually flying under the water.

They keep near the bottom, using their sharp claws to cling to the rocks and weeds, and in this way they feed. They fly considerable distance in this manner, but exactly how long they can remain under water has not yet been ascertained.

The water excursions of these birds are by no means confined to the summer season. They have been seen to dash through a hole in the ice and to swim quite a distance beneath.

Bryson — Recently completed oil well near here, Panhandle Oil company's Daugherty No. 1, flowing 150 barrels through tubing.

Odesa — Tests of road scrapers made by city officials to determine machine best adapted for conditioning streets.

Stages Holdup With Horseshoe to Obtain Money to Crack Safe

NEW YORK.—The need of money to buy burglar tools with which to blow a safe was the reason given by Joseph Boru, forty years old, for his bold attempt to hold up Nellie Negri, cashier of the Automat restaurant Thursday afternoon, with half a horse shoe.

Walking up to the cashier Boru took the horse shoe from a newspaper and said, "I'll beat you over the head and kill you if you make an outcry." He reached across the counter and seized a package containing \$120. Then he ran, following Miss Negri, several bus girls and 100 diners whose shouts attracted Patrolman Joseph O'Rourke, who captured him.

Boru was arraigned yesterday in Tombs court before Magistrate Edward Weil, charged with robbery. He pleaded guilty and was held in \$25,000 bail for the grand jury.

Newspaper Phones Church In Sweden

WORCESTER. — The Worcester, Mass., Telegram-Gazette claims the distinction of being the first newspaper in the United States to put through a commercial telephone call to Sweden. The call was placed by George F. Booth, publisher of the Telegram-Gazette, who spoke to the most Rev. Nathan Soderblom, archbishop of Upsala and primate of the church of Sweden.

This call was of particular interest to Worcester, as that city has an exceptionally large Swedish population. The dean of the Swedish clergy of the city, Dr. John A. Eckstrom, was present on the occasion and was able to say a few words personally to Bishop Soderblom.

Borger — Work resumed paving county highway.

Train Dispatching Done By Telephone

NEW YORK.—Train dispatching on the New York, New Haven and Hartford railroad is now done entirely by telephone. The New Haven was one of the first railroads in the United States to make exclusive use of the telephone for this purpose and to eliminate the telegraph and other forms of communication having to do with the direction and routing of trains. By the end of 1923, the New York, New Haven and Hartford railroad plans to use no other form of wire communication than the telephone for any purpose, with the single exception of the telegraph printer, which is used for general message service between divisional points.

RUST LOSS GREAT

LONDON.—Loss of property to the value of 30 billion dollars through the action of rust occurs every year throughout the world, according to an estimate cited by Lord Askwith. He asked the Oil and Color Chemists' association to concentrate upon the invention of some preservative to protect metals.

Bavarian Law Bans Bachelors' Knives

BAVARIA.—The influence of marriage on a man's character is attested by a law in Bavaria which forbids unmarried men to carry open knives in place of the big claspknife every true Bavarian regards as part of his everyday toilet. The married man may do as he likes, but the bachelor is not permitted to show the veriest glimpse of an open blade unless he wishes police escort to the nearest lockup.

Only the married among the gypsies, beggars, tramps and plate layers on the railway are treated in the same ignominious fashion. It is argued that these occupations are not conducive to calmness and sobriety, even among those who have ostensibly settled down.

Trouble has arisen once or twice during the past months as to whether a man whose marriage has been ended either by divorce or death can be considered a bachelor again. According to the "Frankfurter Zeitung," the latest case of an arrest for knife carrying has been settled in favor of the widower or divorced husband. He

is still ranked as married. The argument runs that either he still has a family to provide for, in which case his responsibilities are the same as they were before, or else the indisputable fact of having been married and the memories thereof must have left an indelible mark on him. The careless case of bachelorhood, it is held, can never be recaptured.

GET GOOD BULLS

BRYAN.—A limited number of Brazos county dairymen will be supplied with purebred Jersey bull calves by the Texas Agricultural Experiment station, according to an offer made

by Dr. J. L. Lush to the local Chamber of Commerce.

J. Lynn Thomas, dairy specialist of the extension service, urged that farmers and dairymen take their time in establishing creameries, stressing the point that the only sure foundation for a successful creamery industry is improvement of dairy herds. If adequate herds of the right kind are available, a successful creamery practically is certain, he said.

TRANS-OCEANIC FLIGHTS

With the coming of warmer weather, the trans-oceanic flights which have been held in abeyance during the winter months have burst forth into the limelight.

The Bremen plane, carrying two Germans and an Irishman, has completed the first successful east-to-west transatlantic flight; the Southern Cross, with a crew of four, made a successful flight across the Pacific to the Hawaiian Islands, then another to the Fiji Islands, and at the present writing is on its way to Australia; Miss Earhart, a feminine aviator said to resemble Lindbergh, is about to hop off for Europe from Newfoundland; and Miss Edith Boll, another feminine air-enthusiast, has notified of her intentions to try the transatlantic hop.

During the summer there will be a large number of other flights, particularly so if those now under way continue to be successful. This will mean that some lives will be lost, as was the case last summer. Then a wave of sentiment will gather against trans-oceanic flights.

However, the lives of a few daring ones will not be too great a price for the advancement of the world. Pioneers have always paid the price, and those who come later reap the benefits of their work. It is glorious adventure in an age when much of the romance of life has been lost in commercialism.

PUSSYFOOTING ON CRIME

An editorial in a leading eastern newspaper, in discussing the crime record of the United States, claims that in order to check crime we must have a more drastic method of selective immigration. To substantiate its argument it points out a number of foreign names among those indicted in Chicago's \$3,000,000 liquor ring conspiracy.

Without going into the immigration question or the name which an individual bears, will the mere passage of more restrictive legislation of one kind and another which continually tends to encroach upon the rights of law-abiding citizens, reform the criminal? The majority of remedies proposed for crime dodge the main issue, namely, quick and speedy capture, trial and conviction of the lawbreaker.

We have a mania for passing laws which offer loopholes for the escape of the criminal. As an example, an honest householder owns a revolver and a criminal owns a revolver. In order to prevent the criminal's using a gun, legislation is proposed which would make it unlawful to own a gun. The peaceful citizen immediately has

to become a lawbreaker or dispense with his gun. Will such a law in any way tend to disarm the criminal? Not that anybody has a record of.

If a criminal obeyed the law, he wouldn't be a criminal. Then why not make our legislation applicable to him, and not a dragnet affair which takes in every person who has committed no crime? In other words, punish the guilty and not the innocent. Such a policy will do more to secure law enforcement than pussy-footing around the main issue.

ADVERTISING HELPS

The electric railways of this country now spend \$6,000,000 a year in advertising. Ten years ago they spent practically nothing. The advent of competition has brought about the change, a change common to all progressive industries. It has been found that successful business comes from first selling a company's policy to the public.

Because of advertising and modern innovations in service and efficiency, the street railways are becoming more firmly established than ever. The widespread belief of a few years ago that private automobiles and busses had sounded the street car's death knell has proven groundless.

Only a small percentage of any community's working population rides in motor cars. Busses have shown that they cannot compare in efficiency of operation with street railways in handling mass transportation during rush hours.

As an industry, the street railway has in the past few years rapidly improved and modernized itself, and the public has responded.

COFFEE IN EAST TEXAS

The June number of Bunker's Magazine says that East Texas has been growing a coffee for years and didn't know it. The bean when roasted serves every purpose of coffee and passes for coffee without question when served at the table. East Texans know it as the jack bean, and the discovery of its beverage possibilities was partly accident and partly the persistent feeling of an East Texan that the bean ought to be good for something if only he could find out what.

Bunker's relates that a banquet of 500 persons was served with this "coffee" and that nobody knew it wasn't coffee until told about it. It is seriously proposed to commercialize this

Announcement

Succeeding Mr. L. E. Jobe. I will appreciate your patronage.

A. J. KAHLICH
TELEPHONE NO. 353

product for domestic consumption on a large scale.

The prospects of East Texas coffee may or may not be all that is claimed, but the story of their uncovering illustrates how little we know about the state in which we live or about its possibilities agriculturally. For all we know we are growing wild plants which, if reduced to cultivation, would afford us crops more profitable than any we now raise.—Semi-Weekly Farm News.

Letters

The unexpected home-going of Mrs. Ozell Stalcup Hobbs, on May 21, 1928, was not only a shock to the family, but to our church as well. She had been a consistent member of the Baptist church since 1919; was loved and appreciated by all who knew her. Mrs. Hobbs lived in Slaton for some years, was married to T. J. Hobbs in 1920 and moved to Vega, Texas, where she resided at the time of her death. She was 27 years of age, was the daughter of Mr. and Mrs. J. R. Stalcup of Slaton.

She leaves a devoted husband and two children, with her father, mother, brothers and sisters, to mourn her death.

Mrs. Hobbs was a sister of Mrs. Moody Puckett, who is a member of our Sunday School class, and we grieve with her over the loss of her

Hindu Women Are Builders of Roads

CALCUTTA.—In the hills of India road making is a festivity—no doubt because most of the road makers are women.

The cart road that winds dizzily 7,000 feet from the hot plains to the blessed coolness of the hill stations has to be repaired after the torrential rains of the monsoon.

The word goes forth. Down from the little wooden huts that cling to the sides of the steep "khud" pour the womens dressed in their holiday best. Green, red, mauve, orange and blue, their saris make an intoxicating feast of color.

The road resounds to the pretty clashing of the thick gold rings round their ankles. Heavy gold earrings weigh down their ears. Round their necks they wear their whole inherited wealth in the shape of heavy gold beads or flat gold necklaces.

Chattering and laughing, they run backward and forward with oblong baskets of stones on their backs. These are slung from their foreheads by a thick broad band—a load which no white woman could attempt without suffering.

Some forty or fifty women are harnessed by long ropes to the huge roller. A man, often the only one, acting as freeman, starts a rhythmical chant. This is taken up smilingly by the women and sung with much vigor. It gives, with metronomical regularity, the time for the pull on the rope.

The road mended, the roller is garlanded with many kinds of flowers, often worked into intricate designs.

The women cover themselves with blossoms and drag the symbol of their labor to a convenient spot.

Then they light fires and cook their daal and rice, or flat chupatties, beside it. Refreshed, they form a ring, and with the roller as presiding genius they hold a "nauch" (dance).

Later the night looks down on the garlanded roller. One by one the dancing workers have dropped where they stood into the heavy, dreamless sleep which happy labor, crowned by pleasure, brings.

Count Receives No Offers For Title

MONTREAL.—Count Leon Gnielinski, of Warsaw, Poland, who recently advertised his title for sale for \$50,000 in a New York newspaper, has decided to remain in Canada. He has received no offer for his title. Count Gnielinski declared that newspapers in carrying stories of his offer, had made people dubious as to the authenticity of the title.

"Had the stories not appeared," said the Count, "I would have been able to sell it. Hundreds of Americans are interested in foreign titles. They are ready buyers." He said he was going to Manitoba and secure work there.

Whales Play Within Sight Newport, R. I.

NEWPORT, R. I. — Perhaps they were trying to find their way to New Bedford, once the home of all good whales. Whatever their destination, five large whales playing about in the stretch between Beaver Tail light and the Brenton's Reef lightship afforded entertainment for many persons.

Asks To Be Jailed After Marriage Fuss

NEW YORK.—Three times yesterday Frank Grant telephoned the police that he wanted to go to jail. The fourth time Patrolman Sharkey Cohn was sent to see if Grant had any grounds for the authorities to accede to his demand. Grant was obliging. "I'll break a window or something."

PREVENTS INFECTION

The greatest discovery in flesh healing is the marvelous Borosone, a preparation that comes in liquid and powder form. Houston Able To House Delegates

HOUSTON.—Because of the size of the city, comparatively speaking, the general impression over the country has been that Houston will not be able to comfortably house those who come to the convention. This situation was indeed a problem when Houston was first selected as the 1928 convention city, but through the co-operation of Houston citizens this problem has been solved.

It is estimated that there are now available housing facilities in Houston apartments and private homes to comfortably house 30,000 persons daily, and other accommodations are being received hourly. These rooms are all within two blocks of transportation, have been inspected and found first-class and are available at the call of the housing committee. Rates will be from \$2 to \$6 per person. All hotel rooms have been assigned delegates, alternates and newspaper correspondents, in accordance with a contract with the Democratic committee.

Existing tourist camp facilities have been expanded to accommodate 3,000 cars, or 10,000 persons. Two new tourist camps are under construction with facilities for 5,000 cars or 15,000 persons. These camps have running water, bathing facilities and sewage. Many of them have cabins and tents available.

Town Is Built Around Red Barn on Prairie

RED BARN, Texas.—An old barn that was moved from a town to the prairie now is the center of this new town, built around it and bearing its name.

Ira Yates bought the barn in Rankin thirteen years ago and had it hauled to the top of a great hill on his ranch, thirty-five miles away. It was painted red and became a landmark as well as a shelter for horses, cowboys and ranch tools.

After the discovery of oil in Pecos county the barn sheltered oil men and drilling equipment, but it no longer invites under its roof all who come to the top of the hill, for there are many other buildings, housing some 1,000 inhabitants.

A SPLENDID FEELING

Suffering With SICK HEADACHES

Mr. Charles F. Todd, of Estesburg near Waynesburg, Ky., says:

"I was suffering with nervous headaches. About once a week I would have these headaches, and have to quit work, and go to bed for about twenty-four hours. I would have pains in my neck, and right behind my right ear."

"A merchant at Estesburg told me to try taking Black-Draught, which I did."

"It relieved me. From that time on, I would take Black-Draught as soon as I felt like I was going to have one of those headaches—and they wouldn't come on."

"Every few weeks, I take three or four doses of Black-Draught, and I feel so well, and do my work, and don't lose any more time with headache."

Radio Broadcast Of Legion Meet Planned

SAN ANTONIO.—Every radio station in Texas is being enlisted in a state-wide plan for broadcasting programs and information on the American legion national convention, to be held in San Antonio October 8 to 12, Philip B. Stapp, general convention director, announced today.

Special emphasis is to be laid by stations out over the state on the state-wide hospitality program which is being worked out in connection with the convention under the leadership of the Texas department of the legion.

In addition to this out-state program, broadcasting is being done regularly by San Antonio stations. Mr. Stapp stated WQAI has planned a series of special convention broadcasts monthly up to the opening of the convention. KTSA has staged several special broadcasts and plans others, in addition to making announcements nightly on the convention. KTAP, KGCI, KGDR and KGRC, at San Antonio, are making announcements.

Neighborhood Garage To Be Next In Line

"We've heard of the neighborhood grocer, the neighborhood tailor, and now we are beginning to hear some sales promotion work in behalf of the neighborhood garage," says R. A. Armstrong, service manager of the

Oakland Motor Car company.

In the extension of field service, motor car manufacturers have, through their dealers, appointed a number of reliable garages as authorized factory service stations. These authorized garages receive the technical service data supplied by the car manufacturer and are required to have a representative in attendance at the periodic service clinics held by the factory, that they may always be informed on the latest repair methods and be familiar with the adjustment and maintenance of any new design. Among the strict requirements is the use of only standard factory repair parts.

Many car owners will find one of these authorized factory service stations or an authorized dealer's service station in their immediate community where they may enjoy the advantages of neighborhood trading.

Completed telephone conversation in the United States during the year 1927, averaged 73,665,000 daily.

PRODUCT OF GENERAL MOTORS

Seems as though "Paw" is out in the garage all the time since he lined it with Sheetrock and made it cozy and comfortable. Working in his shop all the time—and the old car never ran as well as it does now.

SHEETROCK—the fireproof wall-board, is easy to apply—saws and nails like lumber—big broad sheets that cover the space quickly (standard building sizes). Stop and look at a sample, or telephone—

CONOCO + ETHYL — Knockless Miles

CONOCO ETHYL The YARDSTICK for COMPARING MOTOR FUELS

THE quickest way to appreciate the superiority of Conoco Ethyl Gasoline is by direct comparison. You know the results you get from ordinary gasoline. So the next time the tank is empty fill up with Conoco Ethyl and note particularly these outstanding points of superiority:

1. No knocks.
2. Smooth, even flow of power.
3. Quicker acceleration.
4. Greater speed and pulling power on the long, hard hills.
5. Practically no vibration and no overheating of the motor.

Conoco Ethyl Gasoline is a combination of Conoco, the extra miles gasoline, and Ethyl brand of Anti-Knock compound—developed by General Motors. It is the standard—the yardstick for comparing motor fuels. A gasoline better than Conoco Ethyl has yet to be made.

Fill at the Conoco Ethyl pump.

APPRECIATION

We are deeply appreciative of our many Slaton friends who offered their assistance and words and deeds of sympathy during our sad misfortune of losing our little daughter and sister, Ella Mae. The beautiful floral offerings at the funeral were greatly appreciated, also. We sincerely thank you, one and all.

Mr. and Mrs. F. V. Williams and children.

City Line Club To Meet Next June 13

Twenty-one members and two visitors were present at the regular meeting of the City Line club held May 23 at the Slaton club house.

The next meeting will be held June 13 with Mrs. Evans and Mrs. DeLay as hostesses, according to an announcement made.

Infertile Eggs Gain Favor Of Producers

Infertile eggs are being produced almost exclusively by poultry owned by growers in the Slaton territory, in order to secure a higher price for the products, according to information from dealers.

Many of the poultry growers are identifying their produce by rubber stamping each egg, thereby creating a demand for their brand, and at the same time necessitating a quality product.

League of Nations Asked to Aid Beauty

GENEVA, Switzerland.—Even the Galveston beauty contest has a League of Nations angle. Enthusiastic admirers of a beautiful maiden of Vilnius, Poland, the city which Lithuania says it was despoiled of "by Poland, wrote to Sir Eric Drummond that the city had unanimously elected "Miss Poland," but that unhappily funds were lacking to get her from Vilna to Galveston.

Could not the league "facilitate the voyage?" inquired the writers. Alas, the league could not. Sir Eric was obliged to reply that Geneva possessed no funds for international beauty contests.

"Miss Poland" is just twenty and has captured twelve prizes in local beauty competitions.

'Legion of Condemned' At Palace Next Week

The critical eye of the American picture audience is forcing absolute accuracy of detail in the filming of productions today, according to William Wellman, Paramount director. And, for that reason, the man who directed "Wings" which is now hailed as the greatest motion picture road-show ever filmed, surrounded himself with the best of technical advisors as he started work on the companion picture to "Wings," "The Legion of the Condemned," coming to the Palace theatre Monday and Tuesday.

In spite of the fact that the young director lived the life of a flier at the front during the war as a member of the Lafayette squadron, he insisted upon four other aviation experts being assigned to his unit because, as he believes, "everything must be correct if the production is to meet favor with American audiences."

Big Spring Maize Contest Under Way

BIG SPRING. — Seventy entries have signed up for the More Maize on Five Acres contest being sponsored by the Big Spring Chamber of Commerce. Much enthusiasm is being manifested over the contest this year due to the valuable premiums awarded last year. One of the premiums this year is a Duroc-Jersey sow to be awarded by J. J. Sutton of Spearman, Texas.

May Let Deep Well Contract Here Soon

Further action of the development of the recent water supply sources for the city of Slaton, discovered in a test well recently dug by the city, will probably be taken at a meeting of the city commission to be held Friday night at the city hall.

Bids for the contract to dig the deep well to increase the city's water supply will be received, and it is possible that the contract will be let very soon.

Wilson Fractures Rib in Unusual Way

L. A. Wilson, secretary of the local Chamber of Commerce, is nursing a fractured right rib as result of an unusual accident which occurred last Saturday night.

Wilson was lowering his small daughter from his lap while he was sitting in a barber's chair in a local shop, when his rib struck the metal part of the chair's arm, causing the fracture.

Odessa—Construction of new high school building here will be started shortly.

Amarillo—Great West Mill and Elevator company builds \$250,000 plant addition.
